

Recommendations / Observations

HC1 Any entrance gates shall be set constructed so as to be incapable of opening towards the highway and shall be retained in this position and form of construction for as long as the dwelling/development hereby permitted remains in existence.

HC2 The gradient of the access shall be constructed so as not to exceed 1 in 30 for the first 15 metres measured from edge of the adjoining carriageway along the centre line of the access and shall be retained at this gradient for as long as the development remains in existence.

HC3 The centre line of the first 15 metres of the access road measured from the edge of the adjoining carriageway shall be constructed at right angles to that edge of the said carriageway and be retained at that angle for as long as the development remains in existence.

HC7 Prior to the commencement of the development the area of the access to be used by vehicles is to be constructed to a minimum of 410mm depth, comprising a minimum of 250mm of sub-base material, 100mm of bituminous macadam base course material and 60mm of bituminous macadam binder course material for a distance of 15 metres from the edge of the adjoining carriageway. Any use of alternative materials is to be agreed in writing by the Local Planning Authority prior to the access being constructed.

HC8 Prior to the occupation of any dwelling, provision shall be made within the curtilage of the site for the parking of not less than one car per bedroom excluding any garage space provided together with a turning space such that all vehicles serving the site may both enter and leave the site in a forward gear. The parking and turning areas shall be retained for their designated use for as long as the development hereby permitted remains in existence.

HC10 The gradient from the back of the footway/verge to the vehicle parking areas shall be constructed so as not to exceed 1 in 15 and shall be retained at this gradient for as long as the dwellings remain in existence.

HC12 The width of the access carriageway, constructed as Condition HC7 above, shall be not less than 5.5 metres along the access road and shall be maintained at this width for as long as the development remains in existence.

HC19 No building shall be occupied before the estate road carriageway and one footway shall be constructed to and including binder course level to an adoptable standard including the provision of any salt bins, surface water drainage and street lighting in front of that building and to the junction with the county highway.

HC20 The estate road carriageway and all footways shall be fully completed, in accordance with the details to be agreed in writing by the Local Planning Authority, upon the issuing of the Building Regulations Completion Certificate for the last house or within two years from the commencement of the development, whichever is the sooner. The agreed standard of completion shall be maintained for as long as the development remains in existence.

HC26 When installed there shall be a minimum clearance of 6 metres from the nearest part of the adjoining highway verge or footpath to any part of the soakaway installation.

HC29 All surface water run-off is to be collected and discharged via a piped system to a soakaway located within the site no less than 6 metres from the highway. This system shall be retained and maintained for as long as the development remains in existence.

HC32 No storm water drainage from the site shall be allowed to discharge onto the county highway.

In the interests of highway safety.

PCC Building Control-

Building regulation approval will be required.

Wales and West Utilities-

According to our mains records Wales and West Utilities has no apparatus in the area of your enquiry. However gas pipes owned by other GT's and also privately owned may be present in this area. Information with regard to such pipes should be obtained from the owners.

Safe digging practices, in accordance with HS(G)47, must be used to verify and establish the actual position of mains, pipes, services and other apparatus on site before any mechanical plant is used. It is your responsibility to ensure that this information is provided to all persons (either direct labour or contractors) working for you on or near gas apparatus.

Severn Trent Water-

Thank you for the opportunity to comment on this planning application. Please find our response noted below:

With Reference to the above planning application the company's observations regarding sewerage are as follows.

I can confirm that we have no objections to the proposals subject to the inclusion of the following condition:

- The development hereby permitted should not commence until drainage plans for the disposal of foul and surface water flows have been submitted to and approved by the Local Planning Authority, and
- The scheme shall be implemented in accordance with the approved details before the development is first brought into use. This is to ensure that the development is provided with a satisfactory means of drainage as well as to prevent or to avoid exacerbating any flooding issues and to minimise the risk of pollution.

Please note if you wish to respond to this email please send it to Planning.apwest@severntrent.co.uk where we will look to respond within 10 working days. Alternately you can call the office on 01902 793851.

If your query is regarding drainage proposals, please email to the aforementioned email address and mark for the attention of Rhiannon Thomas (Planning Liaison Technician).

PCC Environmental Health-

Foul drainage

Environmental Protection has no objection to the proposal to connect to the mains sewer.

