Question Representation Texts

**Question: 3d. (i) Representation Details**

Representation Texts: The Powys Local Development Plan candidate sites register November 2011 shows a proposed use for the site as residential. It follows that access to the site will be from the A470.

1) My first Representation concerns access to and from the site.

The A470 is the main north/south trunk road and is by its very nature very busy. The slight bend at the Bridgend Inn renders traffic travelling south towards Brecon blind to the site. Visibility is very restricted and dangerously so. Traffic using the A470 is not, by any means, observant of the 30mph speed limit which should prevail within the village of Llyswen. Reference to the Dyfed-Powys Police Authority will confirm, with relative ease, the incidence of speeding along the portion of the A470 which adjoins the site.

I emerge each day on to the A470 and this is on occasion quite a frightening experience, because of the illegal speed at which traffic travels. In the stretch between the Griffin Inn and Plas Wye frequently drivers attempt to overtake and I would ask you to accept from me that to emerge on to a major trunk road in a vehicle with both lanes occupied by vehicles heading north at speed and in the process of overtaking, is a very scary phenomenon.

The question of speeding through Llyswen village is not, of course, new. It is just that as the volume of traffic grows, so it becomes a more acute problem. There has been correspondence in the Brecon and Radnor Express newspaper on this topic. There have been public meetings in Llyswen school and at least one on-site meeting with Kirsty Williams A.M., Andrew Davies A.M., representatives of the Highway Authority from Llandrindod and representatives of Dyfed-Powys Police force. While the politicians were naturally neutral, the police were very supportive and cited numerous instances of horrific speeds recorded by them. By way of contrast the Highway Authority were quite antagonistic to any suggestion of traffic calming measures. It seems that the status of the A470 as a trunk road has led to a philosophy that road markings such as double white lines preventing overtaking, or larger or more prominent 30mph signs are not to be tolerated.

A combination of the high speeds recorded through the village and the recurring practice of overtaking (both of which are well known to the Dyfed-Powys Police force) coupled with the intransigence of the Highway Authority makes this stretch of the A470 a most dangerous and unlikely spot for the provision of access to the site.

My view is that these factors render the inclusion of the site in the plan to be unsound, in that it does not show good judgement.

2) The second Representation concerns Rights of Way.

The site is subject to Rights of Way and I am not convinced that these have been extinguished. There is clearly a footpath which crosses the site and inspection will show a signpost on the verge adjoining the site at the edge of the A470 indicating a Right of Way. There are steps and a stile to facilitate access for pedestrians. The Right of Way is frequently used by ramblers.

My view is that to include the site in the Plan will adversely affect the exercise of the Right of Way. It seems to me that the Plan would not be sound and would not show proper judgement.

Status Maintained

3) My third Representation concerns the septic tank which serves [my house] and which is situated within the site.

When the Church in Wales sold off [my house] to my predecessor in title, there was transferred with the property the benefit of an easement for drainage from the property into two cesspits in field No 9211 (Part). There is no doubt that I enjoy a legal easement to continue to discharge into the cesspits / septic tank. The enjoyment of this right has been continuous during my ownership (since 1990), and so far as I am aware, since the date of the initial sale by the Church in 1974.

The septic tank in question does, of course, pre-date the separation of [my house] and the adjoining Glebe Land in 1974 and will have served the house continuously from the date of its construction in the 19th Century.

The site comprises the septic tank which serves my house and to include the site in the Plan renders the Plan unsound and lacking good judgement

4) In addition to the easement for the drainage from this property into the cess pit/septic tank (and of course this remains the only method of drainage available to me) there is also another easement for the supply of water from the mains to my property and this is, once again, through the site and through field 9211 (Part).

Again, this Right has been exercised continuously during the period of my ownership, i.e. since 1990 and, in fact, since the first sale of the property in 1974. Again, this is the only water supply for the property.

The formal wording used in the title deeds and documents I shall set out in full as these are instructive and are:

".....and in particular with the benefit of an easement for drainage from the.... house into two cess pits in field no 89 (now field 9211 Part) together with easements for water supply for the house by means of pipes laid across fields Nos 89 (field 9211 Part) and 95 from a neighbouring property".

The position, therefore, is that a legal easement exists to discharge drainage into cesspits on the site in field 9211 (Part) and further there exists an easement for water supply by means of pipes crossing the site through field 9211 (Part).

The Plan is, to my mind, unsound and devoid of good judgement in so far as it relates to this particular site.

5) The pipes that are referred to in (3) and (4) are asbestos pipes. My fifth Representation concerns the existence of asbestos within the site.

I am aware that the water pipes referred to in (4) above are composed of asbestos. The thought of asbestos particles being disturbed and circulated in the atmosphere as a result of development on the site is very frightening.

There are many families living opposite the site and some have very young children. Also opposite is the Archdeacon Griffiths Church in Wales Primary School and it seems to me that it is a matter of communal concern and for the sake of the community at large, that the site remains undeveloped, as the disturbance of noxious and hazardous material will pose a high degree of risk for residents and school children alike.

I am aware that the water pipes are composed of asbestos. I have not been able to establish whether or not the other pipes within the site are also composed of asbestos. It remains a strong possibility that if asbestos pipes were used when laying the water pipes, it may well be that asbestos was used for the pipes serving and leading to the cess pits / septic tanks. This is a feature which concerns not only me and my family but the wider community and which needs to be considered fully when judging the suitability of the site for inclusion in the plan.

To me, it is inconceivable that a sound plan which shows good judgement would properly allow the development of the site for residential use with the attendant risks to the local population.

Map: P6: Boughrood and Llyswen - 2015

Issue: 2015: Deposit Draft-12. Alternative Sites

*Question Representation Texts*

**Question: 3d. (i) Representation Details**

Representation Texts: Policy H1 is objected to on the basis of the reduced housing land target (see separate form). The non-inclusion of the land at Station Road, Boughrood and its omission from the site schedule in Appendix 1 – Settlement Allocations. It is noted that the Policy also seeks to maintain a 5 year supply of housing. For reasons explained in the Full Submission attached we consider that unless a sufficient range and choice of sites is provided, Powys County Council will struggle to achieve a 5 year land supply both on adoption and throughout the plan period.

The first part of the policy refers to development in Towns and Large Villages. We consider that development of the site in question would be compatible with the requirement as it would form a logical extension to the settlement.

The Alternative Site proposed could potentially deliver 21 dwellings in accordance with Policy H3 which provides for average densities of 25 dwellings per hectare on sites in towns and large villages. It would also aim to be compatible with Policy H2 - Housing Delivery.

Question Representation Texts

**Question: 3d. (i) Representation Details**

Representation Texts: [This Representation critiques the site assessment undertaken using the integrated Options Appraisal toolkit and each point has been given a separate number]

Objection to deposit LDP – Settlement Allocation Llyswen & Boughrood - Site Reference PO6 HA1 (1108)

We strongly object to the inclusion of PO6 HA1 being included in the Powys Local Development Plan 2011-2026. We have used your Options Appraisal Tool to outline our arguments for the key areas of concern with additional points of concern/arguments thereafter:

Key Questions & Argument

1) Is the site located so as to encourage health and wellbeing including physical activity, active travel and community interaction and engagement?

We do not feel that the site is well located to meet this criteria. The Pathways around this site do not lend themselves for walking or cycling to enhance physical activity.

2) Are the development proposals likely to be compatible with the established neighbouring land uses?

We feel that the inclusion of 30+ houses in the plot adjacent to us will increase noise pollution and nowhere near compatible with neighbouring land uses, will also be unsightly and not in common with neighbouring villages.

3) Do the proposals provide employment opportunities and/or the potential for upskilling the local workforce?

No. There are very few job opportunities in the neighbouring vicinity. Most people not already in employment would need to travel 30-50 miles to find reasonable employment. The largest employers in the area have very low turnover, therefore job opportunities low.

4) Given the factors known about the site, could development provide a particular opportunity for planning gain that might not otherwise be achieved (addressing community need, overcoming settlement infrastructure constraints)?

There are far greater needs of Llyswen as a community e.g. pathways in the village, parking facilities for those properties having to park on the main A470. There is no community need for the further addition of such a large development of land, adding a play area does not assist this. The local primary school is already at full capacity and with the possible closure of the local high school where would children go to school?

5) Given the factors known about the site, is it considered probable that the land will be released for developing during 2011-2026?

Our understanding from the Public meeting in Llandrindod that the whole point of the submission of plots for inclusion in the LDP was for planning / development purposes. The point that needs to be raised here is why previous plots within the village of Llyswen on the opposite side of the road have been within the LDP for 15+ years and have had

Source: Email

Type: Objection

Mode Written

Status Maintained

planning on it and never developed. Surely it should be proposed this plot is developed first with a smaller number of houses, rather than further adding plots un-necessarily to the village.

6) Is the site's development likely to encourage the community to get together and increase social interaction? Could the development proposals boost demand for local services and help to sustain or increase them?

The addition or more properties within a close knit village like Llyswen will not make any difference to the social interaction of the community.

7) Will development of this site offer particular scope to build a more sustainable community?

Please explain why you have marked this positive. A large development like this in Llyswen will not provide a more sustainable community.

8) Does the candidate site development proposal have the support of the Town & Community Council?

We have spoken with the Chair of Llyswen and Bronllys Community Council and their support is not given and they back the views of the residents 100%.

It has already been stated quite clearly that Bronllys is a key settle area it's roads have recently been upgraded, therefore this would be a much more suitable area to develop. Llyswen has poor roads, which are fast through its built up area, footpaths are poor, therefore it is not suitable for any further development.

9) Is the development likely to impact positively on culture, local distinctiveness and sense of place, including the protection of archaeological and built heritage assets?

There will not be a positive impact and the reason for this is the recent build of Llys Meillion has resulted in a significant impact on infrastructure of the village with a massive impact on the Heritage nature of the Middle Wye Valley Historic Landscape and to add such a further large development to this end of the village will have yet a further detrimental impact. Llys Meillion and the proposed plot are within the setting of two listed buildings and as such we feel by including the proposed plot would go against the Register of landscapes of Historic Interest in Wales.

There is a public footpath that currently runs through the proposed plot of land and this would need to be taken into consideration. This is regularly used by walkers and the Ramblers. Currently there is a lot of Greenland around the outskirts of the village of Llyswen and which joins on to parts of the boundaries of the village, and we feel that such a large development would take away the distinctiveness of the village and make the village look ugly from a distance and would not be in keeping with the neighbouring areas and landscapes.

10) Will the development proposals provide employment facilities, support the need of businesses to expand, re-locate, diversify?

The development of this land would potentially be for housing alone and not for businesses, the few existing businesses in the village would not benefit from expanding to the proposed plot. So we do not feel that this criteria is met.

11) Will the development proposals contribute to providing a mix of uses in the settlement?

The proposal for this plot should it be successful we have already been information is for housing alone, therefore there will not be a mix of uses within this proposed plot.

12) Do the development proposals supporting housing provision including affordable homes?

When Llys Meillion was built there was supposed to be affordable homes but this was not the case. The homes that were supposed to be affordable homes have either been

Status Maintained

bought privately and are rented out or are still owned by the proprietor of the plot Llys Meillion was built on and are rented out. Hence no affordable homes were ever available and since the development of Llys Meillion no affordable homes were ever put up for sale, therefore your point here is incorrect.

13) Is the site well served by existing services (including access, water, drainage, energy supply)?

It is already known that the sewerage within the village is not fit for purpose so by adding a further 30+ houses will only increase the problems. Since building the houses on Llys Meillion it is common knowledge that there has been an overload on the current waste water treatment system, by adding a further large development to the village would make the situation far worse.

There is a brook that runs down the one side of the proposed development site that floods during the winter months and run off water from the neighbouring Brechfa pool comes down into the proposed site and annually floods the field and has in turn been so bad it has flooded into Llys Meillion. During the winter months this flooding has in turn run out onto the main A470 causing water logged areas which are considerably dangers for traffic and pedestrians.

14) Can the development proposals be sympathetically incorporated into the landscape and local environment without harm to the character and appearance of the area? (particularly when considering a site for development on green field land and/or at the edge of a settlement where development will extend into the open countryside)?

The proposed site is right on the edge of the village and is visible for miles around. We feel it would make the village unsightly and would not fit in with neighbouring villages or the landscape. It would completely change the character and appearance and would make the look of village unappealing.

15) Can the site be safely accessed and can the highway network serving the site adequately accommodate the associated traffic implications?

Current access to Llys Meillion is already on a dangerous piece of road. Visibility towards Built Wells does not meet standards and visibility is hindered by cars having to park on the road outside properties. These cars are opposite the petrol station and cars are having to give way to let on-coming traffic through which becomes a huge risk to pedestrians, and those coming out of existing entrances along that road (9 in total including Llys Meillion), all in very close proximity of each other and on both sides of the road. The road into Llyswen from Bronllys/Three Cocks is a very straight piece of road and cars travel this road extremely fast and do not abide by the speed limits. Complaints have been made to local AM's and to the Minister of Transport about the speeds within the village.

The A470 is the main trunk road and is extremely busy this is furthermore increased by regular shows/activities held in Hay-on-Wye, Royal Welsh Show Ground which adds to the traffic throughput in the village.

The speed through the village is not adhered to and this has been raised to the council on numerous occasions.

16) Does the location of the site encourage a shift to using more sustainable forms of travel (e.g. is it central and accessible to local services and/or public transport network without physical barriers to safe access on foot or cycle)?

We do not feel that by adding 30+ houses to the village of Llyswen would then mean that those living in these houses would use alternative means of transport. As mentioned earlier employment is poor in this area and turnover of staff in some of the larger organisation such as the Health Board, Council and Police are low, therefore people would have to travel long distances for work. There is no scope for people to walk to work or cycle. There are very poor pavements within the village and no cycle paths.

17) Are the development proposals likely to regenerate the area? (eg bringing disused land/buildings back into positive re-use, meeting an identified community need, increase footfall and/or creating new jobs)

The proposed site is already used as agricultural land and regularly has livestock/sheep on it. There is no community need for additional housing within Llyswen and by

Type: Objection

Mode Written

Status Maintained

developing this land it will not create new jobs.

18) Is the site previously developed land

No

19) Will development of this site avoid the loss of the Best and Most Versatile agricultural land?

The proposed site is part of Designated Special Area of Conservation and houses many species of wildlife.

20) Can the site be developed without compromising the safeguarding of important mineral resources?

For the proposed site to be developed would require a significant amount of soil to be extracted, therefore the safeguarding of minerals would not be achieved.

21) Is the site free from flood risk or has it been proven that any flood risk can be acceptably managed?

The proposed site floods regularly and the whole field including the proposed site is affected. The plot is unable to cope with the quantity of water and floods the adjacent drains also.

22) Is the site free from the risk of contaminated land or is it likely that any known contamination can be acceptably managed.

The LNG Pipeline runs through the field of proposed site and is within the Inner Buffer Zone and as such it is felt that this is within a sensitive and dangerous area and therefore the proposed plot should not be included for development. We have sincere concerns about this site being used as development for safety reasons.

23) Will the development proposals contribute positively to sustainable waste management in the county and the move to a low waste Powys?

There are known sewerage problems in Llyswen and you have already confirmed in the LDP that work will need to be undertaken to address the Waste Management issues. The drains on the main A470 trunk road have blocked and over-flowed on numerous occasions.

24) Is the site free from environmental constraints/sensitivity such as the inclusion of, or proximity to, fragile habitats and species and protected landscapes (s)?

We wish to see the results of the Ecology Survey before any final decision is made and this should be undertaken and the results published before any decision is made.

We also feel that as the proposed site is situated on the edge of the village that the greenspace is compromised.

The proposed site runs between two listed buildings and any development and disruption to this land could have an impact on their infrastructure.

Various wildlife live within the proposed plot and neighbouring brooks and development of this site would cause significant harm.

25) Are there particular opportunities for biodiversity or ecological gain on this site?

By the development of this site it would pose the following risks:

Source: Email

Type: Objection

Mode Written

Status Maintained

A detrimental impact on species such as Bats, badgers and newts, sparrow, swallows, doves, foxes to name but a few.

The proposed site is using a large chunk of land which will have a direct impact in terms of destruction of habitats and more subtle effects on biodiversity such as disturbance and fragmentation. Noise and light generated during construction processes may not directly harm individual animals but it could affect feeding and breeding behaviours which could have negative impacts on long term population levels. The use of land may also divide up land and separate habitats which were previously adjacent. This can influence population dynamics especially for mobile species which rely on large habitats. The impact of fragmenting habitats on different species can be complex and could lead to gradual decline in populations which is difficult to attribute to a specific cause.

The materials used and their processing and production will have a major impact on biodiversity. Timber, gravel, sand, iron ore, rocks etc are all major materials needed for the construction industry and the production of these materials can impact heavily on biodiversity. Should this site be developed 1000 of tonnes of soil would be excavated in order to develop the land which in turn would diminish the soil, minerals etc.

[In addition]:

26) The infrastructure of Llyswen cannot support any additional development, there are already plots within the village which were included in the previous LDP which to date have not been developed on. We feel that this site should be developed before any further sites are included.

27) The village as it currently stands poses several risks; the speed of traffic through the village is unsafe, current pavements are not fit for purpose, residential parking on the main A470 causing high risk areas within the village, one area being right opposite the petrol station. The school is already at full capacity so where would the children go if additional people came to the village. The situation of this site does not lend itself for parents and children, elderly people.

28) Incorrectly Llyswen & Boughrood in the LDP are counted as one village and this is completely incorrect. They are two very separate villages and have two completely separate Community Councils. Therefore this needs to be rectified within the LDP and hence would result in confirming Llyswen being the small village it is and not in need of such a large development.

29) The site is unsuitable – as quotes in the Welsh Government Ministerial letter 2011 – The population and household projections indicate a downward trend in population grown for Powys, so why develop so much of Llyswen.

30) We strongly object to this proposal and ask that you seriously reconsider to either remove the site completely or choose an alternative site more appropriately situated over the other side of the village or one that already has planning on it.

Question Representation Texts

**Question: 3d. (i) Representation Details**

Representation Texts: Comment to Local Development Plan, Appendix 1 Settlement Allocations Boughrood & Llyswen Site Ref PO6 HA1 (1108)

Consider that Llyswen cannot support the services and infrastructure demands of further development. We understand that the recent addition of the Llys Meillion has already made a significant impact and any further development will only exacerbate the situation. This is particularly true of the Waste Water Treatment facilities that are currently available within Llyswen.

The existing development has had an impact on the Heritage nature of the Middle Wye Valley Historic Landscape (Area 36) and additional development will have yet further detrimental impact, particularly as within the setting there are two listed buildings. As such the Register of Landscapes of Historic Interest in Wales in the Planning and Development Process (ASIDOHL2) will need to be adhered to.

Additional development within Llyswen will present a further risk to the local area with respect to the Conservation of Natural Habitats and Wild Flora and Fauna, particularly as the Wye Valley and surrounding area is deemed to be a Designated Special Area of Conservation (SAC), SCA code UK0012642. There will therefore be a risk to the Ecology of the local area.

Site HA1 is close to the LNG pipeline and is within the Inner Buffer Zone and as such should be considered as being within a sensitive area. Ref: Institution of Gas Engineers and Managers design code "Recommendations on Transmission and Distribution Practice"(IGE/TD/1).

It is understood that the brook adjacent to existing settlement of Llys Meillion created issues during the site development thus requiring its diversion and it runs through the area currently under discussion. It is further understood that flooding occurred after development of Llys Meillion. Therefore further development will only exacerbate such issues and increase the flooding risk.

Significant pre-extraction required will be to mitigate mineral risk with presence of sand and gravel. Furthermore additional extraction required to address raised elevation of site compared to that of existing development.

Access via Llys Meillion from trunk road may be an issue.

Due to the potential proximity and elevation of any further building development adjacent to the existing settlement there may be a significant reduction of light and air to existing property. In addition it would result in some property being surrounded on all sides by the close proximity of other houses.

Question Representation Texts

**Question: 3d. (i) Representation Details**

Representation Texts: Candidate Site: 1108  
Land at Llyswen adj B24 HA3 – Allocation No. PO6 HA1

- 1) We object very strongly to the proposed changes to the Local Development Plan with specific reference to land referred to in Allocation No. PO6 HA1 and build yet more houses adjoining this new estate which already has 35 houses. There are still houses on this site which have been unoccupied for 5 years. All 'affordable houses' which were built in this estate have not been sold as starter homes but are rented out which does not comply with planning regulations.
  - 2) The site behind these houses has a tendency to become very wet and part of it is already known to be in the flood zone. All the surface water from Brechfa Common & surrounding areas above all fall into this catch pit and creates flooding in this field. In 2013, we would draw your attention to the fact that water was running down between the two rows of houses in the estate and flooded a garage. We are very concerned that in order to address this problem, using tarmac and concrete will stop water soaking naturally and thereby create further problems.
  - 3) The entrance on to the present estate is very busy and with another estate at the rear, the increase in vehicles will make this area very dangerous. On the opposite side of the road is the entrance to the very busy farming business and they have tractors, trailers and lorries travelling in and out every day to two other farms which they have in this locality.
  - 4) From the junction of Llys Meillion to the Griffin Inn, Llyswen is a very dangerous stretch of road especially for parents taking their children to and from Llyswen School. The one pavement is very narrow, single person only most of the way and they have to walk across the forecourt of a busy Petrol Station/Shop with cars pulling in and out of the garage all of the time. There is no pavement the other side of the road and cars are often parked along the road. I am aware that it would be difficult to increase the width of the pavements because the houses are built too near to the road. More houses will mean more children and more danger.
- It must be noted that the local school at Llyswen is full to capacity at present and the nearest High School is potentially due for closure so would deter would be buyers to this area. We understand that Bronllys has been mentioned as a key settlement, so why not build more houses there as there is no main road through this Village as it has a by-pass so is a much safer location.
- 5) Llyswen has recently been having trouble with the sewerage works and also blocked culverts. Flooding of the road from the Llys Meillion estate up towards the round-about towards Talgarth has happened on many occasions.
  - 6) As quoted on the Deposit Draft, there are already issues with the LNG pipeline 250 which is in a protected area. The Middle Wye Valley Historic Landscape needs to be assessed under ASIDOHL2 and the two listed buildings would have to be considered. Improvements would need to be made to Talgarth Waste Water Treatment Works and ecology surveys required. An assessment to make sure that this site is not under flood risk is a necessity.

7) In our opinion there are already enough houses in this part of Llyswen especially as some of the houses already built have not as yet been sold. We think it would be more sense to build more houses, if they are really needed, on the other end of Llyswen nearer the amenities such as the School and Village Hall which is not in the flood zone - reference Candidate Site 684 - because it would be on a straight and wider road, wider pavements and a lot drier field with no problem with water. It would also be a lot safer

Question Representation Texts

**Question: 3d. (i) Representation Details**

Representation Texts: Local Development Plan – Objection to Candidate Site 1108 - Allocation No. P06 HA1

1) I have lived all my life in Llyswen and am aware of the problems which arise locally. This field in the Development Plan has always had problems with flooding because the water runs down from Brechfa Hills and surrounding area and would be most unsuitable to build on as it is in the flood zone. Flooding of a garage has taken place since the present housing estate has been built although the brook had been diverted prior to these builds.

2) The entrance to this housing estate is very dangerous as vehicles do not comply with the 30 mph limit and travel much faster than they should. The pavements are very narrow, even non-existent in some parts and pedestrians have to walk over the forecourt of a Petrol Station and Shop towards the village which is extremely dangerous with vehicles queuing up on either side of the approach to the garage. Also on the other side of the entrance, there is a busy farm with tractors, trailers and lorries coming in and out their entrance throughout the day.

3) The current sewerage system is in need of upgrading if more houses are to be built. The gas pipeline runs in close proximity to this site in the adjoining field. There is a public footpath on this site which branches off in three directions. Some plots were approved in a previous Local Development Plan but has never been developed so why could these not be included now and built on instead of choosing a different very unsuitable site.

4) One last point which should also be considered. I often walk on the back road from Bronllys coming out onto the public right of way at the top of the Dderw ground which looks directly down on Llys Meillion. I think if the proposed new development went ahead, it would enlarge the site so much it would be out of character with the rest of the village and certainly not enhance the views. I think this site should be taken off the present Local Development Plan.

Question Representation Texts

**Question: 3d. (i) Representation Details**

Representation Texts: [This Representation critiques the site assessment undertaken using the integrated Options Appraisal toolkit and each point has been given a separate number]

Objection to deposit LDP – Settlement Allocation Llyswen & Boughrood – Site Reference PO6 HA1 (1108)

We wish to lodge our strong objections to PO6 HA1 being included in the Powys Local Development Plan 2011-2026. We wish to address certain important key areas of concern as identified below using points included in your Options Appraisal Tool:

1) Given the factors known about the site, is it considered probable that the land will be released for developing during 2011-2026?

We understand that there are already areas of land within the village of Llyswen that have been within the LDP for 15 years+ with planning permission and have never been built on. Thus we wish to question the rationale of putting further green field land into the LDP with a strong possibility of it being built on.

2) Is the site well served by existing services (including access, water, drainage, energy supply)?

The existing development has already added to the considerable difficulties concerning waste water treatment facilities within the village. Additional extra housing at this end of the village will only make this problem considerably worse. We are aware that during periods of heavy rain the field in question floods and this has resulted in flooding on the main roads through Llyswen and Llys Meillion.

3) Can the development proposals be sympathetically incorporated into the landscape and local environment without harm to the character and appearance of the area? (particularly when considering a site for development on green field land and/or at the edge of a settlement where development will extend into the open countryside)?

Llyswen is a small rural community in its own right and a further large scale development on the edge of the village on green field land will significantly change the character and appearance of the village. We do not believe that a development of this nature can be sympathetically incorporated into the landscape. It will not be compatible with the appearance of the local environment. Housing on this scale is more compatible to an urban environment not a rural one.

4) Can the site be safely accessed and can the Highway network serving the site adequately accommodate the associated traffic implications?

There are already 30+ cars and commercial size vehicles using the current access to Llys Meillion, which opens on to the main trunk road. An additional 30 houses will result in a minimum of 30+ extra vehicles using this entrance. Visibility is currently hindered by cars having to park outside properties on the main trunk road and in addition some local residents have to park their vehicles at the entrance to the estate due to lack of adequate parking within the village. Further difficulties are caused by congestion outside the petrol station. All these problems will further be exacerbated by the increase in traffic from a new development.

5) Are the development proposals likely to regenerate the area? (eg bringing disused land/buildings back into positive re-use, meeting an identified community need, increase football and/or creating new jobs)?

**Appendix 1 - Deposit LDP Reps & Responses by Refpoint, Cabinet 15-12-15**

**6297.V1** 17/07/2015  Summary: PO6 HA1 Llyswen - Objection to Housing Allocation Site and Deletion of Site from LDP

Source: Email Type: Objection Mode Written Status Maintained

---

There appears to be no community need for additional housing in Llyswen. This development will not regenerate the area or use any disused land as it will be built on a green field site. There are more urgent community needs within the village in particular the lack of parking facilities and the quality of the pavements.

[In addition]:

6) In conclusion the above points clearly illustrate that the proposal to include PO6 HA1 into the LDP would be detrimental to the local environment and the fabric of the village.

We therefore stress again that we are opposed to this proposal and would ask that you would remove the site from the LDP.

Question Representation Texts

**Question: 3d. (i) Representation Details**

Representation Texts: OBJECTION TO DEPOSIT LDP – Site Reference P06 HA1 – (1108)

We wish to object to the above site in Llyswen being included in the Powys Local Development Plan 2011-2026.

1) Land at this end of Llyswen village has already been given planning permission many years ago but has not been developed. The site adjoining the 35 houses on the new Llys Meillion Estate is good green land and although a very wet field is suitable for agricultural use for sheep, cattle etc. This field is known to flood and the area marked for development is just below the flood zone. Water would inevitably run down from the flood zone area to the rest of the field and beyond into the existing estate.

2) Difficulties already exist with the present waste water treatment facilities in the village and the possibility of about 30 extra houses would make the situation must worse. The main road through Llyswen is also know to flood frequently. The sewerage is at capacity too so would not be able to cope with a new housing estate.

3) The parking in the village is a problem and very often cars and even lorries are known to park on the road up to the present estate, and the lorries are even known to be parked there overnight.

4) The main road from Llys Meillion Estate to the Griffin Inn is very dangerous with narrow pavements, or no pavement at all in places and cars are parked on the road outside their houses. Pedestrian have to walk across the front of the entrance to the Petrol Station and Shop which is an added danger with vehicles turning into the garage from either side. Visibility on the entrance to the estate is not good and opposite is an entrance to a very busy farm with large tractor, lorries etc. travelling in and out their entrance regularly as the farmer has two other farms in the locality.

5) Bronllys was detailed as a key settlement in the Plan and as Llyswen is part of Bronllys Ward, I think that this village would be more suitable for building more houses as it's not in a flood zone, has no main road through the village, near to Talgarth which has more facilities and would be much safer for families to live in than Llyswen.

Could you please consider all these points and remove this site from the Local Development Plan.

Question Representation Texts

**Question: 3d. (i) Representation Details**

Representation Texts: [ This Representation critiques the site assessment undertaken using the integrated Options Appraisal toolkit and each point has been given a separate comment number]

Land at Llyswen adj B24 HA3 – Allocation No. PO6 HA11108

We are writing to express our objection to the inclusion of the above site in the Powys Local Development Plan @ 35.25 on the grounds that the sustainability appraisal is unsound and does not show good judgement.

Key questions from the options appraisal framework for the Basis of our objections:

1) Is the site free from flood risk or has it been proven that any flood risk can be acceptably managed?

The impact, magnitude and probability scores are unsound. Amending the site boundary to exclude the area of flood risk would not mitigate the flooding risk as significant surface water flooding is evident through the centre of the proposed development site throughout in the winter months which is not captured by the existing flood zone separation that surrounds Llys Meillion. Building on this land would be in breach of LDP objective 4 'directing development away from high flood risk and, where possible, to reduce or better manage existing flood risk for communities...' @ 34.6

2) Is the site free from environmental constraints/sensitivity such as the inclusion of, or proximity to, fragile habitats and species and protected landscape(s)?

The 1km square SO13 37 contains 143 records of priority species, 61 records of species of conservation concern and 302 records of locally important species in addition to 35 records of sensitive species (as defined by NRW).

3) Are there particular opportunities for biodiversity or ecological gain on this site (eg potential to create green areas, habitat corridors etc, or scope to improve water, air, or soil quality?)

The impact scores are unsound as a residential development would not create more opportunities for biodiversity or ecological gain that the existing field and hedgerows.

4) Is the site previously developed land?

The impact and magnitude scores should be amended to very negative and high as the proposed development site is within the Middle Wye Valley Historic Landscape and the setting of 2 listed buildings. Residential development would breach LDP objective 13 'To protect, preserve and/or enhance the distinctive built heritage, landscape and cultural assets of Powys and adjoining areas, including its architectural and archaeological heritage and protected landscapes. In particular to facilitate the reduction of listed buildings at risk'.

As stated within the LDP @ 34.3. brownfield sites should be re-used for developed in order to protect the precious greenfield land and assist the remediation of contaminated land.

by: Representation No

Rep'n/Para/Policy AccessNo DateLodgd Late? Status Modified Summary

6304.V1 20/07/2015  Summary: Llyswen P06 HA1 - Objection to Housing Allocation Site and Deletion of Site from LDP

Source: Email

Type: Objection

Mode Written

Status Maintained

Therefore candidate site 1,118, the village farm should be reinstated a preferential site for development. The site has previously had planning permission and was included in the UDP so it is possible to mitigate the flood risk issues.

5) Can the site be developed without compromising the safeguarding of important mineral resources?

The impact, magnitude and probability scores are unsound as the proposed development site is currently a category 1 aggregated safeguarding area and inclusion in the LDP would breach LDP objective 3 'To apply a general presumption against unsustainable development in the open countryside and development on soils of high value and important mineral resources which are recognised as finite resources'.

6) Is the site well served by existing services (including access, water, drainage, energy supply) or is it realistically capable of being serviced by any necessary infrastructure (eg by upgrading)?

The impact, magnitude and probability scores are unsound as there are capacity issues with the existing sewage system and Llyswen is not well served by existing utility services as it has no mains gas supply. Although in favour of green energy the air heat source pumps that have been installed in Llys Meillion are inefficient, expensive to run and costly to maintain and repair due to local skills shortage for this type of technology.

7) Can the development proposals be sympathetically incorporated into the landscape and local environment without harm to the character and appearance of the area? (particularly when considering a site for development on green field land and/or at the edge of a settlement where development will extend into the open countryside).

The impact, magnitude and probability scores are unsound. Llyswen has experienced high levels of growth in the past 5 years without any investment in additional services, access, recreation or infrastructure. Llys Meillion was a large development of new housing for a village the size of Llyswen and has certainly had an impact on the character and appearance of the village. Additional housing adjacent to Llys Meillion would not only further encroach on open countryside but would tip the balance making this traditional village a predominately new build village.

8) Can the site be safely accessed and can the highway network serving the site adequately accommodate the associated traffic implications?

The impact, magnitude and probability scores are unsound. The A470 through Llyswen was reported by Dyfed Powys Police as having the second highest instances of speeding earlier this year. Access to the services in the village is currently exceptionally dangerous for pedestrians because the pavements that link Llys Meillion to the rest of village are too narrow bearing in mind the speed and size of the traffic traveling through the village. In addition to this pinch point, the movement of cars in to the Spar garage, exiting the garage, and parking on the garage forecourt is extremely hazardous for pedestrians.

As parents of a young family we currently find accessing the shop, our allotment or the school very precarious. Ideally we would like to cycle to these village services with our young son (sustainable and healthy travel) but fear for their safety every time we make the journey from Llys Meillion.

9) Does the location of the site encourage a shift to using more sustainable forms of travel (eg is it central and accessible to local services and/or the public transport network without physical barriers to safe access on foot or cycle)?

The impact, magnitude and probability scores are unsound. The location of the site does not encourage a shift to more sustainable forms of travel. Services and local employment opportunities are very scarce within the vicinity of Llyswen so any additional housing will unsustainably increase the number of cars on the roads as people commute to settlements of Talgarth and Hay, neither of which are currently accessibly by the single route bus service that is available.

10) Is the site's development likely to encourage the community to get together and increase social interaction? Could the development proposals boost demand for local services and help to sustain or increase them?

**Appendix 1 - Deposit LDP Reps & Responses by Refpoint, Cabinet 15-12-15**

Source: Email Type: Objection Mode Written Status Maintained

Demand for Llyswen school is currently at full capacity, if not above capacity so increasingly demand will be detrimental. Furthermore, the local secondary school is currently facing closure.

11) Will development of this site offer particular scope to build a more sustainable community? (eg are improvements to the physical or social infrastructure on offer, can the proposals contribute to supporting/protecting the Welsh language?)

Query as to why this has been scored as a positive impact?

12) Does the candidate site development proposal have the support of the Town & Community Council?

Suggest that they are consulted again as previous consultation does not reflect the current residents views.

13) Is the site located so as to encourage health and wellbeing including physical activity, active travel and community interaction and engagement?

Query as to why this has been scored as a positive impact?

14) Given the factors known about the site, could development provide a particular opportunity for planning gain that might not otherwise be achieved? (eg addressing a community need, overcoming settlement infrastructure constraints etc).

The provision of a play area would not be compensation for residential development of this land.

Representation Texts: As stated within the LDP @ 34.3. brownfield sites should be re-used for developed in order to protect the precious greenfield land and assist the remediation of contaminated land. Therefore candidate site 1,118, the village farm should be reinstated a preferential site for development. The site has previously had planning permission and was included in the UDP so it is possible to mitigate the flood risk issues.

Question Representation Texts

**Question: 3d. (i) Representation Details**

Representation Texts: [This Representation critiques the site assessment undertaken using the integrated Options Appraisal toolkit and each point has been given a separate number]

Objection to deposit LDP – Settlement Allocation Llyswen & Boughrood - Site Reference PO6 HA1 (1108)

We strongly object to the inclusion of PO6 HA1 being included in the Powys Local Development Plan 2011-2026. We have used your Options Appraisal Tool to outline potential issues with the proposed site linked to the key areas of concern with additional issues listed separately:

Key Questions & Issues

1) Is the site located so as to encourage health and wellbeing including physical activity, active travel and community interaction and engagement

We do not feel that the site is well located to meet this criteria. The pavement between this site and the main village of Llyswen which gives access to the amenities (Shop/Hall and School) is narrow and not appropriate for walking, especially with children. The road between the proposed site is very busy due to it being a trunk road and is not appropriate to cycle on, therefore the site does not lend itself for walking or cycling to enhance physical activity.

There is a public footpath that currently runs through the proposed plot of land, if this is removed or changed it will have a negative impact on the health and well being of people who enjoy physical activity such as walking as they will not have ease of access to the local green spaces. This would be contrary to one of Powys County Councils' objectives as outlined in their 'One Powys Plan'.

2) Are the development proposals likely to be compatible with the established neighbouring land uses?

The neighbouring land use is predominately Agriculture. The inclusion of a significant number of additional houses in the plot adjacent to us will increase noise pollution and significantly alter the appearance of the village from its historical shape. The proposed extension of the existing estate will also be unsightly as the view from the Radnorshire side of the valley will be significantly different due to the addition of houses higher up the valley side and this would not be in common with neighbouring villages.

3) Do the proposals provide employment opportunities and/or the potential for upskilling the local workforce?

No. The site is restricted to housing with no business use and there are very few job opportunities in the neighbouring vicinity.

4) Given the factors known about the site, could development provide a particular opportunity for planning gain that might not otherwise be achieved (addressing community need, overcoming settlement infrastructure constraints)?

There are far greater needs of Llyswen as a community including wider and safer pavements into the village and parking facilities for those properties to have to park on the main A470.

Status Maintained

There is no community need for the further addition of such a large development of land, adding a play area does not assist this as there are already play facilities at the local primary school.

The local primary school is already at full capacity and with the possible closure of the local high school, without local availability of school places people would have to travel further, creating more traffic on an already busy road.

5) Given the factors known about the site, is it considered probable that the land will be released for developing during 2011-2026?

Our understanding from the Public meeting in Llandrindod was that the purpose of the submission of plots for inclusion in the LDP was for planning / development purposes. Previous plots within the village of Llyswen on the opposite side of the road have been within the LDP for 15+ years and have had planning on them and yet never developed, including a potential brown field site, of lower house farm. Surely these previous plots should be developed first with a smaller number of in fill houses in keeping with the nature of the village structure and the local plan in relation to small villages, rather than further adding large sites un-necessarily to the village.

6) Is the site's development likely to encourage the community to get together and increase social interaction? Could the development proposals boost demand for local services and help to sustain or increase them?

The addition of more properties within a close knit village like Llyswen will not make any difference to the social interaction of the community. In creating an additional estate on the edge of the village rather than in filling plots within the village there is the potential for less social interaction, especially, if as on the current Llys Meillion estate the majority of houses are rented properties which results in people stopping in the village for shorter periods of time and therefore not being able to fully engage with the community, as the children are less likely to go to the local school.

7) Will development of this site offer particular scope to build a more sustainable community?

Please explain why you have marked this positive. A large development like this in Llyswen will not provide a more sustainable community as per previous point, if houses are rented the members of the community are more likely to change on a regular basis and therefore there is less of a sustainable community.

8) Does the candidate site development proposal have the support of the Town & Community Council?

One of our neighbours has spoken with the Chair of Llyswen and Bronllys Community Council and their support is not given and they back the views of the residents 100%.

It has already been stated quite clearly that Bronllys is a key settlement area, so as Llyswen is part of Bronllys' catchment area it would make more sense to develop Bronllys especially as due to the recent bypass of Bronllys, access to the main trunk roads is easier and sites can be developed in a safer and more traffic friendly way.

9) Is the development likely to impact positively on culture, local distinctiveness and sense of place, including the protection of archaeological and built heritage assets?

There will not be a positive impact, the recent build of Llys Meillion estate has resulted in a significant impact on infrastructure of the village with a massive impact on the Heritage nature of the Middle Wye Valley Historic Landscape and to add such a further large development to this end of the village will have yet a further detrimental impact. Llys Meillion and the proposed plot are within the setting of two listed buildings and as such we feel by including the proposed plot this would go against the Register of landscapes of Historic Interest in Wales.

There is a public footpath that currently runs through the proposed plot of land and this would need to be taken into consideration in order to keep access to the local green spaces.

					Status	Maintained

10) Will the development proposals provide employment facilities, support the need of businesses to expand, re-locate, diversify?

The development of this land would potentially be for housing alone and not for businesses, the few existing businesses in the village would not benefit from expanding to the proposed plot.

11) Will the development proposals contribute to providing a mix of uses in the settlement?

As per above point, the proposal for this plot, if it should it be successful, is for housing. Therefore there will not be a mix of uses within this proposed plot.

12) Do the development proposals supporting housing provision including affordable homes?

When the housing estate Llys Meillion was granted planning permission, it was on the condition that affordable housing was to be built. The affordable homes that were built are still owned by the developer and rented out. There is no need to develop further affordable homes, if the original affordable homes on the Llys Meillion site were put up for sale.

13) Is the site well served by existing services (including access, water, drainage, energy supply)?

It is already known that the sewerage within the village is not fit for purpose so by adding further houses will only increase the problems.

During the time we have lived on the Llys Meillion estate, it seems to suffer with a substantial number of power cuts, if the number of properties utilising the supply was increased there would be more pressure on the power supply and this could lead to even more frequent power cuts.

There is a brook that runs down the one side of the proposed development site that floods during the winter months and causes flooding within the proposed site. During heavy periods of rain the field becomes waterlogged and a stream of water runs down it, if more hard landscaping is added, this would increase the likelihood of flooding and further exacerbate the known issues of this water flooding the drains and on to the main A470 through Llyswen.

Previously during a period of rain, the excess of water resulted in our garage and neighbouring properties' gardens being flooded.

14) Can the development proposals be sympathetically incorporated into the landscape and local environment without harm to the character and appearance of the area? (particularly when considering a site for development on green field land and/or at the edge of a settlement where development will extend into the open countryside).

The proposed site is on the edge of the village and is visible for miles around, it would significantly alter the appearance of the village from its historical shape. The proposed extension of the existing estate will also be unsightly as the view from the Radnorshire side of the valley will be significantly different due to the addition of houses higher up the valley side and this would not be in common with neighbouring villages.

15) Can the site be safely accessed and can the highway network serving the site adequately accommodate the associated traffic implications?

Access to Llys Meillion estate is on a dangerous piece of road. Visibility towards Builth Wells does not meet planning standards mentioned in your document and visibility is affected by cars parking on the road outside properties opposite the petrol station, this results in cars having to give way to let on-coming traffic through which causes a significant risk to pedestrians as some cars pass each other by driving onto the petrol station forecourt, which is also the pedestrian footpath.

The road into Llyswen from Bronllys is a straight piece of road which some drivers do not abide by the speed limits. Complaints have been made to local AM's and to the Minister of Transport about the speeds within the village.

Status Maintained

16) Does the location of the site encourage a shift to using more sustainable forms of travel (e.g. is it central and accessible to local services and/or public transport network without physical barriers to safe access on foot or cycle)?

Due to the location of the village in relation to employment opportunities there is very limited scope for people to walk or cycle to work, residents would need to have their own mode of transport, from personal experience even short journeys on public transport can take a considerable length of time. Additionally, there are very poor pavements within the village and no cycle paths.

17) Are the development proposals likely to regenerate the area? (e.g. bringing disused land/buildings back into positive re-use, meeting an identified community need, increase footfall and/or creating new jobs)?

No, as the proposed site is a Greenfield site.

18) Is the site previously developed land

No

19) Will development of this site avoid the loss of the Best and Most Versatile agricultural land?

The proposed site is used as agricultural land to graze livestock and is the home of many species of wildlife.

20) Can the site be developed without compromising the safeguarding of important mineral resources?

In order to develop the proposed site a significant amount of soil would need to be extracted, therefore the safeguarding of minerals would not be achieved.

21) Is the site free from flood risk or has it been proven that any flood risk can be acceptably managed?

As previously detailed above, the area covered by the proposed site floods regularly. During heavy periods of rain, the field becomes waterlogged and a stream of water runs down it, if more hard landscaping is added, this would increase the likelihood of flooding and further exacerbate the known issues of water flooding the drains and on to the main A470 through Llyswen. Previously during a period of rain, the excess of water resulted in our garage and neighbouring properties' gardens being flooded.

22) Is the site free from the risk of contaminated land or is it likely that any known contamination can be acceptably managed?

The LNG Pipeline runs in close proximity to the proposed site and as such it is within a sensitive and potentially dangerous area and therefore the proposed plot should not be included for development.

23) Will the development proposals contribute positively to sustainable waste management in the county and the move to a low waste Powys?

As you have already confirmed in the LDP, there are known sewerage problems in Llyswen and work will need to be undertaken to address the Waste Management issues as the drains on the main A470 trunk road have blocked and over-flowed on numerous occasions.

24) Is the site free from environmental constraints/sensitivity such as the inclusion of, or proximity to, fragile habitats and species and protected landscapes (s)?

Source: Email

Type: Objection

Mode: Written

Status: Maintained

The results of the Ecology Survey should be released before any final decision is made.

The proposed site runs between two listed buildings and any development and disruption to this land could have an impact on their infrastructure.

Various wildlife including bats, badgers, newts, sparrow, swallows, red kites, doves and foxes live within the proposed plot and neighbouring brooks and development of this site would cause significant harm.

25) Are there particular opportunities for biodiversity or ecological gain on this site?

The development of this site would cause the following risks:

A detrimental impact on species including bats, badgers, newts, sparrow, swallows, doves, red kites and foxes and their habitats in relation to disturbance and fragmentation.

Noise and light generated during construction processes may not directly harm individual animals but it could affect feeding and breeding behaviours which could have negative impacts on long term population levels.

In order to develop this proposed site thousands of tonnes of soil would need to be excavated which could damage the local soil eco-system and impact on the drainage of surrounding areas.

Additional Issues and Key Points

26) • As quoted in the Welsh Government Ministerial letter 2011 – The population and household projections indicate a downward trend in population growth for Powys, therefore it would seem more appropriate for development sites to be restricted to key settlement areas, or existing Brownfield sites in larger towns and villages.

27) • In the LDP Llyswen & Boughrood are incorrectly counted as one village, they are two very separate villages and have two completely separate Community Councils. This issue needs to be addressed within the LDP as it would result in Llyswen being classified as a small village which is not suitable for large housing development sites.

28) • The existing infrastructure of Llyswen cannot support any large scale additional development, there are already plots within the village which were included in the previous LDP which to date have not been developed on. We feel that these sites or infill individual houses should be developed before any further sites are included or alternatively other sites in the local area, including a current site for sale in Talgarth.

29) • The village as it currently stands poses several risks; the speed of traffic through the village is unsafe, current pavements are not fit for purpose, residential parking on the main A470 causes high risk areas within the village. The local primary school is already at full capacity and the local High School under threat of closure, so where would children attend school if a substantial number of additional people came to the village.

30) • The site is unsuitable, due to the amount of excavation and soil removal that would be required in order to develop the site, which could directly impact on the stability of the highway above the site.

We strongly object to this proposal and ask that you seriously consider removing the site completely from the LDP or choose an alternative site more appropriately situated, or one that already has planning on it.

Question Representation Texts

**Question: 3d. (i) Representation Details**

Representation Texts: Objection to deposit LDP – Settlement Allocation Llyswen & Boughrood – site Reference PO6 1HA (1108)

We wish to strongly object the proposal of site PO6 HA1 being included in the Powys Local Development Plan 2011-2026. Below are our concerns with the proposals:

- 1) The proposed site behind the houses of Llys Meillion has the tendency to become very wet and part of the field is known to be already in the flood zone. It is well known that 2 years ago, we had some severe weather and there was too much water for brook behind Llys Meillion to cope. This resulted in the excess water heading down into the grounds of Llys Meillion and through garages and gardens causing a substantial amount of damage. Our fear is that, if there is more tarmac and concrete in the proposed site for roads and footings, this will stop the water soaking away naturally and create further problems.
- 2) Llyswen has recently been having trouble with the local sewage works. Flooding of the road from Llys Meillion estate up towards the roundabout heading for Talgarth has happened on numerous occasions. More Houses in this area would put an even greater strain on the already overcrowded sewage system.
- 3) Llyswen is a small rural community in its own right and having further large scale development on the edge of the village will have significantly change the character and appearance of the village.
- 4) The junction for Llys Meillion is on very dangerous piece of road. Your visibility down towards The Griffin Inn from the junction is always hindered by cars parking outside their properties. In addition to this some local residents from the village park their cars on the entrance of Llys Meillion as there is a lack of adequate parking within the village.
- 5) The local garage is a very busy little petrol station, I can count numerous occasions when walking I have had to dodge an oncoming vehicle that has driven onto the pavement by the garage to avoid an accident themselves. With more people within this area of Llyswen, it will be only a matter of time before an accident happens here.
- 6) It is my understanding that there are already areas within Llyswen that have been within the LDP for 15 Years+ with the planning permission and have never been developed. We wish to question the idea of adding green field land to the LDP, when the areas that are already in the LDP have not been developed.
- 7) Not all the houses are currently lived in at Llys Meillion. The estate has been built for some 5 years now and I believe most of the houses that have finally been sold. A lot of the houses that have been sold are currently rented out to tenants. Our understanding was that Llys Meillion was built to bring affordable housing to the local community, but this is clearly not the case. What is there to stop this happening with the new proposed development?

It is our opinion that there are already enough houses in this part of Llyswen, especially with the houses that have already been built and are yet to be sold. It is our feeling that if there were to be more development within the Llyswen area, there would be more suitable sites nearer the school and village hall which is not in a flood zone – Ref candidate site 684. This site is on straight, wide piece of road with wider pavements which would result in a safer entrance than the one that leads to Llys Meillion.

Question Representation Texts

**Question: 3d. (i) Representation Details**

Representation Texts: Candidate Site 1108  
Land at Llyswen adj B24 HA3

We wish to object to the proposed changes to the Powys Local Development Plan, specifically with reference to the land referred to in Allocation No. P06 HA1 and the building of more houses adjoining the Llys Meillion estate of 35 houses for the following reasons:

- 1) Waste Water Treatment is a matter of concern in that we understand that the existing plant had already been overloaded by the addition of the Llys Meillion estate so the addition of further 25 to 29 houses would make the situation far worse in the future.
- 2) Rain water run-off which, originates from the run off from Brechfa pool and hillside down to the field would be worsened with the replacing of land capable of absorbing most of the rain water, the excess being taken care of by the stream running along the boundary with the existing properties from the spring, near the stile by the A470 road, this already causes excess waterlogging in the ground between the stream and the houses at the Llys Meillion estate and the gardens which are at a much lower level. The addition of the further housing roof areas, roads, footpaths, patios and drives would not absorb rain water, this would run off, some of which would put further strain on the stream possibly exacerbating the situation to the North of the stream.
- 3) There is a Public Right of Way running through the proposed site which is regularly used by ramblers and locals.
- 4) The main road running from Builth through to Talgarth and onto Abergavenny also to Glasbury, Hay-on Wye, Hereford and Leominster which, although has a B classification, is a very busy road at most times of the day with heavy lorries, farm vehicles, holiday makers, caravans, cars and cyclists. The situation is made much worse by the shows held at Builth such as the Royal Welsh so much so that temporary traffic lights are used at the Griffin Inn junction. Pedestrians are limited to a very narrow footpath from Llys Meillion to the Griffin Inn and have to pass a very busy garage. The path is so narrow for a small stretch making it dangerous with some of the larger vehicles using the already narrow road, forcing the pedestrians to take evasive action. The situation is made more serious with the cars parked, roadside, opposite the garage and the delivery vehicles and cars entering the garage forecourt, vehicles often waiting on the footpath beside the cars at the pumps. At the junction of Llys Meillion there is a nursing home, visitors to this and the holiday lets nearby tend to use the lower part of Llys Meillion for parking, we have also seen articulated vehicles using this part of the road to park for long periods. Opposite the junction is a very busy farm yard which supplies vehicles, equipment and trailers to other farms in the area. The entrance to Llys Meillion is therefore very busy. There appears to be persistent speeding of traffic along the stretch of road between the nursing home and the 30mph sign some 300m away both in and out of the village.
- 5) The placing of housing at the Llys Meillion end of the village makes it more dangerous for children and parents going to the school at the opposite end of the village, any further increase in housing here would therefore make the situation worse since this housing will be used by families not adults alone. It is also more often the case these days that each household will have at least 2 vehicles thereby increasing the traffic at the Llys Meillion junction.
- 6) We are given to understand that there is already land with planning consent on the opposite side of the main B road which we believe has been so for many years now and that it is still a current status permission. Why, therefore is this not being utilized without stealing a greenfield site with no planning permission.

---

7) The gas pipeline still holds a major concern to us here should there be any major problems occurring with the line. There is still the outstanding issues with the LNG pipeline 250m buffer zone, which is a protected area  
The existing development at Llys Meillion has impacted on the Heritage nature of the Middle Wye Valley Historic Landscape (Area 36) with further development there will be additional detrimental impact, particularly as there are two listed building within the setting.

8) The bird life in the area, which is still recovering from the last development, will also suffer again with loss of feeding ground and general habitat for the insect life on which they feed. The House Martins use the mud created around the spring at the Southern corner near the stile for nest build as well as the field for feeding; should this be taken away from them the existing nesting site will possibly be lost due to the distance the birds would have to travel for nesting materials alone.

Question Representation Texts

**Question: 3d. (i) Representation Details**

Representation Texts: Objection to deposit LDP – Settlement Allocation Llyswen & Boughrood - Site Reference PO6 HA1 (1108)

We strongly object to the inclusion of PO6 HA1 being included in the Powys Local Development Plan 2011-2026 for the following reasons:

- 1) Welsh Government in 2011 advised that there was a downward trend in population and growth in Powys, so why so much development in the village of Llyswen. Five years ago there was development of approximately 35 properties right next to the proposed site whereby the last property has just recently been sold.
- 2) The amenities in the village are not fit for purpose and the village itself in its current state cannot sustain a further large development as proposed in this LDP.
- 3) The main A470 runs through the village and traffic through the village does not abide by the speed limits. There is a huge risk some several hundred yards from Llys Meillion whereby residents have to park their vehicles on the main trunk road opposite the petrol station. This causes many problems with oncoming traffic from both directions and on a number of occasions there has been the need for traffic that has not given way to drive into the forecourt of the petrol station to avoid a collision. This is a hazardous risk in itself, should there be a collision the explosion would wipe out most of the village.  
  
The throughput of the traffic is further increased periodically throughout the year with the Royal Welsh Show, Hay Festival, Brecon Jazz and this further increases the traffic jam situation on the main trunk road. By adding an additional access and the potential of 60 + cars to be coming out an access on this road would be unsustainable.  
  
Visibility towards the Petrol station is not within limits and is blocked by parked cars on the trunk road. There are at least 8-10 existing accesses in close proximity of each other on this busy piece of trunk road by adding to this you are increasing the risk of a fatality.
- 4) The pavements in the surrounding area are not fit for purpose and there are no footpaths or cycle paths.
- 5) The proposed plot floods, even though you state you have moved the boundary of the proposed site to exclude the flooding area as a resident of the village for 35 years I can confirm that the proposed site floods significantly in the winter months and the adjacent brook is an additional problem. Water runs of the adjacent hill down into the field at two points and during the winter this overflows.
- 6) There are already plots that have been approved many years ago in the LDP which have existing planning and are yet to be developed, it is our understanding that the Council monitor the sites included in LDP's and sure should question why plots are then not developed? Why have such sites not been asked to develop and therefore then there is not the need to include this site for development.
- 7) The proposed site sits on the edge of the village on a flat piece of ground and can be seen from many miles around, to develop this site and add 30+ properties would not fit in with the surrounding landscape and would be unsightly to those entering the village.
- 8) There is a public footpath that enters the top end of the proposed site and runs through the field, have various associations been consulted on this?

Status Maintained

9) The Pipeline runs through the adjacent field where the proposed site is situated and we feel that it is dangerous and hazardous to develop this field and is a sensitive area.

10) We strongly feel that by development this site we feel that important species, other landscape features of major importance of wildlife and key habitats of wildlife would:

- suffer direct impact resulting in the reduction or complete loss of: habitat present, the abundance, distribution and/or diversity of species present;
- suffer an indirect impact from nearby development through increased ecological disturbance and stress, thereby reducing the site's capacity to support the wildlife present;
- suffer a reduction in ecological quality so that the site is no longer able to support the migration, dispersal or genetic exchange of wild species.
- be further fragmented from other similar features by development that causes a 'barrier' effect in the landscape between fragments.

11) The current sewerage system cannot sustain any further development and you have already recognised this in your LDP whereby work to the Waste Management System would be required.

12) There are no job opportunities within the Village of Llyswen and very few in the neighbouring towns. The large organisations have a low turnover of staff and therefore not the opportunity for new comers to enter into employment easily, therefore travelling long distances would be a given.

13) The primary school is a full capacity and the local high schools and colleges are going through a re-organisation and some shutting therefore where would new children coming to the area go?

14) Discussions have taken place previously whereby our Community Council backs the residents in not wanting the development to take place.

Question Representation Texts

**Question: 3d. (i) Representation Details**

Representation Texts: The section of land P06 HA1 proposed for development in the ref point 35.25 mentioned above poses a flood risk for the current residents of Llys Meillion. This section should be deleted from the plan.

The site contains a stream which is adjacent to the current Llys Meillion development, the proposal is to develop the site above the stream (i.e. higher ground) this will result in excess water draining into the stream which could result in flooding of the existing site. There is nothing within the plans that demonstrate that flood defences would be put in place to prevent flooding.

The Llys Meillion development has been built with disability in mind, as a result the houses have no flood barriers, i.e. there are no door steps, the main entrance is flush to the pavement, if the stream floods then this will result in the houses adjacent to the stream flooding.

New Site

Map: P7: Bronllys - 2015

Issue: 2015: Deposit Draft-12. Alternative Sites

*Question Representation Texts*

**Question: 3d. (i) Representation Details**

Representation Texts: A separate objection is made by AB Planning in relation to Policy H1 regarding the need for additional housing land to be provided within the Plan Period, which provides the strategic policy context for this site specific objection.

The settlement of Bronllys comprises a sustainable settlement with significant service provision including housing, retail, education and multiple additional essential services available within the immediate settlement and community. The settlement includes multiple employment facilities including restaurants and 2 leisure parks and a fuel station. The community also incorporates a Primary school and leisure facilities including a swimming pool. As such the designation of the settlement is appropriate in the Deposit Plan and allows for higher proportions of housing delivery, reinforced by its location along the primary Growth Corridor as also recognised within the Wales Spatial Plan.

The proposed Site Alternative is located within walking distance of all primary services within Bronllys and more importantly within walking distance of the wider facilities and services located within Talgarth. Talgarth is only 'separated' from Bronllys by a stream and the two settlements in effect operate in unison, as in the case of Llyswen and Boughrood.

As a result of the above context the Site Alternative presented here are within walking distance of a significant retail centre, a further school, large medical centre, livestock market, rugby and sports club, 3 industrial estates and additional employment facilities. There are multiple restaurant, pubs and accommodation. Talgarth includes the facility of a Town hall that also accommodates services such as a mobile cinema.

The proposed Site Alternative presented herein is well related to the following:

- Adjoins existing housing allocations within the Deposit Plan and the existing school and would be attached to areas 1 and 2 of the previously presented Candidate Site process (now included in the Deposit Plan) and P07 HA2
- Adjoins a key public transport network with immediate links to Hay On Wye and Brecon, While being within walking distance of the centre of Talgarth
- Accessed off the primary road network by a recently implemented roundabout system.

As a result of the above and the location of the Site Alternative being serviced by infrastructure already implemented as part of the recent improvement to the trunk road network that passes the site, its development would ensure the further sustainable and efficient utilisation of these resources. A failure to make provision for residential development, as proposed, in such locations, would be contrary to the Identified LDP Strategy and the Wales Spatial Plan.

The proposed Site Alternative will have limited additional impacts upon landscape beyond that already accommodated by the inclusion of the allocation of HA1 and the proposed site area as now promoted, that would be adjusted to accommodate the SAM designation along the boundary to the western boundary adjoining the CP School, is as previously assessed and considered as acceptable as part of the LPA's Local Development Plan Candidate Site process.

Having regard to the LPA's failure to provide sufficient housing allocations and thereby satisfactorily address the policy context set out within Policy P07 HA1, the Site Alternative

**Appendix 1 - Deposit LDP Reps & Responses by Refpoint, Cabinet 15-12-15**

by: Representation No

Filtered to show: (all of) Stage=V; Status=M

Rep'n/Para/Policy	AccessnNo	DateLodgd	Late?	Status	Modified	Summary

presented here will allow the current housing short-fall to be addressed, thereby providing a mechanism without which the Plan would be considered 'Unsound'. As set out elsewhere in this submission the following tests of Soundness will be met by the inclusion of the Site Alternative presented here:

- C2
- C3
- CE1
- CE2

The allocation of the proposed Site Alternative will ensure that residential occupiers of the proposed dwellings can access all necessary key facilities and services without use of the private motor car. Additionally, the proposed employment provision will be located off a highway network and access that ensures safe and efficient movement.

The spatial arrangements achievable within the resultant amended allocation of the current P07 HA1, will ensure that the amenity of the respective elements of the proposed and existing housing and adjoining land uses, can be delivered to a high standard and achieve a good high quality development.

The spatial arrangement of the proposed site allocation will ensure the implementation of good landscape practice, including landscaped buffer to the boundary with the CP school and the SAM.

Question Representation Texts

**Question: 3d. (i) Representation Details**

Representation Texts: Background

Essentially, this representation is a repeat of that made in September 2014 (RN2261) and should be read in conjunction with those now made in respect of candidate sites 854 and 1222.

At the candidate site stage, two sites were put forward for consideration by my clients (854 and 1222). The third site was put forward by another party (857). The situation now is that my clients have acquired the ownership of site 857 and all three sites are in the same ownership and control. The representation is made on this basis and explains the positive contribution that the site can make, alone and in combination, to maximise opportunity for synergies and other benefits.

Tests of Soundness

In terms of the tests of soundness referred to above at 3a, it is considered that the following tests have not been met, for the reasons set out below.

Coherence and Effectiveness - CE1

The deposit draft LDP also states that Local Growth Zones (LGZs) are being taken forward as an alternative model to Enterprise Zones, to help encourage and support jobs and growth within the county. One such LGZ being established is Brecon / Bronllys / Talgarth. The strategy in relation to housing numbers does not appear to take account of the additional pressure likely to come from such a LGZ designation and on this basis, housing numbers in Bronllys should be increased to reflect the enhanced role and status of the town in attracting jobs and growth. The LGZ approach places both an emphasis and expectation on Bronllys as a hub for additional (and disproportionately higher) growth. Within this context, the positive contribution of the site should be reconsidered.

This would ensure that the test (the plan sets out a coherent strategy from which its policies and allocations logically flow) is met.

Cohesiveness and Effectiveness - CE2

It is evident that the potential for the site to deliver benefits, alone and in combination, was considered at the candidate site stage and the narrative was positive.

The position now is that a change in ownership and control has meant that sites 857 and 1222 should be regarded as one, with a significantly enhanced prospect of delivering a mix of housing and community benefits. On this basis, it is considered that the contribution of the site should be re-assessed as credible alternative.

From the results of the candidate site assessment, it is clear that the site did not fail on matters of principle. Rather, the site was regarded as not being needed. Consequently,

by: Representation No

Filtered to show: (all of) Stage=V; Status=M

Rep'n/Para/Policy	AccessnNo	DateLodgd	Late?	Status	Modified	Summary	
6266.V1		14/07/2015	<input type="checkbox"/>			Summary: Bronllys - Alternative Site (CS 857)	
Source:	Website registration	Type:	Objection	Mode:	Written	Status:	Maintained

there do not appear to be any fundamental objections to its inclusion in the LDP, particularly if there is a need to find more land for housing as a result of the LGZ designation and given the changing circumstances as regards land ownership and enhanced deliverability.

In detailed terms, site 857 is considered to offer the potential opportunity for development of part of the site as a car park for the memorial hall / pub / village (in line with the existing UDP allocation) together with the remaining part of the site being made available as allotments within easy walking distance of residents, creating a compelling case for a development that would integrate well with the village.

In addition, site 857 was in separate ownership to site 1222. However, both sites are now in the same ownership and control and this presents an enhanced argument for their contribution to be assessed again and as a single entity given that they are contiguous. In fact, many of the comments of stakeholders make reference to the inter-relationship between the sites although there was no clarity or certainty about this at that stage.

It is considered, therefore, that there are no overriding objections to the future development of the site and, in addition, there would be positive aspects to development, particularly when considered in conjunction and combination with site 1222.

In conclusion on this aspect and looking back at this particular test of soundness, it is considered that the test (the strategy, policies and allocations are realistic and appropriate having considered the relevant alternatives and / or are founded on a robust and credible evidence base) has yet been fully and sufficiently met. The scenario presents a persuasive argument for inclusion of the site in the LDP, particularly given that the synergies could not previously be considered with any degree of certainty whereas now, then can.

Cohesiveness and Effectiveness - CE4

It is acknowledged that there is a degree of flexibility within the overall housing requirement. However, it is considered that the margins concerned and the ability to deal with changing circumstances in the future needs to be enhanced should, for example, housing sites not come forward as anticipated or if there is a need to find more land for housing, in suitable locations.

The plan explains the overall housing requirement during the plan period (2011 to 2026) and that a degree of flexibility has been built into the requirement, which has resulted in the provision of 6071 dwellings in the LDP as an overall housing figure.

As part of the Councils assessment of this site, the narrative suggests it is not needed. However, it is considered that the overall level of flexibility or over-provision has potentially been underestimated. Market forces and other influencing factors require more flexibility to ensure future demand is met. The change in circumstances brought about by the single ownership of the site together with sites 854 and 1222 means that there is increased opportunity to use the land as allocations more flexibly. This could also enable development to be phased over the three sites, which would help ensure the required amount of land being released for housing over the plan period and assimilation into the village.

In addition, the main strategy of the LDP in relation to housing growth is based on a settlement hierarchy. Bronllys is classed as a "large village, which is second in the hierarchy, reflecting its sustainable contribution. The plan states that large villages will accommodate new housing in proportion to their size and facilities and according to their capacity to accommodate growth due to environmental and infrastructure capacity constraints. No fundamental or overriding concerns have been raised in respect of the environmental and sustainable impact of the site.

In addition, due to the change in circumstances of land ownership and control, the site can also reasonably be considered as a single entity together with site 1222 rather than being fragmented, which would increase flexibility and economies of scale in terms of community benefit and enable the plan to deal with changing circumstances and ensure that future housing demand is met.

This would ensure that the test (the plan is reasonably flexible to enable it to deal with changing circumstances) is met.

Council Response: 0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: On the basis that the site offers the opportunity for development that would bring social, environmental and economic benefits, with realistic prospects for delivery (with suitable highway access and being well related to both existing and planned developments nearby) and within the context set by the designation of Bronllys as part of a wider LGZ, its inclusion as an allocation within the development boundary on the following basis would be justified and fully deserving of further consideration by the planning authority / LDP inspector:

The western part of site 857 should be a mixed use allocation for a village carpark / community use (allotments).

The eastern part of site 857 should be a housing allocation, to be incorporated with site 1222, in order to maximise synergies for the purposes of providing affordable housing, open space and any other reasonable and appropriate on-site essential community facilities.

*Question*                      *Representation Texts*

**Question: 3d. (i)      Representation Details**

Representation Texts:      Background

Essentially, this representation is a repeat of that made in September 2014 (RN2261) and should be read in conjunction with those now made in respect of candidate sites 854 and 857.

At the candidate site stage, two sites were put forward for consideration by my clients (854 and 1222). The third site was put forward by another party (857). The situation now is that my clients have acquired the ownership of site 857 and all three sites are in the same ownership and control. The representation is made on this basis and explains the positive contribution that the site can make, alone and in combination, to maximise opportunity for synergies and other benefits.

Tests of Soundness

In terms of the tests of soundness referred to above at 3a, it is considered that the following tests have not been met, for the reasons set out below.

Coherence and Effectiveness - CE1

The deposit draft LDP also states that Local Growth Zones (LGZs) are being taken forward as an alternative model to Enterprise Zones, to help encourage and support jobs and growth within the county. One such LGZ being established is Brecon / Bronllys / Talgarth. The strategy in relation to housing numbers does not appear to take account of the additional pressure likely to come from such a LGZ designation and on this basis, housing numbers in Bronllys should be increased to reflect the enhanced role and status of the town in attracting jobs and growth. The LGZ approach places both an emphasis and expectation on Bronllys as a hub for additional (and disproportionately higher) growth. Within this context, the positive contribution of the site should be reconsidered.

This would ensure that the test (the plan sets out a coherent strategy from which its policies and allocations logically flow) is met.

Cohesiveness and Effectiveness - CE2

It is evident that the potential for the site to deliver benefits, alone and in combination, was considered at the candidate site stage and the narrative was positive.

The position now is that a change in ownership and control has meant that sites 857 and 1222 should be regarded as one, with a significantly enhanced prospect of delivering a mix of housing and community benefits. On this basis, it is considered that the contribution of the site should be re-assessed as credible alternative.

From the results of the candidate site assessment, it is clear that the site did not fail on matters of principle. Rather, the site was regarded as not being needed. Consequently, there do not appear to be any fundamental objections to its inclusion in the LDP, particularly if there is a need to find more land for housing as a result of the LGZ designation and given the changing circumstances as regards land ownership and enhanced deliverability.

In detailed terms, it is considered that the land is well screened from and by the new bypass, which itself also creates a defensible edge to the village in this location to the extent that any development is likely to be seen as being well integrated with the village in the same way that proposed site PO7 HA1 is.

Status Maintained

In addition, site 1222 was in separate ownership to site 857. However, both sites are now in the same ownership and control and this presents an enhanced argument for their contribution to be assessed again and as a single entity given that they are contiguous. In fact, many of the comments of stakeholders make reference to the inter-relationship between the sites although there was no clarity or certainty about this at that stage.

It is considered, therefore, that there are no overriding objections to the future development of the site and, in addition, there would be positive aspects to development, particularly when considered in conjunction and combination with site 857.

In conclusion on this aspect and looking back at this particular test of soundness, it is considered that the test (the strategy, policies and allocations are realistic and appropriate having considered the relevant alternatives and / or are founded on a robust and credible evidence base) has yet been fully and sufficiently met. The scenario presents a persuasive argument for inclusion of the site in the LDP, particularly given that the synergies could not previously be considered with any degree of certainty whereas now, then can.

Cohesiveness and Effectiveness - CE4

It is acknowledged that there is a degree of flexibility within the overall housing requirement. However, it is considered that the margins concerned and the ability to deal with changing circumstances in the future needs to be enhanced should, for example, housing sites not come forward as anticipated or if there is a need to find more land for housing, in suitable locations.

The plan explains the overall housing requirement during the plan period (2011 to 2026) and that a degree of flexibility has been built into the requirement, which has resulted in the provision of 6071 dwellings in the LDP as an overall housing figure.

As part of the Councils assessment of this site, the narrative suggests it is not needed. However, it is considered that the overall level of flexibility over-provision has potentially been underestimated. Market forces and other influencing factors require more flexibility to ensure future demand is met. The change in circumstances brought about by the single ownership of the site together with sites 854 and 857 means that there is increased opportunity to use the land as allocations more flexibly. This could also enable development to be phased over the three sites, which would help ensure the required amount of land being released for housing over the plan period and assimilation into the village.

In addition, the main strategy of the LDP in relation to housing growth is based on a settlement hierarchy. Bronllys is classed as a large village, which is second in the hierarchy, reflecting its sustainable contribution. The plan states that large villages will accommodate new housing in proportion to their size and facilities and according to their capacity to accommodate growth due to environmental and infrastructure capacity constraints. No fundamental or overriding concerns have been raised in respect of the environmental and sustainable impact of the site.

In addition, due to the change in circumstances of land ownership, the site can also reasonably be considered as a single entity together with site 857 rather than being fragmented and potentially isolated, which would increase flexibility and economies of scale in terms of community benefit to enable the plan to deal with changing circumstances and to ensure future housing demand is met.

This would ensure that the test (the plan is reasonably flexible to enable it to deal with changing circumstances) is met.

that my clients have acquired the ownership of site 857 and all three sites are in the same ownership and control. The representation is made on this basis and explains the positive contribution that each site can make, alone and in combination, to maximise opportunity for synergies and other benefits.

Tests of Soundness

In terms of the tests of soundness referred to above at 3a, it is considered that the following tests have not been met, for the reasons set out below.

Coherence and Effectiveness - CE1

The deposit draft LDP also states that Local Growth Zones (LGZs) are being taken forward as an alternative model to Enterprise Zones, to help encourage and support jobs and growth within the county. One such LGZ being established is Brecon / Bronllys / Talgarth. The strategy in relation to housing numbers does not appear to take account of the additional pressure likely to come from such a LGZ designation and on this basis, housing numbers in Bronllys should be increased to reflect the enhanced role and status of the town in attracting jobs and growth. The LGZ approach places both an emphasis and expectation on Bronllys as a hub for additional (and disproportionately higher) growth. Within this context, the positive contribution of the site should be reconsidered.

This would ensure that the test (the plan sets out a coherent strategy from which its policies and allocations logically flow) is met.

Cohesiveness and Effectiveness - CE2

It is evident that the potential for the site to deliver benefits, alone and in combination, was considered at the candidate site stage and the narrative was positive.

From the results of the candidate site assessment, it is clear that the site did not fail on matters of principle. Rather, the site was regarded as not being needed. Consequently, there do not appear to be any fundamental objections to its inclusion in the LDP, particularly if there is a need to find more land for housing as a result of the LGZ designation and given the changing circumstances as regards land ownership and enhanced deliverability.

In detailed terms, it is considered that the development of site commitment PO7 HC1 would have the effect of creating an artificial and arbitrary division on the ground with no real defensible edge to development along this part of the northern edge of the village. The development of proposed site 854 would remove the visual ambiguity that would otherwise result and provide an opportunity for a meaningful and enhanced landscaped edge to the village. It is considered that any negative impacts associated with the development of this site would, therefore, be far outweighed by the positive landscaped integration that would result. On this basis, it is considered that there are no overriding objections to the future development of the site, particularly in terms of visual impact.

In conclusion on this aspect and looking back at this particular test of soundness, it is considered that the test (the strategy, policies and allocations are realistic and appropriate having considered the relevant alternatives and / or are founded on a robust and credible evidence base) has yet been fully and sufficiently met. The scenario presents a persuasive argument for inclusion of the site in the LDP.

Cohesiveness and Effectiveness - CE4

It is acknowledged that there is a degree of flexibility within the overall housing requirement. However, it is considered that the margins concerned and the ability to deal with changing circumstances in the future needs to be enhanced should, for example, housing sites not come forward as anticipated or if there is a need to find more land for housing, in suitable locations.

New Site

Map: P8A: Builth Wells - 2015

Issue: 2015: Deposit Draft-12. Alternative Sites

*Question Representation Texts*  
**Question: 3d. (i) Representation Details**

Representation Texts: For the last five years we have been working with Rural Housing Enablers and Registered Social Landlords (RSLs) in the Builth Wells area identifying sites suitable for housing. We have also represented many site owners in the Builth area in relation to the previous consultations for the Powys County Council Unitary Development Plan (PCC UDP 2010). As a practice we have also made our representations via the Powys County Council Strategic Housing Partnership as well as the Joint Housing Land Availability Study (JHLAS).

We have monitored the delivery of housing across the county of Powys over the last 15 years. In doing so we have consistently challenged the Local Planning Authority (LPA) to allocate tracts of land which are realistically deliverable for housing within the relevant plan periods. We are the largest indigenous architectural practice in the county that has delivered mass housing as well as one off houses within Powys so are very well placed to make comments about deliverable land parcels within the county.

We act on behalf of the land owner for land parcel CSR 1148 as outlined in the PCC LDP Candidate Site Register November 2011. We take this opportunity to outline the veracity of the case for inclusion of this and in the context of the likelihood of other parcels of land in Builth Wells being delivered over the plan period.

We are consistent in our challenge to the LPA in relation to the truly deliverable areas of land in Builth Wells. We remind the LPA of our resistance to the inclusion of land parcels B5 HA7 and 85 HA5 in the Initial Deposit Stage 2014 and at the Public Inquiry of the PCC UDP 2010. We were proven right in our challenge as these land parcels were never developed over the plan period of the PCC UDP ending later this year. We are therefore surprised that these land allocations have again come forward within the Deposit Draft of the PCC LDP 2015 as 'white land, seemingly with the support of the LPA.

These sites have not been promoted by the land owner and despite our various invitations to him to come forward to develop these sites for housing with our RSL and private sector housing partners in the past 5 years there has been no communication on his part whatsoever. This is why we cannot see any point in including these parcels of land which he clearly has no intention of releasing for housing in the future.

In researching viable land opportunities for our RSL partners we went back to the Brecknockshire Local Plan of 1997. We were not entirely surprised therefore to find the land parcels referred to above were also included in this historical plan. The main driver behind Local Development Plans is the promotion of parcels of land for the delivery of housing within sustainable settlements is truly deliverable. For example we refer you to site LDP P08 HA2 depicted on the Brecknockshire Local Plan 1997 which has been included within the present draft of the LDP and has also appeared within the PCC UDP 2010. This is one of many sites in Builth that are not developed even though they have been in various Development Plans for some 20 years now.

In addition the southern part of B5 HA5 from PCC UDP 2010 is marked on the Brecknockshire Local Plan 1997 was also included within the development boundary of the settlement. Indeed it has come forward again within the LDP. The point remains the same that despite historical land allocations these sites have not been delivered over a period of in excess of 20 years.

1457.V1 20/07/2015  Summary: Builth Wells - Allocate Candidate Site 1148 for Housing

Source: Email

Type: Objection

Mode Oral (Examination)

Status Maintained

This is why we fail to see how their promotion within the PCC LDP 2015 is viable or realistic in terms of housing delivery for the county and more importantly for Builth Wells. The LPA needs no reminding that the allocation of such land parcels will mean that its delivery of housing according to its projections will be doomed to failure from the start. Indeed we made this point at a recent Agent's Forum in which we challenged the LPA to consider its delivery mechanism for 613 houses over the plan period given that it has consistently failed to do so since 1996. Through the inclusion of land which has a clear prospect of development only then will the LDP be sound. Without this the Development Plan for Powys will fail.

In terms of housing numbers we note that Builth Wells was considered an appropriate settlement for the delivery of 203 dwellings over the plan period of the UDP 2001- 2016. This target was never achieved even at a time of considerable house building in the town of the early to mid 2000s.

It is therefore surprising that there is now only 131 houses allocated within the LDP plan period to 2026. Where have the projected households from the UDP that wanted to live in Builth Wells gone to? We believe the main reason for the lack of delivery of housing over the UDP plan period for Builth Wells was that the majority of land allocations could not have been delivered without major infrastructure improvements, such as the installation of a major roundabout in the case of PCC UDP B5 HA7. In simple terms the sites could not be delivered because, even at the height of the housing boom, its delivery was economically unfeasible. The point being therefore why are these sites still being included for development when one could argue the economic environment for doing so in the future is never going to resemble that of the early to mid 2000s?

We challenged the housing numbers for Builth Wells going forward as part of our contribution to the Strategic Housing Partnership and at JHLAS where we have consistently made the point that the Local Authority is reliant on outdated and misrepresented data. The assessment of housing need has not been undertaken on a sufficiently micro level in order to fully investigate the precise need in most settlements in Powys. As an illustration of this, Llandrindod Wells has been allocated 398 dwellings over the plan period and while it is acknowledged that Builth Wells is slightly smaller than Llandrindod, the aspirations for the former settlement are very much greater than the latter settlement.

With all of the above in mind we see the inclusion of land reference PCC LDP CSR 1148 as not only meeting the identifiable needs for housing in Builth Wells as presented but also as a realistically deliverable site for housing in the town given the fact alternative sites in the town have for some 20 years never been built out.

We have previously investigated the opportunity for bringing forward this site by virtue of a separate planning application. Indeed the main issue to the site coming forward has been in relation to highways and access. With this in mind we enclose a copy of our communications with PCC Highways Department and its response. As you will see from the enclosed a viable access can be afforded into the application site PCC LDP CSR 1148. The site itself is a logical extension to the settlement of Builth Wells.

While the site was designated Red' at CSR stage this seemed to conflict with the written preamble to the site analysis which read:

"Site is largely detached from the settlement despite adjoining the development boundary to the south and existing built form (Hill View) housing estate which itself only appears connected to the settlement via a narrow footpath and vehicular highway. The site has highway frontage and could provide the pedestrian connections required. Given the site is quite a distance from the settlement services and facilities, there may be a need/desire here for cycleways enabling easier and quicker movements. There are other more connected, closer and sustainable sites available for selection in Builth and this site could represent a 'fallback site given how few constraints to development it appears to have. The site is surrounded by TPOs which may represent a slight issue in terms of access although considered that a solution can be found in addition, discussion with Dwr Cymru is necessary in order to gauge the location of a water main which traverses the site. It may be a serious consideration in terms of viability of the site as to whether an easement or pipe diversion creates the best outcome in terms of enabling development at the site, assuming the site is appropriate and acceptable."

The point we wish to make here is that while there are more apparently connected, closer and sustainable sites' in 2 dimension black and white terms these sites have been included in various development plans for 2 generations now and show no signs of development. Therefore the time now is for change and the LPA should concede that there is little viable delivery sites of much needed housing along Brecon Road in Builth Wells.

So to conclude, and to accord with Planning Policy Wales (PPW) Guidance in relation to the provision of realistically deliverable and we state the following:

by: Representation No

Filtered to show: (all of) Stage=V; Status=M

Rep'n/Para/Policy AccessNo DateLodgd Late? Status Modified Summary

1457.V1 20/07/2015  Summary: Builth Wells - Allocate Candidate Site 1148 for Housing

Source: Email Type: Objection Mode Oral (Examination) Status Maintained

The Revised Deposit Draft LDP includes parcels of land within Builth which are not deliverable. This is evidenced by the fact that these parcels of land have been included for some time within development plans. While these parcels of land are now being designated as 'white land' it is obvious they are being relied upon to form part of the buffer number of houses coming forward during the plan period if designated sites are not built out. This provides a distorted view of the housing and allocation for Builth Wells over the plan period. There is no clear evidence base for the inclusion of some of these parcels of land as to why they have been promoted despite comments to the contrary by some of the authors of the LDP. We therefore have challenged, and will continue to challenge, the inclusion of these parcels of land for their inclusion for quite arbitrary reasons.

The final issue that we raise is in terms of the data upon which the LPA has based its judgement. There is a clash between two fundamental documents upon which the Local Authority has based its numbers. These are the LHMA 2015 which states that Builth Wells and Llanwrtyd Wells have an affordable housing target of 20 dwellings per year. However according to the Powys County Council LDP and CIL Assessment of 2014 only 204 dwellings have been allowed for in total for Builth Wells and Liandrindod Wells. 20% of these shall be affordable which shall equate to approximately 40 dwellings in total. With this in mind we continue to have no confidence in the data upon which the Local Authority has based its projections as it is fundamentally incorrect.

With all of the above in mind we are of the opinion that the sites that have been both zoned for housing within the PCC LDP 2015 as well as the white sites be reconsidered in the light of this statement. The site for which we are currently responsible for representation is truly deliverable over the plan period and it has been suggested by the LPA in previous stages of the LDP that it is entirely viable. We make the point that there are no planning or other technical hurdles that need to be overcome in the delivery of this land for housing. The land parcel reference PCC LDP CSR 1148 provides for a logical extension to the settlement boundary of Builth and allows for more comprehensive development of land to come forward within the plan period. Therefore we formally request that CSR 1148 be included as a parcel of land suitable for the delivery of housing over the plan period for this settlement of Builth Wells.

ADDITIONAL EVIDENCE SUBMITTED:

- 1) Location Plan Showing Proposed Site Boundary

Council Response: 0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: The next stage of the Local Development Plan needs to be changed to accommodate land parcel PCC LDP CSR 1148 as per the initial deposit draft and attached drawing. This is a parcel of land that is truly deliverable over the plan period for housing. In addition land that has no prospect of being delivered over the plan period should not be included within said plan such as PCC UDP HA5 and HA7 which is now shown as white land in the Revised Deposit Draft. The inclusion of these parcels of land has not been promoted by neither the land owner nor any other body. The inclusion of this land distorts the opportunity of the settlement of Builth Wells to deliver housing up until 2026. Therefore we ask for these parcels of land to be removed.

Issue: 2015: Deposit Draft-11. Allocated Sites

Question Representation Texts

**Question: 3d. (i) Representation Details**

Representation Texts: For the last five years we have been working with Rural Housing Enablers and Registered Social Landlords (RSLs) in the Builth Wells area identifying sites suitable for housing. We have also represented many site owners in the Builth area in relation to the previous consultations for the Powys County Council Unitary Development Plan (PCC UDP 2010). As a practice we have also made our representations via the Powys County Council Strategic Housing Partnership as well as the Joint Housing Land Availability Study (JHLAS).

We have monitored the delivery of housing across the county of Powys over the last 15 years in doing so we have consistently challenged the Local Planning Authority (LPA) to allocate tracts of land which are realistically deliverable for housing within the relevant plan periods. We are the largest indigenous architectural practice in the county that has delivered mass housing as well as one off houses within Powys so are very well placed to make comments about deliverable land parcels within the county.

We forward on this representation for land parcel P08 HA3 as outlined in the PCC LDP Deposit Draft 2015. We take this opportunity to outline the veracity of the case for inclusion of this land, and an extension to this land to include all of the site PCC LDP CSR 579, in the context of the likelihood of other parcels of land in Builth Wells not being delivered over the plan period.

[See accompanying information]

With all of the above in mind we are of the opinion that the sites that have been both zoned for housing within the PCC LDP 2015 as well as the white sites' be reconsidered in the light of this statement. The site that we are promoting for including within the LDP is truly deliverable over the plan period and it has been recognised by the LPA in previous stages of the LDP that the whole of site 579 is entirely viable.

Question Representation Texts

Question: 3d. (i) Representation Details

Representation Texts: For the last five years we have been working with Rural Housing Enablers and Registered Social Landlords (RSLs) in the Builth Wells area identifying sites suitable for housing. We have also represented many site owners in the Builth area in relation to the previous consultations for the Powys County Council Unitary Development Plan (PCC UDP 2010). As a practice we have also made our representations via the Powys County Council Strategic Housing Partnership as well as the Joint Housing Land Availability Study (JHLAS).

We have monitored the delivery of housing across the county of Powys over the last 15 years in doing so we have consistently challenged the Local Planning Authority (LPA) to allocate tracts of land which are realistically deliverable for housing within the relevant plan periods, We are the largest indigenous architectural practice in the county that has delivered mass housing as well as one off houses within Powys so are very well placed to make comments about deliverable land parcels within the county.

We forward on this representation for land parcel P08 HA3 as outlined in the PCC LDP Deposit Draft 2015. We take this opportunity to outline the veracity of the case for inclusion of this land, and an extension to this land to include all of the site PCC LDP CSR 579, in the context of the likelihood of other parcels of land in Builth Wells not being delivered over the plan period.

[...]

With all of the above in mind we see the inclusion of the single enclosure immediately adjoining South East of P08 HA3 (PCC LDP 2015 reference) as not only meeting the identifiable needs for housing in Builth Wells as presented but also as a realistically deliverable site for housing in the town given the fact alternative sites in the town have for some 20 years never been built out. (D&E)

We have previously investigated the opportunity for bringing forward this site by virtue of a separate planning application and discussed access with PCC Highways. With this in mind we enclose a copy of our communications with PCC Highways Department and their response (GH). As you will see from the enclosed a viable access can be afforded into the application site PCC LDP P08 HA3, The site itself is a logical extension to the settlement of Builth Wells the whole site (PCC LDP CSR 579) has been given a green score by Powys County Council in its PCC LDP Consultation Draft as outlined below. Indeed the site has been supported all the way along and now just recently by Builth Wells Town Council. We enclose a copy of its letter of support with this representation (J)

[.....]

With all of the above in mind we are of the opinion that the sites that have been both zoned for housing within the PCC LDP 2015 as well as the white sites' be reconsidered in the light of this statement. The site that we are promoting for including within the LDP is truly deliverable over the plan period and it has been recognised by the LPA in previous stages of the LDP that the whole of site 579 is entirely viable.

**1552.V2** 20/07/2015  Summary: Builth Wells - Objecting to Candidate Site 579 not being Allocated.

Source: Email Type: Objection Mode Written Status Maintained

---

We make the point that there are no planning or other technical hurdles that need to be overcome in the delivery of this land for housing.

The extension of this land parcel provides for a logical extension to the settlement boundary of Builth and allows for more comprehensive development of land to come forward within the plan period. Therefore we formally request that the second part of land parcel P08 HA3 (CSR 579) (PCC LDP Initial Deposit Draft) be reinstated as a parcel of land suitable for the delivery of housing over the plan period for this settlement of Builth Wells.

Council Response: 0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: The next stage of the Local Development Plan needs to be changed to accommodate the extension to land parcel P08 HA3 as per the Initial Deposit Draft All of the site was scored green at candidate site stage and has not obstacles to development. This is a parcel of land that is truly deliverable over the plan period for housing In addition land that has no prospect of being delivered over the plan period should not be included within said plan such as the whi(e land defined in the PCC LOP 2015 but best described as PCC UDP HA5 and HA7. The inclusion of these parcels of land has not been promoted by neither the land owner nor any other body. The inclusion of this land distorts the opportunity of the settlement of Builth Wells to deliver housing up until 2026. Therefore we ask for these parcels of 'and to be removed.

Also land that is not deliverable and has been in the PCC 1997 and 2010 plans should be omitted such as P08 HA2.

Council Response: 0

**Question: 3e. (ii) Candidate Site No/Name**

Representation Texts: Representation seeks to have the whole of Candidate Site 579 Allocated.

Council Response: 0

**Question: 4b Reason For Request To Speak At Hearing And Subject**

Representation Texts: I wish to speak at the public examination as I am of the opinion that the deliverability of sites included in the LDP at this stage has not been tested sufficiently. It shall also allow all interested parties to debate the plan of Builth Wells in terms of residential land opportunities for the benefit of the town.

Council Response: 0

Question Representation Texts

**Question: 3d. (i) Representation Details**

Representation Texts: For the last five years we have been working with Rural Housing Enablers and Registered Social Landlords (RSLs) in the Builth Wells area identifying sites suitable for housing. We have also represented many site owners in the Builth area in relation to the previous consultations for the Powys County Council Unitary Development Plan (PCC UDP 2010). As a practice we have also made our representations via the Powys County Council Strategic Housing Partnership as well as the Joint Housing Land Availability Study (JHLAS).

We have monitored the delivery of housing across the county of Powys over the last 15 years in doing so we have consistently challenged the Local Planning Authority (LPA) to allocate tracts of land which are realistically deliverable for housing within the relevant plan periods, We are the largest indigenous architectural practice in the county that has delivered mass housing as well as one off houses within Powys so are very well placed to make comments about deliverable land parcels within the county.

[.....]

We are consistent in our challenge to the LPA in relation to the truly deliverable areas of land in Builth Wells. We remind the LPA of our resistance to the inclusion of land parcels B5 HA7 and B5 HA5 in the Initial Deposit Stage PCC LDP and at the Public Inquiry of the PCC UDP 2010. We were proven right in our challenge as these land parcels were never developed over the plan period of the PCC UDP ending later this year. We are therefore surprised that these land allocations have again come forward as 'white land' within the Revised Deposit Draft of the PCC LDP 2015, seemingly with the support of the LPA.

These sites have not been promoted by the land owner and despite our various invitations to come forward to develop these sites for housing with our RSL and private sector housing partners in the past 5 years there has been no communication on his part whatsoever. This is why we cannot see any point in including these parcels of 'white land' which he clearly has no intention of releasing for housing in the future.

In researching viable land opportunities for our RSL partners we went back to the Brecknockshire Local Plan of 1997. We were riot entirely surprised therefore to find the land parcels referred to above were also included in this historical plan. The main driver behind Local Development Plans is the promotion of parcels of land for the delivery of housing within sustainable settlements is truly deliverable. For example we refer you to site PCC LDP P08 HA2 depicted on the Brecknockshire Local Plan 1997 which has been included within the present draft of the LDP (referenced A overleaf) and has also appeared within the PCC UDP 2010. This is one of many sites in Builth that are not developed even though they have been in various Development Plans for some 20 years now.

In addition B5 HA5 from PCC UDP 2010 is marked on the Brecknockshire Local Plan 1997 (reference B & C overleaf) was also included within the development boundary of the settlement Indeed it has come forward again within the LDP. The point remains the same that despite historical land allocations these sites have not been delivered over a period of in excess of 20 years.

This is why we fail to see how their promotion within the PCC LDP 2015 is viable or realistic in terms of housing delivery for the county and more importantly for Builth Wells. The LPA needs no reminding that the allocation of such land parcels will mean that its delivery of housing according to its projections will be doomed to failure from the start. Indeed we made this point at a recent Agent's Forum in which we challenged the LPA to consider its delivery mechanism for 613 houses over the plan period given that it has consistently failed to do so since 1996. Through the inclusion of land which has a clear prospect of development only then will the LDP be sound. Without this the Development Plan for Powys will fail.

The Revised Deposit Draft LDP includes parcels of land within Bulith which are not deliverable. This is evidenced by the fact that these parcels of land have been included for some time within Development Plans. While these parcels of land are now being designated as 'white land' it is obvious they are being relied upon to form part of the buffer

number of houses coming forward during the plan period it designated sites are not built out. This provides a distorted view of the housing land allocation for Builth Wells over the plan period. There is no clear evidence base for the inclusion of some of these parcels of land as to why they have been promoted despite comments to the contrary by some of the authors of the LDP. We therefore have challenged, and will continue to challenge, the inclusion of these parcels of land for their inclusion for quite arbitrary reasons. This is why we believe PCC LDP P08 HA2 (A,C&D) should be omitted as it has not been delivered despite being included in development plans for 20 years.

[.....]

With all of the above in mind we are of the opinion that the sites that have been both zoned for housing within the PCC LDP 2015 as well as the white sites' be reconsidered in the light of this statement. The site that we are promoting for including within the LDP is truly deliverable over the plan period and it has been recognised by the LPA in previous stages of the LDP that the whole of site 579 is entirely viable.

Question Representation Texts

**Question: 3d. (i) Representation Details**

Representation Texts: Firstly, I start by briefly summarising the nature of my representation. Secondly, I make the representation in detail, divided into relevant sections (road traffic and safety, health, sustainable travel, climate change, sewage and flooding. At the beginning of each of these sections I list the many other policies/considerations found throughout the body of the LDP draft written statement, which are relevant to that section. Finally, at the end is a numbered list of references, linked to relevant points in my representation.

Representation summary  
 The allocation of P08 HA3 has not been made on a sound basis. Therefore it should be deleted. Due to proximity and identical impacts, this allocation should also be considered in combination with P08 HA2, which should therefore also be deleted. Both P08 HA2 and HA3 should also be considered in combination with P08 HA1, due to identical impacts. These allocations and the inevitable future construction of houses will have a number of negative and unsustainable impacts relating to: road safety; health of residents and road users; sustainable travel, climate change, sewage, water runoff and flooding. This is particularly disappointing consider the statement on page 17 of the LDP draft written statement (@ 34.5) regarding "Our Vision of Powys 2026... which sets out for... Sustainable development...set in a healthy, safe environment."

Increased traffic and road safety  
 Relevant considerations/policies from the LDP draft rwritten statement  
 p15  
 Infrastructure and Resource Considerations  
 36. In spite of rising fuel costs, car ownership is high reflecting the rural and dispersed population of the county and the high costs associated with public transport provision.

Representation text  
 As reported in "The Planner" (15/6/151), the Campaign for Better Transport has highlighted the probability that any new housing development will cause increased traffic congestion. The building of 40 homes at P08 HA3 would, in itself result in an unacceptable increase in volume of traffic, particularly at peak times. Furthermore this impact can not be considered in isolation: the cumulative effect of allocations of P08 HA1, P08 HA2 and P08 HA3, for 113 units will likely generate a much larger volume of traffic, on a minor road, in close proximity to Builth Wells Primary School. Furthermore the cummulative impact of the above 3 allocations, will compound existing traffic problems and will all have an unsustainable impact on health and safety of residents and road users in this area.

Firstly there is insufficient employment within Builth Wells to absorb even a minority of working age adults from the potential extra 113 households. There will be insufficient employment within

walking/cycling distance of the above 3 allocations, necessitating vehicular commuting. Secondly, current public transport provision will only cater for a small minority of working age adults from the potential 113 households. In particular, the current bus timetable will not accommodate the timely commuting needs of those needing to travel to work in the nearest main employment hubs of Brecon, Llandrindod/Newtown. In households with children, even if one parent of a household were able to catch a sufficiently early bus to commute, the remainder of parents, including all single parents could not drop their children at school and still catch an early enough bus to commute to work. Commuting would therefore generate an additional 113-2162 car movements, at least 4 times daily, equating to an additional 452-864 vehicle movements through the area daily. Even if children living in the 3 proposed allocations are walking or cycling to school, it is highly likely that 1 or both parents will be obliged to exit the area by car to commute to work. If households include 1 or 2 working age adults, their greater flexibility may be able to access public transport for a timely commute. However, it is likely that within 3-5 years the occupancy of 2-bed properties increases from 1-2 to 3-4, as young couples start families. Therefore the above constraint will apply and convert short term public transport use into longer-term car use, generating a further 2-4 vehicle journeys daily. Therefore it is reasonable to assume that this increased level of traffic due to housing in the above locations will have a negative and unsustainable impact on the safety and health of pedestrians, particularly on children and their parents walking/cycling to Builth Wells Primary School. It will also similarly increase the danger to all pedestrians in the area, including: children walking/cycling to Builth Wells High School, pre-school children and parents walking to their cars to commute to playgroups and thence to work, as well as adults walking to work in Builth.

Increased traffic and sustainable travel options  
 Relevant considerations/policies from the LDP draft written statement  
 4.2.41 All proposals that the Council considers would generate significant traffic will require a Transport Assessment and or a Travel Plan. This process seeks to assess the transport implications of new developments, to reduce the reliance on travel by private cars and to promote sustainable modes of transport. The need for and scope for an Assessment or Travel Plan should be agreed with the Council as early as possible in the planning process.

Representation text  
 Following the above comments, in the Powys Options Appraisal document P08 HA3 579, some comments and assessments are therefore erroneous. In P08 HA3 579, key question access (2) assesses the likelihood of the allocation encouraging a switch to more sustainable travel as "very positive," with the inexplicably cursory comment/recommendation that "Yes – it is in a town". My comments above (together with my reference to The Planner article 1) demonstrate that the allocation and related traffic would act as a deterrent to sustainable forms of travel such as walking/cycling. Moreover, the realities of public transport timetables negate any positive spin that the allocation, being located in a town, automatically encourages more sustainable (public) transport.

Increased traffic and road safety

All proposals for development must not compromise, or unacceptably adversely affect, either on their own or in combination with existing or approved development, the following:

1. ....unacceptable detrimental pressure on existing community facilities, public service provision or infrastructure.  
p30
7. Important material assets and their operation including:
  - i. Strategic infrastructure including:
    - a. Transport routes, strategic or town centre car parks and safeguarded corridors.  
Policy DM2 – Detailed and Site Specific Planning Matters ® 34.28  
p37
8. Proposals must meet highway access requirements and vehicular parking standards. Proposals must incorporate the access needs of all transport users, especially pedestrians and cyclists and those with disabilities or mobility impairment.
9. Proposals considered to generate significant amounts of travel or traffic will only be considered where they include a satisfactory Transport Assessment and/or a Travel Plan.

4.2.40 Transport. Highway access and parking requirements are important considerations for most developments, especially the implications they have for highway safety, the environment, local communities and the economy.

Representation text

Similarly in P08 HA3 579, there are erroneous comments and conclusions for another key question, access (1), which asks “can the highway network serving the site adequately accommodate the associated traffic implications?” My comments below demonstrate that the highway network is already unsuited to traffic volumes and therefore the allocation and related traffic would exacerbate these problems

It should be noted that all these impacts have also not been properly considered within Powys Options Appraisal P08 HA2 200 as well as P08 HA1 1181. Similarly, assessments and conclusions relating to key questions access (1 and 2) here are similarly erroneous.

The increased volume of traffic will further increase the existing dangers, particularly at specific “pinch point” locations in the vicinity: where roads/paths are narrow, bends reduce visibility of pedestrians and drivers, as well as restricting vehicle manoeuvrability and traffic flows. Such “pinch points” include Irfon Bridge Road (both outside my own house, 12, as well as at the junction with Hospital Road). They also include Hospital Road (both outside the Primary School itself and at the junction with A483/Garth Road, adjacent to the police station/Greyhound pub)

I have previously formally registered such dangers with Powys County Council Highways, the Police and Builth Wells Primary School, when in 2011 a vehicle mounted the pavement (to avoid oncoming traffic) outside my house almost knocking over my daughter. There have been other occasions: I have complained to a local courier company when a van similarly mounted the pavement endangering myself and daughters, enroute for school.

Whilst it would be hoped that all drivers drive safely and with speed limits, in reality this is not always the case, particularly at times of stress when there is pressure to get children to school and get to work on time. Moreover, it is not only the volume of traffic which causes dangers, but the

Mode Written

Status Maintained

nature of the roads and the vehicles: a combination of large school buses/coaches, agricultural traffic and cars do not mix well on the narrow roads at the best of times, let alone in the "rush hour."

Another important "pinch point" is the junction of Hospital Road with A483/Garth Road. The mixture of road layout, poor manoeuvrability of large school coaches and volume of other traffic already causes regular significant congestion at this junction. Traffic wishing to exit Hospital Road, either left or right into Garth Road is unable to do so causing traffic to back up in Hospital Road, sometimes all the way back uphill to the Primary School. This causes dangers to pedestrians at a number of locations. Firstly it complicates the safe operation of the zebra crossing on Garth Road, adjacent to this junction, even though manned by a crossing patrol. Secondly, when this traffic exiting Hospital Road backs up, this congestion along with parked cars narrows the other side/carraigeway of Hospital Road going from the junction, uphill to the primary school. Vehicles moving in this direction are obliged to travel closer to the kerbside increasing the danger to children and parents walking uphill to the primary school. This is particularly pertinent as at this point the roadside footpath on this side is very narrow, further increasing the risk of moving vehicles clipping pedestrians. Thirdly, an alternative is for pedestrians to access the wider pavement/footpath on the other side of Hospital Road but this would require them to cross Hospital Road closer to its junction with Garth Road, in the midst of the traffic congestion/backup, with the concomitant risks involved here. It would also require children and parents to cross back over Hospital Road to access the Primary School, adding another risk to their journey.

Similarly, there is a narrow pavement around the corner at the junction of Irfon Bridge Road with Hospital Road. Vehicles travelling out of Irfon Bridge Road, approaching this junction are often faced with vehicles turning right out of Hospital Road, into Irfon Bridge Road. Often these latter vehicles cut the corner off of the carraigway as they enter Irfon Bridge Road. Larger coaches cannot avoid doing this. This obliges vehicles turning left out of Irfon Bridge Road into Hospital Road to hug the kerb, where the pavement is narrow. An access road to allocation P08 HA3 would need to be located more or less opposite this junction, which would further add to the complexity of driver observations, manoeuvring and increase danger to pedestrians.

Increased traffic and health

Relevant considerations/policies from the LDP draft written statement

4.2.44 Amenity. Development must respect the existence and amenities of neighbouring uses including approved development. These amenities include overlooking, light (natural and manmade), noise (including that which arises from hours of operation), air quality (odour, fumes and dust), and pests (vermin and birds attracted by litter). Key determinants of impact are scale of development, proximity, proposed land use and the massing of buildings on site.

Policy DM2 – Detailed and Site Specific Planning Matters © 34.28

Type: Objection

Mode Written

Status Maintained

In addition to negative impacts on road safety, the additional 452-864 vehicle movements through the area daily resulting from allocation P08 HA3 (and nearby allocations P08 HA1 and P08 HA2) will also have a more significant negative impacts on health of residents and road users. Road pollution is more than twice as deadly as traffic accidents, according to a study of UK air quality<sup>4</sup>. Although the popular perception of air pollution involves images of smoke stacks billowing out toxic black fumes into the atmosphere, industry and the power sector turn out to kill fewer than vehicle emissions, the data shows. "Cars and lorries emit right by where people live and work and so have a greater impact,"<sup>4</sup>. There is rightly pressure on the UK to drastically improve air quality, which has recently culminating in the Client Earth and EU prosecutions of UK government for failing to adhere to EU air quality standards set 13 years ago. Huge fines are threatened if air quality is not improved.

As the above mentioned study, as well as the UK government's Committee on the Medical Effects of Air Pollutants, the Environmental Audit Committee, and many others have demonstrated vehicle-related emissions contributes to development and worsening of a range of health problems. These include respiratory diseases such as asthma, chronic obstructive pulmonary disease, respiratory tract infections. There is also evidence of developmental disorders, correlating significantly smaller lungs in children experiencing this kind of poor air quality, as well as links to increased risks of cancer and heart attack. Having a daughter with asthma, I am very aware, on a daily basis of the impact of traffic pollution.

The growth in use of diesel engines in the UK is well documented. In rural areas, such as Powys, diesel vehicles are even more common. This means that harmful emissions, such as nitrous oxides (alone and in conversion into ozone), small particulates, volatile organic compounds are also more common.

Increased traffic and Climate Change

Relevant considerations/policies from the LDP draft written statement

18. The LDP must protect air, water and land resources and quality, prevent pollution and inappropriate development and deal with the consequences of climate change.

Representation text

In addition to the above mentioned emissions being harmful to human health, carbon dioxide emissions are commonly acknowledged as having a significant impact on climate change. An increase in traffic resulting from this allocation will result in a significant additional negative impact on climate change. Without significantly better provision for public transport, the above allocations and their ensuing additional 452-864 vehicle movements mentioned above, would generate at minimum an additional 8,261-15,791 kg CO<sub>2</sub>/pa just within the Builth Wells area.<sup>5</sup> Being a rural county, transport emissions constitute a more significant proportion of total CO<sub>2</sub> emissions than other Welsh regions. There is an urgent need for Powys to reduce CO<sub>2</sub> emissions: between 2005-2010 made the highest increase (21.58%) in CO<sub>2</sub> emissions of all Welsh regions.

