<b>4. MATTERS ARISING</b>
---------------------------

28 October 2022

Item 16 – In response to a query around the member benefit data scoring of 85.32% the Pension Fund Manager advised that the errors due to historic aggregation of records within Powys was being addressed and issues with the address formatting accuracy were being addressed by the report writers.

Item 18a – The Pension Fund Manager now has access to a set of data used to record contribution returns and reconciliations which is monitored monthly. In addition, 45% employers are now sending monthly data electronically so the administration is moving towards a more electronic process rather than manual processing, however the overall data electronically received is approximately 90%. It was noted that The Pension Regulator [TPR] in its annual survey asks for the percentage of data from employers received electronically. The Board agreed that comment should be made to TPR that for a scheme such as the Powys Fund, where the Authority is the main employer, a question should be asked regarding how much data is received electronically.

<b>5. MINUTES OF PENSIONS AND INVESTMENT COMMITTEE</b>

### **Governing your Scheme [38 – 60]**

The annual training needs assessments analysis would take place by April and completed by Committee and Board.

40 and 41- remains amber with no changes to scores, due to ongoing training.

Comments were made that the document was comprehensive, and the analysis was helpful to monitor progress. The Board was reminded that TPR would be consolidating ten of the fifteen codes into one including the current Code 14 which is applicable to public sector pension schemes and the Board would need to help determine what elements of the other nine codes incorporated into the new code are relevant.

The new code, once it has been laid before Parliament, will have significant training implications for the Board, Committee and Pension Team. However, the Pension Fund Manager advised that the Pension Team have a good base to work from.

The Chair commented that the transitional issues would take time rather than the ongoing monitoring and it was hoped that the Local Government Association (LGA) would provide guidance.

The Governance Pillar element of the Risk Register was being updated to reflect the outcomes of the in-depth review, which had been agreed by the Committee.

The Board supported that the Pensions Dashboard would be added under the Administration Pillar of the Risk Register and a potential risk would be the integration of the two-Stage process for internal dispute resolution procedure which is currently wholly managed internally.

- 1. Agreed to set a date in April for the Investment Pillar in-depth review.**
- 2. The Pension Dashboard to be added to the Administration Pillar.**