Construction-phase noise control

For the protection of amenity for nearby residential properties, Environmental Protection recommends the following condition for the control of construction-phase noise:

“Demolition or construction works shall not take place outside the hours of 0800 to 1800 Mondays to Fridays and 0800 to 1300 on Saturdays and at no time on Sundays or Public Holidays.”

PCC Ecology-

Thank you for consulting me with regards to planning application P/2017/1056 which concerns the outline application for proposed residential development comprising of up to 6 dwellings and all associated works at Land adjacent to Parc Bronydd, Llansantffraid ym Mechain, Powys.

I have reviewed the proposed plans as well as local records of protected and priority species and designated sites within 500m of the proposed development. The data search identified 70 records of protected and priority species within 500m of the proposed development – no records were for the site itself.

There are no designated sites present within 500m of the development.

Great Crested Newts

I note that there are 3 ponds within 365m of the proposed development and from local records of protected and priority species that records of great crested newts located within 1km north of the proposed development site – consideration for suitability for development site to support Great Crested Newts identified – Great Crested Newts being a European Protected Species.

Having reviewed information available in form of aerial images the habitat present at the site of the proposed development offers unfavourable suitable opportunities for Great Crested Newt terrestrial habitat. Given the lack of suitable habitat and habitat connectivity from the ponds to the proposed development site, as well as the topography of the land between the development site and location where great crested newts have been recorded - it is considered that the proposed development would therefore not result in the loss of resting sites for this species or result in a barrier to their dispersal to surrounding suitable habitat – should they be present.

Tree and Hedgerow Replacement and Protection Plan

The proposed dwelling appears to be on land of poor semi-improved grassland which is considered to be of low ecological value. However, the hedgerow boundary with scattered semi-mature and mature trees to the south is considered be of ecological value. Given the

proximity of development and development works to the surrounding trees and hedgerows, it is considered prudent to require information from the applicant as to how these features biodiversity importance for wildlife will be protected during the construction period of works. The UDP policies ENV2 and ENV6 identify the need to protect or provide compensation for impacts to hedgerows and trees. UDP Policy ENV2 states that:

‘Proposals which are acceptable in principal should:

3. Seek to conserve native woodlands, trees and hedgerows’

UDP Policy ENV6: Sites of Regional and Local Importance, makes reference to Powys LBAP habitats and species which include hedgerows under the Linear Habitats Action Plan – ‘Linear habitats are important to a wide variety of species as refuges, breeding and feeding sites and as links between habitats of high biodiversity value’. Hedgerows are also listed as a "habitat of principal importance for the purposes of conserving biodiversity" as identified in on Section 7 of the Environment (Wales) Act 2016, and are beneficial to a wide range of biodiversity including bats, nesting birds, small mammals, lichens and fungi.

I note from the proposed plans that new hedgerow planting is proposed as well as possible removal or translocation of the existing hedgerow to improve the visibility splay associated with the proposed development.

Where impacts to trees and hedgerows are identified an appropriate compensation strategy will be required, where possible translocation of the existing hedgerow should be considered, if this is not considered possible at this location replacement hedgerow planting would need to be identified.

Where it is necessary to remove any trees or hedgerows a Tree and Hedgerow Replacement and Protection Plan will need to be secured through an appropriately worded condition. This plan will need to identify appropriate compensation planting for the loss of any trees or hedgerow – details of the location, length and species as well as an appropriate aftercare scheme will need to be identified – species used will need to be native and reflect the hedgerows present in the local area.

Wildlife Sensitive Lighting Plan

Careful consideration will need to be given to any external lighting, measures will need to be identified to minimise impacts to nocturnal wildlife commuting and foraging in the local area. It is therefore recommended that a Wildlife Sensitive Lighting Plan is secured through an appropriately worded condition.

Landscaping Plan

If it is proposed to provide landscaping as part of the potential development consideration should be given to the development of a native landscape planting scheme. It is recommended that details of any landscaping proposed are submitted in a detailed Landscape Planting Scheme including proposed species mixes, planting and aftercare schedules. It is therefore recommended that a Landscaping Plan is secured through an appropriately worded condition.

Biodiversity enhancements

As the application is an outline application further details will be submitted at a later date as reserved matter consideration should be given to incorporate biodiversity enhancements.