On average, for

the same period, across Wales CO<sub>2</sub> emissions decreased by 3.29%.<sup>6</sup>

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: It would be more sensible to locate more housing allocations closer to good access to major roads which are served as well as Builth by public transport. For example, some large villages (such as Boughrood, Llyswen, Howey) and small villages (Erwood, Cilmerly, Builth Road) all have very close proximity to major trunk roads, most with excellent bus services and some with additional public transport options (Heart of Wales line, which has recently introduced new services specifically to cater for commuting to/from work. These are all as well served by public transport and better served by road access than Builth Wells. Allocations here would avoid the traffic congestion of inaccessible town edge locations like P08 HA03 in Builth Wells. Furthermore, increasing the population of such villages to a safe critical mass of customers using local services, will help secure/safeguarding such services as post office, shops, bus stops, etc.

Mode Written

Status Maintained

which are relevant to that section. Finally, at the end is a numbered list of references, linked to relevant points in my representation.

Representation summary

The allocation of P08 HA3 has not been made on a sound basis. Therefore it should be deleted. Due to proximity and identical impacts, this allocation should also be considered in combination with P08 HA2, which should therefore also be deleted. Both P08 HA2 and HA3 should also be considered in combination with P08 HA1, due to identical impacts. These allocations and the inevitable future construction of houses will have a number of negative and unsustainable impacts relating to: road safety; health of residents and road users; sustainable travel, climate change, sewage, water runoff and flooding. This is particularly disappointing consider the statement on page 17 of the LDP draft written statement (@ 34.5) regarding "Our Vision of Powys 2026... which sets out for... Sustainable development...set in a healthy, safe environment."

Increased traffic and road safety

Relevant considerations/policies from the LDP draft written statement p15

Infrastructure and Resource Considerations

36. In spite of rising fuel costs, car ownership is high reflecting the rural and dispersed population of the county and the high costs associated with public transport provision.

Representation text

As reported in "The Planner" (15/6/151), the Campaign for Better Transport has highlighted the probability that any new housing development will cause increased traffic congestion.

The building of 40 homes at P08 HA3 would, in itself result in an unacceptable increase in volume of traffic, particularly at peak times. Furthermore this impact can not be considered in isolation: the cumulative effect of allocations of P08 HA1, P08 HA2 and P08 HA3, for 113 units will likely generate a much larger volume of traffic, on a minor road, in close proximity to Builth Wells Primary School. Furthermore the cumulative impact of the above 3 allocations, will compound existing traffic problems and will all have an unsustainable impact on health and safety of residents and road users in this area.

Firstly there is insufficient employment within Builth Wells to absorb even a minority of working age adults from the potential extra 113 households. There will be insufficient employment within walking/cycling distance of the above 3 allocations, necessitating vehicular commuting.

Secondly, current public transport provision will only cater for a small minority of working age adults from the potential 113 households. In particular, the current bus timetable will not accommodate the timely commuting needs of those needing to travel to work in the nearest main employment hubs of Brecon, Llandrindod/Newtown. In households with children, even if one parent of a household were able to catch a sufficiently early bus to commute, the remainder of parents, including all single parents could not drop their children at school and still catch an early enough bus to commute to work. Commuting would therefore generate an additional 113-2162 car movements, at least 4 times daily, equating to an additional 452-864 vehicle movements through the area daily. Even if children living in the 3 proposed allocations are walking or cycling to school, it is highly likely that 1 or both parents will be obliged to exit the area by car to commute to work. If households include 1 or 2 working age adults, their greater flexibility may be able access to public transport for a timely commute. However, it is likely that within 3-5 years the occupancy of 2-bed

Mode Written

Status Maintained

properties increases from 1-2 to 3-4, as young couples start families. Therefore the above constraint will apply and convert short term public transport use into longer-term car use, generating a further 2-4 vehicle journeys daily. Therefore it is reasonable to assume that this increased level of

traffic due to housing in the above locations will have a negative and unsustainable impact on the safety and health of pedestrians, particularly on children and their parents walking/cycling to Builth Wells Primary School. It will also similarly increase the danger to all pedestrians in the area, including: children walking/cycling to Builth Wells High School, pre-school children and parents walking to their cars to commute to playgroups and thence to work, as well as adults walking to work in Builth.

Increased traffic and sustainable travel options

Relevant considerations/policies from the LDP draft written statement

4.2.41 All proposals that the Council considers would generate significant traffic will require a Transport Assessment and or a Travel Plan. This process seeks to assess the transport implications of new developments, to reduce the reliance on travel by private cars and to promote sustainable modes of transport. The need for and scope for an Assessment or Travel Plan should be agreed with the Council as early as possible in the planning process.

Representation text

Following the above comments, in the Powys Options Appraisal document P08 HA3 579, some comments and assessments are therefore erroneous. In P08 HA3 579, key question access (2) assesses the likelihood of the allocation encouraging a switch to more sustainable travel as "very positive," with the inexplicably cursory comment/recommendation that "Yes – it is in a town". My comments above (together with my reference to The Planner article<sup>1</sup>) demonstrate that the allocation and related traffic would act as a deterrent to sustainable forms of travel such as walking/cycling. Moreover, the realities of public transport timetables negate any positive spin that the allocation, being located in a town, automatically encourages more sustainable (public) transport.

Increased traffic and road safety

Relevant considerations/policies from the LDP draft written statement

Policy DM1 - Strategic Planning Matters @ 34.26

p29

All proposals for development must not compromise, or unacceptably adversely affect, either on their own or in combination with existing or approved development, the following:

1. ....unacceptable detrimental pressure on existing community facilities, public service provision or infrastructure.

p30

7. Important material assets and their operation including:

i. Strategic infrastructure including:

a. Transport routes, strategic or town centre car parks and safeguarded corridors.

Policy DM2 – Detailed and Site Specific Planning Matters @ 34.28

p37

8. Proposals must meet highway access requirements and vehicular parking standards. Proposals must incorporate the access needs of all transport users, especially pedestrians and cyclists and those with disabilities or mobility impairment.

Type: Objection

Mode Written

Status Maintained

9. Proposals considered to generate significant amounts of travel or traffic will only be considered where they include a satisfactory Transport Assessment and/or a Travel Plan.  
 4.2.40 Transport. Highway access and parking requirements are important considerations for most developments, especially the implications they have for highway safety, the environment, local communities and the economy.

Representation text

Similarly in P08 HA3 579, there are erroneous comments and conclusions for another key question, access (1), which asks "can the highway network serving the site adequately accommodate the associated traffic implications?" My comments below demonstrate that the highway network is already unsuited to traffic volumes and therefore the allocation and related traffic would exacerbate these problems  
 It should be noted that all these impacts have also not been properly considered within Powys Options Appraisal P08 HA2 200 as well as P08 HA1 1181. Similarly, assessments and conclusions relating to key questions access (1 and 2) here are similarly erroneous.  
 The increased volume of traffic will further increase the existing dangers, particularly at specific "pinch point" locations in the vicinity: where roads/paths are narrow, bends reduce visibility of pedestrians and drivers, as well as restricting vehicle manoeuvrability and traffic flows. Such "pinch points" include Lrfon Bridge Road (both outside my own house, 12, as well as at the junction with Hospital Road). They also include Hospital Road (both outside the Primary School itself and at the junction with A483/Garth Road, adjacent to the police station/Greyhound pub)  
 I have previously formally registered such dangers with Powys County Council Highways, the Police and Builth Wells Primary School, when in 2011 a vehicle mounted the pavement (to avoid oncoming traffic) outside my house almost knocking over my daughter. There have been other occasions: I have complained to a local courier company when a van similarly mounted the pavement endangering myself and daughters, enroute for school.  
 Whilst it would be hoped that all drivers drive safely and with speed limits, in reality this is not always the case, particularly at times of stress when there is pressure to get children to school and get to work on time. Moreover, it is not only the volume of traffic which causes dangers, but the nature of the roads and the vehicles: a combination of large school buses/coaches, agricultural traffic and cars do not mix well on the narrow roads at the best of times, let alone in the "rush hour."  
 Another important "pinch point" is the junction of Hospital Road with A483/Garth Road. The mixture of road layout, poor manoeuvrability of large school coaches and volume of other traffic already causes regular significant congestion at this junction. Traffic wishing to exit Hospital Road, either left or right into Garth Road is unable to do so causing traffic to back up in Hospital Road, sometimes all the way back uphill to the Primary School. This causes dangers to pedestrians at a number of locations. Firstly it complicates the safe operation of the zebra crossing on Garth Road, adjacent to this junction, even though manned by a crossing patrol. Secondly, when this traffic exiting Hospital Road backs up, this congestion along with parked cars narrows the other side/carraigeway of Hospital Road going from the junction, uphill to the primary school. Vehicles moving in this direction are obliged to travel closer to the kerbside increasing the danger to children

0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: It would be more sensible to locate more housing allocations closer to good access to major roads which are served as well as Builth by public transport. For example, some large villages (such as Boughrood, Llyswen, Howey) and small villages (Erwood, Cilmerly, Builth Road) all have very close proximity to major trunk roads, most with excellent bus services and some with additional public transport options (Heart of Wales line, which has recently nroduced new sevicees specifically to cater for commuting to/from work. These are all as well served by public transport and better served by road access than Builth Wells. Allocations here would avoid the traffic congestion of inaccessible town edge locations like P08 HA03 in Builth Wells. Furthermore, increasing the population of such villages to a safe critical mass of customers using

*Question Representation Texts*

**Question: 3d. (i) Representation Details**

Representation Texts: Policy H1 is supported with regard to the identification of land Adjacent to Tai Ar Y Bryn, Builth Wells and its inclusion in the site schedule in Appendix 1.(P08 HA3)

We note that the policy also seeks to maintain a 5 year housing land supply. For reasons explained in the accompanying Submission Document we confirm that the release of the land for housing will contribute to achieving a 5 year land supply on adoption of the LDP as required by the new TAN 1.

Separate forms and a submission document refer to objections to the omission of land to the east which forms the remainder of Candidate Site 579.

*Question Representation Texts*

**Question: 3d. (i) Representation Details**

Representation Texts: We suggest that the single enclosure immediately adjoining and southeast of P08 HA3 be included within the development plan. This is because P08 HA3 has a clear prospect of being developed within the plan period and the additional land immediately adjoining and southeast would be a logical extension of the P08 HA3.

The whole site was given a 'green score' by Powys County Council and Builth Council assessments (site no: 579). The following plan shows the subject site labelled at 579':

map: Showing 'Draft Local Development Plan'.

The following is an extract of the Candidate site Register showing the full extent of the site:

Map: Showing Extract of Candidate Site Register

...

In summary, if sites are being included within the plan that in all probability will not be developed, and sites than can be developed are not included then the p/an can only be considered unsound. Therefore, we ask that the second part of P08 HA3 (579) be put back in as replacement of or addition to P08 HA2.

Council Response:

0

---

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: The draft Local Development Plan should be amended to include land that is clearly deliverable.

Land that has no prospect of being developed should not be included within the plan such as HA2 This is because such land will not aid the required housing projections nor fill the defined policies of the Local Development Plan. Therefore. the second part of P08 HA3 should be put back in the plan as it was assessed as being suitable.

Land should have a clear allocation and been though the correct assessment method before it is included within the development plan.

Council Response:

0

---

**Question: 3e. (ii) Allocation No:**

Representation Texts: P08 HA3 - should include whole of Candidate Site 579

*Question Representation Texts*

**Question: 3d. (i) Representation Details**

Representation Texts: ....

Furthermore, it is noted that there are a number of parcels of 'white land' included within the development boundary of Builth Wells. This land does not appear to have any clear allocation, has not been promoted by the landowner, nor assessed by Powys County Council. By including such land parcels within the plan, no clear evidence base has been provided as to the need for this land to be included or how it seeks to meet defined need. Also some of this land was not even in the UDP and has now been put in the LDP without promotion (See 'E' below).

Therefore, it is questioned how the inclusion of this land within the development boundary can be justified when no such assessment has been evidenced.

Question Representation Texts

**Question: 3d. (i) Representation Details**

Representation Texts: Builth Wells has had several sites in the development zone for almost twenty years, and not delivered. Several sites have been in the 1997 plan and not delivered and then in the 2010 plan and not delivered.

Site P08 HA2 has not been delivered in both plans and should be replaced with the second part of P08 HA3, or the second part of HA3 added in addition.

Both parts of P08 HA3 are deliverable and have been supported. P08 HA3 has been promoted by the land owner and is deliverable.

P08 HA3 was given a green score by Powys own assessment and also supported by Builth Wells Town council last year.

Also Builth Wells should be allocated more houses as most current sites are not deliverable and Builth Wells needs more housing to remain a sustainable settlement.

Council Response: 0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: P08 HA2 is not deliverable so should be replaced by the second part of P08 HA3 that was put forward in the candidate sites register and given a green score by the Powys LDP assessment - site 579.

Or the second part of P08 HA3 should be put in additionally as it is deliverable.

Also Builth Wells was allocated 203 housing numbers in the 2010 plan, and only 131 in the draft LDP.

Therefore Builth Wells should be allocated more numbers and P08 HA3 could provide these numbers as it is deliverable, therefore the second half of P08 HA3 should be allocated for housing.

Council Response: 0

**Question: 3e. (ii) Allocation No:**

Question Representation Texts

**Question: 3d. (i) Representation Details**

Representation Texts: Having read through the LDP, it is noted that there are areas of redevelopment within the SW area of Bulith Wells, (P08 HA2 and P08 HA3). Although it is acknowledged that there will be a requirement to increase development, paragraph 19 indicates that there is a sway toward an aging population and this would indicate more requirement for smaller dwellings with easy access to local amenities. This site will require vehicular access should it be targeted towards the ageing population.

The proposed siting of these developments are ill considered for a variety of reasons which we have highlighted below. Builth Wells is a very rural Town which does not appear to have great economic growth and the amenities in place struggle to support the current population level.

I have concerns that the 2 proposed development sites are not situated in the best geographic locations to provide the volume of dwellings expected. Both sites are located on upper slopes of hospital hill which already have single lane traffic access on both major access routes. These routes already provide the access to the local primary school and an increase in traffic from a further 96 dwellings would place significant strain on the traffic system and increase the potential safety risks. Vehicles already have to park on the roads surrounding the school to drop off and pick up primary school children as the school car park is unable to accommodate the current traffic requirements. We are also aware locally that a third location adjacent to the two highlighted in the plan, has been applied for. This would further impact all the concerns raised.

Throughout any build phase, due to the nature of the proposed site there Will be prolonged visual and noise impact along with potential highway congestion transferring directly to our property and those around us. Due to the water run-off and transfer of mud to off site from construction vehicles, this will create further danger at the junction of Hospital Road and Irfon Bride Road which is the breaking area at the bottom of the hill.

In addition, with the locations both being on the upper relief of the area, environmental absorption would be significantly reduced. This may create significant water run-off into several premises backing onto the proposed development including ours at 2 The Brambles and towards Irfon Bridge Road and Close. The current drainage infrastructure already overflows following heavy rain and we are aware following work to improve the sewerage systems from Tai-ar-a-Bryn that the current facility would not support further development. This area has experienced periods of snow and ice, this creates further disruption and danger to residents and road users primarily due to the steepness of Hospital Road, which would be amplified by arty increase in vehicle numbers.

Situated at the bottom of the proposed development, many of these houses would be raised above current dwellings and overlook them significantly intruding on privacy. This will greatly impede on the outlook from the rear of our property which was the main attraction to moving here in the first place. We also have concerns that any further development in this area wilt significantly reduce the value of existing properties and make them even harder to sell.

We wish to strongly object to the development of houses in this proposed sites.The proposed siting of these developments are ill considered

Question Representation Texts

**Question: 3d. (i) Representation Details**

Representation Texts:

Existing and new developments off Hospital Road  
There are already a number of existing Housing Developments off Hospital Road which is an unclassified Highway. The number of dwellings are in excess of 200. In addition work is currently underway to develop the former Builth Wells Cottage Hospital site with an additional 17 properties.

The Primary School for Builth Wells and surrounding area is also located on Hospital Road. This currently caters for over 300 children with significant parking problems along hospital road for dropoff and pick-up times. The road is congested with parents parking along the pavements and in front of the traffic calming measures.

We feel very strongly that further development would adversely affect road safety and traffic flow along this unclassified road. This is a very popular walking route to school and there are currently no pedestrian crossing facilities for parents and children attending the school.

Road system sustainability and infrastructure

We feel very concerned about the impact of the development on vehicular activity along Hospital road. The development between P08HA3 and P08HA2 would significantly increase the number of cars using Hospital Road. Within a short distance there are currently 9 access points to housing estates as well as 2 access points to the primary school. In addition there is also a considerable amount of heavy goods vehicles using this road including a bus route, farming and agricultural vehicles.

We have lived on Hospital Road for the past 14 years and have experienced continuing growth in the volume of traffic. Many people from outside the town access Hospital Road via Irfon Bridge Road to avoid the main town route via West Street as this is always congested with vehicles parked along both sides of the road.

We feel that a comprehensive Transport Assessment of Hospital Road must be undertaken prior to any further allocations of land for development are approved by Powys LA.

Public Transport

Public Transport in Powys is already very limited. Current austerity measures requires the LA to continue to make ongoing spending cuts and this will impact on public transport services. We feel that this will increase private vehicle ownership and will inevitably increase the volume of traffic along Hospital Road.

Topography

We feel that the site at P08HA3 is most unsuitable for Housing Development as it is on an extremely steep slope. This presents a question as to whether suitable visibility splays are achievable. We also question suitability of the proposed development site for disabled people and our ageing population.

Future Primary School Developments

We feel that the proposed developments of P08HA2 and P08HA3 would result in a substantial increase in the demand for places at Builth Wells Primary School which is already over-subscribed. We feel that the planned developments fail to recognise this and that the plans must be reviewed to reflect adequate planning for school development. Further consideration must be given to land required for school expansion including space for play and recreation and adequate safe parking.

Several years ago Welsh water reported that the sewage system for Builth Wells was working to full capacity — This presents the question what will be the impact of the proposed developments?

Employment and Recreational Opportunities

There are very limited employment opportunities currently in the area and this development does not offer and opportunity for employment. There are also limited sport and recreational opportunities in the area which are also subject to austerity measures.

Health and local Care Services

Healthcare services including primary care and dentistry are already oversubscribed. Recruitment and retention to the area is difficult. How have the plans been considered in terms of future Health and Wellbeing Services?

Alternative Development Sites

The UDP includes sites B5 HA7 and B5 HA5 off Brecon Road which is a B classified road and we feel that this site offers a more suitable location for future Housing both in terms of access via a B class road and prevention of unnecessary additional traffic flow congestion to the town via Hospital Road.

Question: 3d. (ii) Desired changes to Document

Representation Texts:

Existing and new developments off Hospital Road

There are already a number of existing Housing Developments off Hospital Road which is an unclassified Highway. The number of dwellings are in excess of 200. In addition work is currently underway to develop the former Builth Wells Cottage Hospital site with an additional 17 properties.

The Primary School for Builth Wells and surrounding area is also located on Hospital Road. This currently caters for over 300 children with significant parking problems along hospital road for dropoff and pick-up times. The road is congested with parents parking along the pavements and in front of the traffic calming measures.

We feel very strongly that further development would adversely affect road safety and traffic flow along this unclassified road. This is a very popular walking route to school and there are currently no pedestrian crossing facilities for parents and children attending the school.

Road system sustainability and infrastructure

We feel very concerned about the impact of the development on vehicular activity along Hospital road. The development between P08HA3 and P08HA2 would significantly increase the number of cars using Hospital Road. Within a short distance there are currently 9 access points to housing estates as well as 2 access points to the primary school. In addition there is also a considerable amount of heavy goods vehicles using this road including a bus route, farming and agricultural vehicles.

We have lived on Hospital Road for the past 14 years and have experienced continuing growth in the volume of traffic. Many people from outside the town access Hospital Road via Irfon Bridge Road to avoid the main town route via West Street as this is always congested with vehicles parked along both sides of the road.

We feel that a comprehensive Transport Assessment of Hospital Road must be undertaken prior to any further allocations of land for development are approved by Powys LA.

Public Transport

Public Transport in Powys is already very limited. Current austerity measures requires the LA to continue to make ongoing spending cuts and this will impact on public transport services. We feel that this will increase private vehicle ownership and will inevitably increase the volume of traffic along Hospital Road.

Question Representation Texts

**Question: 3d. (i) Representation Details**

Representation Texts: PROPOSED DEVELOPMENT: POWYS LDP 2011-2016  
DEPOSIT DRAFT June 2015

We are the owners of a smallholding which is adjacent to P08 HA3 of the LDP 2011-2016. We wish to register our objections to the proposed inclusion of this site in the LDP.

We wish to view our objections to this proposal for the following reasons:

**SURFACE WATER DRAINAGE**

As our fields drain onto this proposed site at the moment the majority of water naturally drains onto this ground. However, during prolonged days of rainfall, the water can visibly be seen flooding onto existing road. We feel that if this site is developed to become mostly hard surface, how will the current surface-water system cope with the increased demands, when it is unable to cope with existing demands?

**ROAD INFRASTRUCTURE**

The proposal of more than 40 dwellings on this site will cause increased demands on the current road. One can presume that this number of houses will increase the number of vehicles considerably onto an already overcrowded road at peak times. As Hospital Road is the site of the town's Primary School at drop off and pick up times the road is already unable to cope with the vehicles of the school's 300 parents that attend the school. During these peak times, pedestrians are already put at risk due to the narrow pavement that leads up from the Greyhound junction up Hospital Road towards the school, with parents unable to manoeuvre a pushchair/pram while also holding the hand of a child due to the extremely narrow pavement. This is an accident waiting to happen with the road used by buses, tractors, lorries, etc on a narrow road.

The school's car-park is unable to cope with current demands therefore parents are forced to park alongside the road outside the school making visibility even more challenging. How would this over used stretch of road cope with the increased demands whilst not jeopardising the safety of pedestrians and road users?

**ROAD SYSTEM**

Visibility along some stretches of the road is already restricted. This is an unclassified road that was never designed to cope with this volume of transport. During peak times, with the present volume of traffic, there is a bottle-neck towards the bottom end of Hospital Road towards the junction onto Garth Road. Visibility is also extremely poor when approaching this junction from Hospital Road towards Garth Road.

If attempting to drive in the other direction towards Irfon Bridge Road, visibility along this stretch is exceptionally poor with the current one-way traffic system and the dangerous bend in the road. It is evident that the road system is unable to cope with current demands and a Transport Assessment should be undertaken prior to further allocations of land for housing by Powys County Council.

Question Representation Texts

**Question: 3d. (i) Representation Details**

Representation Texts: PROPOSED DEVELOPMENT: POWYS LDP 2011-2016  
DEPOSIT DRAFT JUNE 2015

We, the residents, of Irfon Bridge Close, Builth Wells wish to register our very strong objections to the proposed development of allocation number P08 HA3 of the above LDP. We lodge this objection and gratefully request that it takes into account the following points as shown in the table beneath:

Existing Hospital Road Developments

To date, 5 Housing Developments exist off Hospital Road which is an unclassified highway. These developments are as follows:

- Daffodil Wood 45
- Tai ar y Bryn 35
- Cae Castell 33
- Tyle Heulog 24
- Oakwood Close plus 12
- Former Hospital Site 17
- Private dwellings 36
- Total 202

Also Builth Wells Primary School accommodating 320 children with restricted car parking space is accessed off Hospital Road.

We feel that any further development will jeopardise highway safety and traffic flow along this unclassified road, particularly as it is a popular pedestrian route to Builth County Primary School. There is currently no safe crossing solution for children to access the school along Hospital Road and we feel that any additional traffic movements will be detrimental to safety.

Road System Sustainability/ Infrastructure

We feel that Hospital Road cannot cope with a possible daily 596 cars (that is allowing for 2 cars per household) which represents the existing 202 houses plus the proposed 96 (from proposed sites P08 HA3 and P08 HA2) all within a 750 metre stretch of unclassified road (between Nant yr Arian bridge and the junction at the Greyhound Hotel). There are currently 9 housing estates and two school access points along this stretch of road.

This figure does not include "school run" traffic which accounts for about 200 vehicles daily in addition to school buses and other traffic serving the local rural community.

Note: The Greyhound junction is the A483 through road, and it already poses a dangerous road layout and zebra-crossing for the school children and Lollipop Lady alike.

Status Maintained

---

We feel that a comprehensive Transport Assessment of Hospital Road should be undertaken prior to any further allocations of land for housing are approved by the Local Authority.

HGVs

Apart from light vehicles, cars and local cycling enthusiasts, the infrastructure supports heavy vehicles including school buses, forestry, petroleum, farming and agricultural contractors.

Again, we feel that any further development will jeopardise highway safety and traffic flow along this unclassified road.

Public Transport

With the County Council having to make considerable spending cuts, public transport will be further reduced.

We anticipate that this may cause an increase in private car ownership and an increase in the volume of traffic along Hospital Road.

Topography

The topography of site P08 HA3 (proposed 46 dwellings) is far from suitable for a development site with its 1.8 (approx) cross-fall, and reduced visibility splays to Nant yr Arian Bridge.

We feel that allocation site P08 HA3 is unsuitable for development due to its topography and there is a question as to whether suitable access arrangements and visibility splays can be achieved between the access of the proposed site and Nant Yr Arian Bridge. The incline of the site which is 1:8 (approx) could be deemed to be unsuitable for disabled and aged inhabitants and would therefore be contrary to National Planning and Building Regulations Policy.

Surface Water and Flooding

Not only will surface water present dangerous traffic conditions, but also increased water run off which eventually will affect the low lying Lrfon Bridge Close. This area has experienced severe flooding in the past where existing gullies have failed to cope with torrential rain, including flooding from the brook at the back of Tai ar y Bryn onto Lrfon Bridge Road.

It must be noted that water from Cnwc y llo lane pours down the steep part of Hospital Road as the camber in the road directs such water away from the drain gullies especially over winter months.

We therefore have concerns over the existing drainage infrastructure in this locality and feel it is inadequate at present and will not cope with any further development along Hospital Road.

Future Primary School Development

Should allocation site P08 HA2 be reduced in size to accommodate a possible expansion of the County Primary School along the highway frontage of Hospital Road. At present the site is proposed for 56 dwellings.

We feel that if site allocation P08 HA3 is developed there will be an increase in school children in an already over subscribed Primary School. Should allocation site P08 HA2 be reduced in size from 56 houses to allow the future expansion of the school? [see also 6280.V2]

Rep'n/Para/Policy AccessnNo DateLodgd Late? Status Modified Summary

6280.V1 20/07/2015  Summary: Builth Wells - Seeking to delete Allocated Site P08 HA3

Source: Post or in person Type: Objection Mode Written Status Maintained

Drainage Sewage

The current sewage system will not cope with an increase of 96 houses along Hospital Road. There is already a lack of adequate sewage and drainage systems in this area.

Some years ago, Welsh Water reported that the Hay Road Sewage Works was at capacity;

What will be the impact of these proposed developments on the aforementioned?

What plans does Welsh Water have for increased sewage in this area?

Employment

Builth Wells already has employment issues; Is there a plan for new work opportunities?

We feel that Builth Wells and particularly the Hospital Road developments cannot sustain the allocations of P08 HA3 and P08 HA2 together (96 dwellings) as there are no associated employment opportunities.

Health Service

Doctors and Dentists are already oversubscribed with an overstretched provision, and with a small and much reduced 12 bed Hospital, are there plans for expansion to the Health Service to accommodate the proposed level of housing developments?

We feel that Builth Wells and particularly the Hospital Road developments cannot sustain the allocations of P08 HA3 and P08 HA2 together (96 dwellings) due to already over subscribed health provision.

Biodiversity (Flora and Fauna)

Part of the site P08 HA3 has been planted with replacement oak as well as other trees to accommodate the 1997 road widening scheme. Wildlife has now inhabited these matured areas. Concern is expressed that no further loss of habitat should be permitted, and that this area is protected.

It must also be noted that the River Irfon is an SSSI area.

The proposed plot HA3 is extremely wet as rainwater from higher ground passes down. After the hard surfaces are completed, will the Council and Developers guarantee that none of this water will cause environmental damage to the River Irfon (SSSI), Nant yr Arian brook.

Has an in-depth investigation been undertaken in the loss of important animal and plant species as a result of proposed developments? It is noted that the sites fall within the River Wye SAC and the River Irfon is a SSSI.

Alternative Development Sites

The UDP included sites B5 HA7 and B5 HA5 off Brecon Road which is a B classified road.

We feel that these sites should be promoted as Allocations within the LDP as they are far more suitable for development and highway connections. The promotion of these sites would give the town a better balance of traffic flow and would be less problematic in infrastructure and highways terms. [see also 6280.v5]

**6280.V6** 20/07/2015  Summary: Builth Wells - Proposed alternative site from the UDP B5 HA5

Source: Post or in person Type: Objection Mode Written Status Maintained

---

We lodge this objection and gratefully request that it takes into account the following points as shown in the table beneath: ....

....  
 Alternative Development Sites  
 The UDP included sites B5 HA7 and B5 HA5 off Brecon Road which is a B classified road.

We feel that these sites should be promoted as Allocations within the LDP as they are far more suitable for development and highway connections. The promotion of these sites would give the town a better balance of traffic flow and would be less problematic in infrastructure and highways terms.

Council Response: 0

---

**Question: 3e. (ii. Allocation No:**

Representation Texts: P08 HA3

Council Response: 0

---

**Question: 4b Reason For Request To Speak At Hearing And Subject**

Representation Texts: We. As residents of Irfon Bridge Close, wish to raise our concerns regarding the local infrastructure and the effect the allocation of site P08 HA3 would have on the surrounding locality and in particular Irfon Bridge Close.

Issue: 2015: Deposit Draft-11. Allocated Sites

Question Representation Texts

**Question: 3d. (i) Representation Details**

Representation Texts: Builth Wells has several sites that have been in the development plans for ci. 20 years, the 1997 pan and the 2010 plan and these sites have not been delivered. Land that is deliverable should be allocated instead.

Builth has had land in the [zones ?] that have not been delivered since 1997 plan. The same land parcels also went in the 2010 plan. These land parcels are not deliverable.

One example P08 HA2 and [sic] not been delivered in both plans, hence for almost 20 years!

Council Response:

0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: P08 HA2 has been in the plans for 18+ years and should be taken out and replaced by P08 HA3, which is deliverable and was given a green score by the assessment. The site was called site 579, given a green score (all of it) and should be allocated for housing.

The whole of site 579 should be allocated and thus the second part should be allocated. Builth Wells was given an allocation of over 200 houses in the 2010 plan.

Not only weremost of the sites from and old (1997 plan), the sites were again not delivered. On top of this Builth is now only given 131 housing numbers, most of which are old non deliverable sites.

Builth Wells should be given a larger allocation, back to 200+ or more and site P08 HA3 (all of it) could help.

Thus, the second part of P08 HA3 should be allocated for housing.

Council Response:

0

*Question Representation Texts*

**Question: 3d. (i) Representation Details**

Representation Texts: Builth has had land in the [zones ?] that have not been delivered since 1997 plan. The same land parcels also went in the 2010 plan. These land parcels are not deliverable.

One example P08 HA2 and [sic] not been delivered in both plans, hence for almost 20 years!

That land should be replaced with the 2nd part of P08 HA3 which is deliverable. (site 579) As per the LDP process by PCC, P08 HA3 was assessed by the LDP process as a green score and suitable.

Therefore P08 HA3 (2nd part) should be allocated. This whole site was called candidate Site 579. Secondly, Builth Wells should be given more housing numbers, especially as a large site P08 HA2 is not deliverable

Council Response:

0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: P08 HA2 has been in the plans for 18+ years and should be taken out and replaced by P08 HA3, which is deliverable and was given a green score by the assessment. The site was called site 579, given a green score (all of it) and should be allocated for housing.

The whole of site 579 should be allocated and thus the second part should be allocated. Builth Wells was given an allocation of over 200 houses in the 2010 plan.

Not only were most of the sites from and old (1997 plan), the sites were again not delivered. On top of this Builth is now only given 131 housing numbers, most of which are old non deliverable sites.

Builth Wells should be given a larger allocation, back to 200+ or more and site P08 HA3 (all of it) could help.

Thus, the second part of P08 HA3 should be allocated for housing.

*Question Representation Texts*

**Question: 3d. (i) Representation Details**

Representation Texts: I have objection to the plan ref: quoted above [P08 HA2] for:

the road from the Greyhound up past the Primary School down to Irfon Bridge Road. It is a busy road as it is and on school days it is very busy so have approx. over 150 extra cars on the road is a hazard to pedestrian and other car users.

The sewage system is at full capacity so are there plans put in place to cope with the extra usage.

The Doctors surgery is at bursting point having to wait 3-4 weeks for appointments extra rise [sic] in the population in Builth would be a problem and are there plans for more doctors

Employment is very hard to come by at present time. With more people joining the area would that bring in an influx of unemployed people straining the system even more.

Education - with cut backs to the schools and the school being over-subscribed, put more pressure on our teachers to deliver satisfactory education to our children.

*Question Representation Texts*

**Question: 3d. (i) Representation Details**

Representation Texts: Local Development Plan REF 35.27

Ref No.PO8HA3 (rear of Tai ar y Bryn) and Ref No.PO8HA2 (between primary school and Tai ar y Bryn).

Please find below reasons why I feel that the above development plan would have a very negative effect on Builth Wells.

- The town sewerage system would not cope with the increase of usage
- Hospital road is already overcrowded with the primary school also access on to hospital road will become impossible as Irfon Bridge Road is a problem also Garth Road is heavily congested
- We have no hospital A&E department, no ambulance station and an already very busy doctors surgery, local dentist is also limited
- Education in the Primary School in Builth and Llanelwedd is already oversubscribed
- Where will 96 families find work?

Question Representation Texts

**Question: 3d. (i) Representation Details**

Representation Texts: Access to this site is going to be an issue as there is a traffic calming island in the middle of the road.

If this field is developed then the primary school will no tbe able to expand.

During bad weather (snow, ice) people from Tai ar y Bryn park their cars on this stretch of road between there and the traffic island because they cannot get up the incline to the estate. This will be made worse if another estate is built.

1. How will sewage, water etc cope with 96 extra houses?
2. Primary School - can it cater for more children?
3. Local medical & dental practices. These are oversubscribed making appointments difficult?
4. the traffic will be a problem, particularly when the primary school is opening in the morning and closing in the afternoon. The road is already full of cars parked all over the place at these times.

Council Response: 0

Question Representation Texts

**Question: 3d. (i) Representation Details**

Representation Texts: SPECIFIC SITES REF35.27 & REF PO8 HA2

By allowing the building of approx 100 houses on the above sites the following problems appear inevitable.

1 .PRIMARY SCHOOL The already overcrowded primary school will be too small and plans for expansion need to be made

2.TRAFFIC Traffic volume will increase on Hospital [Road] adding to the busy agricultural trafic and general cars and lorries using it. The junction of Hospital Rd.and Garth Rd which is difficult now, will become impossible (it is worth noting this unclassified road carries all the heavy traffic through Builth to Swansea and west Wales). At the other end of Hospital Rd. and along Irfon Bridge Rd. on to the main road to Swansea has a one lane section in the centre and a dangerous t junction at the end.

[there is no point 3. present]

4.SEWAGE & STORM WATER

The sewage system is known to be inadequate to cope with the current number of houses (thc flow is into the Nant yr Arian basin). Add a further 40 houses will simply flood the area even more often than it does now.

5.UNEMPLOYMENT

Builth and district has an increasing problem with unemployment and adding more people to this pool will make a difficult situation impossible.

6.OVERLOADED INFRASTRUCTURE

- A.The Drs surgery is already experiencing problems recruiting Drs and it is difficult to get appointments at the moment—any further pressure will make a difficult situation worse.
- B.Dental practice has a similar problem.
- C.Hospital is not really able to offer a full medical service.
- D Traffic volume around the primary school will increase and with it the danger to the children of crossing an already crowded and busy road.

We hope these points will be taken to consideration when this planning issue is dealt with  
Signed.

<b>Question: 3d. (i)</b>	<b>Representation Details</b>
Representation Texts:	Objections to development Ref 35.27 - Ref.No.PO8HA3
	This field has a steep gradient and the concern is that the ditch alongside this field , which just copes with storm water, will be flooded as soon as the grassy/porous surface is removed and a hard surface is put in place with houses and roads. This will add to an already difficult situation of dealing with storm water and effluent.
	We hope these points will be taken to consideration when this planning issue is dealt with Signed.

*Question Representation Texts*

**Question: 3d. (i) Representation Details**

Representation Texts: With the introduction of 96 houses, please issue comments relating to employment opportunities.

Traffic congestion during peak times on Hospital Road is already at dangerous levels, please comment on the intended improvements to the road system with the addition of a circa 200 cars using the road.

The hospital has already closed. An increase in the overall population of Builth will have a major impact on the medical support the NHS can offer.

Builth Wells is a lovely market town in the heart of Mid Wales, please do not overpopulate an area of such natural beauty subscribing to property developers who build, and then move on to their next project with little afterthought of the people of Builth.

This has already been demonstrated by previous building project in the local areas.

Question Representation Texts

**Question: 3d. (i) Representation Details**

Representation Texts: As above, my husband and I together with close neighbours feel that the character of Irfon Bridge Road would be changed by this proposal for an extra 50 houses. It would increase traffic flow on a road which is already becoming more dangerous and which has been reduced to a single track road with traffic only able to flow in one direction over a portion of its length. Children use this road to walk to school and parent's drive in both directions to deliver and fetch their primary school children.

Further development will also lead to more congestion at the junction of Hospital Road and Garth Road, which is already a difficult spot as school buses, cars, lorries and tractors negotiate the turn.

Council Response: 0

Question Representation Texts

**Question: Council Response**

Representation Texts: This representation is considered to be in support of the Deposit Local Development Plan in terms of the allocation of P08 HA2 Land West of the Primary School, in that it confirms that a water supply can be provided to the site and that the water works can accommodate the foul flows from the development sites in Builth Wells. Reference is made to the need to resolve isolated flooding incidents on the system, however investment in infrastructure is planned for the future by Welsh Water, and also the provision of infrastructure can be provided by developers prior to planned investment. No changes are therefore required.

Council Response:

0

**Question: 3d. (i) Representation Details**

Representation Texts: •A water supply can be provided to serve this site.

•There are isolated incidents of flooding in the public sewerage system that will need to be resolved to allow development to proceed. Our current capital investment programme, Asset Management Plan 6 (AMP6), for the period 2015-2020 includes a scheme to resolve this flooding issue. Should potential developers wish to commence in advance of the AMP6 scheme they can progress the improvements through the sewerage requisition provisions of the Water Industry Act 1991 or S106 of the Town & Country Planning Act 1990.

•Builth Wells Wastewater Treatment Works (WwTW) can accommodate the foul flows from the proposed development sites in Builth Wells.

Council Response:

0

*Question Representation Texts*

**Question: 3d. (i) Representation Details**

Representation Texts: Introduction

Powys County Council has prepared its deposit proposals document for the Powys Local Development Plan (LDP) which upon adoption will replace the Powys Unitary Development Plan and will be the basis for decisions on land use planning for all of Powys. This deposit proposals document includes the Authority's vision for housing site allocations and we hereby wish to make comment about such site allocations.

Candidate Site 476 was proposed during the call for Candidate Sites in April 2011 and has subsequently failed to be allocated as a housing site within the village of Castle Caereinion. We hereby appeal this non-allocation and are of the opinion that the Local Development Plan fails on the ground of soundness.

Soundness of Local Development Plan

The Local Development Plan fails on the ground of soundness criteria CE2. The site allocations do not realistically nor appropriately consider the relevant alternatives nor are they allocated on a robust or credible evidence Base. Site allocations have not been considered with consistent weighting to the sustainable development aims.

Candidate Site 476

Candidate Site 476 lies immediately adjacent to existing housing development, located on the south eastern boundary of Castle Caereinion. The site would form a logistical and proportionate natural extension to the village. The site represents sustainable development within a sustainable village and it is a deliverable site; there are no constraints and the site is capable of development within the next plan period.

The Site Appraisal Report submitted with the Candidate Site Proposal Form concluded that the site was suitable to a residential site allocation on the grounds of settlement; delivery; site quality; and the wider environment; public transport and access; environmental sustainability; well being and; sustainability.

Candidate Site 476 is an appropriate site for a housing allocation in Four Crosses. The LDP designates Castle Caereinion as a "large village" on the basis it has a good range of services and community amenities; the village is therefore recognized as a sustainable location.

Housing Allocation P11 HC1, Castle Caereinion

LDP housing allocation Site P11 HC1 is set on the western edge of the village of Castle Caereinion, thereby any development would extend the village to the west. The site is not

6267.V16		15/07/2015	<input type="checkbox"/>			Summary: Castle Caereinion - Alternative Site	
Source:	Website registration	Type:	Objection	Mode:	Written	Status:	Maintained

situated within the heart of the village and would therefore not serve a more central benefit to the village as a whole should any open village space be developed on the site. The majority of the existing housing (approximately 70%) in Castle Caereinion are located nearer to Candidate Site No. 476, and therefore Site 476 would serve to be in a more central location as opposed to Site P11 HC1. It is questioned whether the existing access to the housing developments near to P11 HC1 are of a highway standard to cater for more housing in the future without out any major road improvement works. If road improvement works are required then this will depend on third party ownership agreement.

Candidate Site 476 forms the natural expansion of future housing in Castle Caereinion with the rear boundary line following a natural flow of the existing adjacent residential sites.

Candidate Site Suitability

Candidate Site 476 has road frontage. The site owner has control of the roadside boundary and can therefore provide satisfactory highway access. The site is within 5 minutes walk of the key village services and facilities which provide for day-to-day needs. The site lies within a 30 mph speed limit, and therefore access can be achieved into the site.

The applicant is more than happy to reduce the size of Candidate Site 476, down to a quarter of the original size, to make the site more of a natural extension to the village and to keep the site proportionate to the village. The applicant is open to your decision on such new boundary of this site.

Overall, Site 476 provides a huge amount of benefit to the local community of Castle Caereinion, the housing would be adjacent to existing housing in the village.

The Candidate Site Report stated that all mains services were in place close by and the site could be easily connected to current services and infrastructure.

The site is a deliverable site and the site owner would be willing to enter into a planning obligation to reduce the time limits on development to deliver the site in a shorter time period.

Conclusion

Candidate Site 476 therefore fulfils the LDP Sustainable Development Aims. The site is a suitable residential site allocation on the grounds of settlement; delivery; site quality and the wider environment; public transport and access; environmental sustainability; well being and; sustainability. The site is an appropriate site for a housing allocation in Castle Caereinion and its range of services and community amenities; a development of this size would not be limited by any environmental and infrastructure capacity constraints. We would welcome a site visit to discuss the site and proposed housing allocation. Candidate site 476 is therefore preferable to site allocation Site P11 HC1 and the Local Development Plan should be amended accordingly.

delivery; site quality; and the wider environment; public transport and access; environmental sustainability; well being and; sustainability.

Candidate Site 476 is an appropriate site for a housing allocation in Four Crosses. The LDP designates Castle Caereinion as a 'large village' on the basis it has a good range of services and community amenities; the village is therefore recognized as a sustainable location.

Housing Allocation P11 HC1, Castle Caereinion

LDP housing allocation Site P11 HC1 is set on the western edge of the village of Castle Caereinion, thereby any development would extend the village to the west. The site is not situated within the heart of the village and would therefore not serve a more central benefit to the village as a whole should any open village space be developed on the site. The majority of the existing housing (approximately 70%) in Castle Caereinion are located nearer to Candidate Site No. 476, and therefore Site 476 would serve to be in a more central location as opposed to Site P11 HC1. It is questioned whether the existing access to the housing developments near to P11 HC1 are of a highway standard to cater for more housing in the future without out any major road improvement works. If road improvement works are required then this will depend on third party ownership agreement.

Candidate Site 476 forms the natural expansion of future housing in Castle Caereinion with the rear boundary line following a natural flow of the existing adjacent residential sites.

Candidate Site Suitability

Candidate Site 476 has road frontage. The site owner has control of the roadside boundary and can therefore provide satisfactory highway access. The site is within 5 minutes walk of the key village services and facilities which provide for day-to-day needs. The site lies within a 30 mph speed limit, and therefore access can be achieved into the site.

The applicant is more than happy to reduce the size of Candidate Site 476, down to a quarter of the original size, to make the site more of a natural extension to the village and to keep the site proportionate to the village. The applicant is open to your decision on such new boundary of this site.

Overall, Site 476 provides a huge amount of benefit to the local community of Castle Caereinion, the housing would be adjacent to existing housing in the village.

The Candidate Site Report stated that all mains services were in place close by and the site could be easily connected to current services and infrastructure.

The site is a deliverable site and the site owner would be willing to enter into a planning obligation to reduce the time limits on development to deliver the site in a shorter time period.

Conclusion

Candidate Site 476 therefore fulfils the LDP Sustainable Development Aims. The site is a suitable residential site allocation on the grounds of settlement; delivery; site quality and the wider environment; public transport and access; environmental sustainability; well being and; sustainability. The site is an appropriate site for a housing allocation in Castle Caereinion and its range of services and community amenities; a development of this size would not be limited by any environmental and infrastructure capacity constraints. We would welcome a site visit to discuss the site and proposed housing allocation. Candidate site 476 is therefore preferable to site allocation Site P11 HC1 and the Local Development Plan should be amended accordingly.

*Question*      *Representation Texts*

**Question: 3d. (i) Representation Details**

Representation Texts: Introduction

Powys County Council has prepared its deposit proposals document for the Powys Local Development Plan (LDP) which upon adoption will replace the Powys Unitary Development Plan and will be the basis for decisions on land use planning for all of Powys. This deposit proposals document includes the Authority's vision for housing site allocations and we hereby wish to make comment about such site allocations.

Candidate Site 480 was proposed during the call for Candidate Sites in April 2011 and has subsequently failed to be allocated as a housing site within the village of Castle Caereinion. We hereby appeal this non-allocation and are of the opinion that the Local Development Plan fails on the ground of soundness.

Soundness of Local Development Plan

The Local Development Plan fails on the ground of soundness criteria CE2. The site allocations do not realistically nor appropriately consider the relevant alternatives nor are they allocated on a robust or credible evidence Base. Site allocations have not been considered with consistent weighting to the sustainable development aims.

Source:	Website registration	Type:	Objection	Mode:	Written	Status:	Maintained

Candidate Site 480

Candidate Site 480 lies immediately adjacent to an existing site with planning consent for a housing development (brown field site). The site would form a logistical and proportionate natural extension to the village. The site represents sustainable development within a sustainable village and it is a deliverable site; there are no constraints and the site is capable of development within the next plan period.

The Site Appraisal Report submitted with the Candidate Site Proposal Form concluded that the site was suitable to a residential site allocation on the grounds of settlement; delivery; site quality; and the wider environment; public transport and access; environmental sustainability; well being and; sustainability.

Candidate Site 480 is an appropriate site for a housing allocation in Castle Caereinion. The LDP designates Castle Caereinion as a 'large village' on the basis it has a good range of services and community amenities; the village is therefore recognized as a sustainable location.

Housing Allocation P11 HC1, Castle Caereinion

LDP housing allocation Site P11 HC1 is set on the western edge of the village of Castle Caereinion, thereby any development would extend the village to the west. The site is not situated within the heart of the village and would therefore not serve a more central benefit to the village as a whole should any open village space be developed on the site. The majority of the existing housing (approximately 70%) in Castle Caereinion are located nearer to Candidate Site No. 480, and therefore Site 480 would serve to be in a more central location as opposed to Site P11 HC1. It is questioned whether the existing access to the housing developments near to P11 HC1 are of a highway standard to cater for more housing in the future without out any major road improvement works. If road improvement works are required then this will depend on third party ownership agreement.

Candidate Site 480 forms the natural expansion of future housing in Castle Caereinion with the rear boundary line following a natural flow of the existing adjacent residential sites.

Candidate Site Suitability

Candidate Site 480 has road frontage. The site owner has control of the roadside boundary and can therefore provide satisfactory highway access. In fact consent has been granted for a housing development of the farm yard of Tynllan Farm (brown field site), this new access would also serve the candidate site 480. The site is within 5 minutes walk of the key village services and facilities which provide for day-to-day needs. The site lies within a 30 mph speed limit, and therefore access can be achieved into the site.

Overall, Site 480 provides a huge amount of benefit to the local community of Castle Caereinion, the housing would be adjacent to existing housing sites in the village.

The Candidate Site Report stated that all mains services were in place close by and the site could be easily connected to current services and infrastructure.

The site is a deliverable site and the site owner would be willing to enter into a planning obligation to reduce the time limits on development to deliver the site in a shorter time period and to provide the required local needs housing numbers and community contributions.

Conclusion

Candidate Site 480 therefore fulfils the LDP Sustainable Development Aims. The site is a suitable residential site allocation on the grounds of settlement; delivery; site quality and the wider environment; public transport and access; environmental sustainability; well being and; sustainability. The site is an appropriate site for a housing allocation in Castle Caereinion and its range of services and community amenities; a development of this size would not be limited by any environmental and infrastructure capacity constraints. We would welcome a site visit to discuss the site and proposed housing allocation. Candidate site 480 is therefore preferable to site allocation Site P11 HC1 and the Local Development Plan should be amended accordingly.

Caereinion. We hereby appeal this non-allocation and are of the opinion that the Local Development Plan fails on the ground of soundness.

Soundness of Local Development Plan

The Local Development Plan fails on the ground of soundness criteria CE2. The site allocations do not realistically nor appropriately consider the relevant alternatives nor are they allocated on a robust or credible evidence Base. Site allocations have not been considered with consistent weighting to the sustainable development aims.

Candidate Site 362

Candidate Site 362 lies adjacent to an existing site with planning consent for a housing development (brown field site). The site would form a logistical and proportionate natural extension to the village. The site represents sustainable development within a sustainable village and it is a deliverable site; there are no constraints and the site is capable of development within the next plan period.

The Site Appraisal Report submitted with the Candidate Site Proposal Form concluded that the site was suitable to a residential site allocation on the grounds of settlement; delivery; site quality; and the wider environment; public transport and access; environmental sustainability; well being and; sustainability.

Candidate Site 362 is an appropriate site for a housing allocation in Castle Caereinion. The LDP designates Castle Caereinion as a 'large village' on the basis it has a good range of services and community amenities; the village is therefore recognized as a sustainable location.

Housing Allocation P11 HC1, Castle Caereinion

LDP housing allocation Site P11 HC1 is set on the western edge of the village of Castle Caereinion, thereby any development would extend the village to the west. The site is not situated within the heart of the village and would therefore not serve a more central benefit to the village as a whole should any open village space be developed on the site. The majority of the existing housing (approximately 70%) in Castle Caereinion are located nearer to Candidate Site No. 362, and therefore Site 362 would serve to be in a more central location as opposed to Site P11 HC1. It is questioned whether the existing access to the housing developments near to P11 HC1 are of a highway standard to cater for more housing in the future without out any major road improvement works. If road improvement works are required then this will depend on third party ownership agreement.

Candidate Site 362 forms the natural expansion of future housing in Castle Caereinion with the rear boundary line following a natural flow of the existing adjacent residential sites.

Candidate Site Suitability

Candidate Site 362 has road frontage. The site owner has control of the roadside boundary and can therefore provide satisfactory highway access. In fact consent has been granted for a housing development of the farm yard of Tynllan Farm (brown field site), this new access would also serve the candidate site 362. The site is within 5 minutes walk of the key village services and facilities which provide for day-to-day needs. The site lies within a 30 mph speed limit, and therefore access can be achieved into the site.

Overall, Site 362 provides a huge amount of benefit to the local community of Castle Caereinion, the housing would be adjacent to existing housing sites in the village.

The Candidate Site Report stated that all mains services were in place close by and the site could be easily connected to current services and infrastructure.

The site is a deliverable site and the site owner would be willing to enter into a planning obligation to reduce the time limits on development to deliver the site in a shorter time period and to provide the required local needs housing numbers and community contributions.

Issue: 2015: Deposit Draft-12. Alternative Sites

*Question Representation Texts*

**Question: 3d. (i) Representation Details**

Representation Texts: For the last five years we have been working with Rural Housing Enablers and Registered Social Landlords (RSLs) in the Churchstoke area identifying sites suitable for housing. As a practice we have also made our representations via the Powys County Council Strategic Housing Partnership as well as the Joint Housing Land Availability Study (JHLAS).

We have monitored the delivery of housing across the county of Powys over the last 15 years. In doing so we have consistently challenged the Local Planning Authority (LPA) to allocate tracts of land which are realistically deliverable for housing within the relevant plan periods. We are the largest indigenous architectural practice in the county that has delivered mass housing as well as one off houses within Powys so are very well placed to make comments about deliverable land parcels within the county.

We act on behalf of the land owner for land parcel P12 HC3 as outlined in the PCC LDP Deposit Draft 2015. We take this opportunity to outline the veracity of the case for inclusion of this land, and an extension to this land (references PCC LDP CSR 1126 and 1127), in the context of the likelihood of other parcels of land in Churchstoke being delivered over the plan period.

We are consistent in our challenge to the LPA in relation to the truly deliverable areas of land in Churchstoke for housing. We remind the LPA of our response to the Initial Deposit Stage 2014 of the LDP as below:

At the outset of the Welsh Government's plans in 2005 to embark upon Local Development Plans the emphasis was on developing a plan led system based on the delivery of realistic objectives over the plan period i.e. all Local Planning Authorities (LPA) in Wales had an obligation to prepare a plan of readily available sites that can be developed for specific purposes over a time span.

In the case of this representation our challenge to Powys County Council (PCC) is to test their commitment to the delivery of realistic and deliverable sites for housing within Churchstoke over the LDP plan period from 2011-2026.

During the initial stages of the LDP Delivery Agreement in 2011 the LPA set out its agenda in terms of gathering information and setting objectives. The LPA undertook a call for candidate sites in 2012. PCC then presented a selection of sites in 2013 that it had deemed acceptable for residential development. This second sift of candidate sites included those that had previously been included within the Montgomeryshire Local Plan (unadopted 1996). the UDP (adopted 2010) and indeed some other sites that had appeared in the Powys Structure Plan pre-dating 1996.

The initial stages of the LDP were to assess as to whether the sites that had been proposed were truly deliverable over the plan period. The site which has been proposed here (i) CSR 1126, ii) CSR 1127) was originally included as being suitable for development over the plan period and indeed succeeded in being promoted by the LPA as being suitable for residential development. Indeed part of the site has started to be developed. This however has changed in the light of a change in direction from PCC in terms of housing allocations in the Deposit Draft 2014 and the site has been removed from consideration for allocation.

The LPA was asked by the Welsh Government to show good judgement in terms of its choice of candidate sites to suit housing allocations in Churchstoke. We would contest as

Source: Email Type: Objection Mode Oral (Examination) Status Maintained

to whether the LPA has done this in a reasonable manner given the following statement by our client.

"In the UDP they've got 47 dwellings for Churchstoke 35 of which look unlikely to be built in the foreseeable future. They are as follows:

The View - 13 dwellings (PCC UDP HA6)- planning given in 2000, 14 years ago It states in UDP statement that the site is under construction. This is incorrect as no construction has been started yet. Nothing has happened on this site in 14 years.

The Garage - 6 dwellings (PCC UDP HA5) - planning granted approx 8 years ago. There is no indication that it will started in the near future and it is a contaminated site  
Maes Neuadd - Hall Bank - 16 dwellings - Occasional activity on the site but no dwellings completed and sold in the last 10 years.

Out of 35 dwellings above there is no provision for affordable housing.

The Hatchery Site - planning for 12 dwellings (PCC UDP HA2) - Under construction. 5 affordable dwellings completed and let to date. Next phase commenced.

Taking the above facts into consideration we would like the land adjacent to The Hatchery, that was given the green light in the first UDP to be included in the current proposal.

As the reader will understand the inclusion of the allocated sites as proposed by the LPA does nothing to eschew deliverability over the plan period. The 'dusting off' and re-issuing of sites that had previously been included within the Local Development Plans (and never built out) does little to support the spirit of the LDP.

With this in mind we would contest as to whether the LPA has shown good judgement in terms of achieving a sound plan. In addition it is not clear as to how the LPA has developed its allocation of housing numbers on a settlement by settlement basis when it has no contemporaneous documentary database upon which to base its flidgement. With this in mind we conclude that we are of the opinion that the LPA has not included sufficient deliverable sites for housing allocation over the plan period. We would also conclude that the LPA has not provided sufficient evidence or a database upon which to base its allocations on a site by site and settlement by settlement basis. We are therefore of the opinion that the LDP is unsound and should be changed to include truly deliverable sites as per site ( i) CSR 1126, ii) CSR 1127 ) details of which are attached.

Since that time there has been no further development of housing in Churchstoke. The settlement boundary as drafted for the Revised Deposit Draft LDP 2015 has been arbitrarily drawn and reflects no known physical feature in the settlement. With this in mind it makes logical sense to extend parcel reference PCC LDP P12 HC3 to incorporate PCC LDP CSR 1126 and 1127 as denoted on the attached drawing. Note that 1127 is considered 'white land' that could come forward as 'fall- back' land if allocated sites are not built out. 1126 was not considered for allocation given that numbers of housing were catered for upon other allocated sites however we would contest this point.

The reasons for our challenge are that given the statements above we fail to see how the promotion of 'extant' sites within the PCC LDP 2015 is viable or realistic in terms of housing delivery for the county and more importantly for Churchstoke. The LPA needs no reminding that the allocation of such land parcels will mean that its delivery of housing according to its projections will be doomed to failure from the start. Indeed we made this point at a recent Agent's Forum in which we challenged the LPA to consider its delivery mechanism for 613 houses over the plan period given that it has consistently failed to do so since 1996 Through the inclusion of land which has a clear prospect of development only then will the LOP be sound. Without this the Development Plan for Powys will fail.

In terms of housing numbers we note that Churchstoke was considered an appropriate settlement for additional dwellings over the plan period of the UDP 2001- 2016. Targets across Powys were never achieved even at a time of considerable house building in the town of the early to mid 2000s.

We challenged the housing numbers for Churchstoke going forward as part of our contribution to the Strategic Housing Partnership and at JHLAS where we have consistently made the point that the Local Authority is reliant on outdated and misrepresented data. The assessment of housing need has not been undertaken on a sufficiently micro level in order to fully investigate the precise need in most settlements in Powys.

With all of the above in mind we see the inclusion of the land parcels as defined at PCC LDP CSR 1126 and 1127 as not only meeting the identifiable needs for housing in Churchstoke as presented but also as a realistically deliverable holistic site for housing in the settlement given the fact alternative sites have for some 20 years never been built

out.

So to conclude, and to accord with Planning Policy Wales (PPW) Guidance in relation to the provision of realistically deliverable land we state the following:

The Revised Deposit Draft LDP 2015 includes parcels of land within Churchstoke which are not deliverable. This is evidenced by the fact that these parcels of land have been included for some time within Development Plans.

The sites for which we are currently responsible for representation are truly deliverable over the plan period and it has been recognised by the LPA in previous stages of the LDP that they are entirely viable. We make the point that there are no planning or other technical hurdles that need to be overcome in the delivery of this entire land parcel for housing.

The extension of this land parcel P12 HC3 provides for a logical extension to the settlement boundary of Churchstoke and allows for more comprehensive development of land to come forward within the plan period. Therefore we formally request that the land parcels reference PCC LDP CSR 1126 and 1127 be included within the LDP for the delivery of housing over the plan period for this settlement of Churchstoke.

Question Representation Texts

**Question: 3d. (i) Representation Details**

Representation Texts: Introduction

Powys County Council has prepared its deposit proposals document for the Powys Local Development Plan (LDP) which upon adoption will replace the Powys Unitary Development Plan and will be the basis for decisions on land use planning for all of Powys. This deposit proposals document includes the Authority's vision for housing site allocations and we hereby wish to make comment about such site allocations.

Candidate Site 469 was proposed during the call for Candidate Sites in April 2011 and has subsequently failed to be allocated as a housing site within the large village of Churchstoke. We hereby appeal this non-allocation and are of the opinion that the Local Development Plan fails on the ground of soundness.

Soundness of Local Development Plan

The Local Development Plan fails on the ground of soundness criteria CE2. The site allocations do not realistically nor appropriately consider the relevant alternatives nor are they allocated on a robust or credible evidence base. Site allocations have not been considered with consistent weighting to the sustainable development aims, with specific reference to housing (1); housing (2) and; access (1).

Candidate Site 469

Candidate 469, land adjoining Buttercup House, Churchstoke is located within the centre of the village and could provide a logical mixed type residential allocation site. The site would provide a range of open market and affordable dwellings to serve all sectors of the housing market, together with community open and recreational space. The owner would be willing to enter into a planning obligation to provide affordable homes at a rate in excess of that stated in policy for a new housing development. The site is within a single ownership and could be phased to accommodate development within the village. There are no ownership constraints.

The site represents sustainable development within a sustainable village and is a deliverable site; there are no site constraints and the site is capable of development within the next plan period.

The Site Appraisal Report submitted with the Candidate Site Proposal Form concluded that the site was suitable a mixed use housing site allocation on the grounds of settlement; delivery; site quality and the wider environment; public transport and access; environmental sustainability; well being and; sustainability.

Candidate site 469 is an appropriate site for mixed housing development in Churchstoke. The Local Development Plan (LDP) designates Churchstoke as a 'large village' on the basis it has a good range of services and community amenities; the village is therefore recognised as a sustainable location.

Powys Housing Growth

The Powys LDP (2011-2026) states that 4500 new homes are required (paragraph 3.3.11) across Powys and they are seeking to deliver 5000 new homes throughout the plan period (paragraph 3.3.12). 49 hectares for employment and economic development uses are required.

National census data shows that the number of households in Powys increased by 9.2% between 2001 and 2011, which is consistent with the national population increase of 9.3% over the same period.

The LDP states that there were 58,400 households in Powys in 2011 and should this average household rise remain constant by the end of the plan period (2026), Powys would require 63,770 households by 2021 and 66,704 households by 2026. This equates to an increase of 8,304 households in Powys across the Plan period, significantly more than the 4,500 predicted.

The housing requirement results in a build rate of 333 new dwellings per year across Powys. Since 2009 the average number of houses built across Powys has been 194 per annum which is significantly below predicted needs and highlights a consistent under delivery of required new homes. This under delivery of homes over a significant time period could lead to Powys not having an acceptable housing land supply and therefore suitable sites which represent sustainable development should be allocated for new housing. Candidate site 469 would allow Powys to provide the supply of housing land required and help to reduce the under delivery of an acceptable housing land supply.

Local Development Plan Housing Allocations

LDP housing allocation in Churchstoke for the plan period 2011 to 2026 is set to provide 45 new dwellings within the village. All 45 dwellings have been committed through existing planning permissions and a number have been constructed to date. This proposed allocation of 45 houses across the plan period is an unrealistic allocation in terms of housing need for Powys and the growing number of households in the area. The proposed housing allocations for Churchstoke fail to be sound for the Local Development Plan on the grounds of the Council's sustainable development aims for housing.

Not all the committed housing has been commenced and therefore the proposed number of 45 houses may not be wholly deliverable during the development plan period.

In 2011 there were 695 households in Churchstoke. When assessing the predicted increases in household need of 9.2% over each 10 year period, Churchstoke would require 99 new households over the plan period to 2026. The proposed housing allocations provides for 45 new dwellings, therefore a 54 household deficit over the plan period.

Candidate Site Suitability

Candidate Site 469 has a road frontage and a highways infrastructure to the site with compliant visibility splays could be put in place to serve residential development. The site owner has control of the roadside boundary and can therefore provide satisfactory highway access. There is a well used continuous pedestrian pavement from the proposed site to the centre of the village and the site is within 5 minutes walk of the key village services and facilities, to include school, places of worship, post office and village hall. There is

---

a regular daily bus service to Newtown and Welshpool with multiple trips per day.

The Candidate Site Report stated that all mains services were in place close by and the site could be easily connected to current services and infrastructure.

Highways access to the site could be created from the A489 without requirement of third party land; due to site ownership highway infrastructure could be implemented for the site to maximize efficient and safe traffic flow to the highway.

The site complies with the sustainable development aims of the Local Development Plan. The site would not have any adverse impacts on: energy and climate change; waste and water; green infrastructure; resource use; housing; access; regeneration; community support; culture and sense of place; business; health; skills and employment and; maximizing financial effectiveness.

The Options Appraisal Tool assessment undertaken by Powys County Council for the site gives the site a positive appraisal stating that the is located in accordance with the Sustainable Settlement Hierarchy and is a logical extension to the built form of the settlement. Highways concerns can be overcome; ownership of the site and current access would allow a compliant site access in terms of visibility splays and radii.

The site is a deliverable site and the site owner would be willing to enter into a planning obligation to provide increase number of affordable homes to deliver the site appropriately for the housing needs of the village.

Site Visit

We would welcome a site visit to discuss the site and proposed housing allocation.

Conclusion

Candidate Site 469 fulfils the LDP Sustainable Development Aims, with specific reference to housing (1); housing (2) and; access (1). The site is a suitable mixed use residential site allocation on the grounds of settlement; delivery; site quality and the wider environment; public transport and access; environmental sustainability; well being and; sustainability. The site is a logical extension to the built settlement and is an appropriate site for a mixed housing allocation in Churchstoke with its range of services and community amenities.

Candidate site 469 would enable Powys to overcome the consistent under delivery of housing land supply. When assessing the predicted increases in household need of 9.2% over each 10 year period, Churchstoke would require 99 new households over the plan period to 2026. The proposed housing allocations provides for 45 new dwellings, therefore a 54 household deficit over the plan period.

On these grounds, we propose that the Local Development Plan should be amended accordingly to include candidate Site 469.

*Question*                      *Representation Texts*

**Question: 3d. (i) Representation Details**

Representation Texts: Introduction

Powys County Council has prepared its deposit proposals document for the Powys Local Development Plan (LDP) which upon adoption will replace the Powys Unitary Development Plan and will be the basis for decisions on land use planning for all of Powys. This deposit proposals document includes the Authority's vision for housing site allocations and we hereby wish to make comment about such site allocations.

Candidate Site 417 was proposed during the call for Candidate Sites in April 2011 and has subsequently failed to be allocated as a housing site within the village of Churchstoke. We hereby appeal this non-allocation and are of the opinion that the Local Development Plan fails on the ground of soundness.

Soundness of Local Development Plan

The Local Development Plan fails on the ground of soundness criteria CE2. The site allocations do not realistically nor appropriately consider the relevant alternatives nor are they allocated on a robust or credible evidence Base. Site allocations have not been considered with consistent weighting to the sustainable development aims.

6267.V15		15/07/2015	<input type="checkbox"/>			Summary: Churchstoke - Alternative Site	
Source:	Website registration	Type:	Objection	Mode:	Written	Status:	Maintained

Candidate Site 417

Candidate Site 417 lies adjacent to an existing site with planning consent for a housing development (brown field site). The site would form a logistical and proportionate natural extension to the village. The site represents sustainable development within a sustainable village and it is a deliverable site; there are no constraints and the site is capable of development within the next plan period.

The Site Appraisal Report submitted with the Candidate Site Proposal Form concluded that the site was suitable to a residential site allocation on the grounds of settlement; delivery; site quality; and the wider environment; public transport and access; environmental sustainability; well being and; sustainability.

Candidate Site 417 is an appropriate site for a housing allocation in Churchstoke. The LDP designates Churchstoke as a "large village" on the basis it has a good range of services and community amenities; the village is therefore recognized as a sustainable location.

Housing Allocation P11 HC1, Castle Caereinion

There are a number of site allocations for housing in Churchstoke. However, Candidate Site 417 appears to form the natural expansion of future housing in Churchstoke with the rear boundary line following a natural flow of the existing adjacent residential sites.

Candidate Site Suitability

Candidate Site 417 has road frontage. The site owner has control of the roadside boundary and can therefore provide satisfactory highway access. The site lies within a 30 mph speed limit, and therefore access can be achieved into the site.

Overall, Site 417 provides a huge amount of benefit to the local community of Churchstoke, the housing would be adjacent to existing housing sites in the village.

The Candidate Site Report stated that all mains services were in place close by and the site could be easily connected to current services and infrastructure.

The site is a deliverable site and the site owner would be willing to enter into a planning obligation to reduce the time limits on development to deliver the site in a shorter time period and to provide the required local needs housing numbers and community contributions.

Conclusion

Candidate Site 417 therefore fulfils the LDP Sustainable Development Aims. The site is a suitable residential site allocation on the grounds of settlement; delivery; site quality and the wider environment; public transport and access; environmental sustainability; well being and; sustainability. The site is an appropriate site for a housing allocation in Churchstoke and its range of services and community amenities; a development of this size would not be limited by any environmental and infrastructure capacity constraints. We would welcome a site visit to discuss the site and proposed housing allocation. Candidate site 417 is therefore preferable to all the other site allocations and the Local Development Plan should be amended accordingly.

*Question Representation Texts*

**Question: 3d. (i) Representation Details**

Representation Texts: We object to Appendix 1 as it appears that the proposed allocations within Clyro have not been robustly considered and demonstrated to be genuinely available, suitable and deliverable for development within the Plan period i.e. founded on a robust and credible evidence base and compliant with PPW and the Wales Spatial Plan (WSP). Our comments on the proposed allocations are as follows:  
 LAND SOUTH EAST OF CLYRO (B), 13 HOMES (REF: P13 HA1)  
 This site adjoins a historic UDP allocation which has not been brought forward to date (LDP ref: P13 HC1). The LDP Site Status Report confirms that a number of surveys would be required in order to bring forward the development of this site including ecology and land contamination surveys which have not been undertaken to date. The LDP Site Status Report confirms that the current access arrangements at the site are 'seriously substandard' and would require substantial highways & access improvements including mobility infrastructure and potential traffic calming in order to deliver this site. The site contains two entries from the Archaeological Trust's Historic Environment Register and it lies within the setting of Clyro Castle to the north and Clyro Court to the south, which are Scheduled Ancient Monuments. The site is visible from the nearby Conservation Area with several Listed Buildings in proximity to the site. The development of this site will impact upon the setting of the Scheduled Ancient Monuments, Conservation Area and Listed Buildings whilst no information has been submitted which demonstrates that these constraints are capable of being resolved.  
 Proposed allocation P13 HA1 therefore fails Test of Soundness CE2 in that the allocation is not appropriate in terms of its location within the setting of a Scheduled Ancient Monument, Conservation Area and Listed Buildings whilst there is no evidence that it is deliverable within the Plan period.

Council Response: 0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: In light of the above objections and the representations made in relation to Policy H1, we propose that proposed allocations P13 HA1 and P13 HC1 are deleted from the Plan and that additional sites should be allocated for housing within Clyro at appropriate and sustainable locations. A suitable, sustainable and available site for housing development includes our client's site at Land north-west of Begwyns Bluff, Clyro which is promoted for allocation via separate representations.

Question	Representation Texts	Response
<b>Question: 3d. (i) Representation Details</b>	Representation Texts: LAND SOUTH EAST OF CLYRO (A), 21 HOMES (REF: P13 HC1) The allocation comprises an existing commitment although planning permission for 21 homes lapsed in 2011 (ref: RAD/2003/0557). The Deposit LDP Allocations Table confirms that although the planning permission lapsed in 2011, a technical start was made for 6 local needs units on 4th January 2011. However, little progress has been made to date and in this regard we would question the deliverability of this site over the Plan period and the ability of this site to meet local needs for housing.	Council Response: 0

<b>Question: 3d. (ii) Desired changes to Document</b>	Representation Texts: In light of the above objections and the representations made in relation to Policy H1, we propose that proposed allocations P13 HA1 and P13 HC1 are deleted from the Plan and that additional sites should be allocated for housing within Clyro at appropriate and sustainable locations. Issue: 2015: Deposit Draft-11. Allocated Sites

*Question Representation Texts*

**Question: Council Response**

Representation Texts: The proposer of this site has submitted plans for an alternative access arrangements which have been considered in consultation with the Representor, the Highway Authority. The Highway Authority has advised that the plan showing the access arrangement west of Studio Cottage seems to have the potential to provide a viable route to the land at the rear of the property although it lacks detail sufficient to be certain. It is advised that the key issues will be junction spacing and access visibility however the Authority believe it is likely appropriate standards can be achieved.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: This allocation is an unacceptable combination of two earlier candidate sites. Whilst the frontage onto the A44 was considered appropriate for a single in-fill dwelling, its combination with the land to the south, which has no alternative means of access to the highway network, would necessitate an adoptable access layout. Due to the limited frontage this would lead to an inappropriate cross-roads configuration with the residential development on the north side of the A44. Additional adjacent land with road frontage would be essential to achieving an acceptable access layout to this site.

Council Response: 0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: I recommend the inclusion of third party land to the west of the sites existing road frontage to ensure adequate land is available for an acceptable access layout.

Council Response: 0

*Question Representation Texts*

**Question: 3d. (i) Representation Details**

Representation Texts: Introduction

Powys County Council has prepared its deposit proposals document for the Powys Local Development Plan (LDP) which upon adoption will replace the Powys Unitary Development Plan and will be the basis for decisions on land use planning for all of Powys. This deposit proposals document includes the Authority's vision for housing site allocations and we hereby wish to make comment about such site allocations.

Candidate Site 452 was proposed during the call for Candidate Sites in April 2011 and has subsequently failed to be allocated as a housing site within the village of Forden. We hereby appeal this non-allocation and are of the opinion that the Local Development Plan fails on the ground of soundness.

Soundness of Local Development Plan

The Local Development Plan fails on the ground of soundness criteria CE2. The site allocations do not realistically nor appropriately consider the relevant alternatives nor are they allocated on a robust or credible evidence Base. Site allocations have not been considered with consistent weighting to the sustainable development aims.

Candidate Site 452

Candidate Site 452 adjoins the current development boundary for Forden. The site would form a logistical and proportionate natural extension to the village. The site represents sustainable development within a sustainable village and it is a deliverable site; there are no constraints and the site is capable of development within the next plan period.

The Site Appraisal Report submitted with the Candidate Site Proposal Form concluded that the site was suitable to a residential or community site allocation on the grounds of settlement; delivery; site quality; and the wider environment; public transport and access; environmental sustainability; well being and; sustainability.

Candidate Site 452 is an appropriate site for housing in Forden. The LDP designates Forden as a "large village"™ on the basis it has a good range of services and community amenities; the village is therefore recognized as a sustainable location.

â€f  
Housing Allocation, Forden

There are two site allocations for housing in Forden. However, Candidate Site 452 appears to form the natural expansion of future housing in Forden as it is located well in respect of the village school and sports facilities.

Source:	Website registration	Type:	Objection	Mode:	Written	Status:	Maintained

Candidate Site Suitability

Candidate Site 452 has good road frontage. The site owner has control of the roadside boundary and can therefore provide satisfactory highway access.

Overall, Site 452 provides a huge amount of benefit to the local community of Forden, the housing development would merge Forden with South Forden which is currently identified as a rural settlement.

The Candidate Site Report stated that all mains services were in place close by and the site could be easily connected to current services and infrastructure.

The site is a deliverable site and the site owner would be willing to enter into a planning obligation to reduce the time limits on development to deliver the site in a shorter time period and to provide the required local needs housing numbers and community contributions.

Conclusion

Candidate Site 452 therefore fulfils the LDP Sustainable Development Aims. The site is a suitable residential site allocation on the grounds of settlement; delivery; site quality and the wider environment; public transport and access; environmental sustainability; well being and; sustainability. The site is an appropriate site for a housing allocation in Forden and its range of services and community amenities; a development of this size would not be limited by any environmental and infrastructure capacity constraints. We would welcome a site visit to discuss the site and proposed housing allocation. Candidate site 452 is therefore preferable to all the other site allocations and the Local Development Plan should be amended accordingly.

*Question Representation Texts*

**Question: 3d. (i) Representation Details**

Representation Texts: The Land at Four Crosses, LLanymynech, Powys - site 1073 (site plan attached) has previously been submitted to Powys County Council. The site is assessed in Appendix 6 of the Sustainability Appraisal Report and a number of constraints have been identified which have resulted in the site not being proposed as an allocation. These constraints consist of the requirement for significant highway infrastructure improvements; for improvements to the Sarn Wen Brook; for a Flood Consequences Assessment; and as a result of the site being the outside a key boundary feature, namely Sarn Wen Brook. These issues are being addressed through the current planning application and as a result of this, the application will provide appropriate mitigation to address any issues that exist, such that the development of this site will represent sustainable development. However, Policy H1 as proposed does not facilitate such sustainable development opportunities as they lie outside of the proposed Development Boundary.

Furthermore, the Joint Housing Land Availability Study 2014 (February 2015) identifies that only a 1.5 year land supply exists at present and as a result it examines ways to increase supply such that the required 5 year supply will be able to be demonstrated in the future. In such a context, all opportunities for sustainable development, including those adjacent to the Development Boundaries should be explored as these provide for very significant benefits to meet the identified housing needs.

Question Representation Texts

**Question: 3d. (i) Representation Details**

Representation Texts: Introduction

Powys County Council has prepared its deposit proposals document for the Powys Local Development Plan (LDP) which upon adoption will replace the Powys Unitary Development Plan and will be the basis for decisions on land use planning for all of Powys. This deposit proposals document includes the Authority's vision for housing site allocations and we hereby wish to make comment about such site allocations.

Candidate Site 360 was proposed during the call for Candidate Sites in April 2011 and has subsequently failed to be allocated as a housing site within the large village of Four Crosses. We hereby appeal this non-allocation and are of the opinion that the Local Development Plan fails on the ground of soundness.

Soundness of Local Development Plan

The Local Development Plan fails on the ground of soundness criteria CE2. The site allocations do not realistically nor appropriately consider the relevant alternatives nor are they allocated on a robust or credible evidence Base. Site allocations have not been considered with consistent weighting to the sustainable development aims, with specific reference to energy and climate (1) and (2); housing (1); and access (2).

Candidate Site 360

Candidate Site 360 lies very central to the village of Four Crosses, with existing housing developments located immediately to the east and to the north of the site, together with employment areas immediately to the west of the site. The site would form a logistical and proportionate extension to the village. The site represents sustainable development within a sustainable village and it is a deliverable site; there are no constraints and the site is capable of development within the next plan period.

The Site Appraisal Report submitted with the Candidate Site Proposal Form concluded that the site was suitable to a residential site allocation on the grounds of settlement; delivery; site quality; and the wider environment; public transport and access; environmental sustainability; well being and; sustainability.

Candidate Site 360 is an appropriate site for a housing allocation in Four Crosses. The LDP designates Four Crosses as a 'large village' on the basis it has a good range of services and community amenities; the village is therefore recognized as a sustainable location.

Housing Allocation P18 HA1, Four Crosses

LDP housing allocation Site P18 HA1 is set on the northern edge of the village of Four Crosses, thereby any development would extend the village to the north. The site is not situated within the heart of the village and would therefore not serve a more central benefit to the village as a whole should any open village space be developed on the site. The majority of the existing housing (approximately 70%) in Four Crosses are located near to Candidate Site No. 360, and would serve to be in a more central location as opposed to

Status Maintained

Site P18 HA1. It is questioned whether the existing access to the housing developments near to P18 HA1 are of a highway standard to cater for more housing in the future without out any major road improvement works. If road improvement works are required then this will depend on third party ownership agreement.

Candidate Site 360 forms the natural expansion of future housing in Four Crosses with the rear boundary line following a natural flow between the developments on either side of the site.

Candidate Site Suitability

Candidate Site 360 has road frontage. There is a road access onto City Lane to the east of this site, this lane provides access for the existing housing developments to the east of site 360. The highway officer has commented that the existing access onto City Lane is of a poor quality and has a poor approach onto the county highway. Having met with Powys Highways on site it was acknowledged that there would be a huge benefit of creating a new estate road into Site 360, the scheme would include the widening and improvement of the City Lane access, furthermore the introduction of a roundabout on the highway as part of a development scheme would improve the City Lane and Plas Foxen crossroads junction, plus carriageway widening and footway provisions. The site owner has control of the roadside boundary and can therefore provide satisfactory highway access. The site is within 5 minutes walk of the key village services and facilities which provide for day-to-day needs.

With Site 360 located central to the existing housing developments of Four Crosses, the applicant would be acceptable to enter into a legal agreement to provide land within Site 360 for community use, such as a play ground area, together with ecological benefits such as a small wooded area and a pond. The applicant is more than happy to provide a percentage of local needs housing within the site. With the site being located immediately adjacent to the existing employment site of Four Crosses, the applicant would be more than happy to provide a proportion of the site for employment use as an extension to the existing employment lane.

Overall, Site 360 provides a huge amount of benefit to the local community of Four Crosses, the housing would adjacent to existing housing in the village, the existing poor access to both City Lane and Plas Foxen would be greatly improved as part of the scheme, there would local needs dwellings provided as part of the scheme, and there would be an area where the existing employment land of Four Crosses to extend.

The Candidate Site Report stated that all mains services were in place close by and the site could be easily connected to current services and infrastructure.

The site is a deliverable site and the site owner would be willing to enter into a planning obligation to reduce the time limits on development to deliver the site in a shorter time period.

Conclusion

Candidate Site 360 therefore fulfils the LDP Sustainable Development Aims. The site is a suitable residential site allocation on the grounds of settlement; delivery; site quality and the wider environment; public transport and access; environmental sustainability; well being and; sustainability. The site is an appropriate site for a housing allocation in Four Crosses and its range of services and community amenities; a development of this size would not be limited by any environmental and infrastructure capacity constraints. We would welcome a site visit to discuss the site and proposed housing allocation. Candidate site 360 is therefore preferable to site allocation Site P18 HA1 and the Local Development Plan should be amended accordingly.

Candidate Site 360 therefore fulfils the LDP Sustainable Development Aims. The site is a suitable residential site allocation on the grounds of settlement; delivery; site quality and the wider environment; public transport and access; environmental sustainability; well being and; sustainability. The site is an appropriate site for a housing allocation in Four Crosses and its range of services and community amenities; a development of this size would not be limited by any environmental and infrastructure capacity constraints. We would welcome a site visit to discuss the site and proposed housing allocation. Candidate site 360 is therefore preferable to site allocation Site P18 HA1 and the Local Development Plan should be amended accordingly.

Question Representation Texts

**Question: 3d. (i) Representation Details**

Representation Texts: Objection of Gwernyfed Community Council to the allocation for housing of the site at Treble Hill, Glasbury, HA1, Map Glasbury P 19

It would be a mistake to make this site the subject of a Housing Allocation.

There is no objection to the land being within the development boundary. But It is not suitable for allocation for 9 houses or for any number that would attract Allocation status.

The site abuts listed buildings, Treble Hill House and the recently converted Treble Hill Stables. It is essential to the preservation of the historic environment of these buildings that they retain sufficient curtilage. A limit on the amount of any new building is of the essence in safeguarding the character of the place.

The existing stone wall bounding the western part of the site with its associated hedging gives a country context to the relatively newly built Dan-y-Bryn estate opposite. It is important that something of the historic character of the lane (C0072) to the south of the site be preserved. The "highway improvement" associated with the Allocation would likely be damaging to that character. No new access should be opened up onto the road: access to any new buildings would need to use the existing access to the Stables.

As background, it should be borne in mind that the housing stock within this development line has In recent years grown substantially, so that newer houses far outnumber their predecessors. Of these newer houses, some 40 are In estates (defined here as developments originally planned for 5 or more dwellings):

- Dan-y-Bryn 18
- River View 8
- Twin Oaks 8 (plus 2 adjacent)
- Dan-y-Lan 4 (plus one or two to come)

There is no good case for looking for the development of another estate within the relevant development line.

Question Representation Texts

**Question: 3d. (i) Representation Details**

Representation Texts: Objection of Gwernyfed Community Council to the proposed development line where it includes land to the south east of the cross-roads on the C0072 — Glasbury, Map Glasbury P 19

This land by the cross-roads has been included by taking the line along the back (south) of the bungalow to the east and extending it to the C0072. This is to ignore or give insufficient weight to what is understood to have been the exceptional permission for the building of that bungalow.

Development on the field which includes the corner under discussion was opposed by Gwernyfed CC on a number of grounds including this: "This is, literally, a high profile site, a green field rising above the village to the sky-line. It is seen as an invaluable visual amenity, which must be preserved. It is the natural beginning of the countryside beyond the village and should remain so."

While clearly the proposed development line should preserve the larger part of the field, it threatens to permit an unwelcome intrusion of building into the countryside and an erosion of that visual amenity. The line should be drawn to exclude the field altogether.

Additional Supporting Evidence:

A) Map showing area to be excluded from within the development boundary for Glasbury.

Council Response: 0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: Remove this section of field [part of candidate site 27] from the development area for Glasbury and adjust position of development boundary.

*Question Representation Texts*

**Question: 3d. (i) Representation Details**

Representation Texts: We seek the inclusion of that parcel of land [Candidate site No 501] outlined in red for residential development.

At present the subject parcel of land has been excluded from the draft LDP. It is considered that this parcel of land should be included within the LDP as it is clearly deliverable and meets planning policy.

It makes little sense for such a site to be excluded from LDP when there is a definite need for housing of all types to be constructed in the locality.

Additional Evidence Submitted:

A) Plan of proposed additional site outlined in red

Council Response:

0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: We seek the inclusion of that parcel of land outlined in red in the plan for residential development and situated in the village of Glasbury on Wye.

We believe that the stated parcel of land is vital in meeting defined need as stated within the projected housing requirements contained within the housing needs register for both full market value and affordable dwellings. The need for additional dwellings is clearly outlined within Local Housing Market Assessment as provided by the Affordable Housing Officer for the Authority.

We affirm that the site should be included within the plan for the following reasons:-

A) The proposed site is deliverable within the plan period and therefore should be included within the plan. There are sites contained within the plan that have been included within previous development plans that are clearly not deliverable. Therefore, sites that can be developed within the plan period should be included within the plan.

B) There is a small part of the site presently covered with woodland. This woodland would be protected and enhanced as part of any developments for future generations.

C) Part of the site also includes a 'right of way' which will be protected and improved as part of the development scheme.

D) The access to the site and safety of the adjacent minor road will be improved as part of the scheme. The improvement undertaken will be similar to that of the adjacent housing development site. This improvement will also benefit the highway with the provision of inclusive visibility and passing bays.

E) The proposed site is screened from the highway and other dwellings by the presence of a thick tree line. Therefore the impact of the proposed development site on the visual

Source: Post or in person Type: Objection Mode Oral (Examination) Status Maintained

---

landscape will be minimised.

F) The proposed site is adjacent to the Unitary Development Plan boundary and would not present an intrusion into the open countryside. The site would present a logical 'rounding off' of the development boundary.

G) The sustainability appraisal of the site was undertaken during the previous submission and has therefore not been provided again.

Summary:

We are certain that the site would strengthen the Local Development Plan by providing housing for all market sectors where there is a clearly defined need. This strengthened by the fact that the site is deliverable within the plan period and would be suitable for all housing types.

The Local Development Plan can only prove to be sound if the proposed development sites contained within are proven to be deliverable. As this site is clearly deliverable as it is being proposed by the owner and generally meets the site selection criteria, it should be included within the LDP. The present inclusion of other sites within the development plan that are not deliverable does not provide for a sound plan.

*Question Representation Texts*

**Question: 3d. (i) Representation Details**

Representation Texts: Policy H1 is objected to on the basis of the reduced housing land target (see separate form). The non-inclusion of the land to the east of the A 438, Glasbury and its omission from the site schedule in Appendix 1 – Settlement Allocations. It is noted that the Policy also seeks to maintain a 5 year supply of housing. For reasons explained in the accompanying Submission Document we consider that unless a sufficient range and choice of sites is provided, Powys County Council will struggle to achieve a 5 year land supply both on adoption and throughout the plan period.

The first part of the policy refers to development in Towns and Large Villages. We consider that development of the site in question would be compatible with the requirement as it would form a logical extension to the settlement.

The site proposed could potentially deliver some 40 dwellings, allowing for site constraints, in accordance with Policy H3 which provides for average densities of 25 dwellings per hectare on sites in towns and large villages. It would also aim to be compatible with Policy H2 - Housing Delivery.

ADDITIONAL SUPPORTING EVIDENCE:

- A) Submission Document
- B) Proposed Site Plan
- C) SA Assessment
- D) Compatibility with Environmental Report assessment

*Question Representation Texts*

**Question: 3d. (i) Representation Details**

Representation Texts: Deposit of Powys Local Development Plan – June 2015

Guilsfield Community Council monthly meeting was held Monday 22nd June 2015 and The Powys LDP – June 2015 was an Agenda item for discussion/consideration.

Members had observed the revised Plan and the Chairman summarised changes to the Deposit for Guilsfield to the meeting -

- The Deposit LDP issued last year proposed one main new housing site at Celyn Lane Guilsfield and this was referenced in the Guilsfield Inset Map at P20 HA1 and comprised of candidate sites reference: 1062 and 1067 – proposed 30 homes.

- Consultation feedback following Deposit alerted Powys CC to concerns of natural Resources Wales regarding potential impact of this site on the Granllyn SAC and the newt population and a risk that development of the site could have potential to result in Likely Significant Effect to the Special Area of Conservation (SAC) in breach of Habitat Regulations. Further investigations by Council's ecologist agreed with this and considered to be a serious issue. It was therefore decided to avoid development of the south east parcel of land in HA1 (candidate site 1067). In the revised Deposit Plan, Site P20 HA1 now consists of only the north west parcel (part candidate site 1062) and is proposed for 19 dwellings. The improved link road is still required and the land allocation is dependent on the proposed highway improvements which will alleviate current access problems at Celyn Lane – development of revised site HA1 will still need to give full consideration to surveys/mitigation/enhancement measures in respect of the Granllyn great crested newt population and will be controlled at the more detailed planning stages.

- Due to loss of one of the parcels of land and reduction in proposed dwellings, a substitute site required to ensure Council plan for enough housing to meet Guilsfield needs.

Council members discussed the matter in detail and require the following comments to be considered/noted by Planning Services –

Candidate site 1067 –

- The extreme disappointment of the Community Council that Site 1067 is being withdrawn.

- Members consider that Powys CC should challenge the concerns/decision of NRW and not abandon the site without in-depth enquires. Celyn Lane as it stands is a major problem and development of both sites (1067 & 1062) would necessitate worthwhile highway improvements and be extremely beneficial in alleviating current access problems in Celyn Lane. The two sites are located with potential easy access connection to the present sewage system.

The Community Council considers these comments to be very appropriate and asks that they are noted by Powys CC Planning Services in consideration of the revised Plan.

*Question*      *Representation Texts*

**Question: 3d. (i) Representation Details**

Representation Texts: Deposit of Powys Local Development Plan – June 2015

Guilsfield Community Council monthly meeting was held Monday 22nd June 2015 and The Powys LDP – June 2015 was an Agenda item for discussion/consideration.

Members had observed the revised Plan and the Chairman summarised changes to the Deposit for Guilsfield to the meeting -

•Candidate site 52 (Land to East of Groes Lwyd Guilsfield) has been determined as most suitable with a new allocation on part of this site – Ref: P20 HA2 and is being proposed for the second Deposit to provide 20 dwellings.

**467.V2** 06/07/2015  Summary: Does not support Allocation P20 HA2 - Guilsfield

Source: Email Type: Objection Mode Written Status Maintained

---

To reiterate comments in respect of Candidate site 52 –

- Whilst part development of this site (nearest Guilsfield village) could be acceptable, on original proposals the Community Council by majority vote, opposed this site as concerns expressed the development would join the two communities and be detrimental on the visual impact and individual identity. Concerns are still strong that this may still develop from this revised proposal.

- If the development should proceed, it will be essential for traffic calming measures and speed limit on B4392 as entry/exit to site could be dangerous without restrictions in place

- Some affordable housing is included.

- Concerns in respect of sewage and the connection of additional properties into the sewage system as it stands at the moment. Council members, being aware that the main sewage pipe which runs through the back gardens of properties between Rhoslan and Coed y Glyn, is a 4" pipe – have concerns that this may not be adequate – Would a 6" pipe be required and necessitate the moving onto the main road.

- A large bio-system would not be in the interest of the village.

The Community Council considers these comments to be very appropriate and asks that they are noted by Powys CC Planning Services in consideration of the revised Plan.

Representation Texts: We have been in discussions with the landowner and agents regarding flood risk on site. Hydraulic modelling has been carried out to establish flood risk at the site. This modelling has then informed an initial assessment to demonstrate that consequences of flooding can be acceptably managed. We note that further text has been added to state that any further / fresh planning application at this site should provide a FCA informed by the latest flood modelling.

Question Representation Texts

**Question: 3d. (i) Representation Details**

Representation Texts: Introduction

Powys County Council has prepared its deposit proposals document for the Powys Local Development Plan (LDP) which upon adoption will replace the Powys Unitary Development Plan and will be the basis for decisions on land use planning for all of Powys. This deposit proposals document includes the Authority's vision for housing site allocations and we hereby wish to make comment about such site allocations.

Candidate Site 339 was proposed during the call for Candidate Sites in April 2011 and has subsequently failed to be allocated as a housing site within the village of Guilsfield. We hereby appeal this non-allocation and are of the opinion that the Local Development Plan fails on the ground of soundness.

Soundness of Local Development Plan

The Local Development Plan fails on the ground of soundness criteria CE2. The site allocations do not realistically nor appropriately consider the relevant alternatives nor are they allocated on a robust or credible evidence Base. Site allocations have not been considered with consistent weighting to the sustainable development aims.

Candidate Site 339

Candidate Site 339 lies adjacent to an existing housing site on Oldcastle Avenue. The site would form a logistical and proportionate natural extension to the village. The site represents sustainable development within a sustainable village and it is a deliverable site; there are no constraints and the site is capable of development within the next plan period.

The Site Appraisal Report submitted with the Candidate Site Proposal Form concluded that the site was suitable to a residential or community site allocation on the grounds of settlement; delivery; site quality; and the wider environment; public transport and access; environmental sustainability; well being and; sustainability.

Candidate Site 339 is an appropriate site for housing and/ or a community facility such as a Doctors Surgery or Childcare facility allocation in Guilsfield. The LDP designates Guilsfield as a "large village" on the basis it has a good range of services and community amenities; the village is therefore recognized as a sustainable location.

Housing Allocation, Guilsfield

There are three site allocations for housing in Guilsfield. However, Candidate Site 339 appears to form the natural expansion of future housing in Guilsfield as it lies adjacent to an existing housing development and has good road access.

Candidate Site Suitability

by: Representation No

Filtered to show: (all of) Stage=V; Status=M

Rep'n/Para/Policy	AccessnNo	DateLodgd	Late?	Status	Modified	Summary	
6267.V4		16/07/2015	<input type="checkbox"/>			Summary: Guilsfield - Alternative Site	
Source:	Website registration	Type:	Objection	Mode:	Written	Status:	Maintained

Candidate Site 339 has road access. The site owner has control of the roadside boundary and can therefore provide satisfactory highway access.

Overall, Site 339 provides a huge amount of benefit to the local community of Guilsfield, the housing would back onto existing houses and bungalows in Oldcastle Avenue.

The Candidate Site Report stated that all mains services were in place close by and the site could be easily connected to current services and infrastructure.

The site is a deliverable site and the site owner would be willing to enter into a planning obligation to reduce the time limits on development to deliver the site in a shorter time period and to provide the required local needs housing numbers and community contributions.

Conclusion

Candidate Site 339 therefore fulfils the LDP Sustainable Development Aims. The site is a suitable residential site allocation on the grounds of settlement; delivery; site quality and the wider environment; public transport and access; environmental sustainability; well being and; sustainability. The site is an appropriate site for a housing allocation in Guilsfield and its range of services and community amenities; a development of this size would not be limited by any environmental and infrastructure capacity constraints. We would welcome a site visit to discuss the site and proposed housing allocation. Candidate site 339 is therefore preferable to all the other site allocations and the Local Development Plan should be amended accordingly.

*Question Representation Texts*

**Question: 3d. (i) Representation Details**

Representation Texts: Firstly, the National Park Authority would like to congratulate the Powys LDP team for the efforts made to address the significant concerns raised against the first Deposit LDP (2014). It is acknowledged that the level of work undertaken to achieve the revised Deposit is substantial and the team is to be congratulated. We are extremely encouraged to see the progress being made by yourselves to move towards an adopted plan and the certainty this will bring in relation to the future development in Powys. Undoubtedly this will be of benefit to the region and can only be supported by the NPA.  
Notwithstanding the above, we would like to draw your attention to the following issues we have identified with the deposit draft LDP (2015) and its compliance with National Planning Policy. We raise these concerns from our recent experiences of the Examination process and we hope what follows will benefit you in the production of a sound LDP. These are not objections per se, but we urge you address the points in your lead up to submission in the interests of soundness.

Please note that these are officer comments, which will be put before Members at the next available opportunity. Therefore they may be subject to amendment following NPA recommendation. We will advise you of any change accordingly.

8. Hay on Wye Allocation

We support the allocation of P21 MUA1 in Hay on Wye for mixed use. This will provide employment land and housing to support the functioning of the Key Settlement of Hay on Wye. However, as this site provides development to meet NPA objectives, it is essential that again, a joint development brief is developed for the site (in accordance with paragraph 7.2.1 of BBNPA LDP (2007-2022) to ensure the site contributes joint policy aspirations. Again I would suggest that such a brief would need to be agreed by both PCC and the NPA.

9. Boundary

I refer you to correspondence sent to PCC in February of this year, setting out that the Boundary of the National Park has been updated to provide accuracy improvements in relation to the written statement of designation. The revised boundary was provided to you at that time in GIS format. I note that your Proposals Map is utilising the outdated version of the Boundary. This mostly affects land in and around the Caer-lan and Abercraf area of Powys. However you are advised to undertake your own checks against the updated boundary. If you require further copies of the GIS boundary files please contact shaun.lewis@becaons-npa.gov.uk for assistance.

*Question Representation Texts*

**Question: 3d. (i) Representation Details**

Representation Texts: A separate objection is made by AB Planning in relation to Policy H1 regarding the need for additional housing land to be provided within the Plan Period, which provides the strategic policy context for this site specific objection.

In addition, it is also maintained within the LDP that the primary location for accommodating development, including housing provision should be within identified towns. Hay on Wye is identified within the Plan's settlement hierarchy as a 'Town' albeit that the majority of the urban area of the settlement is within the Brecon Beacons National Park. The allocation of housing land (Policy SP5) within the Adopted Brecon Beacons National Park Local Development Plan (December 2013) is testament to the role and function of Hay on Wye as an important service centre, able to accommodate a range of development proposals, including housing provision.

The settlement of Hay on Wye comprises a sustainable settlement, with significant service provision including housing, retail, education and additional essential services available within the immediate settlement and community. Notwithstanding the town itself sits outside the planning area of Powys CC, the boundary between the two planning authorities has now become largely indistinguishable along Gypsy Castle Lane. This situation is much in evidence with the recent successful expansion of the UK's largest second hand and historic book retailer at Hay on Wye Book Sellers.

The settlement includes multiple employment facilities including restaurants and 2 leisure areas and recreation fields. The community also incorporates a Primary School and open-air market. As such, the consideration of the settlement is appropriate within the Deposit Local Plan and allows for higher proportions of housing delivery, reinforced by its location along primary growth corridor as recognised within the Wales Spatial Plan.

The proposed Mixed Use Allocation on Land at Gypsy Castle Lane, Hay on Wye (MUA1) includes an allocation of 1.8 hectares of residential development within a wider mixed use area of 4.2 hectares. This provides a proposed number of 45 residential units.

As an identified 'Town' within the Deposit Plan, it is relevant to note the policy requirement regarding the density of housing development to be provided under Policy H3. For housing development within 'Towns' such as Hay on Wye' the required density of development is stated as 25+ per hectare, noting that this is based on the premise that, 'all housing development should make the most efficient and efficient use of land.'

The allocation of 1.8 hectares to accommodate a total of 45 residential units therefore provides a housing density of 25 dwellings per hectare, but no greater density.

The proposed increase in housing density and extent presented as part of this objection provides an opportunity to increase the ratio of housing development within the proposed mixed use site allocation without increasing the size of the housing development. This would provide the following benefits:

- Forms part of existing mixed use allocation within the Deposit Plan and would be attached to areas of employment and residential growth.
- Adjoins a key public transport network with immediate links to Talgarth and Brecon.
- Accessed off the primary road network (to be provided in order to facilitate the proposed site allocation).

**Appendix 1 - Deposit LDP Reps & Responses by Refpoint, Cabinet 15-12-15**

by: Representation No

Filtered to show: (all of) Stage=V; Status=M

Rep'n/Para/Policy	AccessnNo	DateLodgd	Late?	Status	Modified	Summary
5788.V2		20/07/2015	<input type="checkbox"/>			Summary: Amend Site P21 MUA1 - Hay On Wye
Source: Email			Type: Objection			Mode Oral (Examination) Status Maintained

At the same time, promotion of the proposed site allocation for an increased housing density, would meet the core aspects of the Plan's urban sustainability objectives. It is therefore relevant to note the site location within walking distance of a significant retail centre, a school, large medical centre (including dentists), livestock market and sports clubs, along with a business park and several industrial estates/areas and additional employment facilities. There are also multiple restaurants, pubs and accommodation.

As a result of the above and the availability of infrastructure already part-implemented, the proposed site allocation would ensure the efficient and sustainable resolution of existing adverse highway and related amenity and highway safety issues/impacts and traffic congestion. A failure to ensure that proposed residential development is maximised in such locations would be contrary to the proposed LDP Strategy and the Wales Spatial Plan.

The proposed increase in housing density within the housing element of the site's mixed use allocation will have no additional impacts upon landscape beyond that already accommodated by the inclusion of the allocation of MUA1 within the Deposit Plan. The proposed site area as currently allocated would remain the same.

Having regard to the LPA's failure to provide sufficient housing land and thereby satisfactorily address the policy context set out within Policy H1, the increased housing development proposed will allow the current housing short-fall to be met, thereby providing a mechanism without which the Plan would be considered 'Unsound'. As set-out elsewhere in this submission the following tests of Soundness will be met by the inclusion of the proposed change:

- C2
- C3
- CE1
- CE2

In particular the increased housing density and extent within the proposed site allocation would provide an acceptable housing development in a sustainable location while ensuring the Development and management Plan of the BBNPA area are appropriately accommodated within the Powys LDP.

The spatial arrangements resulting from the increased housing density and extent can be achieved to ensure that the amenity of the respective elements of the proposed site allocation can be delivered to a high standard and achieve a high quality development. These arrangements will also ensure the provision of an effective landscaping scheme, including appropriate buffers to the site boundary, at the entrance to the town and elsewhere within the proposed development.

Council Response: 0

**Question: 3d. (ii) Desired changes to Document**

Question Representation Texts

**Question: 3d. (i) Representation Details**

Representation Texts: I write with regard to MUA1 planned inclusion for Hay onWye. I do not think consideration has been given to the fact that this town falls victim to 3 LDP's ; that of BBNPA, Hereford and Powys CC. Also I feel that there is sufficient brown field sites to accommodate any new required development in the town without building on green fields. The position of this development with completely change the entrance to the town stretching boundaries and making Hay a town of ribbon development. There is insufficient jobs to accommodate new residents, especially as BBNPA plan to build 80 new homes with no allocation for jobs. I question how our local school will cope and already appointments at our medical centre are like gold dust. Access will be an issue and this site would require residents to use a vehicle to travel to shops, doctors and to transport children to school.

Question Representation Texts

**Question: 3d. (i) Representation Details**

Representation Texts: C1, C4 and CE4 - Hay-on-Wye is impacted on not just by Powys CC but also and predominantly by BBNPA, which is the responsible authority for ALL of Hay-on-Wye (the proposed site set out in this plan falls just outside the town's limits). At the north end of the town the BBNPA boundary adjoins Herefordshire and therefore another authority's planning department potential site for development. It is not clear from this document that due consideration has been given to the potential for development by other authorities in this area.

Since the development of Gypsy Castle Estate, there have been further developments moving out from the centre of the town through Wyeside Gardens, Warren Close, followed closely by The Meadows. Another development linked on further again will have the effect of its residents being some considerable way from the key facilities of the town, such as shops, library, post office and doctor's surgery. Public transport arrangements within the town are non-existent and other than local taxis residents needing such facilities would be reliant on the volunteers of Dial a Ride or would need to encourage bus drivers to drop them off near their development (once every few hours when a bus comes through). Bus services on a Sunday are very restricted, with route 39 being funded by voluntary contributions as the service was due to be withdrawn completely.

The primary school is due to be redeveloped to accommodate more children, many of whom are designed to be taken up by pupils from surrounding villages, such as Llanigon, where schools have recently been closed in anticipation of this development. It is not clear whether the redeveloped school would have the infrastructure to accommodate the potential from this new development and any others that the other authorities may consider granting.

Hay-on-Wye does not have a community centre and it is not clear whether one will definitely be included in the redeveloped school or elsewhere in the town. The lack of a centre now has had a major impact on the town and its ability to provide a venue for community clubs.

The leisure facilities consist of football pitches, tennis courts and a bowling green. At present many leisure activities have to be pursued either at Gwernyfed High School or Brecon Leisure Centre as Hay does not have the infrastructure to provide such.

The area of the town outlined has been subject to flood in the past. While the document recognises that the infrastructure may need attention, any such work will need to take into consideration that BBNPA could develop land within the town limits that would put extra strain on services provided.

I'm not sure when this report was produced but the Settlement Site Summary refers to Brecon Pharmaceuticals. PCI (for that is what it is called) has not been Brecon Pharmaceuticals for some years, giving rise to concern about the currency of this report.

Council Response:

0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: I would like to see robust arguments that demonstrate that work has been carried out to allay the concerns set out here. While I appreciate this is a fairly high level document, the wording set out here provides no level of comfort that allows me to support the plan. Evidence of how the sustainability report was compiled would be invaluable in being able to judge the validity of its findings, which at present I don't recognise. Clear acknowledgement is required of the need to work with other authorities to ensure a sympathetic development of this popular tourist town.

*Question Representation Texts*

**Question: Council Response**

Representation Texts: This representation is considered to be consistent with and in support of the DLDP Strategy and Policies. No change is therefore considered necessary to ensure that the Plan is sound.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: The inclusion of the site for development within the Plan is supported as the requirement of the Plan being sound would not be achievable without its inclusion both in terms of the objective of Policy H1 and achieving the appropriate distribution of development throughout the Local Development Plan area.

Council Response: 0

Question Representation Texts

**Question: Council Response**

Representation Texts: These comments are noted, however no changes are considered necessary due to the following reasons: 1) The Council considers that the proposed settlement hierarchy is sound, based on a robust methodology with levels of growth and site allocations supported by a wide range of supporting evidence. The Council maintains that the tiers of settlements identified accurately reflect their role, function and overall level of sustainability. The Council consider that the distribution of housing across the Settlement Hierarchy is based on a sound rationale which supports the delivery of the LDP strategy and the longer term viability of settlements considered capable of supporting sustainable growth; 2) Through the LDP candidate site assessment process the Council has sought to ensure that site allocations within the LDP are free from major constraints on developments, and has actively engaged with the main infrastructure providers. Welsh Water have advised in respect of this proposed allocate site that a water supply can be provided to serve this site and that a water main crosses the site, and have also confirmed that the local sewerage network can accommodate foul flows from the proposed development. It is advised that Llandrindod Wells Wastewater Treatment Works (WwTW) can accommodate the foul flows from this proposed development site. 3) All the sites that have been allocated have been discussed in detail with the Council's Highway Engineers, this means that all of the allocations are deliverable without any major highway constraints. Any highway issues that need to be addressed at the planning application stage are listed in Appendix 1 of the Written Statement. At the planning application stage all developments are required to demonstrate that adequate and safe highway access is to be provided for all users, and that it is designed to meet the Council's highway design criteria. The Council shall also seek to ensure that future development mitigates any possible adverse impacts associated with an increase in traffic. 4) The impact of the development on property values is not a material planning consideration.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: This is a group representation made on behalf of 6 local residents.

We the residents of Crossways Court, Howey, Llandrindod Wells, are writing to express our considered concerns regarding the Proposed development of adjacent land to Crossways Court, Howey (P22 HA1).

We list our considerable concerns as follows:

We query the very need for a further 30 homes in Howey. There are several areas for concern in this respect, these are listed as follows:

We consider that there is no demand for a development of this size. This we would argue from a number of points, especially there are a number of properties in Howey, particularly, and in the surrounding areas that have been on the market for around a year or more. A fairly recent small development in Newbridge on Wye was unable to attract buyers initially, and some of the properties were subsequently rented.

We query the level of infrastructure that currently exists for the proposed development - we understand that there are serious underlying problems with the discharge sewage

system in the village of Howey, indeed only today (9th July 2015) has sewerage been found escaping from the underground pipe and flooding across the road behind our properties (see attached photos) the matter was reported and has apparently been dealt with. Surely a sizeable development to that proposed will only compound the problem? Further, from the electricity supply angle, in the month of July we are still experiencing power cuts.

It is well tabulated that there is no A&E in the nearest hospital in Llandrindod Wells, this facility is over 40 miles away!

The junction from the proposed development exists onto a narrow minor road, which to the left is extremely close to the oblique/quite dangerous junction with the A483 main road, with a 50 mph speed limit: and to the right there is the blind summit of the railway bridge. The increased traffic that this proposed development will cause, including associated services, is a particular concern.

We understand that there will be a 10 metre buffer between the adjacent railway line and the proposed development, with the size available further limited by the presence of existing overhead power cables. All of this gives concern that the available area for the development of the proposed 30 homes will lead to greater density than exists at present.

Employment in the area does not, we believe, warrant the need for any immediate or substantial increase in local housing. Most local people are employed in retail and hotels. Indeed, a major local employer, Powys County Council, are having to make cutbacks.

We firmly believe that the proposed development in whatever shape or form will have a negative effect on the current market values of our existing properties. We would expect, at the very least, to be compensated by Powys County Council should the development proceed.

In conclusion it has been reported in recent times that the Welsh Assembly Government have said that the critical areas where there is a demand for additional housing is in the south of the country, i.e. Cardiff, Swansea, Newport and the South Wales Valleys. They (the WAG) have added that the land currently available for housing in the rural areas far outweighs demand for the foreseeable future.

*Question Representation Texts*

**Question: Council Response**

Representation Texts: Thank you for your representation concerning the LDP growth strategy and proposed land allocations in Knighton. This representation is considered to be in support of the Deposit Local Development Plan. No changes are therefore required.

Council Response:

0

**Question: 3d. (i) Representation Details**

Representation Texts: I refer to the current public exhibition of the Draft Powys Local Development Plan. As long-term residents of the Knighton community, we have contributed to and fully support the direction of the Draft Powys Local Development Plan for the following reasons.  
 Powys - Central growth corridor  
 The proposed central growth corridor running north to south through the centre of Powys is an important spatial planning concept that will define the future structure and socio-economic growth of Powys and is fully supported. This proposed central growth corridor will enable a rationalisation and concentration of economic activity and growth, infrastructure development and and increased provision of services. To be successful, it is critical that the implementation of this corridor is coordinated and integrated with similar initiatives in adjoining counties, consistent with the intent of the Spatial Plan for Wales. The proposed growth of Powys to be distributed in accordance with the hierarchy of settlements is also supported.  
 This strategy will inevitably lead to greater growth allocations (dwellings and jobs) directed to settlements that form part of, or are closely related to the central growth corridor. The corollary of this central growth corridor strategy is that small towns that do not form part of the corridor, are likely to have reduced growth in both jobs and demand for housing. For towns located outside the corridor, the reduced growth prospects will present challenges for locally sustainable economic and population growth. The Preferred Strategy proposed that the LDP provide 7,700 dwellings and 42 hectares of employment land up to 2026 is supported.  
 Knighton in context of the central growth corridor  
 Knighton is a small town located in the east of the county and on the border with England and does not form part of the central growth corridor. The town has an estimated residential population of 3,000 persons, which equates to 2.4% of the Powys population of 126,247 persons.  
 In 2008, Powys demonstrated an average household size 2.27 persons per household. Due to demographic change during the life of the plan, it is estimated that this will reduce to 2.02 persons per household in 2033.

*Rep'n/Para/Policy AccessnNo DateLodgd Late? Status Modified Summary*

**5960.V1** 20/07/2015  Summary: Knighton - Support for approach taken in Knighton

Source: Email Type: Support Mode: Written Status: Maintained

According to the Draft LDP, the population of Knighton is projected to grow modestly by up to 10% for the year plan period to 2026. If achieved, this will equate to an increase in population of approximately 300 persons and a housing demand of between 132 and 148 dwellings. It is estimated that at an average density of 20 dwellings per hectare, the actual amount of land required within the town of Knighton for the new dwellings to service the projected population increase to 2026 is between 6.15 and 7.4 hectares.

In the context of Knighton, this quantum of housing land is not considered particularly significant. The real issue for the growth of Knighton to 2026 is where this housing land is best located to support and sustain the economic and social life of the town and minimise its environmental and built footprint. Knighton – Compact, contained and sustainable growth

At the start of the Draft LDP process, 11 possible Candidate Sites sites were originally identified for new development in or close to the town of Knighton. These 11 sites represented a total area of 32 hectares of potential development land, identified for a mix of future uses, but with the majority proposed for residential uses.

In its review of the Candidate Sites and the preparation of the policy framework of the Draft Powys LDP, Powys County Council quite rightly determined that these 11 sites would present a significant future oversupply of residential land.

In our previous submission to the Draft LDP, we argued that the majority of Knighton's projected housing supply of up to 7.5 hectares to 2026 could be delivered on one or two of the site closer to the town centre.

The Draft LDP strategy for the sustainable growth of Knighton now supports a similar approach. We also support this approach, as we think it represents the best strategy for the town's future as a compact, contained, walkable and sustainable community. We do not support the redevelopment of rural sites at the fringe of the town that do not meet Powys County Council's contemporary sustainability and environmental assessment criteria.

Question Representation Texts

**Question: 3d. (i) Representation Details**

Representation Texts: 35.47 Map 24B, Site P24 HA3, Presteigne Road, Knighton

Question 2 of the site appraisal in Appendix 5 of the Sustainability Report asks:  
Is the site free from flood risk or has it been proven that any flood risk can be acceptably managed?

To which Powys County Council has replied:

Impact: Very positive  
Magnitude: Moderate  
Probability: High  
Significance: Green 18 Significant

This assessment is based on an incorrect assumption about groundwater flood risk — that no information means low risk - which boosts the acceptability of this site for development.

On page 27 of its Strategic Flood Consequence Assessment Stage 1, Powys County Council concluded that:  
"there is no local information on historic groundwater flooding, which suggests that the risk of groundwater flooding in Powys is low."

It explains that groundwater flooding occurs when water levels in the ground rise above surface level, It is most likely to occur in areas underlain by permeable rocks, called aquifers. These can be extensive, regional aquifers, such as chalk or sandstone, or may be more local sand or river gravels in valley bottoms underlain by less permeable rocks.

If Powys County Council had consulted the British Geological Survey, which it did not, it would have been told that due to the geological conditions there is a high susceptibility to groundwater flooding in this area and this hazard should be considered in all land-use planning decisions. This information is readily available from the British Geological Survey Enquiry Service.

To demonstrate that this is a real issue, residents of Presteigne Road are well aware of a series of springs on this land. Some of these run most of the time, others after heavy rain. The water runs through the gardens of houses on the west side of Presteigne Road, then down into Presteigne Road itself and thence down Presteigne Road into the town. Water from these springs has been observed to run for weeks on end and to overwhelm the drains in a stream 3 to 5 feet wide.

Building on this land may compromise the drainage of houses built there and the drainage of existing houses in Presteigne Road. Development on this land would contravene objective 4 of the LOP which refers to "directing development away from high flood risk".

Question	Representation Texts	Council Response
<b>Question:</b>	<b>Council Response</b>	
Representation Texts:	The Council disagree with the proposed changes requested by the Representer. The representer does not raise any new issues or evidence which lead the Local Planning Authority to change its conclusions. In considering the suitability of housing allocations within the Depsoit LDP the Council assessed the impact of developments on landscape quality within close proximity to the site.	
Council Response:		0

Question: 3d. (i)	Representation Details	Council Response
Representation Texts:	Llanbrynmair Community Council strongly opposes the designation of the adjoining plot P26 HA1 for further Housing Land Allocation. The further development of this site beyond the five properties already granted Planning Permission would result in an overly large development that would we totally out of keeping with the location and would have a significant detrimental effect on the character of the village and community.

**Question: Council Response**

Representation Texts:

"Wedi ystyried y sylwadau a waned ar ddyrannu'r safle yma, argymhellir bod y safle'n cael ei gadw fel dyraniad preswyl o fewn y Cynllun Datblygu Lleol am y rhesymau canlynol:1. Mae'r safle'n darparu cyfraniad pwysig i gyflawni gofynion tir preswyl yr anheddiad yn y dyfodol – rhaid i'r Cynllun datblygu Lleol ddarparu digon o ddyraniadau tir ar gyfer tai i ddiwallu anghenion tai'r Cyngor hyd at 2026; 2. Wrth gyflawni amcanion cynaliadwyedd y cynllun, mae'r Cynllun Datblygu Lleol wedi dyrannu safleoedd preswyl gan ddilyn hierarchaeth aneddiadau strategol sy'n cydnabod gallu anheddiad i gynnwys datblygiadau o ystyried gwasanaethau a seilwaith yr anheddiad;3. Nid yw'r Cyngor yn ymwybodol o unrhyw gyfyngiadau technegol a/neu amgylcheddol sy'n atal datblygiad y safle yma. Mae unrhyw broblemau y mae angen eu hystyried wedi'u rhestru yn Atodiad 1 Datganiad Ysgrifenedig y Cynllun Datblygu Lleol; Bydd disgwyl i ddatblygwyr sicrhau bod eu bod yn darparu unrhyw welliannau angenrheidiol neu ofynnol i'r seilwaith yn sgil y datblygiad arfaethedig; ac4. Mae'r safle wedi'i leoli yn yr hyn sy'n cael ei ystyried yn lleoliad cynaliadwy o ran cyfleusterau a gwasanaethau lleol. Hefyd, o ran y ddarpariaeth dai, wedi ystyried y sylwadau a'r dystiolaeth ategol a baratowyd, ystyrir bod yr elfen yma o ddarpariaeth tai yn parhau i fod yn briodol i sicrhau bod y Cynllun Datblygu Lleol yn gallu cyflenwi'r Strategaeth a'i brif amcanion cymdeithasol ac economaidd, ac yn sicrhau cymaint â phosibl o hyblygrwydd wrth ymateb i dwf economaidd yn y dyfodol. Ystyrir y byddai unrhyw wro o'r ddarpariaeth cyflenwad tai yma yn peryglu cadernid y cynllun wrth ddiwallu'r amcanion hyn.O ran angen a dosbarthiad anghenion lleol, cynhaliwyd swm sylweddol o ymchwil a chasglu tystiolaeth wrth baratoi'r Cynllun Datblygu Lleol i ystyried cyfleoedd priodol i gael tai yn y sir, ac i fynd i'r afael ag anghenion tai lleol a dosbarthiad y tai. Mae'r Cyngor yn ystyried bod dosbarthiad y tai ar draws yr Hierarchaeth Aneddiadau yn seiliedig ar egwyddor gadarn sy'n cynorthwyo i gyflenwi Strategaeth y Cynllun a hyfywedd yr aneddiadau yn y tymor hir wrth allu cynnal twf cynaliadwy. Mae'r Cyngor yn cydnabod pwysigrwydd iaith a Diwylliant Cymraeg ym Mhowys ac maent yn cynnig newid ei ymagwedd polisi tuag at yr iaith Gymraeg a'r Diwylliant Cymreig i fynd i'r afael yn well â'r problemau a godwyd yn y sylwadau ac i sicrhau bod hyn yn gyson â Pholisi Cenedlaethol. Mae'r cynllun yn cydnabod sensitifrwydd ieithyddol cymunedau Cymraeg eu hiaith fel Llanbrynmair ac yn cynnwys polisi sy'n ceisio lliniaru effaith datblygiadau mawr o dai o fewn yr ardaloedd hynny. Gweler Newidiadau Arbennig am fanylion

.Having considered the representations made on the allocation of this site, it is recommended that the site be retained as a residential allocation within the Local Development Plan for the following reasons: 1. The site provides an important contribution to meeting future residential land requirements of the settlement - The LDP must provide sufficient housing land allocations to meet the future housing needs of the County up to 2026; 2. In meeting the plan's sustainability objectives the LDP has allocated residential sites according to a strategic settlement hierarchy, which recognises a settlement's capacity to accommodate development taking into account the services and infrastructure of the settlement; 3. The Council is unaware of any technical and/or environmental constraints that prevent the development of this site. Any issues that need to be taken into consideration are listed in Appendix 1 of the LDP Written Statement; Developers will be expected to ensure that any necessary infrastructure improvements required or resulting from the proposed development are provided; and4. The site is located in what is considered to be a sustainable location accessible to local facilities and services. Further, in regard to housing provision, having considered the representations received and further supporting evidence that has been prepared it is considered this level of housing provision remains appropriate to ensure the Local Development Plan (LDP) is capable of delivering the Strategy, its key socio-economic objectives and ensures maximum flexibility to respond to future economic growth. It is considered that any deviation from this housing supply provision would jeopardise the soundness of the plan in being able to meet these objectives. In regard to local housing need and distribution, a significant amount of research and evidence gathering was undertaken during the preparation of the LDP to consider appropriate housing opportunities for the county and to address local housing need and housing distribution. The Council considers that the distribution of housing across the Settlement Hierarchy is based on a sound rationale which supports the delivery of the LDP strategy and the longer term viability of settlements considered capable of supporting sustainable growth. The Council recognise the importance of Welsh Language and Culture in Powys and propose to amend its policy approach to Welsh Language and Culture to better address issues raised in the representation and to ensure its policy approach is consistent with National Policy. The plan recognises the linguistic

sensitivity of Welsh speaking communities such as Llanbrynmair and includes policy that seeks to mitigate against the impact of large housing developments within these areas. See Focused Changes for details."

Council Response:

0

**Question: 3d. (i) Representation Details**

Representation Texts: We wish to raise objections to the inclusion of sites P26 HA1 and P26 HC1 Llanbrynmair in the settlement allocation.

This is a joint representation by a sample group of residents all living in the parish of Llanbrynmair. Attached as an additional sheet is a list of their names and addresses.

The proposed allocation contradicts the policies and strategies noted within the LDP itself. Policies contradicted by these allocated sites include those related to realistic housing growth, appropriate housing density, phasing developments in ways that mitigate impacts on local communities, and taking meaningful account of Welsh language and culture, especially in areas such as Llanbrynmair:

1. It is essential to take into account the nature of the Llanbrynmair area. Both sites together would include 22 houses. One site, for example, would place 17 houses in an area of 0.68 hectares – 25 houses per hectare. Such a high density of housing is inappropriate for an area like Llanbrynmair, which is dispersed over a large geographic area. While Llanbrynmair is classed as a 'Large Village' on account of the number of residents in the parish, it is unusual in that it consists of a series of hamlets and several small centres of population, and the central hamlet (Wynnstay) thus has the character of a small village. As a result of not taking account of the nature of the parish, the 'development boundary' around part of the Wynnstay area is wholly inappropriate. To classify Llanbrynmair as a Large Village therefore displays a total ignorance of the nature of the area. Consequently the allocation of a single large development is totally inappropriate and will stifle other potential developments that would be more suitable over the next generation.

2. The density of proposed housing is not appropriate for Llanbrynmair. According to the LDP document, 'Smaller households, and changes to the welfare system, will increase the need and demand for 1 and 2 bedroom properties, although these must be designed with adequate amenity space'. At 25 homes per hectare, the properties will not have any amenity space of their own, which will not be in keeping with prior development in the area. The high density would be out of character for this area. The existing houses in the vicinity of the proposed development are less than 5 houses per hectare.

3. Lack of local employment opportunities and transport links. There are few employment opportunities within the area. New developments of this scale would be better placed near existing centres of employment and industry. In Planning Policy Wales (PPW), it states that 'One of its key priorities is to ensure access to affordable homes (to buy or rent) in locations which are convenient for local work'. The LDP document states that 'Sustainable travel to work opportunities should be promoted through the LDP co-locating employment, housing and public transport...'. It also states that an aim of the LDP will be 'to direct development to accessible locations which ideally provide a choice of transport modes such as walking, cycling and public transport'. The sites in Llanbrynmair do not meet that criterion, as distance from employment centres and the paucity of the public transport service preclude those modes of travel being used to access employment (there is no rail service and only a very limited bus service).

4. Protecting Welsh language and culture. One of the LDP's key objectives (objective 15), is to 'support and protect Welsh language and culture in Powys and specifically the Welsh speaking strongholds of the north-west and south-west'. The proposed development is likely to attract 22 mainly non Welsh-speaking families into the area. This will only contribute to the further decline in the percentage of Welsh speakers in the parish – continuing the trend of weakening the linguistic nature of the area and would be counter to the stated key objective of the LDP.

5. Need. According to the LDP document, there are currently more than 5,000 vacant residences in Powys, yet it is proposed to allocate a further 6,071 dwellings against an anticipated need of 4,087 (of which around 400 are expected to remain vacant). Loss of these allocated sites will not therefore affect Powys' ability to deliver appropriate levels of new housing.

6. Local Demand. There is clearly no demand locally for such a large number of new dwellings. The site for 5 houses for which permission has already been granted has remained unsold for over 12 years. Houses in the area do not sell quickly (usually they only sell after several years on the market), and local planning applications in the past for dwellings have even been refused on the basis of lack of demand. A new large development will further stagnate the local housing market, reducing mobility of the population. What Llanbrynmair needs is a collection of much smaller sites spread through the whole parish, to be developed in appropriate ways and at relevant timescales to meet real local need.

Rydym am wrthwynebu cynnwys safleoedd P26 HA1 a P26 HC1 Llanbrynmair o fewn y safleoedd a nodir.

Mae hwn yn ymateb ar y cyd gan grwp sampl o drigolion sydd i gyd yn byw ym mhlwyf Llanbrynmair. Mae rhestr o enwau a chyfeiriadau ar daflen ychwanegol.

Mae'r safleoedd a awgrymir yn gwrth-ddweud y polisiau a strategaethau a nodir o fewn y CDLI ei hun. Mae'r polisiau sydd i'r gwrthwyneb i'r argymhellion yn cynnwys rhai sy'n nodi'r angen am dwf realistig o ran tai, dwysedd addas o dai, sicrhau bod datblygiadau yn digwydd dros gyfnodau sy'n lleihau effeithiau ar gymunedau lleol, a cymeryd ystyriaeth go iawn o'r iaith a'r diwylliant Cymraeg, yn arbennig mewn ardaloedd fel Llanbrynmair:

1. Mae'n angenrheidiol cofio natur ardal Llanbrynmair. Byddai'r safleoedd gyda'i gilydd yn cynnwys 22 o dai. Bydd un safle, er enghraifft, yn gosod 17 o dai mewn ardal o 0.68 heceter – 25 tŷ yr heceter. Mae'r math yna o ddwysedd uchel o dai yn anaddas i ardaloedd fel Llanbrynmair, sydd yn ardal ddaearyddol gwasgaredig iawn. Er bod Llanbrynmair wedi ei nodi fel 'Pentref Mawr' achos cyfanswm poblogaeth y plwyf, mae'n anarferol gan ei fod mewn gwirionedd yn gyfres o glystyrau o dai a canolfannau bychain o boblogaeth, ac mae'r ardal canolig (Wynnstay) yn bentref bychan o ran natur. Fel canlyniad i beidio cymeryd ystyriaeth o natur y plwyf, mae'r 'ffin datblygu' o gwmpas rhan o ardal Wynnstay yn gyfangwbl anaddas. Mae nodi Llanbrynmair fel Pentref Mawr felly yn dangos anwybodaeth lwyr o natur yr ardal. Felly mae nodi un safle datblygu mawr yn hollol anaddas ac fe fyddai'n llesteirio datblygiadau posib eraill mwy cydnaws dros y genhedlaeth nesaf.

2. Mae dwysedd y tai awgrymir yn anaddas i Llanbrynmair. Yn ôl dogfen y CDLI, 'Bydd teuluoedd llai, a newidiadau i'r sistem lles, yn cynyddu'r angen a'r galw am eiddo 1 neu 2 stafell wely, er bydd angen eu cynllunio gyda gofod addas o'u cwmpas.' Ar raddfa o 25 o gartrefi yr heceter, ni fydd yr eiddo a digon o ofod o'u cwmpas eu hunain, a fyddai'n anghyson a datblygiadau blaenorol yn yr ardal. Bydd dwysedd uchel yn groes i gymeriad yr ardal. Mae'r tai yng nghyffuniau'r datblygiad arfaethedig ar llai na 5 tŷ yr heceter.

3. Diffyg cyfleoedd gwaith a chysylltiadau trafniadaeth. Ychydig o gyfleoedd gwaith sydd o fewn yr ardal. Byddai datblygiadau newydd ar y raddfa yma yn fwy addas yn agos at ganolfannau gwaith a diwydiant. O fewn Polisi Cynllunio Cymru, fe nodir 'Un o'r blaenoriaethau allweddol yw sicrhau mynediad i dai fforddiadwy (i'w prynu neu renti) mewn lleoliadau cyfleus ar gyfer gwaith lleol.' O fewn y CDLI nodir 'Dylid hyrwyddo cyfleoedd teithio i waith cynladwy trwy'r CDLI yn cyd-leoli cyflogaeth, tai a trafniadaeth gyhoeddus...'. Yn ogystal fe nodir mai nod y CDLI bydd 'cyfeirio datblygiadau i leoliadau sydd â mynediad yn ddelfrydol yn darparu dewis o drafniadaeth fel cerdded, seiclo a trafniadaeth gyhoeddus.' Nid yw'r safleoedd yn Llanbrynmair yn cwrrd â'r gofynion hyn, gan bod y pellter i ganolfannau gwaith a prinder trafniadaeth gyhoeddus yn golygu na ellir defnyddio'r dulliau hyn o deithio at waith (gan nad oes mynediad i wasanaeth trên ac mae gwasanaethau bws yn gyfyngedig iawn).

4. Amddiffyn yr iaith a'r diwylliant Cymraeg. Un o amcanion allweddol y CDLI (amcan 15) yw i 'gefynogi ac amddiffyn yr iaith a'r diwylliant Cymraeg ym Mhowys yn arbennig yng nghadarnleoedd yr iaith yn y gogledd-orllewin a'r de-orllewin'. Mae'r datblygiad arfaethedig yn debyg o ddenu 22 o deuluoedd di-Gymraeg yn bennaf i'r ardal. Bydd hyn yn ond yn cyfrannu at ddirywiad pellach yng nghanrannau siaradwyr Cymraeg yn y plwyf – gan barhau'r tueddiadau a welwyd o wanbau natur ieithyddol yr ardal ac a fydd yn groes i'r amcan allweddol a nodir yn y CDLI.

5. Angen. Yn ôl dogfen y CDLI, mae dros 5,000 eiddo gwag ym Mhowys ar hyn o bryd, serch hynny bwriedir clustnodi 6,071 o unedau pellach yn cyfateb a galw arfaethedig o 4,087 (gan ddisgwyl bydd tua 400 yn aros yn wag). Felly byddai colli'r safleoedd hyn ddim yn effeithio gallu Powys i ddarparu lefelau addas o dai newydd.

6. Galw lleol. Mae'n amlwg nad oes galw lleol ar gyfer gymaint o dai newydd. Mae'r safle ar gyfer 5 tŷ sydd eisoes a caniatad wedi bod heb ei werthu ers dros 12 mlynedd. Nid yw tai yn yr ardal yn gwerthu'n gyflym (fel arfer maent ond yn gwerthu wedi bod ar y farchnad am llawer o flynyddoedd), ac mae ceisiadau cynllunio yn y gorffennol ar gyfer tai wedi eu gwrthod ar sail diffyg galw. Byddai datblygiad mawr newydd yn golygu bydd y farchnad dai lleol yn dirywio ymhellach gan leihau symudoedd y boblogaeth. Beth sydd angen ar

Status Maintained

This is a joint representation by a sample group of residents all living in the parish of Llanbrynmair. Attached as an additional sheet is a list of their names and addresses.

The proposed allocation contradicts the policies and strategies noted within the LDP itself. Policies contradicted by these allocated sites include those related to realistic housing growth, appropriate housing density, phasing developments in ways that mitigate impacts on local communities, and taking meaningful account of Welsh language and culture, especially in areas such as Llanbrynmair:

1. It is essential to take into account the nature of the Llanbrynmair area. Both sites together would include 22 houses. One site, for example, would place 17 houses in an area of 0.68 hectares – 25 houses per hectare. Such a high density of housing is inappropriate for an area like Llanbrynmair, which is dispersed over a large geographic area. While Llanbrynmair is classed as a 'Large Village' on account of the number of residents in the parish, it is unusual in that it consists of a series of hamlets and several small centres of population, and the central hamlet (Wynnstay) thus has the character of a small village. As a result of not taking account of the nature of the parish, the 'development boundary' around part of the Wynnstay area is wholly inappropriate. To classify Llanbrynmair as a Large Village therefore displays a total ignorance of the nature of the area. Consequently the allocation of a single large development is totally inappropriate and will stifle other potential developments that would be more suitable over the next generation.

2. The density of proposed housing is not appropriate for Llanbrynmair. According to the LDP document, 'Smaller households, and changes to the welfare system, will increase the need and demand for 1 and 2 bedroom properties, although these must be designed with adequate amenity space'. At 25 homes per hectare, the properties will not have any amenity space of their own, which will not be in keeping with prior development in the area. The high density would be out of character for this area. The existing houses in the vicinity of the proposed development are less than 5 houses per hectare.

3. Lack of local employment opportunities and transport links. There are few employment opportunities within the area. New developments of this scale would be better placed near existing centres of employment and industry. In Planning Policy Wales (PPW), it states that 'One of its key priorities is to ensure access to affordable homes (to buy or rent) in locations which are convenient for local work'. The LDP document states that 'Sustainable travel to work opportunities should be promoted through the LDP co-locating employment, housing and public transport...'. It also states that an aim of the LDP will be 'to direct development to accessible locations which ideally provide a choice of transport modes such as walking, cycling and public transport'. The sites in Llanbrynmair do not meet that criterion, as distance from employment centres and the paucity of the public transport service preclude those modes of travel being used to access employment (there is no rail service and only a very limited bus service).

4. Protecting Welsh language and culture. One of the LDP's key objectives (objective 15), is to 'support and protect Welsh language and culture in Powys and specifically the Welsh speaking strongholds of the north-west and south-west'. The proposed development is likely to attract 22 mainly non Welsh-speaking families into the area. This will only contribute to the further decline in the percentage of Welsh speakers in the parish – continuing the trend of weakening the linguistic nature of the area and would be counter to the stated key objective of the LDP.

5. Need. According to the LDP document, there are currently more than 5,000 vacant residences in Powys, yet it is proposed to allocate a further 6,071 dwellings against an anticipated need of 4,087 (of which around 400 are expected to remain vacant). Loss of these allocated sites will not therefore affect Powys' ability to deliver appropriate levels of new housing.

6. Local Demand. There is clearly no demand locally for such a large number of new dwellings. The site for 5 houses for which permission has already been granted has remained unsold for over 12 years. Houses in the area do not sell quickly (usually they only sell after several years on the market), and local planning applications in the past for dwellings have even been refused on the basis of lack of demand. A new large development will further stagnate the local housing market, reducing mobility of the population. What Llanbrynmair needs is a collection of much smaller sites spread through the whole parish, to be developed in appropriate ways and at relevant timescales to meet real local need.

Rydym am wrthwynebu cynnwys safleoedd P26 HA1 a P26 HC1 Llanbrynmair o fewn y safleoedd a nodir.

Mae hwn yn ymateb ar y cyd gan grwp sampl o drigolion sydd i gyd yn byw ym mhlwyf Llanbrynmair. Mae rhestr o enwau a chyfeiriadau ar daflen ychwanegol.

Mae'r safleoedd a awgrymir yn gwrth-ddweud y polisiau a strategaethau a nodir o fewn y CDLI ei hun. Mae'r polisiau sydd i'r gwrthwyneb i'r argymhellion yn cynnwys rhai sy'n nodi'r angen am dwf realistig o ran tai, dwysedd addas o dai, sicrhau bod datblygiadau yn digwydd dros gyfnodau sy'n lleihau effeithiau ar gymunedau lleol, a cymeryd ystyriaeth go iawn o'r iaith a'r diwylliant Cymraeg, yn arbennig mewn ardaloedd fel Llanbrynmair:

1. Mae'n angenrheidiol cofio natur ardal Llanbrynmair. Byddai'r safleoedd gyda'i gilydd yn cynnwys 22 o dai. Bydd un safle, er enghraifft, yn gosod 17 o dai mewn ardal o 0.68 heceter – 25 tŷ yr heceter. Mae'r math yna o ddwysedd uchel o dai yn anaddas i ardaloedd fel Llanbrynmair, sydd yn ardal ddaearyddol gwasgaredig iawn. Er bod Llanbrynmair wedi ei nodi fel 'Pentref Mawr' achos cyfanswm poblogaeth y plwyf, mae'n anarferol gan ei fod mewn gwirionedd yn gyfres o glystyrau o dai a canolfannau bychain o boblogaeth, ac mae'r ardal canolig (Wynnstay) yn bentref bychan o ran natur. Fel canlyniad i beidio cymeryd ystyriaeth o natur y plwyf, mae'r 'ffin datblygu' o gwmpas rhan o ardal Wynnstay yn gyfangwbl anaddas. Mae nodi Llanbrynmair fel Pentref Mawr felly yn dangos anwybodaeth lwyf o natur yr ardal. Felly mae nodi un safle datblygu mawr yn hollol anaddas ac fe fyddai'n llesteirio datblygiadau posib eraill mwy cydnaws dros y genhedlaeth nesaf.

2. Mae dwysedd y tai awgrymir yn anaddas i Llanbrynmair. Yn ôl dogfen y CDLI, 'Bydd teuluoedd llai, a newidiadau i'r sistem lles, yn cynyddu'r angen a'r galw am eiddo 1 neu 2 stafell wely, er bydd angen eu cynllunio gyda gofod addas o'u cwmpas.' Ar raddfa o 25 o gartrefi yr heceter, ni fydd yr eiddo a digon o ofod o'u cwmpas eu hunain, a fyddai'n anghyson a datblygiadau blaenorol yn yr ardal. Bydd dwysedd uchel yn groes i gymeriad yr ardal. Mae'r tai yng nghyffuniau'r datblygiad arfaethedig ar llai na 5 tŷ yr heceter.

3. Diffyg cyfleoedd gwaith a chysylltiadau trafniadaeth. Ychydig o gyfleoedd gwaith sydd o fewn yr ardal. Byddai datblygiadau newydd ar y raddfa yma yn fwy addas yn agos at ganolfannau gwaith a diwydiant. O fewn Polisi Cynllunio Cymru, fe nodir 'Un o'r blaenoriaethau allweddol yw sicrhau mynediad i dai fforddiadwy (i'w prynu neu renti) mewn lleoliadau cyfleus ar gyfer gwaith lleol.' O fewn y CDLI nodir 'Dylid hyrwyddo cyfleoedd teithio i waith cynladwy trwy'r CDLI yn cyd-leoli cyflogaeth, tai a trafniadaeth gyhoeddus...'. Yn ogystal fe nodir mai nod y CDLI bydd 'cyfeirio datblygiadau i leoliadau sydd â mynediad yn ddelfrydol yn darparu dewis o drafniadaeth fel cerdded, seiclo a trafniadaeth gyhoeddus.' Nid yw'r safleoedd yn Llanbrynmair yn cwrrd â'r gofynion hyn, gan bod y pellter i ganolfannau gwaith a prinder trafniadaeth gyhoeddus yn golygu na ellir defnyddio'r dulliau hyn o deithio at waith (gan nad oes mynediad i wasanaeth trên ac mae gwasanaethau bws yn gyfyngedig iawn).

4. Amddiffyn yr iaith a'r diwylliant Cymraeg. Un o amcanion allweddol y CDLI (amcan 15) yw i 'gefnogi ac amddiffyn yr iaith a'r diwylliant Cymraeg ym Mhowys yn arbennig yng nghadarnleoedd yr iaith yn y gogledd-orllewin a'r de-orllewin'. Mae'r datblygiad arfaethedig yn debyg o ddenu 22 o deuluoedd di-Gymraeg yn bennaf i'r ardal. Bydd hyn yn ond yn cyfrannu at ddirywiad pellach yng nghanrannau siaradwyr Cymraeg yn y plwyf – gan barhau'r tueddiadau a welwyd o wanhau natur ieithyddol yr ardal ac a fydd yn groes i'r amcan allweddol a nodir yn y CDLI.

5. Angen. Yn ôl dogfen y CDLI, mae dros 5,000 eiddo gwag ym Mhowys ar hyn o bryd, serch hynny bwriedir clustnodi 6,071 o unedau pellach yn cyfateb a galw arfaethedig o 4,087 (gan ddisgwyl bydd tua 400 yn aros yn wag). Felly byddai colli'r safleoedd hyn ddim yn effeithio gallu Powys i ddarparu lefelau addas o dai newydd.

6. Galw lleol. Mae'n amlwg nad oes galw lleol ar gyfer gymaint o dai newydd. Mae'r safle ar gyfer 5 tŷ sydd eisoes a caniatad wedi bod heb ei werthu ers dros 12 mlynedd. Nid yw tai yn yr ardal yn gwerthu'n gyflym (fel arfer maent ond yn gwerthu wedi bod ar y farchnad am llawer o flynyddoedd), ac mae ceisiadau cynllunio yn y gorffennol ar gyfer tai wedi eu gwrthod ar sail diffyg galw. Byddai datblygiad mawr newydd yn golygu bydd y farchnad dai lleol yn dirywio ymhellach gan leihau symudoedd y boblogaeth. Beth sydd angen ar Llanbrynmair yw casgliad o safleoedd llawer llai wedi eu gwasgaru drwy'r plwyf i gyd, i'w datblygu mewn ffyrdd addas ac ar amserlenni ar gyfer cyfarfod â galw lleol.

Question Representation Texts

**Question: Council Response**

Representation Texts: The representor does not raise new issues or evidence which lead the Local Planning Authority to change its conclusions. It is not considered that the inclusion of this site would be in the public interest. The site is in isolation from a public highway and therefore no means of access can be identified as as such the Highway Authority does not support its allocation. Sufficient allocations in Llanbrynmair, which are well served by local facilities and services, have been proposed in order to meet the land use needs of the area over the plan period.

Council Response:

0

**Question: 3d. (i) Representation Details**

Representation Texts: 1.Introduction  
 1.1This report has been compiled in response to Powys County Councils 'Call for Potential Development Sites' document published in February 2011.  
 1.2Powys County Council is preparing a Local Development Plan (LDP) due for publication in 2014; the LDP will guide development in Powys (excluding land within Brecon Beacons National Park) up to 2026.  
 1.3The LDP will identify land which addresses the Countys needs for development, to include proposals for housing, employment, retail, recreation, leisure, transport and health, or a mix of such uses. The Plan will also identify sites for minerals and waste development.  
 1.4Candidate sites will be placed on a register and made available for public inspection and thereafter assessed against the Councils criteria.  
 2.Sustainable Development  
 2.1Sustainable development is a pattern of resource use that aims to meet the human needs while preserving the environment so that these needs can be met not only in the present, but also for generations to come. It is development that "meets the needs of the present without compromising the ability of future generations to meet their own needs."  
 2.2The Welsh Assembly Government has a legal duty to sustainable development; a move towards sustainable development can occur by improving the economy and the social and environmental wellbeing of people and communities; promoting fair and safe communities and equal opportunities and; supporting the natural and cultural environments and respecting their limits.  
 2.3Design is defined in Planning Policy Wales as 'the relationship between all elements of the natural and built environment. To create sustainable development, design must go beyond aesthetics and include the social, environmental and economic aspects of the development, including its construction, operation and management, and its relationship to its surroundings.'  
 2.4Planning Policy Wales states that "Good design is also inclusive design. The principles of inclusive design are that it places people at the heart of the design process, acknowledges diversity and difference, offers choice where a single design solution cannot accommodate all users, provides for flexibility in use, and provides buildings and environments that are convenient and enjoyable to use for everyone."  
 2.5Technical Advice note (TAN) 12: Design (2009) states that "Good design is fit for purpose and delivers environmental sustainability, economic development, and social inclusion at every scale throughout Wales."  
 2.6The LDP will assess whether the location of the candidate site is considered sustainable. In assessing the suitability of candidate sites within the LDP, Powys County Council will adhere to National Planning Policy guidance. National planning policy provides the following guidance: the proximity to public transport network or accessibility by pedestrians

or cyclists; ability of a site to accommodate a mixed development or ability to contribute to a sustainable mix of uses in the area; proximity of a site to existing settlements; efficient use of land to include development or re-use of previously developed land; presumption against isolated rural developments and presumption of favouring development adjoining existing rural communities; ability of development to sensitively balance the goals of sustainability; positioning of development to encourage residents to live a healthier lifestyle; avoid loss of the best agricultural land; development which is well serviced by existing infrastructure and free from unstable or contaminated land or land liable to flooding and; development which tackles the causes/consequences of climate change.

3.The Candidate Site

3.1Location

3.1.1The Candidate Site (the site) is referred to as Land adjacent to proposed land west of Bryncoch reference should be made to Appendix 1.

3.1.2The site is located adjacent to the proposed settlement boundary of Llanbrynmair.

3.2The Settlement

3.2.1The site is located south of the settlement of Llanbrynmair.

3.2.2The settlement of Llanbrynmair is approximately 11 miles from Machynlleth.

3.2.3Under the Powys Unitary Development Plan (UDP) Llanbrynmair was identified as a Large Village.

3.2.4The UDP (UDP Policy UDP SP2) identifies the settlement hierarchy as:

Area Centre

Key Settlements

Large Villages

Small Villages

Rural Settlements

Countryside

3.2.5Under the current UDP Llanbrynmair does have a defined settlement boundary and the site is located south of the settlement boundary.

3.2The village has a primary school, playgrounds, post office, hotel/public house, shops, garage, funeral directors and public toilets.

3.3The site would form an acceptable extension of the proposed village boundary.

3.4Delivery of The Site

3.4.6The site is within the ownership of the proposer.

3.4.7There are no ownership constraints or problems.

3.4.8The market for residential development in this area is strong.

3.5Quality of The Site and Wider Environment

3.5.6The site has been in agricultural use and no land remediation is required; no contamination land issues are known.

3.5.7An existing highways infrastructure to the site is in place; there would be no need for major improvements to existing road junctions.

3.5.8The site is currently serviced in terms of utilities; mains electricity, water and telecommunications are available within or adjacent to the site.

3.5.9The site is adjoining proposed residential and agricultural land use and it is understood that there are no issues with neighbourly disputes.

3.5.10The site is within walking distance from some key facilities which provide for day-to-day needs.

3.6Access

3.6.1The site is easily accessible by pedestrians and cyclists; the site is minutes walking distance from some key facilities which provide for day-to-day needs.

3.7Environmental Sustainability

3.7.1The site is a greenfield site

3.7.2The site is located on intensive pasture land and development of the site would not involve loss of prime agricultural land.

3.7.3The site is located adjoining existing residential development and the development of the site will not result in development in the open countryside.

3.7.4 The development of the site would be in context of the surrounding local area and respect the surrounding character.

3.7.5 The site is not within the Environment Agency fluvial flood risk area and the site is not known to flood.

3.7.6 It is understood that there are no environmental constraints or designations affecting the site.

3.7.7 Residential development of the site would comply with the Code for Sustainable Homes; renewable energy and natural resource protection and recycling measures will be included where possible.

3.8 Well Being

3.8.1 The site is located close to local facilities and services.

3.8.2 The site is located within close proximity of green space and recreational space.

3.8.3 The site is located close to walking and cycling opportunities.

3.9 Sustainability

3.9.1 The site could accommodate a mix of housing including a number of affordable homes which would provide for all sectors of the housing market.

3.9.2 The proposed development would ensure a balance of jobs and housing and services in the local area.

3.9.3 Sustainable development is a pattern of resource use that aims to meet the human needs while preserving the environment so that these needs can be met not only in the present, but also for the generations to come. It is development that meets the needs of the present without compromising the ability of future generations to meet their own needs. The proposed development balances the environment with the social and economic needs of the area. Well designed residential development to the Code of Sustainable Homes will bring people to the area, which in turn supports the local services and the economic and social sustainability of the area.

4. Candidate Site Proposal

4.1 The candidate site would be developed for residential use. The site is currently under agricultural use but there are existing structures on site.

4.2 The National Planning Policy for Housing is embodied in the Welsh National Assembly Governments Planning Policy Wales. The guidance acknowledges the importance of promoting sustainable rural communities with access to high quality public services through the efficient use of land, by encouraging mixed tenure communities, that are well designed and located in close proximity to services, employment and other facilities.

4.3 Guidance can also be found in Planning Guidance TAN 1 Joint housing Land Availability studies and TAN2 Planning and Affordable Housing. These notes indicate that a five year continuous supply of housing is genuinely available and TAN2 recognises the importance of providing affordable housing and provides advice for developing suitable policies.

4.4 There is no substantial planning history for the site.

4.5 The allocation and zoning of this land for residential use would fulfil a number of the criteria that is set out in the current UDP, namely that the council considers sustainable communities to be cohesive focal points for community life providing appropriate services and facilities in keeping with their status and with the capacity to support the housing needs of all. The provision of good quality housing of the right size, type and tenure enables choice and contributes towards securing a better social mix and tied in with an employment use would be a very sustainable development.

4.6 Small scale development in this area would promote sustainable development and focus development on a location which has easy access to basic services, as highlighted as development strategy in the Tan documents.

4.7 Our client has the benefit of owning some land around the site and also the access and the frontage to the site. Therefore, our client would be in a position to carry out any required works to improve visibility and site lines

4.8 The proposal would be for residential development with an appropriate proportion of local needs dwellings.

4.9 The completed Candidate Site Proposal Form, February 2011 is attached in Appendix 3.

4.10 The estimated site capacity is 8 to 10 residential units per acre with the primary factor affecting the site capacity being its size and topography.

4.11 Our client has the benefit of owning some land around the site and also the access and frontage to the site. Therefore our client would be in a position to carry out any required works to improve visibility and site lines for the access. The proposed development would be for residential development with an appropriate proportion of local needs dwellings.

Source:	Website registration	Type:	Objection	Mode:	Written	Status:	Maintained

5. Conclusion

5.1 The candidate site is referred to as Land adjacent to proposed land west of Bryncoch and is located adjacent to the development boundary of the Key settlement of Llanbrynmair.

5.2 The site would be developed for mixed residential use and employment use.

5.3 Sustainable development is a pattern of resource use that aims to meet the human needs while preserving the environment so that these needs can be met not only in the present, but also for the generations to come. The proposed development balances the environment with the social and economic needs of the area. Well designed residential development to the Code of Sustainable Homes will bring people to the area, which in turn supports the local services and the economic and social sustainability of the area.

5.4 Sustainable development meets the needs of the present without compromising the ability of future generations to meet their own needs; the proposed development of this candidate site achieves the aims of sustainable development and therefore should be included within the Local Development Plan for the proposed use.

New Site

Map: P27: Llandinam- 2015

Issue: 2015: Deposit Draft-12. Alternative Sites

Question Representation Texts

Question: 3d. (i) Representation Details

Representation Texts:

1. We did not submit the site as a Candidate Site because we assumed that it would be included in the LDP as a committed site because it has current planning approvals for housing and a new road access and roundabout: M2006/0215 (Outline approval for 50 dwellings subject to a 106 agreement for 17 affordable dwellings) & M2006/0526 (Full consent). Officer note - Full consent refers to the construction of roundabout on A470 and formation of access road.
2. Existing approvals have been included in the LDP in other Large Villages (Crossgates, Castle Caereinion, Churchstoke, Kerry (subject to a 106 Agreement), Llansilin & Trefeglwys), but excluded in Llandinam, which we believe is inconsistent.
3. The current allocation of 8 new dwellings in Llandinam is well below the level of growth apportioned to other Large Villages in the County.
4. Llandinham has a better infrastructure and community facilities than most other Large Villages in Powys (8 No as shown in Appendix B of the 'Powys Local Development Plan Topic Paper LDP Strategy Deposit Version Paper June 2015') and therefore needs greater growth than the pro-rata allocation to support and sustain these desirable facilities.
5. This site is the only candidate site in Llandinham to capable of accommodating additional housing that accords with the 'Candidate Site Process and Site Assessment Methodology'. That is:
  - It has already been included in the Settlement boundary of the UDP
  - It has an excellent new road access that has received full planning consent (M2006/0526)
  - It lies outside the C2 Flood Area and all ecological issues have been resolved
  - It has easy and safe connectivity with the centre of the village and all the community facilities
6. The assumption that additional growth is required in Llangurig to offset the lack of suitable housing sites in Llandinam is incorrect - see page 47 Appendix D of the 'Powys Local Development Plan Topic Paper LDP Strategy Deposit Version Paper June 2015'.
7. The site has been approved by all the statutory consultees and the following studies have been commissioned by the applicant and approved by PCC during the planning process:
  - Bat Survey
  - Reptile Survey
  - Ecological Survey
  - Archaeological Survey
  - Flood Consequence Assessment

6361.V1 20/07/2015  Summary: Llandinam - Request for Addition of a Site

Source: Email Type: Objection Mode Written Status Maintained

8. The proposed roundabout and access road were fully designed, detailed and approved by the Welsh Office and PCC before planning consent was granted due to the position on the Manchester to Swansea trunk road.

9. The existing approval includes the provision of 17 no. affordable homes to meet local demand, together with the provision of a number of different sized properties which will provide a mixed development that will cater for the whole community.

10. The development has the support of County Councillor Roach Davies and the local community because it will help support the local primary school, the community centre and the local businesses. They also support the provision of a new roundabout at the entrance to the village which will slow the traffic down and help mark the village boundary.

11. The two existing approvals (P2006/0215 & P2006/0526) were finally granted on 1st December 2011. The land is owned by a number of different parties, which has added to the complexity of ratifying the 106 agreement. The Developer has invested considerable time and money in getting the project to this stage, discussions are underway with all parties and he expects the development to be completed within the lifespan of the LDP as the economy in Mid Wales improves aided by the proposed improvements to the traffic flow around Newtown.

Officer Note: The representation submission comprised:

Site location Plan

Deposit Stage Representation Form

Copy of Approval M2006/0526.

Planning documents comprising illustrative layout for the housing site and a design statement together with site plans showing the boundaries of each application.

Details of the proposed roundabout.

Copies of all the supporting report documents relating to approvals M2006.0215 and M2006.0526 - 1. Archaeological Desk Top Assessment & Field Survey for CPAT Curatorial Section 2. Bat Survey 3. Reptile Survey and Mitigation Strategy 4. Ecological Survey

Additional LDP information in support of the new site - 1. Sustainability Appraisal & Strategic Environmental Assessment 2. Documentation that the site accords with the LDP Strategy.

*Question Representation Texts*

**Question: Council Response**

Representation Texts: The issues raised within the representation have been considered by the Council through consultations with stakeholders as part of the current planning application process (P/2013/0444) and in its resolution to grant permission for the development subject to the signing of a section 106 agreement. The impact of the development of this site on the SAC/SSSI has been assessed as part of the planning application process. According to the Committee report in respect of the application, additional information was required to assess the impacts and a detailed Pollution Prevention Plan, project was screened and HRA carried out. NRW removed objection and stated that the proposed measures, if implemented, will prevent any harm to the SSSI. NRW has also recommended that any grant of consent includes a condition to manage the surface drainage of the site to address hydrological and hydrogeological impacts. A condition is also to be attached requiring a buffer zone scheme.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: Powys County Council have acknowledged the risk posed to the natural heritage of Powys when allocating the site at Crabtree Green, Llandrindod for housing development during the life of this plan: "(The) site lies adjacent to a SSSI / SAC; any planning application submitted will be required to demonstrate that the development does not have an adverse effect on these designations."

Powys County Council also acknowledge flood risk: "Eastern edge of the site is within TAN 15 C2 zone, this area will not be developed."

The Wildlife Trust have been concerned about these proposals and this allocation for the last ten years. We have appealed to both Natural Resources Wales (NRW) and their predecessor Countryside Council for Wales (CCW) and the Powys County Council to fulfil their obligations under NERC Act, 2006 section 40 and have regard to protecting biodiversity. Neither NRW, nor CCW, nor PCC planning officers objected to its original inclusion as an allocated site within the Powys UDP, nor did they object to a subsequent planning application for 50 houses on the field.

The Wildlife Trust has requested that research be carried out to assess the impact of this housing development upon the adjacent Crabtree Green Meadow SSSI. To our knowledge no such detailed research has been carried out. The SSSI represents 25% of the national (Welsh) resource of lowland floodplain meadow.

Council Response: 0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: Allocation of site P28 HA1 - land adjacent to Crabtree Green SSSI without any detailed knowledge of the likely impact upon the SSSI risks infringing NERC Act 2006, section 40. Therefore, as it stands we believe this part of the LDP deposit draft remains unlawful.

Issue: 2015: Deposit Draft-11. Allocated Sites

*Question Representation Texts*

**Question: Council Response**

Representation Texts: The LDP is supported by a substantial evidence base regarding infrastructure and site deliverability. Detailed site assessments have been undertaken on the allocated sites and the Council considers these to provide a range and choice of deliverable sites. This has included extensive consultation with internal Council departments and statutory consultees to identify any site constraints, which are detailed within the appendices of the LDP. Information has also been collated with regards to developer intentions. In particular, the constraints raised within this representation have been addressed as part of the current planning application in that it has been resolved to grant planning permission subject to the signing of a section 106 agreement. The impact of development of this site on the SAC/SSSI has been assessed and it has been concluded that the development would not be harmful to these designations subject to control and mitigation measures required by conditions. In relation to the overhead lines, information obtained from the developer confirms that the high voltage overhead cables that were across the site have been moved, to reroute them underground along the main road and across the top edge of Phase 1. The low voltage supply has also been installed within Phase 2. These works were completed on 6.10.15

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: P28 HA1 – LAND ADJACENT TO CRABTREE GREEN

Whilst we raise no objection in principle to the allocation of this site, we would question the deliverability of the site within the Plan period given:  
1. It lies adjacent to a SSSI / SAC and has power lines crossing it which will impact upon delivery.

Council Response: 0

*Question Representation Texts*

**Question: Council Response**

Representation Texts: The LDP is supported by a substantial evidence base regarding infrastructure and site deliverability. Detailed site assessments have been undertaken on the allocated sites and the Council considers these to provide a range and choice of deliverable sites. This has included extensive consultation with internal Council departments and statutory consultees to identify any site constraints, which are detailed within the appendices of the LDP. Information has also been collated with regards to developer intentions. In response to the specific constraints identified in this representation 1) The site is on a gradual slop, however the topography is not considered to be a major constraint on the development. 2) The site may lie near to the possible route of a Roman road, however there is no evidence to suggest that it runs close or immediately adjacent to this site. Comments received from CPAT indicate that there may be surviving prehistoric or Roman period sub-surface archaeology in this area, which may result in the need for archaeological survey work, however this is not expected to prevent the development of the site. 3) No concerns regarding ecological impact have been raised by consultees. 4) The Highway Authority has accepted the site subject to appropriate access arrangements with full visibility, possible footway improvements and an extension to the speed limit this site is suitable for development. 5) Welsh Water have indicated that there will be requirements for a hydraulic modelling assessment to determine the point of connection to the public sewerage system, however Welsh Water have not not raised major objections that indicate the delivery of this site cannot be achieved within the proposed Plan Period.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: P28 HA3 – LAND AT ITHON ROAD  
 Whilst we raise no objection in principle to the allocation of this site, we would question the deliverability of the site within the Plan period given:  
 1. The sloping nature of the site will need to be considered together with archaeological and ecological constraints which will impact upon the viability and the ability to provide adequate access and drainage connections.

Council Response: 0

*Question Representation Texts*

**Question: Council Response**

Representation Texts: The Council disagree with the proposed change requested by the Represorator to amend the development boundary to include Candidate site 24 and 953. The Represorator does not raise new issues or evidence which lead the LPA to change its conclusions. Having considered the representation it is recommended that the site is not included within the development boundary of the Local Development Plan for the following reasons:  
1. Sufficient allocated land or sites with the benefit of planning permission are available elsewhere within the settlement and plan area to meet future residential land requirements. 2. The Council is proposing to extend the development boundary to cover part of these candidate site, however it is not considered appropriate to include the entirety of the land requested in the development boundary as this constitute undesirable encroachment into the open countryside. The proposed approach will also provide for a buffer between any development and the adjacent woodland and Local Nature Reserve.

Council Response:

0

**Question: 3d. (i) Representation Details**

Representation Texts:

The assessment of Candidate site 24 appears to have been carried out in isolation.

An opportunity exists to consider Candidate site 24, together with Candidate site 953 and the land around the derelict Southfields building, which would provide a large area of development land both utilising a brown field site and also low grade agricultural land.

Sufficient land would be brought forward to enable a sustainable, economically viable development using minimal infrastructure capital.

Access to the development could be achieved from the West, and this would also bring forward financial benefits to the County Council by triggering uplift clauses associated with the land.

The larger development area would help support the vitality of one of the county's main centres

It would also contribute to the sustainability aims of the plan in that the development would have easy access to areas of employment, education, leisure health and retail.

This more rounded approach would overcome the access and land drainage issues identified as constraints in the original site assessments

Question Representation Texts

**Question: Council Response**

Representation Texts: "This representation is considered to be consistent with and in support of the DLDP Strategy and Policies. No change is therefore considered necessary to ensure that the Plan is sound.

Council Response:

0

**Question: 3d. (i) Representation Details**

Representation Texts: Policy H1 is supported with regard to the identification of land east of Ithon Road, Llandrindod Wells and its inclusion in the site schedule in Appendix 1.(P28 HA3)

We note that the policy also seeks to maintain a 5 year housing land supply. For reasons explained in the accompanying Submission Document (See accompanying Submission Document) we confirm that the release of the land for housing will contribute to achieving a 5 year land supply on adoption of the LDP as required by the new TAN 1.

Separate forms refer to objections to the omission of land to the West of Ithon Road.

ADDITIONAL SUPPORTING EVIDENCE

A) Site Map showing boundary of site "Land to the East of Ithon Road "

B) Submission document in response to Powys LDP Deposit Draft (June 2015) "Land to the East of Ithon Road, Llandrindod Wells"

Representation Texts: 

- A water supply can be provided to serve this site. Off site mains may be required to serve the site. These can be provided through a water requisition scheme under Sections 41 – 44 of the Water Industry Act 1991.
- A hydraulic modelling assessment (HMA) is required to determine the point of connection to the public sewerage system and potential developers would be expected to fund investigations during pre-planning stages.
- Potential developers need to be aware that the site is crossed by a sewer and protection measures in the form of easement widths or a diversion of the pipe would be required, which may impact upon the housing density achievable on site.
- Llandrindod Wells Wastewater Treatment Works (WwTW) can accommodate the foul flows from this proposed development site.

Issue: 2015: Deposit Draft-12. Alternative Sites

*Question Representation Texts*

**Question: Council Response**

Representation Texts: Having considered the representations made on this site, it is recommended that the site is not identified as a residential allocation as sufficient allocated land or sites with the benefit of planning permission are available elsewhere within the settlement to meet the future residential land requirements of the town. The land has been included within the development boundary and therefore any proposed development would be considered through the normal planning application process where it would be assessed against the relevant policies from within the Plan. It is recognised that planning permission has previously been refused on this land and an appeal against this decision was dismissed. These decisions were based on the policies and circumstances at the time, and do not prejudice the submission of an alternative scheme that may address the issues identified in the previous planning and appeal decisions.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: These representations have been prepared by Barton Willmore LLP on behalf of PAR Homes, the landowners of Land at Pentrosfa Road, Llandrindod Wells (hereinafter referred to as 'the site') which lies within the settlement boundary of Llandrindod Wells as defined by the Powys Deposit Local Development Plan (LDP), July 2014 and was previously promoted via the Candidate Sites process (ref: 1111).

The aim of this submitted Report is to set out the merits of the proposed allocation of the site for residential development and to assist the Council in formulating its Local Development

Question Representation Texts

**Question: 3d. (i) Representation Details**

Representation Texts: I consider that the proposals as laid out for Llandysilio are unsound.The development boundary has not been enlarged from the current and outdated development plan.There is only 1 area scheduled for development and I feel that this will encourage a densely built housing estate yet again. Llandysilio has suffered from this type of development for the past 20 years with firstly Foxen Manor and more recently the development off Domgay Road of 50 plus properties.  
I consider the non adoption of any of the sites adjacent to the existing development boundary  
Is unwise as these sites could be ideal for a development of only a few properties with much larger plots and consequently provide a much more diverse range of property type and design.

Council Response: 0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: I would like to see the inclusion of candidate sites adjacent to the current development boundary.

Council Response: 0

**Question: 3e. (ii) Candidate Site No/Name**

Representation Texts: Candidate Site No. 453 - Land adjacent to Eagles Glen

Council Response: 0

**Question: 4b Reason For Request To Speak At Hearing And Subject**

Representation Texts: I would like to speak about the whole of my representation and consider it a democratic right to be able to do so.

Question Representation Texts

**Question: 3d. (i) Representation Details**

Representation Texts: Introduction

Powys County Council has prepared its deposit proposals document for the Powys Local Development Plan (LDP) which upon adoption will replace the Powys Unitary Development Plan and will be the basis for decisions on land use planning for all of Powys. This deposit proposals document includes the Authority's vision for housing site allocations and we hereby wish to make comment about such site allocations.

Candidate Site 460 was proposed during the call for Candidate Sites in April 2011 and has subsequently failed to be allocated as a housing site within the village of Llandrinio. We hereby appeal this non-allocation and are of the opinion that the Local Development Plan fails on the ground of soundness.

Soundness of Local Development Plan

The Local Development Plan fails on the ground of soundness criteria CE2. The site allocations do not realistically nor appropriately consider the relevant alternatives nor are they allocated on a robust or credible evidence Base. Site allocations have not been considered with consistent weighting to the sustainable development aims.

Candidate Site 460

Candidate Site 460 has road access from the south and west frontages. The site would form a logistical and proportionate natural extension to the village. The site represents sustainable development within a sustainable village and it is a deliverable site; there are no constraints and the site is capable of development within the next plan period.

The Site Appraisal Report submitted with the Candidate Site Proposal Form concluded that the site was suitable to a residential or community site allocation on the grounds of settlement; delivery; site quality; and the wider environment; public transport and access; environmental sustainability; well being and; sustainability.

Candidate Site 460 is an appropriate site for housing in Llandrinio. The LDP designates Llandrinio as a "large village" on the basis it has a good range of services and community amenities; the village is therefore recognized as a sustainable location.

â€f

Housing Allocation, Llandrinio

There is one site allocation for housing in Llandrinio. However, Candidate Site 460 appears to form the natural expansion of future housing in Llandrinio as it adjoins existing housing developments.

Candidate Site Suitability

Appendix 1 - Deposit LDP Reps & Responses by Refpoint, Cabinet 15-12-15

Rep'n/Para/Policy	AccessnNo	DateLodgd	Late?	Status	Modified	Summary
-------------------	-----------	-----------	-------	--------	----------	---------

6267.V1		16/07/2015	<input type="checkbox"/>			Summary: Llandrinio - Proposed Alternative Site
---------	--	------------	--------------------------	--	--	---

Source: Website registration	Type: Objection	Mode: Written	Status: Maintained
------------------------------	-----------------	---------------	--------------------

Candidate Site 460 has road access. The site owner has control of the roadside boundary and can therefore provide satisfactory highway access.

Overall, Site 460 provides a huge amount of benefit to the local community of Llandrinio, the housing would be adjacent to existing housing in the village.

The Candidate Site Report stated that all mains services were in place close by and the site could be easily connected to current services and infrastructure.

The site is a deliverable site and the site owner would be willing to enter into a planning obligation to reduce the time limits on development to deliver the site in a shorter time period and to provide the required local needs housing numbers and community contributions.

Conclusion

Candidate Site 460 therefore fulfils the LDP Sustainable Development Aims. The site is a suitable residential site allocation on the grounds of settlement; delivery; site quality and the wider environment; public transport and access; environmental sustainability; well being and; sustainability. The site is an appropriate site for a housing allocation in Llandrinio and its range of services and community amenities; a development of this size would not be limited by any environmental and infrastructure capacity constraints. We would welcome a site visit to discuss the site and proposed housing allocation. Candidate site 460 is therefore preferable to all the other site allocations and the Local Development Plan should be amended accordingly.

Question Representation Texts

Question: 3d. (i) Representation Details

Representation Texts: Introduction

Page 1142

Powys County Council has prepared its deposit proposals document for the Powys Local Development Plan (LDP) which upon adoption will replace the Powys Unitary Development Plan and will be the basis for decisions on land use planning for all of Powys. This deposit proposals document includes the Authority's vision for housing site allocations and we hereby wish to make comment about such site allocations.

Candidate Site 365 was proposed during the call for Candidate Sites in April 2011 and has subsequently failed to be allocated as a housing site within the large village of Four Crosses. We hereby appeal this non-allocation and are of the opinion that the Local Development Plan fails on the ground of soundness.

Soundness of Local Development Plan

The Local Development Plan fails on the ground of soundness criteria CE2. The site allocations do not realistically nor appropriately consider the relevant alternatives nor are they allocated on a robust or credible evidence Base. Site allocations have not been considered with consistent weighting to the sustainable aims.

Candidate Site 371

Candidate Site 365 lies near the centre of Llandrinio, with existing housing developments to both the east and west of the site. The site would form a logistical and proportionate extension to the village. The site represents sustainable development within a sustainable village and it is a deliverable site; there are no constraints and the site is capable of development within the next plan period. There is enough land within the applicant's ownership to resolve any issues that may arise with access to the site.

The Site Appraisal Report submitted with the Candidate Site Proposal Form concluded that the site was suitable to a residential site allocation on the grounds of settlement; delivery; site quality; and the wider environment; public transport and access; environmental sustainability; well being and; sustainability.

Candidate Site 365 is an appropriate site for a housing allocation in Llandrinio. The LDP designates Llandrinio as a "large village" on the basis it has a good range of services and community amenities; the village is therefore recognized as a sustainable location.

â€f

Housing Allocation P29 HA1, Llandrinio

LDP housing allocation Site P29 HA1 is set to the rear of an existing housing development in Llandrinio. It is questioned whether the existing access to this housing development is of a highway standard to cater for more housing in the future without out any major road improvement works.

6267.V10		15/07/2015	<input type="checkbox"/>			Summary: Llandrinio - Alternative Site	
Source:	Website registration	Type:	Objection	Mode:	Written	Status:	Maintained

Candidate Site 365 forms the natural expansion of future housing in Llandrinio with the linking up of a smaller housing development to the larger housing site above (to the front of Site P29 HA1).

Candidate Site Suitability

Candidate Site 365 has a road frontage and a highways infrastructure to the site with compliant visibility splays could be put in place to serve residential development. The site owner has control of the roadside boundary and can therefore provide satisfactory highway access. The site is within 5 minutes walk of the key village services and facilities which provide for day-to-day needs. We note that there is currently no pavement access directly to the heart of the village. The site owner has stated that he would be willing to enter into a planning obligation with the Council to financially contribute to the construction of a new pavement.

The Candidate Site Report stated that all mains services were in place close by and the site could be easily connected to current services and infrastructure.

The site is a deliverable site and the site owner would be willing to enter into a planning obligation to reduce the time limits on development to deliver the site in a shorter time period.

Conclusion

Candidate Site 365 therefore fulfils the LDP Sustainable Development Aims, with specific reference to energy and climate change (1) and (2); waste and water (1; and housing (1). The site is a suitable residential site allocation on the grounds of settlement; delivery; site quality and the wider environment; public transport and access; environmental sustainability; well being and; sustainability. The site is an appropriate site for a housing allocation in Llandrinio and its range of services and community amenities; a development of this size would not be limited by any environmental and infrastructure capacity constraints. We would welcome a site visit to discuss the site and proposed housing allocation. Candidate site 365 is therefore preferable to site allocation P29 HA1 and the Local Development Plan should be amended accordingly.

Question Representation Texts

**Question: 3d. (i) Representation Details**

Representation Texts: Introduction

Powys County Council has prepared its deposit proposals document for the Powys Local Development Plan (LDP) which upon adoption will replace the Powys Unitary Development Plan and will be the basis for decisions on land use planning for all of Powys. This deposit proposals document includes the Authority's vision for housing site allocations and we hereby wish to make comment about such site allocations.

Candidate Site 365 was proposed during the call for Candidate Sites in April 2011 and has subsequently failed to be allocated as a housing site within the large village of Four Crosses. We hereby appeal this non-allocation and are of the opinion that the Local Development Plan fails on the ground of soundness.

**Soundness of Local Development Plan**

The Local Development Plan fails on the ground of soundness criteria CE2. The site allocations do not realistically nor appropriately consider the relevant alternatives nor are they allocated on a robust or credible evidence Base. Site allocations have not been considered with consistent weighting to the sustainable aims.

**Candidate Site 371**

Candidate Site 365 lies near the centre of Llandrinio, with existing housing developments to both the east and west of the site. The site would form a logistical and proportionate extension to the village. The site represents sustainable development within a sustainable village and it is a deliverable site; there are no constraints and the site is capable of development within the next plan period. There is enough land within the applicant's ownership to resolve any issues that may arise with access to the site.

Status Maintained

The Site Appraisal Report submitted with the Candidate Site Proposal Form concluded that the site was suitable to a residential site allocation on the grounds of settlement; delivery; site quality; and the wider environment; public transport and access; environmental sustainability; well being and; sustainability.

Candidate Site 365 is an appropriate site for a housing allocation in Llandrinio. The LDP designates Llandrinio as a "large village"™ on the basis it has a good range of services and community amenities; the village is therefore recognized as a sustainable location.

â€f

Housing Allocation P29 HA1, Llandrinio

LDP housing allocation Site P29 HA1 is set to the rear of an existing housing development in Llandrinio. It is questioned whether the existing access to this housing development is of a highway standard to cater for more housing in the future without out any major road improvement works.

Candidate Site 365 forms the natural expansion of future housing in Llandrinio with the linking up of a smaller housing development to the larger housing site above (to the front of Site P29 HA1).

Candidate Site Suitability

Candidate Site 365 has a road frontage and a highways infrastructure to the site with compliant visibility splays could be put in place to serve residential development. The site owner has control of the roadside boundary and can therefore provide satisfactory highway access. The site is within 5 minutes walk of the key village services and facilities which provide for day-to-day needs. We note that there is currently no pavement access directly to the heart of the village. The site owner has stated that he would be willing to enter into a planning obligation with the Council to financially contribute to the construction of a new pavement.

The Candidate Site Report stated that all mains services were in place close by and the site could be easily connected to current services and infrastructure.

The site is a deliverable site and the site owner would be willing to enter into a planning obligation to reduce the time limits on development to deliver the site in a shorter time period.

Conclusion

Candidate Site 365 therefore fulfils the LDP Sustainable Development Aims, with specific reference to energy and climate change (1) and (2); waste and water (1; andhousing (1). The site is a suitable residential site allocation on the grounds of settlement; delivery; site quality and the wider environment; public transport and access; environmental sustainability; well being and; sustainability. The site is an appropriate site for a housing allocation in Llandrinio and its range of services and community amenities; a development of this size would not be limited by any environmental and infrastructure capacity constraints. We would welcome a site visit to discuss the site and proposed housing allocation. Candidate site 365 is therefore preferable to site allocation P29 HA1 and the Local Development Plan should be amended accordingly.

Map: P30: Llanfair Caereinion - 2015

Issue: 2015: Deposit Draft-02. Housing - Distribution and Numbers

*Question Representation Texts*

**Question: Council Response**

Representation Texts: The Council consider that the distribution of housing across the Settlement Hierarchy is based on a sound rationale which supports the delivery of the LDP strategy and the longer term viability of settlements considered capable of supporting sustainable growth.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: My representation is in relation to the 'Coherence and Effectiveness Test' — CE2. I would like to request the Council and/or the Independent Inspector please consider the following:

Increasing the number of new dwellings planned for Llanfair Caereinion over the life of the LDP

a) The Council's UDP states 'as the local market town (Llanfair Caereinion) has the largest range of community services and facilities and the greatest capacity to accommodate additional development in the locality in terms of infrastructure, as well as visually and socially and has been classified as an Area Centre'. I assume this remains the case and the town's services and facilities mean it still has the greatest capacity in the area to accommodate the building of new dwellings. The draft LDP proposes some 50 new dwellings in the town up to 2026 which is 1% of the 5000 new dwellings planned to be built in Powys during the 10 year period. As Llanfair Caereinion is a designated Area Centre in the UDP, and one of the 15 towns in Powys that 'top' the settlement hierarchy in the draft LDP, a 1% allocation of the total number of proposed new dwellings in the County appears to be a little small.

b) Sustainability of communities is one of the Council's top objectives in the draft LDP. Many people living in a declining market town like Llanfair Caereinion, and the surrounding rural area, believe it is virtually the only consideration. Sustainability is a huge problem in Llanfair Caereinion. Although the town has some wonderful facilities including fantastic Welsh-medium primary and secondary schools, a medical centre, a sports centre and a dental surgery, it has over recent years been on a downward spiral. There are real problems with vacant business premises, empty shops and a lack of jobs. The number of banks, retail outlets and public houses in the town continues to decline. The secondary school is under threat of closure. If this were to happen it would be a disaster for the town and the surrounding area. One of the banks has closed in the last few weeks and the post office has recently moved to a smaller, shared premises — leaving yet more empty buildings. The major factor in all this is the lack of people using the facilities. The best — and in many peoples' eyes the only - way to prevent this downward spiral, alleviate future threats and promote sustainability is to significantly increase the number of adults and children living in the town and using the facilities — particularly the schools. This will, in turn, require more dwellings — particularly mid-range family houses — to be built. The 50 new dwellings planned over 10 years doesn't appear to be sufficient to reverse the destructive trends of recent times and ensure Llanfair Caereinion is revitalised and becomes — as it has been in the past - a vibrant place to live and work.

<p>c) The UDP states that Llanfair Caereinion is a settlement where the Welsh language has been identified as being important to the social, cultural and community fabric and will be a material consideration when determining development proposals'. The draft LDP also emphasises the importance of sustaining/promoting the use of the Welsh language. For the Council to achieve this aim, we need many more people living in the town to sustain the viability of our two Welsh-medium schools and thereby grow the use of the Welsh language.</p>

			Map: P30: Llanfair Caereinion - 2015		Issue: 2015: Deposit Draft-11. Allocated Sites	

Question	Representation Texts
<b>Question:</b>	<b>Council Response</b>
Representation Texts:	This requested area of land to be added to the allocation is divorced from the P30 HA1 by a lane and is higher up the hill looking down onto Llanfair Caereinion having implications on the landscape. This is further evidenced by being in a different aspect area in LANDMAP for the visual and sensory layer. Although both areas have a score of moderate (in the LANDMAP visual and sensory layer) in the LANDMAP Evaluation matrix the additional site (subject to this representation) scores high for Scenic Quality. Furthermore P30 HA1 has been allocated against the recommendations of the Town Council on the basis that the site will be developed sensitively, overcoming highway constraints.

Status Maintained

a) My original submission to the Council included a map (copy enclosed marked 1) which identified the land at Tanyfron — shown as sites A, B and C — that I requested be considered for residential development in the LDP. Site 2 was added later to facilitate the provision of a new access to sites A, B and C. The Council has included sites A, B and 2 in the draft LDP but excluded site C as, I understand, it was thought to be too steep for development. I would like to request that this decision be reconsidered on the following grounds:

i) I understand one of the Council's main aims when allocating land for residential dwellings is to maximise the development viability of the chosen sites. Whilst the building of 30 houses on sites A and B — as per the draft LDP - is clearly viable, there will be significant infrastructure costs involved including decontamination of the land at the garage/petrol station (site 2), building a bridge over the stream separating site 2 and site B, and the provision of new roads and services to sites A and B. The overall viability of sites A, B and 2 to a developer would be greatly increased if an additional row of houses could also be built on site C. I have asked the opinion of a local architect and estate agent on this. Their view is the same; that the sites as proposed are certainly viable as they stand but the attractiveness of the site as a whole to a developer would be greatly enhanced if a row of up to 10 mid-range family houses — the type very much needed in Llanfair Caereinion to help increase the sustainability of the town - could be included on site C. They are happy to provide written confirmation of this if the Council and/or the Inspector requires it.

ii) The inclusion of site C would require only a small adjustment to that part of the development boundary which, as currently proposed, runs along one-side of Broncafnant Lane along the length of site B. For a row of houses to be included on site C, the boundary would only need to be moved some 20 yards on the other side of Broncafnant Lane. Plan 2 (enclosed) outlines the requested change to the development boundary — shown in green. It is for illustrative purposes only and not to scale.

iii) I would request that the Council and/or the Inspector please consider the following points regarding the topography of site C: - Llanfair Caereinion is situated in a valley with steep sides. Virtually every housing development — and certainly all the major ones - undertaken in recent years have been on steep ground on the sides of the valley as there is no more flat land left within the town on which to build houses. All of these developments have been on land much steeper and much more visually intrusive than the single row of houses proposed on site C. The developments have also been on a far greater size and scale than that proposed on site C. - A row of houses on site C would not be visually intrusive. They would not be visible from the town centre and would be almost entirely hidden from view from the main town access road to Broncafnant Lane Watergate St — due to the location of existing houses along Watergate St and the position of established treelines.

- There are many precedents for allowing houses in Powys to be built on steep sites. There are 100's if not 1000's of houses in County built on steeper and more visually intrusive land than site C. Examples of large, recent developments on steep sites include those on Red Bank, Welshpool (P2011 0402) and Milford Road, Newtown (P20 1 1 0590). There are many more examples in Welshpool and Newtown and in other towns in the County.

- More locally, planning permission for two houses has recently been granted in the nearby village of Pontrobert (P2013 0630) on a site which is steeper and much more visually intrusive than site C. Permission was granted by the Council as the designs for the houses 'responded to the steep topography of the site' and because '... the ground floor elevation will retain the ground behind it. This will ensure the dwellings are set into the hillside'. Houses built on site C could easily accommodate the same planning conditions and requirements.

- There are already three houses by the side, and at either end, of Broncafnant Lane. One of these — Broncafnant Cottage — is located in the middle of site C. Further houses on site C would be in-fill.

b) Last week I was contacted by a member of the Council's Building Control Section who wanted to discuss how any 'barriers' hindering the building of houses on the Tanyfron land could be lifted and the development viability of the site maximised. I understand this is part of a Welsh Government initiative to increase the amount of land available for housing. I met with the officer and went through the points in a (i —iii) above. He concluded there was a 'good and logical' case for the inclusion of site C as it would remove a 'barrier' to development of the Tanyfron land by spreading infrastructure costs over more houses and increasing the overall viability of the site as a whole. I understand this view will be included in his feedback to the Welsh Government.

c) I have been informed by the Council that the Tanyfron land complies with many, if not all, the major criteria for residential development applied during its LDP site assessment

process. It is close to the town centre, within walking distance of all the town's facilities including the schools (a major consideration given Llanfair Caereinion's acute traffic problems), already has a public footpath serving the site, is adjacent to another main residential area along Watergate St, is not a green belt site, is not part of economically viable farm land etc. All these matched criteria apply equally to site C as to sites A, B and 2.

d) There are major highway and highway safety gains to be made when sites A, B and 2 are developed. The Council's Highway Department want to close the two dangerous junctions at the end of Broncafnant Lane/Gibbet Road U60271B4389) and the western access point to site 2/B4389. This can only be achieved if sites A, B and 2 are successfully developed and a new access road built. The increase to the development viability of these sites through the addition of site C would hasten the closure of the two junctions.

Question Representation Texts

**Question: Council Response**

Representation Texts: Having considered the representations on this site, it is recommended that the site is not identified as a residential allocation or included within the development boundary of the Local Development Plan for the following reasons the issues remain that there is no provision of footpaths along the C2197 to allow pedestrian access into town. and that highways have deemed the C2013 a narrow country road unsuitable for additional traffic.

Council Response:

0

**Question: 3d. (i) Representation Details**

Representation Texts: Introduction

Powys County Council has prepared its deposit proposals document for the Powys Local Development Plan (LDP) which upon adoption will replace the Powys Unitary Development Plan and will be the basis for decisions on land use planning for all of Powys. This deposit proposals document includes the Authority's vision for housing site allocations and we hereby wish to make comment about such site allocations.

Candidate Site 136 was proposed during the call for Candidate Sites in April 2011 and has subsequently failed to be allocated as a housing site within the village of Llanfair Caereinion. We hereby appeal this non-allocation and are of the opinion that the Local Development Plan fails on the ground of soundness.

Soundness of Local Development Plan

The Local Development Plan fails on the ground of soundness criteria CE2. The site allocations do not realistically nor appropriately consider the relevant alternatives nor are they allocated on a robust or credible evidence Base. Site allocations have not been considered with consistent weighting to the sustainable development aims.

Candidate Site 136

Candidate Site 136 has road access and backs on to existing housing sites. The site would form a logistical and proportionate natural extension to the village. The site represents sustainable development within a sustainable village and it is a deliverable site; there are no constraints and the site is capable of development within the next plan period.

The Site Appraisal Report submitted with the Candidate Site Proposal Form concluded that the site was suitable to a residential or community site allocation on the grounds of settlement; delivery; site quality; and the wider environment; public transport and access; environmental sustainability; well being and; sustainability.

Candidate Site 136 is an appropriate site for housing in Llanfair Caereinion. The LDP designates Llanfair Caereinion as a "large village" on the basis it has a good range of services and community amenities; the village is therefore recognized as a sustainable location.

6267.V5		16/07/2015	<input type="checkbox"/>			Summary: Llanfair Caereinion Alternative Site	
Source:	Website registration	Type:	Objection	Mode:	Written	Status:	Maintained

Housing Allocation, Llanfair Caereinion

There are two site allocations for housing in Llanfair Caereinion. However, Candidate Site 136 appears to form the natural expansion of future housing in Llanfair Caereinion as it adjoins existing housing and has good access from the road.

Candidate Site Suitability

Candidate Site 136 has road access. The site owner has control of the roadside boundary and can therefore provide satisfactory highway access.

Overall, Site 136 provides a huge amount of benefit to the local community of Llanfair Caereinion; the housing would be adjacent to existing housing in the village.

The Candidate Site Report stated that all mains services were in place close by and the site could be easily connected to current services and infrastructure.

The site is a deliverable site and the site owner would be willing to enter into a planning obligation to reduce the time limits on development to deliver the site in a shorter time period and to provide the required local needs housing numbers and community contributions.

Conclusion

Candidate Site 136 therefore fulfils the LDP Sustainable Development Aims. The site is a suitable residential site allocation on the grounds of settlement; delivery; site quality and the wider environment; public transport and access; environmental sustainability; well being and; sustainability. The site is an appropriate site for a housing allocation in Llanfair Caereinion and its range of services and community amenities; a development of this size would not be limited by any environmental and infrastructure capacity constraints. We would welcome a site visit to discuss the site and proposed housing allocation. Candidate site 136 is therefore preferable to all the other site allocations and the Local Development Plan should be amended accordingly.

**Question: 3d. (i) Representation Details**

Representation Texts: Introduction

Powys County Council has prepared its deposit proposals document for the Powys Local Development Plan (LDP) which upon adoption will replace the Powys Unitary Development Plan and will be the basis for decisions on land use planning for all of Powys. This deposit proposals document includes the Authority's vision for housing site allocations and we hereby wish to make comment about such site allocations.

Candidate Site 119 was proposed during the call for Candidate Sites in April 2011 and has subsequently failed to be allocated as a housing site within the village of Llanfair Caereinion. We hereby appeal this non-allocation and are of the opinion that the Local Development Plan fails on the ground of soundness.

Soundness of Local Development Plan

The Local Development Plan fails on the ground of soundness criteria CE2. The site allocations do not realistically nor appropriately consider the relevant alternatives nor are they allocated on a robust or credible evidence Base. Site allocations have not been considered with consistent weighting to the sustainable development aims.

Candidate Site 119

Candidate Site 119 has road access and is adjacent to existing housing sites. The site would form a logistical and proportionate natural extension to the village. The site represents sustainable development within a sustainable village and it is a deliverable site; there are no constraints and the site is capable of development within the next plan period.

The Site Appraisal Report submitted with the Candidate Site Proposal Form concluded that the site was suitable to a residential or community site allocation on the grounds of

settlement; delivery; site quality; and the wider environment; public transport and access; environmental sustainability; well being and; sustainability.

Candidate Site 119 is an appropriate site for housing in Llanfair Caereinion. The LDP designates Llanfair Caereinion as a "large village"™ on the basis it has a good range of services and community amenities; the village is therefore recognized as a sustainable location.

â€f

Housing Allocation, Llanfair Caereinion

There are two site allocations for housing in Llanfair Caereinion. However, Candidate Site 119 appears to form the natural expansion of future housing in Llanfair Caereinion as it is adjacent to existing housing sites.

Candidate Site Suitability

Candidate Site 119 has road access. The site owner has control of the roadside boundary and can therefore provide satisfactory highway access.

Overall, Site 119 provides a huge amount of benefit to the local community of Llanfair Caereinion; the housing would be adjacent to existing housing in the village.

The Candidate Site Report stated that all mains services were in place close by and the site could be easily connected to current services and infrastructure.

The site is a deliverable site and the site owner would be willing to enter into a planning obligation to reduce the time limits on development to deliver the site in a shorter time period and to provide the required local needs housing numbers and community contributions.

Conclusion

Candidate Site 119 therefore fulfils the LDP Sustainable Development Aims. The site is a suitable residential site allocation on the grounds of settlement; delivery; site quality and the wider environment; public transport and access; environmental sustainability; well being and; sustainability. The site is an appropriate site for a housing allocation in Llanfair Caereinion and its range of services and community amenities; a development of this size would not be limited by any environmental and infrastructure capacity constraints. We would welcome a site visit to discuss the site and proposed housing allocation. Candidate site 119 is therefore preferable to all the other site allocations and the Local Development Plan should be amended accordingly.

Question Representation Texts

**Question: Council Response**

Representation Texts: In allocating the site P31 HA1 the Council has considered its relevant planning merits and has concluded that the site is the most appropriate to meet the needs identified. In allocating the site in the LDP, the potential impacts that development would have on adjacent land uses, access to services, environmental constraints and other planning designations have all formed a consideration and the Council is of the view that such detailed issues can be addressed through sensitive site design and appropriate site management arrangements. The Council will require a development brief to be prepared prior to any planning application to establish how the site should be developed to take into account the issues/constraints raised by various stakeholders.

Council Response:

0

**Question: 3d. (i) Representation Details**

Representation Texts: If Llanfechain remains designated a 'Large Village' the Llanfechain Community Council asks that you reconsider the allocation of site 711 as the preferred site for development.

Our previous submission to you judged site 711 to be 'amber' meaning that development was possible but there were some difficulties/objections. They deserve repeating with some addition.

First, the development is beside the conservation area and therefore any development needs to be in sympathy with the existing buildings;

second, several houses within the conservation area that lie alongside site 711 should be provided with gardens not least for privacy;

third, two footpaths cross this area one of which forms part of the community's 'circular trail';

fourth, the entrance to the sewage facility crosses this area; and fifth, the northern part is close to the flood plain.

In addition, you will be aware that both an electricity line and sewage pipe run through this site. We are also very concerned that there will be an increase in traffic through the main entrance to the village which, as we noted in our original submission, has to cope with quite a lot of agricultural and other industrial traffic as well as most of the domestic traffic of the community. It is also an entrance that is on an 'S' bend on a road where there have been accidents; we have been engaged with PCC seeking road safety improvement.

Our submission judged site 1068 to be 'green'; there were no obvious difficulties. One important consideration had been that when the estates to the east and west of the village had been built (i.e. the Mount and Maes Derw/Pen-y-Maes) neither had vehicle or foot access to the core of the village (pub, school, Hall, Church, and more recently shop) so residents had to go out onto the main road if they wanted to get into the core of the village. This we felt mitigated against good community access not, in our opinion, good for the aging population the housing type has accommodated.

Our hope therefore was that if site 1068 was chosen a safe vehicle or just foot path access connecting Maes Derw with Maes Dinas might alleviate this access problem. If a

Question Representation Texts

**Question: Council Response**

Representation Texts: The Council disagree with the proposed changes requested by the Representer. The Representer does not raise new issues or evidence which lead the Local Planning Authority to change its conclusions. It is accepted that Llanfechain did not receive any housing allocations in the UDP to reflect the housing development that had taken place in previous years, but the population and services sustained by the village make it comparable to other large villages in the hierarchy.

Council Response:

0

**Question: 3d. (i) Representation Details**

Representation Texts: 1) PREAMBLE  
Llanfechain is a small village, which has already accommodated major housing developments. The planners acknowledged that in their current UDP. They go on to confirm that there has been a large amount of housing development and they did not anticipate any significant development in the foreseeable future.

To expect the community to accept a further 11% in new housing is totally unreasonable.

A small development of affordable housing, for local needs, say five or six units, might be acceptable. It is likely that a Housing Association would provide these. A small site for this could be found closer to the village centre.

The development of land on the outskirts of the village is not inevitable. The mere fact that someone has purchased land in this area, in the hopes of gaining planning permission to build, is simply a speculative gamble.

This is prime agricultural land, which forms an important wildlife habitat. It should be jealously guarded against any further development and preserved for future generations to enjoy. The massive amount of damage to the natural environment would be irreparable.

There are plenty of fully serviced areas within the central village core which could accommodate the small scale developments which would satisfy the village needs in the foreseeable future.

2) HISTORICAL EVIDENCE

In the 1950's and 1960's, before any new housing developments, there were 3 Shops, a full time Post Office and 2 Pubs. The Primary School had between 30 & 40 pupils. There were 2 chapels and the church, together with a vicarage, chapel ministers house and schoolmasters house.

In the intervening years the new housing developments have probably doubled the number of houses in the village.

Despite this we are now left without any private shops and one pub. The Post Office, which is housed in the community shop, is for one day a week only and it now seems likely

---

that the church will have to close it's doors for regular services. Both chapels have closed and the rectory, chapel and school houses sold off. In later years a petrol filling and shop situated on the B393 failed. This was despite the fact that the new housing developments had, by this time, been completed.

The Primary School now has around 30 pupils. There has been no significant increase in pupil numbers.

The evidence of history clearly shows that simply building more houses will have little positive effect on the community, it's services and businesses. If the authority truly wishes to help sustain the community then it's efforts would be better put to job creation. This is the only way that young people will be retained in the locality.

Unfortunately the down side of development is an increase in demand of the already overstretched health and care services, particularly in respect of the elderly.

Question Representation Texts

**Question: Council Response**

Representation Texts: This representation is considered to be in support of the Deposit Local Development Plan. No changes are therefore required.

Council Response:

0

**Question: 3d. (i) Representation Details**

Representation Texts: POWYS LOCAL DEVELOPMENT PLAN - LLANFECHAIN AGREEMENT WITH 'PREFERRED SITE' CHOICE

Whilst we are generally against current housing development, it is felt that candidate site ZiJ. is the most suitable to serve future housing needs in the village. The reasons for this are as follows:

1) Natural site for development.

The site is closest to the old village centre and is the natural area to be developed first. Common sense would dictate that this site takes precedence over an area of prime agricultural land on the outskirts of the village (candidate site 1068, the site proposed by the Community Council ) which provides a wildlife habitat for, amongst others, Curlews, Pipitrel Bats and Barn Owls.

2) Drains and services are available.

Mains water, electricity, Telecom and foul and surface water drains are readily available. Of particular importance is the fact that foul and surface water drains can be connected to the public sewer by gravity. The readily availability of services will reduce development costs, thus making it easier to provide affordable housing for local people. In contrast there are no sewage connections on the other sites and expensive pumped systems will have to be constructed which will become a long term maintenance liability for the rate payers. The ready availability of services will reduce development costs, thus making it easier to provide affordable housing.

3) Access to the B393

a) The preferred Site 711 [P31 HA1] uses the existing village access to the B393 and whilst this is not perfect, it is preferable to the alternative Maes Derw access. Visibility splays to the existing village access could be improved, possibility from the 'community money', arising from the housing development. Visibility to the Llanfyllin side of the junction, could be dramatically improved, by re-aligning the hedge which projects beyond the visibility splay wall. These improvements at the junction would benefit the whole village.

b) The alternative access to the B393 at Maes Derw, which serves Site 1068, has a major problem in respect of speeding and overtaking vehicles. It is understood that the Community Council has suggested that this estate access be upgraded to provide a 'through traffic' route. These measures would be universally opposed by persons living on the estate and adjacent housing. Any proposal to increase traffic usage of this access would require major traffic calming measures. These would include speed bumps and a 10 mph speed limit on the estate road and Speed Bumps and restrictions on the B393 main road.

It would be reckless and irresponsible to allow an increase in traffic at the Maes Derw junction.

4) Inadequate Sewage System

The Llanfechain sewage works and infrastructure was constructed almost 50 years ago and to serve a much smaller village. In the intervening years the number of dwellings has

by: Representation No

Filtered to show: (all of) Stage=V; Status=M

Rep'n/Para/Policy	AccessnNo	DateLodgd	Late?	Status	Modified	Summary
2101.V5		16/07/2015	<input type="checkbox"/>			Summary: Supporting Allocated Site P31 HA1

Source: Post or in person      Type: Support      Mode: Written      Status: Maintained

probably doubled. The modern family lifestyle also means a much greater water usage for the individual householder. There is obviously potential for over-load of the sewage treatment plant, at peak times, which would lead to environmental pollution. If the village is re-classified as a "large village" this will trigger additional "Windfall developments". Which would create a greater load on the plant.

The Severn Trent Water Authority should be lobbied to upgrade / re-construct the works. This should be a comprehensive civil engineering project to include new trunk sewers to serve not only the new areas, but also to existing dwellings, not on the mains system. This should be undertaken before any further housing development areas are identified

It would be criminally irresponsible of the Authority to schedule any further housing whilst knowing that there is a major and increasing risk of environmental pollution.

It is noted a new "state of the art" sewage works has been completed at Llanfyllin. This fully complies with E.U. regulations in respect of effluent discharge requirements. This is another reason supporting major housing developments in Llanfyllin town.

Clearly the question of which candidate site to adopt is proving very divisive and unfortunately it will not now be possible to obtain an objective decision locally. The final decision should be based on professional knowledge and fact and free from the influences of vested interests and "nimbyism".

Yours faithfully,

Question Representation Texts

**Question: Council Response**

Representation Texts: This representation is considered to be in support of the Deposit Local Development Plan. No changes are therefore required.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: Acting as agent/spokesperson for a large group of residents, I would like to voice our support for the site 711 (P31 HA1) proposed for future development in Llanfechain.

We support the Planning department's proposal for this site as a logical extension to the village with good access to the village centre, but feel that our Community Council has a not to hidden agenda by proposing an alternative site. Behind it all appears to be the pursuit of another main route into Llanfechain. This would open a road through quiet residential cul-de-sacs to detriment of existing residents and create probably a more dangerous route than the existing one to the village centre.

To reinforce their argument the community council have previously described these residents as 'an isolated sub-community', divorced from the village centre by having to walk a short stretch of the B4393 and as a result 'mitigating them from community involvement'. This is totally untrue as these residents play a full and active role within Llanfechain community which can easily be verified. Quite often we are described as 'the wrong demographic' and see the Community Council's attitude to us as hostile.

Although there had been plenty of time to preare the Council's response to the LDP it did not come up for discussion until 14th July and we will have no time to consider it in full even if we see it before 20th July deadline, but we believe it to similar to their previous submission and have based our representation on that.

Question Representation Texts

Question: Council Response

Representation Texts: In allocating the site at P31 HA1 the Council has considered its relevant planning merits and has concluded that the site is the most appropriate to meet the needs identified. In allocating the site in the LDP, the potential impacts that development would have on adjacent land uses, access to services, environmental constraints and other planning designations have all formed a consideration and the Council is of the view that such detailed issues can be addressed through sensitive site design and appropriate site management arrangements. In response to the concerns raised in the various representations a Development Brief will be required for this site prior to the submission of a planning application, this will give stakeholders an opportunity for their concerns to be addressed through the design process. An FCA has been carried out on this site to determine the nature of any groundwater flooding this will need to be updated and reviewed. To date there is no evidence that the site boundary needs to be amended.

Council Response:

0

Question: 3d. (i) Representation Details

Representation Texts: Please review additional 16 page document with supporting photos as attached to the submission email for full details.

Summary of document from submission email included below:

The nomination of the field for planning appears not to have followed the objective methodology set out within the LDP process.

The scoring for each of the fields does not appear to have been totalled correctly.

The scoring for each field is not on an equitable basis, the fact the owners of site P31 have suggested that they would be willing to develop the ground should be discounted, as it is not part of the planning matrix- this is outside influence.

Any development on the field should be subject to a design brief that reduced the impact on the residents who directly border the field.

The allocation should be formally adjusted at this stage to prevent built development other than to the eastern half of the field, allowing a decent buffer zone for the existing houses, and preventing building on the area of the field that floods.

Any planning has to take into account the presence of great crested newts and a suitable habitat survey should be carried out, a green corridor should at least be created along the western boundary of the field.

For a similar purpose due to the nature of the houses to the western boundary provision for privacy should be allocated, potentially for gardens- this would pacify the strong feeling of loss of integrity for the conservation area and those homeowners.

Question Representation Texts

**Question: Council Response**

Representation Texts: In allocating the site at P31 HA1 the Council has considered its relevant planning merits and has concluded that the site is the most appropriate to meet the needs identified. In allocating the site in the LDP, the potential impacts that development would have on adjacent land uses, access to services, environmental constraints and other planning designations have all formed a consideration and the Council is of the view that such detailed issues can be addressed through sensitive site design and appropriate site management arrangements. In response to the concerns raised in the various representations a Development Brief will be required for this site prior to the submission of a planning application, this will give stakeholders an opportunity for their concerns to be addressed through the design process. An FCA has been carried out on this site to determine the nature of any groundwater flooding this will need to be updated and reviewed. To date there is no evidence that the site boundary needs to be amended. Severn Trent have confirmed that they have plans to upgrade the Sewage Treatment Works in the near future which shall serve to address the issues raised regarding infrastructure capacity.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: My main objection is that the site slopes down into an area prone to flooding (although the formal Flood Zone is not apparently impinged upon) and is situated above a river which is very prone to burst its banks. This makes the site in my view clearly inappropriate for accommodating 25 houses which would appear to be in contravention of:

“4.2 Development Management Policies:  
 Policy DM1 - Strategic Planning Matters @ 34.26  
 All proposals for development must not compromise, or unacceptably adversely affect, either on their own or in combination with existing or approved development, the following

:  
 4.2.20 Flooding . Development is directed away from areas at high risk from flooding and must not increase flood risk elsewhere, and where possible should allow floodplains to provide water storage to reduce flooding in the catchment”.

Further, the sewage treatment plant would be unable to cope since it is known I believe that during periods of heavy rain raw sewage is flushed into the river which must be in contravention of 4.2.15 Achievement of Water Quality Standards in line with the Water Framework Directive. Presumably any new development would require a major upgrade to the sewage system.

I also believe this would potentially increase traffic through the heart of what used to be a small village until recently, become “large” only by virtue of much recent building without any real increase in amenities.

Under Issues / Infrastructure / S106 Requirements (Base date for planning permission information - 31/12/2013) if “the existing unadopted highway would need to be upgraded and offered for adoption in order to serve the allocation” refers to the road running through the centre of the village past the church, then this would appear impossible without

encroaching on the ancient churchyard and properties either side, so I presume this refers to highway between “the adjacent housing estate Phase II Maes Dinas (U4978)” and the main road B4393. Otherwise highway safety as alluded to under 4.2.40 Transport. “Highway access and parking requirements are important considerations for most developments, especially the implications they have for highway safety, the environment, local communities and the economy”, would be compromised and the conservation area significantly and deleteriously altered.

Council Response: 0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: Development of only the top part of the area designated P31 HA1 would be less liable to cause problems; a few houses might serve as a pilot to ensure there are no unintended or unanticipated problems while allowing more area to install suitable 4.2.32 Sustainable Drainage Systems and less consequent traffic out of the village.

Better still would be development to the east which is already more developed and closer to the main road facilitating access. It seems wholly counter intuitive to develop the heart of the village by “infill” when it is the very nature of that heart which cannot support such development due to proximity to the river and a very narrow village main street which has no pavement and could not accommodate one.

Question	Representation Texts
<b>Question:</b>	<b>Council Response</b>
Representation Texts:	Having considered the representations on this site, it is recommended that the site is not identified as a residential allocation or included within the development boundary of the Local Development Plan for the following reason it is unclear whether a safe means of access could be created due to the small frontage abutting the county highway. The site is further away from the heart of the settlement and facilities than the site allocation proposed in the Deposit plan.

Question Representation Texts

**Question: Council Response**

Representation Texts: In allocating the site at P31 HA1 the Council has considered its relevant planning merits and has concluded that the site is the most appropriate to meet the needs identified. In allocating the site in the LDP, the potential impacts that development would have on adjacent land uses, access to services, environmental constraints and other planning designations have all formed a consideration and the Council is of the view that such detailed issues can be addressed through sensitive site design and appropriate site management arrangements. In response to the concerns raised in the various representations a Development Brief will be required for this site prior to the submission of a planning application, this will give stakeholders an opportunity for their concerns to be addressed through the design process. An FCA has been carried out on this site to determine the nature of any groundwater flooding this will need to be updated and reviewed. To date there is no evidence that the site needs to be deleted.

Council Response:

*Question Representation Texts*

**Question: Council Response**

Representation Texts: Having considered the representations on this site, it is recommended that the site is not identified as a residential allocation or included within the development boundary of the Local Development Plan for the following reason it is unclear whether a safe means of access could be created due to the small frontage abutting the county highway. The site is further away from the heart of the settlement and facilities than the site allocation proposed in the Deposit plan.

Question Representation Texts

**Question: Council Response**

Representation Texts: In allocating the site P31 HA1 the Council has considered its relevant planning merits and has concluded that the site is the most appropriate to meet the needs identified. In allocating the site in the LDP, the potential impacts that development would have on adjacent land uses, access to services, environmental constraints and other planning designations have all formed a consideration and the Council is of the view that such detailed issues can be addressed through sensitive site design and appropriate site management arrangements. All the sites that have been allocated have been discussed in detail with the Council's Highway Engineers, this means that all of the allocations are deliverable without any major highway constraints. At the planning application stage all developments are required to demonstrate that adequate and safe highway access is to be provided for all users, and that it is designed to meet the Council's highway design criteria. The Council shall also seek to ensure that future development mitigates any possible adverse impacts associated with an increase in traffic.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: Proposed site P31 HA1:

- 1) The village of Llanfechain is split into 3 areas a) The council housing b) The modern bungalows built in the late 1900's c) The old Village. My objection is that the proposed site is adjacent to the old village when it would blend into the village better adjacent to the modern bungalows.
- 2) Road Safety - Vehicular access is via Maes Dinas. This will feed traffic out onto the B4393 via the village entrance which has particularly poor visibiilty right and left. A scheme using Maes Derw which has superior visibility would be less risky.
- 3) Noise - The site entrance is narrow and close to the boundary of my property at Church View and the adjacent house ' Central House' This would generate increased traffic noise.
- 4) Privacy - the closeness of the entrance would also reduce privacy.

----------	----------------------	------------------

**Question: Council Response**

Representation Texts: This representation is considered to be in support of the Deposit Local Development Plan. No changes are therefore required.

Council Response:

0

**Question: 3d. (i) Representation Details**

Representation Texts: As a joint owner of land in Llanfyllin, I wish to support the current LDP proposals to include Site Nos: 277, 278, 309, 310.

These parcels of land are well located sites, which adjoin existing settlements on the entrance to the town along the A490, and ground is suitable for all services. Under the old Montgomeryshire Local Plan, full planning for a development site was previously granted on the ground east of Maesydre.

There is a lack of housing in the area, including that required for local needs. Additional development will help to protect the local community facilities, and meet future needs.

The sites are away from flood areas, in accordance with proposals.

Dev Boundary Amendment

Map: P32: Llanfyllin - 2015

Issue: 2015: Deposit Draft-14.Miscellaneous

*Question Representation Texts*

**Question: Council Response**

Representation Texts: The Council disagree with the proposed changes requested by the Representor. The site has not been delivered within the lifetime of the Mont Local Plan or the UDP. No evidence has been recieved to say that the proposer is willing to develop the site within the lifetime of the LDP.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: The area of land referred to, is noted in the candidate sites register as "Site Ref 124 - Land Adjoining Bachie Road, Llanfyllin.

The Representor number is 5635.

This is an infill site set between the Primary School and existing residential development.

The area of land referred to is included in the current UDP as part of housing allocation M157 HA3. However, this has now been excluded from the draft LDP map in total. The exclusion also excludes my client's land from the Town's Development Boundary. (Whilst currently included in the UDP).

In deleting the larger UDP allocation - M157 HA3, my client's site has also been incorrectly removed from within the Town Development Boundary, without any further consultation. We note from the "Sites Status Master" on the LDP website that the comments were as follows: "Mostly greens from stakeholders including Highways (need to provide safe access created onto C2032 requiring extension to 5.5m wide carriageway and continuous 1.8m wide footway across entire site frontage). Ecology concerns regarding bats and hedgerows (orange). Minerals Cat 2 Slate (Orange). We cannot therefore see the justification for removing this site from the plan.

The site location is indicated on the plan copied to the adjoining sheet. My client's land is outlined in red.

Council Response: 0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: To amend the consultation draft plan development boundaty for Llanfyllin - to include the area of land (outlined in red on the attached plan)

Council Response: 0

Issue: 2015: Deposit Draft-12. Alternative Sites

*Question Representation Texts*

**Question: Council Response**

Representation Texts: Having considered the representations on this site, it is recommended that the site is not identified as a residential allocation or included within the development boundary of the Local Development Plan for the following reasons: -

1. Sufficient allocated land or sites with the benefit of planning permission are available elsewhere within the settlement to meet future residential land requirements.
2. This site is a UDP allocation and a Mont Local Plan allocation before that. The last time planning permission was granted on the land was in 1983, a planning permission that was never implemented. This representation does not provide any further evidence on deliverability.

Council Response:

0

**Question: 3d. (i) Representation Details**

Representation Texts: The area of land referred to, is noted in the candidate sites register as "Site Ref 124 - Land Adjoining Bachie Road, Llanfyllin.

The Representer number is 5635.

This is an infill site set between the Primary School and existing residential development.

The area of land referred to is included in the current UDP as part of housing allocation M157 HA3. However, this has now been excluded from the draft LDP map in total. The exclusion also excludes my client's land from the Town's Development Boundary. (Whilst currently included in the UDP).

In deleting the larger UDP allocation - M157 HA3, my client's site has also been incorrectly removed from within the Town Development Boundary, without any further consultation. We note from the "Sites Status Master" on the LDP website that the comments were as follows: "Mostly greens from stakeholders including Highways (need to provide safe access created onto C2032 requiring extension to 5.5m wide carriageway and continuous 1.8m wide footway across entire site frontage). Ecology concerns regarding bats and hedgerows (orange). Minerals Cat 2 Slate (Orange). We cannot therefore see the justification for removing this site from the plan.

The site location is indicated on the plan copied to the adjoining sheet. My client's land is outlined in red.

Question Representation Texts

**Question: Council Response**

Representation Texts: Having considered the representations made on the allocation of this site, it is recommended that the site be retained as a residential allocation within the Local Development Plan for the following reasons:  
 1. The site provides an important contribution to meeting future residential land requirements of the settlement - The LDP must provide sufficient housing land allocations to meet the future housing needs of the County up to the year 2026.  
 2. In meeting the plan's sustainability objectives the LDP has allocated residential sites according to a strategic settlement hierarchy, which recognises a settlement's capacity to accommodate development taking into account the services and infrastructure of the settlement.  
 3. The Council is unaware of any technical (e.g. highway access, flooding) and/or environmental (e.g. SSSI, SAM) constraints that prevent the development of this site. Any issues that need to be taken into consideration are listed in Appendix 1 of the LDP Written Statement.  
 4. Developers will be expected to ensure that any necessary infrastructure improvements required or resulting from the proposed development are provided.  
 5. The site is located in what is considered to be a sustainable location accessible to local facilities and services.  
 Following careful consideration of the representation made and any associated evidence submitted the Council maintains 1-5 above.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: Concerns over the 'over-development' that I think seems to be in your future plans for Llanfyllin, and in particular the small field adjacent to our property (Cymerau Derwlwyn Lane) which is also adjacent to farm buildings

Council Response: 0

**Question: 3d. (ii) Desired changes to Document**

Question Representation Texts

**Question: Council Response**

Representation Texts: Having considered the representations made on the allocation of this site, it is recommended that the site be retained as a residential allocation within the Local Development Plan for the following reasons:

1. The site provides an important contribution to meeting future residential land requirements of the settlement - The LDP must provide sufficient housing land allocations to meet the future housing needs of the County up to the year 2026.
2. In meeting the plan's sustainability objectives the LDP has allocated residential sites according to a strategic settlement hierarchy, which recognises a settlement's capacity to accommodate development taking into account the services and infrastructure of the settlement.
3. The Council is unaware of any technical (e.g. highway access, flooding) and/or environmental (e.g. SSSI, SAM) constraints that prevent the development of this site. Any issues that need to be taken into consideration are listed in Appendix 1 of the LDP Written Statement.
4. Developers will be expected to ensure that any necessary infrastructure improvements required or resulting from the proposed development are provided.
5. The site is located in what is considered to be a sustainable location accessible to local facilities and services.