In accordance with Part 1 Section 6 of the Environment (Wales) Act 2016 Local Authorities are required to Maintain and Enhance biodiversity through all of its functions – this includes the planning process. It is therefore recommend that consideration is given to opportunities to incorporate biodiversity enhancements to ensure net biodiversity benefits through the proposed development. These measure could include:

- Provision of bird and bat boxes including the details of the number, type and location of these boxes;
- A wildlife buffer strip and a scheme of appropriate management of these areas, hedgerows should be retained within buffer strips and should be unlit or lighting to be directed away from the hedgerows to create dark movement corridors for nocturnal wildlife through the site;
- Provision of wildlife friendly landscape planting.

Should biodiversity enhancement measures be proposed as part of the development details of these features identified will need to be specific and detailed on submitted plans (i.e. details regarding locations, dimensions and numbers will need to be provided) and achievable.

Therefore should you be minded to approve the application I recommend inclusion of the following conditions:

Prior to commencement of development a Tree and Hedgerow Protection Plan in accordance with BS:5837:2012 shall be submitted to the Local Planning Authority and implemented as approved and maintained thereafter unless otherwise agreed in writing with the LPA.

Reason: To comply with Powys County Council's UDP policies SP3, ENV2, ENV3 and ENV6 in relation to The Natural Environment and to meet the requirements of TAN 5: Nature Conservation and Planning, Welsh government strategies, and Part 1 Section 6 of the Environment (Wales) Act.

Prior to the commencement of development a detailed lighting design scheme to take into account any impacts on nocturnal wildlife into consideration shall be submitted for written LPA approval and implemented as approved and maintained thereafter unless otherwise agreed in writing with the LPA.

Reason: To comply with Powys County Council's UDP Policies SP3, ENV3 and ENV7 in relation to The Natural Environment and to meet the requirements of Planning Policy Wales (Edition 9, November 2016), TAN 5: Nature Conservation and Planning and Part 1 Section 6 of the Environment (Wales) Act.

Prior to the commencement of development a detailed landscaping scheme shall be submitted to and approved in writing by the Local Planning Authority. The submitted landscaping scheme shall include a scaled drawing and a written specification clearly describing the species, sizes, densities and planting numbers proposed as well as aftercare measures. Drawings must include accurate details of any existing trees and hedgerows to be retained with their location, species, size and condition.

Reason: To comply with Powys County Council's UDP Policies SP3 and ENV3 in relation to The Natural Environment and to meet the requirements of Planning Policy Wales (Edition 9, November 2016), TAN 5: Nature Conservation and Planning and Part 1 Section 6 of the Environment (Wales) Act 2016.

PCC Rights of Way-

09/10/2017-

Thank you for consulting Countryside Services on the above application.

The proposed development could impact upon and possibly obstruct up to three Public Rights of Way. It is not apparent that the public footpaths concerned have been accommodated in the proposal. Countryside Services therefore objects to the proposed development.

The applicant will need to amend the plans to accommodate the public rights of way and/or seek to divert the public footpaths.

Cadw-

Thank you for your email of 20 September 2017 inviting our comments on the above planning application.

Advice

Having carefully considered the information provided with this planning application, we have no objections to the impact of the proposed development on the scheduled MG216 Roman Supply Depot, Llansantffraid ym Mechain. Our assessment of the application is given below.

Our role

Our statutory role in the planning process is to provide the local planning authority with an assessment concerned with the likely impact that the proposal will have on scheduled monuments, registered historic parks and gardens, registered historic landscapes where an Environmental Impact Assessment is required and development likely to have an impact on the outstanding universal value of a World Heritage Site. We do not provide an assessment of the likely impact of the development on listed buildings or conservation areas, as these are matters for the local authority. It is for the local planning authority to weigh our assessment against all the other material considerations in determining whether to approve planning permission.

National Policy

Applications for planning permission are considered in light of the Welsh Government's land use planning policy and guidance contained in Planning Policy Wales (PPW), Technical Advice Notes and circular guidance.

PPW (Chapter 6 – The Historic Environment) explains that the conservation of

archaeological remains is a material consideration in determining a planning application, whether those remains are a scheduled monument or not. Where nationally important archaeological remains, whether scheduled or not, and their settings are likely to be affected by proposed development, there should be a presumption in favour of their physical protection in situ. It will only be in exceptional circumstances that planning permission will be granted if development would result in an adverse impact on a scheduled monument (or an archaeological site shown to be of national importance) or has a significantly damaging effect upon its setting. Technical Advice Note 24 : The Historic Environment elaborates by explaining that there is a presumption against proposals which would involve significant alteration or cause damage, or which would have a significant impact on the setting of remains.