Following careful consideration of the representation made and any associated evidence submitted the Council maintains 1-5 above.  
The Representer has further concerns regarding any proposed new development having an unattractive impact on the entrance into the town; it is for this reason that a development brief is to be produced prior to the submission of any planning application.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: P32 HA2 proposes a development of 145 houses. 145 extra houses would be a disproportionately large increase to the town of Llanfyllin – which currently has 675 houses and a population of about 1500. Services are currently at full capacity. Doctors have about 11,000 patients Llanfyllin Primary School is using portacabins Gas provision is not available for new houses Town is largely dependent on a single employer (Stadco) and few other jobs are available Transport links are poor and under threat This massive new estate would provide an unattractive entrance to the town

Council Response: 0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: Remove P32 HA2 while retaining P32HC1 and P32HA1

Council Response: 0

Question Representation Texts

**Question: Council Response**

Representation Texts: These comments are noted. However, no changes are considered necessary to ensure that the Plan is sound. Llanfyllin is classed as a Town in the LDP strategy which adopts the approach of a sustainable settlement hierarchy. As part of this approach the majority of development is directed to towns such as Llanfyllin and large villages. With regards to the allocation (being referred to) acting as an entrance to the town - the plan is to produce a development brief to make sure that the design and layout of the development takes this into consideration and becomes an attractive gateway.

Council Response:

0

**Question: 3d. (i) Representation Details**

Representation Texts: Comments re Local Development Plan Powys 2015

Further to my observations in regard to the Draft Local Development Plan and discussions with Peter Morris, Head of Spatial Planning and built heritage. I would like to state my great concern at the complete failure of Powys County Council to acknowledge the full requirements of the Local Development Plan Guidelines from the Welsh Assembly Government. The Guidelines are comprehensive in their scope to ensure that development in Wales is holistic and not just based around housing.

The problem has been that the Local Development Plan has been viewed as an updated version of the Unitary Development Plan and as it has been generated by the Planning Department alone it has been seen as a planning document rather than a development document.

When I raised this issue with Peter Morris, his inability to comprehend and his unwillingness to acknowledge this observation was very concerning. Looking at the correspondence and Powys County Council regarding the development of the Local Development Plan it is obvious that the Welsh Assembly shares my concerns.

If this is a public consultation there has to be evidence that the public's concerns and views have been fully investigated and addressed. The draft LDP did not conform with Regulation 17 in regard to evidence being available and this occurred again at the consultation, except apparently on line. There is no evidence in the full document that issues raised about the draft document have been considered. The level of the consultation for the full plan was even poorer than for the draft, being only afternoon access in a small number of the conurbations that have a planning office over a period of four days. This meant that most of the population had very limited access to the process and little publicity in regard to the consultations had taken place.

In particular the LDP for Llanfyllin shows only a new mass housing development to the east of the town in open countryside on a north facing slope. The orientation of the housing will make it impossible to conform with low carbon and passive solar gain design standards. The location of the proposed estate's vehicular and pedestrian exit on to the existing road, as required by Highways, will greatly impede elderly and non car access to the town centre. The town is already in the bottom 10% of settlements in Wales for access to services according to Welsh Assembly statistics and this will do nothing to improve the situation in an area with an increasingly elderly and frail population.

<i>Rep'n/Para/Policy</i>	<i>AccessnNo</i>	<i>DateLodgd</i>	<i>Late?</i>	<i>Status</i>	<i>Modified</i>	<i>Summary</i>
6192.V3		17/07/2015	<input type="checkbox"/>			Summary: Llanfyllin - General comments & objections
Source: Email			Type: Objection			Mode Written
						Status Maintained

---

I question whether there is even a need for such a large number of new housing in Llanfyllin. My limited research contacting the local Housing Associations, Powys County Council and estate agents suggests that the requirement is limited to considering only small scale housing, mainly for the elderly and frail.

Llanfyllin has a fortunate position as a gateway to Vyrnwy and the Berwyns which is currently under developed. This LDP proposal will blight the entrance to the town creating a form of ribbon development that goes counter to the WAG guidelines.

The proposed Local development Plan for Llanfyllin does nothing in regard to sustainability of the environment, transport, education, health, tourism, industry or community. Llanfyllin has great potential as a tourist node for a network of cycling, walking and touring breaks in Mid Wales. At present nothing is made of this unique and unspoilt location and character of both town and countryside.

New Site

Map: P32: Llanfyllin - 2015

Issue: 2015: Deposit Draft-12. Alternative Sites

*Question Representation Texts*

**Question: Council Response**

Representation Texts: The employment site in Llanfyllin is currently allocated for Employment Use in the current UDP which runs out mid-2016. Therefore there is nothing preventing an application being submitted or pre-application advice being sought now.

With regards to the LDP, the site has not been allocated in the Deposit plan 2015. The reasoning behind this is that by excluding it from the development boundary there would be a presumption against the land being developed by non-employment forms of development, whilst the use of the site for employment would be supported by policy E2 in the deposit plan.

Council Response:

0

**Question: 3d. (i) Representation Details**

Representation Texts: The site known as Old Station Yard has been detailed on the Local Development Plan inset map for Llanfyllin as a "local nature reserve" and is shown to be outside the development boundary. On the 2010 Unitary Development Plan for Llanfyllin this same area is detailed as a "Local employment site" and is within the development boundary.

The Old Station Yard was the only parcel of land detailed as employment land in Llanfyllin in the UDP. Removing it and consequently having no land within Llanfyllin allocated as employment land is not in line with Powys CC's policy to promote job opportunities and support this local economy.

The loss of the Old Station Yard from Llanfyllin contradicts the Powys CC target for supply of employment land / development. Not only is there a net loss from Powys but a total loss of employment land in Llanfyllin.

The Landowners have in recent times, been approached by a number of local people from Llanfyllin looking to use this site for industrial / employment purposes which demonstrates a clear need for this parcel to stay included as employment land.

There is no reasoning or research behind why this site has been allocated as a local nature reserve.

It is therefore requested that the area known as the Old Station Yard, is changed from being allocated as a local nature reserve to a local employment site and is brought back within the development boundary.

Additional Evidence Submitted:

- 1) UDP Inset Map M157 Llanfyllin
- 2) Draft LDP Map P32 (Ref Point 35.57) showing site coloured yellow
- 3) Proposed site boundary map at 1:1,250 scale
- 4) Document headed "Proposed Use for the Site"

**Question: Council Response**

Representation Texts: In response to the concerns and issues raised in the representation: a) It is acknowledged that there is a no build area within the site due to a covenant, discussions with the agent indicate it may be possible to use this area as garden / amenity space. The Council has calculated the dwelling capacity of the site at 25+ dwellings per hectare, which reflects the density of development within Powys and is the standard to be applied to all Towns and Large Villages identified under Policy H3, however it may be the case that this site supports less than the eight specified dwellings. b) it is anticipated that if this site were to be developed for market housing there would be a requirement for one of the dwellings to be affordable. c.). In allocating the site the Council has considered its relevant planning merits and has concluded that the site is the most appropriate to meet the needs identified. In allocating the site in the LDP, the potential impacts that development would have on the historic environment have formed a consideration and the Council is of the view that such detailed issues can be addressed through sensitive site design. d, e, f, g) Following careful consideration of the highway issues raised and detailed consultation with PCC Highway engineers it is proposed that the access road to the proposed development falls further south along the B4391, outside of the development boundary away from the existing access points. This will remove the concerns raised regarding the proximity of the road to Cae Golygfa and the existing access points. This will result in the new access point being created in an area of flood risk which will need to be addressed through a Flood Risk Assessment at the planning application stage.

Council Response:

0

**Question: 3d. (i) Representation Details**

Representation Texts: a)This site proposal for eight houses appears to be based on the premise that the site is 0.3 ha. The site map includes a no build area recorded in the deeds to 'The Old Vicarage' which limits building within 20 metres of the property fence line. In addition part of this site on the NE of the site includes the garden of the home owned by a local businessman? Finally the sewer that runs across the sight will also restrict building options.The proposed road will reduce the building area available for construction of homes.

b)The site impinges on the present development area for the village, justified by the inclusion of 0.8 of an affordable house. Recent research by the Powys 'Affordable Housing Officer' has confirmed the need for this type of housing therefore affordable housing should be given higher priority if the Development boundary is to change. The need for more substantial properties can be met by smaller developments, less damaging to character of the village. (This would be inline with Policy H 2 i)

c)This site impinges on the historic settlement core and conservation area of Llangynog and the Tanat Valley Registered Historic Landscape. This development would involve major and significant changes to the character of the village as presented as people enter and leave the village. Older properties will be obscured, mature trees felled, an ancient hedgerow removed and possibly stone walls removed.

d) The combined effect of building homes up to the edge of the flood plane and a road onto the flood plane would result in a barrier to an important soak away area for part of the village possibly resulting in new flooding in parts of the community. The B 4391 is subject to regular flooding from the river and up to White Street, a road is likely to channel water on this major through road.Increased flow to the road will increase flood risk to properties on White Street and holiday chalets on the bank of the river.

e) The new road will add a third junction in close proximity to two other dangerous junctions, a restricted width bridge, two severe blind bends and three more access roads at the same site. The new road meets the B4391 at the same point as White Street, Druids Corner access and the exit from the New inn Car park. In addition the new road would restrict the access and parking for users of the Carmel Chappel. The new road would not be in line with PLP policies DM2 4.2.40 Hi 4.5 (transport Infrastructureand Safety)

f) The road will run along the fence line of properties on White Street. These homes will be subjected to unacceptable levels of noise, dirt and light pollution. Contrary to Policy DM2 10

g)Cae Golygfa, on White Street will also have the road passing on its SW edge at a distance of approx. 3m from living accommodation and raised above the level of the house. This will involve serious overlooking issues and pressure on retaining wall of the house site.This would be contrary to Policy DM2. 10

Council Response:

0

---

**Question: 3d. (ii) Desired changes to Document**

Representation Texts:

IN RESPOSE TO THE ABOVE POINTS I SUGGEST THE FOLLOWING

a)The number of homes allocated needs to be reduced to reflect the true size of the plot.

b)Number of affordable houses to reflect the true needs of the population.

c)The need for an assessment of the effect on the image of the village combined with the possible need for archeological intervention should be highlighted in the LDP.

d)New strategic flood risk assessment needed in line with planning policy for Wales and PPS25.The need for extra protection for White Street properties should be included in any plan for a new road.

e) Consider the use of traffic calming strategies, controls and driver aids on the current New Inn junction just 20 metres away.

f) & g) Combined with the new roads location partially on a flood plane and safety concerns this proposed road development should be rejected for inclusion in the DLP.

h) This site is situated at the gateway to the Village. It presents a danger of damaging the ethos of the village which largely relies on tourism. It will threaten increased flooding in both regularity and severity. It will have serious effects on the residents of White Street in terms of there quality of living and in terms of potential damage to properties by water and traffic. It will increases road dangers. This proposal needs to be reconsidered along with other candidate sites which would be less damaging and intrusive.

*Question Representation Texts***Question: Council Response**

Representation Texts: The Council disagree with the proposed changes requested by the representor. The representor does not raise new issues or evidence which lead the Local Planning Authority to change its conclusions. Having considered the representation on this site, it is recommended that the site is not identified as a residential allocation or included within the development boundary of the Local Development Plan because sufficient allocated land or sites with the benefit of planning permission are available elsewhere in the settlement to meet future residential land requirements. It is noted that whilst this site has not been identified as a residential allocation the front part of the site has been included within the development boundary for the settlement and therefore proposals for development on this part of the site could be considered through the planning application process.

Council Response:

0

**Question: 3d. (i) Representation Details**

Representation Texts:

- 1) Candidate site 332 is already in the current UDP.
- 2) In excess of £100k has already been spent in servicing site to include electric, gas, water, telecom and sewer connection.
- 3) £250k has already been spent on purchasing site with intention to build.
- 4) Site access to one part has been constructed and one home built on site.
- 5) Local developers employing local tradesmen, creating sustainable community.
- 6) Site 332 does join town boundary.
- 7) Urgent need for more housing in Llanidloes, current UDP is not meeting housing needs.
- 8) Lnd was bought in good faith with true intentions of developing. But due to the current economic climate and banks poor availability to lend, only one home and services to site has been put in.
- 9) Ecology is very low as land is cut for hay twice a year (see ecology report). No trees have to be removed from site.
- 10) Land next to cemetery on Trefeglwys Road has now been built on so extra allocation should be allocated to Llanidloes.
- 11) Land adjoins town boundary and is not in a conspicuous location.
- 12) Land at Chapel Farm south east of Llanidloes, a previous candidate site was given green light but site does not join town boundary and is on top of a hill in a very conspicuous location.
- 13) Site is sustainable long term, land is low lying all services are in and entrance. Therefore less harm to neighbouring properties and the environment, as already serviced.
- 14) Llanidloes primary and high school are running low on pupil numbers and are below capacity, extra housing would lead to sustainability of schools.
- 15) Short of diverse house styles and build in Llanidloes, poor variation of house types to suit current needs.
- 16) Overall therefore it would be reasonable to say that the site offers the opportunity for development that would bring social, environmental and economic benefits, with a realistic prospect of delivery. Suitable highway access exists and the land has been allocated in the current UDP for development.

*Question Representation Texts*

**Question: Council Response**

Representation Texts: Having considered the representations on this site, it is recommended that the site is not identified as a residential allocation or included within the development boundary of the Local Development Plan for the following reasons.: -

1. Sufficient allocated land or sites with the benefit of planning permission are available elsewhere within the settlement to meet future residential land requirements.
2. The site is highlighted as red in the site status report due to highway constraints. No further evidence has been received to change this.

Council Response:

0

**Question: 3d. (i) Representation Details**

Representation Texts: Introduction

Powys County Council has prepared its deposit proposals document for the Powys Local Development Plan (LDP) which upon adoption will replace the Powys Unitary Development Plan and will be the basis for decisions on land use planning for all of Powys. This deposit proposals document includes the Authority's vision for housing site allocations and we hereby wish to make comment about such site allocations.

Candidate Site 73 was proposed during the call for Candidate Sites in April 2011 and has subsequently failed to be allocated as a housing site within the village of Llansantffraid-ym-Mechain. We hereby appeal this non-allocation and are of the opinion that the Local Development Plan fails on the ground of soundness.

Soundness of Local Development Plan

The Local Development Plan fails on the ground of soundness criteria CE2. The site allocations do not realistically nor appropriately consider the relevant alternatives nor are they allocated on a robust or credible evidence Base. Site allocations have not been considered with consistent weighting to the sustainable development aims.

Candidate Site 73

Candidate Site 73 has road frontage and is adjacent to other housing within the village. The site would form a logistical and proportionate natural extension to the village. The site represents sustainable development within a sustainable village and it is a deliverable site; there are no constraints and the site is capable of development within the next plan period.

*Rep'n/Para/Policy AccessNo DateLodgd Late? Status Modified Summary*

**6267.V8** 16/07/2015  Summary: Llansantffraid – ym – Mechain - Alternative Site

Source: Website registration Type: Objection Mode: Written Status: Maintained

---

The Site Appraisal Report submitted with the Candidate Site Proposal Form concluded that the site was suitable to a residential or community site allocation on the grounds of settlement; delivery; site quality; and the wider environment; public transport and access; environmental sustainability; well being and; sustainability.

Candidate Site 73 is an appropriate site for housing in Llansantffraid-ym-Mechain. The LDP designates Llansantffraid-ym-Mechain as a "large village"™ on the basis it has a good range of services and community amenities; the village is therefore recognized as a sustainable location.

â€f  
Housing Allocation, Llansantffraid-ym-Mechain

There are three site allocations for housing in Llansantffraid-ym-Mechain. However, Candidate Site 73 appears to form the natural expansion of future housing in Llansantffraid-ym-Mechain as it would further elongate the settlement.

Candidate Site Suitability

Candidate Site 73 has road access. The site owner has control of the roadside boundary and can therefore provide satisfactory highway access.

Overall, Site 73 provides a huge amount of benefit to the local community of Llansantffraid-ym-Mechain, the housing would be adjacent to existing housing in the village.

The Candidate Site Report stated that all mains services were in place close by and the site could be easily connected to current services and infrastructure.

The site is a deliverable site and the site owner would be willing to enter into a planning obligation to reduce the time limits on development to deliver the site in a shorter time period and to provide the required local needs housing numbers and community contributions.

Conclusion

Candidate Site 73 therefore fulfils the LDP Sustainable Development Aims. The site is a suitable residential site allocation on the grounds of settlement; delivery; site quality and the wider environment; public transport and access; environmental sustainability; well being and; sustainability. The site is an appropriate site for a housing allocation in Llansantffraid-ym-Mechain and its range of services and community amenities; a development of this size would not be limited by any environmental and infrastructure capacity constraints. We would welcome a site visit to discuss the site and proposed housing allocation. Candidate site 73 is therefore preferable to all the other site allocations and the Local Development Plan should be amended accordingly.

Question Representation Texts

**Question: 3d. (i) Representation Details**

Representation Texts: Llanymynech is identified in the Deposit Draft LDP as a "Large Village" as it benefits from a wide range of services and facilities (as identified in Appendix 2: Settlement Analysis of the Powys LDP Preferred Strategy (March 2012)), including a Primary School, Public Houses, Restaurants, Shops, Post Office, Community Centre and Places of Worship. It is also in a strategically important location lying on the junction of the A483 (Swansea to Manchester) Trunk Road and the B4398 in close proximity, and with good transport links, to Welshpool, Oswestry, Llanfyllin and Shrewsbury.

Llanymynech has therefore been identified as a settlement to receive a significant level of allocated housing growth in the Plan period. However, as the LDP "Population and Housing Topic Paper" (May 2015) details, windfall development (i.e. development of unallocated sites) makes an important contribution (17%) to housing provision across the Powys LDP Area. The LDP provides opportunities for windfall development in many of the Plan's settlements through the redrafting of development boundaries to accommodate such development and this approach is supported as it ensures that windfall development will make a contribution to the housing supply. It also provides an appropriate level of flexibility to deal with changing circumstances and enables the inclusion of sites for development which, in planning terms, are acceptable but do not justify allocation as they are unlikely to accommodate 5+ dwellings.

However, unlike many of the other settlements in the Plan, the development boundary for Llanymynech has been drawn tightly around the existing built form of the settlement and its housing land allocations, therefore excluding similar opportunities for windfall development in the settlement.

Given the strategic importance of the settlement and its services and facilities this is considered inappropriate and lacks reasonable flexibility to deal with changing circumstances.

Candidate Site 870 is a small parcel of land that bounds existing residential development, the Montgomeryshire Canal and B4398 and is accessed through a residential area. It is of little agricultural value. It does however represent a logical extension to the existing built form of the settlement, is within walking distance of all the settlement's services and facilities and therefore provides a sustainable opportunity to provide small scale residential development in the settlement. This is reinforced when it is considered that the site was originally included within the development boundary of the settlement in the Deposit Version of the Montgomeryshire Local Plan.

In response to the submission of candidate site 870, the Council concluded:

"Site is an undulating area of pasture land that lies adjoining existing residential development and the current UDP settlement development boundary. It may be considered a logical extension of residential development in this area. However, there are significant constraints to the site's development, including Highways, Heritage, Ecological, Land Contamination and Minerals issues. The site is therefore not considered appropriate for allocation. Consideration has been given to inclusion of the site within the development boundary but it is considered that this site is too constrained and furthermore not required as housing commitments and more appropriate site allocations identified elsewhere will meet the housing requirement of the settlement over the Plan period".

The Council therefore acknowledges that the site represents a logical extension to the settlement. However, when considering the site for inclusion in the development boundary the Council conclude that the site is too constrained and not required due to housing allocations elsewhere. In this regard, it is contended that the site's constraints may restrict the overall capacity of the site but do not prevent its re-inclusion in the development boundary. The highways, heritage and ecological constraints identified may be readily addressed at the detailed planning stage through mitigation measures such as limiting site density, careful siting of structures and landscaping. With particular regard to the land

---

contamination constraint it is contended that this does not restrict the site's development as the site does not lie on the fill / tip area in question and lies no closer to it than existing built development. Therefore, if considered necessary, concerns relating to this constraint can be dealt with by condition. Similarly, the minerals constraint does not restrict the development of the site. If necessary, pre-extraction of minerals may be undertaken, however the commercial extraction of minerals in a location such as this is not viable and should not have been quoted as a reason for the site's omission from the development boundary. Similarly, the requirement of the site for allocation does not prevent its re-inclusion in the development boundary as an opportunity for windfall development.

It is contended that Candidate site 870 represents a sustainable opportunity to provide small scale residential development in the settlement, providing an opportunity to ensure that windfall development will make a contribution to the settlement's housing supply and providing an appropriate level of flexibility to deal with changing circumstances.

Question Representation Texts

**Question: Council Response**

Representation Texts: This representation is considered to be in support of the Deposit Local Development Plan. No changes are therefore required.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: Support is given of the inclusion of church field, Llanyre within the development boundary. It's inclusion would allow the land to be released for residential development subject to obtaining the necessary planning consents. The area is considered particularly well suited to support the provision of housing in the village for the following reasons:

- 1) Access to the land will not involve the need to obtain any third party consents, with access either direct onto the public highway or via the remainder of the field.
- 2) The remaining part of the field which currently lies outside the development boundary will be well placed to accommodate the expansion of residential development under future plans.
- 3) The field is at minimal risk of river and surface water flooding, according to the website of Natural Resources Wales.
- 4) The field is not subject to any national or local designation for landscape, nature conservation and heritage. Due to its location and gently sloping nature down away from Llanyre Church and the rest of the village, the site's development should not have an unacceptable adverse impact effect upon either the surrounding environment nor upon nearby dwellings and the Church.
- 5) The field is well located to existing utility services, with works unlikely to be needed on land outside of our ownership in order to connect to the water main and public sewers.
- 6) The field adjoins bus, pedestrian and bicycle routes into both Llanyre and to nearby Llandrindod Wells.
- 7) Subject to further assessment, there would not appear to be any significant highways constraints, with no need for direct access onto the A4081.
- 8) The field does not fall within any designation minerals safeguarding area.
- 9) The field does not comprise higher quality agricultural land, with the provisional Agricultural Land Classification plan showing it to fall within an area of Grade 4 land.

In addition to the above and subject to the necessary improvements to the Llanyre Wastewater Treatment Works, we have both a willingness and the ability to deliver this site for residential development within the term of the LDP.

*Question Representation Texts*

**Question: Council Response**

Representation Texts: Thank you for your representation.

By way of a general response to your representation, the Council is required by legislation (Housing (Wales) Act, 2014) to undertake an assessment of the accommodation needs of gypsies and travellers residing in the County and where a need is identified it has a duty to meet those needs. A need has been identified in Machynlleth for a permanent site and the LDP has proposed site allocation P42 HA4 to meet this need alongside Policy H13 of the LDP. The selection process for identifying the site is explained in the Powys LDP Topic Paper Gypsy and Traveller needs in Machynlleth, April 2015. This refers to the dialogue with the Trunk Road Agency which has indicated that a safe access can be provided, at the same time as allowing an existing substandard junction to be closed up. The proposed site will also be set back from the main road and landscaped so that it will not have a detrimental impact upon the entrance to Machynlleth.

To conclude, the Council considers that proposed site allocation P42 HA4 should be retained in the LDP.

Council Response:

0

**Question: 3d. (i) Representation Details**

Representation Texts: It appears that only one matter appertained to Cadfarch namely the proposed Gypsy and Travellers Site at Felingerrig, Machynlleth. Councillors were not in favour of such a development.

The site is adjacent to dwellings and access is onto a fast road with an industrial site opposite. Also the location is on the outskirts of a historical town which has tourist attractions and such a development will have detrimental effect.

Should this site be accepted Cadfarch Council will object citing the above reasons.

Question Representation Texts

**Question: Council Response**

Representation Texts: The Council disagree with the proposed changes requested by the Respondent. The Respondent does not raise new issues or evidence which lead the Local Planning Authorities to change its conclusions. Powys Retail Study does not identify a need for retail allocations within the settlement. Site is therefore not allocated but remains within the development boundary and partially within the retail centre boundary and therefore proposals for both residential or retail development on this site could be considered through the planning application process.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: The members of Machynlleth Town Council would like to see the former Travis Perkins and Machynlleth Stock Sale Yard included in the Local Development Plan for future Housing Land Allocation.

Alternatively, the Council would like to see this land earmarked for light business development.

[NB Additional information was requested confirming the name of this site but it was not forthcoming. It is presumed to be Candidate Site 1183 - Former Cattle Market Site, Machynlleth.]

Council Response: 0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: Allocate the site for housing or for light business use.

Council Response: 0

**Question: 3e. (ii) Candidate Site No/Name**

Representation Texts: Former Travis Perkins and Machynlleth Stock Sale Yard.

?Candidate Site 1183?

*Question Representation Texts*

**Question: Council Response**

Representation Texts: Thank you for your representation.

By way of a general response to your representation, the Council is required by legislation (Housing (Wales) Act, 2014) to undertake an assessment of the accommodation needs of gypsies and travellers residing in the County and where a need is identified it has a duty to meet those needs. A need has been identified in Machynlleth for a permanent site and the LDP has proposed site allocation P42 HA4 to meet this need alongside Policy H13 of the LDP. The selection process for identifying the site is explained in the Powys LDP Topic Paper Gypsy and Traveller needs in Machynlleth, April 2015. The proposed site allocation is for meeting the needs of the gypsy family currently occupying the unauthorised site.

To conclude, the Council considers that proposed site allocation P42 HA4 should be retained in the LDP.

Council Response:

0

---

**Question: 3d. (i) Representation Details**

Representation Texts: The members of the Town Council also have concerns about the allocation of land at Felingerrig for a possible future permanent traveller site. Whilst this land is technically outside the boundary of Machynlleth Town Council, the site will certainly have an impact on the residents of Machynlleth. Can any assurances be given that travellers currently residing on the unauthorised site at the eastern edge of town will move to the new site?

Town Councillors are very concerned that unless such assurances can be given, this land allocation should be removed from the Local Development Plan as the Machynlleth area could then become host to two traveller sites, one authorised and one unauthorised.

Council Response:

Question Representation Texts

**Question: Council Response**

Representation Texts: The Council agree to amend Appendix 1 of the plan to require a Flood Consequence Assessment as requested by the representor. See Focused Change for details.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: Issues and Infrastructure (Appendix 1 - Settlement Allocations).Machynlleth, OS1546, Aberystwyth Road – P42 HA1 & Land Adj. to HA1, Aberystwyth Road –HA2  
 The boundaries of these sites have been located so that the sites do not encroach into DAM Zones C1/C2. However, as per the 'Dear CPO' letter from Welsh Government dated 9th January 2014, for new applications it is necessary to "take account of the potential impact of climate change over the lifetime of development including a flood event which has a 0.1% probability of occurrence." As Zones C1/C2 follow the 0.1% probability outline without accounting for climate change, it is probable that additional parts of these sites (which are at risk of tidal flooding) would need to be assessed for compliance with TAN15, section A1.15.  
 If your authority does not intend to investigate this matter further as part of the LDP process, we would suggest that it should be investigated as part of an FCA – in support of any future planning application.  
 Therefore, we recommend the text in 'Issues' column is amended to reflect the above for both allocations.

Council Response: 0

Map: P42: Machynlleth - 2015

Issue: 2015: Deposit Draft-05.Other Specialist Housing and Gypsy & Travellers

Question Representation Texts

**Question: Council Response**

Representation Texts: Thank you for your representation.

By way of a general response to your representation, the Council is required by legislation (Housing (Wales) Act, 2014) to undertake an assessment of the accommodation needs of gypsies and travellers residing in the County and where a need is identified a duty to meet those needs. A need has been identified in Machynlleth for a permanent site and the LDP has proposed site allocation P42 HA4 to meet this need alongside Policy H13 of the LDP. The selection process for identifying the site is explained in the Powys LDP Topic Paper Gypsy and Traveller needs in Machynlleth, April 2015.

In response to the individual points you made:

1. Noted. In bringing forward the site will, the Council will need to have negotiations with various parties including the landowner. A legal process may be necessary.
2. The Council has undertaken a site selection process to find a suitable site, and it is considered that the proposed allocation is the best available site closest to the town centre. Any adverse landscape and environmental impacts will be mitigated.
3. The proposed site allocation is no different to a proposed housing allocation, and separate regulations covers noise and light pollution.
4. Highway matters - initial dialogue with the Trunk Road Agency has indicated that the site can be accessed safely, and that there is potentially a highway gain that could be achieved by closing the substandard nearby junction.
5. Noted. Further investigation will be required to address sewerage disposal and an on-site solution found.
9. Information on the extent of the flood plain is provided in the Topic Paper and in order to comply with National planning guidance (TAN15 and Circular 30/2007) any proposed site must not be located in an area at risk from flooding.
10. Noted. However, further information on this (site plan, sustainability appraisals, strategic environmental assessment) has not been provided so it has not been possible to consider this site suggestion through the LDP.

To conclude, the Council considers that proposed site allocation P42 HA4 should be retained in the LDP.

Council Response:

0

**Question: 3d. (i) Representation Details**

Representation Texts: Re: Machynlleth Gypsy Site

1. The chosen site is, as you observe outside the planning boundaries and is therefore likely to lead to a convoluted legal process including public enquiry.
2. The Hamlet of Felingerrig consists of 5 or 6 dwellings, the rest being agricultural land. The impact of the proposed site and its appurtenant facilities is going to be a substantial physical intrusion on the amenity and the landscape not least because it envisages the construction of a new and otherwise unnecessary roadway to link from the A489 to the unclassified roadway at a point somewhere near Dolguog.
3. The site will generate noise and light pollution to neighbouring properties,

**6363.V1** 19/06/2015  Summary: Machynlleth Gypsy and Travellers Site - Objection to allocation

Source: Post or in person Type: Objection Mode Written Status Maintained

4. There are serious highway issues as you acknowledge in your document. There is going to be an increase in traffic, and the fact that it is proposed to create a new entrance to serve the site will not enhance safety, but will diminish it since motorist travelling along the A489 will have to contend not only with the existing unclassified road junction but a second junction further on, both of which lie outside the existing 30mph limit and as such are and would be subjected to vehicles travelling at very high speed, often in excess of the 60mph limit.
5. There will be the problems associated with sewerage treatment. We believe that there are no main sewers anywhere near the site, and to deal with effluent from the site would require a disproportionate outlay in accommodation works which would be unnecessary if a site closer to mains [sic] facilities had been chosen.
9. Notwithstanding the fact that the proposal appears to have found a number of areas which are classified as lying within a flood risk, nevertheless the present site and the two fields adjacent thereto on the eastern side have not in the last 30 years ever flooded. It is a fact that those two fields are in private ownership the first belonging to ..... and the second field ..... is likewise in private ownership ..... . Since those fields have never flooded common sense would dictate that further assessment should be undertaken as to the suitability thereof since it would involve the least amount of disturbance to the local community. It would not require new access and would be more than sufficient to site the proposed number of caravans.
10. It is noted that there is a substantial area of land lying to the south of Llynloed lane which appears not to have been considered. This of course would be highly suitable as it [would] be easily connected to the mains services shops, schools and other facilities which would be no doubt welcome to the travellers.

Question Representation Texts

**Question: Council Response**

Representation Texts: Thank you for your representation.

By way of a general response to your representation, the Council is required by legislation (Housing (Wales) Act, 2014) to undertake an assessment of the accommodation needs of gypsies and travellers residing in the County and where a need is identified it has a duty to meet those needs. A need has been identified in Machynlleth for a permanent site and the LDP has proposed site allocation P42 HA4 to meet this need alongside Policy H13 of the LDP. The selection process for identifying the site is explained in the Powys LDP Topic Paper Gypsy and Traveller needs in Machynlleth, April 2015.

In response to the individual points you made:

1. The Council is not aware of any formal complaints made in respect of the existing unauthorised, but tolerated site.
2. The improvement of the highway network is a matter for the relevant highway authority.
3. The planning system ensures that the impact of development proposals are fully considered, although the impact upon values is not a land use planning matter.
4. The alternative site suggestion is noted, although this suggestion was considered but discounted for the reasons set out in the above named Topic Paper. (Please note that further information on this (site plan, sustainability appraisals, strategic environmental assessment) was not provided in conjunction with your representation so it has not been possible to consider this site suggestion through the LDP.)

To conclude, the Council considers that proposed site allocation P42 HA4 should be retained in the LDP.

Council Response:

**Question: 3d. (i) Representation Details**

Representation Texts: Proposed Travellers Site, Fellingerrig, Machynlleth.

I am writing to you to strongly oppose the proposed travellers site at Fellingerrig.

Having been a resident of Fellingerrig for over 28 years my quality of life has been affected with the unauthorised traveller site near the cemetery on the outskirts of Machynlleth.

Numerous residents in Fellingerrig have campaigned for years without luck for improvements to be made to the junction which has resulted in a fatality.

What effect will the close proximity of a traveller site have on the value of our homes?

The Old Potter's Yard would be an ideal site, failing that what about the old Travis Perkins site?

Question Representation Texts

**Question: Council Response**

Representation Texts: This will be answered at the Maps stage.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: This is a joint representation on behalf of Mr Holloway of Builthy Hill Farm, Middletown & Mr D Hilditch of Fairfield, Middletown.

The candidate site ref 1018 in Middletown was submitted in the original candidate sites process for the LDP in 2011 by the landowner Mr Holloway. This plot has been included in the most recent draft of the deposit LDP as the village boundary of Middletown has been changed to allow for some of the candidate site 1018. My property, Fairfield adjoins this candidate site on its south western boundary.

I am submitting this representation in conjunction with, and in agreement with the landowner Mr Holloway. Following a phone call with Tanya Dearing in July 2015 she advised that myself and the landowner submit this representation jointly to ensure there is agreement on the boundary line submitted.

The land submitted in 2011 by Mr Holloway was larger than that which has been included in the new village boundary. I had originally made representation to the size of this candidate site which is perhaps why the plot was reduced in the recent deposit draft. However the strip of land proposed in the latest deposit draft is not of a size that is practical for any dwelling large or small. In order to offer any prospective property any form of rear garden the plot needs to be much deeper as I have amended on the attached plan. This plan will be submitted via email.

After having liaised with the landowner Mr Holloway we have both agreed to the amended plot size (village boundary). This amended boundary will allow a dwelling(s) to have a 'normal' size rear garden.

I understand after speaking with Richard Pitts in planning policy on 20th July 2015 that it may be necessary to submit a Sustainability Appraisal and/or a Strategic Environmental Assessment for the site. As Mr Pitts was unsure of this requirement he stated that if this information was required by the LDP team, that we would be able to submit this in the next few weeks (after the consultation period has closed) upon request form the Council.

Council Response: 0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: It is requested that the Middletown Village boundary to be amended to reflect the boundary on the attached plan to enable a usable sized plot for future dwelling(s).

Question Representation Texts

**Question: 3d. (i) Representation Details**

Representation Texts:

- Introduction
- 1.1This report has been compiled in response to Powys County Councils Call for Potential Development Sites document published in February 2011.
- 1.2Powys County Council is preparing a Local Development Plan (LDP) due for publication in 2014; the LDP will guide development in Powys (excluding land within Brecon Beacons National Park) up to 2026.
- 1.3The LDP will identify land which addresses the Countys needs for development, to include proposals for housing, employment, retail, recreation, leisure, transport and health, or a mix of such uses. The Plan will also identify sites for minerals and waste development.
- 1.4Candidate sites will be placed on a register and made available for public inspection and thereafter assessed against the Councils criteria.
- 2.Sustainable Development
- 2.1Sustainable development is a pattern of resource use that aims to meet the human needs while preserving the environment so that these needs can be met not only in the present, but also for generations to come. It is development that "meets the needs of the present without compromising the ability of future generations to meet their own needs."
- 2.2The Welsh Assembly Government has a legal duty to sustainable development; a move towards sustainable development can occur by improving the economy and the social and environmental wellbeing of people and communities; promoting fair and safe communities and equal opportunities and; supporting the natural and cultural environments and respecting their limits.
- 2.3Design is defined in Planning Policy Wales as the relationship between all elements of the natural and built environment. To create sustainable development, design must go beyond aesthetics and include the social, environmental and economic aspects of the development, including its construction, operation and management, and its relationship to its surroundings.
- 2.4Planning Policy Wales states that "Good design is also inclusive design. The principles of inclusive design are that it places people at the heart of the design process, acknowledges diversity and difference, offers choice where a single design solution cannot accommodate all users, provides for flexibility in use, and provides buildings and environments that are convenient and enjoyable to use for everyone."
- 2.5Technical Advice note (TAN) 12: Design (2009) states that "Good design is fit for purpose and delivers environmental sustainability, economic development, and social inclusion at every scale throughout Wales."
- 2.6The LDP will assess whether the location of the candidate site is considered sustainable. In assessing the suitability of candidate sites within the LDP, Powys County Council will adhere to National Planning Policy guidance. National planning policy provides the following guidance: the proximity to public transport network or accessibility by pedestrians or cyclists; ability of a site to accommodate a mixed development or ability to contribute to a sustainable mix of uses in the area; proximity of a site to existing settlements; efficient use of land to include development or re-use of previously developed land; presumption against isolated rural developments and presumption of favouring development adjoining existing rural communities; ability of development to sensitively balance the goals of sustainability; positioning of development to encourage residents to live a healthier lifestyle; avoid loss of the best agricultural land; development which is well serviced by existing infrastructure and free from unstable or contaminated land or land liable to flooding and; development which tackles the causes/consequences of climate change.
- 3.The Candidate Site
- 3.1Location
- 3.1.1The Candidate Site (the site)is referred to as Land adjacent to Penyfoel Farm reference should be made to Appendix 1.

Rep'n/Para/Policy AccessnNo DateLodgd Late? Status Modified Summary

6267.V12 16/07/2015  Summary: Middletown - Alternative Site

Source: Website registration

Type: Objection

Mode Written

Status Maintained

3.1.2The site is located adjacent to the settlement of Middletown.

3.2The Settlement

3.2.1The site is located adjacent to the settlement of Middletown.

3.2.2The settlement of Middletown is approximately 6 miles from Welshpool.

3.2.3Under the Powys Unitary Development Plan (UDP) Middletown was identified as a Large Village.

3.2.4The UDP (UDP Policy UDP SP2) identifies the settlement hierarchy as:

Area Centre

Key Settlements

Large Villages

Small Villages

Rural Settlements

Countryside

3.2.5Under the current UDP Middletown does have a defined settlement boundary and the site is located adjacent to the settlement boundary

3.2The village has a village hall, public house, garage/car sales, childrens play area, car park, haulage depot, bus shelter, antiques shop and public telephone.

3.3The site is in a location adjoining an existing community and would form an acceptable extension of the village boundary.

3.4Delivery of The Site

3.4.6The site is within the ownership of the proposer.

3.4.7There are no ownership constraints or problems.

3.4.8The market for residential development in this area is strong.

3.5Quality of The Site and Wider Environment

3.5.6The site has been in agricultural use and no land remediation is required; no contamination land issues are known.

3.5.7An existing highways infrastructure to the site is in place; there would be no need for major improvements to existing road junctions.

3.5.8The site is currently serviced in terms of utilities; mains electricity, water and telecommunications are available within or adjacent to the site..

3.5.9The site is adjoining residential and agricultural land use and it is understood that there are no issues with neighbourly disputes.

3.5.10The site is within walking distance from some key facilities which provide for day-to-day needs.

3.6Public Transport and Access

3.6.1The site is within minutes walking distance of a mode of public transport.

3.6.2Bus routes operate through Middletown.

3.6.3The site is easily accessible by pedestrians and cyclists; the site is minutes walking distance from some key facilities which provide for day-to-day needs.

3.6.4The site is well positioned to reduce the need for people to travel by car to access day to day services.

3.7Environmental Sustainability

3.7.1The site is a greenfield site

3.7.2The site is located on intensive pasture land and development of the site would not involve loss of prime agricultural land.

3.7.3The site is located adjoining existing residential development and the development of the site will not result in development in the open countryside.

3.7.4 The development of the site would be in context of the surrounding local area and respect the surrounding character.

3.7.5The site is not within the Environment Agency fluvial flood risk area and the site is not known to flood.

3.7.6It is understood that there are no environmental constraints or designations affecting the site.

3.7.7Residential development of the site would comply with the Code for Sustainable Homes; renewable energy and natural resource protection and recycling measures will be included where possible.

Rep'n/Para/Policy	AccessnNo	DateLodgd	Late?	Status	Modified	Summary	
6267.V12		16/07/2015	<input type="checkbox"/>			Summary: Middletown - Alternative Site	
Source:	Website registration	Type:	Objection	Mode:	Written	Status:	Maintained

3.8 Well Being

3.8.1 The site is located close to local facilities and services; residents could easily access day to day services without using the private motor car.

3.8.2 The site is located within close proximity of green space and recreational space.

3.8.3 The site is located close to walking and cycling opportunities.

3.9 Sustainability

3.9.1 The site could accommodate a mix of housing including a number of affordable homes which would provide for all sectors of the housing market.

3.9.2 The proposed development would ensure a balance of jobs and housing and services in the local area.

3.9.3 Sustainable development is a pattern of resource use that aims to meet the human needs while preserving the environment so that these needs can be met not only in the present, but also for the generations to come. It is development that meets the needs of the present without compromising the ability of future generations to meet their own needs. The proposed development balances the environment with the social and economic needs of the area. Well designed residential development to the Code of Sustainable Homes will bring people to the area, which in turn supports the local services and the economic and social sustainability of the area.

4. Candidate Site Proposal

4.1 The candidate site would be developed for residential use. The site is currently under agricultural use but there are existing structures on site.

4.2 The National Planning Policy for Housing is embodied in the Welsh National Assembly Governments Planning Policy Wales. The guidance acknowledges the importance of promoting sustainable rural communities with access to high quality public services through the efficient use of land, by encouraging mixed tenure communities, that are well designed and located in close proximity to services, employment and other facilities.

4.3 Guidance can also be found in Planning Guidance TAN 1 Joint housing Land Availability studies and TAN2 Planning and Affordable Housing. These notes indicate that a five year continuous supply of housing is genuinely available and TAN2 recognises the importance of providing affordable housing and provides advice for developing suitable policies.

4.4 There is no substantial planning history for the site.

4.5 The allocation and zoning of this land for residential use would fulfil a number of the criteria that is set out in the current UDP, namely that the council considers sustainable communities to be cohesive focal points for community life providing appropriate services and facilities in keeping with their status and with the capacity to support the housing needs of all. The provision of good quality housing of the right size, type and tenure enables choice and contributes towards securing a better social mix and tied in with an employment use would be a very sustainable development.

4.6 Small scale development in this area would promote sustainable development and focus development on a location which has easy access to basic services, as highlighted as development strategy in the Tan documents.

4.7 Our client has the benefit of owning some land around the site and also the access and the frontage to the site. Therefore, our client would be in a position to carry out any required works to improve visibility and site lines

4.8 The proposal would be for residential development with an appropriate proportion of local needs dwellings.

4.9 The completed Candidate Site Proposal Form, February 2011 is attached in Appendix 3.

4.10 The estimated site capacity is 8 -10 residential units per acre with the primary factor affecting the site capacity being its size and topography.

4.11 Our client has the benefit of owning some land around the site and also the access and frontage to the site. Therefore our client would be in a position to carry out any required works to improve visibility and site lines for the access. The proposed development would be for residential development with an appropriate proportion of local needs dwellings.

5. Conclusion

5.1 The candidate site is referred to as Land adjacent to Penyfoel Farm and is located adjacent to the development boundary of the Key settlement of Middletown.

5.2 The site would be developed for mixed residential use and employment use.

5.3 Sustainable development is a pattern of resource use that aims to meet the human needs while preserving the environment so that these needs can be met not only in the present, but also for the generations to come. The proposed development balances the environment with the social and economic needs of the area. Well designed residential

development to the Code of Sustainable Homes will bring people to the area, which in turn supports the local services and the economic and social sustainability of the area.  
 5.4 Sustainable development meets the needs of the present without compromising the ability of future generations to meet their own needs; the proposed development of this candidate site achieves the aims of sustainable development and therefore should be included within the Local Development Plan for the proposed use.

**Question: Council Response**

Representation Texts: "Having considered the representation on this site, it is recommended that the site is not identified as a residential allocation or included within the development boundary of the Local Development Plan for the following reasons: 1. Sufficient allocated land or sites with the benefit of planning permission are available elsewhere within the settlement to meet future residential land requirements.2. The site would extend the village boundary further south encroaching into the open countryside."

Council Response:

0

**Question: 3d. (i) Representation Details**

Representation Texts: Policy H1 is objected to on the basis of the reduced housing land target (see separate form). The non-inclusion of the land to the rear of Ridgemoor Hill, Newbridge on Wye and its omission from the site schedule in Appendix 1 – Settlement Allocations. It is noted that the Policy also seeks to maintain a 5 year supply of housing. For reasons explained in the accompanying Submission Document we consider that unless a sufficient range and choice of sites is provided, Powys County Council will struggle to achieve a 5 year land supply both on adoption and throughout the plan period.

The first part of the policy refers to development in Towns and Large Villages. We consider that development of the site in question would be compatible with the requirement as it would form a logical extension to the settlement.

The Alternative Site proposed could potentially deliver 60 dwellings in accordance with Policy H3 which provides for average densities of 25 dwellings per hectare on sites in towns and large villages. It would also aim to be compatible with Policy H2 - Housing Delivery.

This Representations cross-references with RefPoint 34.104

Question Representation Texts

**Question: Council Response**

Representation Texts: Having considered the representation on this site, it is recommended that the site is not identified as a residential allocation or included within the development boundary of the Local Development Plan for the following reasons: - 1. Sufficient allocated land or sites with the benefit of planning permission are available elsewhere within the settlement to meet future residential land requirements. 2. Significant highway constraints have been identified in that the Highway Authority would not support the intensification of the use of Cyffredin lane to serve development at this site, and as a result a new access onto the A470 would be required to serve the development. It is noted that the Representor is suggesting a solution by way of a new roundabout onto the A470, however no assessments have been undertaken to establish the need for such works and no details have been submitted of the suggested works, and therefore the justification for and feasibility of carrying out these substantial improvement works has not been proven.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: Lon Developments would like the LDP to consider our application regarding candidate site no 388, where the A470 enters the village of Newbridge from the north side. The stretch of road has a large volume of traffic including a large number of lorries many of which travel to service the BSW timber site close to this area. We would like to point out that the speed limit change from 60mph to 30mph is far too close to the village, where there is a junction to Beulah and residential area, which has expanded recently, with no alteration of the approaching speed limit. There are access roads which also have problems turning on and off this road. We would like to propose a new road roundabout on the north side entrance to Newbridge. Lon Developments which owns the land at Brynderlywn Farm would be in a position to offer a financial contribution to the cost of this proposal as we believe the roundabout would help the LDP and the candidate site 388 with future traffic considerations.

Council Response: 0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: Consider new access and roundabout in conjunction with CS388

New Site

Map: P48B: Newtown - 2015

Issue: 2015: Deposit Draft-12. Alternative Sites

*Question Representation Texts*

**Question: Council Response**

Representation Texts: Having considered the representations on this site, it is recommended that the site is not identified as a mixed residential and employment allocation or included within the development limits within the local Development Plan for the following reasons: - 1) Sufficient allocated land or sites with the benefit of planning permission for both housing and employment uses are available elsewhere within the settlement to meet future residential and employment land requirements. 2) The site appears physically and visually detached from the existing built form of Newtown, the River Severn forming a natural boundary to the settlement. The site is highly visible from the eastern approach along the A483 after leaving the town. The development of the site would constitute undesirable encroachment into the open countryside. 3) The development of this site has the potential to affect the setting of, including views to and from, the complex of listed buildings at Glanhafren Hall. 4) It is noted that the site lies near the proposed Newtown by pass route, however the precise line of the by-pass and junction arrangements have not yet been determined. The acceptability of the highway access arrangements would be dependent on further detail and would be based on the the standards applicable at the time of a planning application, which would depend on the de-classification of the trunk road to a county road. NEW PARAGRAPH FOR RESPONSE TO POINTS ABOUT SUSTAINABILITY APPRAISAL - It is noted that the Representor refers to errors within the Sustainability Appraisal in terms of the agricultural classification of the land and also the description of the land as re-use of employment land. It is accepted errors were made in this respect and corrections will be made accordingly. Importantly, these matters are not included as reasons for the above recommendation not to allocate this land in the LDP.

Council Response:

0

**Question: 3d. (i) Representation Details**

Representation Texts: It is proposed that Candidate Site no. 660 be allocated for Mixed Use development in accordance with Policy E3 and Employment Site Allocation table E1.

[This Representation Cross-references with RefPoints 34.42 and 34.104 ]

The Council's own previous assessment of Candidate site No 660 stated that, "Site consists of undulating pasture land adjoining a complex of listed buildings. The site lies to the west of Newtown but does not bound the current UDP settlement boundary. The site was previously allocated for residential development in the Deposit Version Montgomeryshire Local Plan but was omitted in the modifications to that document. The site is highly visible on the approach to the settlement from the West and is currently constrained by lack of an adequate highways access, however these issues may be addressed as the proposed Newtown By-Pass would join the existing Trunk Road close to the candidate site. The precise line of the proposed by-pass and junction arrangements are still being determined and there are also other issues raised by stakeholders. Therefore, the acceptability of this site for allocation would be subject to confirmation of by-pass proposals and further discussion with stakeholders. Nonetheless, it is considered that site commitments and more appropriate site allocations identified elsewhere will meet the housing requirement of the settlement over the Plan period".

In response, it is noted that funding for the By-Pass has now been secured with the National Transport Plan indicating completion by 2017. It is therefore contended that the Council should now be planning to realise the potential opportunities provided by the construction of the by-pass and therefore that the Local Development Plan should build in flexibility to deal with the changing circumstances that will accompany this major change. In this regard, whilst site EA1 was a prominent site at the entrance to the town, the completion of the Newtown bypass will reduce its visibility. A replacement Gateway Site at Glanhafren Hall that does not have any flooding or other technical problems and has better visibility from the bypass is more likely to be delivered, creating a more realistic, appropriate and sufficiently flexible Plan. In addition, a flagship site on site 660 could be

Source: Email		Type: Objection		Mode: Oral (Examination)		Status: Maintained

accompanied by a long-term vision of a green corridor along the Mochdre Brook, creating an enhanced linear park as an integral part of the town's long-term expansion plans.

With regard to the Council's comment that "site commitments and more appropriate site allocations identified elsewhere will meet the housing requirement of the settlement over the Plan period" it should be noted that candidate site 660 is put forward for mixed use rather than only residential development. It is therefore considered that the information provided above, in respect of proposed allocations P48 MUA1, P48 EA1 and P02 EC1, highlights the need for the allocation of candidate site 660 for employment purposes. The need for a mix of uses on site is justified by the uncertainty surrounding the deliverability of the proposed mixed use site P48 MUA1, the environment of the site including nature of surrounding development and by viability issues (as detailed within the findings and recommendations of the Powys Employment Needs Assessment (2012), Powys Employment Needs Assessment Addendum (2015) and the LDP & CIL Viability Assessment (October 2014)).

ADDITIONAL SUPPORTING EVIDENCE:

A) Sustainability Appraisal Re-assessment

The Sustainability Appraisal (SA) for site 660 is incorrect in the following respects:

i) Will development of this site avoid the loss of the Best and Most Versatile (BMV) agricultural land?

- Site 660 scores negatively on resource use due to involving the loss of best and most versatile land. This is incorrect. The site lies in grade 4/5 land, as shown on the official Agricultural Land Classification map reproduced below.

Source: Agricultural Land Classification Map 1985 (uploaded 2013 to <http://publications.naturalengland.org.uk/publication/6172638548328448>)

ii) Is the site well served by existing services (including access, water, drainage, energy supply) or is it realistically capable of being serviced by any necessary infrastructure (eg by upgrading)?; and

Can the site be safely accessed and can the highway network serving the site adequately accommodate the associated traffic implications?

- Aims 8 & 9 – Site 660 scores negatively on both measures because "inadequate highways access – may be resolved following completion of Newtown By-Pass". Now that the Newtown By-Pass has been confirmed, this negative should be amended to a Significant Positive as the site will have excellent road access.

iii) Will the development proposals provide employment facilities and/or support the needs of businesses to expand, re-locate, diversify etc.; and

Will the development proposals contribute to providing a mix of uses in the settlement?

- A negative impact is recorded against business impact. The Appraisal incorrectly states that the site "proposes a re-use of an existing employment facility, although this may enable business re-location, expansion etc". On the contrary, the site is a greenfield site proposed for mixed use development and offers great potential as a flagship site at the entrance to the town, boosting Newtown's image and business offer.

iv) Do the proposals provide employment opportunities and/or the potential for upskilling the local workforce?

- Development of the site will bring jobs, which should score positively on the skills and employment category.

We respectfully request that the SA is amended accordingly to reflect the above points.

Council Response:

0

*Question Representation Texts*

**Question: Council Response**

Representation Texts: This Representation is noted. However, no changes are considered necessary to ensure the Plan is sound. Safeguarding of minor sandstone formations and sand and gravel deposits with their associated safeguarding margins is in line with national guidelines for safeguarding potential aggregate resources for the future.

Council Response: 0

---

**Question: 3d. (i) Representation Details**

Representation Texts: Mineral Resource Safeguarding

The Proposals Maps apply an extensive resource safeguarding area to a large swathe of land along the River Severn. There are several problems with this blanket safeguarding of sand and gravel deposits.

Firstly, the blanket designation sterilises the long-term expansion of towns and villages in the Severn Valley. In particular it could be applied in a manner that sterilises the expansion of Newtown on its western side.

Secondly, this blanket designation is unrealistic because land on the edge of towns will have a higher land value that is likely to render it unviable for mineral working. Furthermore, it is highly unlikely that mineral working would be permitted in close proximity to an existing town due to its harmful impact on residential amenity.

Thirdly, it is inappropriate to safeguard the land around a grade II listed building (Glanhafren Hall) for mineral working, as mineral extraction would conflict with policies to protect the setting of a listed building.

In light of the above, the mineral resource safeguarding designation fails to be realistic and appropriate (criteria CE2). We suggest that this is corrected by amending the Proposals Maps to roll back the mineral safeguarding area from the urban edge.

Council Response: 0

---

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: @ 35.75 and @ 35.8

Amend the Proposals Maps so that the resource safeguarding area is rolled back from the settlement boundary of Newtown and does not include Glanhafren Hall (grade II listed building) and its setting. We suggest that all land within the Newtown bypass and north of the point where it joins the A489 is removed from the safeguarding area.

Council Response: 0

---

**Question: 4b Reason For Request To Speak At Hearing And Subject**

Representation Texts: Glanhafren Hall and its surrounding land will play an important part in the future of Newtown, being located at the western entrance to the town and potentially providing a gateway to the town. Furthermore, the LDP's current proposals would sterilise the western edge of the town as a mineral safeguarding area. The long-term future of Newtown merits consideration at the hearings.

*Question Representation Texts*

**Question: Council Response**

Representation Texts: Having considered the representations on this site, it is recommended that the site is not identified as a residential allocation or included within the development boundary of the Local Development Plan for the following reason; no evidence has been submitted to address the highway concerns raised in the Site Status Report.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: Introduction

Powys County Council has prepared its deposit proposals document for the Powys Local Development Plan (LDP) which upon adoption will replace the Powys Unitary Development Plan and will be the basis for decisions on land use planning for all of Powys. This deposit proposals document includes the Authority's vision for housing site allocations and we hereby wish to make comment about such site allocations.

Candidate Site 509 was proposed during the call for Candidate Sites in April 2011 and has subsequently failed to be allocated as a housing site within the village of Pontrobert. We hereby appeal this non-allocation and are of the opinion that the Local Development Plan fails on the ground of soundness.

Soundness of Local Development Plan

The Local Development Plan fails on the ground of soundness criteria CE2. The site allocations do not realistically nor appropriately consider the relevant alternatives nor are they allocated on a robust or credible evidence Base. Site allocations have not been considered with consistent weighting to the sustainable development aims.

Candidate Site 509

Candidate Site 509 has road access from the east boundary. The site would form a logistical and proportionate natural extension to the village. The site represents sustainable development within a sustainable village and it is a deliverable site; there are no constraints and the site is capable of development within the next plan period.

The Site Appraisal Report submitted with the Candidate Site Proposal Form concluded that the site was suitable to a residential or community site allocation on the grounds of settlement; delivery; site quality; and the wider environment; public transport and access; environmental sustainability; well being and; sustainability.

6267.V7 16/07/2015  Summary: Pontrobert - Alternative Site

Source: Website registration

Type: Objection

Mode Written

Status Maintained

Candidate Site 509 is an appropriate site for housing in Pontrobert. The LDP designates Pontrobert as a "large village" on the basis it has a good range of services and community amenities; the village is therefore recognized as a sustainable location.

Housing Allocation, Pontrobert

There is one site allocation for housing in Pontrobert. However, Candidate Site 509 appears to form the natural expansion of future housing in Pontrobert as it joins existing housing sites and has easy access from the highway.

Candidate Site Suitability

Candidate Site 509 has good road access. The site owner has control of the roadside boundary and can therefore provide satisfactory highway access.

Overall, Site 509 provides a huge amount of benefit to the local community of Pontrobert, the housing would be adjacent to existing housing sites in the village.

The Candidate Site Report stated that all mains services were in place close by and the site could be easily connected to current services and infrastructure.

The site is a deliverable site and the site owner would be willing to enter into a planning obligation to reduce the time limits on development to deliver the site in a shorter time period and to provide the required local needs housing numbers and community contributions.

Conclusion

Candidate Site 509 therefore fulfils the LDP Sustainable Development Aims. The site is a suitable residential site allocation on the grounds of settlement; delivery; site quality and the wider environment; public transport and access; environmental sustainability; well being and; sustainability. The site is an appropriate site for a housing allocation in Pontrobert and its range of services and community amenities; a development of this size would not be limited by any environmental and infrastructure capacity constraints. We would welcome a site visit to discuss the site and proposed housing allocation. Candidate site 509 is therefore preferable to all the other site allocations and the Local Development Plan should be amended accordingly.

Question Representation Texts

**Question: 3d. (i) Representation Details**

Representation Texts:

My suggested changes to the latest LDP 2015, is to include the 2 candidate sites that were previously put forward for inclusion, the Long Meadow [Site 6] and land in Knighton Road [Site 10], but have now been excluded because the Planners have not been able to sufficiently investigate the correct information available.

Also, I suggest another block of land between Slough Road and Broadaxe to the South and South West of the Town [see V3], is included in the LDP for long term development and planning.

Candidate Site 6 - The Long Meadow in Slough Road, Presteigne.

When the Primary School was planned to be located in Slough Road back in the 1960s, the then Local and County Councils gave reasons that it was close to residential areas of the town, i.e. Castle Road, and further recommended that the Slough Road was the ideal area for future residential development, with an abundance of suitable land, which would allow Primary school children close access to the school. With that forethought and the current traffic calming measures in place, it is probably one of the safest schools for access in the whole of Powys and further afield.

The suggested issues regarding sewerage and water facilities are incorrect and have been put forward by those who are ignorant of the facts. I have pointed out previously that there are no problems whatsoever, apart from the laid back attitude of the County Council and the Water Company's failure to provide adequate sewerage capacity for the future growth of Presteigne. I cannot understand why Welsh Water have not been challenged about bringing forward plans to increase capacity before now, and also why they are allowed to import sewerage from other areas and process in Presteigne's sewage works.

Flooding has also been given as an issue with Site 6. With proven levels and a basic knowledge of topography, it is apparent that there is no threat whatsoever of any houses built on this site being liable to flooding. In fact, the majority of houses in Presteigne would be completely under water before this would happen. Once again, I invite any Councillor to meet with me to discuss these views.

In conclusion re Site 6, as these problems in reality do not exist, please do not let them cloud your judgement, as access to this beautifully situated well appointed site, is a fairly level walk, close to the Town Centre and other amenities.

For the above reasons, I would like to see the County Council support and encourage development of this site in a very popular area of Presteigne, in the new LDP.

As development issues seem to be more of an ongoing problem to NIMBYs and people who challenge any change or development, one idea would be to pass outline planning consent on all the land between Slough Road and Broadaxe to the south and southwest of the town, right up as far as the forestry at Caen Wood and the Folly. This would then allow a natural progression of land required for residential and industrial use, and possibly a golf course and recreation use for the next 50 - 100 years, as and when it is needed. It would still be under the control of both Councils, with well appointed land, without all the emotional and kneejerk reaction that planning issues seem to invoke as an ongoing issue. This would, in years to come, probably be seen as great forethought and commonsense by the current councils, and help Presteigne to grow naturally and still be the wonderful place to live and work that many people think it is now.

It is a known fact that the majority of people only complain or oppose development when it directly affects them, so, as there has been such a small percentage of opposition to

either of the sites out of a population of nearly 2,000 people in the Presteigne area, it can be safely said that there is negligible concern if planning permission was granted. After all, exactly the same "issues" were brought up when Caenbrooke and Silia Gardens were being built, and both these sites are now very popular, well thought of, award winning sites with many local families enjoying living there. It was realised that both the Primary school, John Beddoes school and facilities such as the library, sports centre and many clubs, etc., were to close due to a lack of people living in the area. I am sure that most people would be in favour of a lot more development and disregard personal prejudices.

Question Representation Texts

**Question: 3d. (i) Representation Details**

Representation Texts: My suggested changes to the latest LDP 2015, is to include the 2 candidate sites that were previously put forward for inclusion, the Long Meadow [Site 6] and land in Knighton Road [Site 10], but have now been excluded because the Planners have not been able to sufficiently investigate the correct information available.

Also, I suggest another block of land between Slough Road and Broadaxe to the South and South West of the Town [See V3], is included in the LDP for long term development and planning.

Candidate Site 10 - Knighton Road

Planning on the remainder of this site was once again excluded for dubious reasons that can reasonably be refuted as personal views

The issues given seem to stretch the truth by stating "relatively unaffected by development" as Warden Close is one of the biggest developments in Presteigne, and there are now 11 new homes due to start construction shortly on this site. Once again, former Town and County Councils have identified this site as ideal to infill between Warden Close and properties to the north down Knighton Road and form a proper boundary to prevent further development up the Lugg valley, and included the whole of the site in previous LDPs.

As my previous correspondence over the last 15 years, trying to get the whole of this block of land passed for residential phased development with a suitable mix of housing types, including bungalows, with some plots sold off for self builds, it would seem that the great interest being shown now that Mid Wales Housing is about to start on their development of 11 affordable homes, it will be a very popular place to live. Mid Wales Housing had planned to put up 28 desperately needed affordable homes, but this had to be cut for no other reasons than Welsh Water's complete and utter failure to plan for the future and provide proper adequate sewerage capacity, and their ability to dictate what, where and how many houses, the County and Town Councils plan to build. If they say they cannot provide any more capacity for the next 10, 15 or 20 years, they should stop bringing it in by tanker from other areas, as they have been doing for years, and get on with increasing capacity or what is the point of having a Local Development Plan at all ?

With the amenity land close by, I question why Planners should think that this development would spoil the aspect and be to the detriment of all in the community, when homes could be built on all of this land close by with many people agreeing that this should be looked at as an advantage not an issue, especially as there seems to be a lot of interest in much needed self building plots. It seems that the major concerns have come from people with a self interest and no proper facts or valid reasons.

**Question: Council Response**

Representation Texts: "These comments are noted. The Representor does not raise new issues or evidence which lead the Council to change its conclusions in relation to the allocation of housing land. Allocations are supported by a wide range of supporting evidence based on the position of the settlement in the Settlement hierarchy. The Council maintains that the tiers of settlements identified accurately reflect their role, function and overall level of sustainability. Applications for development of employment land are being monitored. No changes are considered necessary to ensure that the Plan is sound."

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: THIS REPRESENTATION PROVIDES COMMENTS ON SITES AROUND PRESTEIGNE

includes Map P51A and P51B  
Ref Point 35.84 and 35.85

- 1) • The industrial land EA1 is about to be developed with a planning application for infrastructure having been submitted. The Town Council therefore feels that additional land for industrial use needs to be included in the plan and suggests the land south of EA1 be included (see attached map).
- 2) • a site in Mill Lane has unexpired planning permission for 4 dwellings (development technically commenced). This needs to be included within the LDP.
- 3) • Candidate Site, 871, Countrywide premises: Whilst within the development boundary and put forward for retail/residential this site is no longer shown and on the inset map has no designation.
- 4) • Presteigne Primary School Site, Candidate Site 879: The Town Council would support the development of this site if the County Council should ever consider amalgamating the Primary School with the Secondary School on the John Beddoes Site.
- 5) • Presteigne Building Supplies Site: Local knowledge suggests this brownfield site may become available for residential development.

*Question Representation Texts*

**Question: Council Response**

Representation Texts: The Council disagree with the proposed changes requested by the representor. The representor does not raise new issues or evidence which lead the Local Planning Authority to change its conclusions. Having considered the representation on this site, it is recommended that the site is not identified as a residential allocation or included within the development boundary of the Local Development Plan because sufficient allocated land or sites with the benefit of planning permission are available elsewhere in the settlement to meet future residential land requirements.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: 1) Site 333 does join the town boundary and is adjacent to the current town development boundary.  
 2) Current site has extant planning permission for 8 holiday lodges.  
 3) Entrance to site has already been constructed and therefore there are no highway issues.  
 4) Mains sewer and electric is adjacent to site.  
 5) Gas and telecoms are already serviced on site, therefore minimal disruption to neighbours and the environment.  
 6) No hedges or trees will need to be removed, no ecological loss.  
 7) Land is not in flood plain.  
 8) Current UDP is well short of housing.  
 9) Additional land would be more compatible with Local Growth Zones allocated to this area.

Please see further information submitted:  
 Attachment 1 - Supporting information

Question Representation Texts

**Question: Council Response**

Representation Texts: The Council disagree with the proposed changes requested by the Representer. The Representer does not raise new issues or evidence which lead the Local Planning Authority to change its conclusions. The site was assessed as part of candidate site process and was not brought forward as an allocation in the LDP. However this site is within the development boundary for Rhayader. Any infill development on this site would be dealt with through the development management process.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: The Respondent maintains that the Candidates Sites Process and Site Methodology has been misapplied with regard to Candidate Site 975. Although this site is marginally larger than .25 ha, because 18% of the site lies within Floodzone 2 and the steep incline leading towards the watercourse on the south-westerly edge of the site means that the site could not accommodate more than 4 houses. The respondent believes that this site should have been removed from consideration at Filter 1 as "not requiring an LDP allocation".

Council Response: 0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: The respondent requests that Candidate Site 975 is added to Appendix 3 of the Candidates Sites Process and Site Methodology, as one of the Candidate Sites removed as Small Housing/ Policy Approach Sites.

Council Response: 0

Question	Representation Texts
<b>Question:</b>	<b>Council Response</b>
Representation Texts:	"The Council disagree with the proposed changes requested by the representor. The representor does not raise new issues or evidence which lead the Local Planning Authority to change its conclusions. Whilst the Sustainability Appraisal findings for sites are considered by the Council in their selection of site allocations, and form part of the evidence to inform the LDP, the findings are not the sole basis for a decision as planning and feasibility factors play a key role in the decision making process as well as the other informing assessments. In allocating sites (including P52HA1 and P52 HA2) and not allocating Candidate Site 916 the Council has considered relevant planning merits and has concluded that the allocated sites are the most appropriate to meet the needs identified. In allocating sites in the LDP, the potential impacts that development would have on adjacent land uses, access to services, environmental constraints and other planning designations have all formed a consideration and the Council is of the view that such detailed issues can be addressed through sensitive site design and appropriate site management arrangements."
Council Response:	0

Question: 3d. (i)	Representation Details
Representation Texts:	This representation is made by one of the two joint landowners (the Respondent) of Candidate Site 916 (CS 916).
	The Respondent does not consider that the allocations with regard to the settlement of Rhayader are realistic and appropriate and that alternative Candidate Site 916 was considered as a relevant alternative, or that the allocations were founded on a robust and credible evidence base. The Respondent has concerns that the Candidate Sites Process and Site Assessment Methodology (CSPSAM) was not appropriately applied whilst assessing the suitability of CS 916 for Housing Allocation.
	The Respondent is dissatisfied that it was not made clear during Candidate Site Proposal Process that sites allocated within the current UDP were not going to be carried forward automatically. Hence, the proposal did not contain any further information regarding the site's planning history or infrastructure that was already in place. The Proposal form included information and reference numbers for previous successful planning application history on the site, but this was not followed up.
	Furthermore, the landowners were not contacted at any stage during the intervening period to look into the reasons why the development did not materialise during the UDP's lifetime. nor did the LPA involve the landowner in any discussion regarding the potential for the site. This was a requirement under CSPSAM (E. Analysis of Site Deliverability).
	This lack of consultation with the landowner has meant that the Elements of Site Assessment (CSPSAM), the Sustainability Appraisal (SA) and the Strategic Environmental Assessment (SEA) regarding CS 916, were based upon some fundamental and erroneous assumptions regarding the site. This, the Respondent asserts, did not result in the robust and credible assessment of the suitability of land for particular uses and the probability that it will be developed, as required by Government guidance. (CSPSAM 5.1).
	The Respondent also has a concern regarding the consistency of the interpretation of the results of the SA's carried out within the settlement. Whilst comparing the assessments of the Allocated Sites P52 HA1 & 2 with that of CS916, there are a number of inconsistencies: All three sites score a favourable 3+ and yet only 2 of these sites have been allocated. CS 916 only scored one significant negative 12- (Red), yet the allocated sites have two each. P52 HA2 has a staggering 39% of the site within the C2 floodzone and yet has been favoured over CS 916 which only has 8% affected.

Status Maintained

The Respondent has detailed (briefly) below the Elements of Site Assessment (CSPSAM) that he feels are in issue and has used the numbering used in that document for ease of reference.

A. Appraisal of Development Potential

1. The Development Constraints that apply to CS 916 are:

1.Floodrisk a very small proportion of CS916 lies within C2 flood zone 8%. The remainder of the site is some 10 meters higher. A simple amendment to the development boundary would remove this constraint.

2.Mineral safeguarding - as the site lies within the development boundary of a settlement it should be accepted for the purposes of the LDP that the resource is unavailable.

3.Presence of protected species and habitat concerns the site was a mown field until 2009 - and therefore is not considered to present any problems in this respect, which could not be dealt with during the planning process. Furthermore, the site was the subject of a successful (but aborted) planning application on 2009. Ref:RAD/2007/0332 " so the presumption would be that this was the case.

4.Highways experts concerns on review of the Environmental Assessment Report for the site (App 3a) the PCC Highways comments are in no way negative and the site has been given a Green rating. Furthermore, the site was the subject of a successful (but aborted) planning application on 2009 Ref:RAD/2007/0332 " so the presumption would be that any concerns could be addressed through the planning process.

5.Inadequate infrastructure/services. CS 916 constitutes the remainder of a 4 phase Housing Development (as per its current UDP allocation). Phases 1 & 2 have been completed. Consequently, there is a vast array of infrastructure already on site, which was specifically designed to allow for the implementation of Phases 3 & 4. Comprising, £72,000+ of estate road, installed to S.38 standard and built in consultation with PCC Highways Department; foul and surface water drainage systems required for Phase 4, along with the connections required for Phase 3; Phase 4 street lighting; Phase 4 services connections (gas, water, lighting and telecoms) within the footpaths; Phase 3 service connections in readiness for connection. This is not an exhaustive list, but demonstrates that this is previously developed land with a proportion of services and infrastructure already in place. Page11 of the CSPSAM states the PPW expects local authorities to seek to maximise the use of existing infrastructure.

B. Fit to the Preferred Strategy - Allocation would meet the Plan's Objectives by providing an identified housing need (please see Respondent's comments at 34.104 regarding Rhayader), it is located within a settlement and thus favourably located and it is previously developed land. Allocation does not appear to conflict with any of the Plan's Objectives.

C. Testing against the Plan Assessment Process - The Respondent contends that had the LPA sought to consult with the landowner, the above information given above been available (i.e. that the site is previously developed land) during the assessment of the site. The SA would have produced a higher score of c.18+, rather than the 3+ currently awarded. Issues within the SEA have been addressed above under A.

E. Stakeholder Involvement it is not evident within the SA or the ESA that any of stakeholders/experts consulted have made any observations, regarding the site, that would led to a presumption against development.

F. Site Deliverability

Supply and Demand please see the Respondent's representation at 34.104 regarding the need for the development. The current allocation under the UDP (and the one before that!) identified the site for the provision of bungalows/elderly housing provision due to its proximity to the town centre (a short walk without an incline), its quiet, picturesque setting and the fact that it is a level site that will not prove challenging for those falling into the elderly or infirm category. It is conveniently located immediately next to a bus stop and a PROW for access to open space.

Constraints Factors please see the comments above.

Planning History please refer to Ref: RAD/2007/0332 and the Respondents concerns regarding the complete lack of consultation in this respect.

Viability Issues Please see the comments above.

Release of the Site“ Both landowners are committed to the future development of the site and both were involved in the past development (Phases 1&2). However, due to their advancing ages it is unlikely that they will develop the site themselves. The owners were in a contract for sale of the site for a number of years, whilst the developer applied for planning permission. (Ref: RAD/2007/0332). The application was extremely long and drawn out (2007-2009) and permission was granted subject to agreement of reserved matters. Unfortunately, due to the economic turndown, the developers funders withdrew before reserved matters were agreed. The site is currently on the open market as a development site and both landowners wish to sell. No discussion with regard to the landowners position has taken place, despite the LPA recognising the need to do so at p.19 CSPSAM

Council Response:

0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: The Respondent requests three changes regarding Candidate Site 916 and these are set out below:

1.That the LPA fulfil the requirement for consultation with the landowner regarding the sites previous development and also its suitability, availability and probability for further development. The Respondent holds a vast amount of documentation regarding the site and its existing infrastructure, which would greatly assist in this respect.

2.Once the above consultation has taken place, the Respondent requests that the LPA re-visit the assessment of Candidate Site 916 in accordance with the Plans Candidate Sites Process and Site Assessment Methodology to ensure that the site is appropriately evaluated against the criteria set out within regarding suitability for, availability for and probability of development.

3.Whilst the Respondent does not object to the Allocation Sites selected per se, he requests that CS 916 be re-evaluated to address the inconsistencies that have arisen with regard to the application of the assessment results within the settlement.

Council Response:

0

**Question: 3e. (ii) Candidate Site No/Name**

Representation Texts: Bryngwy Fields - Candidate Site Number 916

Council Response:

0

**Question: 4b Reason For Request To Speak At Hearing And Subject**

Representation Texts: 1.That the LPA fulfil the requirement for consultation with the landowner regarding the site’s previous development and also its suitability, availability and probability for further development.

2. The assessment of Candidate Site 916 in accordance with the Plan’s Candidate Sites Process and Site Assessment Methodology to ensure that the site is appropriately evaluated against the criteria set out within regarding suitability for, availability for and probability of development.

3. Re-evaluation of Allocation Sites to address the inconsistencies that have arisen with regard to the application of the assessment results within the settlement.

New Site

Map: P53: Three Cocks - 2015

Issue: 2015: Deposit Draft-12. Alternative Sites

*Question Representation Texts*

**Question: 3d. (i) Representation Details**

Representation Texts: A separate objection is made by AB Planning in relation to Policy H1 regarding the need for additional housing land to be provided within the Plan Period, which provides the strategic policy context for this site specific objection.

Three Cocks comprises a sustainable settlement with significant service provision including housing, retail, education, with multiple additional essential services available within the immediate settlement and community. The settlement includes numerous employment facilities including 3 industrial estates, a fuel station, pubs, restaurants and accommodation. As such the designation of the settlement is appropriate within the Deposit Plan and allows for higher proportions of housing delivery, reinforced by its location along the primary Growth Corridor, as recognised within the Wales Spatial Plan.

The site is within walking distance of all primary services within the settlement.

The proposed Site Alternative proposed herein is well related to the following:

- Adjoins Mixed Use allocation within the deposit Plan
- Adjoins 'implemented' developed of Mixed use, employment and retail development including agricultural sales and servicing within area 4 of the previously presented Candidate Site process (area 4 and most of area 3 as promoted are now included in the Deposit Plan)
- Adjoins a key public transport network with immediate links to Hay on Wye, Talgarth and Brecon.
- Accessed off the primary road network by a recently implemented junction and primary road access improvement, including the provision of a right turn priority lane/ghost island.

As a result of the above and the location of the Site Alternative being serviced by infrastructure already implemented as part of the planning consents for the Griffiths Agricultural Engineering and retail site and the Laura Ashley manufacturing site, the failure to ensure the further sustainable and efficient utilisation of these resources would be contrary to the proposed LDP Strategy and the Wales Spatial Plan.

The proposed Site Alternative will have limited additional impacts upon the landscape beyond that already accommodated by the inclusion of the allocation MUA/C1. The site area now proposed (adjusted to accommodate C2 designations along the boundary to the north/north west) is as previously assessed and accepted as part of the LPA's Local Development Plan Candidate Site process.

Having regard to the LPA's failure to provide sufficient housing land and thereby satisfactorily address the policy context set out within Policy H1, the Site Alternative presented here will allow the current housing short-fall to be addressed in providing a mechanism without which the Plan would be considered 'Unsound'. As set out elsewhere in this submission, the following tests of Soundness will be met by the inclusion of the proposed Site Alternative:

Question Representation Texts

**Question: 3d. (i) Representation Details**

Representation Texts: Site Reference 825, land to the immediate south of Great House Barn on the northern side of the A4079 Three Cocks to Llyswen road, is currently described as being in the open countryside and unsuitable for large scale housing. The development boundary as currently described on Inset Map 53 of the Deposit Draft LDP shows the boundary immediately to the south-east of site 825, excluding existing development at Great House Barn itself, a property is to all intents and purposes very much a part of the village of Thee Cocks. The enclosure in which Site 825 sits is in practice an 'infill' site between Great House Barn and the access road thereto and Orchard Lea and Aberlynfi Farm immediately to the south-east. By extending the settlement boundary to include Great House Barn and the access road thereto would leave open an opportunity to develop the enclosure within which Site 825 sits, probably for residential purposes, in a village served by a bus service, a secondary school, a church, with two public houses and being within gentle walking distance of services in Glasbury on Wye makes this an eminently sustainable location to make provision for development subject to the controls that would be applied were a planning application to be submitted.

Council Response: 0

*Question*                      *Representation Texts*

**Question: Council Response**

Representation Texts: This representation is considered to be in support of the Deposit Local Development Plan. No changes are therefore required.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: 1) Help sustain large rural settlement long term  
 2) Help sustain new bilingual welsh medium school  
 3) Natural infill and boundary change extension  
 4) No highways issue etc  
 5) No ecological disturbance  
 6) No hedge or tree removal  
 7) All services on site already including mains sewer.  
 8) Site entrance already installed and has extant planning permission for stable block and poly tunnels.  
 9)Natural infill extension to Caegarreg estate.  
 10) Land is out of flood plain  
 11) Land is adjacent to development boundary of large settlement of Trefeglwys  
 12) site offers the opportunity for development that would bring social environmental and economic benefits with a very realistic prospect of development.

Additional evidence submitted: Attachment 1- Candidate site map

Council Response: 0

*Question Representation Texts*

**Question: Council Response**

Representation Texts: The Council disagree with the proposed changes requested by the representor. The Council consider that the distribution of housing across the settlement hierarchy is based on a sound rationale which supports the delivery of the LDP strategy and the longer term viability of settlements (including Trefeglwys) considered capable of supporting sustainable growth. Candidate Site 330 is not recommended to be included as an allocated or committed site in the LDP for the following reasons: Sufficient sites with the benefit of planning permission are available elsewhere in the settlement to meet future residential land requirements and the site is highlighted red in the site status report due to environmental constraints (Flooding). However, It is noted that the Council resolved to grant planning permission for 26 dwellings on part of this candidate site, subject to a S106 agreement, in November 2015 (P/2015/0633). Notwithstanding, this site has not been identified as a committed site in the LDP at this stage because it did not have Planning Permission on 1/04/2015. Development of this site will however be accounted for through various monitoring mechanisms such as the Joint Housing Land Availability Study (JHLAS) compiled annually.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: 1) Proposed candidate site 330 joins village development boundary.  
 2) Proposed site can only be described as a natural infill site which will join the two parts of the village together.  
 3) Site proposed is not in the flood plain.  
 4) Local developer lives in village and employs all local tradesmen & materials.  
 5) Current land allocations for housing is not enough as village has a new village hall and new bilingual welsh stream school of which is only half full.  
 6) Needs more housing to sustain the above school and social economic benefits to sustain village longterm.  
 7) Site is sustainable longterm as entrance is already constructed in phase 2 Llwyn Celyn and phase 3 can be accessed off the same entrance. This has already been agreed

---

with the highways authority.

8) All services are on site including mains sewer, electric, water, telecoms and storm water sewer. No disruption to neighbours and less environmental impact.

9) Village is deemed as a large settlement.

10) Site can be developed without any removal of hedges or trees. No environmental impact whatsoever.

11) Land is low lying and has very low visual impact and is inconspicuous site.

Overall, therefore it would be reasonable to say that the site offers the opportunity for development that would bring social, environmental and economic benefits with a realistic prospect for delivery. Suitable highways access exists by virtue of roadway entrance that has been formed on Llwyn Celyn Phase 2. Furthermore the site would form a natural infill site between the two halves of the village.

Question Representation Texts

**Question: Council Response**

Representation Texts: "Thank you for your comments on the Powys LDP. Your support for the LDP and inset map P54 is noted.Support for the current site status assessments and officer recommendations in respect of candidate sites 330, 331 and 665 in the Trefeglwys area are also noted. Candiate Site 665 is not recommended to be included as an allocated site in the LDP for the following reasons: Sufficient allocated land with the benefiit of planning permission are available elsewhere in the settlement to meet future residential land requirements and the site is highlighted as red in the site status report due to technical and environmental constraints (including highways, heritage and adverse impact on the character of the countryside and settlement). No further evidence has been recieved to change this. Candidate Site 330 is not recommended to be included as an allocated or committed site in the LDP for the following reasons: Sufficient sites with the benefit of planning permission are available elsewhere in the settlement to meet future residential land requirements and the site is highlighted red in the site status report due to environmental constraints (Flooding). Notwithstanding it is noted that Planning permission for 26 dwellings on part of this candidate site was recently resolved to be granted by the Council in Nov 2015 (P/2015/0633). This site has not been identified as a committed site in the LDP because it did not have Planning Permission on 1/04/2015. "

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: I and several other Trefeglwys residents had unfortunately not been aware of the Candidate sites being considered as part of the LDP process, and had therefore not been able to submit comments concerning these sites during the 8th June - 20th July consultation period, and the formal consultation has now closed.

However, while we cannot now submit comments we would wish to express support for the current site status assessments and officer recommendations June 2015 in respect of candidate sites 330, 331 and 665 in the Trefeglwys area, and also for the development site allocations contained in the LDP Deposit Draft June 2015.

Representation Texts: P57 HA1  
 Glandwr Cymru - the Canal & River Trust in Wales would like to provide the following comments in respect of the housing site allocation ref. P57 HA1 - Land of Gallowstree Bank, Welshpool.  
 It is essential that we are fully consulted at an early stage in respect of any development proposals on this site, which lies immediately adjacent to the Montgomery Canal. We are pleased to note that Appendix 1 acknowledges the need to screen the impact of any proposals under Habitats Regulations Assessment legislation, and this should include all potential impacts on the biodiversity of the Montgomery Canal Special Area of Conservation as a habitat for wildlife including the European protected species of floating water plantain "Iuronium natans". Potential impacts include changes to the water quality as a result of surface water entering the canal both during construction and following completion, changes in shading of the waterway as a result of built development or landscape planting, and increased use of the waterway as a result of new development. Opportunities to mitigate the impact of the development of this rural greenfield site on the wildlife value of the canal and the visual amenity of canal users should be given full consideration, along with the need to improve access to the canal towpath by pedestrians and cyclists at Gungrog Bridge (No. 116).

*Question Representation Texts*

**Question: 3d. (i) Representation Details**

Representation Texts: Ystradfellte Community Council

Dear Sir

The above community council is situated within the Brecon Beacons National Park which is our Planning Authority.

However we form part of the catchment area for Ysgol Maesydderwen, the local Comprehensive school and the outdoor facilities are used by local children. The area is also adjacent to a leisure centre with potential for a wide range of activities.

The Community Council were astonished to learn that Powys CC LDA has designated 2 areas of the High school playing fields for housing, presumably with the intention of selling them off for a profit - namely HA6 and HA7 (page 58) of the Draft Powys LDP.

We were not previously aware of this proposal and there has been little local publicity.

We feel

- a. The fields are regularly used by the community and young people of all ages and
- b. That the fields should be held in trust for the young people of the area as once they are gone that is forever.

Therefore we oppose the re-designation

Question Representation Texts

**Question: 3d. (i) Representation Details**

Representation Texts: Re: Maesydderwen School ( Candidate site 737) R 35.98 H6 & H7

The Ystradgynlais Town Council has resolved (July 2015) to make another representation regarding development on this site. When consulted on candidate sites in early 2014 this site (which at that stage was candidate site 737 with an undecided use) was earmarked by the Town Council as a red site i.e. The Town Councils recommendation was that the site did not proceed.

Although it is recognised by the Town Council that the land use has now been defined into two housing plots the principal reason for the original objection remains in that the land should be retained for educational purposes (including open spaces and recreation) and not re-designated for housing.

Council Response: 0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: The site allocation HA6 and HA7 should be omitted from the deposit plan on the grounds that the land should be retained for educational purposes particularly as the LDP envisages some 237 new units ( plus other significant sites in the UDP which are currently undetermined ) which could lead to a need in the future for many more secondary school places.

Council Response: 0

Question Representation Texts

**Question: 3d. (i) Representation Details**

Representation Texts: I would like to make the following representations that I believe make the LDP as currently drafted unsound both in terms of the consistency and coherence and effectiveness tests in relation to the allocation of sites HA6 and HA7 in reference 35.98.

These allocations propose the development of housing on land that currently forms part of the Maes-y-Dderwen school estate. Both sites provide valued green spaces for informal recreation in one case and formal playing fields in the other. The inclusion of these sites is not compatible with National Strategies published by Welsh Government including:-

Climbing Higher Strategy which states "the governments aspiration of" an active healthy inclusive Wales where sport, physical activity and active recreation provide a common platform for participation fun and achievement". It is also incompatible with Play Policy Wales, which recognises the UN convention and the Rights of the Child and the right to spaces in which children can play.

In planning terms these policy objectives are re-enforced by Planning Policy Wales and TAN 16 "Sport, recreation and open space". It states that rather than developing on such land, that plans should: "ensure adequate land resources are allocated for formal and informal sport and recreation". These documents also that "Outdoor facilities like playing fields can provide significant health and environmental benefits and "open spaces particularly that with significant amenity or recreational value should be protected." Thus the plan as currently drafted is incompatible with national policy. However it is also the case that the inclusion of these sites is incompatible with the LDP itself. Paragraph 17 of the plan states that development should be directed towards brownfield sites in order to protect greenfield sites. Paragraph 25 states that "obesity levels and related health problems are increasing amongst the Powys population. Development should be located and designed to enable and encourage active and healthy lifestyles". The loss of these formal and informal recreation areas would be contrary to LDP Objective 14 – Healthy Lifestyle and LDP Objective 16 - Community Wellbeing.

Paragraph 4.2.4 requires the authority to protect existing open spaces. It also imposes a test before disposing of such sites, requiring the authority to prove that there is an excess of such land and no requirement for the recreational space.

The Authority has failed to show there is an excess of playing fields and indeed given the large numbers of fixtures played on the field by the local team – the playing field is very much required.

Paragraph 4.2.8 states that Powys will ensure school playing fields or facilities for public enjoyment are not eroded away." Thus it is clear on these grounds alone these sites should be deleted. However there are other matters that render these sites unsuitable including:- the potential loss of ancient trees, the inadequate access to both sites, the inadequate water/sewerage infrastructure in the area and the associated environmental concerns and existing pressures on local infrastructure (e.g. primary schools, health services and road infrastructure).

*Question Representation Texts*

**Question: 3d. (i) Representation Details**

Representation Texts: I would like to make the following representations that I believe make the LDP as currently drafted unsound both in terms of the consistency and coherence and effectiveness tests in relation to the allocation of sites HA6 and HA7 in reference 35.98.

These allocations propose the development of housing on land that currently forms part of the Maes-y-Dderwen school estate. Both sites provide valued green spaces for informal recreation in one case and formal playing fields in the other. The inclusion of these sites is not compatible with National Strategies published by Welsh Government including:-

Climbing Higher Strategy which states "the governments aspiration of" an active healthy inclusive Wales where sport, physical activity and active recreation provide a common platform for participation fun and achievement". It is also incompatible with Play Policy Wales, which recognises the UN convention and the Rights of the Child and the right to spaces in which children can play.

Source: Email Type: Objection Mode Oral (Examination) Status Maintained

In planning terms these policy objectives are re-enforced by Planning Policy Wales and TAN 16 "Sport, recreation and open space". It states that rather than developing on such land, that plans should: "ensure adequate land resources are allocated for formal and informal sport and recreation". These documents also state that "Outdoor facilities like playing fields can provide significant health and environmental benefits and "open spaces particularly that with significant amenity or recreational value should be protected." Thus the plan as currently drafted is incompatible with national policy. However it is also the case that the inclusion of these sites is incompatible with the LDP itself. Paragraph 17 of the plan states that development should be directed towards brownfield sites in order to protect greenfield sites. Paragraph 25 states that "obesity levels and related health problems are increasing amongst the Powys population. Development should be located and designed to enable and encourage active and healthy lifestyles". The loss of these formal and informal recreation areas would be contrary to LDP Objective 14 – Healthy Lifestyle and LDP Objective 16 - Community Wellbeing.

Paragraph 4.2.4 requires the authority to protect existing open spaces. It also imposes a test before disposing of such sites, requiring the authority to prove that there is an excess of such land and no requirement for the recreational space.

The Authority has failed to show there is an excess of playing fields and indeed given the large numbers of fixtures played on the field by the local team – the playing field is very much required.

Paragraph 4.2.8 states that Powys will ensure school playing fields or facilities for public enjoyment are not eroded away." Thus it is clear on these grounds alone these sites should be deleted. However there are other matters that render these sites unsuitable including:- the potential loss of ancient trees, the inadequate access to both sites, the inadequate water/sewerage infrastructure in the area and the associated environmental concerns and existing pressures on local infrastructure (e.g. primary schools, health services and road infrastructure).

Council Response: 0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: I would like to see that removal of the following site in the Ystradgynlais area, P58C- HA7 Maes y Dderwen Comprehensive School Area B as the site is incompatible with the stated policies of the LDP.

Question Representation Texts

**Question: 3d. (i) Representation Details**

Representation Texts: Sport Wales is the statutory consultee on developments affecting playing fields. Sport Wales objects to any proposal within the draft Development Plan that would lead to the loss of playing field areas including the proposed housing allocation at Maesydderwen Comprehensive School, Ystradgynlais (site ref HA7), unless any of the exceptions outlined at paragraph 11.1.12 of Planning Policy Wales can be satisfied. It states that:

“All playing fields whether owned by public, private or voluntary organisations, should be protected from development except where:

- \* facilities can best be retained and enhanced through the redevelopment of a small part of the site;
- \* alternative provision of equivalent community benefit is made available; or
- \* there is an excess of such provision in the area”.

Council Response:

Question Representation Texts

**Question: 3d. (i) Representation Details**

Representation Texts: We are objecting to the proposed 39 Unit development at Maes Y Dderwen Comp. School, Ystradgynlais, Area B under the Consistency, and Coherence and Effectiveness tests for the following reasons :

- 1.The site is a long standing school playing field. It is used regularly for a local junior football team for both training on weeknights and games on the weekends. It is used regularly for a local adults football team for both training on weeknights and games on weekends. Our children and their friends use it regularly to play various sports, and have done so for many years. It is a safe area to play, and can be accessed safely. It offers a nice flat sports playing area for local children, and encourages their participation in sports activities which is conducive to good health. We do not want to lose the benefits that having this playing field and area brings.
- 2.Our house faces directly onto this playing field, and there are 6 large trees outside the boundary of our property and that of our neighbours (GlynDderwen). 4 of these are substantial oak trees - possibly 100+ years old. We believe that it is important these trees are preserved both from an environmentally friendly perspective, and they are home to local wildlife, birds and squirrels. These trees are a very pleasing sight in the local area, and have been part of the local landscape for decades. These trees also offer our house and garden privacy, and are a big part of why we bought our house back in 1993. We are firmly against any of these trees being removed or cut down . We would point out that in the 22 years or so that we have owned our house, there has been little or no maintenance undertaken by the LEA / Council of the grass, weeds, or the upkeep of the road that fronts our house and next door (Glyndderwen). The maintenance required has been undertaken by ourselves sometimes at a cost of employing contractors.
- 3.We believe that this development will have an adverse affect on the value of our house. This is because :
  - a)We will lose the outlook which we currently have onto a school playing field. A nice green grassy area. This will be replaced by an outlook onto 30 new housing units.
  - b)The plan may involve the removal of the trees already mentioned which menas that we lose the substantial privacy that these afford our home and garden, and we lose the environmentally friendly view that these bring.
  - c)39 new housing units are being immediately added directly in front of our house which we believe will reduce demand for houses in this area and will drive down the value of our home. We do not believe that there is sufficient demand for 39 new housing units to be sold on this location. We have been advised by neighbours that there have been houses for sale in the immediate local area at prices below £100,000 which either do not sell, or take time to sell. It is hard to believe therefore that demand exists. There are already a number of other sites in the Ystradgynlais area which between them will satisfy any projected demand.
- 4.We would like to finish by making 2 points :
  - a) that this is fundamentally a school playing field and area which has existed as such for decades. We believe that it is wrong to develop houses on this site, and consideration must be given to keeping it as a school playing field - who knows what the school will require in the future. Once it has been developed, it will be too late.
  - b)We had not been advised of this development plan, and only found out after speaking to a neighbour who was walking by our house. This was after your meeting which had been arranged, and we were not therefore given the opportunity to attend! I don't know what the usual protocol is, but this proposed site does directly affect us, and we feel that we had not been properly advised or made aware of this plan. Surely that cannot be right?

Question Representation Texts

**Question: 3d. (i) Representation Details**

Representation Texts: I am a resident of Croesffyrdd, Glanrhyd and would like to object against the proposed sites HA6 and HA7 at Maesydderwen School, Ystradgynlais, Glanrhyd for planning.

Since I have been a resident in this street (8 years) there has been major building works taking place in the surrounding area, in particular the development of the secondary school and Tesco's. I was in favour of these developments originally to improve the facilities of Ystradgynlais, however, what I was not prepared for was the damage it seems to have caused to my property. The lorries used for the building work were using the road outside my house and during this period a number of cracks have appeared throughout the walls of the house. I also am aware that the wall outside the front of the house now has several large cracks, which could become dangerous to pedestrians using the footpath along side it!! And the likelihood of more lorries using this road as access to these two proposed sites will only cause further complications.

We were also told that the road would be resurfaced following the completion of the school but we are still waiting to have this done. The holes/bumps this road now has is not acceptable and is causing far too much wear and tear on my vehicles!!

If the proposed site HA6 goes ahead I would not like to think of the structural damage this may cause my house, with footings being dug etc for the proposed houses. If this is the case then I would definitely be looking for legal advice regarding the structural damage caused to my house.

I am also aware that both sites HA6 & 7 are used for recreation purposes on a regular basis – both Swansea Valley Rugby team and Cwm Wanderers Soccer teams use these areas to train and play on. We are a county/nation concerned about obesity and yet we want to reduce the green (accessible) areas that children have to play on.

Our water pressure in this street is low, and the effects of 59 new houses in the immediate vicinity may also have further impact on this – as well as our sewerage systems!!! Yet we still have to pay the same rates as other areas!!!

The road network around Glanrhyd is currently very busy, with 2 schools and Tesco's it can be hazardous at times. With 59 more houses with the probability of 2 cars per household this needs to be considered – can the road network cope. Even if they could, one of my issues is that the roads would need resurfacing more often due to higher usage, and this does not seem to be happening currently – yet alone with 100 more cars using it!!!??

The local primary school I believe is also near capacity – if affordable housing is going to be built on this site, this is aimed at the younger generation of buyers who in turn may have children – how will our education system cope?? As well as doctors surgery's – which I currently have to wait for 3 weeks to see the doctors (with the potential extra 100 people in the area this waiting time will only increase!)

I was also disappointed with the process of how we as residents found out about the proposed sites on the LDP. It was only by chance my friend told me that there were plans in the welfare hall for me to go and see them. I was aware that there were applications for proposed transport changes that day but planning development was not mentioned. The officer present, told me this is a general issue – then sort it out!! I went on the council website that day and nothing was on it to say about them being in the welfare hall, I'd been visiting local cafes all week with not 1 poster being present to mention this. Would it not have been too hard to post letters to all affected residents in the immediate vicinity or place an advert in the local community mag and/or the 01639??? This definitely needs to be addressed for future events/planning issues!!

Question Representation Texts

**Question: 3d. (i) Representation Details**

Representation Texts: Ysgol Maesydderwen is a Community School in its widest sense. There is an associated Leisure Centre next to the school. The Governors feel strongly that Playing Fields should be preserved and that they have a duty to safeguard them for the future on behalf of local young people. The Governing Body was not told of the proposal of the Local Authority to re-designate the land. Powys County Council have a general duty to promote such leisure facilities. One of the areas proposed for re-designation is particularly well used by children of all ages. The Governing Body feel strongly that the two areas should be retained as Playing Fields. There is an existing Covenant pertaining to the land in support of this.

The Governors feel strongly that Playing Fields should be preserved and that they have a duty to safeguard them for the future on behalf of local young people. The Governing Body was not told of the proposal of the Local Authority to re-designate the land. Powys County Council have a general duty to promote such leisure facilities. One of the areas proposed for re-designation is particularly well used by children of all ages. The Governing Body feel strongly that the two areas should be retained as Playing Fields. There is an existing Covenant pertaining to the land in

*Question Representation Texts*

**Question: Council Response**

Representation Texts: These comments are noted however, no changes are considered necessary to ensure that the plan is sound. Note the plan was promoted and advertised in accordance with the LDP Delivery Agreement and the LDP regulations. The responsibility for promoting and publicising candidate sites rests with the proposer of the candidate site rather than the planning authority. Candidate sites have been in the public relm since 2011.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: We do not feel the proposals in respect of HA6 and HA7 were advertised widely enough. Yes they were in a local paper (Brecon & Radnor Express) which is not read by many [people in Ystradgynlais. Neither the Governing Body of the School which occupies the site nor the children and young people were consulted on the proposals now or at Stage 1 and the proposals have only recently become widely known. The children in particular have not had an opportunity to comment and this aspect has been referred to the Children's Commissioner.

Question Representation Texts

**Question: 3d. (i) Representation Details**

Representation Texts: The proposal relates to a re-designation of land within the grounds of Ysgol Maesydderwen the local Comprehensive School. The Planning Authority is Powys County Council.

The catchment area of the school includes a large area, including where I reside, which is in the Brecon Beacons National Park and as such I had no prior knowledge at Stage 1 of the re-designation proposals.

I consider that the two areas should be retained as playing fields as we have a duty to protect such areas. Once gone, they are gone forever.

At least one site is extensively used by local youngsters and a Football Team which play on it several times a week. I am informed that the land at Williams Street is subject to a Covenant whose aim is to offer such protection.

Council Response: 0

**Question: 3d. (ii) Desired changes to Document**

Question Representation Texts

**Question: 3d. (i) Representation Details**

Representation Texts: We are writing to register our objection to the proposed plans on two school fields in our area; site ref HA6 and HA7. We fully appreciate the need for new and affordable housing, however we object in the strongest terms that green space should be considered a viable option. The Welsh Assembly Planning Policy regarding the protection of playing fields states that "all playing fields whether owned by public, private or voluntary organisations should be protected from development except" in certain conditions.

The fields are currently and have for some years been used regularly by a local football team for the training of several age range teams and games. Additionally both sites are regularly used in a less formal way and play an important role in the local community in terms of general activity. Having green space is also recognised to be beneficial to all not only for physical health and to stave off obesity (which as a recognised area of deprivation is a serious health problem in Ystradgynlais) but also for good mental health which should not be overlooked. It is clear to us that any alternative provision would not provide the equivalent of these two sites as these are areas that are safe, visible to all (thus encouraging others to be physically active), easily accessible to the community and familiar places to be. Neither is there an excess of such provision in the area, as the other playing fields are also used by the school and again the local community on a regular basis.

I do not feel that there is sufficient road space or infrastructure to accommodate the build of houses at these sites. At a meeting on Thursday 9<sup>th</sup> July at the 'Bomb and Dagger' the representative for Powys County Council stated that access to the bottom site (nearest to Alder Avenue) would either be through Alder Avenue or via the old school main entrance. Both options are not feasible due to constricted access and issues of safety.

It was also stated at the same meeting that as Ystradgynlais was the second largest town in Powys we would therefore accommodate the second largest amount of development. I fear that this approach is rather too simplistic and doesn't take account of any development that may be proposed across the border in Ystalyfera with the added strain to Glanrhyd in terms of commuting to outlying areas such as Swansea for work, schools which are already at full capacity and other facilities such as GP surgeries which are notoriously difficult to get appointments with.

Further to the above is the disruption such developments would bring to the area for a significant period of time. Having experienced first-hand the build of the astro turf (which incidentally failed to gain the proper planning permission in the first instance) and then of the new schools I really do not feel that our small community should have to endure any further disruption.

The only suitable sites for further development would be brown field sites. The Tesco site would have been ideal as would the old primary school sites of which, most I believe were sold off privately. I am sure that if your department had looked closely enough during the planning phase you would have been able to identify more suitable sites and NOT precious green space.

Thank you for your consideration of the above objections to the proposed housing allocation at site ref HA6 and HA7.

Question Representation Texts

**Question: 3d. (i) Representation Details**

Representation Texts: To whom it may concern,

Please find below a list of our concerns concerning the proposed development sites of HA7 and HA6.

- This area has already suffered years and years of discomfort and disruption with the building of two new schools—one at Maesydderwen School and the other, Ysgol Bro Tawe and also the building of the Tesco store. The community of Glanrhyd should not have to put up with any more new building works.

The sites a( 6a) Are of vital importance to the community.

- The fields are part of a covenant made by the Gough family estate to be used by the school and the local community for recreational purposes. The fields are protected from development as long as they are in use and they are.
- While the sites were suggested by the Local Education Authority, Maccsydderwen School Governing Body is completely opposed to these proposed building plans. They were not consulted on the proposal and were only told of it 1 month ago. They are vehemently opposed to the building works on school fields and so close to the school buildings.
- The HA7 site is used several times a week by the Cwm Wanders Junior football teams for matches and training and is therefore an important community resource. Through involvement in the teams local children gain exercise, confidence and skills for life. In addition to this it is the only green space that children who live around the area of the school can play on, in a safe environment. Therefore it is evident that these sites are green field sites, used by the community for recreational purposes and the development of these green field sites flies directly in the face of Welsh Government and Powys policy on new building developments.
- HA7 is adjacent to old age and sheltered accommodation and the residents of these homes will be on the receiving end of much of the disruption, noise and dust of the building works for, what could very possibly be, up to 5 years.

The infrastructure of the area cannot support a new housing development.

- The sewage system is in need of improvement and updating and is already at full capacity. In times of heavy rainfall sewerage often overflows into the local river which is dramatically reducing the reproduction of salmon and sewin. The cost of these improvements and the additions needed to support the new houses would be considerable.
- There are similar problems with the water supply system, as reported by Dwr Cymru, and again the cost of improvements and updates would fall to the developers. This area already suffers from severe low water pressure at times in a day as it is.
- The building of these houses may lead to the cutting down of established, aged trees. This has already happened for the new building at Maesydderwen School, which has already added to the drainage problem, this new development will only add to it again.
- The traffic during peak times is already dreadful, due to the close proximity of the two schools and Tesco. The narrow roads are already overburdened and these problems will only get worse with the traffic generated from the new development.
- The proposed access to the HA7 site through William Street, is completely unsuitable, for several reasons. The road is very narrow and would need significant widening. The

houses on the road are rely on the road for parking and have been responsible for its maintenance for many years, so new parking spaces would need to be incorporated into the new development designs. Also, the access to William Street is via a mini roundabout that already supplies the access to Maesydderwen School and the local hospital. The additional traffic through this access would lead to a contraflow against the buses leaving the school and jeopardise ambulance access to the hospital.

- The new residents of this development would put a further strain on local services. For example, there is already a two week wait for a GP appointment and the local primary schools are full. This development would lead to poorer services for all involved.

- With very little employment available in the Ystradgynlais area itself, new residents of the proposed homes, and the many more planned through-out the Swansea Valley, will need to commute and this will, undoubtedly, lead to even worse traffic congestion between here and the Ynysforgan roundabout, in particular.

The change that we would like to see made to the proposals of HA7 and HA6 is for them both to be removed from the list of proposed sites, due to the reasons above. With regard to the suggesting of alternatives I am at a loss because I am unaware of other areas of land suitable/available for the development of houses, apart from the available area adjacent to the Tesco store opposite Tesco petrol station. However, I feel sure that there must be more suitable land in this area somewhere.

Yours faithfully,  
Dawn Jenkins  
Ffion Jenkins

Question

Representation Texts

**Question: 3d. (i) Representation Details**

Representation Texts: To whom it may concern,

Please find below a list of our concerns concerning the proposed development sites of HA7 and HA6.

- This area has already suffered years and years of discomfort and disruption with the building of two new schools—one at Maesydderwen School and the other, Ysgol Bro Tawe and also the building of the Tesco store. The community of Glanrhyd should not have to put up with any more new building works.

The sites at HA6 & HA7 are of vital importance to the community.

- The fields are part of a covenant made by the Gough family estate to be used by the school and the local community for recreational purposes. The fields are protected from development as long as they are in use and they are.
- While the sites were suggested by the Local Education Authority, Macsydderwen School Governing Body is completely opposed to these proposed building plans. They were not consulted on the proposal and were only told of it 1 month ago. They are vehemently opposed to the building works on school fields and so close to the school buildings.
- The HA7 site is used several times a week by the Cwm Wanders Junior football teams for matches and training and is therefore an important community resource. Through involvement in the teams local children gain exercise, confidence and skills for life. In addition to this it is the only green space that children who live around the area of the school can play on, in a safe environment. Therefore it is evident that these sites are green field sites, used by the community for recreational purposes and the development of these green field sites flies directly in the face of Welsh Government and Powys policy on new building developments.
- HA7 is adjacent to old age and sheltered accommodation and the residents of these homes will be on the receiving end of much of the disruption, noise and dust of the building works for, what could very possibly be, up to 5 years.

The infrastructure of the area cannot support a new housing development.