PPW also explains that local authorities should protect parks and gardens and their settings included in the first part of the Register of Landscapes, Parks and Gardens of Special Historic Interest in Wales, and that the effect of a proposed development on a registered park or garden or its setting should be a material consideration in the determination of a planning application.

Assessment

The application area is located some 260m west of scheduled monument MG216 Roman Supply Depot, Llansantffraid ym Mechain.

The proposed development will be partly screened from view from the scheduled monument by topography, existing buildings and vegetation. It will not be located in any identified significant view and consequently, at worst, we consider that the proposed development will cause very slight damage to the setting of scheduled monument.

CPAT-

Thank you for the consultation on this application.

I write to confirm that there are no archaeological implications for the proposed development at this location.

Representations

Three letters of objection have been received from public representations. The letters can be summarised as follows:

- On street parking
- 5 properties still undeveloped on existing estate
- Impact on public rights of way
- Loss of light and privacy to adjoining properties
- Scale of properties
- Drainage concerns given the topography of the ground
- Access concerns
- Limited job opportunities
- Impact on services
- Noise

- Wildlife concerns

Officer Appraisal

Section 38 (6) of the Planning and Compulsory Purchase Act 2004

Members are advised to consider this application in accordance with Section 38 (6) of the Planning and Compulsory Purchase Act 2004, which requires that, if regard is to be had to the development plan for the purpose of any determination to be made under the Planning Acts, the determination must be made in accordance with the plan unless material considerations indicate otherwise.

Principle of Development

The application site is located entirely outside but adjoins the settlement development limits for Llansanffraid-ym-Mechain as defined by the Powys Unitary Development Plan (2010). Outside of settlement boundaries, UDP Policy HP4 applies and states that '*outside settlement boundaries, proposals for new residential development will only be approved where they comply with UDP Policies HP6, HP8 or HP9*'. Policy HP6 relates to rural enterprise dwellings, policy HP8 relates to affordable dwellings adjoining a settlement boundary and Policy HP9 relates to affordable dwellings within rural settlements. It is considered that the proposed development does not comply with UDP Policy HP6, HP8 or HP9. The proposed development is therefore not in accordance with the UDP and should be considered as a departure.

Housing Land Supply

The departure is being justified by the applicant on the basis that Powys County Council does not have a 5 year housing land supply.

Paragraph 9.2.3 of Planning Policy Wales states that '*Local planning authorities must ensure that sufficient land is genuinely available or will become available to provide a 5 year supply of land for housing judged against the general objectives and the scale and location of development provided for in the development plan.*'

The Powys Joint Housing Land Availability Study (JHLAS) 2016 states that there was 2.2 years supply of housing land in the Powys Local Planning Authority (LPA) area. Failure to have a 5-year housing land supply is an important material consideration that should be taken into account when determining this scheme. Technical Advice Note 1: Joint Housing Land Availability Studies (2015) states as follows:

“The housing land supply should also be treated as a material consideration in determining planning applications for housing. Where the current study shows a land supply below the 5 year requirement or where the local planning authority has been unable to undertake a study, the need to increase supply should be given considerable weight when dealing with planning applications provided that the development would otherwise comply with development plan and national planning policies”.

Whilst TAN 1 confirms that the need to increase housing land supply should be given considerable weight, it is emphasised that this is only where the development would otherwise comply with development plan and national planning policies. Therefore, all material planning considerations are required to be taken into account as are all relevant national and local planning policies and balanced with the undersupply of housing land currently available in Powys.

Sustainability

When providing additional housing it is important to consider whether the scheme can be considered to be sustainable development. This can relate to a wide range of matters including public transport provision and access to education, employment opportunities and other services.

The site itself is adjacent to the development boundary of Llansanffraid-ym-Mechain which is identified in the UDP as a Key Settlement. Llansanffraid benefits from good road communications and has a wide range of community services and facilities including a church, chapel, primary school, Doctors surgery, Industry, Recreational space and numerous public houses and shops.

In light of the range of services located within a short travelling distance of the development site, officers consider that there is an argument to support the principle of residential development. Therefore, the proposed site is considered to be a sustainable location for residential development.