- The sewage system is in need of improvement and updating and is already at full capacity. In times of heavy rainfall sewerage often overflows into the local river which is dramatically reducing the reproduction of salmon and sewin. The cost of these improvements and the additions needed to support the new houses would be considerable.
- There are similar problems with the water supply system, as reported by Dwr Cymru, and again the cost of improvements and updates would fall to the developers. This area already suffers from severe low water pressure at times in a day as it is.
- The building of these houses may lead to the cutting down of established, aged trees. This has already happened for the new building at Maesydderwen School, which has already added to the drainage problem, this new development will only add to it again.
- The traffic during peak times is already dreadful, due to the close proximity of the two schools and Tesco. The narrow roads are already overburdened and these problems will only get worse with the traffic generated from the new development.
- The proposed access to the HA7 site through William Street, is completely unsuitable, for several reasons. The road is very narrow and would need significant widening. The houses on the road are rely on the road for parking and have been responsible for its maintenance for many years, so new parking spaces would need to be incorporated into the new development designs. Also, the access to William Street is via a mini roundabout that already supplies the access to Maesydderwen School and the local hospital. The additional traffic through this access would lead to a contraflow against the buses leaving the school and jeopardise ambulance access to the hospital.
- The new residents of this development would put a further strain on local services. For example, there is already a two week wait for a GP appointment and the local primary schools are full. This development would lead to poorer services for all involved.
- With very little employment available in the Ystradgynlais area itself, new residents of the proposed homes, and the many more planned through-out the Swansea Valley, will

Question Representation Texts

**Question: 3d. (i) Representation Details**

Representation Texts: This is a group representation submitted on behalf of the Glanrhyd Residents objecting to allocations P58 HA7 (Maesydderwen) and P58 HA6 (Alder Avenue):

The following points/concerns have been summarised from the group submission:

1) Ref point 34.26 states that ' it is important that school playing fields are not eroded away by development pressures... and that land remains protected for some form of recreation. Compelling evidence that the facility is no longer requested for recreation or amenity purpose will be required'. In response to this, we can confirm that the field in question is used on a daily basis, including evenings and weekends by the following:  
 Cwmtwrch Wanderers Football Club have approx 18 teams.  
 Childrens summer school based at the adjoining swimming pool.  
 Individual members and groups from the Local Gym use it in their training/exercise regimes.  
 Local children use it as a play area.

The loss of this sporting resource would effectively be the end of a vital activity in the community. Cwmtwrch wanderers football club is helping children keep fit and interested in sport rather than hanging around street corners & taking drugs etc. The club also looks after the pitch, with no cost to Powys Council.

2) Under Environmental Considerations, the LDP states that 'where possible, development should be directed to appropriately located brownfield sites.....to protect greenfield land'

3) Traffic and access issues - Glanrhyd already has many traffic problems which would be further compromised by any further influx to the population. Particular congestion at the entrances to the two schools at certain times of day.

4) Drainage & sewerage systems in the locality are already heavily overloaded. The area is frequently troubled with blocked sewers. Additional housing would simply have a detrimental effect on the river and the fish stock.

5) Floodzone - there is a question as to whether Glanrhyd is actually on a floodplain. Ongoing general concerns over the Environmental Agency's lack of clarity. Many residents having to pay higher insurance premiums as a they are considered to be located within a floodplain.

6) The capacity of Education, health & social care provision in the locality is already a problem. The school in Glanrhyd is full to capacity. Given the total number of houses planned for Glanrhyd and the encompassing area, if only half of the residences had only one child in them, then that is more than the total capacity of any of the schools. Currently no places for local residents to register with the local dentist and waiting time for non-emergency doctor appointments is 2/3 weeks.

7) Maesydderwen school building and playing fields were bequeathed by the Gough Estate under the terms of covenant which stipulates these were to be used specifically for the purpose of education and recreation for the benefit of the community. It is right and proper that these terms be upheld so that our green spaces remain for the enjoyment of our

small community, as intended by those before us.

8) Years of disruption (the building of a superstore, schools, and replacement of water pipes) has already been endured by residents in this area. The impact on our quality of life has been felt these past years and we do not feel that we should be expected to put up with further disruptions and even heavier traffic flow.

9) Concern regarding future of ancient oak trees. It is believed that several trees would have to be removed to create access to these sites which would impact on the beauty of the area and the quality of life for residents.

10) The field is a safe place where local children, for generations, have always played in their leisure time; as place where they can remain visible and safe and can develop their physical, social and well-being skills more independently. They do not have any other safe green space to play and children from both ends of the village, from Glantawe Park to Tawe Park and all the streets between, use this area. At present, a high percentage of the village children live on the Maesydderwen side of the main road and the only recreation park (swings etc) is across this main road.

11) The character, external appearance and size of the new housing would adversely affect existing houses. The density and over development would lead to a loss of enjoyment and decreased green space. It is likely that building as many as 39 houses would result in small and cramped gardens, thereby contravening the council's own policy with regard to sufficient green space. For each household. The proposed housing would result in a loss of privacy for the residents of William Street and adjacent roads

12) Car parking - It is disingenuous to think, where houses are built near public transport, that residents will use only one vehicle or even dispense with the need for a car altogether. On the contrary many households own more than one car and where a resident uses a commercial vehicle for work purposes, these are often parked overnight as near as possible to his or her property. This inevitably leads to overcrowding of the highway and over spilling onto surrounding roads, which is hazardous and potentially lethal for pedestrians, cyclists and parents with prams or pushchairs.

13) Maesydderwen School Governing Body - extremely angry due to lack of notice and consultation regarding the sale of the school fields, and are opposed to the proposal.

14) Possibly time for Powys County Council to actually consider creating a new village/town somewhere in Powys, with its own infrastructure and amenities. Utilising land that is no longer used for anything. This constant village cramming we are experiencing surely indicates that maybe a change of direction and innovation is long overdue.

15) There are plenty of other more suitable sites, which would create far less disruption. Eg fields along A4067 between Ystradgynlais and Penycae.

*Question Representation Texts*

**Question: 3d. (i) Representation Details**

Representation Texts: Candidate site number 463 is suggested as an alternative development site. There is no signs of this land being used at present, in fact I have never seen it in use. It is extremely overgrown. There is already an access road coming from the roundabout, also an underpass to Gurnos and a path opposite that leads to Tesco and Ystalyfera. Development on this site would create less disruption than at the proposed sites.

Question Representation Texts

**Question: 3d. (i) Representation Details**

Representation Texts: To whom it may concern

This household objects most strongly to proposals concerning the playing field opposite William Street and Alder Avenue becoming a housing estate. It would mean the loss of green space for children to play safely as the government reminds parents of the importance of exercise and fresh air. The field is also used by the Cwmtawe Football for practice and matches several times a week. That means a great deal to the children and parents. Extra houses also means an increased workload for the Health Centres, Hospital, services for the elderly and disabled and local schools.

Also utility services would struggle to fulfill their obligations regarding sewerage, lighting and recycling.

As well as increasing traffic on an already busy main roads, including buses and heavy lorries, the access to the housing estate is non existent. The side roads leading to the field are too narrow for extra traffic.

Croesfrydd already accommodates traffic leading to Maesydderwen School, the leisure centre and a group of new houses.

The mini roundabout near the school entrance from Glanrhyd is placed next to a zebra crossing, the exits from William Street and Glanrhyd Hospital. Also nearby are two bus stops immediately opposite each other and a turning for Glannant.

Difficult for drivers and pedestrians to use safely.

Definitely unsuitable for more traffic.

Alder Avenue would become the only access to new houses - traffic 24/7

Would Maesydderwen be willing to lose a playing field?

Question Representation Texts

**Question: 3d. (i) Representation Details**

Representation Texts: We feel compelled to write to you to strongly object to the proposed sale and development at Maesydderwen School, Ref P58.HA7.

This community has had to endure a significant amount of construction in recent years with the development of Tesco (and associated roadworks at Wind Road), the construction of the new primary school, Bro Tawe, the major overhaul at Ysgol Maesydderwen and the relaying of a new water main through Glanrhyd and the wider community..

We accept that new buildings need to be constructed and maintenance of roads/ buildings is inevitable but we have endured a tremendous amount of work in a relatively short period of time. You will appreciate the nuisance factor associated with this work such as noise, dust, traffic lights, increased traffic movements, increased pollution etc.

On a personal note, a new housing development, consisting of affordable/social housing being constructed directly adjacent to our property will have an adverse value on our house. Who will recompense us for the loss of equity on our property? Powys County Council? In addition we currently enjoy views of the Varteg mountain from our garden, the proposed development will erase this view. Maesydderwen Gardens is currently a quiet area, we strongly feel that the dynamics of the area will change with the introduction of an additional 40 or so new houses.

We grew up in this community. These playing fields have been the playground for the children of Glanrhyd for many, many decades. Local children play on this field on a daily basis. The location of the field allows children, including our own to play safely with the knowledge that so many houses look onto the field. Basically, this is a safe environment for the children of our community to play and exercise. We can't understand the logic of why, when the younger generations are struggling with obesity issues that Powys County Council are seriously considering selling playing fields for a short term financial gain. Surely this cannot be right?

This proposal will involve affordable/social housing being included in the development. Surely having this type of development in such close proximity to Ysgol Maesydderwen could present safety and welfare threats to pupils. As parents of a Maesydderwen pupil, this is of great concern to us.

This field is also utilised by a local football club. Training takes place during the week and matches are regularly played on weekends. Ironically, this football club has had to resort to using this field because they lost their ground in 2012 when Ysgol Dyffryn Y Glowyr was built. Granted a new ground was provided but drainage issues with the new field has meant that Maesydderwen Field has to be used.

It is worth highlighting that this field does tend to hold a lot of water during the winter months or after periods of extended rainfall. This drainage issue has exacerbated since the modernisation of Maesydderwen School. By removing this natural catchment area and introducing a mass of new paved area, flooding issues will need to be seriously investigated/considered. Furthermore, will the existing storm and sewer drainage system cope with a further 40 households?

There has to be other more suitable areas, which will cause less impact on the local community for the reasons we have demonstrated above.

Question Representation Texts

**Question: 3d. (i) Representation Details**

Representation Texts: I wish to lodge a formal; objection to the proposed building developments of the Maesydderwen Ystradgynlais site [P58 HA6 & HA7]. See attached [Rep Form for V1 - V4].

1. I note on your intranet site that there have been previous amended plans Myself and the local community were not aware of any proposed developments in the area. I am informed that there should be a 90-day consultation period.Can you confirm the date of the first consultation document.

2. The proposed development on playing fields are widely used by the local community and sports clubs. The development will result in the lack of safe playing areas which are easily viewed by by parents. The residual available playing areas are isolated from the local housing and would considerable compromise the safety of children. The fields are not readily visible and are secluded from view. I would be interested hear your comments regarding the safety and well-being our children.

3. The local community is informed that areas with the Glanrhyd locality has been deemed as a flood plain. Therefore how has planning permission been granted to build a number of houses when the area is a flood plain?

My main priority is the safety of my child and other children whilst they are out playing to remove the playing fields will significantly impact on their safety and well-being.

I wish this e-mail to be recorded as a formal objection to the Powys Local Development Plan.

Question Representation Texts

**Question: 3d. (i) Representation Details**

Representation Texts: I wish to lodge a formal; objection to the proposed building developments of the Maesydderwen Ystradgynlais site [P58 HA6 & HA7]. See attached [Rep Form for V1 - V4].

1. I note on your intranet site that there have been previous amended plans Myself and the local community were not aware of any proposed developments in the area. I am informed that there should be a 90-day consultation period.Can you confirm the date of the first consultation document.

2. The proposed development on playing fields are widely used by the local community and sports clubs. The development will result in the lack of safe playing areas which are easily viewed by by parents. The residual available playing areas are isolated from the local housing and would considerable compromise the safety of children. The fields are not readily visible and are secluded from view. I would be interested hear your comments regarding the safety and well-being our children.

3. The local community is informed that areas with the Glanrhyd locality has been deemed as a flood plain. Therefore how has planning permission been granted to build a number of houses when the area is a flood plain?

My main priority is the safety of my child and other children whilst they are out playing to remove the playing fields will significantly impact on their safety and well-being.

I wish this e-mail to be recorded as a formal objection to the Powys Local Development Plan.

*Question Representation Texts*

**Question: 3d. (i) Representation Details**

Representation Texts: •Due to the amount of proposed development, and the close proximity of sites, it will be necessary for developers to fund the undertaking of a hydraulic modelling assessment of the water supply network to establish any improvements required to serve the sites with an adequate water supply.  
•Our local sewerage network can accommodate foul flows from the proposed development.  
•Ystradgynlais Wastewater Treatment Works (WwTW) has limited capacity and our current capital investment programme, Asset Management Plan 6 (AMP6), for the period 2015-2020 includes a scheme to increase capacity at Ystradgynlais WwTW. Should potential developers wish to commence in advance of the AMP6 scheme then financial contributions from developers are required to fund the necessary improvements through S106 of the Town & Country Planning Act 1990.

Question Representation Texts

**Question: 3d. (i) Representation Details**

Representation Texts: Re: Development Proposal Map Ref. P58 HA6

I write in connection with the above development. The site runs adjacent to my property in Alder Avenue, Ystradgynlais. I wish to object strongly to houses being erected at this location.

1) In my opinion, the proposed development is too close to Maesydderwen secondary school. This land is part of the school's grounds and currently used by children as a playing area. The development raises concerns regarding the welfare of these children, including reducing the space available for them to play on and the potential for accidents rising from the volume of increased traffic. Junior football teams also use the field most weekends during the football season.

2) On a personal note, I have concerns that my privacy would be greatly compromised, as several houses could potentially be overlooking my property, leading to an increase in noise and traffic along the road outside my house. I purchased my property because of its private surroundings and quite location. I believe that there would be a reduction in the value of my property as a result of this development.

3) The avenue is also totally unsuitable as an access road, as it is much too narrow to allow an increase in through traffic. Any proposal to widen it would completely ruin its character and in my view again lead to an unacceptable reduction in property prices. In addition, the residents have always maintained all the avenue trees, grass verges, the grass roundabout and grass banks. Residents have even replaced avenue trees when existing ones have perished.

4) Furthermore, the sewerage and wastewater services of Alder Avenue are not located under the road, they actually run under the front gardens of each property and as such are privately owned by the residents. Over the years there have been a number of incidences of blocked pipes - I don't believe this system could sustain additional properties being connected.

ADDITIONAL SUPPORTING EVIDENCE:

A) Letter dated 19 July with covering email re-iterating the points above.

*Question Representation Texts*

**Question: Council Response**

Representation Texts: This representation is considered to be in support of the Deposit Local Development Plan, and specifically of policy H1 in that it allocates the land off Brecon Road, Ystradgynlais (P58 HA1) for housing and will contribute towards achieving the 5 year land supply. No changes are therefore required.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: Policy H1 is supported with regard to the identification of land off Brecon Road, Ystradgynlais and its inclusion in the site schedule in Appendix 1.(P58 HA1) and on the Proposals Map.(Inset 58)

We note that the policy also seeks to maintain a 5 year housing land supply. For reasons explained in the accompanying Submission Document we confirm that the release of the land for housing will contribute to achieving a 5 year land supply on adoption of the LDP as required by the new TAN 1.

Please refer also to the accompanying Submission Document.

Question Representation Texts

**Question: 3d. (i) Representation Details**

Representation Texts: Objections to Proposed Development at Rear of Jeffries Arms, Brecon Rd Ystradgynlais.  
Powys C.C. Site References P58 HA1 & P58 HC1

It is the opinion of those local residents who have attached their names to this document that the candidate sites P58 HA I and P58 HC in Powys County Council's 2015 revision of the Local Development Plan are unsuitable for housing development on account of access, safety and ecological factors.

For the specific reasons outlined below we ask that these sites be removed from the plan and the associated housing allocations be re-allocated to an alternative site/s.

Brecon Rd presents a higher than average risk for traffic and pedestrians due to an uneasy combination of adjoining accesses, parked vehicles and the steep incline down into the town centre.

The terraced houses along the road have no off road parking options, and the creation of another adjoining access at, or close to the Jeffries arms, and opposite the entrance to Bryn Rd would considerably exacerbate what is already an over-competitive parking problem for existing residents. The proposed entrance directly opposite Bryn Rd, which is a busy access to Lluest Estate, will be an additional hazard and visibility will be a problem for both proposed entrances, causing cars to venture too far out into Brecon Rd in order to see any coming traffic.

The steep gradient on Brecon Road, tends to speed up South-bound vehicles, and the prospect of North-bound vehicles blocking the road as they wait to turn right into the proposed site, safety will add to what is already a relatively hazardous piece of road for both motorists and crossing pedestrians.

The Council's Highways Department were obviously well aware of these constraints when they produced the attached report (attachment 2) in response to an appeal from Lakedale Ltd in 1990. Since that time the number of vehicles per household on Brecon Rd have increased and the volume of traffic using Brecon Rd has increased considerably, particularly as a result of the new school just up the road at Penrhos.

The current proposal would create up to 1000 additional vehicle movements per day and heavy vehicle movements during the construction phase, which could be prolonged, would be a problem for existing local residents. All of this would also impact on the infrastructure of Ystradgynlais town centre, which is already suffering congestion at intervals throughout the day.

So far as ecological issues are concerned the Pearl Bordered Fritillary Butterfly is known to inhabit the proposed sites and great crested newts are probably still present.

We remind the council of our previous petition against these two sites and in the relatively short lime available to us we have revisited a number of the previous signatories to re-confirm the strong local opposition. We all wish to re-state our objection to the inclusion of sites P458 HA and P58 HC on the basis that the above points are particulailly relevant to any liture development in this location and have not been addressed to our satisfaction. We all believe that there are more appropriate sites for housing development in the

*Question*                      *Representation Texts*

**Question: 3d. (i) Representation Details**

Representation Texts: Objections to Proposed Development at Rear of Jeffries Arms, Brecon Rd Ystradgynlais.  
Powys C.C. Site References P58 HA1 & P58 HC1

It is the opinion of those local residents who have attached their names to this document that the candidate sites P58 HA I and P58 HC in Powys County Council's 2015 revision of the Local Development Plan are unsuitable for housing development on account of access, safety and ecological factors.

For the specific reasons outlined below we ask that these sites be removed from the plan and the associated housing allocations be re-allocated to an alternative site/s.

Rep'n/Para/Policy	AccessnNo	DateLodgd	Late?	Status	Modified	Summary	
6176.V2		14/07/2015	<input type="checkbox"/>			Summary: Objection to allocation of site P58/HA1	
Source:	Post or in person	Type:	Objection	Mode:	Written	Status:	Maintained

Brecon Rd presents a higher than average risk for traffic and pedestrians due to an uneasy combination of adjoining accesses, parked vehicles and the steep incline down into the town centre.

The terraced houses along the road have no off road parking options, and the creation of another adjoining access at, or close to the Jeffries arms, and opposite the entrance to Bryn Rd would considerably exacerbate what is already an over-competitive parking problem for existing residents. The proposed entrance directly opposite Bryn Rd, which is a busy access to Lliest Estate, will be an additional hazard and visibility will be a problem for both proposed entrances, causing cars to venture too far out into Brecon Rd in order to see any coming traffic.

The steep gradient on Brecon Road, tends to speed up South-bound vehicles, and the prospect of North-bound vehicles blocking the road as they wait to turn right into the proposed site, safety will add to what is already a relatively hazardous piece of road for both motorists and crossing pedestrians.

The Council's Highways Department were obviously well aware of these constraints when they produced the attached report (attachment 2) in response to an appeal from Lakedale Ltd in 1990. Since that time the number of vehicles per household on Brecon Rd have increased and the volume of traffic using Brecon Rd has increased considerably, particularly as a result of the new school just up the road at Penrhos.

The current proposal would create up to 1000 additional vehicle movements per day and heavy vehicle movements during the construction phase, which could be prolonged, would be a problem for existing local residents. All of this would also impact on the infrastructure of Ystradgynlais town centre, which is already suffering congestion at intervals throughout the day.

So far as ecological issues are concerned the Pearl Bordered Fritillary Butterfly is known to inhabit the proposed sites and great crested newts are probably still present.

We remind the council of our previous petition against these two sites and in the relatively short lime available to us we have revisited a number of the previous signatories to re-confirm the strong local opposition. We all wish to re-state our objection to the inclusion of sites P458 HA and P58 HC on the basis that the above points are particularly relevant to any liture development in this location and have not been addressed to our satisfaction. We all believe that there are more appropriate sites for housing development in the Ystradgynlais area and ask the council to revise their plan accordingly.

Please see Following Attachment 3 .....

[The above text was submitted as a letter marked as Attachment 1 and supported by a 30 name petition marked as Attachment 3 ]

Council Response: 0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: Site should be excluded from the plan. The house numbers currently allocated to those sites should be re-allocated to other more suitable sites in the area.

Council Response: 0

**Question: 3e. (ii) Allocation No:**

Representation Texts: P58/HA1

Question Representation Texts

**Question: 3d. (i) Representation Details**

Representation Texts: •Due to the amount of proposed development, and the close proximity of sites, it will be necessary for developers to fund the undertaking of a hydraulic modelling assessment of the water supply network to establish any improvements required to serve the sites with an adequate water supply.  
•Our local sewerage network can accommodate foul flows from the proposed development.  
•Ystradgynlais Wastewater Treatment Works (WwTW) has limited capacity and our current capital investment programme, Asset Management Plan 6 (AMP6), for the period 2015-2020 includes a scheme to increase capacity at Ystradgynlais WwTW. Should potential developers wish to commence in advance of the AMP6 scheme then financial contributions from developers are required to fund the necessary improvements through S106 of the Town & Country Planning Act 1990.

Issue: 2015: Deposit Draft-12. Alternative Sites

*Question Representation Texts***Question: 3d. (i) Representation Details**

Representation Texts: The final column at Appendix 1 indicates that insofar as the 8 sites proposed for allocation at Ystradgynlais are concerned (Refs P58 HA1 to HA8) there are a considerable number of outstanding issues which need to be resolved e.g. highway access solution required, ecological survey required, land contamination report required. We are also of the view that there are some crucial unresolved issues that are not listed e.g. a safe and secure access to the land to the rear of Jeffrey's Arms, Brecon Road.

These have all been resolved at Penrhos Farm.

This site at Penrhos Farm (previously referenced P58/HA9) is 'available', 'deliverable' and 'viable'.

We are seeking the reinstatement of the previously included allocation (as recommended for inclusion by officers to the Council at its meeting on 27th May 2014) – Area P58 Ystradgynlais - Land at Penrhos Farm HA9 3.56 ha (gross) 76 dwellings - Ref: Candidate Site 885).

We have re-submitted the amended Sustainability Appraisal and Strategic Environmental Assessment using the PCC's toolkit.

In the deposit draft version of the plan that was recommended to the Council at its meeting on 27th May 2014, 10 separate housing allocations at Ystradgynlais were recommended for inclusion with an overall capacity identified at 318 dwellings.

It is our understanding (N.B. the matter was not properly minuted) following a request made at that meeting by one Councillor, the Council resolved that site P58/HC9 (76 dwellings at Penrhos Farm, Ystradgynlais) be deleted from Inset Map P58E and that the Portfolio Holder for Regeneration and Planning be given delegated authority to deal with site specific issues with local Members, including a replacement allocation. It is also the case that there is no minute which recorded the reason why the site at Penrhos Farm was proposed for removal from Inset Map P58E.

For the record, the way the decision to delete site P58/HC9 from the list of proposed allocations was handled, without as far as we know any proper consideration of the planning merits of the matter, is the subject of a separate ombudsman complaint.

It is our understanding that the main reason why a local Member proposed that the site be removed from the Inset Map was because she was under the impression that the site had been purchased by the current landowners using public funds. We have since provided the Council with documentary evidence that this is absolutely not the case and note that this is, in any event, irrelevant.

It is also clear that since the meeting of the Council on 27th May 2014, Officers have been unable to identify a suitable alternative allocation or allocations in Ystradgynlais to

Status Maintained

make up the numbers. The settlement is consequently 76 dwellings short in respect of the level of allocation the Council had deemed appropriate to be apportioned to this settlement.

We are also clear that since the site was considered by Officers in the context of its sustainability appraisal (Step 3 Options Appraisal Tool) and recommended for allocation, we have provided the following additional technical studies that have clarified a number of matters (Access, Ecology, Heritage, Archaeology, Ground Conditions, Utilities and Services). Providing this further technical information has consequently boosted the site's sustainability score. (A copy of all the technical studies has been submitted to the Council together with an amended and updated 'Step 3 – Options Appraisal Tool'.) This is in stark contrast to a number of the other sites proposed for allocation at Ystradgynlais where the final column at Appendix 1 indicates a considerable number of outstanding issues which need to be resolved e.g. highway access solution required, ecological survey required, land contamination report required. These have all been resolved at Penrhos Farm.

The site at Penrhos Farm is free from planning, physical and ownership constraints, and economically feasible for development, so as to create and support a sustainable community in a part of PCC where people want to live. The site comprises very poor quality agricultural land which is currently grazed by horses and, in any event, it benefits from an extant planning permission for recreational uses. There are no ecological, archaeological or heritage constraints to development, and the site is well defined and enclosed to the north and east by woodland. Satisfactory vehicular access is in place as are the requisite utilities close by.

For the avoidance of doubt, there has never been any suggestion that the site was deleted for reasons identified through the Sustainability Appraisal and Strategic Environmental Assessment process. Indeed, the site was recommended for inclusion by officers having subjected the site to that process.

This site at Penrhos Farm (previously referenced P58/HA9) is 'available', 'deliverable' and 'viable'.

*Question Representation Texts*

**Question: Council Response**

Representation Texts: The LDP's dwelling requirement and provision of housing land continues to be reviewed in light of emerging evidence. Focussed Changes relating to housing land allocations are proposed in relation to Ystradgynlais.

With regard to the inclusion of the site (land at Cynlais School Playing Field),....

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: Policy H1 is objected to on the basis of the reduced housing land target. We also wish to object to the non-inclusion of the land at Cynlais School Playing Field and its omission from the site schedule in Appendix 1 site under Policy H1.

We note that the Policy also seeks to maintain a 5 year supply of housing. For reasons explained in the previous section we consider that unless a sufficient range and choice of sites is provided, Powys County Council will struggle to achieve a 5 year land supply, not only on adoption but throughout the plan period.

The first part of the policy refers to development in Towns and Large Villages. We consider that development of the site in question would be compatible with the requirement as it would form a logical extension to the settlement of Ystradgynlais to a defensible development boundary formed by the A4067.

Council Response: 0

*Question*                      *Representation Texts*

**Question: 3d. (i)      Representation Details**

Representation Texts:      This representation must be considered in the context of my representation which highlights that, when considered against the LDP strategy, there is a significant under provision of housing land to the 'Town' of Ystradgynlais (test CE1).

I believe that the expansion of LDP housing allocation P58 HA3, to include additional land (please see appended OS map) for 150 homes in total will help to address this under provision on a site which I consider is well located and deliverable (test CE2).

This change will also increase flexibility, by providing a site of significant scale in Ystradgynlais. Should any of the LDP allocations fail to deliver, as is the experience with some of the allocations to date which were allocated in the Powys Unitary Development Plan and have not seen development to date (test CE4).

Please note:

The site was not promoted at the candidate sites stage (in 2011) because of the school. Despite representations to include the above land (made on the first Deposit Local Development Plan (July 2014)), the County Council maintains there are no appropriate alternative sites meet the 'pro rata' apportionment in the town as explained in the LDP Strategy Topic Paper, P46. Appendix D.

- In support the following information has been submitted:
- Attachment 1 - Statement - Required supporting information (3e)
  - Attachment 2 - OS based site location plan.1:2500
  - Attachment 3 - Site description document
  - Attachment 4 - Excel spreadsheet - SA/SEA Land adjoining P58 HA3
  - Attachment 5 - Additional Statement - Sustainability Appraisal

Council Response: 0

**Question: 3d. (ii)      Desired changes to Document**

Representation Texts:      I believe that the expansion of LDP housing allocation P58 HA3, to include additional land (please see appended OS map) for 150 homes in total will help to address this under provision on a site which I consider is well located and deliverable within the LDP plan period (test CE2).

Should this be accepted, secondary changes would need to be made to the LDP (amendment to development boundary on Inset Map and to Appendix 1 of the written statement).

Council Response: 0

**Question: 4b              Reason For Request To Speak At Hearing And Subject**

Representation Texts:      I would like to speak at the examination hearing to assist the Inspector if any questions arise as to the suitability and or deliverability of the proposed extension to housing allocation P58 HA3.

Council Response: 0

*Question Representation Texts*

**Question: 3d. (i) Representation Details**

Representation Texts: Re: Ynysbydafa Farm , Caerlan ( Candidate site 1182) R 35.101

The Ystradgynlais Town Council has resolved (July 2015) to make representation regarding development on this site. When consulted on candidate sites in early 2014 this site was earmarked by the Town Council as a red site i.e. The Town Councils recommendation was that the site did not proceed.

The principal reason for the objection remains in that the land should be retained as an agricultural green wedge between two communities.

This response had been seen to dovetail with the Planning Policy Comments included in the site status report issued in December 2013 which had stated:

'Adjacent existing settlement and development boundary of Caerlan . Could be logical extension continuing development along main road into Ystradgynlais, although encroachment onto countryside. Site to remain in candidate site process, but to be used if we don't have enough land'

The Ystradgynlais Town Council therefore were disappointed to see the site therefore included in the draft deposit LDP and can only assume it is because of a lack of other land which is somewhat surprising in view of the number of other sites ( 213 units) proposed in the Ystradgynlais area.

Another issue of concern is that the Options appraisal tool for governance states that the Town Councils position is 'neutral /not Known' when clearly it was very negative. As a consequence it is put forward that the summary chart is not a true reflection for governance. An E mail had in fact been issued by the Town Council to a Powys LDP officer on the 24th February 2014 advising that the 'YTC : no comments' stated on their site status report of December 2013 was incorrect. It is therefore put forward that the Town Councils views on this site have not been properly considered.

Council Response: 0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: The Ynysbydafa site allocation should be omitted from the deposit plan on the grounds that a green wedge should be retained between communities.

Council Response: 0

**Question: 3e. (ii) Allocation No:**

Representation Texts: P58 HA8

Question Representation Texts

**Question: 3d. (i) Representation Details**

Representation Texts: This is a group representation submitted on behalf of three Abercrave Ward Councillors.

This site was 10-15 feet lower than it is now and boggy. Tractors regularly got stuck in it. It has been filled in to present level with hardcore of all types from anywhere!

There are still problems with drainage especially at lower end. This site has always been recognised and preserved as a green belt or wedge between Abercrave and Caerbont.

Where would the Highways access be? Probably off Caer-Lan Road, which is not fit to carry any extra traffic - possibly an extra 40 cars per day!

Any new buildings will not be compatible with the old houses in Caer-lan.

This is grazing land used by the farm - losing 2 acres. Grass & vegetation soaks up rain water and disposes of it naturally. Concrete and tarmac does not, and rainwater will run off and cause flooding elsewhere.

A stream runs through the site and should be preserved as a natural watercourse with its natural habitat, flora & fauna.

This stream rises quickly, causing flooding and should not be diverted or piped in anyway.

There are already problems with sewerage - the system could not take anymore.

Providing a water supply would be difficult.

Council Response:

0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: This site should be removed from the plan. We as ward Councillors recommend the removal of this site from the plan.

*Question*                      *Representation Texts*

---

<b>Question:</b>	<b>Council Response</b>
Representation Texts: This representation is considered to be in support of the Deposit Local Development Plan in that the Representor objects to the candidate site reference 885 and notes that the site is not proposed to be allocated in the LDP. The Site Status Report identifies several issues with the development of the site and also identifies a lack of community support for the development of the site. No changes are therefore required.	
Council Response:	0

---

**Question: 3d. (i)      Representation Details**

---

Representation Texts: We as a Ward, wish to preserve the boundaries, as shown on the map for the area, in that this site (Candidate site 885) is not included in the LDP.	
However if Candidate site-885 should be included at some future date, we would offer these objections:	
The site is full of old mine workings, with no map to show where they are. It is seriously contaminated from these old workings. There is a live badger sett and this must not be disturbed. Over the years, it has become naturalised, with it's own flora and fauna. It should be left undisturbed as a site of natural habitat.	
It is a green belt or 'wedge' separating Caerbont from Penrhos. It provides a natural soakaway for rainwater.Filled with housing, concrete and tarmac, rainwater would find its way on to the road, causing flooding in Caerbont.	
There would be extra traffic on that section of highway- possibly 200 cars. Cars leaving the site would have a dangerous right turn to travel down the hill. Cars attempting to enter the site from Penrhos would have a dangerous right turn into the site.	
Water supply and sewerage systems would be very difficult.	
Council Response:	0

Map: P59: Buttington Brickworks - 2015

Issue: 2015: Deposit Draft-08.Minerals, Waste and Renewable Energy

Question Representation Texts

**Question: Council Response**

Representation Texts: This Representation is noted. However, no changes are considered necessary to ensure the Plan is sound. Safeguarding of minor sandstone formations and sand and gravel deposits with their attendant safeguarding margins is in line with national guidelines for safeguarding potential aggregates.

Buttington Brickworks as an active minerals permission has a permitted working area buffer zone in accordance with policy.

Council Response:

0

**Question: 3d. (i) Representation Details**

Representation Texts: With regards to the Resource Safeguarding Areas that appear on the Buttington Quarry inset map P59 we would like to formally object to the inclusion of these zones on this map on grounds that they are misleading and inaccurate. This issue was first raised with Mr Tom Evans, Minerals Officer in addition to the above and he has confirmed that Flintshire County Councils minerals team, (who are acting on behalf of Powys County Council on minerals matters) had not been consulted or approached with regards to these Resource Safeguarding areas. It is not clear what data had been used to identify these areas but in the case of Buttington Quarry, we, as quarry operators, can comment, with certainty, on the nature of the material that is under the ground in the quarry. Buttington is a Clay/Shale quarry. The first error is that there is a blue/green shaded area to the South East of the Quarry site which is defined in the key as being Sand and Gravel Category 1 Resource Safeguarding Area (DM1). Secondly there is a yellow/brown paved section running south west to north east directly through the quarry void and this is defined in the key as being Sandstone Category 2 Resource Safeguarding Area (DM1). We can categorically say that both of these types of resources are not present in the ground at the location the plan suggests. Indeed as a shale/clay quarry we have excavated nothing from Buttington Quarry other than shale/clay to date.

Council Response:

0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: We would formally request that these two Resources Safeguarding areas are removed from the quarry area of the inset map P59 so that allocation and development of the employment land P59 EA1 is not unduly impeded / delayed by incorrect, misleading information.

Council Response:

0

Question Representation Texts

**Question: 3d. (i) Representation Details**

Representation Texts:

The inset map P59 does not show the area of land on the western side of the trunk road as being allocated for a residential development. This area of land was submitted as having development potential during the Candidate site process (ref 682) and more specifically proposed as residential on the plan with the Additional information submitted in a letter 6th September 2013.

This residential development would be developed alongside the proposed, adjacent employment site, facilitating a sustainable travel to work option for the proposed allocated employment land at Buttington Quarry.

This area of land (filled green on the attached plan, Plan 1) is a Brownfield site. It has been previously formed the Buttington rail siding and has had a number of uses over the past 100 years. Wynstay Farmers had a warehouse on the plot, it has also been used as a livestock depot with pens and brick loading yard complete with weighbridge and has more latterly used for general storage. This brown field site was included in the submission to the Candidate sites process together with the main quarry site (Candidate site ref 682) . We are not aware of any formal rejection of this proposal and strongly believe that there is excellent potential for the use of this land for residential use in connection with the newly allocated, adjacent employment land, the reasons for which are outlined below.

There are a number of proposed points of policy in the proposed LDP document which relate to the siting of a residential development which support our proposal:-

2.4.1-5 (LDP objective 14) The site provides a sustainable travel to work option co-locating employment, housing and public transport routes. It is recognised that a development of this size would normally be allocated in towns and villages but due to the geographical restrictions (flood plain, hills) to large developments in and around Welshpool, the LDP must consider that a growth in employment land (as has increasingly happened the Buttington area) should correlate with an increase in local housing in the Buttington area. These restrictions for development in certain towns are identified in section 3.4.24 which explains how the LDP should seek to allocate such housing allocation to neighbouring settlements. Although Buttington is not a town or large village, its immediate proximity to Welshpool should allow for some residential allocation to be made. Buttington is taking the employment land overspill from Welshpool; it should therefore be both logical and sustainable for it to take a portion of Welshpools residential requirement too.

2.4.1-17 (LDP objective 3) The allocation would utilise a disused brown-field site.

2.4.1-22 (LDP objective 1) Would help to achieve the LDPs target of 5519 new homes during the plan period. Previous house building targets being missed by quite a margin.

2.4.1-30 The nature and location of the development means that the target for the percentage of affordable homes on this development could be met.

2.4.1-32 (LDP objective 14) Would help to encourage a healthy lifestyle by being within proximity of several existing and proposed places of employment providing viable options for walking and cycling to work.

2.4.1-35 The location of this proposed development would provide sustainable and efficient access to the out of county hospital services in Shrewsbury that are acknowledged not to exist in Powys.

2.4.1-37 The development would be located directly on the Shrewsbury to Welshpool bus route providing sustainable transport links. Provision could easily be made for a dedicated off highway, bus stop in both direction providing a much safer method to collect/drop off passengers.

2.4.1-38\* (LDP objective 2) The development would have direct access on a trunk road proving excellent transport links. No further improvements to highway infrastructure in this area are required.

The development should be viewed as infill development as the site is bordered all around by the railway, trunk road and existing residential dwellings. It is acknowledged that development of this type would usually be allocated in towns and villages but as 3.4.5 of the written statement explains, judgment must be used when a proposed development is in close proximity to a town and have good public transport links. Both of which apply to the Buttington site.

The above references to proposed LDP policy provide a sound argument to support the proposed allocation for residential use to be given to the Buttington rail siding land. This would make best use of a piece of Brownfield land that would have no other feasible use.

It is estimated that up to 25 dwellings could be built on this plot providing 2/3 bedroom accommodation and the plot size is estimated to be between 2.5 - 3 acres. It should be

Question Representation Texts

**Question: 3d. (i) Representation Details**

Representation Texts:

As owners of the above candidate site ref no. 682 we are pleased to see that the Buttington Quarry site has been allocated as employment land alongside the existing employment site located at the former brickworks. There are, however, a number of items on the inset map, to which we object, and would like to comment as follows: The red hatched area does not represent the area that was put forward to the Candidates site process. Amendments have been made on a plan which is being submitted with this representation and we therefore request that the enclosed plan (Plan 1) is received as duly made together with this written representation. Following recent consultation with Tanya Dearing of Powys County Council the area has been amended to more accurately reflect the proposed finished restored levels of the quarry. This was also discussed at a meeting on 08/11/13 with Tanya Dearing of the LDP team together with Gary Nancarrow of Flintshire County Council whom Powys are currently employing to deal with mineral matters.

Having also brought this matter to the attention of Mr Tom Evans of Flintshire County Councils minerals department during a site visit in July last year he commented in an email as follows, ..that the northern most part of the quarry void (extension area) had not been included in the allocation, and that in my opinion it would be rational to include it or risk leaving a vacant undeveloped area that could compromise prospective development within the allocation area. Mr Evans raised this point with Tanya Dearing in July 2014. She agreed it would be logical to include the said area and stated that the existing deposit draft plan could be amended to allow its inclusion.

Furthermore an email from Tanya Dearing dated 20/08/14 stated that the Council had 'made a genuine error' relating to the allocated area citing mapping problems and that the Council ...obviously need to map the extent of the quarry that is realistically developable.

The red hatched area shown on the enclosed plan (Plan 1) has been extended in some places (hatched red) and reduced in others (edged black). This keeps the amount of employment land allocated the broadly the same, whilst more accurately reflecting the land that can practically be utilised for development. It also ensures the quarry levels can be engineered/restored in the appropriate manner. This amended area would also allow for the inclusion of an access corridor that would link the allocated area to the permitted new site access point marked X on the attached plan (Plan 1).

The revised red hatched area also more accurately reflects the green line on the plan of the 1997 mineral review for the Buttington site which separated the industrial land from the quarry land. As requested by Tanya Dearing in a recent telephone conversation there is also a stand off from the geological SSSI but we would like to point out that as the rock exposure is a 'geological SSSI', its characteristics and important features would not be impacted in any way by developing the adjacent land.

The site owners would like to point out that the plan submitted in the 2011 Candidate sites submission included all of the quarry land and certainly the extended red hatched area that are proposed on the attached plan. It should also be made clear that from a Civil engineering point of view it would be almost impossible to deliver and develop the existing red hatched area without the extended areas being included as part of the scheme.

Council Response:

0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts:

Inset map P59 should be amended to show the amended area of land (hatched red and shown as P59 EA1) as marked on the enclosed Plan 1, as allocated for employment land in the adopted version of the LDP.

Question	Representation Texts
<b>Question: 3d. (i)</b>	<b>Representation Details</b>
Representation Texts:	<p>Thank you for giving Natural Resources Wales the opportunity to comment on the SEA Environmental Report of the Powys Local Development Plan (LDP) Deposit Draft June 2015. We have the following comments and suggestions which are set out below.</p> <p>Our purpose is to ensure that the natural resources of Wales are sustainably maintains, used and enhanced, now and in the future.</p> <p>Our comments are made in the context of our roles as a consultation body under the Environmental Assessment of Plans and Programmes (Wales) Regulations 2004, and as advisers to Welsh Government on the natural heritage and resources of Wales and its coastal waters.</p> <p>Please note that our comments are without prejudice to any comments we may wish to make when consulted on any subsequent strategy consultations. At the time of any other consultation there may be new information available which we will need to take into account in making a formal response.</p> <p>We welcome and support the efforts made in undertaking this Sustainability Appraisal which describes the key environmental effects anticipated as a result of the implementation of the preferred spatial strategy and policies contained in the Deposit Draft LDP.</p> <p>It is noted that many of our comments presented at the Baseline Scoping Stage, Pre-Deposit draft Environmental Report and Initial Deposit Stage Environmental Report have been taken into consideration.</p> <p>Section 1 - Introduction As noted in 1.1.3 a Habitats Regulation Assessment (HRA) has also been prepared which has been prepared separately. Our comments on the deposit plan and HRA are made under separate cover.</p> <p>Section 3 - Review of Plans, Programmes and Policies We are satisfied that a review of other plans, programmes and policies, consideration of the environmental context of Powys and the identification of a list of environmental issues specific to the County has provided a firm baseline against which the SEA of the LDP has been undertaken. This baseline has also been used to define a set of SEA Objectives that have been used to support the assessment of the key components of the Deposit Draft LDP. Table 3.2 provides a useful summary of the key messages identified during the review.</p> <p>We note that reference is now made to the One Powys Plan 2014 – 2017 and the Dyfi Biosphere as requested in our previous comments.</p> <p>We are also satisfied that reference is now made to the European Sites Management Plans as an indicator of the current status</p>

Mode Oral (Examination)

Status Maintained

## Section 4 – Baseline Context and Environmental Issues

We are satisfied that a satisfactory baseline data context has been identified that has led to the identification of key environmental issues specific to Powys (Table 4.1).

## Section 5 – Methodology Framework

We are satisfied that the methodology including the SEA Objectives used to assess the key components of the Deposit Draft LDP are satisfactory.

It is noted that the SEA methodology has been significantly changed since the Pre-deposit version and provides a more robust, cohesive and coherent framework against which to test the plan.

More specifically it is acknowledged that the alternative spatial options have now been assessed against the SEA objectives which ensures a consistency in methodological approach and also ensures as identified that the preferred strategy remains the most appropriate when considered against reasonable alternatives.

It is acknowledged that alongside the SEA that a Sustainability Appraisal (SA) has also been undertaken which has considered the LDP's integration with sustainability 'capitals' Natural, Social, Human, Infrastructure and Financial and as such there is considerable overlap between these capitals and the SEA Objectives. It is also acknowledged that the findings of the SEA have informed the SA of the Deposit Plan.

With regards to the assumptions identified in 5.6.2, the reference made to the Environment Agency's Flood Zones needs to be amended to Natural Resources Wales.

## Section 6 – Assessment

The SA of the Deposit Plan, includes 18 objectives which provides a framework and structure to evaluate the likely significant effects of the Deposit Plan.

The assessment of the 16 LDP Objectives has been undertaken by assessing their compatibility with the SEA Objectives and are listed in Table 6.1. Broadly, the assessment of the LDP Objectives indicates that a high proportion are compatible with the SEA Objectives. NRW is satisfied that where incompatibilities are identified that other plan policies will ensure compatibility e.g. policies relating to location of development and protection and enhancement of biodiversity.

A high number of uncertainties between the objectives are identified within this table, and we wonder if some of the uncertainties are due to the LDP objective not being 'applicable' to the spatial strategy component. If this is the case and in order to remove some of the uncertainties we advise that a 'non applicable' category should be added to the key. The same applies to Table NTS5 where a lot of uncertainties are identified.

It is also recognised that some of the uncertainties are due to some of the objectives being non-spatial and that locations of some developments that will come forward under some of the policies are unknown.

With regards to the spatial strategy options assessed and detailed in 6.3.2, we have concerns regarding the delivery of the proposed level of land allocated for employment uses and question if the allocation of 49ha of land for employment use is realistic. Please see our comments on the Deposit LDP for further details of our concerns.

Section 6.4 provides details of the Assessment that has been carried out with regards to the draft policies.

With regards to Policy TD3 that relates to Montgomery Canal which is a Special Area of Conservation and Policy M1 that enables extensions to existing mineral sites. NRW agrees that Policy TD3 should be amended to include reference to the need for a Habitats Regulation Assessment to be undertaken to assess the impacts of any development proposal. NRW is also satisfied as identified that Policy DM1 should ensure the protection and enhancement of biodiversity.

Section 6.5 provides an assessment of the site allocations and the detailed assessment is provided in Appendix 3b, 3a and 3c.

With regards to the Assessment of Cumulative Effects, we are satisfied that the assessment has identified that the cumulative effect of the draft policies are either minor negative

or significantly positive.

Section 6.7 provides details of the mitigation that has been identified to prevent, reduce and as far as possible offset any adverse environmental effects that the assessment has found. It is noted that policy DM1 mitigates against any adverse effects against the natural environment including designated sites and habitats, soil and water and landscape associated with all development.

Section 7 – Conclusions, Next Steps and Monitoring

Overall, the assessment has identified that the majority of the SEA Objectives will experience positive effects as a result of the implementation of the Deposit Draft LDP policies.

It is anticipated that the Deposit Draft LDP will be supportive of the delivery of other plans and programmes, particularly where they relate to the protection and enhancement of the environment.

We thank you for consulting with Natural Resources Wales and trust that our advice will be taken into consideration.

Document:SEA Environmental Report (June 2015), p.1

Issue: 2015: Deposit Draft-14.Miscellaneous

Question Representation Texts

**Question: 3d. (i) Representation Details**

Representation Texts: This representation applies to Intensive Farming in Powys.

I am aware of 139 poultry units consented by Powys CC since 1 January 2008. These continue to be consented at an alarming rate – 17 have been consented since 1 January 2014. I understand that many more – possibly hundreds – are planned for this area (Powys and the border counties).

Poultry units are responsible for numerous emissions:

- Poultry dust (including dangerous PM10s and PM2.5s). This is classified by the Health and Safety Executive as a Substance Hazardous to Health. It contains faecal matter, skin, feathers, feed, bedding, proteins, fungal and bacterial species, various endotoxins odour, nitrogen, phosphorous, heavy metals, methane and nitrous oxides (possibly 9 tonnes of dust per year are produced by 80,000 broiler chickens);
- Bioaerosols which contain bacteria, fungi, microbial toxins, allergens and organic dust;
- Dirty wash-out water which needs to be contained within the drainage system;
- Contaminated surface water which needs to be contained within – or treated by – the drainage system;
- Ammonia, with resultant depositions as nitrogen and acid with detrimental impact on Protected Sites; and
- Noise and odour that impact local residents.

1. Environment

The extracts from Topic Papers in the Appendix to this representation advise that emissions and pollution from Intensive Farming are having a significant detrimental impact on Protected Sites in Powys.

The latest advice from NRW in this area is that “the receiving environment may have reached its capacity to absorb the additional pollutants”.

Powys CC is the Competent Authority:

- “Local authorities have a duty to have regard to the conservation of biodiversity in exercising their functions” (NERC)
- “A public authority must seek to maintain and enhance biodiversity in the exercise of functions in relation to Wales” (Environment (Wales) Bill)

As Competent Authority, Powys CC has the responsibility for assessment of pollution and pollution control for poultry units with less than 40,000 birds (the vast majority of applications). NRW has the responsibility for applications over 40,000 birds as these need an industrial permit.

Rep'n/Para/Policy AccessNo DateLodgd Late? Status Modified Summary

6155.V2 20/07/2015  Summary: SEA Report - Intensive Farming in Powys

Source: Email

Type: Comment

Mode Written

Status Maintained

Powys CC relies on the consultee letter from Natural Resources Wales (NRW) which does not consider that it is in a position to effectively refuse a planning application. NRW usually issues a "No Objection" consultee letter followed by serious and significant recommendations.

It is essential that Powys CC takes heed of its responsibilities as Competent Authority for the environment, and

- seriously consider NRW's recommendations without relying on NRW's consultee letter – together with "No Objection" statement - on the assumption that NRW is the Authority;
- makes its own assessments of the effect of these developments both individually and in combination with other developments (in accordance with the Habitats Directive article 6.3 and The Conservation of Habitats and Species Regulations clause 61 (1)).

2. Landscape

The draft LDP documents include several references to the impact of wind turbines on the landscape.

I have not seen any reference to the impact of Intensive Farming units on the landscape, and I suggest that the visual impact of most Intensive Farming units have a more profound impact. A typical 80,000 bird broiler unit would have a footprint of 1.5 acres. These are large rectilinear industrial masses completely out of context with Powys' outstanding rolling hills and natural beauty. Feed bins are usually the dominant feature of these developments.

In addition the "landscaping" schemes that are usually adopted are no more than a row of trees, which themselves can look out of context in Powys' landscape. These trees are usually deciduous meaning that the development is visible in winter. Planning conditions often require that the trees should be in place for at least 5 years which is only enough time for the trees to get established.

3. Human Health

We understand from discussions with NRW and Powys CC that there is no evidence concerning any risk to human health of dust and bioaerosols emitted from poultry units. Dr M Lyons, OBE, National Lead for Health Protection, Public Health Wales advises that "there is considerable uncertainty about the health risks (of bio-aerosols) to local residents". (please ask if you would like a copy of Dr Lyons' letter)

A typical 80,000 bird broiler worker is employed for about 3.8 hours per day, egg-layer workers have longer hours. Poultry unit workers have limited exposure to dust and bioaerosols and access to personal protective equipment. Neighbouring residents are subjected to dust and bioaerosols for 24 hours a day without the use of personal protective equipment.

Powys CC has not adopted Ms Lyons' recommendations for:

- Dust management Plans
- PM10s not to be exceeded at any sensitive receptor
- Odour from manure spreading to be assessed cumulatively with odour from the developments; and
- Noise management plans should always include operational noise (work and vehicles on site) – (this is sometimes included)

Issue: 2015: Deposit Draft-14.Miscellaneous

*Question Representation Texts*

**Question: Council Response**

Representation Texts: These comments are noted. However, no changes are considered necessary to ensure that the Plan is sound. The LDP does not contain a specific policy relating to intensive livestock units. The LPD contains policies which cover amenity, environmental and landscape impacts. 1) It is not within the scope of the LDP to identify the areas for which the LPA are the competent authority or the LPA's responsibilities in respect of specific schemes as regard will be given to any relevant duties in determining specific planning applications. 2) The (DM) policy on landscape seeks to ensure that developments do not unacceptable adversely affect the landscape. It is not considered to be necessary to set out specific requirements in respect of landscaping schemes as the detail of such schemes will depend on the location and characteristics of the individual development. The suggested requirement for trees and bunding to be maintained for the life of the development would, where necessary, form part of a condition, and again this level of detail is not required to be incorporated within the policy. 3) Therefore the LDP does not contain specific guidance on the impacts of intensive livestock units. The impact of developments on the amenity of nearby residents is a material planning consideration. Policy DM10 – Amenities and the supporting text to this policy requires developments to respect the amenity of neighbour uses including air quality issues. The matters raised in this respect are matters to be considered at the planning application stage where appropriate.

Protected Sites; and  
 • Noise and odour that impact local residents.

1. Environment

The extracts from Topic Papers in the Appendix to this representation advise that emissions and pollution from Intensive Farming are having a significant detrimental impact on Protected Sites in Powys.

The latest advice from NRW in this area is that “the receiving environment may have reached its capacity to absorb the additional pollutants”.

Powys CC is the Competent Authority:

- “Local authorities have a duty to have regard to the conservation of biodiversity in exercising their functions” (NERC)
- “A public authority must seek to maintain and enhance biodiversity in the exercise of functions in relation to Wales” (Environment (Wales) Bill)

As Competent Authority, Powys CC has the responsibility for assessment of pollution and pollution control for poultry units with less than 40,000 birds (the vast majority of applications). NRW has the responsibility for applications over 40,000 birds as these need an industrial permit.

Powys CC relies on the consultee letter from Natural Resources Wales (NRW) which does not consider that it is in a position to effectively refuse a planning application. NRW usually issues a “No Objection” consultee letter followed by serious and significant recommendations.

It is essential that Powys CC takes heed of its responsibilities as Competent Authority for the environment, and

- seriously consider NRW’s recommendations without relying on NRW’s consultee letter – together with “No Objection” statement - on the assumption that NRW is the Authority;
- makes its own assessments of the effect of these developments both individually and in combination with other developments (in accordance with the Habitats Directive article 6.3 and The Conservation of Habitats and Species Regulations clause 61 (1)).

2. Landscape

The draft LDP documents include several references to the impact of wind turbines on the landscape.

I have not seen any reference to the impact of Intensive Farming units on the landscape, and I suggest that the visual impact of most Intensive Farming units have a more profound impact. A typical 80,000 bird broiler unit would have a footprint of 1.5 acres. These are large rectilinear industrial masses completely out of context with Powys’ outstanding rolling hills and natural beauty. Feed bins are usually the dominant feature of these developments.

In addition the “landscaping” schemes that are usually adopted are no more than a row of trees, which themselves can look out of context in Powys’ landscape. These trees are usually deciduous meaning that the development is visible in winter. Planning conditions often require that the trees should be in place for at least 5 years which is only enough time for the trees to get established.

3. Human Health

We understand from discussions with NRW and Powys CC that there is no evidence concerning any risk to human health of dust and bioaerosols emitted from poultry units. Dr M Lyons, OBE, National Lead for Health Protection, Public Health Wales advises that "there is considerable uncertainty about the health risks (of bio-aerosols) to local residents". (please ask if you would like a copy of Dr Lyons' letter)

A typical 80,000 bird broiler worker is employed for about 3.8 hours per day, egg-layer workers have longer hours. Poultry unit workers have limited exposure to dust and bioaerosols and access to personal protective equipment. Neighbouring residents are subjected to dust and bioaerosols for 24 hours a day without the use of personal protective equipment.

Powys CC has not adopted Ms Lyons' recommendations for:

- Dust management Plans
- PM10s not to be exceeded at any sensitive receptor
- Odour from manure spreading to be assessed cumulatively with odour from the developments; and
- Noise management plans should always include operational noise (work and vehicles on site) – (this is sometimes included)

Appendix – Extracts from LDP Topic Papers

Topic Paper - Natural Heritage

7.9 Many of the habitats and ecosystems in Powys are sensitive to air pollution, particularly mosses, liverworts and lichens. Some pollutants are generated locally such as ammonia from poultry units and agricultural fertilisers.

8.22 One of the main issues identified is the pollutant ammonia. There is a level of regulatory control of ammonia through the Environmental Permitting Regulations 2010, which through a permitting process, controls emission to air, water and land from industrial sources that also includes from the intensive indoor rearing of poultry. However, a permit is not required for those poultry units which house less than 40,000 birds and this accounts for the majority of this type of application received in Powys.

Topic Paper - Environment – Pollution and Flooding

6.3.8 Emissions from livestock units result in local hotspots of high ammonia concentrations and deposition around installations. It should be noted that this occurs against a background of high nitrogen deposition across the county

6.3.9 The guidance highlights the planning authority's responsibility to consider all impacts and to demonstrate that the development will not have an adverse effect on the site integrity of international and nationally designated sites.

8.3.1 The Water Framework Directive requires all the water bodies (e.g. rivers, streams, lakes and canals) in Powys to have achieved a good status by 2015. The Powys LDP must assist in contributing to reaching and maintaining this target by looking at the issues impacting on the water environment in Powys and seeing if the planning system can do anything to resolve them. This includes looking at the issues highlighted in this topic paper on the impact of intensive farming

by: Representation No

Rep'n/Para/Policy AccessnNo DateLodgd Late? Status Modified Summary

6155.V1 20/07/2015  Summary: Sustainability Appraisal (SA) Report June 2015 - Intensive Farming in Powys

Source: Email Type: Comment Mode: Written Status: Maintained

9.5.2 A large number of the Special Areas of Conservation (SACs) in Powys contain habitats where the background levels of nitrogen deposition exceed what is considered to be safe for that particular habitat. The majority of these emissions (30-50%) result from intensive livestock farming

Topic Paper - Environment – Pollution and Flooding

6.3.14 The APIS website gives a detailed breakdown of the main sources that contribute to the background levels of nitrogen deposition at each site. For each of the SACs "Livestock Emissions" were overwhelmingly the largest pollutant accounting for between 35% and 51% of the total emissions on each site. This is a problem compounded by the growing number of intensive poultry units throughout the county.

Council Response:

0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: Environment  
 It is essential that the Powys LDP conveys the message that Powys CC is the Competent Authority for assessing the impact of intensive farming developments on the environment.  
 • Individually  
 • In-combination; and  
 • in addition to manure land-spreading  
 Landscape

I recommend that the LDP should include a provision for landscaping schemes to  
 • Include a proportion of evergreen trees;  
 • Make greater use of earth bunding;  
 • Require trees and bunding to be maintained for the life of the development; and  
 • Require feed bins to be limited to the height of the building and positioned behind buildings;

Human Health

I recommend that the LDP should require Powys CC to:  
 • Adopt Ms Lyons' recommendations;  
 • Work with national health authorities to establish the risk to human health of intensive farming developments

Issue: 2015: Deposit Draft-01. Preparation, Process and Plan Strategy

*Question Representation Texts*

**Question: 3d. (i) Representation Details**

Representation Texts: We wish to advise amendments to the "Sustainability Appraisal Appendix 4" for Norton as there are material inaccuracies in the assessments made on certain indicators.

Council Response:

0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts:

1. ERROR in assessment of the following indicator: "Is the settlement served by mains water supply and mains drainage (sewerage) with systems which have adequate capacity to serve both existing and proposed development or which are realistically capable of being upgraded to meet the demands of new development?" Assessed as green however sewage treatment works at Norton is at capacity (per Welsh Water advice).
2. ERROR in assessment of the following indicator: "Can settlement growth be accommodated without adversely impacting on areas of special environmental/ecological value (protected habitats, species, wildlife sites etc)?" Assessed as green however the development ecological survey has found presence of EPS.
3. CORRECTION to the assessment that Governance has been assessed as green. Present County Councillor Garry Banks has not supported "growth in the settlement".
4. ERROR to the assessment made for Norton in the following indicator: "Does the settlement have any groups/organisations that support local business and economic opportunities?". This has been marked as green but in fact there are no "groups/organisations that support local business and economic opportunities" in Norton.
5. ERROR in the assessment of the following indicator: "Does the settlement provide job opportunities?" This has been assessed as green but there are no employment opportunities neither are there any employers for such opportunities in the Settlement of Norton village
6. ERROR in the assessment of the following indicator: "Given the factors known about the settlement (including the choice of land put forward as candidate sites), is it considered that the settlement has realistic potential for development and growth? (consider environmental and infrastructure constraints that may impact on site viability and probability, accessibility to services, transport links, planning history, market demand in the local area etc)." This indicator has been incorrectly assessed as Green when in fact the Settlement does not have "realistic potential for development and growth" under all the criteria specified in the indicator.
7. ERROR to the assessment given to the indicator: "Can the settlement grow without adversely affecting protected or sensitive areas of built heritage?". There is insufficient evidence to specify a definite answer but there is evidence of some sensitive heritage buildings in Norton.

*Question Representation Texts*

**Question: Council Response**

Representation Texts: The Council propose to amend the HRA Screening Report to make reference to Council's support for the Nutrient management plan as suggested by the representor. See Focused Changes for details.

Council Response:

0

**Question: 3d. (i) Representation Details**

Representation Texts: With regard to our interests, we are satisfied that the plan is sound and legally compliant. However, we recommend minor modifications to both the Local Development Plan (LDP) and the HRA with regard to the River Wye Special Area of Conservation (SAC). These modifications would confirm Powys Council's commitment to working with partners to achieve the favourable conservation status of the River Wye SAC by 2027, through the catchment-wide Nutrient Management Plan (NMP) process. The NMP is critical to underpinning the HRA's conclusion that the Local Development Plan has no likely significant effects on the River Wye SAC.

The River Wye SAC  
 Habitats Regulations Assessment Screening Report (Document 19)  
 We would refer you back to our previous response (attached). As we previously stated it is our view that in order to reply on the NMP to avoid likely significant effects on the River Wye SAC, the LDP needs to firmly commit Powys Council to the NMP 'process'. Whilst the NMP itself has recently been finalised, further work is required to define the actions which partners will take in order to achieve favourable conservation status by 2027. As these conversations are ongoing, Powys Council needs to be signed up to the NMP 'process' and committed to working with partners and to undertaking any actions which fall to it (by agreement).

We acknowledge that the Powys Council have made some changes to their HRA which have in part addressed part of our concerns. It is our view however that the wording should be changed to commit Powys Council to the NMP process, stating that a "range of partners including Local Planning Authorities and Water Companies who will need to have regard to the plan and the

commitment to deliver its actions" (p65) is not sufficient to ensure protection of the River Wye SAC. Please note that the River Wye SAC NMP Action Plan Version 1 was published November 2014.

TAKEN FROM SEPTEMBER 2014 RESPONSE

Habitats Regulations Assessment Screening Report (Document 19)

At the pre-deposit stage, the HRA Screening report concluded that the Local Development Plan had the potential to have likely significant effects on the following European sites in England:

- Downton Gorge SAC

River Clun SAC

River Dee and Bala Lake SAC

River Wye SAC

Likely significant effects on Downton Gorge SAC, the River Clun SAC and the River Dee and Bala Lake SAC have now been screened out. Natural England is satisfied with this conclusion.

Further screening work has been undertaken with regard to the River Wye SAC. Our comments on this are as follows.

The River Wye SAC

Natural England welcomes the recognition that the River Wye SAC is sensitive to pollution, particularly water quality and nutrient enrichment (HRA Appendix 3 – Site vulnerabilities). We welcome the references to the Nutrient Management Plan for the River Wye SAC within the HRA.

The HRA states that "The River Wye Nutrient Management Plan addresses the in combination impacts of the LDP, surrounding development plans and existing discharge and abstraction along the river" (p45). It goes on to advise that the focus of additional HRA work should therefore be on other impacts, e.g. habitat loss, loss of connectivity and disturbance.

It is Natural England's view that in order to rely on the NMP to avoid likely significant effects on the River Wye SAC, the LDP needs to firmly commit Powys Council to the NMP 'process'. Whilst the NMP itself has recently been finalised, further work is required to define the actions which partners will take in order to achieve favourable conservation status by 2027. As these conversations are ongoing, Powys Council needs to be signed up to the NMP 'process' and committed to working with partners and to undertaking any actions which fall to it (by agreement). Stating this commitment within the LDP supports the HRA's conclusion that the LDP does not result in likely significant effects on the River Wye SAC.

We recommend a minor modification to the supporting text for policy DM1 – Strategic Planning Matters; this policy includes a requirement that all proposals do not compromise, or unacceptably adversely affect the natural environment, integrity or conservation objectives of European sites (9.i) (© 16.26). We recommend amending the supporting text to include reference to the NMP and Powys Council's commitment to this process and any resulting actions which should fall to the council.

We also recommend amending the HRA to explain that the NMP 'process' is ongoing and confirm Powys' commitment to this. We suggest incorporating this into the paragraphs which already refer to the NMP (pages 42 & 45).

It is our view that the changes which we have recommended would make it clear that Powys are cooperating fully with the NMP process, and that this would underpin the HRA's conclusion that there are no likely significant effects on the River Wye SAC as a result of the Local Development Plan.

Question Representation Texts

**Question: 3d. (i) Representation Details**

- Representation Texts:
1. @38.1 Section 3.4: We consider it would be clearer if the Habitats Regulations Assessment (HRA) listed the total number of European sites within the boundaries of Powys irrespective of whether they are wholly or partially within Powys.
  2. @38.1: You should consult Natural England on the Habitats Regulations Assessment of the Powys LDP for their advice with regard to European sites in England which are likely to be effected by the plan.
  3. @38.1: Table 4: There are some minor errors in this table in the designations assigned to sites. Cors Fochno is also a SAC as well as a Ramsar. The River Tywi SAC is not within Powys.
  4. It is not clear what the HRA is referring to when it discusses 'lower tier plans'? If this refers to plans such as supplementary planning guidance and development briefs, that should be stated or defined somewhere in the HRA.
  5. @38.1 Section 3.14: The Newtown Bypass is included as a local project to be considered in the in-combination assessment. Other major infrastructure projects in Powys which are in the planning system or registered on the Planning Inspectorate website as Nationally Significant Infrastructure Projects should also be included in the in-combination assessment. Some of these projects are mentioned later in the HRA in the site specific assessments.
  6. @38.1 Granllyn: NRW do not agree with the conclusion regarding Granllyn SAC. Based on the information currently available to us, we do not agree that the two sites (P20 HC1 – land at Sarn Meadows and P20 HA1) are of low value for great crested newts. Providing mitigation for these sites may be more complex than has been set out in the HRA. We therefore consider that there should be further consideration of whether these allocations could be adequately mitigated before they are included as allocations in the Plan. We would welcome further discussion with PCC regarding this matter as soon as possible. We note that one of the allocations has an extant planning permission. It is unclear if this is for the entirety of the site and whether a HRA was completed for this permission. Further clarification is required, particularly in respect of any mitigation that was considered as part of the HRA.
  7. For Sarn Meadows, project level HRA screening is required for Granllyn SAC & Montgomery Canal SAC (hydrological connections) and Tanat and Vyrnwy Bat sites SAC. Any further / fresh planning application at this site should provide a FCA informed by the latest flood modelling. For site Ref HC1 Land adj Celyn Lane, where the issues are Highways Improvement/local link road and closure of existing junction, development must avoid flood risk areas and Project level HRA screening is required for Granllyn SAC & Montgomery Canal SAC (hydrological connections) and Tanat and Vyrnwy Bat sites SAC. The proximity of Granllyn SAC means there are sensitive ecological issues and liaison with NRW is required at pre-application stage; a European Protected Species Licence may be required. The site is approximately 650m away from the Granllyn SAC and 750m from the nearest breeding pond within the SAC. Great crested newts may be present on site therefore any development proposals concerning the site would require appropriate surveys to be undertaken in line with National Guidelines and mitigation measures to be identified and submitted in support of any application made for the site. This revised draft provides further consideration of potential implications of the proposals since the previous draft LDP, and issues raised by NRW have been considered. However there are a number of extant issues that still require further consideration. These include: (i) Effective consideration of issues concerning the long term provision of 'species' compensation areas including location, extent, and tenure. Failure to effectively consider these issues may mean that target ecological functionality cannot be achieved in the long term; (ii) Measures to address incidental capture/killing; ie ensuring the scope and implementation of new developments does not include the installation of roadside gullypots. Instead , the utilization of sustainable urban drainage schemes needs to be effectively considered including land take required for installing functional systems; (iii) Whether increased size of the [human] population of Guilsfield increases the likelihood of 'indirect' impacts affecting the SAC including disturbance, (illegal) introduction of fish, colonization of invasive non-native species such as Crassula helmsii. Further impacts could potentially arise if footpath networks need to be upgraded as a consequence of increased usage within the site [the above assessment refers to 80 new

Mode Oral (Examination)

Status Maintained

dwelling]. Consideration should be given to the future likelihood of footpaths networks requiring upgrades owing to increased usage. This could result in the potential loss of habitat. We welcome comments and design concepts concerning the provision of green corridors through development areas. We therefore advise that compensation areas incorporates features that will function for new migration and dispersal (as opposed to the provision of linear features through developments).

8. @38.1 River Wye SAC: NRW consider that the in combination effects of development in Herefordshire and Powys needs greater consideration in the LDP, particularly in terms of water abstraction. Herefordshire County Council produced a deposit draft Local Plan in spring 2014 and NRW sent a consultation response to the Council on the HRA element in July 2014. The HRA raised issues relating to water quality and quantity in relation to three particular allocations (Ross on Wye, Leominster and Hereford itself). The Herefordshire Local Plan identified the potential for significant adverse effects on the SAC. It included consideration of Powys's LDP in the cumulative/in combination effects study, but the mitigation for this derived from the River Wye Nutrient Management Plan, and this document does not specifically include the River Wye in Powys. As the Wye Nutrient Management plan is mainly assessed for the England catchment (only the River Lugg in Wales) the extent to which it can be used as evidence / mitigation for the Wye SAC HRA is limited. NRW's response (dated 3rd July 2014) to the Herefordshire Local Plan HRA contained the following and these comments still apply:

"Whilst we welcome the efforts made by Herefordshire to address these {water pollution} issues, notably in the development of the Wye SAC Nutrient Management Plan and in seeking external expertise on the matter, we do retain some concerns regarding the effect of proposed development on the water quality in the Wye SAC. This will require continued dialogue around the development of the NMP Action Plan and we reiterate our request that NRW continue to be included in discussions on nutrient management in the Wye SAC."

(Text contained in Annex 2 to NRW letter).

Document:HRA Screening Report LDP Deposit June 2015, p.1

Issue: 2015: Deposit Draft-09.Development Management and Environment

*Question* *Representation Texts*

**Question: Council Response**

Representation Texts: These comments are noted. However, no changes are considered necessary to ensure that the Plan is sound as the HRA process already includes assessment of development proposals across the County boundary. There is a similar expectation for project level assessments.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: HRA SCREENING REPORT  
 Glandwr Cymru - the Canal & River Trust in Wales agrees with the conclusion of the Habitats Regulations Assessment (HRA) Screening report that the restoration of the Montgomery Canal, if undertaken in accordance with the Conservation Management Strategy, will conserve and enhance the natural and built environment and will therefore not have any adverse impact on the Montgomery Canal Special Area of Conservation (SAC). In order to fully comply with test of soundness CE1, the HRA should consider the need to assess the impacts of the LDP on the Montgomery Canal SAC in combination with development proposals affecting the canal in Shropshire as well as within Powys. This may need to include an assessment of the local plan policies in Shropshire. The project-level HRAs and appropriate assessments relating to individual site allocations should take into account all potential impacts on the Montgomery Canal SAC. Potential impacts include changes to the water quality as a result of surface water entering the canal both during and following construction, changes in shading of the waterway as a result of built development or landscape planting, and increased use of the waterway and towpath as a result of new development and the ongoing restoration.

Council Response: 0

6155.V3 20/07/2015  Summary: HRA Report - Intensive Farming in Powys

Source: Email Type: Comment Mode Written Status Maintained

Document:HRA Screening Report LDP Deposit June 2015, p.1

Issue: 2015: Deposit Draft-14.Miscellaneous

Question Representation Texts

**Question: Council Response**

Representation Texts: These comments are noted. However, no changes are considered necessary to ensure that the Plan is sound. The LDP does not contain a specific policy relating to intensive livestock units. The LPD contains policies which cover amenity, environmental and landscape impacts. 1) It is not within the scope of the LDP to identify the areas for which the LPA are the competent authority or the LPA's responsibilities in respect of specific schemes as regard will be given to any relevant duties in determining specific planning applications. 2) The (DM) policy on landscape requires developments to protect/conserves/enhance the landscape. It is not considered to be necessary to set out specific requirements in respect of landscaping schemes as the detail of such schemes will depend on the location and characteristics of the individual development. The suggested requirement for trees and bunding to be maintained for the life of the development would, where necessary, form part of a condition, and again this level of detail is not required to be incorporated within the policy. 3) Therefore the LDP does not contain specific guidance on the impacts of intensive livestock units. The impact of developments on the amenity of nearby residents is a material planning consideration. Policy DM10 – Amenities and the supporting text to this policy requires developments to respect the amenity of neighbour uses including air quality issues. The matters raised in this respect are matters to be considered at the planning application stage where appropriate.

Council Response:

0

**Question: 3d. (i) Representation Details**

Representation Texts: This representation applies to Intensive Farming in Powys.

I am aware of 139 poultry units consented by Powys CC since 1 January 2008. These continue to be consented at an alarming rate – 17 have been consented since 1 January 2014. I understand that many more – possibly hundreds – are planned for this area (Powys and the border counties).

Poultry units are responsible for numerous emissions:

- Poultry dust (including dangerous PM10s and PM2.5s). This is classified by the Health and Safety Executive as a Substance Hazardous to Health. It contains faecal matter, skin, feathers, feed, bedding, proteins, fungal and bacterial species, various endotoxins odour, nitrogen, phosphorous, heavy metals, methane and nitrous oxides (possibly 9 tonnes of dust per year are produced by 80,000 broiler chickens);
- Bioaerosols which contain bacteria, fungi, microbial toxins, allergens and organic dust;
- Dirty wash-out water which needs to be contained within the drainage system;
- Contaminated surface water which needs to be contained within – or treated by – the drainage system;
- Ammonia, with resultant depositions as nitrogen and acid with detrimental impact on Protected Sites; and
- Noise and odour that impact local residents.

1. Environment

by: Representation No

Filtered to show: (all of) Stage=V; Status=M

Rep'n/Para/Policy	AccessnNo	DateLodgd	Late?	Status	Modified	Summary
6155.V3		20/07/2015	<input type="checkbox"/>			Summary: HRA Report - Intensive Farming in Powys
Source: Email		Type: Comment		Mode	Written	Status Maintained

The extracts from Topic Papers in the Appendix to this representation advise that emissions and pollution from Intensive Farming are having a significant detrimental impact on Protected Sites in Powys.

The latest advice from NRW in this area is that "the receiving environment may have reached its capacity to absorb the additional pollutants".

Powys CC is the Competent Authority:

- "Local authorities have a duty to have regard to the conservation of biodiversity in exercising their functions" (NERC)
- "A public authority must seek to maintain and enhance biodiversity in the exercise of functions in relation to Wales" (Environment (Wales) Bill)

As Competent Authority, Powys CC has the responsibility for assessment of pollution and pollution control for poultry units with less than 40,000 birds (the vast majority of applications). NRW has the responsibility for applications over 40,000 birds as these need an industrial permit.

Powys CC relies on the consultee letter from Natural Resources Wales (NRW) which does not consider that it is in a position to effectively refuse a planning application. NRW usually issues a "No Objection" consultee letter followed by serious and significant recommendations.

It is essential that Powys CC takes heed of its responsibilities as Competent Authority for the environment, and

- seriously consider NRW's recommendations without relying on NRW's consultee letter – together with "No Objection" statement - on the assumption that NRW is the Authority;
- makes its own assessments of the effect of these developments both individually and in combination with other developments (in accordance with the Habitats Directive article 6.3 and The Conservation of Habitats and Species Regulations clause 61 (1)).

### 2. Landscape

The draft LDP documents include several references to the impact of wind turbines on the landscape.

I have not seen any reference to the impact of Intensive Farming units on the landscape, and I suggest that the visual impact of most Intensive Farming units have a more profound impact. A typical 80,000 bird broiler unit would have a footprint of 1.5 acres. These are large rectilinear industrial masses completely out of context with Powys' outstanding rolling hills and natural beauty. Feed bins are usually the dominant feature of these developments.

In addition the "landscaping" schemes that are usually adopted are no more than a row of trees, which themselves can look out of context in Powys' landscape. These trees are usually deciduous meaning that the development is visible in winter. Planning conditions often require that the trees should be in place for at least 5 years which is only enough time for the trees to get established.

### 3. Human Health

We understand from discussions with NRW and Powys CC that there is no evidence concerning any risk to human health of dust and bioaerosols emitted from poultry units.

Dr M Lyons, OBE, National Lead for Health Protection, Public Health Wales advises that "there

by: Representation No

Filtered to show: (all of) Stage=V; Status=M

Rep'n/Para/Policy	AccessnNo	DateLodgd	Late?	Status	Modified	Summary
6155.V3		20/07/2015	<input type="checkbox"/>			Summary: HRA Report - Intensive Farming in Powys
Source: Email		Type: Comment		Mode	Written	Status Maintained

is considerable uncertainty about the health risks (of bio-aerosols) to local residents". (please ask if you would like a copy of Dr Lyons' letter)

A typical 80,000 bird broiler worker is employed for about 3.8 hours per day, egg-layer workers have longer hours. Poultry unit workers have limited exposure to dust and bioaerosols and access to personal protective equipment. Neighbouring residents are subjected to dust and bioaerosols for 24 hours a day without the use of personal protective equipment.

Powys CC has not adopted Ms Lyons' recommendations for:

- Dust management Plans
- PM10s not to be exceeded at any sensitive receptor
- Odour from manure spreading to be assessed cumulatively with odour from the developments; and
- Noise management plans should always include operational noise (work and vehicles on site) – (this is sometimes included)

Appendix – Extracts from LDP Topic Papers

Topic Paper - Natural Heritage

7.9 Many of the habitats and ecosystems in Powys are sensitive to air pollution, particularly mosses, liverworts and lichens. Some pollutants are generated locally such as ammonia from poultry units and agricultural fertilisers.

8.22 One of the main issues identified is the pollutant ammonia. There is a level of regulatory control of ammonia through the Environmental Permitting Regulations 2010, which through a permitting process, controls emission to air, water and land from industrial sources that also includes from the intensive indoor rearing of poultry. However, a permit is not required for those poultry units which house less than 40,000 birds and this accounts for the majority of this type of application received in Powys.

Topic Paper - Environment – Pollution and Flooding

6.3.8 Emissions from livestock units result in local hotspots of high ammonia concentrations and deposition around installations. It should be noted that this occurs against a background of high nitrogen deposition across the county

6.3.9 The guidance highlights the planning authority's responsibility to consider all impacts and to demonstrate that the development will not have an adverse effect on the site integrity of international and nationally designated sites.

8.3.1 The Water Framework Directive requires all the water bodies (e.g. rivers, streams, lakes and canals) in Powys to have achieved a good status by 2015. The Powys LDP must assist in contributing to reaching and maintaining this target by looking at the issues impacting on the water environment in Powys and seeing if the planning system can do anything to resolve them. This includes looking at the issues highlighted in this topic paper on the impact of intensive farming

9.5.2 A large number of the Special Areas of Conservation (SACs) in Powys contain habitats where the background levels of nitrogen deposition exceed what is considered to be safe for that particular habitat. The majority of these emissions (30-50%) result from intensive livestock farming

**Appendix 1 - Deposit LDP Reps & Responses by Refpoint, Cabinet 15-12-15**

Filtered to show: (all of) Stage=V; Status=M

<i>Rep'n/Para/Policy</i>	<i>AccessnNo</i>	<i>DateLodgd</i>	<i>Late?</i>	<i>Status</i>	<i>Modified</i>	<i>Summary</i>
6155.V3		20/07/2015	<input type="checkbox"/>			Summary: HRA Report - Intensive Farming in Powys

Source: Email	Type: Comment	Mode: Written	Status: Maintained
---------------	---------------	---------------	--------------------

Topic Paper - Environment – Pollution and Flooding  
 6.3.14 The APIS website gives a detailed breakdown of the main sources that contribute to the background levels of nitrogen deposition at each site. For each of the SACs “Livestock Emissions” were overwhelmingly the largest pollutant accounting for between 35% and 51% of the total emissions on each site. This is a problem compounded by the growing number of intensive poultry units throughout the county.

Council Response:

0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: Environment  
 It is essential that the Powys LDP conveys the message that Powys CC is the Competent Authority for assessing the impact of intensive farming developments on the environment.

- Individually
- In-combination; and
- in addition to manure land-spreading

Landscape

I recommend that the LDP should include a provision for landscaping schemes to

- Include a proportion of evergreen trees;
- Make greater use of earth bunding;
- Require trees and bunding to be maintained for the life of the development; and
- Require feed bins to be limited to the height of the building and positioned behind buildings;

Human Health  
 I recommend that the LDP should require Powys CC to:

- Adopt Ms Lyons’ recommendations;
- Work with national health authorities to establish the risk to human health of intensive farming developments

Document:HRA Screening Report LDP Deposit June 2015, p.1

Issue: 2015: Deposit Draft-14.Miscellaneous

*Question Representation Texts*

**Question: 3d. (i) Representation Details**

Representation Texts: 1. Drafting problems

There is conflict between the footnote on p4 which says any impact is significant and Screening Category Table 5: Categories B1 and B2 which categorise 'Could have an effect but... ' under 'No significant Effect'.

There is no essential difference between Screening Categories B1 and B2.

p56 Tanat and Vyrnwy Bat sites, refers to 2 un-named species of bat: these should be named.

Appx. 4 Qualifying Species Migration contains no explanation of what is a 'qualifying species', nor is this explained in the main HRA Report. Our concern is that this short list could result in limiting planning assessment of 'qualifying EPS' when considering applications with impacts on European Protected Habitats.

2. Problems with Analysis & Conclusions

p.18. Table 6. This is not a convincing exercise as every assessment is a "protection" or "low-tier" result and the stock 'Rationale' for these results is from a formulaic list of bland generalisations. LDP Objectives are aspirations in which all is 'vibrant' and 'sustainable'. They do not have to confront the realities of conflicts of interest and adverse environmental impacts of encouraging economic growth and energy projects.

p37. In-combination assessment of wind farms fails to consider hydrological implications of construction of both wind farms and access arrangements.

p.39. 'Neighbouring development plans could impact on water quality of the Wye SAC'. The word 'neighbouring' does not do justice to the risk which also comes from development in the catchment, encouraged by LDP Objectives 5 & 6 and supported in LDP policies. The acknowledgement that there is a risk is contradicted by the following statement that there will be no likely significant effect of the combined LDP and plans and projects.

p39. Mid Wales Electricity Connection Project. Although in-combination effects cannot be fully assessed at this stage, it is disingenuous not to outline some of the adverse impacts which are highly likely or inevitable and for which mitigation is not possible. If there is a firm intention to develop this project, it is wrong to conclude, on p39 that there will be no likely significant effect of the in-combination LDP and plans and projects.

pp37 - 39. CRPW welcomes the inclusion of the various key issues on these pages, particularly since many of these are not mentioned in the LDP. However, merely summarising the key issues for assessment of in-combination impacts of LDP Objectives and Policies together with Projects and Plans does not make all the negative impacts disappear by magic. The existence of these acknowledged risks is at odds with the uniformly optimistic results of Table 6 and final conclusion of the HRA.

p.73 River Wye SAC Conclusion says there is sufficient mitigation in the LDP to 'show that the LDP does not have the potential to impact on the River Wye SAC'. The LDP has not mentioned the impacts of planning approval for intensive farming development, particularly of live-stock farming (mainly poultry and cattle) in the catchment of

Source: Email Type: Objection Mode Written Status Maintained

the Wye (includes Lugg and Ifon) and has not provided any specific avoidance or mitigation measures for this. Therefore 'sufficient mitigation' has not been provided.

We do not think there is either an evidence base or a coherent argument justifying the conclusion that 'there will be no likely significant effect of the LDP and plans and projects on European Protected Habitats.'

We are sympathetic because we also consider that PCC has been set an unrealistic task of either proving the impossible or committing to numerous Appropriate Assessments under the Habitat Regulations. The connectivity of our environment is such that Policies, Projects and Plans cannot completely guarantee protection of any designated habitats. Development will have many adverse impacts.

The extent to which these impacts can be avoided for EPHs, will depend on existing LDP policy, flexible evolution of policies, SPGs and – above all - the extent to which NRW advice and Planning Officer's assessments have proper regard to the full implications of developments for EPHs when making individual planning decisions.

Council Response:

0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: Delete either Screening Category B1 or B2

p56 specify which species of bats at Tanat Vyrnwy Bat sites

Add definition of 'qualifying species' in HRA and Appx 4

Add impact of development in river catchments

p39 insert 'and development in the Wye catchment ' after 'Neighbouring development plans' to read 'Neighbouring development plans and development in the Wye catchment .....

Reconsider the need for an Appropriate Assessment for the River Wye in view of the possible impact of unrestricted intensive livestock units in the catchment (cross-border issue)

pp37-39 ensure that all negative impacts identified are mentioned in the LDP as factors to consider when applying policy to development. For instance the risk to migrating and foraging bats, raptors, night flying birds and hirundines from blade-strike kill due to proliferation of wind turbines is not specifically mentioned in the LDP.

Council Response:

0

**Question: 4b Reason For Request To Speak At Hearing And Subject**

Representation Texts: See representation above

See also Point 5 from Rep V1:

5. All the documents are signed in my name (Peter Seaman) however this has been a collaborative work, with members grouping in different ways to concentrate on the topics and references covered in our responses. Therefore we request that any one of the authors above be granted the right to speak at an Inspector's examination of the LDP, according to the topic of discussion.

# **SCHEDULE OF FOCUSSED CHANGES**

(Document **number x**)

**An Addendum  
to the  
Powys Local Development Plan,  
Deposit Draft  
2011 – 2026**

**January 2016**

## Contents

### To do –

1. insert changes from Deposit Plan appendices,
2. insert map changes – need maps + description
3. Make sure each has an FC number

		<b>Page</b>
<b>1.0</b>	Introduction	
	What is a Focussed Change	
	How to Comment	
	Explanation of Focussed Changes	
<b>2.0</b>	Proposed Focussed Changes	
Appendix 1	Minor Editing Changes	

## **1.0 Introduction**

1.1 The Powys Deposit Local Development Plan (LDP) was made available for public consultation from 8<sup>th</sup> June to 20<sup>th</sup> July 2015. Following consultation, the Council received a total of 884 representations/comments from 254 different individuals or organisations. The representations related to the written statement of the LDP, the proposals and inset maps and a small number to the informing assessments. Having considered these representations, the Council has decided that a small number of Focussed Changes should be proposed to the LDP

### **1.2 What is a Focussed Change?**

1.3 Having considered the representations made on the Deposit Plan, it is considered that some changes to the Plan would address some of the matters and issues raised by representors. These proposed changes are referred to as Focussed Changes, and have been published in this document for public consultation. It should be noted that the Council has also responded to every representation which provides comment, support or objection to the Deposit LDP. These responses are presented as part of the LDP Consultation Report, which will be submitted as part of the documentation required for Examination.

1.4 Advice on Focussed Changes is provided by Welsh Government's LDP Manual, 2015. The Manual advises that changes to the LDP after deposit should be avoided wherever possible, but exceptionally it may prove necessary to consider proposing changes to ensure the plan is sound, for example where there has been a sudden, major change in local circumstances, new national planning policy has been introduced or deposit plan representations identify an unforeseen soundness issue. Further, it advises that this should be one set of an extremely limited number of focussed changes that reflect key pieces of evidence but do not go to the heart of the plan. It advises that consultation on these proposed changes should take place at the earliest opportunity to avoid delaying the examination process. It advises that immediately preceding submission of its LDP for examination, the LPA should commence advertising through public consultation (6 week period) an addendum to the deposit plan. This addendum should set out the focussed changes it wishes to be made, showing the new / revised policies and text, and supported by reasoning and robust evidence for the changes. It is clear that representations may only be made on the Focussed Changes.

1.5 The purpose of the consultation is to enable:

- The general public and interested parties to submit comments to the proposed Focussed Changes; and
- The Planning Inspector appointed to conduct the Examination of the LDP to be confident that everyone affected has had the opportunity to comment before he/she makes any recommended change to the LDP.

1.6 The Focussed Changes have been informed by the following supporting assessments:

- Strategic Environmental Assessment (Environmental Report)

- Sustainability Appraisal
- Habitats Regulatory Assessment.

## 1.7 How to Comment

**Important: Please read before making comments on this consultation document.**

1.8 When making a comment or representation, it is important you tell us which part of the document you are commenting on. Please ensure that you quote the relevant Focussed Change (FC) number, and relevant site reference number if applicable. **It is important to note that comments made at this stage can only address and relate to the proposed Focussed Changes.** This consultation is not an opportunity to add to previous representations or to make new comments on parts of the original Deposit LDP not subject to change.

### 1.9 The Deadline for Comments: 4.30pm, Monday 7<sup>th</sup> March 2016 tbc.

Comments received after the deadline will not be accepted. Comments received during the consultation period will be collated and forwarded to the Planning Inspector appointed to conduct an Examination into the soundness of the Plan.

**Making comments in writing or by e-mail:** Please complete and return the standard comments form which can be downloaded from the Council's LDP webpages. This can be returned via email or by post.

It should be noted that comments received cannot be treated as confidential. All comments will be made available for public inspection and placed on the Council's website.

## 1.10 Explanation of Focussed Changes

1.11 Section 2 of this report presents the proposed Focussed Changes in page order of the Deposit Local Development Plan. The Focussed Changes have been shown in the following two ways:

- New text: Where there is new text to be included this is shown **highlighted as green**.
- Deleted text: Where there has been a change to the wording of a paragraph or policy, a deletion is shown by a **strike-through**.
- Any changes to Proposals / Inset Maps are specifically marked.

1.12 For each Focussed Change, the document sets out the following:

- **Focussed Change(FC) Reference:** a unique reference number for the Focussed Change;
- **Section:** a reference to the Policy, Paragraph or Section of the Deposit Plan where the proposed change is to occur;
- **Proposed Focussed Change:** detailing the change that is to occur, and

- **Reason:** providing a reasoned justification for the proposed change and identifying which representation(s) or new evidence the change addresses.

1.13 In addition to the Focussed Changes, a number of minor editing changes have been included as an appendix to this document. These are included for information purposes only, not for consultation.

#### 1.14 **What happens next?**

1.15 The Deposit LDP and supporting documents, along with all comments received during the Deposit and Focussed Changes consultation periods will be submitted to the Welsh Government and an independent Planning Inspector will be appointed to carry out an Examination of the Plan in public during 2016.

## 2. Proposed Focussed Changes

<b>Focussed Change: FC1</b>	<b>Section: Front Cover of Plan</b>
<b>Reason</b> - To comply with the LDP (Wales) Amendment Regulations, 2015	

Insert Plan start and end dates on the cover of Plan: **1/4/2011 to 31/3/2026**

<b>Focussed Change: FC2</b>	<b>Section: Executive Summary</b>
<b>Reason:</b> Consequential changes reflecting additional evidence and focussed changes proposed elsewhere in the LDP.	

Amend fourth paragraph with updated figures:

Based on evidence of future need identified, the LDP provides, over its 15 year plan period 2011-2026, sufficient land through its policies and proposals to meet the dwelling requirement **of 5,519 dwellings**, including **1,044 affordable homes**. It also provides **49 45 hectares** of employment land and includes policies to meet the needs of the economy.

<b>Focussed Change: FC3</b>	<b>Section: Executive Summary</b>
<b>Reason:</b> To ensure the LDP addresses matters raised by LDP representations (27.V5) (27.V24) (6235.V2), in order to reflect a more holistic approach to the protection of the historic environment and to ensure the LDP meets the soundness tests.	

Amend terminology in the final paragraph as follows:

Powys' natural and **built heritage** **historic environment** has determined its character and distinctiveness and the LDP supports the protection of these interests.

<b>Focussed Change: FC4</b>	<b>Section: Paragraph 2.2.4</b>
<b>Reason:</b> To ensure the LDP addresses matters raised by LDP representation (6235.V2), to reflect the historic environment of Powys beyond that of built heritage designations, and to ensure the LDP meets the soundness tests.	

Amend terminology in the final sentence of paragraph 2.2.4 as follows

2.2.4 The architecture of Powys is as varied as its landscape, with most towns and settlements having distinct characteristics in building forms or settlement patterns that make them easily recognisable. The rich wealth of architectural history ranges

through all periods and all building types. The quality of the historic environment and architecture is reflected in the large number of **historic and** built heritage designations within Powys.

<b>Focussed Change: FC5</b>	<b>Section: Paragraph 2.2.8a</b>
<b>Reason:</b> To ensure the LDP addresses matters raised by LDP representations (1084.V12 and others) relating to Welsh language.	

Insert new paragraph 2.2.8a after paragraph 2.2.8 as follows

**2.2.8.a** Welsh Language and Culture are important planning considerations in Powys. Levels of Welsh language use vary across the county with higher usage found in the north-west and south-west. These Welsh Speaking strongholds have shown the most significant decreases in the number of Welsh speakers in recent decades.

<b>Focussed Change: FC6</b>	<b>Section: Vision, Paragraph 3.2.1</b>
<b>Reason:</b> To ensure the LDP addresses matters raised by LDP representations 3822.V1, 4349.V1 and 6235.V1 (to reflect the importance of the Powys landscape as a topic in its own right), in order to ensure the LDP meets the soundness tests.	

Insert additional words in the Vision as follows:

### **Our Vision of Powys 2026**

**Powys is a county of considerable variety extending from the South Wales Valleys to the Berwyn Mountains in the north, and from the Cambrian Mountains in the west to the English border in the east.**

**As the ‘green heart of Wales’, Powys will be a place of vibrant and resilient communities providing sustainable development and economic opportunities set in a healthy, safe environment, whilst celebrating, protecting, enhancing and sustainably managing its natural resources, native wildlife and habitats, heritage, **outstanding landscapes** and distinctive characteristics.**

**Powys’ towns and larger villages will be vibrant and accessible service centres. They will be the focus for integrating housing, economic and service development to meet their own needs and those of their surrounding communities.**

**Powys’ rural areas will be a working countryside of sustainable communities supported by a thriving and diverse rural economy of small businesses.**

<b>Focussed Change: FC7</b>	<b>Section: LDP Objective 1</b>
<b>Reason:</b> Consequential change to reflect amended dwellings requirement, dwelling	

provision, and employment land provision.

Amend LDP Objective 1 as follows:

### Planning for Growth in Sustainable Places

#### LDP Objective 1 – Meeting Future Needs

To meet the needs arising in Powys over the plan period up to 2026, to provide adequate, appropriately located land for:

- i. 6,071 dwellings to deliver a dwelling requirement of 5,519 which will meet all the housing needs of Powys' increasing and ageing population and its decreasing size of households, including open market and affordable housing, gypsy and traveller accommodation and other specialist housing needs.
- ii. 49.45 hectares of employment and economic development uses.
- iii. Retail, tourism, recreation, infrastructure, services and other needs.

<b>Focussed Change: FC8</b>	<b>Section: LDP Objective 5</b>
<b>Reason:</b> To remove confusion in the wording and clarify how Policy RE1 relates to the Objective more clearly by responding to Representations 6322.V1, 6323.V1.	

Amend LDP Objective 5 as follows:

#### LDP Objective 5 – Energy and Water

To support the conservation of energy and water and to generate energy from appropriately located renewable resources ~~to enable households, businesses and communities to meet their needs~~ where acceptable in terms of the economic, social, environmental and cumulative impacts.

In particular, to:

- i. Contribute to the achievement of the Water Framework Directive targets in Powys.
- ii. Provide an additional ~~50,000kW~~ 50MW installed capacity of renewable electricity generating technology (outside the Strategic Search Areas), ~~30,000kW~~ 30MW renewable biomass and ~~16,000kW~~ 16MW building integrated heat generating technology.

<b>Focussed Change: FC9</b>	<b>Section: LDP Objective 13</b>
<b>Reason:</b> To ensure the LDP addresses matters raised by LDP representations 27.V5, 27.V24, 4349.V2, 6235.V2, 6235.V7 in order to reflect a more holistic approach to the protection of the landscape and historic environment, whilst recognising landscape as a topic in its own right, and to ensure the LDP meets the soundness tests.	

Amend LDP Objective 13 as follows:

#### LDP Objective 13 – ~~The~~ Landscape and the Historic Environment

To protect, preserve and/or enhance the distinctive built heritage, landscape and cultural assets of Powys and adjoining areas, including its architectural and archaeological heritage and protected landscapes. In particular to facilitate the reduction of listed buildings at risk.

**i. Landscape**

To protect, preserve and/or enhance the distinctive landscapes of Powys and adjoining areas, including protected landscapes.

**ii. The Historic Environment**

To protect, preserve and/or enhance the distinctive historic environment, heritage and cultural assets of Powys and adjoining areas, and to facilitate the reduction of the number of listed buildings at risk.

<b>Focussed Change: FC10</b>	<b>Section: Employment Land Growth, Paragraphs 3.3.1 – 3.3.8</b>
<p><b>Reason:</b> Consequential change to reflect the revised allocation of employment land provision in light of further evidence (refer to FC19).</p> <p>Paragraph 3.3.8 is amended to highlight the role of supported regeneration initiatives to support jobs and encourage growth and indicate that such strategies have value across the County. To provide counter argument to <b>Rep 6235.V6</b> that reference to LGZs should be removed.</p>	

Amend paragraphs 3.3.1 – 3.3.8 as follows:

- **LDP employment land requirement 2011-2026 = 49 45 ha**

3.3.6 It is concluded that the LDP should allocate 49 45 ha (3.3 ha per annum) of employment land for the period 2011-2026. Although this is the higher level estimate of future land required, it will provide flexibility to support economic growth and cater for any peaks and troughs in demand. It is higher than the take-up of the UDP allocations but this reflects the above findings and it provides a dispersed choice and spread of sites across Powys reflecting the county’s geography, settlement pattern and local economies.

3.3.8 Local Growth Zones (LGZs), supported by Welsh Government, are also regeneration initiatives being taken forward within Powys, as an alternative model to Enterprise Zones, to help encourage and support jobs and growth within the county. Powys’s LGZs are being established in the Severn Valley (Welshpool / Newtown / Llanidloes), Rhayader / Llandrindod Wells / Builth Wells, and Brecon \* / Bronllys / Talgarth \* (\* Brecon and Talgarth are within the BBNPA and outside the scope of the Plan). and Ystradgynlais is within the Communities First programme area, Welsh Government’s flagship to improve the living conditions and prospects of people in the most disadvantaged communities across Wales.

<b>Focussed Change: FC11</b>	<b>Section: Housing Growth,</b>
------------------------------	---------------------------------

	<b>Paragraphs 3.3.12 – 3.3.16,</b>
<b>Reason:</b>	
To reflect in light of further evidence the revised: <ul style="list-style-type: none"> <li>• dwelling requirement</li> <li>• dwelling land provision</li> <li>• updated information on completions and commitments</li> </ul>	
<b>Further explanation required</b>	

To amend paragraphs 3.3.12 – 3.3.16 as follows:

- **LDP Housing Requirement 2011-2026 = 5,519 dwellings**

3.3.12 Welsh Government’s Local Authority Household Projections were used as the starting point to identify the housing requirement for the LDP<sup>1</sup>. Table 2 below shows the projected growth derived from the principal projection variant of the 2011-based projections for Powys, which has been used to inform the LDP. This shows a projected growth of 4,600 households over the plan period 2011-2026 from 58,400 to 63,000 in 2026.

3.3.13 From this total increase in households, it is necessary to deduct the 17.74% of households living in the BBNP. To allow for levels of vacancies in the dwelling stock the number of new dwellings required will be higher than the number of new households projected. According to the 2011 Census, there were 58,345 households occupying 63,482 dwellings meaning 8% were unoccupied and a conversion rate of 8% has been applied.

**Table H1 – Calculating the Housing Requirement**

	<b>Projected increase in Powys households 2011-2026</b>	<b>Less 17.74% Households in BBNP</b>	<b>Plus 8% Conversion rate</b>
<b>Dwelling Requirement</b>	4,600	3,784	4,087

3.3.14 This projected need of **4,087 dwellings** forms a starting point and the Council has taken into account other local factors in assessing the dwelling requirement, including the need to increase levels of net migration, the retention of young out-migrants, the need to deliver affordable housing, the availability of suitable sites. Having assessed these factors it is considered that the LDP should plan for a higher level of housing growth. However, this level needs to be realistic and able to be delivered so an assessment against past build rates was undertaken. The conclusion of this assessment is that the LDP’s forecasted dwelling requirement is for **5,519 dwellings**.

<sup>1</sup> The LDP Population and Housing Topic Paper explains how the dwelling requirement was derived. At the Preferred Strategy stage the 2008-based projections were used, although 2011-based projections have since been published by Welsh Government.

3.3.15 In planning to deliver this dwelling requirement, the LDP also includes a flexibility allowance for sites that may not be developed in the plan period. An additional 10% contingency has therefore been added. Consequently the plan makes provision for **6,071 dwellings (405 p.a.)** in order to meet the dwelling requirement of **5,519 dwellings (368 p.a.)**.

3.3.16 Table H2 below shows how the housing provision is to be met.<sup>2</sup>

**Table H2 – LDP Housing Provision**

	<b>Towns</b>	<b>Large Villages</b>	<b>Small Villages</b>	<b>Rural / Other</b>	<b>Total</b>
<b>Completions to 31/12/13 (a)</b>	138	112	34	132	416
<b>Commitments not started (b)</b>	878	401	165	239	1683
<b>Commitments U/C (c)</b>	184	67	30	60	341
<b>New Allocations (d)</b>	1790	833	Not applicable	Not applicable	2623
<b>Windfall projection (e)</b>	224	188	68	528	1008
<b>Total</b>	3214	1601	297	959	6071
<b>% Distribution of Total</b>	53%	26%	5%	16%	100%

a) Completions – dwellings built since the start of the Plan Period (1/1/11 to 31/12/13)

b) Commitments having valid planning permission but not started (as at 31/12/13)

c) Commitments under construction (as at 31/12/13).

d) New Allocations from housing site allocations in Towns and Large Villages (see Appendix 1). This excludes sites with planning permission i.e. commitments (as at 31/12/13).

e) Windfall projection for 12 remaining years of the plan period, based on an assessment of completions on non-allocated UDP sites over the 3 year period 1/1/2011 – 31/12/13.

<b>Focussed Change: FC12</b>	<b>Section: LDP Affordable Housing Target, Paragraphs 3.3.17 – 3.3.18,</b>
<b>Reason:</b>	
To reflect, in light of further evidence, the revised: <ul style="list-style-type: none"> <li>• dwelling requirement</li> <li>• the Affordable Housing requirements / contribution expected in the Central Powys area (30%).</li> <li>• dwelling land provision</li> <li>• updated information on completions and commitments</li> </ul>	
<b>Further explanation required</b>	

<sup>2</sup> Further information on the provision of housing is found in the LDP Topic Papers on Population and Housing and the Phasing & Delivery of New Housing Provision.

To amend paragraphs 3.3.17 – 3.3.18 as follows:

- **LDP Affordable Housing target = 1,044 affordable dwellings**

3.3.17 An affordable housing target of 1,044 dwellings is set for the LDP<sup>3</sup>. This is 19% of the LDP dwelling requirement and has had regard to the findings of the Local Housing Market Assessment<sup>4</sup>. The Viability Assessment / Study of the LDP took into consideration the prevailing economic climate, land values and house prices in Powys, a range of development costs, and all requirements of local and national planning policies. The conclusions of this assessment are reflected in the affordable housing contributions policy H4 and the affordable housing target. Economic factors affecting construction and development viability have also been taken into account in setting the target, but will continue to affect the delivery of housing. The target will therefore be monitored.

3.3.18 It is estimated that this target will be met in the following ways:

1. 113 affordable homes completed from 1/1/2011 to 31/12/2013.
2. 867 affordable homes from allocated sites as set out in Appendix 1 and other sites in accordance with policy H4;
3. 64 affordable homes on windfall sites (non-allocated sites), based on an assessment of completions over the period /1/2011 to 31/12/2013.

<b>Focussed Change: FC13</b>	<b>Section: Insert new Strategic Policies section after paragraph 3.4.24.</b>
<b>Reason:</b> Introductory text and insertion of new strategic policies SP1 and SP2 and reasoned justification to provide certainty on the LDP's strategy. Also to ensure the LDP addresses matters raised by LDP representation 1084.V2.	

Insert strategic policies section as follows:

### **3.5 Strategic Policies**

3.5.1 The spatial element of the LDP Strategy identifies where development should be located during the Plan period, with the aim of ensuring that development meets the needs of Powys' communities and is directed to locations that are sustainable in terms of their size, function, character, facilities, transport linkages, social and environmental capacity.