Scale, Design and Appearance

UDP policy HP5 (Residential Development) indicates that development proposals will only be permitted where the scale, form and appearance of the development generally reflects the character and appearance of the existing settlement.

Whilst scale, appearance, layout and landscaping are reserved matters not to be considered as part of this application process, the applicant has provided an indicative layout. The proposed scheme indicates 6 dwelling of varying designs and scales including a mixture of detached and semi-detached dwellings with detached dwellings.

The application is located adjoining the existing residential estate of Parc Bronhyddon with

the access joining onto the existing estate roadway. It is considered that the indicative layout highlights a development that would form a natural extension to the existing residential development. Whilst the site is noted of being of quite steep topography it is considered that an appropriate development could be incorporated into this area without unacceptably impacting on the character and appearance of the surrounding area.

Whilst therefore it is acknowledged that matters relating to appearance, layout and scale have been reserved for future consideration, on the basis of the plans provided, it is considered that the application site is capable of accommodating the dwellings without unacceptably adversely affecting the character and appearance of the area or amenities enjoyed by occupants of neighbouring properties compliant with UDP policies SP5, GP1, GP3, ENV2 and HP5.

Amenity

Policy GP1 of the Powys Unitary Development Plan states that the amenities enjoyed by the occupants of nearby neighbouring properties should not be unacceptably affected by development proposals and the proposal should complement and where possible enhance the character of the surrounding area.

The site layout is a reserved matter and not to be determined at this stage; however, the indicative site layout plan indicates that the proposed dwellings have sufficient distance to not have a significant adverse impact upon the amenities enjoyed by the occupants of neighbouring properties.

Concerns have been raised over the proposed dwellings located adjoining the two existing dwellings on the west elevation and the potential to cause loss of light. Whilst the layout is for indicative purposes only the distances indicated between the properties is approximately 25 metres, whilst the topography of the land is noted it is considered that the privacy and amenity of neighbouring residential dwelling can be appropriately secured at the time of the reserved matters.

It is therefore considered that the layout as indicated is considered to be appropriate and would provide ample space for the proposed dwellings to be developed without compromising the amenity of neighbouring residential properties and therefore comply with policy GP1 and GP3 of the Powys Unitary Development Plan 2010.

Landscape and Visual Impact

Policy ENV2 of the Powys Unitary Development Plan seeks to ensure that the proposed development will not have an unacceptable adverse impact upon the Powys Landscape. Development proposals should be design in a way to be sensitive to the character and appearance of the surrounding area and landscape.

In terms of landscaping the submission includes the retention of the exiting native hedgerows which surround the application site. Landscaping is a reserved matter and therefore detailed proposals would be considered at a later date.

Whilst the site would be visible from public vantage points including the public highways, taking into account the location of the application site which is adjacent to existing residential

development it is considered that the visual impact and the proposed scale of the dwellings, it is considered that a satisfactory detailed design could come forward to reflect the overall character and appearance of the settlement and surrounding area.

In light of the above, it is considered that the proposed development complies with policy ENV2 of the Powys Unitary Development Plan 2010.

Highways Safety and Movement

UDP policy GP4 indicates that planning permission will be dependent upon adequate provision for access including visibility, turning and parking. Access to the site would be gained off Parc Bronhyddon estate which then joins on to the A495 County Class I Highway.

The Highway Authority has been consulted and has confirmed that they have no objection to the principle of the development, in terms of the potential impact the development would have on the immediate and wider highway network subject to a number of recommended conditions.

In light of the Highway Officer's comments, and subject to the suggested conditions, it is considered that the proposed dwellings fundamentally comply with Policy GP4 of the Powys Unitary Development Plan 2010.

Ecology

The application site is currently poor semi-improved grassland which is considered to be of low ecological value. The Powys Ecologist has been consulted and has considered the site for great crested newts and considered it to offer unfavourable suitable opportunities for Great Crested Newt terrestrial habitat.

The Ecologist therefore has no objections to the proposed development and recommends a number of conditions to secure a detailed lighting design scheme and a landscaping scheme including hedgerow and tree retention scheme. It is noted that Landscaping is a reserved matter and therefore it is not for us to consider under this application. It is therefore not considered relevant to attach conditions relating to those matters to date but a lighting scheme will be conditioned as appropriate.