3.5.2 The spatial strategy is based upon the sustainable settlement hierarchy and aims to disperse development proportionately around the Plan area in order to meet the needs of Powys' communities. Development outside of the main towns and large villages is closely controlled. This ensures that the higher tier settlements within the County remain as foci for housing, employment and services, contributing to their vitality and promoting vibrant and sustainable communities. This approach reinforces

<sup>3</sup> Further information is provided in the LDP Affordable Housing Topic Paper

<sup>4</sup> An update to the LHMA was undertaken in 2014 and published in 2015.

infrastructure provision (both social and physical) so as to reduce the need to travel. The Plan supports the use of policies that encourage the level of development most appropriate to each settlement. The strategy therefore ensures that an appropriate balance is struck between sustaining our more rural communities, meeting needs locally, whilst protecting the County's natural assets

### **Strategic Policy SP1 - Settlement Strategy**

Housing and employment development is distributed in accordance with the following settlement strategy based on a settlement's levels of service provision and size (households) and subject to its capacity to accommodate sustainable growth:

Category	Type of Development
<p><b>Towns: At least 50% of the Plan's housing growth and at least 50% of the Plan's employment land within:</b></p>	
<p><b>1. Towns</b></p>	<p><b>Housing and Employment:</b></p> <p>A higher proportion of new development required will be directed to Towns. This will be through commitments and new allocations and on suitable sites within the development boundary.</p> <p>In addition windfall sites within the development boundary will be permitted.</p> <p>Additionally affordable housing can will be permitted on exception sites.</p>
<p><b>Large Villages: At least 20% of the Plan's housing growth and up to at least 15% of the Plan's employment land within:</b></p>	
<p><b>2. Large Villages</b></p>	<p><b>Housing:</b></p> <p>A significant proportion of new housing development required will be directed to Large Villages. This will be through commitments and new allocations and on suitable sites within the development boundary.</p> <p>In addition windfall sites within the development boundary can be permitted.</p> <p>Additionally affordable housing can will be permitted on exception sites.</p> <p><b>Employment:</b></p> <p>Employment land allocations have been made in the</p>

	<p>following Large Villages: Abermule, Churchstoke, Four Crosses and Three Cocks (Mixed Use Site).</p>
<p><b>Small Villages: No more than (10%) of the Plan's housing growth within:</b></p>	
<p><b>3. Small Villages</b></p>	<p><b>Housing and Employment:</b></p> <p>The LDP does not identify development boundaries for Small Villages and there are no allocations for development within this tier.</p> <p><b>Housing:</b></p> <p>Open Market housing development will be restricted to small infill plots (suitable to accommodate one or two dwellings) unless larger scale infill development is identified in a community-led Village Action Plan.</p> <p>Additionally affordable housing be permitted on exception sites.</p> <p>Single Rural Affordable Homes to meet local need <del>can</del> will be permitted on suitable sites where well-integrated into the settlement.</p> <p><b>Employment:</b></p> <p>Proposals may be acceptable where they are justified and comply with Policy.</p>
<p><b>Rural Settlements and Countryside: No more than (20%) of the Plan's Housing Growth within:</b></p>	
<p><b>4. Rural Settlements</b></p> <p>and</p> <p><b>5. Open Countryside:</b></p>	<p><b>Housing and Employment:</b></p> <p>The LDP defines Rural Settlements but does not identify development boundaries for them and there are no allocations for development within this tier.</p> <p><b>Housing:</b></p> <p>Open market housing development will not be permitted in Rural Settlements.</p> <p>Single rural affordable homes to meet local need in perpetuity <del>can</del> will be permitted on suitable sites where well-integrated into a rural settlement.</p> <p>Only housing development that complies with Planning</p>

	<p><b>Policy Wales and TAN6 will be permitted in the Open Countryside.</b></p> <p><b>Employment:</b></p> <p><b>There are no allocations for employment development within these tiers. Proposals may be acceptable where they are justified and comply with Policy.</b></p>
<p><b>No more than 30% of the Plan's employment land Growth on LDP Allocated sites located outside of the settlement hierarchy:</b></p>	
<p><b>Allocated Sites outside of the settlement hierarchy</b></p>	<p><b>Housing: Not Applicable</b></p> <p><b>Employment:</b></p> <p><b>Land has been allocated at :</b></p> <p><b>Buttington Quarry and Brickworks to assist in the redevelopment of this existing brownfield site. The land is already partially developed with employment uses – For B1, B2 B8 and other appropriate economic uses.</b></p> <p><b>Offas Dyke Business park, Buttington – this is an existing Employment Site which lies outside of an identified settlement. For B1 Uses.</b></p>

**3.5.3 The spatial strategy and the sustainable settlement hierarchy seek to:**

- Provide the framework for distributing development proposals to meet the planned growth in housing and employment in the County;
- Provide a focus for service provision and investment plans / opportunities;
- Support the appropriate co-location of different land uses; and to
- Carefully control development in the less sustainable areas so as to address the problems associated with rural dispersal, encourage the take up of urban brownfield sites and move towards a more sustainable overall development pattern for the future.

**3.5.4 The purpose of SP1 is to ensure that growth is appropriately apportioned and controlled between the hierarchy tiers so that the location of new development does not undermine the LDP Strategy and contributes to a sustainable pattern of development in Powys.**

**3.5.5 It is important that new development does not adversely affect the integrity or role of a settlement in a manner which would contradict the aims and objectives of the LDP sustainable settlement hierarchy. Proposals for development should be of a scale, use and design that complement the position of a settlement in the hierarchy. The cumulative impact of development should also be considered when assessing**

the impact of proposals, along with other existing development and unimplemented permissions still valid at the time of decision.

### **Strategic Policy SP2 - Safeguarding of Material Assets**

Developments which impact on the following material assets will only be permitted where they will have no unacceptable adverse impact on the asset and its operation: Any development proposal must not unacceptably adversely affect, either on its own or in combination with existing or approved development important material assets and their operation including:

**i. Strategic infrastructure such as:**

- a. Transport routes including disused transport infrastructure that offers potential for future transport re-use, strategic or town centre car parks and safeguarded corridors.
- b. Reservoirs and water supplies.
- c. Sennybridge Training Area.
- d. Best and most versatile Agricultural land (Grades 1, 2 and 3a).
- e. Windfarms in Strategic Search Areas.
- f. Utilities infrastructure including pipelines, electricity transmission connections and hazardous installations

**ii. Major tourism assets and visitor attractions including but not limited to:**

- a. Royal Welsh Agricultural Society showground.
- b. Welshpool and Llanfair Light Railway.
- c. Elan Valley and Vrynwy Estates.
- d. Powis Castle.

**iii. Green tourism assets and infrastructure including but not limited to:**

- a. National Cycle Network routes.
- b. National Trails and National Bridlepath Network
- c. Local Trails and Public Rights of Way.
- d. Canals and Waterways.
- e. Open access land and common land.
- f. Potential future routes along linear features (such as disused railways).

**iv. Land Allocations in the Local Development Plan where the development proposal frustrates or may frustrate the identified use and/or capacity of the site thereby compromising it's contribution to the overall aims and objectives of the Plan.**

3.5.6 Powys contains many 'material' assets of national and regional importance which should be safeguarded. The LDP seeks to protect these assets and their operation. Various types of material asset are listed, but the list is not exhaustive. For instance, strategic infrastructure includes the east / west and north / south rail routes, trunk roads, proposed and committed bypass routes, reservoirs and the Ministry of Defence's (MOD) Sennybridge training area. Any proposals for development, including wind turbines, within the MOD's Safeguarding Zones will be referred to the MOD for consideration and comment. These Safeguarding Zones

ensure operational facilities such as explosive stores, radar facilities and range areas are not compromised.

3.5.7 The extent of buffer zones around hazardous installations is determined by the Health and Safety Executive

3.5.8 Allocated sites are protected for the purposes and uses for which they are allocated.

<b>Focussed Change: FC14</b>	<b>Section: Paragraphs 4.1.1 – 4.1.2, Table DM1</b>
<p><b>Reason:</b></p> <ul style="list-style-type: none"> <li>• Paragraph 4.1.1 – Delete superfluous text.</li> <li>• Table DM1 – Text inserted to refer to the introduction of the proposed two strategic policies and the disaggregation of the development management policies in order to better articulate the Plan’s strategy and development management policies. Re-numbering of table steps as necessary.</li> <li>• Paragraph 4.1.2 – as above. Inclusion of reference to agricultural development for clarity.</li> </ul>	

Amend paragraphs 4.1.1-4.1.2 and table DM1 as follows:

4.1.1 This section sets out the Plan’s policies and proposals for determining planning applications in line with the Plan’s strategy. The first section sets out general development management policies that applications will be considered against. It is followed by more specific policies for certain types of development. The table below explains how to use the policies **in four steps**. A justification is provided after each policy.

**Table DM1**

Step	Refer to	Explanation
1	<b>Relevant development type policy</b>	Refer to the relevant section of the plan to find the applicable development type policy. E.g. For tourism development, refer to Tourism Policy TD1.
2	<b>Policy DM2 – DM17 and the Strategic policies SP1-2</b> Strategic Planning Matters	If the development is supported by the development type policy, or there is no relevant development type policy, it should then be considered against <b>the strategic planning matters set out in Policy DM1. E.g. impact on protected sites, the Development Management policies (DM2 – DM17) and the Strategic Policies SP1-2.</b>
3	<b>Policy DM2 – Detailed and Site Specific Planning Matters</b>	If the development is supported by Policy DM1, it should then be considered against <b>the site specific and detailed planning matters in Policy DM2. E.g. Highway access requirements.</b>
4 3	<b>DM1 – Planning Obligations</b>	Depending on <b>the</b> proposal, a Planning Obligation may be required in line with Policy <b>DM1.</b>

--	--	--

4.1.2 The LDP does not include policies for every type of development, but Policies DM1 and DM2 to DM17 will be used to determine all applications.

4.1.3 No specific policy is included on the re-use / adaptation of rural buildings, or on agricultural development, because PPW, TAN 6 and TAN23 provide adequate policy. The Council has not prioritised economic reuses above other uses and supports a flexible approach to re-use and adaptation of rural buildings.

<b>Focussed Change: FC15</b>	<b>Section: Section 4.2, Development Management Policies</b>
<b>Reasons:</b>	
<p>It is proposed that Section 4.2 of the LDP is re-written to disaggregate the three previous Development Management policies (DM1-DM3) into specific policies in order to better articulate these policies and provide greater legibility. The policies and supporting text in the Deposit Draft June 2015 have been retained and re-used wherever possible and, where considered appropriate, to address comments made on the Deposit Draft LDP 2015.</p> <p>The references below setting out the reasons refer to proposed numbering of the proposed Focussed Changes rather than to the Deposit Plan policy and paragraph numbers.</p> <p><b>Policy DM3 Planning Obligations</b> – renumbered as DM1 to reflect amended section 4.2 .</p> <p><b>Policy DM2 The Natural Environment</b> – Stand-alone policy proposed to provide clarity and to ensure the LDP addresses matters raised by LDP representations 542.V4, 1084.V11, 1084.V12, 1612.V3, 4177.V1, 5197.V13, 6160.V1, 6235.V12 and 6235.V16, and in order to ensure the LDP meets the soundness tests.</p> <p><b>Policy DM3 Landscape</b> - Stand-alone policy and supporting justification text to provide clarity and to ensure the LDP addresses matters raised by LDP representations 27.V22, 1084.V12, 3822.V1, 4349.V3, 5197.V13, 6235.V1, 6235.V13, and in order to ensure the LDP meets the soundness tests.</p> <p><b>Policy DM4 Development and Flood Risk</b> - To ensure clarity and to ensure the LDP addresses matters raised by LDP representations 1084.V12 and 1084.V15 and in order to ensure the LDP meets the soundness tests.</p> <p><b>Policy DM5 Flood Prevention Measures and Land Drainage</b> - To ensure clarity and to ensure the LDP addresses matters raised by LDP representations 1084.V12, 1084.V15, 1084.V18, 5197.V15 and in order to ensure the LDP meets the soundness tests.</p> <p><b>Policy DM6 Dark Skies</b> - To ensure clarity and to ensure the LDP addresses matters raised by LDP representations 27.V5, 27.V24, 1084.V12, 5197.V15,</p>	

5197.V16 and 6235.V2, and in order to ensure the LDP meets the soundness tests.

**Policy DM7 Minerals Safeguarding and Policy DM8 Existing Mineral Workings -**

To ensure clarity by having separate policies and reasoned justifications on safeguarding and buffer zones for minerals and to ensure the LDP addresses matters raised by LDP representations 1084.V12, 1481.V1, 1481.V5, 4765.V2, 4765.V3, 5100.V1. Also to ensure alignment with national policy MPPW and MTAN2 in order to ensure the LDP meets the soundness tests.

**Policy DM9 Contaminated and Unstable Land -** To provide clarity and address representation 4765.V4

**Policy DM10 Amenities -** To ensure clarity and to ensure the LDP addresses matters raised by LDP representations 1084.V12. and to ensure the LDP meets the soundness tests.

**Policy DM11 Community Facilities -** To ensure clarity and to ensure the LDP addresses matters raised by LDP representations 1084.V12 and 6253.V1 in order to ensure the LDP meets the soundness tests.

**Policy DM12 Transport -** To ensure clarity and to ensure the LDP addresses matters raised by LDP representation 1084.V12 in order to ensure the LDP meets the soundness tests.

**Policy DM13 Utility requirements for new development -** To ensure clarity, to ensure the LDP addresses matters raised by LDP representations 1084.V12 & 5197.V15 in order to ensure the LDP meets the soundness tests and to reflect National Planning Policy.

**Policy DM14 Development in Welsh Speaking Strongholds -** To ensure clarity, to ensure the LDP addresses matters raised by LDP representations (1084.V12, and various representations raising issues about Welsh Language and Culture) in order to ensure the LDP meets the soundness tests and to reflect National Planning Policy.

**Policy DM15 Design and Resources -** To ensure clarity, to ensure the LDP addresses matters raised by LDP representations (1084.V12) in order to ensure the LDP meets the soundness tests and to reflect National Planning Policy.

**Policy DM16 - Protection and Enhancement of the Historic Environment**

- To ensure clarity, to ensure the LDP addresses matters raised by LDP representations (27.V22, 1084.V12, 5197.V16) in order to ensure the LDP meets the soundness tests and to reflect National Planning Policy.
- Addition of 'Historic' before 'Battlefields' and re-description of iv. Registered Parks and Gardens To ensure clarity and consistency with the Topic Paper and in order to ensure the LDP meets the soundness tests.
- To include reference to locally listed buildings and other non-designated heritage assets To ensure the LDP addresses matters raised by LDP representations (27.V5, 27.V24, 6235.V2), in order to reflect a more holistic approach to the

protection of the historic environment and to ensure the LDP meets the soundness tests.

- Include views both 'into' and 'out of' in the policy - to ensure the LDP addresses matters raised by LDP representation (6235.V14), to ensure that the effect of the proposal on both views into and out of a site or feature is taken into account, in order to ensure the LDP meets the soundness tests.
- Change reference to heritage assets as non-renewable resources 'important' to 'essential'. Reason - To ensure the LDP addresses matters raised by LDP representation (6235.V14), to recognise heritage assets as non-renewable resources that are essential for education, leisure and the economy, in order to ensure the LDP meets the soundness tests.
- Amended Supporting Text Reason - To provide a clearer justification to ensure the LDP addresses matters raised by LDP representations (27.V5) (27.V24) (6235.V2), reflecting a wider range of heritage assets, in order to ensure the LDP meets the soundness tests.
- To ensure the LDP addresses matters raised by LDP representation (27.V22), in order to recognise the importance of the HER as a heritage information tool

**Policy DM17 Protection of Existing Employment Sites** – Policy carried forward and retained from the Deposit Draft LDP 2015.

Replace all of section 4.2 Development Management Policies with the following text as follows. (Note the original text that it is proposed to delete is not shown because the section is being replaced in whole).

### **Policy DM1 – Planning Obligations**

**Planning obligations will be sought by agreement with applicants, where necessary, to ensure that:**

- 1. The development provides for adequate infrastructure necessary to serve the proposal, and that satisfactory maintenance and / or restoration arrangements are achieved;**
- 2. Benefits in the public interest are secured where these are relevant and reasonably related to the proposal, and required to enable it to proceed.**

4.2.1 The Council will only look to use planning obligations where planning conditions are considered inappropriate.<sup>5</sup> Listed below are examples of where planning obligations will be sought:

- Provision or improvement of essential infrastructure or utilities required to serve a development.
- Affordable housing in residential developments.
- Provision or improvement of community, educational, health, recreation and open space facilities required to serve a development.
- Support for sustainable modes of transport, improved traffic management, and rights of way in relation to the development.

<sup>5</sup> Planning conditions – see PPW, Section 3.6; Planning Obligations – see PPW, Section 3.7.  
<http://wales.gov.uk/topics/planning/policy/ppw/?lang=en>

- Securing financial contributions (commuted sums) in lieu of provision such as a contribution towards public transport services or affordable housing.
- Mitigation measures that support the protection and enhancement of Welsh language and culture in Welsh speaking strongholds.
- Measures that mitigate the adverse impacts of development.

4.2.2 Planning obligations will be negotiated and the viability of development will be taken into account. Where obligations would impact upon delivery, priority will be given to ensuring that essential transport and utility infrastructure required for development to be implemented is provided (e.g. water, sewage, access). Once this has been secured the delivery of affordable housing will be the priority in any further negotiations.

4.2.3 The Planning Act 2008 made provision for Councils to seek contributions from development for infrastructure through a Community Infrastructure Levy (CIL)<sup>6</sup>. Contributions from a CIL can be used to fund infrastructure at a county-wide level including transport schemes, schools and leisure centres. In order to encourage authorities to introduce CIL, the regulations restricted the pooling of S106 contributions to a maximum of 5 contributions from the 6th April 2015 (including all relevant S106 contributions received since 6th April 2010).

4.2.4 The Powys Local Development Plan and Community Infrastructure Levy Viability Assessment (2014) considered the impact on development viability of the proposed LDP policies and from introducing a CIL. It concluded that there was scope to introduce a CIL although the Council will not make a decision on whether to pursue a CIL until the LDP has been adopted. It should be noted that the deliverability of site allocations proposed by the plan is not dependant on the introduction of a CIL, although site-specific planning obligations will continue to be sought in accordance with the regulations.

## **Policy DM2 – The Natural Environment**

**Development proposals which impact on the following natural environment features will only be permitted where they do not unacceptably adversely affect or compromise:**

**All Proposals for development must protect, manage and enhance the natural environment and open space to avoid compromising, or unacceptably adversely affecting, either on their own or in combination with existing or approved development, the following:**

### **1. Site Designations, Habitats and Species**

**The important habitats, species and site designations listed below from i. to vi. are afforded the highest levels of protection and will be protected from any development that would harm their distinctive features or characteristics.**

- i. European Protected Sites (SAC, SPA and Ramsar).**
- ii. European Protected Habitats (Natura 2000 Annex 1 habitats).**

- iii. National Nature Reserves and Sites of Special Scientific Interest.
- iv. Protected Species including those listed in the Habitats Directive (Natura 2000 Annex 2 Species) and the Wildlife and Countryside Act.
- v. Habitats and Species of principal importance for biodiversity conservation in Wales.
- vi. National and Local Biodiversity Action Plan Habitats and species.

In relation to site designations vii. to ix. below, development will only be permitted where:

- (a) They conserve and where possible enhance the natural heritage importance of the site; or
- (b) The development could not reasonably be located elsewhere, and the benefits of the development outweigh the natural heritage importance of the site; and
- (c) Mitigation and/or compensation measures will need to be agreed where adverse effects are unavoidable.

- vii. Local Nature Reserves.
- viii. Wildlife Trust Reserves and Sites.
- ix. Regionally Important Geological Sites and Geological Conservation Review Sites.

- 2. The achievement of the Water Framework Directive's overarching objectives.
- 3. Trees, woodlands and hedgerows of significant public amenity, natural or cultural heritage.
- 4. An existing area of Open Space, complete or in part, as identified in the Open Space Assessment, unless it can be demonstrated that:
  - i. There is an excess of such provision in the area; and
  - ii. There is no longer a requirement for that type of open space in the area, and
  - iii. The site would not be suitable to provide an alternative type of Open Space for which there is a shortfall; and

It can be demonstrated that alternative provision can be made available that is of enhanced or equivalent community benefit in terms of its size, characteristics, location and accessibility.

At the site level, proposals for development shall demonstrate how they protect, positively manage and enhance biodiversity and geodiversity interests to produce a net gain both at the particular site, including improving the resilience of biodiversity through the enhanced connectivity of habitats within, and beyond the site.

**4.2.5 Site Designations.** This policy addresses LDP Key Issue 12 and Objective 11. Powys contains important natural and semi natural environments which are protected through designations made at European, National and local levels. Many of these natural and semi natural environments are sensitive to air and water pollution from developments, including agricultural developments. These natural and semi natural environments are valuable non-renewable resources which are also essential for education, leisure, and the economy. Guidance on the protection of these resources, the criteria against which development that may affect them and the relative weight attached to the different designations is contained in PPW, TAN5 - Nature Conservation and Planning and Circulars.

4.2.6 For the River Wye SAC the primary mechanism for achieving its conservation targets is through the Nutrient Management Plan (NMP). This is overseen by a Board and a Technical Group which Powys County Council supports and participates in.

4.2.7 In order to assess the acceptability of a development proposal against the criteria of Policy DM2, proposals which would be likely to result in increased nutrient loading to the environment, such as intensive livestock units, will be required to assess the potential impacts in respect of water and air quality, to ensure that they do not adversely affect these natural and semi natural environments.

4.2.8 In addition to the designated sites listed above there are also areas that are, or are being, designated as Local Wildlife Sites (LWS) across the county. These locally important sites have passed, and are being protected by, a standard set of criteria justifying their importance for wildlife and are identified and monitored by the Wildlife Trusts (Brecknockshire, Montgomeryshire and Radnorshire). LWS are under continual review and not all qualifying sites have been identified or designated. Developers and applicants are therefore encouraged to contact the Local Records Centre to determine how their proposal might relate to or impact upon any LWS.

**4.2.9 Achievement of Water Quality Standards in line with the Water Framework Directive.** The Water Framework Directive requires surface and groundwater to achieve overall 'good' status by 2027. There are five categories: Bad, Poor, Moderate, Good and High. For surface waters there are two separate classifications for water bodies: ecological and chemical. For a water body to be in overall 'good' status both ecological and chemical status must be at least 'good'.

4.2.10 There are two separate classifications for groundwater bodies: chemical status and quantitative status. Each must be reported in addition to the overall groundwater body status. For a groundwater body to be at good status overall both chemical status and quantitative status must be 'good'. Groundwater quality is considered on a precautionary principle with the aim of minimum anthropogenic impact, with a presumption against direct discharge to groundwater. Quantity is measured on a good or bad status. There is a requirement for abstraction to be less than the rate of recharge. In addition to assessing status, there is also a requirement to identify and report where the quality of groundwater is deteriorating as a result of pollution and which may lead to a future deterioration in status.

4.2.11 The key documents to meeting these targets are the River Basin Management Plans. Powys' planning area falls within the Severn District River Basin Management Plan area and the Western Wales District River Basin Management Plan. Powys has a number of sites that require the highest level of protection under international legislation. The LDP was accompanied by a Habitats Regulations Assessment (HRA) that investigated the likelihood of significant effects on the qualifying features of these sites. Development proposals will be expected to undertake appropriate surveys and include measures that maintain and enhance important features whilst incorporating them within any development of the site. Development proposals that encourage a sustainable 'pollution and flow neutral' position represent a means through which growth may be allowed whilst ensuring that WFD objectives can be met, prevent deterioration and ensure pollution does not damage the integrity of designated sites and their ability to support internationally important features.

**4.2.12 Trees, Woodlands and Hedgerows of Significant Public Amenity, Natural or Cultural Heritage.** Trees are the largest and longest living organisms in Powys. Trees, woodlands and hedgerows offer multiple benefits, including visual amenity, defining a sense of place, providing places for relaxation and recreation, habitats for wildlife, improved health and wellbeing and mitigating the effects of climate change. To maintain these benefits, the protection and enhancement of existing tree and woodland cover is essential. Development will not be permitted that would cause unacceptable harm to trees, woodlands and hedgerows of significant public amenity, natural or cultural heritage value.

4.2.13 Ancient woodlands and hedgerows and veteran trees are irreplaceable habitats of high biodiversity value that cannot be recreated once lost. This policy will protect them from development that would result in significant damage and developments will be expected to retain them. Where appropriate, Tree Preservation Orders will be served to protect significant trees from removal or harm. The amenity value of trees will be assessed in accordance with government guidance and nationally recognised systems of amenity evaluation.

**4.2.14 Protection of existing open space.** If a proposal would result in a complete or partial loss of open space, applications must be justified. The justification must determine whether there is excess provision, whether there is no longer a requirement for that type of open space or whether it is suitable for an alternative type of open space in short supply.

4.2.15 The definition of what is included by the term 'Open Space' can be found in the Open Space Assessment, however the typologies used are broadly the same as those listed in TAN16 and include: Public Parks and Gardens, Natural and Semi-Natural Green Spaces, Outdoor Sports Facilities, Amenity Green Space, Play Areas, and Allotments.

4.2.16 The former Countryside Council for Wales produced a toolkit to help ensure that everyone had access to natural green space. The toolkit recommends that no one should live more than 300m from their natural green space. This standard has been used in the Open Space Assessment (sites over 0.2ha) for typologies not covered by Field in Trust Standards.

4.2.17 Further standards apply for tennis courts, athletics tracks and bowling greens to which either TAN 16 or the Open Space Assessment should be consulted.

4.2.18 It is important that school playing fields or facilities for public enjoyment are not eroded away by development pressures and that they are respected as being important in their own right. Over-provision is possible in some areas, particularly where for example trends have moved away from organised formal recreation, but it is important that the land remains protected for some form of recreation, even if the type of sport it accommodates changes. Compelling evidence that the facility is no longer required by the community for recreation or amenity purposes will be required.

4.2.19 To determine the adequacy of provision, the Fields in Trust Standards should be applied as follows. These have been used in the Open Space Assessment.

Type	Per 1000 of population
Pitch Sports	1.72ha
All Sports	1.76ha
Designated Equipped Playing Space	0.25ha
Accessible Natural Green Space (CCW toolkit standard)	2ha

Type of Space	Walking Distance (metres)	Straight Line Distance (metres)
Local equipped or landscaped areas for play and informal recreation	400	240
Neighbourhood equipped areas for play and informal recreation and provision for young people	1000	600

4.2.20 **Protection, Management and Enhancement of Biodiversity and Geodiversity at the Site Level.** Proposals will be required to demonstrate how they intend to protect, manage or enhance biodiversity interests on a particular site. In most cases this will involve gathering and presenting supporting evidence for the proposal. The requirements for this evidence will vary depending on the likely impacts of the proposals. Where impacts to biodiversity are likely a full Ecological Survey will be required. Where potential impacts to European designated sites are likely sufficient information to enable a Habitats Regulation Assessment may be necessary.

4.2.21 Connectivity is concerned with enabling biodiversity to spread to, or be connected with appropriate habitats or similar ecosystems. This avoids 'islands' of habitats or populations from developing and being isolated from others and improves the resilience of populations and habitats to withstand the effects of climate change, development pressures and changes to wider landscape management. Many

measures which protect, manage and enhance biodiversity can also be instrumental in delivering greater connectivity.

4.2.22 Further information on how to protect, manage and enhance biodiversity and geodiversity will be detailed in the Biodiversity SPG.

### **Policy DM3 – Landscape**

**All proposals for development must not compromise, or unacceptably adversely affect, either on their own or in combination with proposed, approved or existing development, the key characteristics of the Powys landscape, as defined in the LANDMAP aspect areas for which the development is located, including:**

- 1. The development pattern of the area, its historical and ecological qualities, open views, tranquillity and sensitivity to change;**
- 2. The topography and patterns of features such as broad, open uplands, peat moors, small hills and valleys, traditional field boundaries, woodlands, rivers and streams.**

**All proposals will also need to have regard to adjacent protected landscapes (National Parks and Areas of Outstanding Natural Beauty) and the visual amenity enjoyed by users of both Powys landscapes and adjoining areas.**

4.2.23 Powys' landscape is one of its most important assets and is a product of its natural history and geology and the influence of human activity. Maintaining the distinctiveness of Powys' landscape is an important factor in safeguarding the quality of its environment and ensuring the social, cultural and economic well-being of the area. It can help in attracting inward investment and employment opportunities, the tourism industry, and in providing an attractive setting in which local people can live and work. Proposals for development will also be considered against the impacts they might have on the special qualities or purposes of the adjoining National Parks, and Areas of Outstanding Natural Beauty.

4.2.24 LANDMAP is a standardised approach to landscape assessment and an important resource which assesses the diversity of landscapes within Wales. It identifies and explains their most important characteristics and qualities of landscapes including geological landscapes, landscape habitats, visual and sensory landscapes, cultural landscapes and historic landscapes. Developers are advised to refer to LANDMAP to determine how development proposals can be integrated into the landscape whilst incorporating measures for its protection and/or conservation and/or enhancement.

4.2.25 When considering development in Powys Under Section 62(2) of the Environment Act the Council have a duty to conserve and enhance the wildlife, natural beauty and cultural heritage and historic environment of the Brecon Beacons and Snowdonia National Parks. Where applications for development may have an impact on the Brecon Beacons National Park either by virtue of their scale and/or location Policy SP1 of the BBNPA LDP will be considered<sup>7</sup>.

4.2.26 Eleven of the fifty eight Registered Landscapes of Historic Interest in Wales are either partially or entirely within Powys. The impact of development affecting these landscapes may require assessment under the 'Assessment of the Impact of Development on Historic Landscapes' (ASIDOHL2) process.

#### **Policy DM4 – Development and Flood Risk**

**All development proposals must be located away from tidal or fluvial flood plains unless it can be demonstrated that the site is justified in line with national guidance and an appropriate detailed technical assessment has been undertaken to ensure that the development is designed to alleviate the threat and consequences of flooding over its lifetime. In addition the development must not increase flood risk elsewhere, and shall where possible allow floodplains to provide water storage to reduce flooding in the catchment, unless:**

- 1. The development is of a very minor nature such as an extension to a dwelling; or**
- 2. There is an overriding need in the public interest for the development.**

4.2.27 Avoiding unnecessary flood risk will be achieved by strictly assessing the flood risk implications of development proposals within areas susceptible to tidal or fluvial flooding and preventing development that unacceptably increases risk. In accordance with TAN15: Development and Flood Risk no highly vulnerable development will be permitted in Development advice zone C2. Development will only be considered in other areas at high risk of flooding where it can be demonstrated that the site can comply with the justification and assessment requirements of TAN15.

4.2.28 TAN15 states that the Development Advice Maps are based on the best available information considered sufficient to determine when flood risk issues need to be taken into account in planning future development. Development advice zones C1 and C2 of the maps show high flood risk areas and are based on Natural Resources Wales' extreme flood outlines for tidal and fluvial flooding.

4.2.29 Applications for the variation or renewal of planning permission will only be approved, in line with Policy H2, where it can be demonstrated that the development complies with the current Development Plan policies. This means that where planning permission lapses an application for its renewal will not be granted if it is for

---

<sup>7</sup> The special qualities of the National Park are set out by the National Park Management Plan which can be found at <http://www.beacons-npa.gov.uk/the-authority/who-we-are/npmp/2010-2015-national-park-management-plan/>

highly vulnerable development within an area of flood risk (Development advice zone C2).

### **Policy DM5 – Flood Prevention Measures and Land Drainage**

In addition to the requirements set out in National Guidance, all proposals for development must avoid unnecessary flood risk by assessing the implications of development proposals within areas susceptible to all types of flooding; any development that unacceptably increases risk will be refused.

In addition to this:

**A. Proposals near a watercourse or within an area of floodplain must comply with the following:**

- i) In areas identified at risk of flooding (fluvial, tidal, surface water and groundwater) or where a watercourse has insufficient channel capacity, opportunities to improve existing flood risk by using Sustainable Drainage Systems (SuDS), wetlands or other agreed and appropriate measures are investigated and implemented wherever possible.
- ii) Where possible, opportunities are taken on previously developed land to make space for water by reinstating the functional floodplain.
- iii) Opportunities to make space for water by undertaking restoration and enhancement as part of the development, are identified and implemented.
- iv) Actions are taken to de-culvert wherever possible. Where this is not possible, an assessment of the structural integrity of the culvert, with any required remedial work, should be carried out prior to the development. A maintenance schedule should be developed for all culverts to ensure regular clearance.
- v) Any developments located adjacent to a watercourse should leave an appropriate undeveloped buffer strip, maintaining the watercourse and the immediate riparian zone as an enhancement feature and allowing for routine maintenance. The width of any buffer strip should be agreed with the relevant authorities on a site by site basis. Such sites should have a maintenance strategy for clearing and maintaining the channel, with particular regard to structures such as trash screens and bridges.

**B. Satisfactory provision shall be made for land drainage and Sustainable Drainage Systems (SuDS) in all developments. In addition to the requirements set out in national guidance, proposals must comply with the following:**

- i) The post development runoff volumes and peak flow rates are maintained at either the greenfield rate for greenfield sites or deliver a 50% reduction to surface water runoff rates for brownfield sites (up to and including the 1 in 100 year event inclusive of an appropriate allowance for climate change for both development scenarios).

- ii) SuDS are included for all new development; space should be integrated or set aside for SuDS and used to inform the overall site layout.
- iii) Hardstanding areas are kept to a minimum and infiltration techniques and the re-use of water are considered before attenuation devices.
- iv) SuDS have a maintenance strategy to ensure they are maintained and working efficiently.

**If SuDS cannot be implemented, a full written justification should be submitted explaining why this is the case.**

4.2.30 TAN15: Development and Flood Risk, advises that no highly vulnerable development will be permitted in development advice zone C2; and that development will only be considered in other areas defined to be at high risk of flooding in the Development Advice Maps where it can be demonstrated that the site can comply with the justification and assessment requirements of TAN15. However as the Lead Local Flood Authority - Powys County Council is responsible for managing local flood risk from other sources of flooding such as ordinary watercourses, surface runoff and groundwater. The Council's Local Flood Risk Management Strategy contains measures and objectives, "To ensure that planning decisions are properly informed by flooding issues and the impact future development may have on flood risk management and long term developments". To ensure that the LDP assists the Council in fulfilling this role the Strategic Flood Consequences Assessment (SFCA) advises that "The vulnerability of the development from other sources of flooding should be considered as well as the effect of the new development on surface water runoff."

4.2.31 The policy seeks to implement and reflect the actions identified in the relevant River Basin Management Plans and Catchment Flood Management Plans together with the recommendations from the LDP's Strategic Flood Consequences Assessment (Stages 1 and 2).

4.2.32 Proposals near a watercourse or within an area of floodplain need to take due consideration of the implications of new development on water courses and floodplains and aid the reduction or better management of existing flood risk for communities, infrastructure and businesses. Powys is also important as an upstream catchment for several major rivers including the Rivers Wye and Severn for water storage and alleviating flooding downstream. By including within the policy the identification of opportunities to undertake river restoration and enhancement, and to make space for water, as part of the development it is proposed that actions such as the removal of in-stream obstructions and anthropogenic features, removal of non-native species and the erection of fencing to control access to the river bank could potentially be implemented. Further information is found in "TAN 15 – Development and Flood Risk" and "The Chief Planning Policy Officers Letter (9th January 2015) - Planning Policy on Flood Risk and Insurance Industry Changes".

**4.2.33 Sustainable Drainage Systems.** The use of SuDS to manage surface water flows can be an important tool in minimising flood risk by increasing permeable surfaces in an area which allows water to seep into the ground rather than running

off into the drainage system. The effective use of permeable surfaces, soakaways and water storage areas should be incorporated in development where technically possible. Schemes for the use of rainwater harvesting (and storage such as cisterns) for non-drinking water purposes and/or grey water recycling for toilets and other relevant purposes will also be supported. SuDs are not only important for the minimisation of flood risk but also have wider benefits for water quality, pollution prevention together with recreational and social benefits.

4.2.34 The Flood and Water Management Act (2010) requires SuDS to be incorporated into all construction works that have drainage implications. This requirement works alongside the planning system. The Lead Local Flood Authority, as SuDS approval body, should be consulted to confirm the appropriate requirements and specification of SuDS components that are to be adopted. Appendix 4 of TAN15 provides information and advice about the use and implementation of SUDS as part of a proposed development. SPG will also be produced to provide further guidance of the use and implementation of SUDS.

4.2.35 With regard to hydrology, development must be designed so that the rate of water leaving the site is kept at existing rates and where practicable slowed and is channelled to the most appropriate location. The use of sustainable drainage systems, green roofs, porous surfaces, storage systems and native planting is encouraged where appropriate.

#### **Policy DM6 – Dark Skies and External Lighting**

**Proposals involving external lighting will only be permitted when a lighting scheme has been provided that demonstrates that the lighting will not individually or cumulatively cause:**

- i. Unacceptable levels of light pollution especially in the countryside.**
- ii. An adverse effect on the visibility of the night sky.**
- iii. A nuisance or hazard to highway users including pedestrians, and local residents.**
- iv. A disturbance to protected species.**

4.2.36 The majority of Powys has some of the darkest skies in the country as evidenced from the Wales Tranquil Areas Map (2009). The BBNP has skies of a very similar nature and has become the world's 5th International Dark Sky Reserve. Therefore it is imperative that lighting proposals are treated as an important consideration with regard to their effect not only on the LDP area but also on the BBNP and adjoining areas.

4.2.37 Excessive lighting can lead to sky glow and light trespass which shuts out the splendour of Powys' dark night skies and lighting apparatus can spoil daytime views. The intrusiveness of lighting in the countryside should be kept to a minimum, whilst each development proposal will be assessed against the need for lighting. Applicants should consider whether: the development could proceed without lighting; the benefits of lighting outweigh any dis-benefits; and whether there are any alternatives to lighting. Having established that lighting is needed, an appraisal of the specific lighting requirements of the site should be undertaken so that the lighting scheme is designed to integrate with its surroundings. Among the issues that should

be examined will be the effects of night lighting on dark landscapes, protected species, the appearance of lighting structures in daytime, potential impacts on the amenity of local residents and effects on the safety of transport users. Lighting can also have a detrimental impact on biodiversity and the historic environment. Thought needs to be given on how external lighting schemes can avoid potential impacts to nocturnal wildlife, particularly protected species, such as bats, otters and badgers. Dark wildlife movement corridors should be left, e.g. no external lighting of boundary habitat features, wildlife corridors, and watercourses.

4.2.38 Protected species are a material planning consideration. The way in which protected species are considered in the planning process is detailed in TAN5.<sup>8</sup> The LDP does not repeat this guidance on how to deal with protected species and in this instance relies upon national guidance.

### **Policy DM7 - Minerals Safeguarding**

**Reserves of sand and gravel, limestone, sandstone, igneous rocks and coal will be safeguarded as shown on the Proposals Map.**

**The sterilisation of minerals in a safeguarded area by other forms of development will not be permitted unless:**

- i) The development is temporary and restoration to enable future extraction of the mineral is agreed; or**
- ii) The development is of a very minor nature such as an extension to an existing dwelling; or**
- iii) There is an overriding need in the public interest for the development; or**
- iv) The mineral can be extracted satisfactorily prior to the incompatible development taking place**

4.2.39 Policy DM7 is to ensure that mineral resources are not needlessly sterilised by other development, so that they may remain accessible to future generations in accordance with MPPW and MTANs. Defining mineral Safeguarding Areas carries no presumption that the mineral resources will be worked, merely that the location of the mineral is known. Rather, mineral Safeguarding Areas should be considered as a form of constraint area to ensure that the presence of mineral resources is adequately and effectively considered in planning decisions.

4.2.40 The aggregate mineral resources identified for safeguarding on the Proposals Map are the Nationally and Regionally Important primary aggregate mineral resources identified on the Aggregates Safeguarding Map of Wales November 2012. Non-aggregates minerals identified on the National Minerals Map of Wales 2010 have not been safeguarded with the exception of Coal resources.

4.2.41 Coal resources identified for safeguarding on the Proposals Map are the Primary and Secondary Shallow Coal Resources. All primary and secondary coal resources are safeguarded outside built up areas. The main coal resource in the

planning area is in the Upper Swansea Valley around Ystradgynlais. A small area of tertiary Coal lies near Coedway in Montgomeryshire.

4.2.42 Satisfactory prior extraction of a mineral resource before incompatible development occurs should include extraction within a reasonable timescale and without having unacceptable environmental impacts. Proposals to reuse the mineral resource (for example sand and gravel) within the proposed development to minimise the need to import minerals over long distances would be supported.

#### **Policy DM8 - Existing Mineral Workings**

**Buffer zones have been identified around mineral working sites. Within buffer zones proposals for new development will only be permitted where it is demonstrated that:**

- i. The development does not sterilise safeguarded mineral resources;**
- ii. The proposal would not constrain the operations of the mineral site;**
- iii. The proposal would not be unacceptably affected by the mineral extraction operations at the site; and**
- iv. The proposal can demonstrate the appropriate mitigation measures.**

4.2.43 The minerals sites and buffer zones are shown on the proposals map and relevant inset maps. The purpose of buffer zones is two-fold: (i) to protect sensitive development from the impacts of mineral operations by ensuring mineral operations do not encroach too close to sensitive development; and (ii) to protect mineral operations from new sensitive development locating too close and potentially impacting on the operator's capacity to carry out permitted mineral operations without causing nuisance. The distances used are a starting point and may be refined depending on local environmental considerations at planning application stage. The extent of the buffer zone is based on national guidance which is 100m for sand and gravel pits, 200m for hard rock quarries and 500m for coal sites.

#### **Policy DM9 – Contaminated and Unstable Land**

**Proposals on contaminated or unstable land will be permitted where they do not:**

- i) Result in any additional problems of ground instability or contamination either on or off site and shall remediate the contamination / instability.**
- ii) Unacceptably adversely affect public health and safety, nature conservation, historic or archaeological interests**

4.2.44 Contamination and land instability can present risks to human health, property and the environment, and long term limitations on the use of soils. For further information and advice refer to PPW Chapter 13. Development proposals will be assessed to ensure that any risks from hazards such as subsidence, mine and landfill gas and leachate emissions, landslips or rockfalls are acceptable and addressed.

4.2.45 Similarly development should not harm the environment through pollution or contamination. For instance, petrol interceptors may have to be fitted to storm

water drains in new estates. Development may offer the opportunity to remediate land that is already contaminated.

4.2.46 Ground instability is often associated with sites that have been the subject of waste disposal operations or areas where past mineral workings have taken place. Consultation will be undertaken with the Mineral Valuer / Coal Authority on appropriate applications lying in the Ystradgynlais area of the South Wales Coalfield to assess the extent of risk to the development from former mineral workings.

4.2.47 Responsibility for determining the extent and effects of instability, contamination and other risks lies with the developer, who must ensure that land is suitable for the development proposed. Once contaminated land has been remediated the developer must submit a validation report to the Council confirming that the land is no longer contaminated; this will allow the Council's records to be updated.

### **Policy DM10 – Amenities**

**All proposals for development will be permitted where the amenities enjoyed by the occupants or users of nearby or proposed properties shall not be unacceptably affected by levels of noise, dust, air pollution, litter, odour, hours of operation, overlooking or any other planning matter.**

4.2.48 Development must respect the existence and amenities of neighbouring uses including approved development. These amenities include overlooking, light (natural and man-made), noise (including that which arises from hours of operation), air quality (odour, fumes and dust), and pests (vermin and birds attracted by litter). Key determinants of impact are scale of development, proximity, proposed land use and the massing of buildings on site. Existing operations and installations should also be protected from incompatible sensitive development. For example, operations from mineral workings produce noise or dust, and these operations would be prejudiced if noise sensitive uses were allowed nearby.

### **Policy DM11 - Protection of Existing Community Facilities and Services**

**The loss of the following existing Community Facilities and Services will only be permitted as follows:**

**(a) An existing community or indoor recreation facility where it can be demonstrated that:**

- i. Appropriate alternative provision is to be made available or the potential for continued use is no longer viable; and**
- ii. Alternative solutions to support the long term use of the facility for the community have been adequately explored.**

**(b) An existing neighbourhood shop, village shop, public house or service where it can be demonstrated that:**

**i. The premises have been for sale or vacant for a prolonged period and genuine attempts at marketing the existing use during that time have been unsuccessful.**

**ii. Alternative solutions to support the long-term economic viability of the business have been demonstrated to be adequately explored.**

4.2.49 Proposals that would result in the loss of community facilities and indoor recreation should be justified. Alternative solutions should be considered unless it can be proven that continued provision is not economically viable.

4.2.50—Given their importance, the Council recognises the need to retain existing neighbourhood and village shops and services. A flexible approach to the use of existing premises can help sustain much needed facilities and it may be appropriate for a local village pub to operate as a village shop or sub-post office. This may reduce the need for local people to travel long distances in search of essential services, and at the same time may provide additional revenue for the business. It may also be possible to secure the long-term viability of the business through alternative business models such as community ownership. A prolonged period for marketing purposes is defined as at least 6 months.

#### **Policy DM12 – Transport Requirements for New Development**

**Proposals for new development must meet highway access requirements and vehicular parking standards and must incorporate the access needs of all transport users, especially pedestrians and cyclists and those with disabilities or mobility impairment. Proposals considered to generate significant amounts of travel or traffic will only be considered where they include a satisfactory Transport Assessment and/or a Travel Plan.**

4.2.51 Highway access and parking requirements are important considerations for most developments, especially the implications they have for highway safety, the environment, local communities and the economy.

4.2.52 All proposals that the Council considers would generate significant traffic will require a Transport Assessment and or a Travel Plan. This process seeks to assess the transport implications of new developments, to reduce the reliance on travel by private cars and to promote sustainable modes of transport. The need for and scope for an Assessment or Travel Plan should be agreed with the Council as early as possible in the planning process.

4.2.53 Where considered appropriate planning obligations may be sought in accordance with Policy DM1 – Planning Obligations. Proposals that generate significant travel demands will only be permitted where adequate public and other sustainable forms of transport are incorporated as part of the proposal and are consistent with the role and function of the transport network.

4.2.54—Further guidance is provided by PPW, TAN18: Transport, the Wales Parking Standards 2008, the Council's Design Guide for Industrial and Residential Infrastructure, Manual for Streets and Manual for Streets II.

#### **Policy DM13 – Utility Requirements for New Development**

**Proposals for development must ensure adequate utility services exist or will be provided readily and timely without unacceptable adverse effect on the surrounding environment.**

4.2.55 Utility infrastructure encompasses services such as water supply, sewerage treatment, electricity and gas supplies, and telecommunications. Responsibility for the supply and maintenance of existing services rests with a mix of statutory undertakers and private companies. Where possible, developments should be connected to the existing infrastructure but in locations where there is no spare capacity, future development will be constrained until the capacity is increased or a satisfactory alternative can be found. Where off-mains extensions and/or mains capacity increases are required to service proposed new development, all works and improvements will be provided at the developer's costs in accordance with Policy DM1 – Planning Obligations. In these circumstances, satisfactory arrangements should be made between utility companies and the developer for aftercare and maintenance of the works. Utility companies have been consulted at an early stage in the LDP process and this information has been used to inform the LDP's distribution of housing, employment and other land use allocations. Site specific utility issues and constraints are included in the allocations table of this plan (refer to Appendix 1). Any matters identified will need addressing as part of the development of this land.

4.2.56 Utility companies serving Powys are encouraged to undertake necessary improvements and operational developments throughout the Plan Area. Where the Council is consulted on operational works or planning permission is required by Council, it will emphasise the need to safeguard and protect both the built and natural environment. Utility service improvements such as overhead lines, pipelines and telecommunications developments can provide much needed access to broadband coverage for example which is vital to the sustainability of rural communities and economies. These developments need to balance service provision needs with the protection of the environment and are subject to the relevant Development Management Policies of this plan.

4.2.57 PPW requires development plans to consider both the siting requirements of utilities to enable them to meet the demands that will be placed upon them, and the environmental effects of such additional uses. Further, TAN 19 – Telecommunications provides guidance on telecommunications development including consultation, environmental and health requirements. All utilities development must be in accordance with PPW Chapter 12 – Infrastructure.

4.2.58 In accordance with the Water Industry Act 1991 relevant water companies have a duty to provide a wholesome supply of mains water to serve new development. Exceptions exist for elevated positions at a height greater than water will flow by gravity from the source. However, it is noted that water companies are not obliged to make supplies available for non-domestic use. A golf course for example will need to use a private water supply for irrigation (which may require licencing) as the use of potable water for irrigation will not be supported. If public water mains are not available, for example in rural locations, alternative sources and their impacts will be considered, but in all cases the Council must be satisfied that

any source is wholesome and adequate. The Council will also have regard to relevant River Basin Management Plans and water supply advice provided by Natural Resources Wales.

4.2.59 All new development should be connected to the public foul sewerage system. Development will not be permitted unless foul sewers and sewerage treatment works of adequate design and capacity are available or will be provided in time to serve the development. This will avoid any risk of polluting the environment. Any non mains sewerage proposal must comply with Welsh Circular 10/99 Planning Requirement in Respect of the Use of Non-Mains Sewerage incorporating Septic Tanks in New Development and demonstrates that the quality of surface and ground waters will not be adversely effected (in line with Water Framework Directive objectives).

#### **Policy DM14 - Development in Welsh Speaking Strongholds**

**Planning Applications for 10 or more dwellings within or adjoining in the following settlements (as identified on the proposal maps) will be required to submit a Language Action Plan setting out the measures to be taken to protect, promote and enhance Welsh Language and Culture:**

<b>Towns</b>	<b>Llanfair Caerieinion, Llanfyllin, Machynlleth and Ystradgynlais</b>
<b>Large Villages</b>	<b>Abercrave, Coelbren, Llanbrynmair, Llangynog, Llansantffraid-ym-Mechain, Llansilin, Pontrobert, Penybontfawr and Trefeglwys</b>

4.2.60 Welsh language and culture are important planning considerations in Powys. The future of Welsh language and culture will depend on a wide range of factors including education, demographic change, community activities and a sound economic base to maintain thriving sustainable communities.

4.2.61 Levels of Welsh language use vary across the county with higher usage found in the north-west and south-west. Community Council Areas where more than 25% of the population speak Welsh (2011 census) are recognised by the plan as areas where the Welsh language is a significant part of the social fabric of some or all of these communities. It is these areas which have shown the most significant decreases in the number of Welsh speakers in recent decades. Welsh language and culture in Powys and how to plan for its protection and enhancement is considered in detail in the Welsh Language and Culture Topic Paper.

4.2.62 The Sustainability appraisal of the plan included an assessment of the likely significant effects of the plan on the use of Welsh language in Powys. In accordance with Technical Advice Note 20, the Sustainability Appraisal of the Plan assessed the impact of the spatial strategy, policies and allocations on the Welsh language and was found to have an overall positive impact.

4.2.63 In conjunction with the Sustainability Appraisal of the plan a Welsh Language Impact Assessment was also undertaken. This assessment forms part of the Sustainability Appraisal and was undertaken to help understand the likely

impacts of new housing development on Welsh speaking communities including impacts on the character and linguistic balance of a community associated with new housing development. Refer to The Powys Local Development Plan – Welsh Language Impact Assessment of Communities in the Upper Swansea Valley (June 2013) for further information. The assessment concluded that should a development proposal be likely to affect a local concentration of Welsh speakers then this would need to be assessed and if necessary mitigated using methods identified in the assessment.

4.2.64 The plan supports Welsh language and culture across the entire County by being centred on a spatial strategy that guides and distributes development to sustainable locations in accordance with its objectives and Strategic Policy SP1 - Settlement Strategy and by providing policy support for building strong local economies, providing appropriate housing provision, distribution and choice including affordable housing, and by protecting built heritage and existing community facilities and services.

4.2.65 In addition to this county wide policy approach evidence suggests that new large housing developments have the potential to affect local concentrations of Welsh speakers. The Council therefore considers that new housing development of 10 or more dwellings in higher tier settlements located within Community Council areas where more than 25% of the population speak Welsh has the potential to have a detrimental impact on Welsh language and culture.

4.2.66 Housing development proposals in these locations will need to be accompanied by a Language Action Plan setting out the measures to be taken to protect, promote and enhance the Welsh Language. Planning Obligations will be sought by agreement with applicants where necessary in accordance with Policy DM1 – Planning Obligations.

4.2.67 Details of Language Action Plan requirements and appropriate Welsh language and culture mitigation measures will reflect the key findings and recommendations of the Welsh Language Impact Assessment and explained further in Planning Obligations – Supplementary Planning Guidance. Examples of appropriate mitigation measures could include support and funding for Welsh language and culture initiatives and projects or phasing of new housing development.

4.2.68 All advertisements, place names and signage within these settlements must be bilingual in order to protect local linguistic character, tradition and promote cultural distinctiveness.

### **Policy DM15 – Design and Resources**

**The design, layout size, scale, mass and materials of all new development shall:**

**(a) Complement and where possible enhance the character of the surrounding area and support community safety and crime prevention;**

**(b) Include adequate amenity and / or open space, as appropriate; and**

**(c) Demonstrate a sustainable and an efficient use of resources by including measures to achieve:**

- i. Energy conservation and efficiency.**
- ii. The supply of electricity and heat from renewable sources.**
- iii. Water conservation and efficiency.**
- iv. Waste reduction.**

4.2.69 The appearance of a development, its scale and its relationship to its surroundings are key considerations when determining a planning application. Early consideration of design, well in advance of any planning application, is essential to achieving good design. TAN12 provides further guidance.

4.2.70 A design process should comprise the following stages:

**Site appraisal** - This will include looking at the topography, landscape, built form, aspect, views into and out of the site, access, neighbouring uses and microclimate. All of these key issues will inform the scale, density, orientation, layout, height, accessibility, design and massing of the new development.

**Concept plan** - Using the site appraisal, a concept plan should be drawn up as a draft annotated layout of the proposed development. Designing out crime and energy efficiency principles should also be considered at this stage. The concept plan can be used for pre-application discussions with stakeholders.

**Detailed plans, drawings and design statements** - After the above stages, detailed drawings can then be drawn up together with a design statement and submitted to the Council for consideration.

4.2.71 The development design should include the following elements:

- It should complement its environs and contribute positively to the character (local distinctiveness and sense of place).
- It should provide natural surveillance over publically accessible open space to encourage opportunities for play and to deter criminal activity.
- Important trees, hedgerows, stone walls, open spaces and other local features that contribute significantly to the biodiversity and quality and character of the local environment shall be safeguarded and, where practicable, enhanced.
- It should maintain the character and quality of the landscape and must be integrated into the landscape through planting and appropriate management of native species, or through the construction of boundaries and entrances which complement and enhance the character of the locality.
- The choice of materials must balance utility with appearance and cost.
- The development should incorporate an area(s) for passive, informal recreation appropriate to the scale and type of the proposal. Policy H14 requires open space to be considered as part of housing developments. This could include allotments and community growing spaces. The Open Space Assessment identifies existing provision for the different categories of open space for towns and large villages. Where there is an existing shortfall in provision, there will be a need to make the required provision for that particular category. Where there are multiple deficiencies, an assessment will be made as to which categories will be prioritised. The long term aftercare and maintenance of open spaces requires full consideration. Due to the current economic climate the County Council is unable

to take on this role and it should not be assumed that the local Community Council will take on the responsibility. Options such as residents associations with the Community Councils backing should be explored. Further details on the approach to be taken in relation to Open Space will be given in Supplementary Planning Guidance (SPG).

4.2.72 All development must be located and designed to contribute to the achievement of sustainable development and climate change mitigation by demonstrating sustainable and efficient use of resources. This can be achieved by incorporating:

- Energy conservation and efficiency.
- The supply of electricity/ heat from renewable and low carbon sources e.g. Solar panels, Solar Water Heating, Heat Pumps or Biomass (wood / pellet).
- Water conservation and efficiency.
- Waste reduction through re-use and recycling e.g. materials recovered from the site should be re-used.
- Layouts designed to achieve passive solar gain.
- Planting and landscaping schemes which support pollinators (bees) and provide food.

#### **Policy DM16 - Protection and Enhancement of the Historic Environment**

Development proposals which impact upon the following historic environment features shall protect, preserve and/or enhance those features and contribute to preserving local distinctiveness and sense of place and shall meet the following criteria:

~~All proposals shall protect, preserve and/or enhance the Historic Environment and contribute to preserving local distinctiveness and sense of place.~~

1. Development proposals must not unacceptably adversely affect, either on their own or in combination with existing or approved development, the following sites and features, including their essential settings and significant views into and out from:

- i. Scheduled Ancient Monuments.
- ii. Listed Buildings.
- iii. Conservation Areas.
- iv. Registered Parks and Gardens of Special Historic Interest.
- v. Historic Battlefields.
- vi. Registered Landscapes of Outstanding and Special Historic Interest.

Proposals relating to, or affecting, the above sites and features of the historic environment will be assessed in accordance with national guidance and legislation. Proposals should also have regard to other non-designated heritage assets of significance, including any locally listed buildings, and their settings.

**2. Proposals within or affecting important areas of the historic environment shall be designed to integrate with the surrounding area and shall reflect the locally distinctive architectural and historical identity and qualities of the area.**

4.2.73 This policy addresses LDP Key Issues 14 and 15 and Objective 13. The historic environment forms an important part of the County's unique character. Heritage assets are valuable non-renewable resources which are essential for education, leisure and the economy. As well as adding to the quality of the environment for local people, the historic environment of the County creates a significant attraction for tourists and inward investors and therefore makes a valuable contribution to the local economy.

4.2.74 The Council's objectives in respect of the historic environment are to safeguard the cultural integrity of the historic settlements and buildings within the Plan area and to encourage the enhancement of the historic environment. The County's historic sites, features, townscapes and landscapes should be treated as assets, and should be positively conserved and enhanced for the benefit of residents and visitors alike.

4.2.75 Many elements of the County's historic environment are protected through national legislation and guidance, and as such do not require specific policies in the LDP. The Council expects all development proposals to plan positively for all aspects of the historic environment, whether statutorily protected or not, including non-designated assets such as locally listed buildings, and regard should also be given to the information held on the Historic Environment Record. Supplementary Planning Guidance will be prepared in relation to these non-designated aspects of the historic environment following adoption of the LDP.

4.2.76 The Council also aims to promote and reinforce local distinctiveness within Powys. Proposals will be expected to be designed to respect and enhance the local distinctiveness of the area, particularly within areas recognised for their landscape, townscape or historic value, and areas where there is an established and distinctive design character. This can be achieved through promoting sensitive and innovative design approaches, paying particular attention to local building materials and methods, and to the proportions and layout of historic buildings and features within the local context.

### **Policy DM17 - Protection of Existing Employment Sites**

**The loss of existing sites and buildings in economic use will only be permitted if the proposed use would not:**

- 1. Prejudice the use of surrounding employment sites / buildings; and / or**
- 2. Lead to an under provision of employment use within the sub / local area as identified in the Employment Needs Assessment or Table E1 of the LDP.**

4.2.77 The LDP seeks to ensure an appropriate supply of employment land and buildings across the Plan area to ensure that the economic needs of the County are addressed. However, there can be pressure to release employment land and

buildings to other uses that provide higher land values such as residential or retail uses. Employment land and buildings must be retained unless it can be demonstrated that the loss of the land or buildings does not prejudice the ability of the sub / local area to meet local employment needs. In addition, the loss of an employment site will be resisted where it would have a detrimental impact on the settlement's role in the settlement hierarchy. Further policy and guidance on the retention and release of existing employment sites is contained within national guidance Technical Advice Note 23, (Para 4.6).

<b>Focussed Change: FC16</b>	<b>Section: Paragraph 4.4.1</b>
<b>Reason:</b> To address poor design which does not reflect Powys historical local design and vernacular especially in small market towns where they need to sensitively blend with their environment. (Rep 5197.V18).	

Amend Paragraph 4.4.1 to include the following additional wording:

4.4.1 The following section deals primarily with traditional employment land uses (B1, B2 and B8 use classes). Other economic sectors such as tourism, energy and retail uses are included within separate sections of the Plan. The LDP provides opportunity for all scales of employment uses. Employment development proposals on all sites should seek to reflect the character of the towns, villages and countryside settings in which they are located and will be considered against the relevant policies in the LDP.

<b>Focussed Change: FC17</b>	<b>Section: Policy E1</b>
<b>Reason:</b> Consequential change to reflect the amended employment land provision.	

To amend Policy E1 as follows:

**Policy E1 - Employment Proposals on Allocated Employment Sites**

**49 45 hectares** of land have been allocated employment development, as identified on the Proposals / Inset Maps.

**Proposals for B1, B2 and B8 employment development on these sites will be permitted where they comply with the category of the site and permitted uses of the site as identified in the Employment Site Allocation Table E1.**

**Where appropriate other employment uses may be permitted on allocated employment sites where the proposed development complements and enhances the site's role as identified in the Employment Site Allocation table.**

<b>Focussed Change: FC18</b>	<b>Section: Paragraphs 4.4.4 - 4.4.5</b>
<b>Reason:</b> To provide greater support for micro and small employment opportunities able to use existing buildings. Rep 482.V1.	

To amend paragraphs 4.4.4 and 4.4.5 as follows:

4.4.4 Given the dominance in the Plan area of micro and small businesses dispersed over a large geographic area it is evident that not all employment proposals will be appropriately accommodated on allocated employment sites. Policy E2 therefore supports the economy by enabling the provision of economic opportunities on non-allocated sites, **including the development of new small businesses** and in so doing it will address any local need for neighbourhood employment accommodation.

4.4.5 In addition, the appropriate expansion or modernisation of existing businesses in-situ is supported to reduce the inconvenience and disruption of moving, whilst retaining the source of employment within the local community. The provision of new employment proposals within the open countryside is also supported where it can be demonstrated that such a location is justified by the nature of the proposal. Such employment proposals may include farm diversification **proposals** **or the reuse of existing buildings**.

<b>Focussed Change: FC19</b>	<b>Section: Table E1</b>
<b>Reason</b>	
<ul style="list-style-type: none"> <li>• <b>Abermule Business Park</b> - To provide greater flexibility for land use at Abermule but maintain preference for higher quality employment use, and to ensure minimal visual impact at local sites within the B1, B2, B8 usages. Rep 542.V6.</li> <li>• <b>Site allocation numbers</b> - Table E1 should include site allocation reference numbers for clarity. Rep 1084.V17.</li> <li>• <b>St Giles Golf Course</b> – Delete as site will not be coming forward in Plan Period.</li> <li>• <b>Total Employment Allocation Ha</b> - Consequential change to reflect the amended employment land provision. Site allocations (ha) have also been re-measured and amended as necessary.</li> </ul>	

To amend Table E1 as follows:

### **Table E1 - Employment Site Allocations**

Allocated employment sites have been grouped into categories that reflect the nature of the site and the potential future uses. These categories, which reflect best practice and current thinking in adjoining authorities, are:

- **Prestige Sites:** Strategically located sites in the regional context offering medium to large scale employment opportunities for primarily B1 Uses and characterised by a high quality environment.
- **High Quality Sites:** Smaller sites of regional significance offering small to medium sized employment opportunities for B1, B2 and B8 Uses in high quality surroundings that are well positioned in relation to the County’s main road and transport infrastructure.

- **Local Sites:** Sites for B1, B2 and B8 Uses providing a varied industrial and / or employment setting with **minimised visual impact (for example, screening)** yet located within close proximity to the main road and transport infrastructure as well as centres of population. These sites primarily serve a local market and may include local office developments.
- **Mixed Use Sites:** Sites where employment led mixed use proposals are supported in order to stimulate private sector investment and development.

**Table E1 – Employment Site Allocations**

**Focussed Change: FC20**

**Section: Policy E4 and Paragraphs  
4.4.10 - 4.4.11**

**Reason**

- Add “wellbeing” to designation to provide wider scope for the development of the park and bring benefits to the residents of Powys. Rep 6230.V1.
- **Paragraph 4.4.11** - To ensure the LDP addresses matters raised by LDP representations (27.V5, 27.V24, 6235.V2), in order to reflect a more holistic approach to the protection of the historic environment and to ensure the LDP meets the soundness tests. Rep 27.V1
- **Paragraph 4.4.11** - To ensure the LDP addresses any potential effects upon surrounding settlements, infrastructure and designated landscapes. Rep 1034.V7.
- **Paragraph 4.4.12** - To ensure that any proposed development of the Bronllys Hospital Site undertakes the appropriate environmental assessments. Rep 5197.V21.

Amend wording of Policy E4 and paragraphs 4.4.10 & 4.4.11, and insert new text, as follows:

**Policy E4 – Bronllys Health Park**

**Proposals to develop the site of Bronllys Hospital as a Health & Wellbeing Park will be supported.**

4.4.10 During the Plan period, it is expected that parts of the Bronllys Hospital site will become available for alternative uses. Considerable engagement has taken place to identify the future role for the site and its buildings, and the concept of a ‘health & wellbeing park’ is widely supported.

4.4.11 The LDP has not allocated land at the hospital for housing or employment, but where proposed as part of any future plans, these will be considered against relevant policies in the LDP. The site contains important built-heritage assets which should be protected in accordance with Policy DM16 including two listed buildings and a registered historic park and garden. Any development proposal will need to refer to an agreed joint development brief with BBNPA prior to adoption as SPG, which may include limitations or conditions on permissible uses. Applications will need to take account of any potential wider impacts upon the settlements of Bronllys and Talgarth and the surrounding area including the transport network and the Brecon Beacons National Park.

4.4.12 Any potential development as well as taking account of the site heritage, will need to take of any natural heritage and undertake ecological and Habitats regulations Assessments

<b>Focussed Change: FC21</b>	<b>Section: Policy T1 and paragraph 4.5.3</b>
<b>Reason:</b> To ensure clarity, to ensure the LDP addresses matters raised by LDP representations (Repn: 6333.V1 & 6325.V18) in order to ensure the LDP meets the soundness tests and to reflect National Planning Policy. Plus minor editing corrections.	

## 4.5 Transport

### Policy T1 – Transport Infrastructure

Transport infrastructure and traffic management improvements will be permitted where they support Welsh Government priorities for promoting growth and sustainable jobs, tackling poverty, and ensuring sustainable rural communities. In particular this would be where such measures:

1. Improve the safety of transport users, especially those making 'active travel' journeys by walking or cycling.
2. Reduce traffic congestion and/or improve the local environment.
3. Reduce demand for travel by private transport.
4. Provide, promote and improve sustainable forms of travel.

4.5.1 This policy seeks to support the coordination of a wide range of traffic management measures and transport interchange developments that will maximise the efficiency and safety of the transport system including road, rail, pedestrian and cyclist travel networks and connections.

4.5.2 Appropriately located public transport interchange developments support sustainable travel and can reduce the demand for travel by private car. Developments that support public and private transport integration, such as Park and Ride/Share Schemes and Bus Stops that complement the use of local and national bus or rail services, taxi ranks and train and bus stations will be supported.

4.5.3 Proposals that benefit rail passengers operations and proposals that support rail freight opportunities opportunities will be encouraged. Transport policy applicable to all developments including the safeguarding of key transport corridors, the requirements for transport assessments and travel plans, and access and parking requirements are addressed in by the Development Management and Strategic Policies DM1 and DM2.

<b>Focussed Change: FC22</b>	<b>Section: Policy H1, Paragraph 4.6.1</b>
<b>Reason:</b>	
<ul style="list-style-type: none"> <li>• To ensure the LDP addresses matters raised by LDP representation 78.V3, to remove detailed reference to affordable housing requirements in respect of open market housing developments which repeats the requirements of policy H4, and to improve clarity and understanding by amending the supporting text to Policy</li> </ul>	

H1 to make clearer cross reference to the allocated housing sites which are shown in the schedule in Appendix 1 and which will deliver much of the housing. Changes proposed in order to ensure the LDP meets the soundness tests.

- “Village plan” in 2. i) has been amended to “village action plan” so that the terminology aligns with that found in national policy (TAN12 -- Design) regarding area specific SPG.
- Consequential changes in opening paragraph of Policy H1 and Paragraph 4.6.1 to reflect the amended housing provision and dwelling requirement figures in light of further evidence and updating.

Amend policy H1 and insert additional paragraph (4.6.1a) after paragraph 4.6.1 in reasoned justification as follows:

### **Policy H1 - Housing Provision**

Over the Plan period 2011-2026, the LDP will seek to maintain a 5 year supply of land for housing and provides land for 6,071 dwellings to meet the dwelling requirement of 5,519 additional dwellings.

Housing development will be supported in the following ways:

#### **1. In Towns and Large Villages:**

- On sites allocated for housing and other suitable sites within the development boundary. Open market housing will be subject to an appropriate contribution towards affordable housing in accordance with Policy H4.**
- On sites forming logical extensions outside development boundaries for affordable housing in accordance with Policies H5 and H6.**

#### **2. In Small Villages:**

- On small infill gaps between existing dwellings capable of accommodating 1 or 2 units; or in suitable larger infill gaps where identified in a village action plan prepared by a community and adopted as SPG. Infill open market housing will be subject to an appropriate contribution towards affordable housing in accordance with Policy H4.**
- On sites forming minor logical extensions to small villages for affordable housing in accordance with Policies H5 and H7.**

#### **3. In Rural Settlements and the Open Countryside:**

- In rural settlements, single rural affordable homes to meet local needs in accordance with Policy H7.**
- Rural enterprise worker dwellings, One Planet developments and the conversion of rural buildings in accordance with national policy.**
- Renovation of former abandoned dwellings in accordance with Policy H11.**

4.6.1 Policy H1 seeks to deliver 5,519 dwellings, the identified dwelling requirement over the plan period 2011-2026. This provision equates to an average completion rate of 368 dwellings per annum.

4.6.1a. The development of allocated housing sites will contribute to the achievement of Policy H1. Housing land allocations have been made for large housing sites (>5 dwellings) in Towns and Large Villages as set out in detail in Appendix 1 (Settlement Allocations Table). Allocated housing sites comprise both new LDP housing sites (referenced HA) and existing committed housing sites with planning permission (referenced HC). Additionally a proportion of new housing will arise on allocated Mixed Use (MUA) sites. Appendix 1 sites are calculated to have capacity to provide 3,767 dwellings. Further detail on the selection of sites can be found in the Topic Paper "Candidate Sites Process and Site Assessment Methodology" (2015).

<b>Focussed Change: FC23</b>	<b>Section: Policy H2</b>
<b>Reason:</b> To ensure the LDP addresses matters raised by LDP representations 78.V6, to provide clarity on the requirement for development briefs to be prepared for certain types of sites/certain sites in order to ensure the LDP meets the soundness tests.	

Insertion of additional criterion 4 in Policy H2 as follows:

### **Policy H2 - Housing Delivery**

- 1. Housing development must be of an appropriate scale and shall:**
  - i. Provide a suitable mix of housing types to meet the range of identified local housing needs.**
  - ii. Be phased if appropriate to reflect the context of the development and mitigate its impact on the local community.**
- 2. Applications to develop parts of sites must not prejudice the development of the remainder of the site or seek to avoid planning obligations.**
- 3. Applications to vary or renew a planning permission will only be permitted where justified and supported by evidence demonstrating that the proposal complies with the current Development Plan policies, is deliverable and likely to be delivered within the next 5 years or the remainder of the Plan period, whichever is the longer.**
- 4. Applications for large or mixed use developments or the development of certain sensitive sites may be required to be preceded by a development brief which has been prepared by the developer and agreed by the Council and which establishes how the site is to be developed in accordance with this policy.**

<b>Focussed Change: FC24</b>	<b>Section: Policy H4 Criterion 2</b>
<b>Reason:</b> To ensure that the LDP addresses matters raised by LDP representation (78.V4) in	

order to ensure the LDP meets the soundness tests. The target contributions in the first instance should be met as those targets have been derived from the Council's own viability assessment that will be the subject of the Examination.

To ensure that the LDP addresses matters raised by LDP representation (1084.V4). It had been decided at the deposit stage of the LDP to reduce the requirement from 30% to 20% in the Central Powys area on the basis that the Council would adopt CIL. Since the deposit stage the Council has decided not to take the CIL approach at this stage although this position may change in the future. Consequently, the Council is proposing to raise the level of contribution from 20% to 30 % in the Central Powys area in accordance with the findings of the Viability Study.

Amend criterion 2 of Policy H4 as follows:

**Policy H4 - Affordable Housing Contributions**

1. In accordance with the evidence of local housing needs endorsed by the Council, a contribution towards affordable housing will be required from open market housing development of 5 or more dwelling units or 0.25 ha and above.
2. The target contributions required for each Price Area, ~~subject to detailed viability assessments,~~ are as follows:
  - a. Central Powys – ~~20%~~ 30% contribution.
  - b. Severn Valley – 20% contribution.
  - c. Rural North - 10% contribution.
  - d. South West/Ystradgynlais – 10% contribution.
3. In Towns and Large Villages, where the contribution equates to:
  - a. 1 whole unit, the contribution will be required as on-site provision.
  - b. Less than 1 whole unit, a financial contribution will be required.
4. The contribution may be either on-site provision or a financial contribution in:
  - a. Small Villages
  - b. Residential conversions and subdivisions in all levels of the Settlement Hierarchy.

<b>Focussed Change: FC25</b>	<b>Section: Policy H6</b>
<b>Reason:</b> To ensure that the LDP addresses matters raised by LDP representations (542.V15, 1034.V4, 6207.V4, 6204.V4, 1084.V6) in order to ensure the LDP meets the soundness tests. It is agreed that the policy is not in conformity with national planning policy as stated in para. TAN 2 and therefore should be deleted to ensure the LDP reflects National Planning Policy / Guidance.	

Delete Policy H6 and paragraphs 4.6.22 – 4.6.25 as follows:

~~**Policy H6 - Affordable Housing on Enabled Exception Sites**~~

To meet a proven, unmet local need for affordable housing, the development of affordable housing will be permitted as an exception only in Towns and Large Villages on sites which form a logical extension, and adjoin or are in close proximity to the development boundary.

The development of enabled exception sites will be permitted where all of the following criteria are met:

- i. The scale of development is commensurate to the settlement size and must accommodate at least 5 dwellings.
- ii. The affordable housing or plots are developed by or transferred to a Registered Social Landlord, or an equivalent organisation or the Strategic Housing Authority.
- iii. The tenure and size of the affordable housing must correspond to the evidence of local housing needs, with the dwelling size not exceeding 115 sqm.
- iv. A minimal number of open market dwellings, if included, are provided by either:
  - a) A Registered Social Landlord or equivalent organisation where the ratio of open market to affordable dwellings is demonstrated as key to the site's viability without Social Housing Grant; or
  - b) A non-Registered Social Landlord where one open market dwelling should enable the provision of at least four affordable dwellings.

4.6.22 — Policy H6 enables the release of exception sites which have not come forward for reasons of viability or hope value. Policy H6 responds to evidence that the traditional exception site policy is undeliverable in certain locations, particularly those in low Acceptable Cost Guidance (ACG) community bandings. This policy follows the advice of para 4.2.2 of TAN 6 July 2010 which states that, "Planning authorities should employ all available policy approaches, in an innovative way, to maximise the supply of affordable housing as defined in TAN2".

4.6.23 — Where an exception site is proposed by a non-RSL, in order to incentivise the release of land, the number of open market to affordable dwellings must not exceed a ratio of 1:4. Therefore, regardless of the total number of units on the site, only one open market unit will be permitted to incentivise the release of the land. There must be a minimum of four affordable dwellings or serviced plots provided, meaning that the total number of units on the site must be five or more.

4.6.24 — Where an exception site is proposed by an RSL or equivalent organisation, the inclusion of a minimum amount of market housing to make the scheme viable allows financing of exception schemes without social housing grant (SHG). SHG continues to diminish making the availability of grant funding for exceptions sites less likely.

4.6.25 — This type of exception site will not be supported in Small Villages or Rural Settlements as they are not considered suitable locations for the scale of housing supported by the Policy. Furthermore, RSLs do not generally have the capacity to develop and manage small sites in rural locations. Policy H7 addresses local affordable housing needs in these settlements.

<b>Focussed Change: FC26</b>	<b>Section: Policy H7, Criterion 4</b>
<b>Reason:</b> To ensure that the LDP addresses matters raised by LDP representation (1084.V5) in that only specific permitted development rights relating to floorspace increases should be withdrawn.	

Amend Criterion 4 of Policy H7 as follows.

**Policy H7 - Rural Affordable Homes**

To meet a proven, unmet local need for affordable housing, the development of single Rural Affordable Homes will be permitted on sites integrated within or forming minor, logical extensions in Small Villages or Rural Settlements subject to the following criteria:

1. Dwelling size is restricted to an affordable size of a maximum of 115sqm when measured externally excluding outbuilding or garage.
2. Plot size including gardens and ancillary land shall not exceed 0.1ha (1000sqm).
3. A single outbuilding / garage whether integral or not should be single storey and not exceed 15sqm.
4. Permitted development rights **for development that would increase the dwelling's floorspace** will be withdrawn.

<b>Focussed Change: FC27</b>	<b>Section: Paragraph 4.6.30</b>
<b>Reason:</b> To ensure that the LDP addresses matters raised by LDP representations (1034.V5) to address concerns that by allowing rural affordable homes that exceed the maximum floorspace set out within the policy, this could undermine the affordability of such dwellings. It is not considered to be necessary to make provision for exceptional circumstances within policy as such departures from adopted policy can be considered where material considerations indicate otherwise. The Council agrees to remove this paragraph from the supporting text of policy H7 in order to ensure the LDP meets the soundness tests.	

Delete Paragraph 4.6.30 as follows:

~~4.6.30 — Policy H7 intends to allow the development of homes for life and not solely starter homes. In exceptional circumstances where justified by a specific household's needs a higher floor space may be acceptable. Applications to extend affordable rural homes must be justified by evidence of need and should not make them unaffordable to future occupiers but ensure that the property continues to remain affordable in perpetuity.~~

<b>Focussed Change: FC28</b>	<b>Section: Policy H11, Criteria 2 &amp; 3</b>
<b>Reason:</b>	
<b>Criterion 2 -</b> To ensure the LDP addresses matters raised by LDP representation	

(27.V28), to ensure that reference is made to the architectural interest of the former dwelling, and to ensure the LDP meets the soundness tests.

**Criterion 3** - For clarity.

Amend criterion 2 and 3 of Policy H11 as follows:

**Policy H11 - Renovation of Abandoned Dwellings**

The renovation of abandoned dwellings in the open countryside for residential use will only be permitted where:

1. The dwelling has not been demolished or fallen into such a state of disrepair that it no longer has the substantial appearance or structure of a dwelling.
2. Any re-build shall be partial and sited within the footprint of the former dwelling and should make re-use, where practicable, of the materials and features used in of the former dwelling. The design of the renovated dwelling shall also take reference from either any recorded evidence of the architectural or archaeological interest of the former dwelling, or shall be reflective of the local vernacular.
3. The proposal shall not be more dominant in the landscape than the former dwelling and shall not have a detrimental effect on the character of the landscape or the open countryside.

<b>Focussed Change: FC29</b>	<b>Section: Paragraph 4.6.37</b>
<b>Reason:</b> To provide additional guidance on interpretation of criterion 2 of policy H12 to ensure the LDP meets the soundness tests. To ensure the LDP addresses matters raised by LDP representation (27.V28), to ensure that reference is made to the architectural interest of the former dwelling, and to ensure the LDP meets the soundness tests.	

Insert additional explanatory text in paragraph 4.6.37 as follows:

4.6.37 Partial re-build means that the re-build should not cover more than 70% of the external walls. Substantial appearance or structure means that the dwelling shall possess the fundamental characteristics of a dwelling including features such as walls, window and door openings, evidence of the roofing profile sufficient to identify roof height, shape and features. In order to ensure the sensitive renovation of the former dwelling, it is necessary to ensure that the materials and features of the former dwelling are, as far as possible, incorporated into the renovation. Reference should also be given to any architectural and archaeological interest of the former building in the design of the renovation, for which there may be evidence contained within the Historic Environment Record. Alternatively, and particularly in the absence of any recorded evidence of the design of the former dwelling, the renovated dwelling should be of a design that contributes to preserving local vernacular.

<b>Focussed Change: FC30</b>	<b>Section: Paragraph 4.6.38</b>
------------------------------	----------------------------------

**Reason** - To provide additional guidance on interpretation of criterion 2 of policy H12 to ensure the LDP meets the soundness tests.

Insert additional explanatory text in paragraph 4.6.38 as follows:

4.6.38 Policy H12 supports the replacement of existing habitable dwellings providing they respect the character of the area and do not result in development which is out of scale with the locality. **Where the dwelling to be replaced is considered to be of architectural, historic or local vernacular interest, there is a presumption against the replacement of such a dwelling, unless it is demonstrated, through the submission of structural and financial evidence, that the building is beyond realistic repair**

<b>Focussed Change: FC31</b>	<b>Section: Paragraphs 4.6.40 &amp; 4.6.41</b>
<b>Reason:</b>  <b>Paragraph 4.6.40</b> - Consequential change to reflect the amendments proposed to Section 4.2 of the LDP.  <b>Paragraph 4.6.41</b> – Updating amendment.	

Amend paragraphs 4.6.40 and 4.6.41 as follows:

4.6.40 Sites should be constructed in accordance with the standards set out for Gypsy and Traveller sites<sup>9</sup> and should also satisfy the criteria of **the Development Management Policies Policy DM1 and Policy DM2** to ensure acceptable design, security, landscaping, and screening to limit any adverse visual impact.

4.6.41 The Gypsy and Traveller Accommodation Needs Assessment 2007 identified a need for 14 pitches in South Powys. A permanent site on the edge of Brecon, within the BBNP, was compulsorily purchased by the County Council and construction completed in 2014 to meet this need. There is also an existing permanent site in Welshpool. The 2007 Assessment was updated in 2015 and further assessments will be prepared in accordance with the requirements of the Housing (Wales) Act 2014. The updated Assessment 2015 led to the need being identified for a permanent site in Machynlleth and a site has been allocated as allocation P42 HA4 on the inset map to meet this need in accordance with statutory requirements. **Please note that the precise location of the site within the allocation is to be determined.**

<b>Focussed Change: FC32</b>	<b>Section: Paragraph 4.7.11</b>
<b>Reason:</b> To provide greater clarity and the reason for distinguishing between Primary and Secondary frontages rather than 33% and 3 adjoining units for both categories and ensuring the retail function of town centres is protected and not	

<sup>9</sup> <http://wales.gov.uk/topics/people-and-communities/communitycohesion/publications/goodpractice/?lang=en>

compromised. Rep 439.V9.

Replace paragraph 4.7.11, and insert additional text (paragraphs 4.7.11a-c), as follows:

4.7.11 ~~As a guide, an unacceptable concentration of uses in Primary and Secondary Frontages is a concentration of more than three non-conforming uses in adjacent units or 33% of the frontage.~~ The policy allows and encourages a diversity of uses in Town Centres to increase their overall attractiveness for shopping, leisure and business purposes. The extent of non-retail uses will be controlled to protect the general retail character of central streets and maintain continuity of shopping frontages.

4.7.11a As a guide, at least 75% of units within the Primary Frontage should be retained for retail use (A1 & A3). Primary Frontages form the retail core of the town centre; here the majority of units should be retail. In the Primary Frontage the emphasis is on protecting and enhancing the shopping role. Change of use can result in concentrations of non-retail uses, which in a Primary Frontage can undermine the retail function of the centre. Any new development or change of use should therefore be able to demonstrate a contribution or enhancement to the shopping role. Non-retail uses should not be allowed to become concentrated within individual parts of the Primary Frontage in a way that could undermine the retail function.

4.7.11b Within Secondary Frontages at least 66% of the units should be retained within retail use (A1 & A3). Within Secondary Frontages the aim is to ensure that any change of use from retail does not harm the retail function. It is however recognised that these Frontages will have a greater mix of uses than that of a Primary Frontage and that those other uses provide vital services that have an important contribution to make to the vitality and viability of the town centre. Here the emphasis should be on retaining a balance of appropriate uses whilst maintaining a predominance of retail uses. When determining an application for a change of use from retail, consideration will be given to the cumulative effects of continuous blocks of non-retail within the designated area. Non-retail units should not account for more than 3 adjacent units.

4.7.11c A potential threat to the vitality, viability and attractiveness of town centres is that of 'dead shop frontages' within the main shopping frontages. These occur when uses that may not require an active daytime frontage (e.g. night clubs, restaurants, book keepers) are established. 'Dead shop frontage' can be avoided by incorporating an A1, or other use that requires an active daytime frontage, into the development. There may be a requirement that premises be open during the core retailing times in the interest of the vitality, viability and attractiveness of the affected frontage and town centre.

**Focussed Change: FC33**

**Section: Paragraph 4.7.14**

**Reason:** Allowing residential development above ground floor level is implicit in

Policy R2. The added sentence is to ensure clarity. Rep 542.V20.

Insert additional text in paragraph 4.7.14 as follows:

4.7.14 Proposals within a Town Centre Area must demonstrate that they enhance the vitality and viability of the centre. Therefore, conversion to residential use on a ground floor in a centre will not be supported in a Primary Frontage and is unlikely to be supported elsewhere in centres. Proposals for residential conversions on first floor level and above will generally be supported in line with the Development Management policies.

**Focussed Change: FC34**

**Section: Paragraph 4.8**

**Reason:**

**Paragraph 4.8** - Make heading match that of retail section above.

**Paragraphs 4.8.1A – 4.8.1C** - To provide introductory paragraphs to clarify the high value tourism potential of Powys (Rep 6307.V1). Added references to national policy for clarity.

Amend title of paragraph 4.8 and insert additional introductory text as follows:

#### **4.8 Planning for Tourism**

4.8.1A The high quality, beauty and variety of the Powys landscape, combined with its history and culture, create an area of great attractiveness which has huge potential for high value tourism. Tourism is one of the County's main employment sectors. It is an important component of the rural economy and can help to provide new jobs and it is therefore desirable to support appropriate tourism related developments in principle, whilst sustaining the outstanding natural beauty. One of the Objectives of the LDP is to sustainably develop Powys's tourism economy.

4.8.1B Relevant national guidance relating to tourism proposals include:

- PPW, Chapter 11 Tourism, Sport and Recreation;
- TAN 6: Agriculture and Rural Development ;
- TAN 13: Tourism; and
- TAN 16: Sport, Recreation and Open Space.

4.8.1C TAN 6 includes advice relating to diversification of farms and reuse/adaptation of rural buildings. TAN 16 covers leisure facilities forming part of a tourism development. No LDP policies have been included for off-road recreational vehicles or golf courses as they are adequately covered by the above national guidance. (TAN 16)

**Focussed Change: FC35**

**Section: Policy TD1**

**Reason:** To provide clarity with regards to the term “modest in scale” Replace with “where compatible in terms of location, siting, design and scale.” (Criterion i). Rep 6290.V1. Also to remove sense of being restrictive of permitting new tourism developments and allowing non-permanent developments (criterion iv added). Rep numbers: 542.V24, 6301.V1, 6360.V2.

Amend Policy TD1 as follows:

**Policy TD1 – Tourism Development**

**Development for tourist accommodation, facilities and attractions, including extensions to existing development, will be permitted as follows:**

1. Within settlements, where commensurate in scale and size to the settlement.
2. In the open countryside, **where compatible in terms of location, siting, design and scale modest in scale** and well integrated into the landscape so that it would not detract from the overall character and appearance of the area and **in particular** where:
  - i. It is part of a farm diversification scheme; or
  - ii. It re-uses a suitable rural building in accordance with TAN6; or
  - iii. It complements an existing tourist development or asset, without causing unacceptable adverse harm to the enjoyment of that development or asset; **or**
  - iv. It is not permanent in its nature.**
3. Accommodation shall not be used for permanent residential accommodation.

<b>Focussed Change: FC36</b>	<b>Section: Paragraph 4.8.2.</b>
<b>Reason:</b> To ensure clarity in justification text to remove sense of being restrictive of permitting new tourism developments and allowing non-permanent developments Rep 542.V24, 6301.V1, 6360.V2.	

Amend text of paragraph 4.8.2 as follows:

4.8.2 New tourist development is encouraged because of its contribution to the economy in terms of visitor spending, supporting local business and employment generation. However, the Council seeks to ensure that developments are sustainable **and respect the character of the Powys settlement hierarchy, landscape, natural environment, history and culture** and do not have an unacceptably adverse impact and effect upon the character and appearance of an area, the natural and historic environment or existing amenities, assets or designations. Non-permanent developments may, for example, include dark skies observatories or eco-friendly woodland camping sites.

<b>Focussed Change: FC37</b>	<b>Section: Paragraphs 4.8.4 &amp; 4.8.5</b>
------------------------------	--

**Reason** - To ensure clarity in justification text to link to DM (SP) policies and strengthen references to other tourism assets and their safeguarding. Rep 542.V22, 6360.V1, 6235.V20, 6360.V3, 6235.V21.

Amend text of paragraph 4.8.4 & 4.8.5 as follows:

4.8.4 Tourism development in the open countryside that supports an existing tourist facility, attraction or asset but is also sympathetic to the natural environment and rural landscape will be supported. Examples of appropriate developments include sympathetic additions or alterations to accommodation or facilities that seek to enhance quality, or developments on or adjoining tourist assets **such as those listed in Policy SP2, established walking routes and national trails**, provided the enjoyment and **setting** of the asset is **safeguarded not harmed**. Log cabin and chalet style developments that are sensitively designed and located to blend into the landscape and include substantial landscaping will be supported. Touring caravan sites and camping will also generally be supported provided they are acceptably located and screened and provide adequate access and servicing. Sporadic tourist development that does not relate to a tourist purpose **or which may be damaging to rural tranquillity** will not be supported.

4.8.5 Proposals for minor or incidental tourism developments such as small laybys, picnic sites, viewpoints, interpretive facilities, **horse corrals, tourist information points and** nature trails that would enhance access or usage of tourism facilities, attractions or assets will generally be supported.

<b>Focussed Change: FC38</b>	<b>Section: Policy TD3, Paragraphs 4.8.10-4.8.15</b>
<p><b>Reason</b></p> <ul style="list-style-type: none"> <li>• <b>Policy TD3</b> - To ensure clarity with regards the Canal’s environmental status, include references to full length of the canal and its link to the wider inland waterway network and recognise it must link to wider sustainable economic development. Rep 5704.V8, 542.V24, 5201.V7.</li> <li>• <b>Paragraph 4.8.14</b> – To ensure clarity with regards the Canal’s environmental status, and the importance of day visitors compared to navigation for the long term protection of the Environmental designations. Rep 5201.V7</li> <li>• <b>Policy TD3 and 4.8.15</b> - To balance policy and emphasis on Montgomery Canal with other tourism assets across the County. Rep 524.V24, 6360.V1, 6360.V3, 6235.V20, 6235.V21</li> </ul>	

Amend Policy TD3 and its reasoned justification paragraphs as follows:

**Policy TD3 – Montgomery Canal and Associated Development**  
**Proposals that support the restoration of the Montgomery Canal and preserve and enhance the role of the canal as a multifunctional resource, including off-**

line nature reserves and other appropriate canal-related development, will be supported.

Proposals for development that would adversely affect the canal's scientific and conservation designations, the role of the canal or prejudice its sensitive restoration will be opposed.

4.8.10 The Welsh section of the Montgomery Canal is some 36 kilometres (22 miles) long and extends from the Welsh border at Llanymynech to Newtown, passing through the beautiful countryside of the Severn Valley.

4.8.11 The canal supports a nationally important aquatic ecology and, as a result, the whole of the Montgomery Canal in Wales is a SSSI. In respect of the internationally important populations of floating water plantain (a water plant), the Montgomery Canal in Wales is also a Special Area of Conservation (SAC). It also benefits from many important and uniquely preserved structures and buildings, a number of which have listed building status. To comply with the requirements of the Conservation of Habitat and Species Regulations 2010 as amended, a Habitat Regulations Assessment of development proposals will be required to be undertaken to ensure there is no adverse effect on the integrity of the SAC.

4.8.12 The canal represents a multifunctional resource as a multi-user route and a community heritage asset that provides many opportunities for tourism, leisure, community heritage interpretation and nature conservation. Sympathetic restoration and use of the canal as a high value tourist destination will contribute to sustainable economic development. It also benefits from many important and uniquely preserved structures and buildings, a number of which have listed building status. However, major restoration work is required in order to return the canal to a navigable condition over its entire length to Frankton Locks and the Llangollen Canal in Shropshire. The Council therefore wishes to see the restoration of the canal to form a navigable waterway throughout its length and would oppose any proposals that would obstruct its sensitive restoration. The LDP Proposals Map identifies the line of the canal.

4.8.13 The restoration partnership group, The Montgomery Canal Partnership, has produced a management strategy entitled 'Montgomery Canal: Regeneration through Sustainable Restoration (A Conservation Management Strategy)' to inform and guide the restoration and future management of the canal. This provides an understanding of the significance of the canal's natural and built heritage and seeks to ensure that the community aspirations of restoring the canal will be balanced with the necessary environmental and ecological mitigation and enhancement.

4.8.14 Restoration of the canal will only lead to significant local economic benefits once canal-related developments have been established at points along the canal. The economic value of day visitors has been shown (analysis by Liverpool University) to have a higher value than any equivalent (to SAC) navigation access. Appropriate canal-related developments are uses that can demonstrate that they are associated with, and justify locations in close proximity to, the canal. Examples include:

- Moorings: essential in order to allow for overnight halts and daytime visits to shops, pubs and places of interest close to the canal.

- Boat services and facilities: boat users on the canal will require access to certain basic essential services, such as fuel and water supplies, refuse and sewage disposal facilities and boat repair facilities at a few points along the canal.
- Canal side visitor services and accommodation.
- Canal-side pubs and restaurants: will provide a particularly popular attraction for canal users, general visitors and local residents. There will be scope for expansion of existing establishments, and conversion of suitable canal-side buildings to such uses.
- Visitor accommodation: may be proposed in association with canal side moorings.

Proposals of this kind will be supported in line with Policies SP2 and TD1 provided they do not impact adversely on the statutory designations, local settings or canal heritage.

4.8.15 — Canal-related development can help provide access to key tourism assets, support users of the canal, and bring wider economic benefits. However, the location, nature, scale and design of all such developments will have to be determined with great care, in order to ensure that there are no serious repercussions for the local environment or canal heritage. Proposals must therefore accord with the objectives of the Montgomery Canal Partnership’s management strategy and where canal-related development has the potential to generate car-based travel, must be in sustainable locations with appropriate access to the road network.

<b>Focussed Change: FC39</b>	<b>Section: Policy W1, Paragraphs 4.9.1 - 4.9.2.</b>
<p><b>Reason:</b></p> <p><b>General</b> - To address references to landfill sites, TAN21 and CIM (Rep 1084.V1, 4565.V12) and include criterion for anaerobic digesters / composters (Rep 4765.V14).</p> <p><b>Paragraph 4.9.2</b> – To provide correct information on sites within the CWWP (Rep 1627.V1).</p> <p><b>Policy W1, criterion 4 &amp; Paragraph 4.9.7</b> – To include ‘other’ waste developments within the Policy and to provide a reasoned justification.</p> <p><b>Paragraph 4.9.8</b> – To correct reference from secondary to recycled aggregates (Rep 1627.V2) and address inert waste recycling sites “urban quarries” (Rep 4765.V13, 4765.V16).</p>	

Amend Policy W1 and paragraphs 4.9.1, 4.9.2, 4.9.7-4.9.8 as follows:

**Policy W1 – Waste**

Proposals will be permitted for the following types of waste facility only:

1. In-building waste facilities / bulking stations on:
  - i. **Allocated high quality, local and mixed use sites in Table E1.**
  - ii. **Other waste / employment / B2 sites or small extensions of them. Existing B2 sites or small extensions to them.**
  - iii. Sites of up to 0.5 Ha. adjoining Towns or Large Villages.
2. Household Waste and Recycling Centres in, or adjoining, Towns or Large Villages.
3. ~~Exemption Sites for inert waste:~~
  - i. ~~To meet the needs identified in Regional Plans; or~~
  - ii. ~~To facilitate major construction projects.~~
3. **Sites for the treatment of biodegradable waste by means of composting, including anaerobic digestion and in-vessel composting where related to existing agricultural use.**
4. **Other waste developments including inert waste temporarily stored for recycling purposes shall be located on:**
  - i. **Existing B2 sites or small extensions to them.**
  - ii. **Allocated high quality, local and mixed use sites in Table E1.**

4.9.1 This section seeks to enable an integrated and adequate network of waste management facilities in sustainable locations to complement the Powys Waste Strategy and **national policy / guidelines (see Waste Topic Paper)** to meet the needs identified in Regional Plans in accordance with the waste hierarchy (Article 4 of the Waste Framework Directive) with the long term aim of zero waste. In 2012/2013 the recycling and composting rate in Powys was 51% (Paragraph 4.2, Powys Waste Strategy). By 2024/25, 70% of all waste produced in the County will need to be recycled or composted, with only 5% being sent to landfill and a maximum of 30% diverted to energy from waste facilities (Wales Waste Measure 2010).

~~4.9.2 For municipal waste, Powys County Council partners Ceredigion County Council in the Central Wales Waste Partnership. The land requirement for residual waste in the area will be dictated by the outcome of the procurement of the services. Should this lead to the need for a facility in the region, the remaining landfill void at Bryn Posteg (Llanidloes) and the allocated site in Aberystwyth (Glanyrafon Industrial Estate Extension E0301) could provide sufficient capacity to accept waste for the consortium which cannot be reused, recycled or recovered.~~

4.9.2 Powys County Council has worked in partnership with Ceredigion County Council as the Central Wales Waste Partnership (CWWP) to explore opportunities for the long term treatment of residual waste. The land requirement for residual waste treatment in the region will be dictated by the outcome of any procurement of the treatment services. Should this lead to the need for a treatment facility in the region, the allocated site in Aberystwyth (Glanyrafon Industrial Estate Extension E0301) is available and may be suitable for this purpose. In the shorter term the remaining landfill void at Bryn Posteg (Llanidloes) could provide sufficient landfill capacity to accommodate Powys' waste which cannot be reused, recycled or composted.

~~4.9.7 Exemption sites are those which, because of their nature, do not require waste management licenses. Where they require planning permission, exemption~~

sites will be supported to facilitate major construction projects or to meet needs identified in Regional Plans.

4.9.7 Temporary inert waste sites will be supported where they serve an identified need to facilitate major construction projects. Any other new waste facilities, including inert waste, will be assessed on their own merit provided that there is a justifiable need for the development. The justifiable need should refer to the local need as specified within the Municipal Sector Plan and Collections Infrastructure and Markets Sector Plan (CIMSP).

4.9.7a Any new waste development must be suitable in terms of size and scale and must not have an adverse impact upon the landscape, the natural environment or the amenity and health of the local population.

4.9.8 Construction, excavation and demolition waste can often be re-used as secondary recycled aggregates or recycled to become a usable product. Therefore storage and recycling operations (urban quarries) are an appropriate activity, including within active minerals sites or B2 employment sites. This is considered by TAN 21 and Minerals Policy M1 (criterion 2).

<b>Focussed Change: FC40</b>	<b>Section: Policy RE1, Paragraphs 4.10.4 - 4.10.10</b>
<b>Reason:</b> These changes have been carried out to provide greater cohesion between the Objective, the Policy and the Topic Paper and to improve clarity by responding to matters raised by the following Representations: 542.V25, 1084.V9, 4349.V4, 4640.V3, 5197.V32, 5201.V2, 5938.V2 and V3, 6235.V22 and V23, 6264.V1, 6270.V1, 6322.V1 and V4, 6323.V1 and V4.	

Replace Policy RE1 and amend paragraphs 4.10.4 to 4.10.12, including insertion of additional paragraphs 4.10.5a and 4.10.5b, as follows:

#### **Policy RE1 - Renewable Energy**

**Proposals to generate energy from renewable and low carbon sources and associated infrastructure will be supported for up to 5MW (5,000kW), subject to criteria 1 and 2 below and all other relevant LDP policies.**

**Proposals for between 5 MW (5,000kW) and 50MW (50,000kW) will be determined in accordance with National Policy / Guidance, subject to criteria 1 and 2 below and all other relevant LDP policies.**

- 1. All proposals must be incidental to existing visual and sensory landscape characteristics (as defined by LANDMAP).**
- 2. All proposals must demonstrate efficiency, effectiveness and economy to minimise individual or cumulative adverse impacts, in particular where located in the open countryside, by:**

- i. Being carefully sited having regard to climatic factors, alternative sites, the prevailing landscape / skyscape character and views, topography, soils and vegetation, land allocated and or safeguarded for other purposes and the proximity to and potential impact on receptors; and
- ii. Having appropriate design on matters of scale (numbers, massing and height), density, appearance (details e.g. lighting, colour / shape of structure, angles and materials); and
- iii. Incorporating measures which mitigate adverse impacts on receptors, and ensure future maintenance and decommissioning where appropriate.

## Policy RE1 – Renewable Energy

Proposals for renewable and low carbon energy development, either on their own or in combination with existing or approved development, will be permitted subject to the following criteria:

1. Large scale wind farm developments (greater than 25MW) will be expected to be located within the boundaries of the Strategic Search Areas (SSA's). Proposals for wind turbines outside these areas will only be permitted where it is demonstrated that there will be no unacceptable impact on visual amenity or landscape character in accordance with Policy DM3 - Landscape, and through the number, scale, size, design and siting of turbines and associated infrastructure.

2. Small scale community-based wind turbine proposals (less than 5MW) will be required to demonstrate that impacts are confined to the local scale.

3. All renewable energy or low carbon energy development proposals will be required to demonstrate that:

- a. Measures have been taken to minimise impacts on visual amenity, biodiversity, and the natural and historic environment;
- b. There will be no unacceptable impacts on residential amenity;
- c. The development will not compromise highway safety;
- d. The development would not interfere with radar, air traffic control systems, telecommunications links, television reception, radio communication and emergency services communications; and
- e. There are satisfactory proposals in place for site restoration as appropriate.

4.10.4 PPW categorises four scales of renewable energy development. Policy RE1 sets out criteria against which all proposals for renewable and low carbon energy development, across these four scales, will be assessed. This includes those relating to Strategic (>25MW for wind and >50MW for all other technologies), Local Authority-wide (5-25MW for wind and up to 50MW for all other technologies) and small scale (<5MW)(Sub Local Authority and Micro) proposals where they are not permitted development (EfW, CHP, Biomass, Hydro-Power and Solar technology). The LDP sets policy for the determination of Micro schemes (below 50kW where they are not permitted development) and Sub Local Authority schemes (50kW –

5,000kW). The LDP also sets the policy for Local Authority Wide schemes (5,000kW – 50,000kW), other than for onshore wind.

4.10.5 Further guidance is set by Planning Policy Wales and Technical Advice Note 8 and National Policy Statements, and Policy RE1 should be read in conjunction with these national documents. Policy for Local Authority Wide onshore wind schemes (5,000kW – 25,000kW) and Strategic onshore wind schemes (25,000Kw – 50,000kW) is set by Planning Policy Wales and Technical Advice Note 8 and National Policy Statements which also set the Policy for all renewable energy schemes in excess of 50,000kW.

4.10.5a The Mid Wales Conjoined Public Inquiry into five wind farm proposals delivered its conclusion in September 2015, with the Secretary of State refusing all but one of the proposals. The Council's position at this Inquiry was to oppose the proposals but this position does not prejudice future applications which will be dealt with on their merits according to the criteria laid out in this policy.

4.10.5b Policy DM1SP2, criterion 7 safeguards important material assets including windfarms in Strategic Search Areas from incompatible development. The County Council has not refined Strategic Search Areas in the LDP. Previously work was undertaken to refine the SSA's. Although this was not completed, the evidence prepared for this has been used and, coupled with the evidence prepared to inform a large number of applications, including that for the CPI mentioned above, as well as the decisions reached, there is now a large body of evidence in relation to SSA's and no need or intention to refine the SSA boundaries at this point. because the Mid-Wales conjoined windfarm inquiry has provided a comprehensive assessment of the proposals in and around the SSA 42

4.10.6 To inform policy development, the Council prepared a renewable energy assessment (REA) in 2011/12. Findings from the assessment show that in Powys in 2008 the total electrical energy generated from renewable and low carbon energy technologies equated to around 86% of the expected consumption for 2020 that consumed, however the total thermal energy (heat) generated from renewable and low carbon energy technologies was just 1.7% of the expected thermal consumption for 2020. The REA identifies spatially areas of the County where there is practical viability for wind and hydro (including potential hydro over 10KWe), as well as an Energy Opportunity Plan for the utilisation of renewable energy and heat. However due to the scale of the County and the likely range of proposals the REA was not able to spatially identify all the possible constraints that would act upon any renewable or low carbon proposal.

4.10.7 Due to the presence of the SSA's in the County Powys is contributing significantly to the UK target for renewable electricity generation. Nevertheless there are significant opportunities for householders, communities, businesses (through co-location) and the diversification of rural enterprises to benefit from micro and sub-local authority energy schemes. It is these opportunities to which the target in LDP Objective 5 is set. The targets will be monitored to help show how the LDP is delivering them and contributing to the achievement of sustainable development. Meeting these targets would help to ensure that by the end of the plan period, and at the very least, irrespective of any further developments within the SSA's, Powys will

be generating enough renewable electricity will be produced in the county to offset all that which the county is uses.

4.10.8 The situation for generating renewable heat is less encouraging. The REA showed that just 1.7% of heating demand in the county is met by renewables. An additional 30,000Kw 30MW installed capacity approximately is needed by 2020 to meet the target. The REA demonstrates there is limited scope for viable district heat networks (DHN) in Powys however Policy DM15 provides for future DHN or co-location proposals to exploit any future opportunities. Therefore Policy DM15 plays an important role in is important to meeting this target and will be monitored to show how the LDP is contributing to meeting the target and UK Low Carbon Transition Plan requirement. This is a very ambitious target, even by the end of the plan period in 2026. Meeting it will ultimately depend on factors (such as wider national political support), and include many activities (such as household behaviour) that are outside the control or monitoring reach of the planning process so this particular target may remain an aspiration.

4.10.9 Policy RE1 will deliver the contribution towards the national targets by supporting supports all sub local authority and micro scale renewable and low carbon energy projects, subject to there being no unacceptable impact on landscape impact being incidental to existing landscape character and other material planning considerations.

4.10.10 Local Authority Wide renewable electricity schemes will be considered in light of the relevant National Policy. Further details will be included within an SPG on Renewable Energy

<b>Focussed Change: FC41</b>	<b>Section: Paragraph 4.11</b>
<b>Reason:</b> To provide clarity to the Minerals policy section and its relationship with DM policies. (Rep 5100.V2).	

Insert introductory paragraph into section on Minerals as follows:

4.11.1a Minerals planning covers all minerals and substances in, on or under land extracted either by underground or surface working. Minerals make a vital contribution to the Welsh economy so it is essential that society has access to the minerals it requires. However, mineral extraction operations and related development can also impact on the environment, landscape, geodiversity and amenities. The Council has a responsibility to safeguard mineral resources in Powys from sterilisation in line with policy DM7, and to contribute to the sustainably managed supply of aggregates. This should be achieved by striking the best balance between environmental, economic and social costs; ensuring the prudent use of finite resources through efficiency of use, re-use and recycling, protecting the environment, reducing the impacts of mineral extraction, and ensuring high standards of restoration and aftercare.

<b>Focussed Change: FC42</b>	<b>Section: Policy M1 &amp; paragraph 4.11.1</b>
------------------------------	--

**Reason:**

**Policy M1** – To provide clarity in light of national policy. (Rep 1481.V3, 5100.V2, 4765.V5, 5197.V33).

**Paragraph 4.11.1** - To ensure alignment with national policy. (Rep 5100.V2).

Amend policy M1 and paragraph 4.11.1 as follows:

**Policy M1 – Existing Minerals Sites**

1. Extensions (working area, depth and duration) to existing Minerals / Coal sites (Table M1) will be permitted where they would:

- i) In the case of non-energy crushed rock aggregate minerals help to maintain a steady and adequate supply the required rate of supply; or
- ii) In the case of all types of non-energy minerals address a shortage of high quality specification material that is of limited availability nationally; or
- iii) For all minerals - bring clear environmental, economic or social benefits without significant increase in supply.

2. Proposals that enable a higher proportion of secondary aggregate or recycled material to substitute for the consumption of primary aggregates will be supported on existing sites.

4.11.1 The policy provides the extended landbank necessary to ensure that throughout the plan period Powys can contribute to the regional supply of aggregates in accordance with the level of apportionment set out in the SWRAWP, RTS. To meet LDP objective 12, the Council as Minerals Planning Authority (MPA) must maintain a minimum landbank (permitted reserves) of 10 years for crushed rock aggregates throughout the Plan Period at the agreed rate of contribute 2.51 million tonnes per annum of hard rock for its contribution to the South Wales regional aggregate supply. The MPA has no requirement to contribute sand and gravel to the regional supply.