Subject to the inclusion of the appropriate condition, the proposed development is therefore considered to fundamentally comply with policies ENV7 of the Powys Unitary Development Plan (2010) and Technical Advice Note (TAN) 5 Nature Conservation and Planning (2009).

Archaeology

Policy ENV17 of the Powys UDP states that proposals for development that may unacceptably affect the site or setting of a scheduled ancient monument will not be permitted.

Following submission of the application Cadw commented stating that the application site is located approximately 260 metres west of the scheduled Llansantffraid Roman Supply Depot (SAM MG 216) which is believed to be a 1st – 2nd century military supply base for goods and materials which may have been transported up and down the River Vyrnwy.

Cadw have confirmed that the proposed development will be partly screened from view from the scheduled monument by topography, existing buildings and vegetation. It has been noted that the proposed development will not be located in any identified significant view and consequently, at worst, the proposed development was concluded to causing a very slight damage to the setting of the scheduled monument. CPAT have also confirmed that they have no objection to the proposed development.

As the proposed development would not be seen as having an unacceptable impact on the setting of the SAM it is therefore considered that the proposed development is in accordance with planning policy, particularly UDP policy ENV17.

Welsh Language and Culture

Planning Policy Wales (PPW) notes the Welsh Governments commitment to ensuring the Welsh Language is supported and encouraged to flourish as a language of many communities all over Wales. It highlights that it should be the aim of local planning authorities to provide for the broad distribution and phasing of housing development taking into account the ability of different areas and communities to accommodate the development without eroding the position of the Welsh language. It does however also note that policies must not introduce any element of discrimination between individuals on the basis of their linguistic ability, and should not seek to control housing occupancy on linguistic grounds.

With regards to the Development Management function, PPW states as follows:

“Consideration relating to the use of the Welsh Language may be taken into account by decision makers so far as they are material to applications for planning permission. If required, language impact assessments may be carried out in respect of large developments not allocated in, or anticipated by, a development plan proposed in areas of particular sensitivity or importance for the language. Any such areas should be defined clearly in the development plan. Decisions on applications for planning permission must not introduce any element of discrimination and should not be made on the basis of any person(s) ‘linguistic ability’.”

Policy GP5 of the Powys UDP states that within identified settlements proposals will only be acceptable where developers can demonstrate that they have taken full account of the importance of the Welsh Language and culture, including through the provision of an appropriate level of affordable homes. Llansantffraid ym Mechain which falls under the Llansantffraid Community has not been identified as one of the settlements under policy GP5.

Able to speak Welsh

Age	2011 %	2001 %	2011 Number	2001 Number
3+:	19.8	21.4	271	253
3-15:	40	42.4	78	78
16-64:	14.5	15.4	120	110
65+:	21	22.9	73	65

Under the viability Study for providing Affordable Housing in Powys (August 2016), it has been identified for the 'North' area as providing 10% affordable provision on housing developments. In this instance one dwelling will therefore be conditioned to be retained as affordable in perpetuity. It is considered that the provision of affordable dwelling helps mitigate against the impact of a development on the Welsh language, the affordable house provision and the contribution the 5 open market dwellings make to the lack of a five year housing supply are given considerable weight.

It is considered that the introduction of six dwellings will help sustain the viability of the facilities that are vital in supporting Welsh language and culture. It is not considered that a development of the scale proposed would threaten local facilities or force sections of the population away from these facilities.

It is also considered that there is an intrinsic link between the provision of affordable housing and the cultural and linguistic vitality of an area. Affordable dwellings allow existing residents to remain in the area and where the area has a strong Welsh Language presence this aids in retaining those residents and helps mitigate against the impact of a development on the Welsh language.

It is therefore considered that there would be have no material unacceptable effect upon the use of the Welsh language in Powys as a result of the proposed decision.

Public Right of Way

Three public footpaths are located directly adjoining or are located within the application site. The Public right of way officer has been consulted and notes concerns that the proposed development could potentially obstruct up to all three of the public rights of way as it is not apparent that the public footpaths concerns have been accommodated in the proposal.

An amended block plan has been submitted which highlights that the footpaths in question will remain unobstructed from built development. The plan has been submitted to Countryside Services but no response has been received to date. An update will therefore be provided to Members prior to the meeting.