<b>Focussed Change: FC43</b>	<b>Section: Table M1 &amp; paragraphs 4.11.3, 4.11.5</b>
<b>Reason:</b>	
<b>Table M1:</b>	
<ul style="list-style-type: none"><li>• To highlight sites in proximity to designated areas. (Rep 5197.V33).</li><li>• To correct errors re Buttington and Middletown. (Rep 5939.V1)</li></ul>	
<b>Paragraph 4.11.3:</b> Moved to DM section and proposed new policy DM8. (Rep 4765.V4).	
<b>Paragraph 4.11.5:</b> Expanded for clarity.	

To amend Table M1 and justification paragraphs as follows:

## M1 - Minerals Operations in Powys

Site Name	Mineral Type	Mineral Extraction End Date	Review of Mineral Permission (ROMP) Date	Buffer Zone (m)
Cribarth	Sandstone	20 May 2023	N/A	200
Gore	Sandstone	21 Feb 2042	31 Mar 2024	200
Dolyhir ** / Strinds	Sandstone /Limestone	21 Feb 2042	20 Mar 2027	200
Tan y Foel	Sandstone	31 Dec 2063	16 Sep 2028	200
Tredomen	Sandstone	30 Sept 2026	N/A - missed	200
Rhayader	Sandstone	21 Feb 2042	29 Nov 2029	200
Criggion **	Igneous	21 Feb 2042	31 Jan 2027	200

Little Wernwilla	Sandstone	02 Dec 2018	N/A	200
Buttington Brickworks **	Sandstone Clay and Shale	22 Feb 2042	19 Apr 2026	200
Middletown	Igneous	21 Feb 2042 22 Aug 2060	22 Aug 2030	200
Berwyn Granite	Igneous	21 Feb 2042	Dormant - Prohibition order being progressed	200
Garreg **	Igneous	21 Feb 2042	Dormant – N/A	200
Caerfagu	Sand & Gravel	21 Feb 2042	20 June 2013	100
Nant Helen Extension	Coal	31 Dec 2018	N/A	500

Sites marked \*\* in Table M1 contain or are in close proximity to SSSI or SAC environmental designations and may require consents for any potentially damaging operations.

4.11.3 The minerals sites and buffer zones are shown on the proposals map and relevant inset maps. The purpose of buffer zones is two-fold: (i) to protect sensitive development from the impacts of mineral operations by ensuring mineral operations do not encroach too close to sensitive development; and (ii) to protect mineral operations from new sensitive development locating too close and potentially impacting on the operator's capacity to carry out permitted mineral operations without causing nuisance. The distances used are a starting point and may be refined depending on local environmental considerations at planning application stage.

4.11.4 It should be noted that the MPA is investigating the potential of issuing prohibition orders to stop work recommencing at some sites.

4.11.5 For all applications, the use of conditions will be considered to ensure the environmental impacts of the proposed operations are mitigated. Operations and development, after care and restoration schemes are acceptable. Proposals for mineral extraction will not be permitted unless accompanied by a comprehensive scheme showing how the site will be restored to agriculture, forestry, woodland, conservation or amenity after-uses; and such schemes must show progressive working and restoration, unless it can be demonstrated that this is not practicable without sterilising permitted reserves.

Focussed Change: FC44

Section: Policy M2 & Paragraphs

**Reason:**

**Policy M2** – To ensure alignment with national policy and not overly restrictive. Rep 1481.V4, 4765.V6, 5100.V3.

**Paragraph 4.11.6** - To align with national policy. Rep 1481.V4

**Paragraph 4.11.7** - To ensure clarity with regards onshore oil and gas. Rep 1481.V6, 4765.V8.

Amend Policy M2 and Paragraphs 4.11.6 - 4.11.7 as follows:

### **Policy M2 – New Minerals Sites**

~~No new sites for the winning of hard rock, sand and gravel, or coal will be permitted in addition to those sites as shown on the proposals map and in Table M1 unless they are:~~

New permanent sites for the winning of hard rock, sand and gravel, or coal will be permitted where these meet the requirements of National Policy, and in particular:

1. ~~Very small workings for locally distinct stone or sand and gravel for a local market; or To provide a supply of distinct building stone or dimension stone to fulfil a recognised local need/requirement; or~~
2. For coal where it would:
  - i. remove a mining legacy; or
  - ii. prepare land for future development of employment and economic benefit; or
3. A borrow pit under Policy M3 below.

4.11.6 Given the Regional Technical Statement requirement for hard rock, sand and gravel and constraints around the remaining coal resource in Ystradgynlais (~~explained below~~), it is not considered necessary to allocate new sites for coal, hard rock or sand and gravel. ~~Other than where development accords with either of criterion 1 or 3, no new hard rock quarries or new sand and gravel sites will be permitted. Proposals for the development of new coal working sites will be considered in accordance with the two stage approach as described by national policy in MTAN2 (paragraph 46). Conditions for all new applications will be considered as described in paragraph 4.11.5 above.~~

4.11.7 ~~The main coal resource in the planning area is in the Upper Swansea Valley around Ystradgynlais. All primary and secondary coal resources are safeguarded outside built up areas. After considering the extent of settlements in the area and the proximity of the Brecon Beacons National Park, three areas with potential resources remain.<sup>10</sup> The first is an existing opencast site, Nant Helen, where extensions would be considered in accordance with Policy M1, DM1, DM2 and DM3. The second area lies around the now restored, Brynhenllys opencast site.~~

<sup>10</sup> Further information is provided in the LDP Minerals Topic Paper

A tip (Tir Canol) and the Palleg Golf course sit on the remaining primary resource identified on the British Geological Survey mapping. The third area, of predominantly secondary resource, is around the Varteg where the topography is an issue because the resource straddles high ground between Ystradgynlais and Seven Sisters. A small area of tertiary Coal lies near Coedway in Montgomeryshire. Given this situation it is considered unnecessary to identify areas in which coal working will not be acceptable in the planning area. That which is accessible and commercially viable has been, or is in the process of being won. The extraction of minerals in Powys is mainly for construction purposes providing for aggregate products. Whilst there are currently no proven unconventional hydrocarbon energy sources within Powys, any future development proposals will be considered in accordance with National Policy (MPPW paragraphs 64 & 65) and also against the Plan's relevant design and environmental protection policies. However, if future exploration were to lead to the discovery of different mineral energy sources, the acceptability of working them may well depend on other issues associated with the development.

<b>Focussed Change: FC45</b>	<b>Section: Appendix 1</b>
<p><b>General Reasons:</b></p> <ul style="list-style-type: none"> <li>• Update Appendix 1 site allocation and commitments table to reflect position at 1/4/2015</li> <li>• To address changes proposed to the site allocations / commitments, in response to representations received and further evidence</li> <li>• To identify site allocations where development briefs will be required.</li> </ul> <p>Additional site specific reasons are listed below.</p>	
<b>Towns</b>	
<b>Builth Wells P08 HA1</b> - Update Appendix 1 site allocation and commitments table to reflect position at 1/4/2015	
<b>Builth Wells P08 HA2</b> - To address changes proposed to the site allocations / commitments, in response to representations received and further evidence (Affordable Housing Target)	
<b>Builth Wells P08 HA3</b> - To address changes proposed to the site allocations / commitments, in response to representations received and further evidence (Affordable Housing Target).	
<b>Builth Wells P08 EC1</b> - To identify new planning permission commitment within employment site and attached conditions.	
<b>Builth Wells P08 EA1</b> - Update site allocation to reflect position at 1/4/2015	
<b>Knighton P24 HC1</b> - To provide updated information relating to conditions for planning consent.	
<b>Knighton P24 HA1</b> - To provide updated information on the allocated site to accord with planning application.	
<b>Knighton P24 HA2 – (now P24 HC2)</b> To change the status of this site from an Allocation to a Commitment, to reflect the fact that the outline planning permission granted on this site To update text relating to conditions for planning consent and site condition.	

<p><b>Knighton P24 HA3</b> - To provide updated site information relating to the allocated site in response to referral responses and Representations received. (Rep 6152.V2).</p>
<p><b>Llandrindod Wells P28 HC1</b> - To clarify that the first reference number relates to the outline planning permission and that the second reference number relates to the reserved matters application, and to update the planning status of the site to reflect the fact that the reserved matters application is pending.</p>
<p><b>Llandrindod Wells P28 HC2</b> - To clarify that the reference number relates to a full planning permission.</p>
<p><b>Llandrindod Wells P28 HC3</b> - To correct the reference number referred to and to clarify that the correct reference number relates to a full planning permission.</p>
<p><b>Llandrindod Wells P28 HA1</b> - To clarify that the reference number relates to an application for outline planning permission.</p>
<p><b>Llandrindod Wells P28 HA1</b> - To reflect the HRA and the assessment of the impact on the SSSI/SAC carried out as part of the current planning application (P/2013/0444), to ensure the LDP addresses matters raised by Representations (1612.V5) and (6204.V6).</p>
<p><b>Llandrindod Wells P28 HA1</b> - To correct the description of the area of the site within the floodplain, to ensure the LDP address matters raised by Representation (5197.V36).</p>
<p><b>Llandrindod Wells P28 HA2</b> - To amend the Affordable Housing Target (%) to 30 and the number Affordable Housing Target (No.) to 30 to reflect the proposal to raise the level of contribution from 20% to 30% in the Central Powys area in accordance with the findings of the viability study. This is as a result of the decision not to take the CIL approach at this stage, although this position may change in the future. This change is in order to address matters raised by Representation 1084.V4.</p>
<p><b>Llandrindod Wells P28 HA3</b> - To amend the Affordable Housing Target (%) to 30 and the number Affordable Housing Target (No.) to 30 to reflect the proposal to raise the level of contribution from 20% to 30% in the Central Powys area in accordance with the findings of the viability study. This is as a result of the decision not to take the CIL approach at this stage, although this position may change in the future. This change is in order to address matters raised by Representation 1084.V4.</p>
<p><b>Llandrindod Wells P28 HA3</b> - To remove reference to Ithon Road as CPAT have subsequently advised that there is now evidence to suggest that the Roman Road lies 200 metres to the east of the site, and therefore it does not run along Ithon Road.</p>

<b>Llandrindod Wells P28 HA3</b> - To add further detailed information provided by CPAT as to the potential archaeology within the site and survey requirements.
<b>Llandrindod Wells P28 HA3</b> - To identify site allocations where development briefs are likely to be required to provide a degree of certainty, and to ensure that the LDP addresses representations (78.V2 and 78.V6).
<b>Llandrindod Wells P28 HA3</b> - To include reference to the sewer that crosses the site, in order to ensure that the LDP addresses Representations by 6348.V22.
<b>Llandrindod Wells P28 HA4</b> - To amend the Affordable Housing Target (%) to 30 and the number Affordable Housing Target (No.) to 30 to reflect the proposal to raise the level of contribution from 20% to 30% in the Central Powys area in accordance with the findings of the viability study. This is as a result of the decision not to take the CIL approach at this stage, although this position may change in the future. This change is in order to address matters raised by Representation 1084.V4.
<b>Llandrindod Wells P28 HA4</b> - To clarify that ecological surveys are also required for the purpose of informing any necessary mitigation.
<b>Llanfyllin P32 HA2</b> - Minor Change – for clarity
<b>Llanidloes P35 HC1</b> - Update Appendix 1 site allocation and commitments table to reflect position at 1/4/2015
<b>Llanidloes P35 HC2</b> - Update Appendix 1 site allocation and commitments table to reflect position at 1/4/2015
<b>Llanidloes P35 HA1</b> - To address changes proposed to the site allocations / commitments, in response to representations received and further evidence (Rep. No 5197.V37).
<b>Llanidloes P35 EC1</b> - To identify new planning permission commitment on part of site and update site map.
<b>Llanidloes P35 EA2</b> - To update allocated area as a result of new planning permission on part of site.
<b>Machynlleth P42 HA1</b> - To address changes proposed to the site allocations / commitments, in response to representations received and further evidence (Rep. No 5197.V45)

<b>Machynlleth P42 HA2</b> - To address changes proposed to the site allocations / commitments, in response to representations received and further evidence (Rep. No 5197.V46)
<b>Machynlleth P42 HA3</b> - Minor Change – for clarity
<b>Machynlleth P42 HA4</b> - To address changes proposed to the site allocations / commitments, in response to representations received and further evidence (Rep. No 5197.V48 & 6348.V.31). Plus an updating amendment.
<b>Machynlleth P42 EA1</b> - To take note of setting of allocated site within registered park and garden (Rep 1084.V20) and minor edits.
<b>Newtown P48 HC1</b> - To clarify that the reference number relates to a full planning permission and that development of the site has been completed.
<b>Newtown HC2</b> - To clarify that the reference number relates to a full planning permission
<b>Newtown P48 HC3</b> - To add reference to the outline planning permission and to clarify that the reference number given relates to reserved matters, and that development of the site has been completed.
<b>Newtown P48 HC4</b> – To include reference to the outline planning permission, and to clarify that the reference number given relates to reserved matters.
<b>Newtown P48 HC6</b> - To add reference to the full planning permission relating to the site and that an overflow car park to serve the Pentecostal Church has been built on part of this site.
<b>Newtown P48 HC7, renamed as P48HA4</b> - To change the status of this site from a Commitment to an Allocation, to reflect the fact that the outline planning permission granted on this site has lapsed as the application to extend the time limit to submit reserved matters that was pending was subsequently refused. To ensure that the LDP addresses matters raised by Representation 6130.V2. To reflect additional information submitted as part of Representation (6130.V1) in relation to ecology and to note that updated surveys may be required to form part of any further planning application.
<b>Newtown P48 HC8</b> - To add a committed site that benefits from full planning permission.
<b>Newtown P48 HC10</b> - To add a committed site that benefits from full planning permission.

<b>Newtown P48 HA1 – To rename as P48HC9</b> - To change the status of this site from an Allocation to a Commitment, to reflect the fact that the full planning permission applied for has been granted (P/2013/1185) and the development is under construction. Consequential change of the site reference to P48 HC9.
<b>Newtown P48 HA3</b> – To clarify that ecological surveys will be required at the planning application stage and are also required for the purpose of informing any necessary mitigation.
<b>Newtown P48 MUA1</b> – To remove this site proposed for allocation for mixed use development from the LDP due to deliverability issues.
<b>Newtown P48 EA1</b> – To omit reference to the area of the site within the floodplain being appropriate for informal gravel surfaced car parking, in order to ensure that the LPD addresses representations by 5197.V51.
<b>Presteigne P51 HA1 – (now P51 HC1)</b> To change the status of this site from an Allocation to a Commitment to, to reflect the fact that the outline planning permission granted on this site 18/06/2014 for 11 affordable housing units.
<b>Presteigne P51 HA2</b> – To identify change in affordable housing contribution in Central Powys area as identified from viability study. To update information provided by DCWW and minor change for clarity.
<b>Presteigne P51 MUA1</b> – To identify change in affordable housing contribution in Central Powys area as identified from viability study. To update site information and Minor edits to correct spelling mistake and update information provided by DCWW.
<b>Presteigne P51 EA1</b> – To update information provided by DCWW and minor changes for clarity.
<b>Rhayader P52 HC1</b> – Update Appendix 1 site allocation and commitments table to reflect position at 1/4/2015
<b>Rhayader P52 HC2</b> – Update Appendix 1 site allocation and commitments table to reflect position at 1/4/2015
<b>Rhayader P52 HA1</b> – Minor Change – for clarity
<b>Rhayader P52 HA1</b> – To address changes proposed to the site allocations / commitments, in response to representations received and further evidence (Rep. No1084.V4)

<b>Rhayader P52 HA2</b> – To address changes proposed to the site allocations / commitments, in response to representations received and further evidence (Rep. No1084.V4)
<b>Rhayader P52 EA1</b> – Minor Change – for clarity
<b>Welshpool P57 HC2</b> – This small housing site has been removed from the Plan as it no longer has a current planning permission.
<b>Welshpool P57 HA1</b> – Additional informative text in response to representations received (Rep. No 5704.V5)
<b>Welshpool P57 EC1</b> – To provide updated information relating to new planning permissions within employment site and attached conditions and correct SAC information.
<b>Ystradgynlais P58 HC1</b> – Update Appendix 1 site allocation and commitments table to reflect position at 1/4/2015.
<b>Ystradgynlais P58 HA1</b> – To address changes proposed to the site allocations / commitments, in response to representations received and further evidence (Rep No. 6176.V2).
<b>Ystradgynlais P58 HA2</b> – Update Appendix 1 site allocation and commitments table to reflect position at 1/4/2015.
<b>Ystradgynlais P58 HA4</b> – To delete site allocation in light of further evidence received (covenant).
<b>Ystradgynlais P58 HA6</b> – To delete site allocation and address changes proposed to the site allocations / commitments, in response to representations received and further evidence (Rep No.'s 540.V1, 541.V1, 1413.V2, 6260.V1, 6261.V1, 6262.V1, 6271.V1, 6272.V1, 6289.V4, 6300.V1, 6343.V5, 6357.V1, 6358.V1)
<b>Ystradgynlais P58 HA7</b> – To delete site allocation and address changes proposed to the site allocations / commitments, in response to representations received and further evidence (Rep No.'s 540.V2, 541.V2, 1413.V3, 6250.V2, 6255.V1, 6260.V2, 6261.V2, 6262.V2, 6271.V2, 6272.V2, 6289.V1, 6300.V2, 6341.V1, 6343.V6, 6358.V2)
<b>Ystradgynlais P58 HA8</b> – To delete site allocation and address changes proposed to the site allocations / commitments, in response to representations received and further evidence regarding the non-delivery of the site.

<b>Ystradgynlais P58 HA9</b> – New housing allocation to address changes proposed to the site allocations / commitments, in response to representations received and further evidence (Rep No.'s 5706.V5)
<b>Ystradgynlais P58 HA10</b> – New housing allocation. (Note this site was granted planning permission subject to a S106 agreement in Oct 2015, Planning reference – P/2014/1133)
<b>Ystradgynlais P58 HA11</b> – New housing allocation to address changes proposed to the site allocations / commitments, in response to representations received and further evidence (Rep No. 6205.V3)
<b>Ystradgynlais P58 HA12</b> – New housing allocation to address changes proposed to the site allocations / commitments, in response to representations received and further evidence (Rep No. 6071.V2)
<b>Ystradgynlais P58 EA1</b> – Minor change – for clarity.
<b>Hay-on-Wye P21 MUA1</b> - To identify change in affordable housing contribution in Central Powys area as identified from viability study. To identify site allocations and uses where a joint development brief will be required to provide a degree of certainty and to ensure the LDP addresses representations (Rep 1034.V8). Minor changes – for clarity.
<b>Large Villages</b>
<b>Abermule P02 EC1, amended to P02 EA1</b> - To change the status of this site from a Commitment to an Allocation, to reflect the fact that the outline planning permission granted on this site (P/2009/1353) has lapsed. Consequential change of the site reference to P02 EA1 and insert this record in the appropriate location.
<b>Berriew P04</b> – Text amended as follows to reflect that it has been superseded by a new Housing Allocation arising from the Deposit Plan consultation.
<b>P04 HA1</b> – New housing allocation in response to representations received – land to east of village, adjacent canal – Alternative Site Ref: ASN123 – (Rep No. 1938.V6).
<b>Bettws Cedewain P05 HC1</b> - To add reference to the outline planning permission and to clarify that the reference number given relates to reserved matters.

<b>Boughrood &amp; Llyswen P06 HC1</b> - To update site information as under construction.
<b>Boughrood &amp; Llyswen P06 HC2</b> - To update site information as under construction.
<b>Boughrood &amp; Llyswen P06 HA1</b> - To identify change in affordable housing contribution in Central Powys area as identified from viability study. To update site information in response to Representations. (Rep Nos: 27.V7, 1413.VI, 5795.V1, 6229.VI, 6258.V1, 6277.V1, 6295.V1, 6297.V1, 6299.V1, 6306.V1, 6320.V1, 6347.V1, 6348.V1, 6351.V1)
<b>Boughrood &amp; Llyswen P06 HA2</b> - To identify change in affordable housing contribution in Central Powys area as identified from viability study. To update site information in response to referrals.
<b>Bronllys P07 HC1</b> - To update site information to reflect planning permissions as development under construction.
<b>Bronllys P07 HC2 – (now P07 HA3)</b> - To change the status of this site from a Commitment to an Allocation, (HA3) as planning permission may have lapsed on this site. Request for a Certificate of Lawfulness has been made.
<b>Bronllys P07 HA1</b> - To identify change in affordable housing contribution in Central Powys area as identified from viability study. To update information from internal referrals
<b>Bronllys P07 HA2</b> - To identify change in affordable housing contribution in Central Powys area as identified from viability study. To update site information to reflect new planning application and minor edits to reflect changes to housing numbers
<b>Caersws P09 HC1</b> - To add a committed site that benefits from full planning permission.
<b>Caersws P09 HA1</b> - To identify site allocations where development briefs are likely to be required to provide a degree of certainty, and to ensure that the LDP addresses representations (78.V2 and 78.V6).
<b>Coelbren P14 HA1</b> – Deletion of housing allocation to address changes proposed to the site allocations / commitments, in response to representations received and further evidence (Rep No. 6220.V1).
<b>Churchstoke P12 HC4</b> – this housing site has been deleted due to updated evidence of landowner intentions which leads to the Council having fundamental concerns over the likelihood of delivery within the Plan period.

<b>Churchstoke P12 HA1</b> – New housing allocation in response to representations received – Alternative Site Ref: ASN15 and ASN19 – (Rep No. 451.V5 and 2067.V1)
<b>Churchstoke P12 EA1</b> - To change site area due to housing commitment P/2014/0559.
<b>Clyro P13 HC1</b> - To update information on site now under construction
<b>Clyro P13 HA1</b> - To identify change in affordable housing contribution in Central Powys area as identified from viability study. To address comments from representations (27.V12)
<b>Crossgates P16 HC1</b> - To amend the Affordable Housing Target (No.) to reflect the decision taken under VAR/2013/0013 to allow for the discharge of the section 106 agreement attached to PR6115/01 to remove the requirement for housing to meet local need.
<b>Crossgates P16 HC1</b> - To remove reference to planning permission P/2009/1043 as this granted permission for a surface water retention basin, and to replace this with reference to the full planning permission in respect of the residential development.
<b>Crossgates 16 HA1</b> - To amend the Affordable Housing Target (%) to 30 and the number Affordable Housing Target (No.) to 30 to reflect the proposal to raise the level of contribution from 20% to 30% in the Central Powys area in accordance with the findings of the viability study. This is as a result of the decision not to take the CIL approach at this stage, although this position may change in the future. This change is in order to address matters raised by Representation 1084.V4.
<b>Crossgates P16 HA1</b> - To add reference to the need to consider highway access arrangements and details to serve the development, to ensure the LDP addresses representations made by the Highway Authority in response to the additional information submitted.
<b>Four Crosses P18 EA1</b> - To update available land for employment to remove areas of commitments. P/2008/1351, P/2011/1429, P/2012/0854
<b>Glasbury P19 HA1</b> - To identify change in affordable housing contribution in Central Powys area as identified from viability study. To change in site allocation dwelling number to reflect highways access issues. Addition of site information.
<b>Guilfield P20 HC1</b> - This housing site has been deleted due to updated evidence on the site constraints and flood risk mitigation requirements which result in abnormal costs to development leading the Council to have fundamental concerns over the likelihood of delivery within the Plan period. (Rep. No. 5843.V1).

<p><b>Howey P22 HC1</b> - To change the reference of this site from HC1 to HA12 as it is not a commitment as previous planning permissions for the residential development of this site has lapsed. Also to move this record to follow P22 HA1.</p>
<p><b>Howey P22 HC1</b> - To remove reference to P/2011/1538 as this related to variation of condition to extend time limit for commencement of full planning permission PR617/10 which was in respect of the construction of a site road only. To add reference to previous permissions having lapsed, as the previous planning permissions in respect of the residential development of the site, the latest being PR61708 (renewal of outline planning permission) and P/2008/1144 (extension of the time limit for submission of reserved matters) have lapsed.</p>
<p><b>Howey P22 HA1</b> - To add the map reference for this settlement under the Inset Map column.</p>
<p><b>Howey P22 HA1</b> - To amend the Affordable Housing Target (%) to 30 and the number Affordable Housing Target (No.) to 30 to reflect the proposal to raise the level of contribution from 20% to 30% in the Central Powys area in accordance with the findings of the viability study. This is as a result of the decision not to take the CIL approach at this stage, although this position may change in the future. This change is in order to address matters raised by Representation 1084.V4.</p>
<p><b>Kerry P23 HA1</b> - To change the status of this site from an Allocation to a Commitment, to reflect the fact that the full planning permission applied for has been granted (P/2009/0106). Consequential change of the site reference to P48 HC1.</p>
<p><b>Kerry P23 HA1</b> -To change the number of units to 64 to reflect the number of dwellings that have been granted planning permission.</p>
<p><b>Kerry P23 HA1</b> - To change the status of the planning application to granted, to clarify that the permission is a full planning permission and to amend reference to it as a 'permission' not a 'proposal'.</p>
<p><b>Knucklas P25 HC1</b> - To add new housing commitment with valid planning permission. RAD/2005/0555)</p>
<p><b>Knucklas P25 HA1</b> – Minor change – for clarity.</p>
<p><b>Llanbrynmair P26 HC1</b> - Update Appendix 1 site allocation and commitments table to reflect position at 1/4/2015.</p>
<p><b>Llanfechain P31 HA1</b> - To address changes proposed to the site allocations / commitments, in response to representations received and further evidence. To identify site allocations where development briefs will be required.</p>

<b>Llangurig P33 HC1</b> - To address changes proposed to the site allocations / commitments, in response to representations received and further evidence (Rep. No 5197.V58 & 6348.V.72) and to update Appendix 1 site allocation and commitments table to reflect position at 1/4/2015.
<b>Llangynog P34 HA1</b> - To address changes proposed to the site allocations / commitments, in response to representations received and further evidence.
<b>Llanynmynech P40 HA2</b> – To update the issues/constraints information relating to this site allocation, in response to representations received and further evidence (Rep. No 27.V27 and 449.V2) and to round the affordable housing contribution up to 2 in response to representations received (449.V1).
<b>Llanyre P41 HC1</b> - To add a committed site that benefits from outline planning permission.
<b>Llanyre P41 HA1</b> - To amend the Affordable Housing Target (%) to 30 (the figure given for the Affordable Housing Target (No.) is already 30%) to reflect the proposal to raise the level of contribution from 20% to 30% in the Central Powys area in accordance with the findings of the viability study. This is as a result of the decision not to take the CIL approach at this stage, although this position may change in the future. This change is in order to address matters raised by Representation 1084.V4.
<b>Llanyre P41 HA1</b> - To reflect the fact that the sewer flooding incident has been resolved as confirmed by Welsh Water, in order to ensure that the LDP addresses representations by (6348.V74).
<b>Middletown P44</b> - The inset map has been subject to a development boundary change (land adj. Llwyn Celyn, Middletown) in response to representations received (Rep. No. 2923.V1 and 6146.V1).
<b>New Radnor P46 HC1</b> – Minor Change – for clarity
<b>Newbridge on Wye P47 HC1</b> - To add reference to the full planning permission.
<b>Three Cocks P53 MUA1</b> - To identify change in affordable housing contribution in Central Powys area as identified from viability study. Minor change for clarity updating active planning permissions on site and response to representations received (Rep. No. 5197.V53).
<b>Trefeglwys P54 HC1</b> - Update Appendix 1 site allocation and commitments table to reflect position at 1/4/2015.

**Tregynon P55 HA1** - To clarify that ecological surveys will be required at the planning application stage and are also required for the purpose of informing any necessary mitigation.

**Buttington Brickworks P59 EA1** - Map Change (remapping of area of allocation) in response to representations received (Rep. No. 5939.V4). Additional informative text to address representations regarding the SSSI (Rep. No. 5197.V43).

**Land at Offa's Dyke Business Park, Welshpool P60 EC1** - Minor change for clarity as not within or adjacent to Bat SAC.

Amend the following rows of Appendix 1 of the LDP:

Amend / Replace Appendix 1 of the LDP as follows:

Towns	Inset Map	Site Ref	Site Name	Site Area (Ha)	No. Units	Affordable Housing Target (%)	Affordable Housing Target (No.)	Area Empl / Other (Ha)	Issues / Infrastructure / S106 Requirements (Base date for planning permission information – <del>31/12/2013</del> <b>1/04/2015</b> )
Builth Wells & Llanelwedd		<del>HA4H</del> <b>C3</b>	Builth Wells Cottage Hospital	0.5	17	100	17.0	N/A	100% Affordable Housing <b>Commitment (P/2013/1190. Full Planning Permission)</b> Allocation. Planning application for 17 affordable units pending. Ecology and Land Contamination surveys required. There are isolated incidents of flooding in the public sewerage system that need to be resolved. Potential developers can either wait for DCWW to resolve the flooding, subject to funding being approved by Ofwat, or progress the improvements through the sewerage requisition provisions of the Water Industry Act 1991 or s106 of the Town and Country Planning Act 1990. A hydraulic modelling assessment (HMA) may be required to determine the point of connection to the public sewerage system and potential developers would be expected to fund investigations during pre-planning stages. *Project level HRA screening required – River Wye SAC.

Llandrindod Wells		HA2	Tremont Park extension	4.5	100	2030	2030.0	N/A	New allocation. Ecological / Botanical Survey advised to inform enhancement. Off site works to connect with public sewer may be required and could be provided through the sewer requisition scheme under Sections 98-101 of the Water Industry Act 1991*Project level HRA screening required – River Wye SAC.

Towns	Inset Map	Site Ref	Site Name	Site Area (Ha)	No. Units	Affordable Housing Target (%)	Affordable Housing Target (No.)	Area Empl / Other (Ha)	Issues / Infrastructure / S106 Requirements (Base date for planning permission information – <del>31/12/2013</del> 1/04/2015)
Llandrindod Wells		HA3	Ithon Road	4.5	100	2030	2030.0	N/A	New allocation. Ithon Road near to proposed line of roman road, Cardiff to Castell Collen, and potentially used for pre-historic transient hunting camps, permanent settlements and practice camps. Archaeological surveys will be required as part of any future planning application. Off-site works may be required to connect with water mains and could be provided through a water requisition scheme under Sections 41-44 of the Water Industry Act 1991. There are isolated incidents of flooding in the public sewerage system that will need to be resolved to allow development to proceed. Potential developers can either wait for DCWW to resolve flooding, subject to funding being approved by our Ofwat, or progress the improvements through the sewerage requisition provisions of the Water Industry Act 1991 or S106 of the Town and Country Planning Act 1990. A hydraulic modelling assessment (HMA) is required to determine the point of connection to the public sewerage system and potential developers would be expected to fund investigations during pre-planning stages. A sewer crosses the site and therefore protection measures in the form of easement widths or a diversion of the pipe may be required, and may impact on the density achievable on site. Extension to the speed limit and possible footway improvements. Development must consider relationship with cemetery, all weather pitch, school and existing housing development. Given the important design considerations relating to the

Towns	Inset Map	Site Ref	Site Name	Site Area (Ha)	No. Units	Affordable Housing Target (%)	Affordable Housing Target (No.)	Area Empl / Other (Ha)	Issues / Infrastructure / S106 Requirements (Base date for planning permission information – <del>31/12/2013</del> 1/04/2015)
									relationship with adjacent uses and the site topography, a development brief will be required to be prepared. *Project level HRA screening required – River Wye SAC.
Llandrindod Wells		HA4	Land at Ridgebourne Drive,	7.6	100	2030	2030.0	N/A	Transport Assessment and provision of a 'ghost' island right turning lane in the trunk road. Right turn lane required at the junction with the trunk road. Site lies near the Lake Park Local Nature Reserve, ecology survey required to demonstrate no adverse impact from development and to inform mitigation and enhancements. Local sewerage network can accommodate foul flows from the site however off site sewers may be required and can be provided through the sewer requisition scheme under Sections 98-101 of the Water Industry Act 1991. Contaminated land survey required. *Project level HRA screening required – River Wye SAC.
Llandrindod Wells		EA1	Heart of Wales Business Park	<del>4.3</del> 3.9	N/A	N/A	N/A	<del>4.3</del> 3.9	Only part developable. Drainage pond on part of allocation. This is a biodiversity rich site supporting Great Crested Newts. An ecological survey is required to inform enhancement through development. Site is crossed by a sewer and protection measures in the form of easement widths or a diversion of the pipe may be required, and may impact upon the density achievable on site. Off-site water connection required. *Project level HRA screening required – River Wye SAC.

Towns	Inset Map	Site Ref	Site Name	Site Area (Ha)	No. Units	Affordable Housing Target (%)	Affordable Housing Target (No.)	Area Empl / Other (Ha)	Issues / Infrastructure / S106 Requirements (Base date for planning permission information – <del>31/12/2013</del> 1/04/2015)
Llanfyllin		HA2	Maesydre Field, Llanfyllin	2.3	55	10	5.5	N/A	Two sites need to be developed together as highways access needs to come from site furthest from the settlement. It is imperative that this scheme is of good sensitive design as it is near a Y Dolydd Listed Building and will be creating a new gateway into Llanfyllin, therefore a Development Brief is required (this can be done through a development brief). *Project level HRA screening required – Tanat and Vwrnwy Bat sites SAC.

Large Villages	Inset Map	Site Ref	Site Name	Site Area (Ha)	No. Units	Affordable Housing Target (%)	Affordable Housing Target (No.)	Area Empl/ Other (Ha)	Issues / Infrastructure / S106 Requirements (Base date for planning permission information - <del>31/12/2013</del> 1/04/2015)
Guilfield		HA1	Land adj Celyn Lane	0.9	20	20	4.0	N/A	<p>Highways Improvement/local link road required, closure of existing junction. Development must avoid flood risk areas. Sensitive ecological issues - liaison with NRW required at pre-application stage - European Protected Species Licence likely to be required.</p> <p>*Project level HRA screening required - Granllyn SAC &amp; Montgomery Canal SAC (hydrological connections) and Tanat and Vyrnwy Bat sites SAC. Proximity of Granllyn SAC - Great Crested Newts may be present - development proposals will require appropriate surveys/action plan. Lower density reflects potential mitigation measures/buffers for protected species and land required for link road. Sensitive ecological issues - liaison with NRW required at pre-application stage - European Protected Species Licence may be required.</p> <p>*Project level HRA screening will be required with regards to Granllyn SAC. Given the proximity of Granllyn SAC there is a high likelihood that great crested newts may be present or utilise the site for distribution to surrounding environment- development proposals will require appropriate surveys and detailed mitigation plans to ensure that the development does not result in barriers to migration, fragmentation of habitats (including breeding and terrestrial habitat outside of the Granllyn SAC), disturbance, increased recreational pressures, incidental capture and killing which could affect the</p>

Large Villages	Inset Map	Site Ref	Site Name	Site Area (Ha)	No. Units	Affordable Housing Target (%)	Affordable Housing Target (No.)	Area Empl/ Other (Ha)	Issues / Infrastructure / S106 Requirements (Base date for planning permission information - <del>31/12/2013</del> 1/04/2015)
									<p>ecological functionality of the SAC. Given the complexity and level of detail required regarding mitigation to ensure no likely significant impact to the Granllyn SAC it is considered that a S106 will be required. Lower density reflects the requirement for potential mitigation measures/buffers for protected species and land required for link road.</p> <p>Additional HRA Screening may also be required in relation to Montgomery Canal SAC (hydrological connections) and Tanat and Vyrnwy Bat sites SAC</p>
Howey	P22	HA1	Land at Crossways Court.	1.4	30	<del>20</del> 30	<del>6.0</del> 9.0	N/A	Ecology Survey to inform enhancement, include a 10m buffer along the boundary with the railway. Requires significant works to the trunk road junction with class III road. Nearby Tree Preservation Order. Potential developers need to be aware that the site is crossed by a water main and protection measures in the form of easement widths or a diversion of the pipe would be required, which may impact upon the density achievable on site.*Project level HRA screening required - River Wye SAC.

Large Villages	Inset Map	Site Ref	Site Name	Site Area (Ha)	No. Units	Affordable Housing Target (%)	Affordable Housing Target (No.)	Area Empl/ Other (Ha)	Issues / Infrastructure / S106 Requirements (Base date for planning permission information - <del>31/12/2013</del> 1/04/2015)
Howey	P22	HC1 HA2	Land adjacent Goylands Estate	0.8	11	N/A	0.0	N/A	<del>Commitment. Reserved Matters application P/2011/1538</del> Previous permissions in relation to residential development have lapsed. *Project level HRA screening required - River Wye SAC.
Kerry	P23	HA1 HC1	Dolforgan View, Kerry	2.1	6264	N/A	0.0	N/A	Site awaiting signing of s106. Full planning permission (P/2009/0106). If the current <del>proposal</del> permission (P/2009/0106) is not implemented affordable housing contribution will be sought on future proposals for this site. Site contains two historic assets, any proposed development here may require archaeological intervention as part of any planning application. *Project level HRA screening required - Montgomery Canal SAC (hydrological connections).
Knucklas	P25	HC1	Old Station Works	0.28	6	20	2	N/A	Commitment (RAD/2005/0555)
Knucklas	P25	HA1	Land at Castle Green	0.4	17	10	1.7	N/A	PR143106, (P/2012/0272). Site awaiting signing of S106 (P/2012/0272).
Llanbrynmair	P26	HC1	Bryncoch	1	5	N/A	2.0	N/A	Partially Committed. Ref: P/2014/1060 (Series - incl. P/2012/0357). Ecological Survey will be required to inform enhancements. Single road access required to serve this site and adjoining allocation. Transport assessment may be required to ascertain impacts on Trunk Road. Off-site highway infrastructure improvements required.

Large Villages	Inset Map	Site Ref	Site Name	Site Area (Ha)	No. Units	Affordable Housing Target (%)	Affordable Housing Target (No.)	Area Empl/ Other (Ha)	Issues / Infrastructure / S106 Requirements (Base date for planning permission information - <del>31/12/2013</del> 1/04/2015)
Llanfechain	P31	HA1	Land north of Church, Llanfechain	1	25	10	2.5	N/A	Flood zone excluded. *Project level HRA screening required - Tanat and Vwrnwy Bat sites SAC. Site lies within the historic settlement core of Llanfechain, any proposed development here may require archaeological intervention as part of any planning application. Highways access will need to be obtained via the adjacent housing estate Phasell Maes Dinas (U4978). The existing unadopted highway would need to be upgraded and offered for adoption in order to serve the allocation. Possibility of groundwater flooding / high water table - careful design in respect to surface water disposal is needed, i.e. soakaways may not be effective if there is a high water table. Further investigation and monitoring of groundwater levels over a period of time is needed as part of any revised FCA submission. Development Brief will be required for this site.
<del>Llangurig</del>	<del>P33</del>	<del>HC1</del>	<del>9180 Adj Penybont Farm &amp; Maescurig (A/27/001)</del>	<del>0.4</del>	<del>9</del>	<del>N/A</del>	<del>2.0</del>	<del>N/A</del>	<del>Commitment. *Project level HRA screening required - River Wye SAC. Majority of the site is in TAN 15 C2.</del>

Large Villages	Inset Map	Site Ref	Site Name	Site Area (Ha)	No. Units	Affordable Housing Target (%)	Affordable Housing Target (No.)	Area Empl/ Other (Ha)	Issues / Infrastructure / S106 Requirements (Base date for planning permission information - <del>31/12/2013</del> 1/04/2015)
Llangynog	P34	HA1	Llangynog Glebe	0.3	8	10	0.8	N/A	Needs to be accessed from the road to the south east, outside of the development boundary. The access point falls within TAN 15, C2 flood zone, a Flood Consequence Assessment will be required at the planning application stage. *Project level HRA screening required - Tanat and Vwrnwy Bat sites SAC , the Berwyn and South Clwyd Mountains SAC and Berwyn SPA. Site impinges on the historic settlement core of Llangynog, any proposed development here may require archaeological intervention as part of any planning application. The site also lies within the Llangynog character area of the Tanat Valley Registered Historic Landscape. Depending on its size and nature any proposed development here may require assessing under the ASIDOHL2 as part of any planning application.
Llansantffraid -ym-Mechain	P37	HC1	Land off Fford Spoonley, Llansantffraid	0.4	12	N/A	3.0	N/A	Commitment. <del>*Project level HRA screening required - Montgomery Canal SAC (hydrological connections) and Tanat and Vwrnwy Bat sites SAC.</del>

Large Villages	Inset Map	Site Ref	Site Name	Site Area (Ha)	No. Units	Affordable Housing Target (%)	Affordable Housing Target (No.)	Area Empl/ Other (Ha)	Issues / Infrastructure / S106 Requirements (Base date for planning permission information - <del>31/12/2013</del> 1/04/2015)
Llanymynech		HA2	Land off Carreghofa Lane	1.6	15	10	1.5 2	N/A	Part site required for this Plan period (provide for potential future phasing). Up to 0.75 ha required for 15 dwellings. Investigation required to satisfy highways requirements (upgrading required in terms of width and footway provisions) and also investigate capacity of sewerage infrastructure as site will need connection to mains drainage. Ensure any new works/infrastructure etc. does not compromise proposals for restoration of canal. The site contains significant archaeological remains and will require archaeological assessment, evaluation and probably full archaeological excavation as part of any development (consult and involve CPAT). *Project level HRA screening required - Montgomery Canal SAC (hydrological connections) and Tanat and Vyrnwy Bat sites SAC.
Llanfyllide	P41	HC1	Land between Moorlands and Llyr	0.6	12	N/A	6.0	N/A	Commitment. Outline planning permission. P/2013/0887.
New Radnor	P46	HC1	Water Street Farm	0.6	14	N/A	5.0	N/A	Commitment. (Ref: P/2008/1685). The site contains a historic asset and lies within the historic settlement core of New Radnor any proposed development here may require archaeological intervention as part of any planning application.

Large Villages	Inset Map	Site Ref	Site Name	Site Area (Ha)	No. Units	Affordable Housing Target (%)	Affordable Housing Target (No.)	Area Empl/ Other (Ha)	Issues / Infrastructure / S106 Requirements (Base date for planning permission information - <del>31/12/2013</del> 1/04/2015)
Three Cocks	P53	MUA 1	Land between/adj Gwernyfed Avenue, Three Cocks	4	15	<del>20</del> 30	4.5	3.4	Mixed use. Part of site has existing employment use by agricultural contractor / machinery sales business. Part of site has permission for factory & office accommodation. (B/05/0038, B/07/0155, B/07/0296, P/2012/1185). Development Brief required to reflect predominant employment usage of site. Ecology Survey and Drainage Assessment required. The northern boundary of this site abuts zone C2 of the TAN15 Development Advice Map; as a precaution it is recommended that this area is left as a green buffer zone. Foul flows from this development would pass through the Welsh Water terminal Sewerage Pumping Station and would require an assessment of the sewerage pumping station to establish whether improvements are required. If improvements are required the sewer requisition provisions of the Water Industry Act 1991 can apply. The proposed growth being promoted for this settlement would require improvements at Aberllyfni Wastewater Treatment Works which would need to be funded through DCWW's asset management plan or potentially earlier through developer contributions. HER site. Part of site has existing employment use by agricultural contractor / machinery sales business. Part of site has permission for Laura Ashley factory & office accommodation. *Project level HRA screening required - River Wye SAC. Site contains a historic asset. Any proposed development here may require archaeological

Large Villages	Inset Map	Site Ref	Site Name	Site Area (Ha)	No. Units	Affordable Housing Target (%)	Affordable Housing Target (No.)	Area Empl/ Other (Ha)	Issues / Infrastructure / S106 Requirements (Base date for planning permission information - <del>31/12/2013</del> 1/04/2015)
									intervention as part of any planning application. Site lies within the Gwernyfed character area of the Middle Wye Registered Historic Landscape. Depending on its size and nature any proposed development here may require assessing under the ASIDOHL2 as part of any planning application.
Trefeglwys	P54	HC1	Land to West of Llwyncelyn (Phase 2)	0.9	17	N/A	8.0	N/A	Commitment. Ref.: M/2007/0561 <del>flooding constraint.</del> Ongoing planning application to provide a flood protection bund to development site. Yet to be determined. (P/2014/0669). If permission is granted, the flood bund will provide flood protection to the consented site making the development safe and resistant.
Employment Sites <del>outside</del> outside settlements	P59	EA1	Buttington Brickworks, Nr Welshpool	6	N/A	N/A	N/A	6	Brownfield site, partly in employment use, allocated for further expansion for General Industrial Uses. Expansion dependant on new access (extant p.p.). Heritage/Ecology Value. The site is adjacent to a geological SSSI, the design of development must be sympathetic to the SSSI so that the protected area is not significantly affected. Development proposals should be identified through the preparation of a development brief that takes account of all issues including constraints. *Project level HRA screening required - Montgomery Canal SAC (hydrological connections) <del>and Tanat and Vwrnwy Bat sites SAC.</del> Buttington Brickworks SSSI

	P60	EC1	Land at Offa's Dyke Business Park, Welshpool	7.3	N/A	N/A	N/A	7.3	Commitment. Employment Land. *Project level HRA screening required - Montgomery Canal SAC (hydrological connections) <del>and Tanat and Vwrnwy Bat sites SAC.</del>

**Appendix 1 – Schedule of Minor Editing Changes (Not for Consultation)**

<b>Minor Change 1 (Not for Consultation)</b>	<b>Section: Paragraph 2.3.3</b>
<b>Reason:</b> To ensure the LDP addresses matters raised by LDP representation (6235.V2), to match the content of Planning Policy Wales, to ensure the LDP meets the soundness tests.	

2.3.3 PPW makes it clear that the purpose of the planning system, including LDPs, is to manage the development and use of land in the public interest, contributing to the achievement of sustainable development. It states that the system should reconcile the needs of development and conservation, securing economy, efficiency and amenity in the use of land, **and while** protecting **natural resources** and the historic environment.

<b>Minor Change 2 (Not for Consultation)</b>	<b>Section: Paragraph 3.1</b>
<b>Reason:</b> Consequential change to reflect the proposed inclusion of strategic policies in the LDP.	

Insert 5<sup>th</sup> item in list of paragraph as follows:

- i. A future **vision** and **objectives** for how land and settlements in Powys should be used and developed.
- ii. A **growth strategy** describing the principle development needs and levels of development that are required to achieve the vision and objectives.
- iii. A **spatial strategy** that describes the sustainable distribution, location and pattern of development and growth being planned to achieve the vision and objectives.
- iv. A **key diagram** of the strategy.
- v. **Strategic policies to define the strategy in policy terms.**

<b>Minor Change 3 (Not for Consultation)</b>	<b>Section: LDP Objective 4</b>
<b>Reason:</b> To ensure clarity	

Include additional word for clarity as follows:

**LDP Objective 4 – Climate Change and Flooding**

To support the transition to a low carbon and low waste Powys through all development, including the reduction of waste to landfill and by directing development away from high flood risk **areas** and, where possible, to reduce or better manage existing flood risk for communities, infrastructure and businesses.

<b>Minor Change 4 (Not for Consultation)</b>	<b>Section: Paragraph 3.4.6</b>
--	---------------------------------

<b>Reason:</b> Inclusion of numbering to the settlement hierarchy for clarity and to cross reference to numbering proposed in new strategic policy SP1.
---

Insert numbering into settlement hierarchy list as follows:

3.4.6 As a result of the analysis and judgement, the LDP settlement hierarchy comprises:

1. Towns
2. Large Villages
3. Small Villages
4. Rural Settlements
5. Open Countryside

<b>Minor Change 5 (Not for Consultation)</b>	<b>Section: Paragraph 4.6.2</b>
<b>Reason:</b> Correction of spelling mistake.	

Amend miss-spelling in paragraph 4.6.2 as follows:

4.6.2 Policy H1 identifies suitable locations for housing which support the delivery of a sustainable pattern of development. ...

<b>Minor Change 6 (Not for Consultation)</b>	<b>Section: Paragraph 4.6.4</b>
<b>Reason –</b> Consequential change to reflect the amendments proposed to Section 4.2 of the LDP.	

Amend policy reference as follows:

4.6.4 Policy H2 seeks to achieve an appropriate range and mix of housing types to meet local needs, as identified in evidence such as Local Housing Market Assessment<sup>11</sup>, in particular the needs of the county's ageing population and decreasing household size, affordable housing and specialist housing needs such as supported accommodation, sheltered housing, care homes, low rise accessible development or bungalows, extra care developments. The design and energy efficiency of housing development is addressed by **Policy DM15**.

<b>Minor Change 7 (Not for Consultation)</b>	<b>Section: Paragraph 4.6.11</b>
<b>Reason –</b> Consequential change to reflect the amendments proposed to Section 4.2 of the LDP.	

Amend text of paragraph 4.6.11 as follows:

4.6.11 The density of development should take into account the character of an area, specific design requirements such as access and visibility requirements, amenity space, landscaping, parking and growing spaces as supported **by the Development Management policies Policy DM2**. Lower densities are acceptable in Small Villages

<sup>11</sup> The LHMA Update was completed in 2014 and published in 2015.  
Cyngor Sir Powys County Council

and Rural Settlements to reflect historic patterns of development and to meet specific local housing needs such as self-builds or rural affordable homes. PPW<sup>12</sup> advocates that Development plans should have a clear development management policy on density. Policy H3 reflects PPW by encouraging higher density development in Towns and Large Villages which are the settlements best served by public transport.

<b>Minor Change 8 (Not for Consultation)</b>	<b>Section: Paragraph 4.6.18</b>
<b>Reason</b> – Consequential change to reflect the amendments proposed i.e. proposed deletion of Policy H6.	

Amend paragraph 4.6.18:

4.6.18 **Exception Sites for Affordable Housing.** ~~Three~~ **Two**-exceptions policies are included in the LDP which seek to allow the development of affordable housing to meet specific identified local need:

- Exception Sites – Policy H5.
- ~~Enabled Exception Sites – Policy H6.~~
- Rural Affordable Homes – Policy H7.

<b>Minor Change 9 (Not for Consultation)</b>	<b>Section: Paragraph 4.7.19</b>
<b>Reason:</b> Consequential reference change to reflect the focussed changes proposed to the Development Management policies (section 4.2).	

Amend policy reference in Paragraph 4.7.19 as follows:

4.7.19 Individual shops provide an important function at the local neighbourhood level within towns, villages and the more isolated areas of Powys. This also includes pubs and filling stations, which can act as essential outlets for basic daily provisions and services. This policy supports such development with a gross floor space of less than 280sqm<sup>13</sup>. Policy **DM11** refers to proposals involving the loss of neighbourhood and village shops and services.

<b>Minor Change 10 (Not for Consultation)</b>	<b>Section: Paragraph 4.11.2</b>
<b>Reason:</b> Correction of misspelt word 'intention'.	

Correct typing error:

4.11.2 Table M1, below, details the existing mineral sites. It is envisaged that these sites will continue to meet the county's contribution during the plan period. This will be monitored through annual returns. Policy M1 supports this approach and also

<sup>12</sup> Paragraphs 4.7.2, 4.7.4 and 9.2.24, Planning Policy Wales

<sup>13</sup> Powys Retail Study (September 2012), para. 5.48-5.49

allows for storage and recycling operations for construction, excavation and demolition waste within active minerals sites.

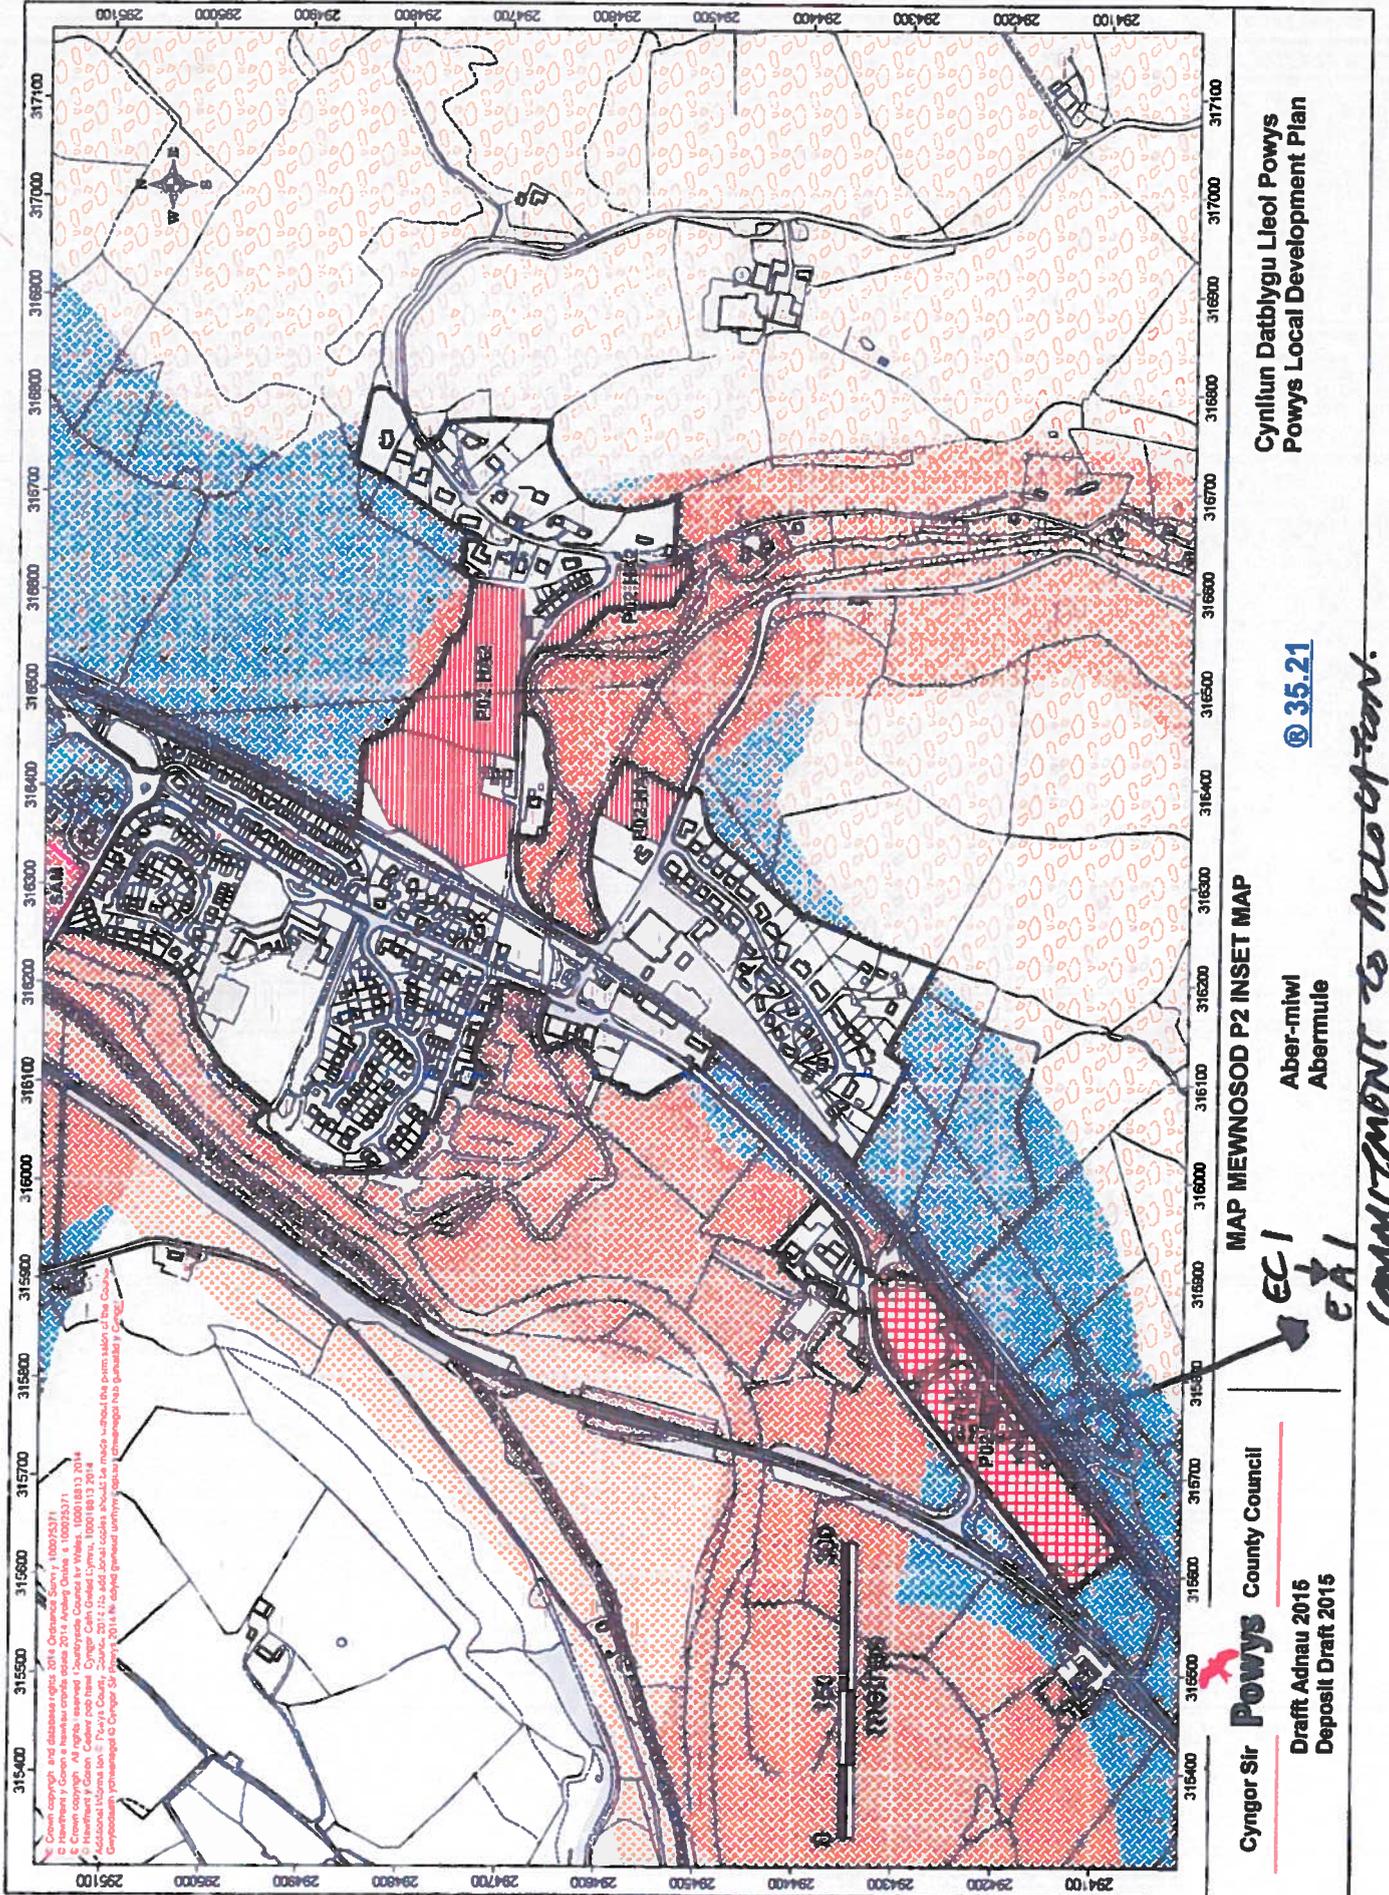

<b>Minor Change 11 (Not for Consultation)</b>	<b>Section: Paragraphs 4.12.4</b>
<b>Reason:</b> Amended policy reference as a consequential change to the proposed Policies in the Development Management section 4.2 of the LDP.	

4.12.4 The loss of community facilities can undermine the sustainability of settlements, and is addressed within **Policy DM11**.

<b>Minor Change 12 (Not for Consultation)</b>	<b>Section: Paragraphs 4.13.2</b>
<b>Reason:</b> Amended policy reference as a consequential change to the proposed amendment of Development Management and introduction of Strategic Policies in the LDP.	

Amend Policy reference as follows:

4.13.2 The Sennybridge Training Area is a site of strategic military importance in the UK. In accordance with Policy **DM1-SP2**, it will be safeguarded from development that would compromise its operation.

## CYNGOR SIR POWYS COUNTY COUNCIL.

### CABINET EXECUTIVE 15<sup>th</sup> December, 2015

**REPORT AUTHOR:** County Councillor Wynne Jones  
Portfolio Holder for Finance

**SUBJECT:** Budget Timetable Update and Spending Review  
Summary

---

**REPORT FOR:** Decision

---

#### 1. Summary

- 1.1 The report provides Cabinet with an indication of the key points from November's spending review and the updated Budget Timetable. The timing of this year's settlement and the potential impact of the spending review has required some adjustment to key dates.

#### 2. Spending Review

- 2.1 The Spending Review announced on 25<sup>th</sup> November set budgets for government departments and the devolved administrations for each financial year for the rest of this Parliament (2016/17 to 2019/20).
- 2.2 Day-to-day spending is set to fall by £18 billion or 6% between 2015/16 and 2019/20 in real terms, meaning that many departments will see budget reductions. Some departments are protected from spending reductions, including the NHS, some schools spending, defence spending and the international development budget. This means that other departments have seen larger reductions, in many cases on top of reductions seen over the previous Parliament.
- 2.3 It is widely accepted that the Spending Review has been less severe than estimated before the announcement on 25<sup>th</sup> November. However the position for Powys is likely to see little change in our comparative funding level in Wales and therefore the agreed budget strategy for the next three years remains in place. It is further complicated by the extent (as yet unknown) that the 'floor' arrangement will remain in place to support the council's overall funding.
- 2.4 For the UK the pace of spending cuts has been reduced with the position a result of improving forecasts for revenues and marginally less borrowing than anticipated over the next five years. Targets for a surplus by the end of the parliament remain intact. Underpinning the

spending plans is the economic projections provided by the Office for Budget Responsibility (OBR). Compared to Summer Budget 2015, the Office for Budget Responsibility now forecasts higher tax receipts and lower debt interest, with a £27 billion improvement in the public finances.

- 2.5 Scotland, Wales and Northern Ireland will all receive more money to be spent on infrastructure (capital) projects, with each government deciding where this will be spent. This will be an increase of around 14% for Scotland, 16% for Wales and 12% for Northern Ireland.
- 2.6 The government has advised that it will introduce the apprenticeship levy in April 2017. It will be set at a rate of 0.5% of an employer's pay bill and will be paid through PAYE. Each employer will receive an allowance of £15,000 to offset against their levy payment. This means that the levy will be paid on any pay bill in excess of £3 million. It is understood that public sector bodies will be required to pay the levy. It has been suggested that further details will be available in the UK Government's March 2016 budget.

### **3. Budget Timetable**

- 3.1 In Wales the devolved administration will review the overall funding settlement before applying any policy variations and consequential funding adjustments. The Minister for Finance has announced the draft budget will be published on 8<sup>th</sup> December; the provisional Local Government Settlement is planned to be published on 9<sup>th</sup> December. In previous years this has been announced late afternoon.
- 3.2 The lateness of the provisional settlement in Wales and the confirmation in the form of the final settlement has caused concern amongst the 22 Welsh local authorities. Discussions have been held with Welsh government officials it has been confirmed that there is no legal impediment to authorities setting their budgets and issuing council tax bills before the start of the financial year. It is important that each local authority considers carefully its own financial and governance processes to ensure it complies with its statutory obligations. This has taken place in Powys and a meeting was held involving the S151 Officer, Monitoring Officer and key officers involved in the council tax billing process. Following advice from other officers the S151 Officer has proposed the attached timetable after consulting with the Portfolio Holder for Finance and the Chief Executive.
- 3.3 Discussions with Welsh government officials indicate (as expected) there cannot be an absolute assurance that the settlement for Powys will not change between the provisional and final settlement. In fact it is usual for adjustments to be made by Welsh government due to data verification but generally these are minor and do not affect budget planning. Welsh government officials have acknowledged the risk and that the mitigation

is to announce a provisional settlement that will be the same or very close to the final settlement.

- 3.4 As in previous years the budget and council tax setting will take place at two separate council meetings and the proposal is that the budget is set on 25<sup>th</sup> February and council tax is set on 9<sup>th</sup> March. The final settlement is on 2<sup>nd</sup> March but as indicated there is no legal impediment to setting the budget on the basis of the provisional settlement. The key issue is whether the final settlement will be different to the provisional settlement. It should be noted that the final settlement often changes due to data verification issues and these changes are usually absorbed within the budget because they are not material. The S151 Officer will advise Cabinet and, if required, Council if there are indications from Welsh government following the provisional settlement that the funding for Powys may change to the extent that mitigation is required.

### **One Powys Plan**

Setting a stable budget within the statutory deadline is key to delivering the funding to support the One Powys Plan.

### **Options Considered/Available**

The budget setting and council tax setting framework is covered by legislation and regulations. These prescribe the date by which council tax must be set and as a result this limits the options.

### **Preferred Choice and Reasons**

The attached timetable outlines the preferred dates for budget setting to meet the legislative requirements.

### **Sustainability and Environmental Issues/Equalities/Crime and Disorder,/Welsh Language/Other Policies etc**

The timetable allows for the provision of equality impact assessments for budget proposals.

### **Children and Young People's Impact Statement - Safeguarding and Wellbeing**

Not applicable

### **Local Member(s)**

Not applicable

### **Other Front Line Services**

Not applicable

**Support Services (Legal, Finance, Corporate Property, HR, ICT, Business Services)**

Finance: The report does not have any direct financial implication but meeting the statutory deadline will also mean the council has the required cashflow arising from the issuing of council tax bills.

Legal: Professional Lead Legal has no comment to make regarding any legal issues that arise as a result of this report.

Business Services: Advice has been provided on the legal deadline by which council tax must be set

**Corporate Communications**

(The views of the Senior Communications Manager must be set out here)

**Statutory Officers**

The Strategic Director Resources (Section 151 Officer) has a wider statutory duty to the council tax payer and the issuing of bills on time is an important requirement. The timetable supports this important requirement.

The Deputy Monitoring Officer has no comment to add regarding this report

**Members' Interests**

The Monitoring Officer is not aware of any specific interests that may arise in relation to this report. If Members have an interest they should declare it at the start of the meeting and complete the relevant notification form.

<b>Recommendation:</b>	<b>Reason for Recommendation:</b>
<b>That Cabinet agree the attached timetable to set the budget and council tax</b>	<b>To ensure council tax is set by the statutory deadline that requires council tax to be set before 11<sup>th</sup> March</b>

**Background Papers used to prepare Report:**

### Budget Timetable

8 <sup>th</sup> December 12.00noon	Cabinet and Management Team. Feedback and analysis of budget consultation. Presentation of impact Assessments and capital strategy (for inclusion in budget to Cabinet on 26 <sup>th</sup> January).
9 <sup>th</sup> December	Provisional settlement announced
10 <sup>th</sup> December	Provisional settlement briefing for the Leader and Portfolio Holder.
11 <sup>th</sup> December 2.30pm	Cabinet. Report on Reserves Policy
14 <sup>th</sup> December 10.00am Committee Room A	Cabinet and Budget Scrutiny Committee meeting. Management Team to attend. Budget scrutiny committee to feedback their findings. Scrutiny report to be available at the meeting. Draft MTFS (broad outline).
14 <sup>th</sup> December 2.00pm	Cabinet and Management Team to meet for final budget sign off.
15 <sup>th</sup> December 1.00pm	Cabinet. Report on Budget setting process and verbal update on Provisional settlement.
18 <sup>th</sup> December 10.00am	Council Seminar. Items include provisional settlement, Budget Scrutiny Panel feedback, savings confirmation and consultation feedback.
12 <sup>th</sup> January 10.00am	Informal Cabinet to include budget update and detailed MTFS.
19 <sup>th</sup> January 10.00am	Despatch of report to 26 <sup>th</sup> January Cabinet.
26 <sup>th</sup> January 1.00pm	Cabinet receives Budget report including MTFS, Capital Strategy and proposed council tax level.
25 <sup>th</sup> February	Council to set Budget including MTFS. Budget will need to be set on provisional information.
2 <sup>nd</sup> March	Final settlement announced.
9 <sup>th</sup> March	Council agrees level of Council Tax increase. (date depends on Budget setting but must be before 11 <sup>th</sup> March).

Statutory Business Rate Payers meeting will be held in early January – to be advised in due course.

## CYNGOR SIR POWYS COUNTY COUNCIL.

### CABINET EXECUTIVE 15 December 2015

**REPORT AUTHOR:** County Councillor Wynne Jones  
Portfolio Holder for Finance

**SUBJECT:** Financial Overview and Forecast as at 31 October 2015

---

**REPORT FOR:** Decision / Discussion / Information

---

#### 1. Summary

1.1 This report provides an update on the Revenue and Capital Budgets as at 31 October 2015 and provides an early indication of the 2015/16 financial performance. It is important to note that savings will only be built in when savings have been delivered. It is prudent to maintain this approach as it gives an accurate position.

#### 1.2 Revenue

1.2.1 The projected forecast for the revenue budget is to overspend by £3,828k (this was £3,813k as at 30 September). The position excludes the Housing Revenue Account (HRA) and Schools Delegated Budgets. The overall position is a projected 2.28% (compared with 2.27% as at 30 September) overspend of the working budget. This projection is provided after considering all known factors. This includes savings that have been achieved but as indicated in the paragraph above does not make allowance of savings yet to be identified or achieved.

1.2.2 A summary by Directorate is provided below.

Summary Forecast by Directorate	Original Budget	Total Working budget	Approved Contribution to / (Use) of Reserves	Forecast Spend	Variance (Over) / Under spend	Variance (Over) / Under spend
	£'000	£'000	£'000	£'000	£'000	%
People	71,176	70,692	(119)	73,239	(2,547)	(3.60)%
Place	40,585	43,374	(6,116)	44,690	(1,316)	(3.03)%
Schools	25,842	27,217	(2,427)	27,763	(546)	(2.01)%
Resources	5,274	5,214	(1,679)	5,301	(87)	(1.67)%
Central Activities	24,123	21,264	3,733	20,596	668	3.14%
<b>Total</b>	<b>167,000</b>	<b>167,761</b>	<b>(6,608)</b>	<b>171,589</b>	<b>(3,828)</b>	<b>(2.28)%</b>

### 1.3 **Capital**

1.3.1 Actual expenditure on the Capital budget and committed expenditure is £99.9m (compared with £95.9m as at 30 September) which represents 80.5% (73.0% as at 30 September) of the full year revised budget, which includes approved and required virements.

### 1.4 **Efficiency savings**

1.4.1 Revenue savings of £12,768k were agreed as part of the 2015/16 budget and must be made during the year. Achievement of the savings in the first six months amount to £6,855k (compared with £6,830k as at 30 September) representing 53.7% (compared with 53.5% as at 30 September) of the total to be found in the year.

### 1.5 **Reserves**

1.5.1 The revenue reserves held at the beginning of the year totalled £41m, with £9.1m held in the General Reserve. The forecast use of reserves during the year is £11,638k (£11,703k as at 30 September). Unless the agreed budget savings are delivered the forecasted will draw on this reserve by £4,352k (£3,828k section 1.3 and £524k for schools delegated other) (£4,337k as at 30 September) which would make the draw on reserves to be £15,990k (£16,040k as at 30 September).

## 2. Revenue Forecast

2.1 The table below provides the revised projected forecast to the 31 March 2016.

<b>Forecast to 31 March 2016</b>						
<b>Service Area</b>	<b>Original Budget</b>	<b>Total Working budget</b>	<b>Use of Reserves</b>	<b>Forecast Spend</b>	<b>Variance (Over) / Under spend</b>	
	<b>£</b>	<b>£</b>	<b>£</b>	<b>£</b>	<b>£</b>	<b>%</b>
<b>People</b>						
Adult & Commissioning	54,373	54,028	(119)	56,380	(2,352)	(4.35)%
Children Services	16,088	15,906	0	16,090	(184)	(1.16)%
Housing General Fund	715	758	0	769	(11)	(1.45)%
<b>Place</b>						
Leisure & Recreation	12,025	12,323	(204)	12,428	(105)	(0.85)%
Regeneration, Property & Commissioning	6,905	7,576	(687)	7,749	(173)	(2.28)%
Highways, Transport & Recycling	21,655	23,475	(5,225)	24,513	(1,038)	(4.42)%
<b>Schools</b>						
Schools Service	25,842	27,217	(2,427)	27,763	(546)	(2.01)%
<b>Resources</b>						
Professional Services	1,991	2,240	(670)	2,241	(1)	(0.04)%
Information Services	(96)	(385)	(884)	(440)	55	(14.29)%
Business Services	(159)	(163)	(47)	37	(200)	122.70%
Chief Executive	3,538	3,522	(78)	3,463	59	1.68%
<b>Service Area Totals</b>	<b>142,877</b>	<b>146,497</b>	<b>(10,341)</b>	<b>150,993</b>	<b>(4,496)</b>	<b>(3.07)%</b>
Central Activities	24,123	21,264	3,733	20,596	668	3.14%
<b>Total</b>	<b>167,000</b>	<b>167,761</b>	<b>(6,608)</b>	<b>171,589</b>	<b>(3,828)</b>	<b>(2.28)%</b>
Housing Revenue Account (HRA)	0	0	(3,495)	(127)	127	0%
Schools Delegated	70,981	78,071	(1,945)	77,787	284	0.36%
Schools Delegated - Other	0	(7,849)	0	(7,325)	(524)	6.68%
<b>Total including HRA &amp; Schools Delegated</b>	<b>237,981</b>	<b>237,983</b>	<b>(12,048)</b>	<b>241,924</b>	<b>(3,941)</b>	<b>(1.66)%</b>

2.2 The forecast over or underspends in the table above are projected against the approved working budget, the 'working budget' includes budgeted transfers to or from reserves which are also provided in the table. The forecast is therefore in addition to the budgeted requirement on reserves.

2.3 The revenue outturn performance indicator target is to be within 0.5% of net budget. The forecast outturn for the year excluding Schools delegated and the HRA is a net overspend of £3,828k (£3,813k as at 30 September) or 2.28% (2.27% as at 30 September) of the working budget.

## 2.4 People Directorate

- 2.4.1 Adult Social Care is forecast to overspend by £2.352m (£2.343m as at 30 September). There are savings expected to be made of £1.544m by 31 March 2016 but this is not yet in the forecast outturn figures and will only be built in when achieved. There is a projected additional cost of £750k to bring the Home Care hours back in house from 7 April 2015. This figure may reduce, as currently the forecast is assuming all employees will join the local government pension scheme. Further calculations will be undertaken when the level of uptake is known in the autumn. The figure may reduce when the cost of travel can be identified.
- 2.4.2 Opportunities for efficiencies continue to be explored, Commercial Services are working with the service to progress these. In the event that all the savings and pressures materialise, along with some other smaller items there would still be a forecast overspend of £807k.
- 2.4.3 The forecast outturn does not allow for any future demand pressure in the financial year, nor any future changes to contracts, including some of the Care Home fee uplifts agreed by Cabinet in September 2013 for the Care Homes still to undergo the 'Open Book' exercise.
- 2.4.4 Children's services forecast an overspend of £184k (£179k as at 30 September) with savings opportunities for third party spend continuing to be explored.
- 2.4.5 The Integrated Family Support Team (IFST) Welsh Government grant transferred to Revenue Support Grant with the allocation to children services being reduced by £45k in addition to the grant provider top slicing the budget by £28k. This pressure continues to be an issue in the forecast overspend.
- 2.4.6 There are many service area underspends such as Child Protection £19k, Preventative Work £25k, Leaving Care £72k. These are service areas where it is hard to use the commitment accounting system, as spend is made 'as and when' necessary for the service users' needs i.e. 'crisis payments', therefore the forecast actual expenditure can only be based on a profiled budget and will only be known at year end.
- 2.4.7 The Looked After Children (LAC) service area is forecasting an overspend of £126k. The potential increase in Looked after Children (LAC) costs is a significant risk as this is difficult to predict in such a volatile budget area. Placement costs can also vary depending on service user's needs. This is being offset by staff slippage but in some instances the service is utilising agency staff to bridge the gap in order to meet the statutory requirements of the service.
- 2.4.8 The Housing General Fund forecast an overspend of £11k (£15k as at 30 September) mainly due to savings yet to be found in relation to job evaluation regrading (£6k) and third party spend opportunities (£7k).

## 2.5 Place Directorate

2.5.1 Regeneration, Property and Commissioning forecast an over spend of £173k (£230k as at 30 September). The reduction of £57k is due to reduced forecast spend on works at Depots of £24k, increased forecast income on County Farms of £14k and reduced forecast spend on contracted services within Closed Landfill Sites of £22k. The majority of the forecast overspend is due to unachieved savings and income within the Building Design team. This is being monitored during the year and will be reviewed within the 2016-17 budget if unresolved.

2.5.2 Other areas are analysed as follows:-

- The fleet costs in Building Maintenance Service continues to be investigated as it shows a forecast over spend of £43k.
- The Pavilion continues to forecast an overspend of £58k.
- The over spends mentioned above are offset by a forecast under spend of £93k in Statutory Testing. This is as a result of the variable nature of fixed electrical and legionella testing over the programme years.
- Regulatory Service are forecasting an under spend of £175k, an increase of £34k from that reported at period 6. The main reason for the increased under spend is due to staff vacancies and maternity leave.
- Currently no grant has been awarded for Animal movements from January 2016, a review of the grant is underway in WG, and a pressure of £24k is reported in relation to this unconfirmed grant.

2.5.3 Highways, Transport and Recycling (HTR) forecast shows an over spend of £1,038k (£1,081k as at 30 September). This consists of the service overspend for Highways, Transport and Recycling of £411k (£455k as at 30 September) and the overspend allocated to the Directorate as a whole which amounts to £627k (£626k as at 30 September). The movement in forecast overspends are explained below.

2.5.4 It is assumed in the forecast that across the HTR service area savings totalling £621k will not be achieved in this financial year. It is mainly as a result of these unachieved savings that there is a forecast overspend.

2.5.5 Network Management are continuing to report a forecast over spend of £302k. During budget setting, pressures were highlighted in the Engineering and Transportation budget mainly due to unachievable NMWTRA income targets of £275k, successful JE appeals of £59k and unachievable Highways Design income of £89k, some savings have been identified to offset these pressures but a balance of £337k remains. Under spends on staffing offset the pressure, a restructure is in progress to reduce the shortfall. Offsetting against this overspend civil enforcement are reporting a forecast under spend of £160k (£131k September) as car park income has increased as a result of the increase in charges and an under spend of £125k is reported within Highways Technical Services and Integrated Transport as a result of vacant posts. The grant for 16-18 year old bus travel has been confirmed at £148k rather than the £103k reported at September this provides an extra £45k of funding to support the Transport budget.

- 2.5.6 Waste Operations forecast an outturn over spend of £103k (£23k as at September). An over spend of £289k on staffing and subcontractor costs, due to extra weekend collections in Machynlleth as previously reported and the costs of sickness and holidays being greater than estimated at budget setting are offset by increased income from in house delivery of services and greater ESDDR grant than estimated.
- 2.5.7 Highways County Roads are forecasting an under spend £710k (£706k September) as a result of under spends on salaries of £304k and fleet costs of £276k this is offset by an over spend of £380k (£348k September) on Highways External works mainly as a result of the Grounds SLA works.
- 2.5.8 The street cleansing and public toilets budget is forecast to over spend by £161k. (£178k September). Public Toilets are forecast to over spend by £259k, an over spend of £70k is attributable to paying two years grant to the Town Councils in the first year, and this will be amended in period 8, with the remainder as a result of increased running costs and cleaning due to the delays in closing toilets. Street Cleaning is reporting an under spend of £98k.
- 2.5.9 The costs allocated to the Directorate consist of the corporately reallocated savings of £29k 'Grants to Voluntary Organisations' and £599k 'Third Party Spend' and are forecast not to be achieved.
- 2.5.10 The Leisure and Recreation Service are forecasting a £105k overspend (£119k as at 30 September) for the current year. Recreation and Countryside Policy is forecasting an overspend of £23k due to unachieved savings in relation to staff costs in relation to the Leisure Contract. Across the service there are overspends being forecast and this is due to savings not yet being identified nor achieved. Sports and Leisure centres are forecast to overspend by £66k. The movement from a forecast underspend to overspend is mainly due to unidentified expenditure of £70k on various small items of spend at the time of transfer for which the Council is responsible.
- 2.5.11 The Libraries now have a balanced budget but there is a forecast overspend on Youth Service, £10k, with savings to be achieved and £10k. Catering continue to forecast a breakeven position. Cleaning is forecasting a £40k overspend which is mainly due to the implementation of the Living Wage (£80k).

## 2.6 **Schools Service (excluding Schools Delegated)**

- 2.6.1 The Schools service are forecasting an overspend of £546k (£387k as at 30 September). School central budget is forecast to be overspent by £71k due mainly to savings to be identified. Within this net overspend figure is savings target of £133k brought forward from the 2013/14 financial year and which £68k has been achieved with the remainder of £65k to be identified in this year.
- 2.6.2 School Operational Costs is forecasting an overspend of £579k, an increase of £163k from last month. This forecast overspend is mainly due to Home to School & College Transport of £347k which increased since period 6 by £37k. The increase is due to invoices relating to 2014/15 financial year amounting to £30k being processed. School Meals forecast an overspend of £48k in part due to the Living Wage for some cashiers and due to the School Meal subsidy effectively increasing to cover affected catering staff which is being absorbed within the service. Within this heading it is expected that severance pay is forecast to

overspend by £183k, an increase of £113k from last month and is due to the cost of current year redundancy payments for school staff being in excess of budget.

2.6.3 Schools Pupil Inclusion is forecasting an underspend of £69k (£67k as at 30 September). There is £26k underspend on the Units budgets due to a number of vacant posts. The ALN central support teams forecast a £37k underspend due to slippage in staff and travel budgets. There are other small underspends totalling £6k on various headings within this area.

2.6.4 The schools' delegated centrally held budget is forecast to be overspent by £524k, £3k less than last month, due to a net over delegation, as reported previously, which will need to be addressed in future years.

## 2.7 Resources Directorate

2.7.1 Professional services are forecasting an overspend of £1k (£1k as at 30 September) at year end. Vacancies which have existed in the Commercial Services budget have been utilised to make the necessary savings. Other areas are expected to be forecasting underspends to offset any overspends in the service due to restructures or staff vacancies not being filled.

2.7.2 Business Services are forecasting an overspend of £200k (£231k as at 30 September). The savings target of £464k has been distributed across service headings. There is a forecast contribution from reserves of £298k in respect of Job Evaluation which has transferred from Professional Services (£251k) and Employment Services (£47K). Business Support holds the majority of these savings requirements. Business Support is forecast to be overspent by £179k but the Head of Service anticipates that the required savings will be found by targeting on-going vacancies, staffing and third party spend. Employment Services is forecast to be overspent by £114k mainly as a result of savings target of £122k not being achievable in this year because of timing issues. The savings will be delivered in a full year from 2016 but for this financial year these are offset by a small underspend on some budgets such as Income and Awards (£53k) and Access to Services (£24k). As savings are identified and achieved these will be built into the projections.

2.7.3 The Information Service is currently showing a forecast underspend of £55k (£57k as at 30 September) and is due to staff vacancies throughout the year. As reported previously the savings target of £68k has been achieved and is permanently removed from base budget.

2.7.4 Communications are forecast to underspend by £10k due to a variety of small savings across various budgets.

2.7.5 The Chief Executive's service area includes legal and democratic services, member services and communications. It is forecast to be underspent by £58k (£55k as at 30 September 2015) by year end.

## 2.8 Central Activities

2.8.1 Central Activities are forecasted to underspend by £665k (£660k as at 30 September).

2.8.2 Underspends are projected for capital charges of £1,227k following a review of the charges made to HRA following the "buy-out" in April 2015 which means that the cost of interest are now charged to HRA not the Council Fund. This is being offset

by overspends on Growth and Savings (£609k) due to fleet and transport savings not being achieved and which are now incorporated in this heading. The balance of the net overspend is due to small overspends across a variety of headings. The forecast also includes a projected surplus on Council Tax of £269k which is in addition to the £215k included in the base budget.

## 2.9 Schools Delegated

2.9.1 The Schools Delegated Budget is forecasting an underspend of £284k (£110k as at 30 September). The main reason for this is that grant income has been allocated in full to schools and it is assumed all grant monies will be spent within school budgets. During the autumn finance officers will ensure that schools build the corresponding expenditure into their budget plans and this will ensure a more accurate forecast outturn position in the future.

School Deficit / Surplus	Opening Balance	Projected Contribution / (Use)	Forecast Outturn	Projected Closing Balance
	£'000	£'000	£'000	£'000
Total Deficits	(916)	287	(34)	(663)
Total Surplus	4,520	(2,283)	318	2,556
<b>Total Balance</b>	<b>3,604</b>	<b>(1,995)</b>	<b>284</b>	<b>1,893</b>

This is analysed into the different categories of schools as follows:-

Type of School	Opening Balance	Projected Use	Forecast Outturn	Forecast Closing Balance
	£'000	£'000	£'000	£'000
Primary	2,897	(998)	(5)	1,894
Special	13	(118)	(24)	(129)
Secondary	694	(879)	314	129
<b>Total</b>	<b>3,604</b>	<b>(1,995)</b>	<b>284</b>	<b>1,893</b>

The table below shows the breakdown of schools in deficit and surplus positions:-

Type of School	Number of Schools Projected to be in Deficit at 31 March 16	Cumulative forecasted deficit	Cumulative forecasted surpluses	Total	Deficit to surplus
		£000	£000	£000	%
Primary	23	(295)	2,189	1,894	(13%)
Special	1	(268)	138	(129)	(194%)
Secondary	7	(343)	472	129	(73%)
<b>Total</b>	<b>31</b>	<b>(906)</b>	<b>2,799</b>	<b>1,893</b>	<b>(32%)</b>

2.9.3 Schools are forecasting deficit balances increasing through to 2016/17 and 2017/18. Continual monitoring will be required by officers and governing bodies to ensure deficit balances forecast in future years are kept under control.

## 2.10 Housing Revenue Account

2.10.1 The Housing Revenue Account is forecast to be underspent by £126k (£392k as at 30 September). The budget includes a £5.326m contribution from reserves to finance the cost of reaching WHQS by March 2018. The underspend position in-part is due to some commitments not being recorded in the system and:-

- Cyclical, Voids & Responsive Maintenance at the end of Period 7 is forecasting an underspend of £92k. There have been difficulties with the interfaces between the new housing system QL and the general ledger which can result in the forecasting not being as accurate as it could be.
- Staff costs, including salary and travel have an under spend of £25k. Due to vacant posts at the beginning of year.
- Other small underspends of £41k on Computer Maintenance, Court Costs £5k and £13k on Alarms contract.
- £50k contribution is now being made to the Joint Venture (JV) project, not included in past forecast outturns, which has reduced the forecast underspend.

### 3. Reserves

- 3.1 The total revenue reserves held at 1 April 2015, together with the forecast addition/ (use) of reserves during the year and the projected year end balances at 31 March 2016, are set out in the table below.

<b>Summary</b>	<b>Reserves 01/04/15 Surplus/ (Deficit) £`000</b>	<b>Forecast Addition / (Use) of reserves £`000</b>	<b>Projected 31/3/16 Surplus/ (Deficit) £`000</b>
<b>General Fund</b>	8,988	(38)	8,950
Projected Overspend	0	(3,828)	(3,828)
Projected Overspend - Schools Delegated Other	0	(524)	(524)
	<b>8,988</b>	<b>(4,390)</b>	<b>4,598</b>
<b>Ringfenced &amp; Specific Reserves</b>			
Budget Management Reserve	2,019	0	2,019
Specific Reserves	1,516	64	1,580
21st Century Schools Reserve	6,916	(2,390)	4,526
Invest to Save & Corporate Initiatives (inc JE)	9,355	(1,108)	8,247
Insurance Reserve	2,188	0	2,188
Transport & Equipment Funding Reserve	3,028	(3,137)	(109)
<b>Sub-Total</b>	<b>25,022</b>	<b>(6,571)</b>	<b>18,451</b>
Schools Delegated Reserves	3,604	(1,995)	1,609
School Loans & Other Items	(521)	50	(471)
Projected Underspend	0	284	284
<b>Net School Delegated Reserves</b>	<b>3,083</b>	<b>(1,661)</b>	<b>1,422</b>
<b>Total Ringfenced &amp; Specific Reserves</b>	<b>28,105</b>	<b>(8,232)</b>	<b>19,873</b>
<b>Housing Revenue Account</b>	3,832	(3,495)	337
Projected Underspend	0	127	127
	<b>3,832</b>	<b>(3,368)</b>	<b>464</b>
<b>Total Revenue Reserves**</b>	<b>40,925</b>	<b>(15,990)</b>	<b>24,935</b>

\* School delegated reserves are split out to show reserves position under budget funding arrangements as some items are not yet recorded in the financial ledgers. This is intended to show the reserves as if the accounts were shut down at the end of this period.

\*\*The opening balance has reduced from by £114k from £41,039k due to adjustments following the year end audit of financial statements

- 3.2 The forecast addition/use of reserves includes actuals to date as well as expectations of movement in remainder of year.
- 3.3 Underspends and overspends recorded in the revenue table in section 2.1 have been included in the forecast above. The delivery of savings is essential to reduce the projected overspend. Any overspend will have to be met from the General Fund Reserve and will have a significant impact on the level of the reserves held.

3.4 The use of Specific and Ring Fenced Reserves is significant at £12.011m (£12.205m as at 30 September), however, these reserves have been set aside for these planned purposes including delivery of the Welsh Housing Quality Standard and the 21<sup>st</sup> Century Schools Programme.

3.5 After considering the projected overspend the revised forecast level of General Fund reserves at 31 March 2016 is 1.93% (1.98% as at 30 September) of total revenue forecast spend. This excludes all specific and ringfenced reserves in the table above.

#### 4. Efficiency Savings

4.1 The table below summarises the current position for the 2015/16 savings.

	2015/16	Achieved to date	Remainder to find	Achievement expected Qtr 3	Achievement expected Qtr 4
	£	£	£	£	£
<b>Place</b>

<b>People</b>	<b>1,984,870</b>	<b>314,560</b>	<b>1,670,310</b>	<b>470,710</b>	<b>1,199,600</b>
<b>Change &amp; Governance</b>					
<b>Change &amp; Governance</b>	<b>321,152</b>	<b>318,852</b>	<b>2,300</b>	<b>1,540</b>	<b>760</b>
<b>Resources</b>					
Resources	536,088	154,290	381,798	2,280	379,518
Corporate Activities	1,542,940	130	1,542,810	240	1,542,570
<b>Resources</b>	<b>2,079,028</b>	<b>154,420</b>	<b>1,924,608</b>	<b>2,520</b>	<b>1,922,088</b>
<b>Communications</b>	<b>4,080</b>	<b>6,030</b>	<b>(1,950)</b>	<b>0</b>	<b>(1,950)</b>
<b>Total</b>	<b>12,767,954</b>	<b>6,854,741</b>	<b>5,913,233</b>	<b>755,989</b>	<b>5,157,244</b>

4.2 Savings of £6.85m (£6.83m as at 30 September) have been achieved to date representing 53.7% (53.5% as at 30 September) of the total required. The table above shows the profiling of the remaining £5.91m over the year, 87.2% is profiled into the final quarter of the year. The savings are depicted graphically in Appendices 1 and 2 attached.

- 4.3 It is important that prior year savings are also monitored because in some cases savings cannot be completely delivered in a single year but are built into base budget. The savings target brought forward from 2014/15 to be achieved in 2015/16 amounted to £3.56m. Of this £1.135m was allocated to specific service areas, which increased the overall target to £12.767m as shown in the table above. This reduces the £3.56m to £2.425m. To date £2,152k (£2,042k as at 30 September) has been found in 2015/16 with a remainder of £273k (£383k as at 30 September) which is yet to be achieved.

	<b>2014/15 Savings target brought forward</b>	<b>Achieved</b>	<b>Remainder</b>
	<b>£000</b>	<b>£000</b>	<b>£000</b>
Place	1,290	1,126	164
Schools <sup>1</sup>	133	10	123
People	243	177	66
Change & Governance	(53)	0	(53)
Resources	127	127	0
Central Activities	685	654	31
<b>Total</b>	<b>2,425</b>	<b>2,094</b>	<b>331</b>

<sup>1</sup>Previously reported £68k was achieved. This is amended to reflect £58k was funded by an in year underspend.

- 4.4 A prudent approach is adopted and only when savings are delivered are they built into the projections as achieved.
5. **Capital Programme**
- 5.1 The revised Capital programme following the approval of virements during the year has decreased to £124.14m (£131.56m as at 30 September).
- 5.2 Actual and committed spend as at 31 October 2015 is £99.95m (£95.98m as at 30 September) which represents 80.5% (73.0% as at 30 September) of the working budget. The table below summaries the position for each directorate.

Service	Original Budget 2015/16	Virements Approved	Virements Required by Cabinet	Virements Required by Council	Revised Working Budget 2015/16 as at 30 August 2015 (after virements approved and required)	Actuals & Commitments	Remaining Budget

<b>TOTAL</b>	<b>131,519</b>	<b>251</b>	<b>(350)</b>	<b>(7,283)</b>	<b>124,137</b>	<b>99,948</b>	<b>24,189</b>	<b>19.5%</b>

The virements required by Council, have been approved by Cabinet and are awaiting Council approval

- 5.3 There were £7,633 virements proposed for approval in October 2015 (£Nil in September) as follows:-.

### CAPITAL PROGRAMME - VIREMENTS REQUIRED AS AT 31 OCTOBER 2015

	Amount £000
<b>Schools and Inclusion</b>	
The Gwernyfed Outline Business Case has now been approved by WG. This virement recommends that £1.267m of the budget is rolled forward into 2016/17 to match the likley spend.	(1,267)
This virement recommends that the funding for Ysgol Dafydd Llwyd project is changed from reserves to Prudential Borrowing to take advantage of a preferential rate of interest that is available for 21st Century School Project in 2015/16. Ysgol Dafydd Llwyd is the only eligible school project in this year.	1,830
	(1,830)
The virement recommends that £350K of the budget is rolled forward to 2016/17 for the Beacons Campus project.	(350)
	<hr/> <b>(1,617)</b> <hr/>
<b>Leisure and Recreation</b>	
This virement recommends that the £2.925m of the budget is rolled forward to 2016/17. The construction of the Cultural Hub is due to commence in the early 2016.	(2,925)
	<hr/> <b>(2,925)</b> <hr/>
<b>Housing</b>	
This virement recommends that following a review of the Housing Revenue Account budgets £3.092m is rolled forward to 2016/17.	<hr/> <b>(3,092)</b> <hr/>
<b>Total</b>	<hr/> <b>(7,633)</b> <hr/>

- 5.4 There were £168k of capital grants received as at 31 October 2015 (£Nil in September) as follows:-.

### New Grants Accepted as at 31 October 2015

<b>Highways Transport and Recycling</b>	
Welsh Assembly Grant for Caddies and Bins	150
<b>Leisure and Recreation</b>	
Army Covenant Grant for Brecknock Museum	3
£5k from the Art Fund to fund the acquisition of a painting for Brecknock Museum	5
£5k from the V&A Purchase Fund to fund the acquisition of a painting for Brecknock Museum	5
£5k from Brecknock Art Trust to fund the acquisition of a painting for Brecknock Museum	5
	<hr/> <b>168</b> <hr/>

### 5.5 PLACE

- 5.5.1 The main aspect of the Leisure and Recreation service capital programme is in relation to the Brecon Museum project and the rest is relatively small. Whilst the projects have been identified they have not yet been undertaken and this is resulting in a large underspend although the forecast is for this to be spent. The service has not yet identified when these balances will be spent. The programme for libraries includes £112k for the acquisition of a mobile library which has been ordered from appointed contractor with delivery and full payment due in quarter 4.

Within outdoor recreation, there are three major components. £25k has been set aside for works at the outdoor bowling pavilion in Llandrindod Wells, £32k for the Corenwall-Lewis Memorial restoration project and £50k capital funding has just been awarded for phase 2 to the Priory Groves project, to which the Service has stated that it is shortly to be committed.

5.5.2 A spend of £5.492m against a total budget of £24.452m is reported at the end of October 2015.

- 66% of the capital budget remains unspent at the end of October.
- A virement is requested to roll forward £2.925m in 2016-17 against the Brecknock Museum Phase 2 project.
- The fleet capital is profiled to be spent towards the end of the year due to the lead time on purchasing vehicles.
- HTR capital schemes were delayed in being reported and agreed so the profile of this spend will also be towards the end of the year.

## 5.6 RESOURCES

5.6.1 The Access to Services capital programme has a budget of £400k to mainly cover the Channel Shift project. Although it is currently showing an underspend of £370k it is expected to be fully spent by year end as the service has not identified any issues relating to this project.

5.6.2 The ICT programme includes DRAIG, server infrastructure and desktop ICT refresh but remains largely unspent.

## 5.7 SCHOOLS

5.7.1 Actual Expenditure represents 50% (33.5% as at 30 September), the capital programme consists of:-

- Major improvement programme has 38 schemes in 2015/16, including schemes carried forward from 2014/15. There are 15 schemes at the design stage, 4 are out to tender, 7 are under construction and 12 schemes have been completed. A DDA project currently being designed will require the budget in 2015/16 financial year to be re-profiled around the construction program of work with overall project completion by September 2016. Any uncommitted funding within 2015/16 projects will be carried forward to the program in financial year 2016/17.
- 21<sup>st</sup> Century schools has 6 programmes of which each are at varying levels of progress:-

### **The Gwernyfed Catchment Primary schools**

Outline Business Case has been approved by WG on 29<sup>th</sup> September 2015 for five new primary schools to replace Hay, Clyro, Llangorse, Archdeacon Griffiths and Talgarth/Bronllys. Total investment: £24,360,403.28. Total PCC contribution: £11,754,731.68. A virement has been completed which recommends that £1.267m of the budget is rolled forward into 2016/17 to match the likely spend.

Next steps: Work commences on Full Business Case, which includes contracting with a design and build contractor. Full Business Case to be submitted no later than November 2016. Planned start on site: February 2016. Planned completion date November 2018. Officers are currently revising these timescales to ensure a shorter completion period.

### **Ysgol Dafydd Llwyd**

A virement has been completed which recommends that the funding for Ysgol Dafydd Llwyd project is changed from reserves to Prudential Borrowing to take advantage of a preferential rate of interest that is available on 21<sup>st</sup> Century School Project in 2015/16. Ysgol Dafydd Llwyd is the only eligible school project in this year.

### **Brecon Beacon Campus – Original Recommendation**

March 24<sup>th</sup> - Cabinet approve the SOC (Strategic Outline Case) based on the potential closure of Brecon and Gwernyfed High Schools and the development of a new campus at Brecon.

SOC approved by WG May 2015 – this means that WG has approved, in principle, the funding of a new campus in Brecon.

Work on the Campus project has been placed on hold, whilst a Pause and Review period takes place. The Council is considering all options related to these two schools again.

A report to be considered by Cabinet late 2015/early 2016 which will include recommendations for the future of secondary education in both catchment areas, which will be followed by formal consultation.

Outline Business Case (OBC) to be submitted late 2015/early 2016.

Planned start on site: August 2017  
Planned completion date: September 2019

A virement has been completed which recommends that £350k of the budget is rolled forward to 2016/17 for the Beacons Campus project.

### **Welshpool**

SOC due for completion December 2015. Current preferred option: 2 new schools (one English medium, one Welsh medium). Total project cost: £8,468,157.13. PCC contribution: £4,594,657.13

### **Ysgol Bro Hyddgen**

Work on SOC underway, due for completion 31<sup>st</sup> Jan 2016. Dates for project completion and spend profile will be identified as part of the SOC process.

**Ysgol Glantwymyn** - The project to extend Glantwymyn School has been delayed. A revised Business Justification Case will be submitted to WG later this year. The virement request has been approved by Cabinet and will be submitted to Council shortly for approval to roll forward the budget into 16/17.

## 5.8 PEOPLE

5.8.1 The 2015/16 capital allocation was £60k, before an Invest to save bid re Glan Irfon Biomass boiler virement of £119k is approved, making a total budget of £179k. To date there are actuals and commitments to the value of £79k for resurfacing the car park at The Park Day Centre, Newtown, Castell y Dial Electrical Works and Glan Irfon Builth Wells. Remaining budget for 2015/16 to commit of £100k.

## 5.9 HOUSING REVENUE ACCOUNT

5.9.1 The Housing Revenue Account (HRA) Capital budget is for the Capital Programme of the Housing Stock, which is funded by £3.71m Major Repairs Allowance from WG, Housing reserves, receipts & prudential borrowing. This has been fully utilised by the end of quarter 2.

5.9.2 The Housing Revenue Account (HRA) capital from 2 April 2015 includes the settlement debt from the subsidy agreement buyout which is £72.5m which has been funded by the use of Public Works Loan Board (PWLB) fixed maturity loans.

5.9.3 Housing Revenue Account (HRA) Capital included the Welsh Housing Quality Standards (WHQS) plan of £14.4m for 2015/16 as set at budget time, to enable the council to achieve WHQS by March 2018. As per the forecast produced by the service a virement has been completed and will be presented at Council to reduce the budget by £2.33m. At the end of Period 7 the actual and committed spend £14.55m.

5.9.4 Other capital works include £101k set aside to improve the standard of the sewerage plant sites, to enable the transfer of ownership, however after an update from the service no spend will be completed in 2015/16 and a budget virement has been completed and will be presented at Council to roll forward in to 2016/17.

5.9.5 Other works also includes the budget for remodelling of Housing Stock (£1.1m), and New Build/Repurchasing (£250k) all of which have been included in the Business Plan agreed by Welsh Government. However, after an update from the service not all spend will be completed in 2015/16 and a budget virement for £0.71m has been completed and will be presented at Council to roll forward in to 2016/17 to be used to remodel housing stock.

5.9.6 The Housing General Fund (HGF) Capital budget of £5k will be funded from revenue and is the remaining expenditure for the Kings Meadow Gypsy Site, to date actual payments and commitments of £3.9k.

5.9.7 The Housing Grant Fund budget is £4.1m funded through General Capital receipts and supported borrowings which has increased from last month due to the underspend of £511k in 2014/15 and awarded Arbed funding of £1.3m. The Disabled Facilities Grant has a budget of £1.53m of which £1.5m is funded by Welsh Government (WG). The Co2i scheme has a budget of £448k and The Landlord Loans £596k. At the end period 7 the actuals and commitments are £2.07m.

## 6. Issues affecting the Forecasts

6.1 The forecast figures take account, where appropriate, of any commitments within the system, i.e. purchase orders raised or items which have been goods receipted. It is noted that even though there is a principle of “no order no pay” in place nevertheless in October 2015, there have been 1,080 invoices (912 invoices September 2015) with a value of £1.541m paid (£1.139m paid September 2015) where the order in the main financial system of E-Financials is dated either on or after the date of invoice. In addition, in this period there has been 3,772 payments (2,665 payments in September 2015) with a value of £6.051m (£5.515m in September 2015) with no order. The majority of the £6.051m is broken down as follows:-

- £2.171m (£2.959m in September 2015) of this has come via ROCC, so no order information is available.
- £0.751m (£0.637m in September 2015) was against the Schools service. (Only 25 of the schools use e-procurement system, and therefore the other schools would not have electronic orders).
- £2.575m (£1.665m in September 2015) going through the balance sheet for deductions from pay, rent and council tax refunds, high school bank accounts and one bill/utility payments. Orders are not required for these transactions.

6.2 The £6.051m payments without an order can be broken down into the following main departments:-

	<b>E Financials</b>	<b>ROCC</b>	<b>Grand Total</b>
	<b>£000</b>	<b>£000</b>	<b>£000</b>
Resources	7	-	7
Place	719	1,177	1,896
Schools	751	787	1,539
People	32	1	33
Corporate and Balance Sheet	1,207	23	1,230
Other payments (not supplier invoices)	1,163	182	1,345
<b>Grand Total</b>	<b>3,880</b>	<b>2,171</b>	<b>6,051</b>

6.3 The above issues are being taken forward within the recently established budget monitoring review group to improve the level of understanding and use of the Purchase Order system. Whilst considerable improvements have been made this will further enable a more accurate forecasting methodology for budget monitoring. It is important that budget holders support this corporate requirement if only to improve the accuracy of the budget monitoring reports for their service.

6.4 For schools the main issues are:-

- **E-procurement & ROCC** – The accuracy of the budget forecast across the service area and particular Home to School Transport and the Repairs and Maintenance budgets are significantly dependent on controlled use of the e-procurement and ROCC property related systems. The issue identified above regarding Home to School Transport is partly caused by the ineffective use of

- **e-procurement.** There have also been instances where officers are putting commitments onto the system when the invoice is received, this makes it extremely difficult to forecast accurately.
- **Transport** - There have been instances during the year where finance have been notified of additional routes that have been in existence since the start of the financial year, and these have been added into the forecast. There are also continuing instances of invoices being processed relating to last financial year which are increasing the projected overspend.
- **Severance Pay** – The current forecast position assumes that there will be no contribution from Corporate services towards the cost of current year school redundancy costs, this will be confirmed towards year end.
- **Cleaning restructure** - The delay in transferring cleaners to schools delegated budgets may affect the budget position of individual schools, as salary costs have risen in part due to the decision to pay the living wage.
- **ALN** - The service is continually subject to unpredictable spend due to learners and/or learners parents moving into the authority with high level of need and associated cost. Where a statement applies the authority has legal obligation to continue that provision which could be placement in a residential school.
- **Grant utilisation** – A working group is looking at system coding issues to improve accuracy of cost allocation to grant funding. This is being carried out to ensure proper utilisation of the grant is demonstrated.
- **Rates Charges** – Rates charges have been collected from the schools and held centrally awaiting the Income and Awards department to charge the actual costs for 2015/16. At the timing of this report not all properties had been charged for, and the service have requested that the remaining charges are actioned as soon as possible. The net impact may have an effect on the forecast outturn position.
- **School Budgets Position** – The current budgeted use of reserves is £1.995m, more information needs to be gathered from schools over the Autumn Term to ascertain how much of this will be required. The finance meetings are near completion and the financial position is being updated following these meetings.
- **Secondary School Forecast Information** – With 5 schools having yet to submit forecast information this will have an impact on the current budgeted use of reserves and forecast outturn, a further request will be sent to all schools in order to inform the Period 8 position.

6.5 For Adults and Childrens Services the main issues affecting the forecast are:-

- outturn does not allow for any future growth in demand (this will need to be met by the directorate) , nor any future contract uplifts agreed with the independent sector, including some of the Care Home fee uplifts agreed by Cabinet in September 2013 for the Care Homes still to undergo the 'Open Book' exercise.
- Forecast outturn is based on actual expenditure on the general ledger, eProcurement commitments and profiled budgets. This requires regular

housekeeping of eProcurement to ensure accuracy of commitments as this is affecting forecasts.

- Looked after children (LAC) - The service is continually subject to unpredictable spend due to changing and complexity of needs/circumstances of current clients/family need, families moving into the authority, secure placements for the safety of the client and remand cases, where the authority has a legal obligation to continue that provision

6.6 The main issue affecting Housing is the interfaces between the Housing System QL and the General Ledger efinancials systems where inaccurate orders being held on the ledger. Forecasts are therefore on best estimate from service managers spreadsheets.