Other Legislative Considerations

Crime and Disorder Act 1998

Section 17(1) of the Crime and Disorder Act 1998 imposes a duty on the Local Authority to exercise its various functions with due regard to the likely effect of the exercise of those functions on, and the need to do all that it reasonably can to prevent, crime and disorder in its area. This duty has been considered in the evaluation of this application. It is considered that there would be no significant or unacceptable increase in crime and disorder as a result of the proposed decision.

Equality Act 2010

The Equality Act 2010 identifies a number of 'protected characteristics', namely age; disability; gender reassignment; pregnancy and maternity; race; religion or belief; sex; sexual orientation; marriage and civil partnership.

Having due regard to advancing equality involves:

- removing or minimising disadvantages suffered by people due to their protected characteristics;
- taking steps to meet the needs of people from protected groups where these differ from the need of other people; and
- encouraging people from protected groups to participate in public life or in other activities where their participation is disproportionately low.

The above duty has been given due consideration in the determination of this application. It is considered that there would be no unacceptable impact upon persons who share a protected characteristic, over and above any other person, as a result of the proposed decision.

Wellbeing of Future Generations (Wales) Act 2015

Section 3 of the Act imposes a duty on public bodies to carry out sustainable development in accordance with the sustainable development principle to act in a manner which seeks to ensure that the needs of the present are met without compromising the ability of future generations to meet their own needs (Section 5). This duty has been considered in the evaluation of this application. It is considered that the proposed development is in accordance with the sustainable development principle through its contribution towards the well-being objectives.

RECOMMENDATION

Although it is noted that the proposed development is a departure from the adopted development plan, considerable weight must be given to the need to increasing housing land supply. The proposed development is for the provision of 6 dwellings in what is considered to be a sustainable location. It is considered that the material consideration of the lack of housing land supply within the county warrants the approval of this development contrary to the provisions of the development plan.

It is therefore recommended that the application is determined with the recommendation of conditional consent.

Conditions

1. Details of the appearance, landscaping, layout, and scale, (hereinafter called "the reserved matters") shall be submitted to and approved in writing by the local planning authority before any development begins and the development shall be carried out as approved.
2. Any application for approval of the reserved matters shall be made to the local planning authority not later than three years from the date of this permission.
3. The development shall begin either before the expiration of five years from the date of this permission or before the expiration of two years from the date of approval of the last of the reserved matters to be approved, whichever is the later.
4. Any entrance gates shall be set constructed so as to be incapable of opening towards the highway and shall be retained in this position and form of construction for as long as the dwelling/development hereby permitted remains in existence.
5. The gradient of the access shall be constructed so as not to exceed 1 in 30 for the first 15 metres measured from edge of the adjoining carriageway along the centre line of the access and shall be retained at this gradient for as long as the development remains in existence.
6. The centre line of the first 15 metres of the access road measured from the edge of the adjoining carriageway shall be constructed at right angles to that edge of the said carriageway and be retained at that angle for as long as the development remains in existence.
7. Prior to the commencement of the development the area of the access to be used by vehicles is to be constructed to a minimum of 410mm depth, comprising a minimum of 250mm of sub-base material, 100mm of bituminous macadam base course material and 60mm of bituminous macadam binder course material for a distance of 15 metres from the edge of the adjoining carriageway. Any use of alternative materials is to be agreed in writing by the Local Planning Authority prior to the access being constructed.
8. Prior to the occupation of any dwelling, provision shall be made within the curtilage of the site for the parking of not less than one car per bedroom excluding any garage space provided together with a turning space such that all vehicles serving the site may both enter and leave the site in a forward gear. The parking and turning areas shall be retained for their designated use for as long as the development hereby permitted remains in existence.
9. The gradient from the back of the footway/verge to the vehicle parking areas shall be constructed so as not to exceed 1 in 15 and shall be retained at this gradient for as long as the dwellings remain in existence
10. The width of the access carriageway, constructed as Condition 7 above shall be not less than 5.5 metres along the access road and shall be maintained at this width for as long as the development remains in existence.
11. No building shall be occupied before the estate road carriageway and one footway shall be constructed to and including binder course level to an adoptable standard including the provision of any salt bins, surface water drainage and street lighting in front of that building and to the junction with the county highway
12. The estate road carriageway and all footways shall be fully completed, in accordance with the details to be agreed in writing by the Local Planning Authority, upon the issuing of the Building Regulations Completion Certificate for the last house or within two years from the commencement of the development, whichever is the sooner. The agreed standard of completion shall be maintained for as long as the development remains in existence.

13. When installed there shall be a minimum clearance of 6 metres from the nearest part of the adjoining highway verge or footpath to any part of the soakaway installation.

14. All surface water run-off is to be collected and discharged via a piped system to a soakaway located within the site no less than 6 metres from the highway. This system shall be retained and maintained for as long as the development remains in existence.

15. No storm water drainage from the site shall be allowed to discharge onto the county highway.

16. Prior to commencement of development the development shall not begin until a scheme for the provision of affordable housing as part of the development has been submitted to and approved in writing by the local planning authority. The affordable housing shall be provided in accordance with the approved scheme and shall meet the definition of affordable housing in Annex B of TAN 2 or any future guidance that replaces it. The scheme shall include:

i) the numbers, type, tenure and location on the site of the affordable housing provision to be made which shall consist of not less than 30% of housing units/bed spaces;

ii) the timing of the construction of the affordable housing and its phasing in relation to the occupancy of the market housing;

iii) the arrangements for the transfer of the affordable housing to an affordable housing provider [or the management of the affordable housing (if no RSL involved)];

iv) the arrangements to ensure that such provision is affordable for both first and subsequent occupiers of the affordable housing; and

v) the occupancy criteria to be used for determining the identity of occupiers of the affordable housing and the means by which such occupancy criteria shall be enforced.

17. The affordable dwellings shall have a maximum gross floor area of 130 square metres (measured internally and including garages where designed as an integral part of the dwelling) and notwithstanding the provisions of schedule 2, part 1, classes A, B, C and E of the Town and Country Planning (General Permitted Development) Order 1995 (as amended for Wales) (or any order revoking and re-enacting that order with or without modification), the affordable dwelling shall not be subject to extensions, roof alterations and buildings other than those expressly authorised by the reserved matters approval.

18. Prior to the first installation of any external lighting a lighting design scheme to take into account any impacts on nocturnal wildlife into consideration shall be submitted for written Local Planning Authority approval and implemented as approved and maintained thereafter.

19. Demolition or construction works shall not take place outside the hours of 0800 to 1800 Mondays to Fridays and 0800 to 1300 on Saturdays and at no time on Sundays or Public Holidays.

Reasons

1. To enable the Local Planning Authority to exercise proper control over the development in accordance with Section 92 of the Town and Country Planning Act 1990.

2. Required to be imposed by Section 92 of the Town and Country Planning Act 1990.

3. Required to be imposed by Section 92 of the Town and Country Planning Act 1990.

4. In the interests of highway safety and in accordance with the provisions of Powys UDP Policy GP1 and GP4.

5. In the interests of highway safety and in accordance with the provisions of Powys UDP Policy GP1 and GP4.

6. In the interests of highway safety and in accordance with the provisions of Powys UDP Policy GP1 and GP4.

7. In the interests of highway safety and in accordance with the provisions of Powys UDP Policy GP1 and GP4.
8. In the interests of highway safety and in accordance with the provisions of Powys UDP Policy GP1 and GP4.
9. In the interests of highway safety and in accordance with the provisions of Powys UDP Policy GP1 and GP4.
10. In the interests of highway safety and in accordance with the provisions of Powys UDP Policy GP1 and GP4.
11. In the interests of highway safety and in accordance with the provisions of Powys UDP Policy GP1 and GP4.
12. In the interests of highway safety and in accordance with the provisions of Powys UDP Policy GP1 and GP4.
13. In the interests of highway safety and in accordance with the provisions of Powys UDP Policy GP1 and GP4.
14. In the interests of highway safety and in accordance with the provisions of Powys UDP Policy GP1 and GP4.
15. In the interests of highway safety and in accordance with the provisions of Powys UDP Policy GP1 and GP4.
16. In the interest of the protection and preservation of biodiversity in accordance with policy ENV3 of the Powys Unitary Development Plan.
17. In order to control the affordable unit hereby permitted in accordance with policy HP10 of the Unitary Development Plan.
18. To comply with Powys County Council's UDP Policies SP3 and ENV3 in relation to The Natural Environment and to meet the requirements of Planning Policy Wales (Edition 9, November 2016), TAN 5: Nature Conservation and Planning and Part 1 Section 6 of the Environment (Wales) Act 2016.
19. To safeguard the amenities of the locality in accordance with policy GP1 of the Powys Unitary Development Plan.