6.6 For the Place directorate the main issues are:-

- Within Regeneration, Property and Commissioning there are a number of areas that earn income, these areas are notoriously difficult to forecast and the forecast currently assumes that the income will follow similar profiles to previous years.
- Timesheet entry across Regeneration, Property and Commissioning and Highways, Transport and Recycling are not up to date therefore the forecast assumes estimates for the outstanding timesheets.
- NMWTRA Income – some invoices have been raised to NMWTRA for 2015/16, however invoicing is not up to date as the service are still not receiving monthly statements from the trunk road agency to allow regular billing. The forecast assumes that all income will be recovered.
- An outstanding creditor remains for Technical Surveys of £116k at the end of March 2015, of which only £4k has been paid to date. The forecast assumes that these invoices relating to 2014/15 will arrive and be paid, but the service is advised to follow up the outstanding invoices at the earliest opportunity.
- The waste contracts need to be monitored closely given the swings in the forecast over previous months.
- It has been agreed that Hay Town Council will receive 20% of net income earned from the Hay Car Park. Works are underway to calculate what this payment will equate to, and is currently not built into the forecast.
- The purchase of Route Optimisation Software is required to progress the savings across the HTR service the cost of this is estimated at around £25k, if the decision is made to purchase the software this would increase the forecast over spend.
- A survey on Brecon Market Hall is to be carried-out, any essential repair work identified is required to be completed in this financial year. The costs that will arise from this are not yet known and hence are not funded.

- There are number of public enquiries Upper Heath, Mellow Croft and Garregllwyd coming to a conclusion with volatile costs, an estimation of £110k has been provided for in the forecast.

## 7. **Prudential Indicators**

- 7.1 The Prudential Indicators are included in this month's report because of the virements recommended this month. The virements are recommended for both the HRA and Council Fund schemes and include Schools and Leisure and Recreation. The new leisure contract with Freedom Leisure included proposals to invest in new schemes in some centres and these are funded from prudential borrowing.
- 7.2 The revised Prudential Indicators are attached in Appendix 7.
- 7.3 Table 1 shows that the ratio of financing costs to net revenue stream is increasing from 2015/16 onwards from 6.47% in 2015/16 to 8.17% in 2019/20.
- 7.4 Table 2 shows the Capital Financing Requirement which is £337m by 2019/20.
- 7.5 The reduction in borrowing is shown in the tables 5 and 6. The notional incremental change on council tax is reduced in the early years but shows an increase in 2019/20.

## 8. **Options Considered/Available**

No alternative options are considered appropriate as a result of this report.

## 9. **Preferred Choice and Reasons**

None to consider.

## 10. **Sustainability and Environmental Issues/Equalities/Crime and Disorder, /Welsh Language/Other Policies etc.**

The proper management and control of the Council's finances together with the associated delivery of services will have an impact across all Council services. It is not sustainable to allow service areas to overspend without a plan to address the underlying cause of the overspending.

## 11. **Children and Young People's Impact Statement - Safeguarding and Wellbeing**

This report presents the financial position for Children's services and forecasts a near balanced budget for the year. The budgets must continue to be monitored to ensure the allocated resources meet service need.

## 12. **Local Member(s)**

This report relates to all service areas across the whole County.

## 13. **Other Front Line Services**

This report relates to all service areas across the whole County.

## 14. **Support Services (Legal, Finance, HR, ICT, BPU)**

This report has no specific impact on support services other than reporting on those service areas financial outturns. Financial Services work closely with all service areas in monitoring financial performance against budgets.

15. **Local Service Board/Partnerships/Stakeholders etc.**

This report presents financial information which will help inform the future medium term financial plan and therefore has implications for any related organisation.

16. **Communications**

This report has no specific communication considerations. Detailed finance reports are presented to Heads of Service, Cabinet and the Audit Committee. These reports are public and are part of a range of statutory and non-statutory financial information documents including the Statement of Accounts.

17. **Statutory Officers**

The Strategic Director, Resources (Section 151 Officer) notes the overall financial position and that the position has improved since the last report. It is important that savings are only built in when delivered in order to give a true and fair view of the financial position. Directorates will need to ensure savings are delivered in order to balance the budget so that reserves are not reduced.

The No Purchase Order No Pay process has been a significant step forward but greater consistency is needed in order to see the overall benefit of the approach.

The Monitoring Officer has no specific concerns with this report.

18. **Members' Interests**

The Monitoring Officer is not aware of any specific interests that may arise in relation to this report. If Members have an interest they should declare it at the start of the meeting and complete the relevant notification form.

Recommendation:	Reason for Recommendation:
<p><b>That:</b></p> <ul style="list-style-type: none"> <li>a. the contents of this report are noted by Cabinet; and</li> <li>b. Cabinet supports appropriate action by services to curtail or reduce the reported forecasted service deficits.</li> <li>c. It to be noted that there are Capital virements as set out in paragraph 5.3.</li> </ul>	<p>To monitor the Council's financial performance and ensure that spending remains within approved limits and that the 3% minimum general fund reserve is maintained.</p>

# C256- 2015

## CYNGOR SIR POWYS COUNTY COUNCIL.

### CABINET EXECUTIVE 15<sup>th</sup> December 2015

**REPORT AUTHOR:** County Councillor Arwel Jones  
Portfolio Holder for Education

**SUBJECT:** Welsh-medium stream at Ysgol Dolafon

---

**REPORT FOR:** Decision

---

#### **Summary**

This report recommends the commencement of formal consultation on the closure of the Welsh-medium stream at Ysgol Dolafon, Llanwrtyd Wells from the 31<sup>st</sup> August 2016, with the school to be re-categorised as an English-medium school from the 1<sup>st</sup> September 2016.

The report is supported by the following appendices:

- Appendix A – Data sheet for Ysgol Dolafon
- Appendix B – Draft Equality Impact Assessment
- Appendix C – Draft Community and Welsh Language Impact Assessments
- Appendix D – Financial Assessment

#### **Background**

On the 11<sup>th</sup> November 2014, Cabinet approved a new Powys School Transformation Policy, which set out the Council's vision and process for the transformation of primary and secondary schools in the county.

The Policy includes:

- a range of criteria to be used to determine which schools would be reviewed
- the establishment of a School Organisation Review Panel (SORP) to carry out reviews of schools
- the establishment of a School Review Process to be used to review schools

In December 2014, the SORP carried out an Initial Assessment of Schools in accordance with Stage 1 of the School Review Process, during which data for all schools was considered. Schools were also ranked against the criteria outlined in the School Transformation Policy. As a result of this Initial Assessment of Schools, the SORP agreed to carry out a detailed review of a

number of schools, which included the Welsh-medium stream at Ysgol Dolafon, Llanwrtyd Wells.

Ysgol Dolafon met the following criteria:

- Capacity: The percentage of surplus places in a school is higher than 15%
- Financial: The cost per pupil is more than 120% of the council's average for the sector
- Pupil Numbers: There have been fewer than 25 pupils in the Welsh-medium stream for the three previous years

Dialogue has taken place with the governing body, headteacher and local member during 2015 in accordance with Stage 2 of the School Review Process as described in the School Transformation Policy. This has included:

- An initial meeting to agree data in respect of the school and to discuss future options relating to the Welsh-medium stream at the school
- An opportunity for the governing body to provide feedback on the options presented to them
- A SORP meeting to agree a draft recommendation in respect of the school
- A further meeting to discuss the draft recommendation to be considered by Cabinet and to give the governing body a further opportunity to present additional evidence.

Following consideration of the data agreed with the school (attached at Appendix A) and the feedback received from the school, the SORP's draft recommendation in respect of the Welsh-medium stream at Ysgol Dolafon is closure of the stream from the 31<sup>st</sup> August 2016, with the school to be re-categorised as an English-medium school.

In accordance with the School Transformation Policy, Cabinet is required to consider draft impact assessments assessing equality issues, impact on the community and on the Welsh-language when deciding whether or not to approve the SORP's draft recommendation. Draft impact assessment documents are attached as Appendix B and Appendix C.

### **Proposal**

- i) That Cabinet receive the SORP's draft recommendation in respect of Ysgol Dolafon, Llanwrtyd Wells, which is as follows:

Closure of the Welsh-medium stream from the 31<sup>st</sup> August 2016, with the school to be re-categorised as an English-medium school. Builth Wells CP School to be named as the receiving school for Welsh-medium pupils.

- ii) That Cabinet approves the commencement of formal consultation in accordance with the School Organisation Code in respect of the closure of the Welsh-medium stream at Ysgol Dolafon from the 31<sup>st</sup> August 2016.

A financial analysis of the draft recommendation has been carried out, details of which are attached as Appendix D. It is estimated that implementation of this draft recommendation would lead to annual savings of £16,624.

**One Powys Plan**

‘Transforming Learning and Skills’ is a key priority within the One Powys Plan, and the Authority’s aim is to ensure that ‘all children and young people are supported to achieve their potential’. The plan states that the Authority needs to ‘reorganise schools (primary, secondary and post 16) to ensure affordability, sustainability and appropriate leadership capacity’.

**Options Considered/Available**

The SORP discussed a number of possible options with the Governing Body of Ysgol Dolafon. These are outlined below, as well as an analysis of the Advantages and Disadvantages of each.

**i) Status Quo**

Advantages	Disadvantages
No additional transport or travel required	Does not address the size of the Welsh-medium stream
Maintains Welsh-medium provision in Llanwrtyd Wells	Does not improve the financial viability of the Welsh-medium stream
	Based on the current number of pupils at the Welsh-medium stream, the authority’s funding formula does not provide sufficient funding to enable the school to have an appropriate teaching structure in the Welsh-medium stream.

**ii) Status Quo for a period of 2 years to monitor growth in Welsh-medium pupil numbers**

Advantages	Disadvantages
No additional transport or travel	Does not address the size of the

required	Welsh-medium stream in the short term
Maintains Welsh-medium provision in Llanwrtyd Wells in the short term	<p>Does not improve the financial viability of the Welsh-medium stream in the short term</p> <p>Based on the current number of pupils at the Welsh-medium stream, the authority's funding formula does not provide sufficient funding to enable the school to have an appropriate teaching structure in the Welsh-medium stream in the short term</p> <p>The Welsh-medium stream is unlikely to grow significantly in 2 years</p> <p>The school's financial position is likely to worsen over the 2 years</p>

iii) **Closure of the Welsh-medium stream, school to be re-categorised as an English-medium school**

<b>Advantages</b>	<b>Disadvantages</b>
The majority of current pupils at the school choose to access English-medium education	No Welsh-medium provision would be available in Llanwrtyd Wells
Would provide a more positive learning experience for Welsh-medium pupils as they would be in classes with a larger number of pupils	Increased travel for pupils wishing to access Welsh-medium education
Would provide a more positive learning experience for Welsh-medium pupils as they would be in classes with a smaller age range	May have a negative impact on the bilingual skills of English-medium pupils
Would enable Ysgol Dolafon to run more efficiently as a single stream school	

iv) **Closure of the Welsh-medium stream, school to be re-categorised as a bilingual school**

<b>Advantages</b>	<b>Disadvantages</b>
All pupils in the school would have the opportunity to enhance their bilingual skills	Majority of the current pupils choose to access English-medium education
Would enable Ysgol Dolafon to run more efficiently as a single stream school	No Welsh-medium provision would be available in Llanwrtyd Wells
Would enable the school to retain its bilingual identity	This would not be Welsh-medium education, therefore there would be additional travel for Welsh-medium pupils
Would provide a more positive learning experience for Welsh-medium pupils as they would be in classes with a larger number of pupils	As this model is not currently utilised in Powys, it is unclear what the funding implications would be
Would provide a more positive learning experience for Welsh-medium pupils as they would be in classes with a smaller age range	As this model is not currently utilised in Powys, it is unclear what the impact on standards would be

**Preferred Choice and Reasons**

Following consideration of each of the options and the feedback received from the Governing Body of Ysgol Dolafon on each of the options, the SORP's view is that option (iii), closure of the Welsh-medium stream and re-categorisation of the school as an English-medium school is the most suitable way forward.

**Sustainability and Environmental Issues/Equalities/Crime and Disorder,/Welsh Language/Other Policies etc**

A draft Equality Impact Assessment has been produced and is attached as Appendix B. In addition, a draft Community Impact Assessment and Welsh Language Impact Assessment have been produced, these are attached as Appendix C.

The impact assessments will be updated following any formal consultation period to include qualitative information based on the responses received to the consultation.

## **Children and Young People's Impact Statement - Safeguarding and Wellbeing**

The Authority's Schools Transformation Programme is intended to improve educational outcomes for children and young people. This aligns with the aspiration to improve safeguarding and well-being for children and young people.

### **Local Member(s)**

### **Other Front Line Services**

N/A

### **Support Services (Legal, Finance, Corporate Property, HR, ICT, Business Services)**

Legal: Legal advice has been sought throughout the SORP process in respect of the Welsh-medium stream at Ysgol Dolafon.

Finance: "The Finance Business Partner for Schools confirms the estimated savings in the report, but notes that figures do not include an estimate of any redundancy costs at this stage."

HR: The Schools' HR Team continues to work closely with the Schools' Service with the aim of providing timely advice and support regarding any HR processes which may be required as a result of the proposal detailed in this report.

### **Local Service Board/Partnerships/Stakeholders etc**

N/A

### **Corporate Communications**

Communications Comment: 'The report is of public interest and requires a proactive news release and use of social media to publicise the recommendation.'

## Statutory Officers

The Strategic Director Resources (S151 Officer) notes the comments made by finance and notes that funding is in place to meet any redundancy costs.

The Solicitor to the Council ( Monitoring Officer) has commented as follows: “ I note the legal comment and have nothing to add to the report.”

## Members' Interests

The Monitoring Officer is not aware of any specific interests that may arise in relation to this report. If Members have an interest they should declare it at the start of the meeting and complete the relevant notification form.

<b>Recommendation:</b>	<b>Reason for Recommendation:</b>
<b>1. To receive the SORP's draft recommendation in respect of the Welsh-medium stream at Ysgol Dolafon, Llanwrtyd Wells.</b>	<b>To ensure future sustainability of primary education.</b>
<b>2. To approve the commencement of formal consultation with stakeholders in accordance with the School Organisation Code on the closure of the Welsh-medium stream at Ysgol Dolafon from the 31<sup>st</sup> August 2016, with Builth Wells CP School to be named as the receiving school for Welsh-medium pupils.</b>

## Appendix A – Data sheet for Nantmel C. in W. School

The following data was discussed and agreed with the Governing Body of Ysgol Dolafon during the School Organisation Review Panel (SORP)'s discussions with them in accordance with the School Transformation Policy 2014.

### i) Current and Historical Pupil Numbers

The total number of pupils in the school over the last 5 years is provided in the following table. This information is taken from the annual PLASC return, and includes all children recorded on the PLASC counting date, including nursery and three-year old children.

	Jan 2015 (Teacher Centre – 20/01/15)			Jan 2014 (PLASC)			Jan 2013 (PLASC)			Jan 2012 (PLASC)			Jan 2011 (PLASC)		
	WM	EM	Total	WM	EM	Total	WM	EM	Total	WM	EM	Total	WM	EM	Total
Total	9	63	72	8	62	70	20	49	69	11	61	72	12	55	67

### ii) Projected Pupil Numbers (Excluding Nursery)

School	January 2016	January 2017	January 2018	January 2019	January 2020
English Stream	57	55	58	55	52
Welsh Stream	9	10	10	10	10
Total	66	65	68	65	62

### iii) Current Capacity

School	Total number of places excluding nursery	Number of surplus places (June 2015)	Total surplus capacity (June 2015)
Ysgol Dolafon	69	13	19%

### iv) Building Condition

School	Condition	Suitability	Sustainability
Ysgol Dolafon	B	B/C	B

### v) Financial Information

School	School's Budget Share 2015-16	Funding per pupil 2015-16	Powys average funding per pupil 2015-16
Ysgol Dolafon	£333,896	£4,703	£3,580

### vi) Quality of Education – Estyn Inspections

School	Date of Inspection	School's Current	Prospects for Improvement	Follow-up activity
--------	-----------------------	---------------------	------------------------------	-----------------------

Performance				
Ysgol Dolafon	May 2010	Good	Good	N/A

### vii) Quality of Education – National School Categorisation System

In the 2014/15 academic year, the schools were categorised as follows:

School	Category	Definition
Ysgol Dolafon	Amber	<p><i>‘ schools in need of improvement which:</i></p> <ul style="list-style-type: none"> <li><i>• do not know and understand all the areas in need of improvement</i></li> <li><i>• have many aspects of their performance which are not improving quickly enough’.</i></li> </ul>

### viii) Teaching Staff

	Headteacher	Teaching staff
Ysgol Dolafon – English Stream and Management time	Permanent	4 Permanent Staff work in total of 2.80 FTE including 0.80 management time and PPA
Ysgol Dolafon – Welsh stream		1.0 FTE (Plus 0.1 of PPA from above)

### ix) Pupil travel patterns

#### a) Travel to Ysgol Dolafon Welsh Stream

The home addresses of the 9 children attending Ysgol Dolafon Welsh Stream in January 2015 (taken from Teacher Centre) were analysed by the council’s Research and Information Unit.

The closest Welsh-medium provision for the 9 pupils is as follows:

Closest School	Number of Pupils
Ysgol Dolafon	9

The average one way journey to school per child for pupils attending the Welsh stream at Ysgol Dolafon in January 2015 was 2.80 miles.

#### b) Travel to next closest Welsh-medium provision

If there were no Welsh-medium provision in Ysgol Dolafon, the next closest Welsh-medium provision for the children currently attending the Welsh Stream at Ysgol Dolafon in January 2015 would be as follows:

Closest School	Number of Pupils
Builth Wells CP School	5

If there were no Welsh-medium provision in Ysgol Dolafon, and the pupils transferred to their closest Welsh-medium provision, the average one way journey to school would be 10.02 miles.

## Powys County Council

### Equality Impact Assessment (EqIA) – Decision Assessment reporting template

This EqIA reporting template is designed to assist in the analysis of gathered data and evidence, to determine the equality impact of a proposal to change existing practices of a Council service. Once complete, the template should be made fully accessible to the public e.g. inclusion with publicly available Cabinet reports and/or publication on the Powys County Council website. For confidential matters, this should be made available once a decision has been taken.

***N.B. Please contact the Council’s Organisational Development Officer (Equalities) early on in the process if you require advice to conduct an assessment.***

<b>Proposal</b>	To close the Welsh-medium stream at Ysgol Dolafon from the 31 <sup>st</sup> August and re-categorise the school as an English-medium school	<b>Lead Person undertaking the assessment</b>	Sarah Astley
<b>Service Area</b>	Schools Service	<b>Relevant Head of Service who has agreed this assessment</b>	Ian Roberts Head of Schools
<b>Date of Assessment</b>	17 <sup>th</sup> November 2015		

The Equality Act 2010, requires that public sector organisations in the exercise of their functions, pay due regard to the following ‘general duty’:

- (a) Eliminating discrimination, harassment, victimisation and any other conduct that is prohibited by or under this Act;**
- (b) Advancing equality of opportunity between persons who share a relevant protected characteristic and persons who do not share it;**
- (c) Fostering good relations between persons who share a relevant protected characteristic and persons who do not share it.**

*The protected characteristics include: age, disability, gender reassignment, pregnancy and maternity, race, religion or belief, marriage and civil partnership, sex and sexual orientation. This assessment also includes a consideration of impact upon people and communities whose language of choice is Welsh.*

The specific regulations for Wales [Equality Act 2010 (Statutory Duties) (Wales) Regulations 2011] require public sector bodies to monitor relevant policy and practises and then assess and report on the impact based upon an analysis of relevant data and evidence.

1. AIM or PURPOSE		
Briefly describe the aim or purpose of the change proposal being assessed.	<p>This consultation is about whether Powys County Council should commence the statutory process for the following:</p> <p>To close the Welsh-medium stream at Ysgol Dolafon, Llanwrtyd Wells from the 31<sup>st</sup> August 2016, with Ysgol Dolafon becoming an English-medium school with effect from the 1<sup>st</sup> September 2016.</p> <p>Welsh-medium provision for pupils living in the Llanwrtyd Wells area would be provided at Builth Wells Primary School. Free transport would be provided for qualifying pupils.</p>	
2. OBJECTIVES		
Please state the current business objectives of the change proposal.	<p>The authority is considering commencing the statutory process to close the Welsh-medium stream at Ysgol Dolafon because the number of pupils attending the Welsh-medium stream has been below 25 for a number of years, and it is not anticipated that pupil numbers will increase above 25 in the coming years.</p>	
3. BENEFITS and OUTCOMES		
i) What are the intended benefits or outcomes from the change proposal?	<p>The benefits of the proposal are:</p> <ul style="list-style-type: none"> <li>- More efficient use of resources</li> <li>- Greater opportunities for Welsh-medium pupils from being within a larger group of Welsh-medium pupils</li> </ul>	
4. CORPORATE RELEVANCE		
How does this change proposal relate to the Powys Change Plan and/or Powys One Plan?	<p>The proposal supports Powys County Council’s vision for education, which is outlined within the One Powys Plan for 2014-17. ‘Transforming Learning and Skills’ is one of the priorities within this plan, and within this priority, the Plan states that</p> <p><i>‘We need to re-organise schools (primary, secondary and post 16) to ensure affordability, sustainability and appropriate leadership capacity’</i></p>	
5. DATA USED		
5.1. What data has been used to	Profiling of service users, providing a breakdown of who uses the service by the protected characteristics.	✓

<b>conduct this assessment?</b>  <b>Tick/shade boxes as appropriate.</b>	Service user satisfaction rates, broken down by the protected characteristics.	
	Qualitative data (analysed against the protected characteristics) which provides evidence about current services users experience accessing the service.	
	Qualitative data gathered from those that are not currently using the service.	
	Complaints monitoring against the protected characteristics	
	Wider research reports and findings.	
	Relevant service based Equality Impact Assessment	
<b>5.2. Are there any gaps in the data?</b>	<b>Yes</b> <input type="checkbox"/> <input checked="" type="checkbox"/> Please state the gaps: Qualitative data is not currently provided  How will the gaps be addressed going forward?  Should Cabinet agree to proceed with formal consultation, qualitative data will be gathered during this process and the EqIA will be updated to reflect the qualitative information received.	<b>No</b> <input type="checkbox"/>
<b>6. DATA ANALYSIS</b>		
<b>6.1 Quantitative</b> <b>Summarise the key quantitative data analysis results, providing key headline statistics.</b>	<u><b>Whole school data</b></u>  Information on pupils who currently attend Ysgol Dolafon can be obtained via the Pupil Level Annual School Census 2015 (PLASC), which shows the profile of pupils according to a range of criteria, which includes age, free school meals, gender, special educational needs, ethnicity, use of Welsh and	

Include data that relates to existing provision and also data relating to proposal. E.g. statistics generated from a consultation questionnaire.

**Key questions:**

- i) Are certain groups currently underrepresented in service user figures? Will a change affect this?
- ii) How do satisfaction levels compare across the protected characteristic groups? How will a change affect this?

disabilities. In relation to the protected characteristic groups, the profile of pupils at Ysgol Dolafon is as follows:

- 66 pupils in total, aged between 3 and 11. 48 pupils aged between 5 and 11.
- Gender: Of the pupils attending the school, 43 (65%) are boys and 23 (35%) are girls.
- Free school meals: 2 pupils (3%) are eligible for free school meals.
- SEN: 0 pupils in the school have Statements of Special Educational Needs. 12 pupils (18%) have special needs but do not have a statement – 7 pupils (11%) are on School Action Plus, 5 pupils (8%) are on School Action
- Disabilities: 12 pupils (18%) have additional learning needs
- English as an Additional Language: English is an additional language for 4 pupils at the school, which is 6% of pupils.
- Welsh Language: 9 pupils (14%) speak Welsh fluently.
- Race/ethnicity: PLASC only provides information about the ethnic group of pupils aged 5 and over.
  - The ethnic group of pupils aged 5 and over at the school is as follows:
    - Indian – 3 (6%)
    - Information not obtained – 1 (2%)
    - Russian – 1 (2%)
    - White British – 42 (88%)
    - White and Black Caribbean – 1 (2%)

This information shows that the proportion of pupils in the school that belong to the protected characteristic groups is very small. However there are 12 pupils with additional learning needs that are in a protected characteristic group for disability and there are 5 pupils that are in a protected characteristic group due to their ethnic group. In addition, 9 pupils at the school come from homes where Welsh is spoken.

**Welsh-medium stream data**

On the PLASC 2015 counting date, 9 pupils were attending the Welsh-medium stream at Ysgol Dolafon. In relation to the protected characteristic groups, the profile of these pupils is as follows:

- Gender: 8 boys (89%), 1 girl (11%)
- Free school meals: None of the pupils in the Welsh-medium stream were eligible for Free School Meals

	<ul style="list-style-type: none"> <li>- SEN: 1 of the pupils (11%) was on School Action Plus</li> <li>- Disabilities: 1 pupil (11%) has additional learning needs</li> <li>- English as an Additional Language: None of the pupils in the Welsh-medium stream are EAL pupils.</li> <li>- Welsh Language: 9 pupils speak Welsh fluently.</li> <li>- Race/ethnicity: The ethnic group of all pupils in the Welsh-medium stream is White British.</li> </ul> <p>The proportion of pupils that were attending the Welsh-medium stream on the PLASC 2015 counting date that belong to the protected characteristic groups is very small. However all 9 pupils are Welsh speakers.</p> <p>Two additional pupils have joined the Welsh-medium stream since January 2015. Both of these pupils are eligible for free school meals, and one has special educational needs.</p>
<p><b>6.2 Qualitative</b>  <b>Summarise the key qualitative data analysis, providing key themes or patterns.</b>  Include data that relates to existing provision and also data relating to proposal. E.g. protected characteristics focus group on the proposal.</p> <p><b>Key questions:</b></p> <ul style="list-style-type: none"> <li>i) Do certain groups have a different service user experience? How will a change affect this?</li> <li>ii) Have any areas for improvement been communicated by particular groups? Will a change have an impact upon these views?</li> <li>iii) What are the reasons behind some</li> </ul>	<p>If Cabinet approves the commencement of formal consultation on the closure of the Welsh-medium stream at Ysgol Dolafon, full consultation will be carried out in accordance with the requirements of the School Organisation Code (2013), which will include a meeting with pupils of Ysgol Dolafon. This will provide qualitative data in respect of the proposal, and the impact on pupils that belong to the protected characteristic groups.</p> <p>Further detail would be added to the EqIA following the conclusion of any consultation period and consideration of the responses received.</p>

<p>groups not using the service? How will a change affect this position?</p> <p>iv) What has consultation on your proposals revealed about impact on the protected characteristics?</p>		
<p><b>7. EqIA RESULT</b></p>		
<p>Based on an analysis of the available qualitative and quantitative data, please tick/shade the appropriate box opposite to provide the EqIA assessment result.</p>	<p><b>The proposal does not present any adverse impact on equality.</b> [Proceed to question 10]</p>	
	<p><b>The proposal presents some adverse impact on equality.</b> [Proceed to question 8]</p>	✓
	<p><b>The proposal presents significant impact on equality</b> [Proceed to question 8]</p>	
<p><b>8. AREAS for IMPROVEMENT</b></p>		
<p><b>Please provide detail of weak or sensitive areas of the proposal identified by the assessment.</b></p> <p>i) Which protected characteristic groups are particularly affected?</p> <p>ii) Will people on low incomes be affected?</p> <p>iii) Will Welsh speakers be affected?</p>	<p>i) Based on the pupils that were in the Welsh-medium stream on the 2015 PLASC counting date, one pupil had special educational needs, however none of the Welsh-medium pupils belonged to any other protected characteristic groups. Two additional pupils have joined the Welsh-medium stream since then. Both of these pupils are eligible for free school meals and one pupils has special educational needs.</p> <p>ii) Free transport will be provided to all pupils from the Llanwrtyd Wells area wishing to access Welsh-medium, regardless of income. However it is acknowledged that it may be more difficult for pupils on low incomes to access Welsh-medium provision should the Welsh-medium stream at Ysgol Dolafon close due to the additional travel required of parents in order to attend activities at the school, or to collect pupils from after school activities.</p> <p>iii) Welsh speakers will be affected by this proposal.</p>	

9. EQUALITY IMPROVEMENT		
<p><b>9.1 Having identified problematic aspects to the proposal, how will this now be addressed?</b></p> <p><i>i.e. Are you able to involve (in some capacity) people from protected characteristic groups, Welsh Speakers, people on low incomes, to assist you in this process?</i></p> <p>i) Can the impact be mitigated, and how will this be done?            ii) Does the proposal require modification to reduce or remove this impact?            iii) Should the proposal be considered for removal, owing to the degree of impact it is likely to have?</p>	<p>i) The impact of the proposal on the affected groups will be addressed through the provision of free home to school transport for all qualifying pupils. The authority is confident that the proposed receiving school would be able to meet the pupils with special educational needs who would be affected by this proposal</p> <p>ii) At the current time, the proposal does not require modification to reduce or remove the impact, however this EqIA will be reviewed and updated following any formal consultation exercise.</p> <p>iii) At the current time, the proposal should not be considered for removal. However this EqIA will be reviewed and updated following any formal consultation exercise.</p>	
<p><b>9.2 Will the management of the impact as outlined in 9.1, be included in the Service Improvement Plan?</b></p>	<p>Yes <input type="checkbox"/></p> <p>Date added.....</p> <p>Reference.....</p>	<p>No <input type="checkbox"/> ✓</p> <p>If no, please explain why not:  <b>Need was not identified at time of writing Service Strategy</b></p>
10. ONGOING MONITORING		
<p><b>How will the decision now be monitored on an ongoing basis to consider its impact over time?</b></p>		<p><b>Please tick/shade</b></p>
	Equality monitoring of uptake of the service within which the decision was made	
	Satisfaction monitoring of service users (broken down by protected characteristic)	

	Recording and analysing complaints/requests/compliments	
	Targeted periodic focus groups/service user interviews/feedback sessions	
	Other (please specify)	

### Monitoring arrangements

The Learning in the Community Programme Board is responsible for overseeing the strategic direction of the modernisation agenda: setting direction, implementing change, monitoring and reporting to the Cabinet of the Council.

Equality monitoring will form an integral part of the County Council's arrangements for any school reorganisation and will be undertaken where a significant or material change in provision is proposed.

The Head of Schools Service will be responsible for on-going monitoring.

### Publication of results of the impact assessment

The results of the impact assessment will be published on the Council's website

### Equality Impact Assessment Action Plan

Any actions identified as a result of this impact assessment will be taken forward for inclusion in the Schools Service Business Plan

This page is intentionally left blank

## Appendix C – Draft Community Impact Assessment

### Draft recommendation to close the Welsh-medium stream at Ysgol Dolafon

#### Draft Community and Welsh Language Impact Assessment

## 1. Introduction

The School Organisation Review Panel (SORP) has been reviewing the Welsh-medium stream at Ysgol Dolafon, Llanwrtyd Wells in accordance with the School Transformation Policy during 2015.

The SORP's draft recommendation is to close the Welsh-medium stream at Ysgol Dolafon, Llanwrtyd Wells from the 31<sup>st</sup> August 2016, with Ysgol Dolafon becoming an English-medium School with effect from the 1<sup>st</sup> September 2016. Welsh-medium provision for pupils from the Llanwrtyd Wells area would be provided at Builth Wells CP School. Free transport would be provided for qualifying pupils.

In accordance with the Authority's School Transformation Policy (2014), Cabinet is required to consider a draft impact assessment assessing equality issues, impact on the community and on the Welsh-language when determining whether or not to proceed with the formal statutory process.

An Equality Impact Assessment has been produced separately. This document considers the impact on the Community and on the Welsh language. The Assessments have been carried out based on the guidelines provided in the Welsh Government's School Organisation Code (2013).

## 2. The Affected Communities

### 2.1 Llanwrtyd Wells

Llanwrtyd Wells is a small town of around 850 residents<sup>1</sup> which is located between Builth Wells and Llandovery. Llanwrtyd Wells originally grew as a spa town in the 18<sup>th</sup> Century, however it is now better known for the eccentric

---

<sup>1</sup> 2011 Census information for the Llanwrtyd Wells Community Council area, taken from <http://www.powys.gov.uk/en/statistics/view-statistics-about-your-area/detailed-census-information/>

events held in the town, such as the World Bog Snorkelling Championships and the Man v Horse Marathon.

English is the main language spoken in the area, however according to the 2011 Census, 30% of residents have one or more skills in Welsh. 2% of residents belong to ethnic groups other than White.

The Welsh Index of Multiple Deprivation 2014 ranks areas known as Local Super Output Areas (LSOA) in terms of deprivation, where 1 is the most deprived and 1909 is the least deprived. The Llanwrtyd Wells LSOA is ranked as follows<sup>2</sup>:

Local Super Output Area (LSOA)	WIMD Rank 2014
Llanwrtyd Wells	1053

Ysgol Dolafon opened as a new school in February 1990. It is a dual stream school, where pupils are either taught through the medium of Welsh or English. The majority of pupils come from the town of Llanwrtyd Wells, but others come from the surrounding rural communities of Tirabad, Abergwesyn, Cefn Gorwydd and Beulah. The school is part of a community facility sharing a library and a large hall.

## 2.2 Builth Wells

Builth Wells has a population of around 2568<sup>3</sup>. The town is located in Mid Powys. Builth Wells is well known throughout Wales and beyond due to the Royal Welsh Showground, located on the outskirts of Builth Wells, which hosts a number of events during the year. The largest of these is the Royal Welsh Show, which is held every July.

English is the main language spoken in the area, however according to the 2011 Census, 23% of residents have one or more skills in Welsh. 2% of residents belong to ethnic groups other than white.

There are 2 Local Super Output Areas within the town of Builth Wells. The Welsh Index of Multiple Deprivation ranks them as follows, where 1 is the most deprived LSOA and 1909 is the least deprived<sup>4</sup>:

Local Super Output Area (LSOA)	WIMD Rank 2014
--------------------------------	----------------

<sup>2</sup> <https://stats.wales.gov.uk/Catalogue/Community-Safety-and-Social-Inclusion/Welsh-Index-of-Multiple-Deprivation/WIMD-2014>

<sup>3</sup> 2011 Census information for the Builth Wells Community Council area, taken from <http://www.powys.gov.uk/en/statistics/view-statistics-about-your-area/detailed-census-information/>

<sup>4</sup> <https://stats.wales.gov.uk/Catalogue/Community-Safety-and-Social-Inclusion/Welsh-Index-of-Multiple-Deprivation/WIMD-2014>

Builth 1	1143
Builth 2	1805

Builth Wells CP School is a dual stream primary school where pupils are either taught through the medium of Welsh or English. The school moved to its current building approximately 15 years ago. The majority of pupils come from the town of Builth Wells itself, however the catchment area of the Welsh-medium stream is larger, and includes the rural area surrounding Builth Wells.

## 2. Community Impact Assessment

### 2.1 Impact on pupil travel

The home addresses of the 9 children that were attending the Welsh-medium stream at Ysgol Dolafon in January 2015 were analysed by the council's Research and Information Unit. Ysgol Dolafon was the closest Welsh-medium provision for all 9 of these pupils, and the average one way journey to school per child was 2.80 miles.

If there were no Welsh-medium provision in Ysgol Dolafon, the next closest Welsh-medium provision for these pupils would be as follows:

Closest school	Number of Pupils
Builth Wells CP School	5
Ysgol Rhys Pritchard, Llandovery	4

If there were no Welsh-medium provision in Ysgol Dolafon, and the pupils transferred to their closest Welsh-medium provision, the average one way journey to school would be 10.02 miles.

Should the Welsh-medium stream at Ysgol Dolafon close, there would be an increase in travel for Welsh-medium pupils from the Llanwrtyd Wells area.

The governors of Ysgol Dolafon have expressed concern about the possibility that young children would be transported to Builth Wells on the same school transport as high school aged pupils.

### 2.2 Extra-curricular activities provided by the schools

#### Ysgol Dolafon

The following clubs are provided by the school outside school hours:

- Breakfast Club (daily)
- After-school Club (daily)

The following extra-curricular activities are provided by the school:

Hockey; School Choir; Band Dolafon; Chess and other board games; Rugby; Club Dolafon; Gardening; Craft Club

### **Builth Wells Primary School**

The following clubs are provided by the school outside school hours:

- Clwb Bore Da – Breakfast Club (daily)
- Busy Bees – After-school Club (daily)

The following extra-curricular activities are provided by the school:  
Football; Art Club; Nature Club; Netball; Hockey; Clwb yr Urdd; Clwb Cymraeg; Dawnsio Gwerin; Enterprise Club; Rugby; Running Club; Lively Literacy; Choir; Recorders; Film Club; Computer Club

## **2.3 Community Use of the School Building**

### **Ysgol Dolafon**

A parent and toddler group and a Cylch Ti a Fi meet at the school.

In addition, the school's facilities are used by the community regularly for the following activities:

Badminton (Twice weekly); Short Mat Bowls (Weekly); Football (Weekly)

### **Builth Wells CP School**

The school's facilities are used by the community for the following activities:

Dance classes; Exercise classes; Cake decorating; Young Farmers Club rehearsals; Cylch Meithrin meetings; community group meetings.

In addition, the school's facilities are used for Friends of the School events, which are attended by the community.

## **2.4 Other links with the community**

### **Ysgol Dolafon**

The school has strong links with the community, which includes the following:

Open the Book (Church Led Assembly); Work with the Heritage Centre; Festival Committee; Green Events; Llanwrtyd Eisteddfod; World Alternative Events; Grapevine (Community magazine which publishes the school Newsletter monthly)

### **Builth Wells CP School**

The school has strong links with the community, which includes the following:

Links with St Mary's Church and Alpha Chapel; School Choir perform and community events; Participation in community events eg Remembrance Day, Mayor's Civil Service, Noson Garolau; Use of the Wyaside Arts Centre; Forest Schools; individuals from the town are asked to judge at the school Eisteddfod.

#### **2.4 Support to Parents and Pupils currently attending the Welsh-medium stream at Ysgol Dolafon**

Parents of Welsh-medium pupils currently attending Ysgol Dolafon would be provided with a copy of Builth Wells CP School's prospectus, which provides information about the school and outlines all available extra-curricular clubs and after school care available.

Parents and pupils would be invited to visit the school. This would give them an opportunity to meet the school staff and get to know the school before joining the school. The school would like to offer pupils the opportunity to come to school to spend a morning or afternoon with their new class. This would enable the pupils to meet their peers and start building up friendships, and would ease transition to the school.

Parents would also be provided with links to the school website, as well as the school's Twitter and Facebook accounts, which would provide further information about the school and would enable them to become engaged with Builth Wells CP School.

#### **2.5 Conclusion**

Should the Welsh-medium stream at Ysgol Dolafon close, the authority accepts that there would be additional travel for pupils in the Llanwrtyd Wells area wishing to access Welsh-medium provision.

In terms of extra-curricular activities, a wide range of activities are offered by both schools, including a breakfast club and after-school provision at both. As Builth Wells is a larger school than Ysgol Dolafon, it is no surprise that a greater number of extra-curricular activities are available at the school. However, as many of these are offered after school, it would be more difficult

for pupils from the Llanwrtyd Wells area to access these activities as they would be reliant on home to school transport.

As the proposal does not involve closure of Ysgol Dolafon, it is not anticipated that the proposal will have an adverse impact on the facilities available to the community of Llanwrtyd Wells.

### 3. Welsh Language Impact Assessment

#### 3.1 Background information

Information from the 2011 Census shows that 30% of the Llanwrtyd Wells Community Council area have one or more skill in Welsh, whilst 23% of the Builth Wells Community Council area have one or more skill in Welsh<sup>5</sup>.

However, whilst a greater proportion of Llanwrtyd Wells residents have one or more skills in Welsh, this is not reflected in the number and proportion of Welsh-medium pupils in the two primary schools.

The following tables provide information about the total number of pupils that have been attending the two schools over the last 4 years, and the number and percentage of pupils taught through the medium of Welsh in each year, based on PLASC information:

#### Ysgol Dolafon

	January 2015	January 2014	January 2013	January 2012
Welsh-medium stream	9 (13%)	8 (11%)	20 (29%)	11 (15%)
English-medium stream	63 (87%)	62 (89%)	49 (71%)	61 (85%)
Total	72	70	69	72

#### Builth Wells CP School

	January 2015	January 2014	January 2013	January 2012
Welsh-medium stream	120 (43%)	121 (41%)	122 (41%)	125 (41%)
English-medium stream	162 (57%)	171 (59%)	179 (59%)	175 (58%)
Total	282	292	301	300

<sup>5</sup> 2011 Census information for the two Community Council areas, taken from <http://www.powys.gov.uk/en/statistics/view-statistics-about-your-area/detailed-census-information/>

### 3.2 Standards in Welsh

The following tables provide information about Standards in Welsh First Language at Ysgol Dolafon and Builth Wells CP School for the last 3 years.

Whilst this is useful as background information, the small number of Welsh-medium pupils in each year group at Ysgol Dolafon means that it is difficult to draw any firm conclusions from this information with regard to standards in Welsh at the two schools.

#### i) End of Foundation Phase

##### Ysgol Dolafon

	2013	2014	2015
Total number of learners assessed in Language, Literacy and Communication Skills in Welsh	0	2	2
Number of pupils that achieved Level 5+	N/A	2	2
% of pupils that achieved Level 5+	N/A	100%	100%

##### Builth Wells CP School

	2013	2014	2015
Total number of learners assessed in Language, Literacy and Communication Skills in Welsh	14	17	19
Number of pupils that achieved Level 5+	12	15	18
% of pupils that			

achieved Level 5+	85.7%	88.2%	94.7%
-------------------	-------	-------	-------

**i) End of Key Stage 2**

**Ysgol Dolafon**

	<b>2013</b>	<b>2014</b>	<b>2015</b>
Total number of learners assessed in Welsh First Language	1	1	2
Number of pupils that achieved grade 4+	1	1	1
% of pupils that achieved grade 4+	100%	100%	100%

**Builth Wells Primary School**

	<b>2013</b>	<b>2014</b>	<b>2015</b>
Total number of learners assessed in Welsh First Language	18	11	14
Number of pupils that achieved grade 4+	14	9	13
% of pupils that achieved grade 4+	77.8%	81.8%	92.9%

**3.3 Welsh language activities provided by the schools**

**Ysgol Dolafon**

Due to the fact that a significant proportion of the staff of Ysgol Dolafon are Welsh-speaking, the majority of the extra-curricular activities offered by the school take place bilingually. These include the following:

Breakfast Club; After School Club; Hockey; Choir; Band Dolafon; Rugby; Club Dolafon; Gardening Club; Craft Club

The school hosts a Cylch Ti a Fi.

The school takes part in the annual Llanwrtyd Eisteddfod.

### **Builth Wells CP School**

Many of the school's extra-curricular activities are provided bilingually when they are run by staff who are fluent Welsh speakers. These include the following:

Netball; Football; Hockey; Clwb yr Urdd; Dawnsio Gwerin; Enterprise Club; Rugby; Running Club; Choir; Recorders

Cylch Meithrin hold their meetings at the school. Whilst the actual Cylch Meithrin is not held on the school site, there are close links between the Welsh-medium stream and the Cylch, with the nursery/reception teacher visiting the Cylch on a regular basis.

Urdd fund-raising events such as bingo are held in Welsh.

Welsh-speaking individuals from the community visit the school to judge the school eisteddfod or to take part in the Reading Buddies system at the school.

### **3.4 Conclusion**

The Authority acknowledges that closure of the Welsh-medium stream at Ysgol Dolafon would make it more difficult for pupils in the Llanwrtyd Wells area to access Welsh-medium education, and additional travel would be required for pupils wishing to access Welsh-medium provision elsewhere. However, free home to school transport would be provided to pupils.

The proposal provides positive benefits for Welsh-medium education as Welsh-medium pupils would be in larger classes which would enable them to learn from a greater number of pupils. In addition, they would be in classes that have a smaller age range, which would provide further benefits to them. The Authority's view is that the proposal will also provide additional opportunities for Welsh-medium pupils to use their Welsh and to take part in activities such as those provided by the Urdd.

Whilst Welsh-medium pupils would be leaving Llanwrtyd Wells to access Welsh-medium provision elsewhere, they would continue to live in the town and surrounding areas, and would continue to be able to participate in Welsh language activities in the local community.

## Appendix D – Financial Assessment

### Closure of the Welsh-medium Stream at Ysgol Dolafon

An assessment of the potential financial savings from the closure of the Welsh-medium stream at Ysgol Dolafon has been carried out. The estimated savings following closure of the school is provided below, based on the school's budget for 2015/16. The assessment does not include any possible redundancy costs

<b>Area of Funding</b>	<b>Full Year Saving</b>
<b>Total Dual Stream Uplift not transferring with the pupils to their alternative school</b>	<b>31,624</b>
<b>Additional Projected Savings</b>	
N/A	N/A
<b>Total Additional Savings</b>	<b>0</b>
<b>Total Estimated Savings</b>	<b>31,624</b>
Less Estimated Transport Costs	(15,000)
<b>Net Estimated Savings</b>	<b>16,624</b>

# C257- 2015

## CYNGOR SIR POWYS COUNTY COUNCIL.

### CABINET EXECUTIVE December 15<sup>th</sup> 2015

**REPORT AUTHOR:** County Councillor Arwel Jones  
Portfolio Holder for Education

**SUBJECT:** Crickhowell Specialist Centre

---

**REPORT FOR:** Decision

---

#### **Summary**

Further to the decision made by Cabinet on the 9<sup>th</sup> September 2015, the authority carried out a formal consultation on the closure of the Specialist Centre at Crickhowell CP School from the 6<sup>th</sup> October 2015 to the 17<sup>th</sup> November 2015.

The purpose of this report is to inform members of the responses received to this consultation and to determine whether or not to proceed with the statutory process to close the Specialist Centre at Crickhowell CP School.

The report is supported by the following appendices:

Appendix A – Consultation Document  
Appendix B – Consultation Report  
Appendix C – Equality Impact Assessment

#### **Background**

##### Formal Consultation

Formal consultation was carried out from the 6<sup>th</sup> October 2015 to the 17<sup>th</sup> November 2015 in accordance with the requirements of the School Organisation Code. The consultation documentation was distributed to stakeholders as required by the Code, and was available on the Council's website throughout the Consultation Period. The Consultation Document that was issued is attached as Appendix A.

Consultees were invited to respond to the consultation by either completing and returning a response form, or by writing or e-mailing the School Transformation Team.

3 written responses were received to the Consultation. The issues raised in the responses and the Authority's response to these issues are listed in Appendix B – Consultation Report.

### Consultation with Pupils

A Young People's Version of the Consultation Document was also available throughout the Consultation Period. In addition, officers from the Authority met with the School Council of Crickhowell CP School during the Consultation Period to discuss the proposal with them. The notes of this meeting are included in Appendix B – Consultation Report.

### **Proposal**

Following consideration of the issues raised in the Consultation Report and the authority's response to them, it is recommended that a Statutory Notice for the closure of the Specialist Centre at Crickhowell CP School from the 31<sup>st</sup> March 2015 is published.

Closure of the Centre would realise savings of approximately £67,000 per annum to the authority.

### **One Powys Plan**

'Transforming Learning and Skills' is one of the priorities within the One Powys Plan. Within this priority, the Plan states that *'There is a need to review the provision of Additional Learning Needs and Behaviour services'*, and that the authority will *'Work with our partners to review and re-configure services for children and young people with additional learning needs to...provide improved support for children and young people and all schools.'*

### **Options Considered/Available**

N/A

### **Preferred Choice and Reasons**

N/A

### **Sustainability and Environmental Issues/Equalities/Crime and Disorder,/Welsh Language/Other Policies etc**

The Equality Impact Assessment on the proposal has been updated following the Consultation Period, and is attached as Appendix C.

## **Children and Young People's Impact Statement - Safeguarding and Wellbeing**

The wellbeing and educational progress of young learners is central to delivery of the ALN strategy. Having full access to mainstream classes with appropriate levels of support facilitates access to the school curriculum delivery model and the range of relationships that all other children in school enjoy. This gives children equal access to the range of opportunities both socially and academically within a school.

### **Local Member(s)**

### **Other Front Line Services**

### **Support Services (Legal, Finance, Corporate Property, HR, ICT, Business Services)**

Legal: The recommendation can be supported from a legal point of view provided that Members have read and taken into account the Consultation report in appendix B.

### **Local Service Board/Partnerships/Stakeholders etc**

### **Corporate Communications**

### **Statutory Officers**

The Solicitor to the Council (Monitoring Officer) has commented as follows: "I note the legal comment and have nothing to add to the report."

### **Members' Interests**

The Monitoring Officer is not aware of any specific interests that may arise in relation to this report. If Members have an interest they should declare it at the start of the meeting and complete the relevant notification form.

<b>Recommendation:</b>	<b>Reason for Recommendation:</b>
To approve the publication of Statutory Notices for the closure of the Specialist Centre at Crickhowell CP School with effect from 31 <sup>st</sup> March 2016	To ensure that support to children with additional learning needs is provided in an efficient way.

As Crickhowell Community Primary School is an English medium school and all neighbouring schools are also English medium schools, the consultation documentation is only available in English.

If a Welsh language copy is required, please contact the School Modernisation Team on 01597 826265, or e-mail [school.modernisation@powys.gov.uk](mailto:school.modernisation@powys.gov.uk).

## 1. THE PROPOSAL

**The authority is proposing to close the Specialist Centre at Crickhowell Community Primary School with effect from 31<sup>st</sup> March 2016.**

Should the Specialist Centre at Crickhowell CP School close, alternative provision for pupils that would have accessed this centre will be provided in the following ways:

- Enhanced provision within mainstream provision
- Access to alternative Specialist Centres located in Brecon for pupils that need this type of provision

In terms of the enhanced provision that would be provided within mainstream provision, this would be based on the identified needs of the learner and would be based on inclusive principles, i.e. the learner will be supported in a mainstream class through individual differentiation, small group work and the support of a teaching assistant using programmes designed, assessed and monitored by the SENCo. Further support would be available from support services, such as the Educational Psychology Service and the Learning, Inclusion Support Team. Specifically resourced outreach services are also available from the area Special School, as well as from the Specialist Centres in Brecon. Schools can apply for exceptional funding according to the published criteria. This approach is successful in delivering good outcomes in areas where there are no Specialist Centres.

### 1.1 Background to the Proposal

Powys County Council provides education for pupils with Additional Learning Needs (ALN) through a combination of support in mainstream classes, specialist provision located within mainstream schools and Special Schools.

In the primary sector, the authority provides Specialist Centres in a number of mainstream Primary Schools, to enable pupils with moderate to severe learning needs to access specialist provision locally. The intention is that pupils who access these classes are placed at School Action Plus, or have a Statement of Special Educational Needs. Some of the Centres provide for pupils with a general learning delay, and some provide for those with Autistic Spectrum Conditions.

The authority's priorities for improvement up until 2017 are set out in the One Powys Plan for 2014-17. 'Transforming Learning and Skills' is one of the priorities within this plan, and within this priority, the Plan states that

*'There is a need to review the provision of Additional Learning Needs and Behaviour services'*

and that the authority will

*‘Work with our partners to review and re-configure services for children and young people with additional learning needs to...provide improved support for children and young people and all schools.’*

In order to work towards this, the authority commenced a review of ALN provision across the authority in February 2014. This review focussed in particular on the provision for supporting pupils with special educational needs in the early years and primary phase of education, and in particular, focussed on the specialist provision located in Primary Schools across the authority. The outcome of the review was to recommend closure or reconfiguration of the Specialist Centres, depending on the needs being addressed. Consultation took place on this proposal, and a report was considered by Cabinet in July 2014. The Cabinet’s decision was as follows:

*‘Not to proceed with the closure of the Pre-School Assessment Centres nor Specialist Units and in the short term to focus on the actions identified in the proposal section of the report.’*

Following the review, the authority has carried out further work looking at individual centres and their particular purpose and delivery. This work has highlighted the individual characteristics of each Specialist Centre, and has identified that there is significant variability in their viability.

As a result of this work, the Authority’s view is that there may be some circumstances where individual centres need to be reviewed where evidence suggests that over a number of years demand is below optimum and continuing to reduce to the point of having no children present.

There has been a significant reduction in the number of pupils accessing the Specialist Centre at Crickhowell Community Primary (CP) School, which provides for pupils with general learning delay. This means that the Centre is no longer providing value for money to the Council. At the current time, there are no pupils accessing the Centre. In September 2015, Cabinet approved the commencement of consultation on a proposal to close the Specialist Centre at Crickhowell CP School from the 31<sup>st</sup> March 2016.

## **1.2 Reasons for the Proposal**

The reasons why the authority is proposing to discontinue the Specialist Centre at Crickhowell CP School can be summarised as follows:

- The number of pupils attending the Specialist Centre has decreased in recent years. There are currently no pupils attending the Centre.

- The Specialist Centre has the capacity to provide for a maximum of 12 pupils, therefore there are 12 surplus places, which is 100% of the Centre's capacity.
- Alternative provision is available either through enhanced support in mainstream provision at Crickhowell CP School or neighbouring schools, or specialist provision in neighbouring catchments.
- Due to the small number of pupils that have been attending the Specialist Centre at Crickhowell CP School, the Centre no longer provides value for money to the Council.

### 1.3 Options considered

#### i) Status Quo

The authority has considered the Status Quo - to continue to provide a Specialist Centre at Crickhowell CP School. The strengths and weaknesses of this option are listed below:

<b>Strengths</b>	<b>Weaknesses</b>
Retention of Specialist provision in the Crickhowell catchment	Inefficient use of resources
	Inefficient use of space within the school
	Restricted social and learning opportunities for pupils accessing the Specialist Provision on a full time basis
	High level of surplus places within the Specialist Centre

#### ii) Closure of the Specialist Centre at Crickhowell CP School

The second option available to the authority is to close the Specialist Centre at Crickhowell CP School. The strengths and weaknesses of this option are listed in the following table:

<b>Strengths</b>	<b>Weaknesses</b>
More efficient use of resources	Loss of specialist provision in the Crickhowell catchment
Greater opportunities for mainstream inclusion in local community schools for pupils with complex learning difficulties	Loss of outreach opportunities from the expertise of the specialist teacher
Reduction in surplus places in specialist provisions	Possible additional travel for some pupils from the Crickhowell catchment in the future
Greater opportunities for being	Possible risk to the education of

within a mixed peer group with social as well as learning opportunities	the individual in the mainstream setting and greater demands on the teachers in terms of differentiation
Freeing up of the room within the school for other uses	

Having considered both of these options, and the strengths and weaknesses associated with each, the Authority considers that closure of the Specialist Centre at Crickhowell CP School is the most appropriate solution.

#### 1.4 Risks associated with the Proposal

The following risks are associated with the proposal to close the Specialist Centre at Crickhowell CP School:

<b>Risk</b>	<b>Probability</b>	<b>Impact</b>	<b>Response Strategy</b>
Neighbouring specialist provisions do not have capacity to provide for any additional demand from the Crickhowell catchment	Low	High	Support within mainstream provision with outreach from specialist centres or the special school
Learners are unable to manage the length of journey to the alternative provision	Low	High	Support within mainstream provision with outreach from specialist centres or the special school
Poor progress for the individual learners who would have attended the specialist centre if they are working within the mainstream setting	Low	High	Outreach from specialist centres and special schools as well as the authority's advisory teaching team

## 2. DETAILS OF AFFECTED SCHOOLS

### 2.1 General School Information

Crickhowell CP School is located in the Usk Valley between the towns of Brecon and Abergavenny. It is an English medium school and serves the town of Crickhowell. In addition, a large number of pupils from outside the traditional catchment area attend the school.

The majority of pupils at the school are taught in mainstream classes, however the school also hosts an area Specialist Centre which provides for pupils with moderate and specific learning difficulties.

The following table provides general information about Crickhowell CP School:

School Type	Language Category	Admission Number	Capacity	Pupil numbers PLASC Jan 2015 (R – Yr 6)	Age Range
Community Primary	EM	36	237 + 30 nursery places	215	4-11

### 2.2 Pupil numbers

#### 2.2.1 Current and Historical Pupil Numbers

The following table shows the number of Reception to Year 6 pupils that have been attending Crickhowell CP School since January 2011, based on PLASC information.

	January 2015	January 2014	January 2013	January 2012	January 2011
Crickhowell CP School	215	219	210	204	203

PLASC also provides information about the number of pupils that are accessing the Specialist Centre at Crickhowell CP School. This information is summarised in the following table:

	January 2015	January 2014	January 2013	January 2012	January 2011
<b>Registered in Class SC<sup>1</sup></b>	1	1	2	0	0
<b>Pupils in Special Classes<sup>2</sup></b>	3	12	10	8	9

At the current time, no pupils are attending the Specialist Centre at Crickhowell CP School.

### 2.2.2 Projected Pupil Numbers

The following table shows the pupil projections for Reception to Year 6 pupils at Crickhowell CP School for the next 4 years.

January 2016	January 2017	January 2018	January 2019	January 2020
227	211	207	209	209

No new pupils are expected to be admitted to the Specialist Centre at Crickhowell CP School.

### 2.3 School Building Condition

The Welsh Government's 21<sup>st</sup> Century Schools Survey identified that the quality of accommodation at Crickhowell CP School is as follows<sup>3</sup>:

Condition	Suitability	Sustainability
-----------	-------------	----------------

<sup>1</sup> This figure is the total number of pupils registered in the Specialist Centre and accessing the Centre full time

<sup>2</sup> This figure indicates the total number of pupils accessing the Specialist Centre. However, the majority of these pupils are registered in mainstream classes.

<sup>3</sup> The categories used in the Welsh Government's 21<sup>st</sup> Century Schools Survey are defined as follows:

Category A	Good
Category B	Satisfactory
Category C	Poor
Category D	Bad

B	B/C	C
---	-----	---

## 2.4 Quality of education

### 2.4.1 Estyn

Crickhowell CP School was last inspected by Estyn in May 2014. The grades awarded are included in the following table:

	Grade
The School's Current Performance	Good
The School's Prospects for Improvement	Good

At the time of the inspection, there were 5 pupils in the Specialist Centre. The inspection report makes the following specific references to the Specialist Centre and the school's provision for additional learning needs in mainstream classes:

*'In the specialist centre, all pupils communicate effectively with adults and each other through a variety of language strategies. The pupils in the specialist centre make significant progress from starting points that are normally well below average.'*

*'The provision for pupils with additional learning needs is a strong feature of the school. It is well planned and co-ordinated efficiently in both the specialist centre and mainstream classes. The school has developed an effective system to identify pupils' learning needs and produces child-friendly individual education plans. It provides a well-structured programme of support for pupils' needs. The pupils in the specialist centre integrate successfully into the day-to-day life of the school. All pupils mix well in both formal and informal activities. The quality of provision in the specialist centre is effective.'*

### 2.4.2 National School Categorisation System

The Welsh Government, Local Authorities and Regional Consortia evaluate and assess schools and place them in a support category using the following:

- A range of performance measures
- A self-evaluation by the school on its capacity to improve in relation to leadership and teaching and learning
- An assessment of the school's self-evaluation by challenge advisers in the regional consortia, agreed with the local authority.

Schools are categorised as either green, yellow, amber or red depending on the level of support they require, with schools in the green category needing the least support and those in the red category needing the most intensive support.

In the 2014/15 academic year, Crickhowell CP School was categorised as a school in the 'yellow' category.

### **2.4.3 Impact of the Proposals**

#### **i) Impact on the provision at Crickhowell CP School**

As the proposal is not proposing any changes in respect of mainstream education provision at Crickhowell CP School, there will be no impact on the school's ability to deliver the full curriculum at the foundation phase and in each key stage of education nor on outcomes, provision or leadership and management at the school.

Special Educational Needs provision at Crickhowell CP School is provided by the school using its delegated budget. This would be unaffected by the closure of the specialist centre. Crickhowell CP School is justly proud of its inclusive policy, and meets a range of needs from mild to complex. As with all schools, the SENCo provides specialist knowledge and co-ordinates support for children that have a range of Special Educational Needs. Closure of the Specialist Centre would not have any discernible impact on provision to learners with Special Educational Needs in the school.

#### **ii) Contribution to the quality of SEN provision in South Powys**

Schools across Powys are supported by the authority's educational psychology and sensory support teams to meet the needs of pupils in mainstream schools. The authority's new learning support advisory team provides additional support to schools, and helps schools identify and respond to pupils' needs. By supporting schools to enable children to remain at their local schools rather than having to travel to a Specialist Centre, the authority's inclusion agenda is moved forward.

The decrease in the number of children being referred to the Specialist Centre at Crickhowell CP School is evidence that mainstream services are responding to need, and south Powys is in a good position to demonstrate that with support, schools can demonstrate their knowledge and expertise as well as their commitment to children with a range of special educational needs.

## **3. OTHER CONSIDERATIONS**

### **3.1 Financial Implications**

The budget for all Specialist Centres are held centrally by the authority. For the 2015/16 academic year, the total budget allocated to the Specialist Centre at Crickhowell CP School is £75,350. This is based on providing a teacher and an LSA for the Centre, as well as an allowance for training.

If the Specialist Centre were to close, it is estimated that the savings to the authority for the period from January until the end of the financial year would be approximately £24,000. The annual saving to the authority following closure of the Centre is estimated to be approximately £67,000. This is based on the total cost of the Centre as stated above, minus the cost of providing additional support to pupils within mainstream provision at the school, which is estimated to be approximately £8,500.

This calculation does not include any possible redundancy costs.

### **3.2 Land, buildings and resources**

The Specialist Centre is currently located in a classroom at Crickhowell CP School. No capital funding would be required in order to achieve the proposal.

If the Specialist Centre were to close, the classroom would be returned to the school to use as appropriate. The authority, in conversation with the school, is currently investigating the possibility that the classroom currently occupied by the specialist centre could be utilised by the authority for 2 afternoons a week, to run an area resource library that could be accessed by teachers from across the south Powys area. The library would be staffed by an LSA funded by the authority.

### **3.3 Staffing**

Currently there is 1 Learning Support Assistant employed by the Local Authority who worked in the centre and is now supporting learners in the school. This member of staff is currently employed on a permanent full time contract. Therefore, approval of the proposal would lead to potential redundancy for 1 member of staff.

If a decision is made to proceed with the closure of the Specialist Centre at Crickhowell CP School, formal redundancy procedures would be followed in respect of this member of staff. The council will make every effort to redeploy employees who are formally at risk of redundancy and are registered on the Council's redeployment register.

In this particular case, there may be opportunities for alternative employment within the school following any establishment of an area resource library at Crickhowell CP School, as described in 3.2.

### **3.4 Transport and Travel**

In the event of closure of the Specialist Centre at Crickhowell CP School, transport would be provided to pupils in accordance with the authority's transport policy.

For pupils accessing mainstream provision, transport would be provided to Crickhowell CP School if this was the closest school to the pupil's home address, and if they live two miles or more from the provision. For pupils living closer to a school other than Crickhowell CP School, transport would be provided to the closest school to the pupil's home address, if they live two miles or more from the provision.

For pupil's requiring access to specialist provision, transport would be provided in accordance with the authority's transport policy if the pupil lives two miles or more away from the provision.

### **3.5 Admissions**

Local management admissions panels are in place for each specialist centre hosted by the authority. Should the Specialist Centre at Crickhowell CP School close, any requests for admission by pupils living in the Crickhowell catchment area to alternative Specialist Centres would be considered by that Specialist Centre, or by the local authority where a Statement applies.

### **3.6 Equality and Community Impact Assessments**

In accordance with the Welsh Government's School Organisation Code (2013), the Authority is required to carry out an Equality Impact Assessment and a Community Impact Assessment in respect of any proposal to change school provision. Information about these assessments is provided below.

#### **3.6.1 Equality Impact Assessment**

An Equality Impact Assessment has been carried out in respect of the proposal to close the Specialist Centre at Crickhowell CP School. This assessment can be viewed on the Council's website:

<http://www.powys.gov.uk/en/schools-students/plans-for-powys-schools/>

This Assessment has found that the proposal could have an impact on pupils with additional learning needs. However, the Authority is

confident that pupils currently accessing the Specialist Centre at Crickhowell CP School, and any pupils who might require this type of provision in the future can have their needs met, either by accessing alternative specialist provision or through enhanced provision within mainstream provision.

### **3.6.2 Community Impact Assessment**

#### **i) Current links with the community**

Crickhowell CP School has extensive links with the community. The school building is used extensively by the local community, and is used for a range of community activities, including Zumba, judo, football and by a local church group. In addition, an after school club is provided at the school.

Other links with the community are achieved through school governors, partnerships with the local Rotary club, working with the town council and regular visits to the school by the local church group. The school also has strong links with the local high school and with local sporting organisations. All pupils at the school benefit from these community links, including pupils with special educational needs.

There are no specific links between the Specialist Centre and the community.

#### **ii) Impact of the proposal on the community**

As no change is proposed to the mainstream provision at Crickhowell CP School, it is not anticipated that closure of the Specialist Centre will have any impact on the school's links with the community and the community's ability to use school facilities for the range of activities that currently take place in the school.

As no pupils from the Crickhowell catchment are currently accessing the Specialist Centre, it is not anticipated that the loss of this facility from Crickhowell would have a negative impact on the community of Crickhowell.

## **4. CONSULTATION DETAILS**

### **4.1 Who will we Consult with?**

The Council will consult with the pupils, parents, governors and staff of Crickhowell CP School. A copy of the consultation document will also be provided to all those required in accordance with the School Organisation Code 2013, which includes the following:

- The Governing Body of Crickhowell CP School
- Parents, carers, guardians and staff of Crickhowell CP School
- Pupils of Crickhowell CP School
- The governing bodies of neighbouring primary schools
- The Church in Wales and Roman Catholic Diocesan Authorities
- The Welsh Minister for Education & Skills
- Neighbouring Local Authorities
- Local Powys County Councillors
- Town and Community Councils in the Crickhowell area
- The AM for Brecknock & Radnor and regional AMs for the area
- The MP for Brecknock & Radnor
- Estyn
- Teaching and staff trade unions
- ERW
- The Regional Transport Consortium
- The Police & Crime Commissioner for the area
- The Early Years and Childcare Partnership

### **4.2 The Consultation Period**

The consultation period for the current proposal to discontinue the Specialist Centre at Crickhowell CP School from the 31<sup>st</sup> March 2016 will commence on the 6<sup>th</sup> October 2015 and will end on the 17<sup>th</sup> November 2015.

### **4.3 The Statutory Process**

Consultation on this proposal will follow the guidelines set out by the Welsh Government in the School Organisation Code (2013). The process is summarised below:

#### **4.3.1 Consultation**

Consultation will start on the 6<sup>th</sup> October 2015 and will end at 5pm on the 17<sup>th</sup> November 2015. Feedback from the consultation will be collated and summarised, and a report will be presented to the Council's Cabinet either towards the end of the autumn term 2015 or at the beginning of the spring term 2016. The Council's Cabinet will consider the report and the feedback received during the consultation period, and will decide whether to proceed with the proposal, to make changes to the proposal or to not proceed with the proposal. If the Cabinet decides not to proceed, that will be the end of this proposal for the foreseeable future.

### **4.3.2 Statutory Notices**

If the Cabinet decides to proceed, a Statutory Notice will be published, which will give a period of 28 days for people to submit written objections.

If there are objections, the Council will publish an objection report providing a summary of the objections and the Authority's response to them within 28 days of the end of the objection period. Only written objections submitted during the statutory notice period will be considered in this report. Comments submitted as part of the consultation period will need to be re-submitted in writing during the statutory notice period if they are to be considered as objections.

A further report will be presented to the Council's Cabinet, which they will consider alongside the objection report, in order to decide whether or not to approve the proposal.

### **4.3.3 Implementation**

If the Cabinet approves the proposal, it will be implemented in accordance with the date given in the Statutory Notice or any subsequently modified date.

## **4.4 How to respond to the Consultation**

A consultation questionnaire is attached to this document, and is also available on the Council's internet site at <http://www.powys.gov.uk/en/schools-students/plans-for-powys-schools/>. Alternatively, you can respond in writing.

Completed questionnaires and other written responses should be sent to the following address:

*School Modernisation Team, Powys County Council, County Hall, Llandrindod Wells, LD1 5LG*

*E-mail: [school.modernisation@powys.gov.uk](mailto:school.modernisation@powys.gov.uk)*

If you have any further questions about this proposal, you can contact the School Modernisation Team using the above contact details, or on (01597) 826265.

**5. RESPONSE FORM – SPECIALIST CENTRE, CRICKHOWELL CP SCHOOL**

Please provide your comments in the space provided. You can use additional sheets if necessary.

1. Please let us know your views on the proposal to close the Specialist Centre at Crickhowell CP School, including any alternatives to the proposal you think we should consider:

---

---

---

---

---

---

---

---

---

---

2. Please indicate who you are (e.g. parent, member of staff, governor)

---

3. Name (optional)

---

- 4(a). Would you like to be informed of the publication of the consultation report?

Yes  No

- 4(b). If you answered 'Yes', please provide an e-mail address or postal address:

---

---

Completed questionnaires should be sent to the following address, to arrive **no later than 5pm on the 17<sup>th</sup> November 2015**:

*School Modernisation Team, Powys County Council, County Hall, Llandrindod Wells, LD1 5LG*

*E-mail: school.modernisation@powys.gov.uk*

## Appendix B – Consultation Report

### CONSULTATION ON THE PROPOSAL TO CLOSE THE SPECIALIST CENTRE AT CRICKHOWELL CP SCHOOL

#### CONSULTATION REPORT

#### 1. OVERVIEW OF THE CONSULTATION

Powys County Council consulted on a proposal to close the Specialist Centre at Crickhowell CP School with effect from the 31<sup>st</sup> March 2016 from the 6<sup>th</sup> October 2015 to the 17<sup>th</sup> November 2015.

#### 2. CONSULTATION METHODS

The consultation documentation was available on the Council's website throughout the Consultation Period. Copies were also distributed to stakeholders, as required by the School Organisation Code (2013). A separate version for young people was also available and distributed to pupils, and was also available on the Council's website throughout the Consultation Period.

Consultees were invited to respond to the consultation by either completing a response form and returning it to the School Modernisation Team at County Hall, or by writing to the School Modernisation Team.

A meeting was also held with the School Council of Crickhowell CP School

#### 3. RESPONSES RECEIVED AND ISSUES RAISED

3 written responses were received to the consultation. The issues raised in these responses and the authority's response to them are provided in the table below:

Issue Raised	Local Authority Reponse
From the figures in 2.2 it looks as though the total number of pupils with special learning needs has fallen between 2014 and 2015. Why is this? Have pupils gone elsewhere because they have heard the centre will close or are they no longer classified as having special needs?	The figures in 2.2 show the number of pupils in the school that were accessing the Specialist Centre in each year, not the number of pupils in the school that had additional learning needs. The 'Pupils in Special Classes' information in the consultation document refers to pupils that accessed the centre on an informal basis, making use of a resource that was available

	within the school. However this isn't the purpose of the Centre.
If the number of pupils with special needs has gone down because pupils have heard the centre will close and have gone elsewhere, the numbers are not a true reflection of need in the area.	The consultation document only provides information about the number of pupils accessing the Specialist Centre, not the number of pupils with special needs in the school. The number of pupils placed in the centre by the local authority has remained unsustainably low for many years.
From the figures, it looked as though the number of pupils with special needs was rising in the school prior to 2014 lending support to keeping the centre open.	The consultation document only provides information about the number of pupils accessing the Specialist Centre, not the number of pupils with special needs in the school. The number of pupils placed in the centre by the local authority has remained unsustainably low for many years.
Do pupils with special learning needs who are registered within the mainstream classes still make use of the specialist centre?	In the past, pupils other than those placed in the Centre by the local authority have accessed the Centre on an informal basis. No pupils are currently accessing the Centre in this informal way.
Do pupils from any other schools attend the centre?	Specialist Centres are local authority area resources, and as such would provide to children from other parts of the Crickhowell catchment area. However if the Management Committee admit a child to the Centre, the child would transfer to Crickhowell CP School. Pupils from other schools would not attend the Centre on an informal basis.
Estyn inspection stated that 5 pupils were in the specialist centre, this does not tally with the table in 2.2 which says only 1 was registered at the centre in 2014.	The information provided by Estyn in its Inspection Report referred to pupils accessing the centre on an informal basis, not those admitted to the Centre by the Local Authority through the Management Committee.
In support of mainstreaming pupils with special needs, however only if there is sufficient support / expertise within the school.	The Local Authority notes this comment. The Local Authority is committed to successful inclusion of children with learning difficulties as evidenced by the investment in the learning support advisory teacher service, which began in 2015.
One member of staff with expertise will be made redundant if the centre closes – how will this expertise be replaced?	The close links that existed between the School and the Centre ensure those children now included in the mainstream of the school are successfully supported. Additional support is also now available to

	the school following the introduction of the learning support advisory teacher service.
Report does not fully explain the level of special needs expertise of other staff in the school and whether it is sufficient.	Crickhowell CP School is a very inclusive school with a well-developed learning support team run by the SENCo. The authority is confident that the school has the required level of expertise and access to further support if necessary.
Pupil numbers are very high in some years in the school which could put pressure on teachers – particularly if they have pupils with moderate to severe learning needs to cope with as well as a large class	The authority notes this comment. The authority is committed to supporting teachers to develop their skills in working with a wide range of learners with different needs. Additional support is available to schools where necessary through the advisory teacher service and challenge advisors, as well as internally within the school by the SENCo.
Concern about the impact on children with learning difficulties who will not be able to cope at the school without extra support.	The Code of Practice for SEN provides a graduated response to need through School Action to School Action Plus and in Powys there are support processes to assist schools in delivering effective support.
Concern that pupils that need extra support (e.g. moderately autistic) won't be able to attend the same school as their siblings who already go to the school.	As with all other mainstream schools, children with learning difficulties are supported through the graduated response to need, at School Action, School Action Plus or with a Statement of SEN. Children with special educational needs will be educated in their local mainstream setting, except for the very few where specialist provision is necessary.
What other type of support will be available if the closure goes ahead?	The existing support and available resources are sufficient to meet the needs of the learners in the school.
A shame as there would be no facility to offer to children that may need it so giving less choice to children and their parents.	The authority notes this comment, however the number of pupils that have been admitted to the Centre in recent years has been very low, and therefore the Centre is not an efficient use of resources.
Would like to know exactly where the council would spend the money. How would they prioritise and why?	The local authority has an obligation to use its money in the most efficient way possible in a time of austerity. Savings will be used to support its existing services for children with SEN.

#### **4. CONSULTATION WITH PUPILS**

A Young People's Version of the Consultation Document was available throughout the Consultation Period.

In addition, officers from the Authority met with the School Council of Crickhowell CP School in order to discuss the proposal.

The notes of this meeting are provided below:

#### **Meeting with School Council of Crickhowell CP School**

**5<sup>th</sup> November 2015**

Present:

Keith Brelstaff, Senior Manager – ALN and Inclusion, Powys County Council  
Sarah Astley, Schools Transformation Team, Powys County Council  
Susan Jones SENCo, Crickhowell CP School  
8 members of the School Council of Crickhowell CP School from years 3 – 6

KB introduced himself and SA and explained their roles within the Council.

He explained that they were here to talk to the School Council about the classroom in Crickhowell CP School which has provided support to pupils that need extra help (the 'Specialist Centre'). The number of pupils using or needing the centre has gone down significantly in the last few years, partly because the school does such a good job of supporting pupils that need extra support in the mainstream classes.

Because no pupils are currently using the centre, the Council is wondering whether it is still needed in Crickhowell CP School. The Council is keen to know what people think about the possibility that there wouldn't be a Specialist Centre in Crickhowell, and is keen to know what the School Council thinks about this idea. KB explained that a document had been produced to tell people that the Council is thinking about whether the Centre is needed in Crickhowell and the reasons why, and asking for their views. He explained that a young people's version has been produced, which is available at the school.

KB asked the School Council for their views on the idea that there may not be a Specialist Centre in Crickhowell CP School in the future. The following comments were made:

- *What will happen to the room that is currently used to house the Specialist Centre?*

KB explained that it would be up to the school to decide how to use the room should it not be used as a Specialist Centre. The Headteacher / school would discuss with the local authority about how best to utilise it.

A number of suggestions were received from the School Council about how the room could be used:

- The cooker room isn't used much, so perhaps it could be transferred
- Use the room for storing food, milk etc
- Use the room as a music room
- Use the room as a computer room

- *Concern about what would happen to pupils who need extra help*

KB explained that the Council wants to work with the school to make sure that pupils in the school that need extra help can get extra support in the classroom rather than having to go to a special room to get support. He explained that Crickhowell CP School already does this very well, which is one of the reasons why no pupils are currently accessing the Specialist Centre.

- *Concern that there would not be a quiet area available for pupils who need extra help to go where they can concentrate away from a noisy classroom*

KB acknowledged that whilst the Council wants to ensure that pupils that need extra help can get this in mainstream classrooms, it is a good point that sometimes children who need extra help do need somewhere quiet to go where they can concentrate.

- *If you need extra help with your work but you enjoy being with your friends, it's better for you to be in the class with everyone else rather than being in a room by yourself where you might be lonely*

KB acknowledged this point and explained that this is one of the reasons why the Council is keen to ensure that pupils who need extra help can be supported in mainstream classes instead of having to go to a separate classroom. The Council is keen for all children to be together, so that they can interact with each other. Maybe some children would need to go to a different quiet area for short periods of time, but not for the whole time.

- *Would it be possible to get the classroom back to support children that need extra help if it was needed?*

This would be a decision for the school. The Council has Specialist Centres dotted around Powys because there is a real need for them, but in Crickhowell the number of pupils using the centre have gone down. Because of this, the Council doesn't think there is a need to have a whole specialist room set aside, because the Council thinks that any children that need help can get it within the school.

KB thanked the School Council for taking part in the discussion and asked whether they had any other concerns or worries about the idea of there not being a specialist centre in Crickhowell CP School, or whether they wanted to ask any further questions. All members confirmed that they had no other concerns, worries or questions.

**Equality Impact Assessment (EqIA) – Decision Assessment reporting template**

This EqIA reporting template is designed to assist in the analysis of gathered data and evidence, to determine the equality impact of a proposal to change existing practices of a Council service. Once complete, the template should be made fully accessible to the public e.g. inclusion with publicly available Cabinet reports and/or publication on the Powys County Council website. For confidential matters, this should be made available once a decision has been taken.

***N.B. Please contact the Council’s Organisational Development Officer (Equalities) early on in the process if you require advice to conduct an assessment.***

<b>Proposal</b>	To close the Specialist Centre at Crickhowell CP School with effect from the 31 <sup>st</sup> December 2015	<b>Lead Person undertaking the assessment</b>	Sarah Astley
<b>Service Area</b>	Schools Service	<b>Relevant Head of Service who has agreed this assessment</b>	Ian Roberts Head of Schools
<b>Date of Assessment</b>	September 2015, updated November 2015 to take account of responses received during the Consultation Period		

Page 1715

The Equality Act 2010, requires that public sector organisations in the exercise of their functions, pay due regard to the following ‘general duty’:

- (a) Eliminating discrimination, harassment, victimisation and any other conduct that is prohibited by or under this Act;**
- (b) Advancing equality of opportunity between persons who share a relevant protected characteristic and persons who do not share it;**
- (c) Fostering good relations between persons who share a relevant protected characteristic and persons who do not share it.**

*The protected characteristics include: age, disability, gender reassignment, pregnancy and maternity, race, religion or belief, marriage and civil partnership, sex and sexual orientation. This assessment also includes a consideration of impact upon people and communities whose language of choice is Welsh.*

The specific regulations for Wales [Equality Act 2010 (Statutory Duties) (Wales) Regulations 2011] require public sector bodies to monitor

relevant policy and practises and then assess and report on the impact based upon an analysis of relevant data and evidence.

### 1. AIM or PURPOSE

Briefly describe the aim or purpose of the change proposal being assessed.

This consultation is about whether Powys County Council should publish statutory proposals for the following:

To close the Specialist Centre at Crickhowell CP School from the 31<sup>st</sup> March 2016.

Should the Specialist Centre close, alternative provision for pupils that would have accessed this centre will be available at the Specialist Centre located in Brecon for pupils that need this type of provision, otherwise enhanced provision will be available within mainstream provision.

### 2. OBJECTIVES

Please state the current business objectives of the change proposal.

The reasons why the authority is proposing to discontinue the Specialist Centre at Crickhowell CP School can be summarised as follows:

- The number of pupils attending the Specialist Centre has decreased in recent years. There are currently no pupils attending the Centre.
- The Specialist Centre has the capacity to provide for a maximum of 12 pupils, therefore there are 12 surplus places, which is 100% of the Centre's capacity.
- Alternative provision is available either through enhanced support in the mainstream of Crickhowell CP School or neighbouring schools, or specialist provision in neighbouring catchments.
- Due to the small number of pupils that have been attending the Specialist Centre, the Centre no longer provides value for money to the Council.

### 3. BENEFITS and OUTCOMES

i) What are the intended benefits or outcomes from the change proposal?

The benefits of the proposal are:

- More efficient use of resources
- Greater opportunities for mainstream inclusion in local community schools for pupils with complex learning difficulties
- Reduction in surplus places in specialist provisions
- Greater opportunities for being within a mixed peer group with social as well as learning opportunities

	- Freeing up of the room within the school for other uses	
<b>4. CORPORATE RELEVANCE</b>		
How does this change proposal relate to the Powys Change Plan and/or Powys One Plan?	<p>The proposal supports Powys County Council’s vision for education, which is outlined within the One Powys Plan for 2014-17. ‘Transforming Learning and Skills’ is one of the priorities within this plan, and within this priority, the Plan states that</p> <p><i>‘There is a need to review the provision of Additional Learning Needs and Behaviour services’</i></p> <p>and that the authority will</p> <p><i>‘Work with our partners to review and re-configure services for children and young people with additional learning needs to...provide improved support for children and young people and all schools.’</i></p>	
<b>5. DATA USED</b>		
<b>5.1. What data has been used to conduct this assessment?</b>  <b>Tick/shade boxes as appropriate.</b>	Profiling of service users, providing a breakdown of who uses the service by the protected characteristics.	✓
	Service user satisfaction rates, broken down by the protected characteristics.	
	Qualitative data (analysed against the protected characteristics) which provides evidence about current services users experience accessing the service.	
	Qualitative data gathered from those that are not currently using the service.	
	Complaints monitoring against the protected characteristics	
	Wider research reports and findings.	
	Relevant service based Equality Impact Assessment	
<b>5.2. Are there any gaps in the data?</b>	<b>Yes</b> <input type="checkbox"/> Please state the gaps:  How will the gaps be addressed going forward?	<b>No</b> <input type="checkbox"/> ✓

<b>6. DATA ANALYSIS</b>		
<p><b>6.1 Quantitative</b>  <b>Summarise the key quantitative data analysis results, providing key headline statistics.</b>          Include data that relates to existing provision and also data relating to proposal. E.g. statistics generated from a consultation questionnaire.</p> <p><b>Key questions:</b></p> <p><b>i)</b> Are certain groups currently underrepresented in service user figures? Will a change affect this?</p> <p><b>ii)</b> How do satisfaction levels compare across the protected characteristic groups? How will a change affect this?</p>	<p>Based on information obtained via the Pupil Level Annual School Census 2015 (PLASC), the following number of pupils at Crickhowell CP School belong to the protected characteristic groups:</p> <ul style="list-style-type: none"> <li>- Free School Meals – 10 pupils in the school are eligible for free school meals. This is 4.3% of the total number of pupils in the school, which is significantly lower than the Powys average (10.9%)</li> <li>- Disability – 31 pupils at the school have special educational needs. 2 pupils (0.9%) have Statements, 23 pupils (10%) are on School Action and 6 pupils (3%) are on School Action Plus.</li> <li>- English as an Additional Language – English is the first language of the vast majority of pupils at the school. English is an Additional Language for 8 pupils at the school, which is 3.4% of pupils.</li> <li>- Race / ethnicity – White British is the ethnic group of the vast majority of pupils at the school. 11 pupils aged 5 and over at the school belong to an ethnic group other than White British, which is 6% of the total number of pupils aged 5 and over.</li> <li>- Welsh Language – No pupils come from homes where Welsh is spoken fluently</li> </ul> <p>This information shows that the proportion of pupils in the school that belong to the protected characteristic groups is very small. However there are 31 pupils with additional learning needs that are in a protected characteristic group for disability. In addition, there are 10 pupils that are in a protected characteristic group due to their ethnic group.</p> <p>At the current time (September 2015), there are no pupils attending the Specialist Centre at Crickhowell CP School.</p>	<p>Crickhowell CP School was last inspected by Estyn in May 2014. The inspection report makes the</p>

**6.2 Qualitative**

**Summarise the key qualitative data analysis, providing key themes or patterns.**

Include data that relates to existing provision and also data relating to proposal. E.g. protected characteristics focus group on the proposal.

**Key questions:**

- i) Do certain groups have a different service user experience? How will a change affect this?
- ii) Have any areas for improvement been communicated by particular groups? Will a change have an impact upon these views?
- iii) What are the reasons behind some groups not using the service? How will a change affect this position?
- iv) What has consultation on your proposals revealed about impact on the protected characteristics?

following specific references to the specialist centre and the school’s provision for additional learning needs in mainstream classes:

*‘In the specialist centre, all pupils communicate effectively with adults and each other through a variety of language strategies. The pupils in the specialist centre make significant progress from starting points that are normally well below average.’*

*‘The provision for pupils with additional learning needs is a strong feature of the school. It is well planned and co-ordinated efficiently in both the specialist centre and mainstream classes. The school has developed an effective system to identify pupils’ learning needs and produces child-friendly individual education plans. It provides a well-structured programme of support for pupils’ needs. The pupils in the specialist centre integrate successfully into the day-to-day life of the school. All pupils mix well in both formal and informal activities. The quality of provision in the specialist centre is effective.’*

Consultation on the closure of the Specialist Centre at Crickhowell CP School was carried out between the 6<sup>th</sup> October and the 17<sup>th</sup> November 2015. 3 written responses were received to the consultation. A meeting was also held with the School Council of Crickhowell CP School.

The issues raised in the responses to the consultation are listed in the Consultation Report produced by the authority, along with the authority’s response to each issue. However, the concerns raised in respect of the impact on pupils belonging to the protected characteristic groups are summarised below:

- Concern that pupils with learning difficulties will not be able to cope at the school without extra support
- Concern that pupils that need extra support would be unable to attend their local school

**7. EqIA RESULT**

**Based on an analysis of the available qualitative and quantitative data, please tick/shade the appropriate box opposite to provide the EqIA**

**The proposal does not present any adverse impact on equality.**

[Proceed to question 10]

**The proposal presents some adverse impact on equality.**

[Proceed to question 8]

✓

<p><b>assessment result.</b></p>	<p><b>The proposal presents significant impact on equality</b> [Proceed to question 8]</p>	
<p><b>8. AREAS for IMPROVEMENT</b></p>		
<p><b>Please provide detail of weak or sensitive areas of the proposal identified by the assessment.</b></p> <p>i) Which protected characteristic groups are particularly affected?</p> <p>ii) Will people on low incomes be affected?</p> <p>iii) Will Welsh speakers be affected?</p>	<p>i) The protected characteristic group that will be mostly affected by the proposal are those with additional learning needs.</p> <p>ii) As no pupils are currently attending the Specialist Centre at Crickhowell CP School, there will be no impact on people on low incomes. If any pupils from the Crickhowell area required access to specialist provision in the future, transport would be provided in accordance with the authority’s transport policy if the pupil lives two miles or more away from the provision.</p> <p>iii) None of the pupils currently attending Crickhowell CP School are from Welsh-speaking homes, therefore the proposal will not impact on Welsh speakers. Crickhowell CP School is an English-medium school.</p>	
<p><b>9. EQUALITY IMPROVEMENT</b></p>		
<p><b>9.1 Having identified problematic aspects to the proposal, how will this now be addressed?</b></p> <p><i>i.e. Are you able to involve (in some capacity) people from protected characteristic groups, Welsh Speakers, people on low incomes, to assist you in this process?</i></p> <p>i) Can the impact be mitigated, and how will this be done?</p>	<p>The consultation paper related to this proposal sets out how the authority will provide alternative provision that meets the needs of pupils that would have accessed the specialist centre at Crickhowell CP School:</p> <p>‘Should the Specialist Centre at Crickhowell CP School close, alternative provision for pupils that would have accessed this centre will be provided in the following ways:</p> <ul style="list-style-type: none"> <li>- Enhanced provision within mainstream provision</li> <li>- Access to alternative Specialist Centres located in Brecon for pupils that need this</li> </ul>	

<p>ii) Does the proposal require modification to reduce or remove this impact?          iii) Should the proposal be considered for removal, owing to the degree of impact it is likely to have?</p>	<p style="text-align: center;">type of provision</p> <p>In terms of the enhanced provision that would be provided within mainstream provision, this would be based on the identified needs of the learner and would be based on inclusive principles, i.e. the learner will be supported in a mainstream class through individual differentiation, small group work and the support of a teaching assistant using programmes designed, assessed and monitored by the SENCo. Further support would be available from support services, such as the Educational Psychology Service and the Learning Inclusion Support Team. Specifically resourced outreach services are also available from the area Special School, as well as from the Specialist Centres in Brecon. This approach is successful in delivering good outcomes in areas where there are no Specialist Centres.'</p> <p>The Authority is confident that in the future, Crickhowell CP School will be able to meet the needs of pupils with special educational needs, except for the very few pupils for whom specialist provision would be needed.</p>							
<p><b>9.2 Will the management of the impact as outlined in 9.1, be included in the Service Improvement Plan?</b></p>	<p><b>Yes</b> <input type="checkbox"/></p> <p>Date added.....</p> <p>Reference.....</p>	<p><b>No</b> <input checked="" type="checkbox"/></p> <p>If no, please explain why not:  <b>Need was not identified at time of writing Service Strategy</b></p>						
<p><b>10. ONGOING MONITORING</b></p>								
<p><b>How will the decision now be monitored on an ongoing basis to consider its impact over time?</b></p>	<p style="text-align: right;"><b>Please tick/shade</b></p> <table border="1" style="width: 100%; border-collapse: collapse;"> <tr> <td data-bbox="907 1225 1641 1297">Equality monitoring of uptake of the service within which the decision was made</td> <td data-bbox="1641 1225 2033 1297"></td> </tr> <tr> <td data-bbox="907 1297 1641 1369">Satisfaction monitoring of service users (broken down by protected characteristic)</td> <td data-bbox="1641 1297 2033 1369" style="text-align: center;">✓</td> </tr> <tr> <td data-bbox="907 1369 1641 1436">Recording and analysing complaints/requests/compliments</td> <td data-bbox="1641 1369 2033 1436"></td> </tr> </table>		Equality monitoring of uptake of the service within which the decision was made		Satisfaction monitoring of service users (broken down by protected characteristic)	✓	Recording and analysing complaints/requests/compliments

### Monitoring arrangements

The Transforming Learning and Skills Board is responsible for overseeing the strategic direction of the Schools Transformation Programme: setting direction, implementing change, monitoring and reporting to the Cabinet of the Council.

Equality monitoring will form an integral part of the County Council's arrangements for any school reorganisation and will be undertaken where a significant or material change in provision is proposed.

The Head of Schools Service will be responsible for on-going monitoring.

### Publication of results of the impact assessment

The results of the impact assessment will be published on the Council's website

### Equality Impact Assessment Action Plan

Any actions identified as a result of this impact assessment will be taken forward for inclusion in the Schools Service Business Plan

# C258- 2015

## CYNGOR SIR POWYS COUNTY COUNCIL.

### CABINET EXECUTIVE

15<sup>th</sup> December 2015

**REPORT AUTHOR:** County Councillor Arwel Jones  
Portfolio Holder for Education

**SUBJECT:** Schools Reorganisation Policy 2015

---

**REPORT FOR:** Decision

---

### Summary

This report presents a new Schools Reorganisation Policy, which, if approved, will apply to all schools maintained by Powys County Council, and will be effective from 31<sup>st</sup> December 2015. It replaces all previous policies for the reorganisation of schools held by the Council, and will be applied to any plans to review or reorganise schools that are commenced from this date.

### Background

On the 11<sup>th</sup> November 2014, Cabinet approved a Powys School Transformation Policy ("STP"), which set out the Council's vision and process for the transformation of primary and secondary schools in the county. This Policy has underpinned all school reviews that have been carried out since the 11<sup>th</sup> November 2014.

However, it is necessary to introduce a new policy for the reorganisation of schools that allows more flexibility within the review process and a stronger alignment with the Welsh Government's Schools Organisation Code.

### Proposal

That Cabinet approves the School Reorganisation Policy 2015 for implementation from the 31<sup>st</sup> December 2015.

The Policy includes:

- The Vision for Schools in Powys
- Background and Context
- The Process for Reviewing Schools
- Potential Options for Reorganisation

The main change from the previous Policy is that all decisions during the review stage will be the responsibility of the Schools Service Senior Management Team in consultation with the Portfolio Holder for Education.

This replaces the School Organisation Review Panel (SORP) under the current STP, and removes an unnecessary level of bureaucracy within the process.

The Policy will apply to all schools maintained by the Council, in accordance with the Schools Standards and Organisation (Wales) Act 2013.

There is more flexibility in the new Policy to define the format of reviews and the criteria for review has been amended to ensure closer alignment with the Welsh Government's School Organisation Code.

Officers will also be developing a new programme management structure to ensure that the Schools Transformation Programme has robust governance with appropriate programme management procedures.

### **One Powys Plan**

'Transforming Learning and Skills' is a key priority within the One Powys Plan, and the Authority's aim is to ensure that 'all children and young people are supported to achieve their potential'. The plan states that the Authority needs to 'reorganise schools (primary, secondary and post 16) to ensure affordability, sustainability and appropriate leadership capacity'.

### **Options Considered/Available**

The other option considered was to continue with the School Transformation Policy 2014.

### **Preferred Choice and Reasons**

The preferred choice is to introduce a new policy which provides more flexibility when undertaking school reorganisation reviews.

### **Sustainability and Environmental Issues/Equalities/Crime and Disorder,/Welsh Language/Other Policies etc**

### **Children and Young People's Impact Statement - Safeguarding and Wellbeing**

The authority's Schools Transformation Programme is intended to improve educational outcomes for children and young people. This aligns with the aspiration to improve safeguarding and well-being for children and young people.

### **Local Member(s)**

This Policy applies to all members within the Council.

### **Other Front Line Services**

#### **Support Services (Legal, Finance, Corporate Property, HR, ICT, Business Services)**

Legal: There has been legal input during the formulation of the new policy which streamlines the process and aligns it more closely with Welsh Government's School Organisation Code.

Corporate Finance: "The professional Lead for Finance comments that the changes proposed relate to the Governance arrangements and processes for School Reorganisation and these they do not have any financial implications."

### **Local Service Board/Partnerships/Stakeholders etc**

### **Corporate Communications**

The report is of public interest and requires use of news release and social media to publicise the decision

### **Statutory Officers**

The Solicitor to the Council (Monitoring Officer) has commented as follows: " I note the legal comment and have nothing to add to the report."

The Strategic Director Resources (S151 Officer) notes the comments made by Finance.

### **Members' Interests**

The Monitoring Officer is not aware of any specific interests that may arise in relation to this report. If Members have an interest they should declare it at the start of the meeting and complete the relevant notification form.

<b>Recommendation:</b>	<b>Reason for Recommendation:</b>
<b>To approve the Schools Reorganisation Policy 2015 for implementation from 31<sup>st</sup> December 2015</b>	<b>To provide a robust but flexible framework when undertaking school reorganisation reviews.</b>

Date of publication: December 2015

## **DEFINITION**

This Policy applies to all schools maintained by Powys County Council, and is effective from December 31<sup>st</sup> 2015. It replaces all previous policies for the reorganisation of schools held by the Authority, and will be applied to any plans to review or reorganise schools that are commenced from this date onwards. For the avoidance of doubt, the following reviews which have already started will be completed in accordance with the School Transformation Policy 2014:

- Secondary School Reviews – Llandrindod High School, Builth Wells High School, Gwernyfed High School and Brecon High School;
- Primary School Reviews – primary schools in the Llandrindod and Builth Wells catchment areas; and
- Welshpool Town Primary Education Review.

## **1. THE VISION FOR SCHOOLS IN POWYS**

Powys County Council is committed to ensuring that all children and young people have an equal opportunity to receive the best possible education. The Council aspires to have an educational infrastructure that:

- Provides all learners with opportunities to achieve high standards of achievement and attainment;
- Provides for first class teaching and learning provision reflecting national, regional and local priorities;
- Has high quality resilient leadership and management;
- Provides robust linguistic continuity and progression;
- Improves cost-effectiveness and efficiency;
- Has the right number of schools in the right place for the current and future pupil population of Powys;
- Has school buildings and blocks that are assessed as condition A or B;
- Minimises dependency on temporary accommodation; and
- Reduces overall surplus places in schools.

The Council has a duty to ensure that school buildings, teaching resources and pupils' learning experiences are shaped to develop competencies which allow children and young people to engage confidently with the challenges of their future lives. The challenge faced by the Council is to ensure that schools provide an appropriate, fit-for-purpose learning environment that will facilitate the delivery of a curriculum, as defined in "Successful Futures"<sup>1</sup> to ensure children and young people develop as;

- ambitious, capable learners ready to learn throughout their lives;

---

<sup>1</sup> Independent Review of Curriculum and Assessment Requirements in Wales. Professor Ian Donaldson February 2015

- enterprising, creative contributors, ready to play a full part in life and work;
- ethical and informed citizens of Wales and the world; and
- healthy, confident individuals, ready to lead fulfilling lives as valued members of society.

### **1.1 Aspiration for size of schools in Powys**

The aspiration for primary education in Powys is to have schools with single year group classes, and schools that have headteachers with no classroom responsibilities. For secondary phase provision, the Council aspires to have schools with at least 600 pupils in Years 7 to 11. This would allow average year group sizes of a minimum of 120 children.

The Authority's optimum model for post-16 education is for centres to be able to provide 25 subjects, with a minimum class size of 12 or above. This will enable the Authority and schools to meet the requirements of the Learning and Skills (Wales) Measure 2009 whilst minimising the need for inter-school travel.

However, it must be recognised that in some situations, geographic or linguistic issues make the aspirational targets for size of schools difficult to achieve, and consideration will be given to the specific circumstances of each school under consideration.

In order to establish an infrastructure of schools that meet the Council's aspirations for education, the Council will need to consider new models of delivering educational provision in the county. In a rural county as diverse as Powys there is no one size fits all approach to school organisation. Consideration will be given to the specific circumstances of each school/s and community.

### **1.2 Continued Improvement of Educational Standards**

Powys County Council, in partnership with Ceredigion, Carmarthenshire, Pembrokeshire, Swansea and Neath Port Talbot (ERW) implements the National Model for School Improvement to raise standards in its schools. The Council is working effectively in partnership with schools and other partners to ensure that school and pupil performance is improving. There is a need to ensure that schools are organised in such a way that will ensure that they can continue to improve in the future, to ensure that all pupils can achieve the best possible standards.

### **1.3 Ensuring more effective and resilient leadership**

Ensuring effective, distributed and resilient leadership in our schools is a key driver in terms of reviewing the way education is provided in Powys. There are significant difficulties in recruiting headteachers in both the primary and secondary sector. A significant number of headteachers in primary schools in Powys continue to have class responsibility for over 50% of their time, which limits the time they have to carry out a leadership function.

The Council's aspiration is for all primary schools to be led by headteachers who do not have any class responsibilities, to enable them to focus on effective leadership of the school and on school improvement.

#### **1.4 Delivering education within a challenging budgetary situation with changing demographics**

In May 2012, Estyn published a report entitled 'How do surplus places affect the resources available for expenditure on improving outcomes for pupils?'<sup>2</sup>, which concluded that 'where there is a higher than necessary level of school places, resources are being deployed inefficiently that could be better used to improve the quality of education for all learners.'

The Council monitors school population projections on an annual basis and recognises that school population trends fluctuate dependent on a variety of school and external factors

In order to ensure that the resources available to provide education in Powys are used in the most efficient way, the Council will continue to work towards reducing the percentage of surplus places in Powys schools. The Council must seek to reduce its fixed property costs if it is to release resources to improve standards.

It must be acknowledged that in a rural county such as Powys, travel costs will be an important consideration when considering how to address large numbers of surplus places in schools.

#### **1.5 Robust continuity and progression in Welsh-medium education in all key phases**

The Welsh Government's vision, as stated in its **Welsh-medium Education Strategy** (2010)<sup>3</sup> is "to have an education and training system that responds in a planned way to the growing demand for Welsh-medium education, reaches out to and reflects our diverse communities and enables an increase in the number of people of all ages and backgrounds who are fluent in Welsh and able to use the language with their families, in their communities and in the workplace."

In its **Welsh in Education Strategic Plan**<sup>4</sup> for 2014-17, the Council sets out its aim to ensure robust linguistic progression through the medium of Welsh. In order to achieve this, the Council will need to establish additional and extend current Welsh-medium provision in the county. However, the Council is fully aware that there is a resource implication to fulfilling this aspiration and this will be taken into account. In some cases, it may be necessary to close

Welsh-medium schools and streams in order to ensure more appropriate provision for learners.

## 1.6 The 21<sup>st</sup> Century Schools Programme

Powys County Council aspires to provide learning environments that meet the standards of the Welsh Government's 21<sup>st</sup> Century Schools Programme.

The 21<sup>st</sup> Century Schools Programme is a major, long-term and strategic capital investment programme, which aims to create educational communities in Wales that are fit for the 21st century. The programme aims to deliver:

- Learning environments in Wales that will enable the successful implementation of strategies for improvement and better educational outcomes;
- Greater economy and efficiency for learning environments through better use of resources; and
- A sustainable education system in Wales that meets national building standards and reduces the recurrent costs and carbon footprint of education buildings.

The majority of Powys schools are of ageing stock, with a combination of old Victorian buildings, early and mid-20<sup>th</sup> Century buildings. The Welsh Government commissioned consultants E.C Harries in 2008/9 to carry out surveys on all Powys schools as part of their 21<sup>st</sup> Century Schools Programme. The majority of schools were graded on their condition, their suitability and their sustainability. In terms of building condition, schools were graded from A-D, and the grades are defined as follows:

<b>Grade</b>	<b>Description</b>
<b>Grade A</b>	Good. Performing as intended and operating efficiently
<b>Grade B</b>	Satisfactory. Performing as intended but exhibiting minor deterioration
<b>Grade C</b>	Poor. Exhibiting major defects and / or not operating as intended
<b>Grade D</b>	Bad. Life expired and/or serious risk of imminent failure

Future investment in school buildings in Powys will be aligned with the aspirations of the 21<sup>st</sup> Century Schools Programme, as follows:

- Buildings and grounds that are welcoming to the parents, staff and the community, whilst providing the appropriate security for the safeguarding of learners;
- Good organisation of learning spaces that are easily accessible;
- Internal spaces that are well-proportioned, fit for purpose and meet the needs of the curriculum and staff;
- Flexible design to allow for future growth or changes of use;
- Good environmental conditions throughout, including optimum levels of natural light and ventilation;

- Well-designed external spaces;
- A sustainable approach to design, construction and environmental servicing;
- Good use of the site, balancing the needs of the local community.

### **1.7 Integrated service provision and commissioning**

Increased service integration and multi-agency working is one way of delivering services more effectively, and is particularly important in order to provide support for children and their families. Integrating service provision will enable the removal of barriers which could prevent them from reaching their full potential.

## **2. CURRENT PROVISION IN POWYS**

Early Years provision is delivered at school based provision or by third party providers.

Primary School provision in Powys is delivered through a mixture of traditional primary schools, infant, junior, 'all through school', and federated schools.

Secondary School provision is delivered through a mixture of secondary schools and an 'all through school'. In some cases, provision is delivered from schools that are on dual-sites.

Specialist provision in Powys provides for pupils with multiple, profound and complex needs.

Welsh-medium provision is provided through a combination of Welsh-medium schools and dual stream schools in the primary sector, and through dual stream schools in the secondary sector.

Denominational provision is provided at voluntary controlled or voluntary aided Church-in-Wales or Roman Catholic schools.

### 3. SCHOOL REVIEW PROCESS

The School Review Process will ensure that the Council can take a proactive approach to planning and managing school places within a changing demographic context. This will ensure that the Council continues to avoid a 'one size fits all' approach, and can take careful account of local circumstances and context.

All reviews will be undertaken in accordance with

- Section 38 and 39 of the Schools Standards and Organisation (Wales) Act 2013;
- The Federation of Maintained Schools (Wales) Regulations 2014;
- Any other related policy and legislation, where appropriate.

The **School Standards and Organisation (Wales) Act 2013**, which came into force on the 4<sup>th</sup> March 2013, requires that the Welsh Ministers issue a School Organisation Code (the "Code"). The Code outlines the legislative process that local authorities are required to follow when preparing, publishing, approving or determining school organisation proposals.

The **Federation of Maintained Schools (Wales) Regulations 2014** which came into force on 22 May 2014 gives effect to local authorities' powers to federate schools. Schools already have powers to federate by choice under provisions introduced in 2010. These powers have now been consolidated into the 2014 Regulations. Statutory guidance containing information and practical advice to governing bodies and local authorities on the federation process has been issued to support the regulations.

#### 3.1 Format of Reviews

The Schools Service Senior Management Team, in consultation with the Portfolio Holder for Schools, will decide which schools are to be reviewed, as outlined in Stage 1 below.

School reviews may take a variety of forms:

- i. Reviews of single schools;
- ii. Reviews of a group/s of schools;
- iii. Reviews of a catchment area/combined catchment areas;
- iv. County-wide reviews;
- v. Thematic reviews – these may include, but not be limited to, the following: Welsh-medium provision; sixth form provision; special education provision;
- vi. In some cases, it may be necessary to carry out reviews of educational provision on a cross-border basis in partnership with other Welsh Authorities;

In order to ensure that there is sufficient denominational places available to meet the needs of pupils, faith provision will be reviewed in accordance with the School Review Process in partnership with the relevant diocesan authority.

### **Stage 1: Review**

All reviews will consider, but not be limited to, the following factors:

- Quality and standards in education;
- Need for places and the impact on accessibility of schools;
- Resourcing of education and other financial implications; and
- Other general factors.

In the case of 3.1 (i) ii) and iii) above, reviews will include discussion with governors, local members and headteachers of all schools under review, and also with diocesan directors, in the case of faith provision. Discussion may also take place with the headteachers, governors and local members of affected schools i.e. schools that may be affected by the review of another school, as identified by the Schools Service Senior Management Team and the Portfolio Holder for Education.

In the case of 3.1(iv) v) vi) (strategic, thematic or cross-border) reviews, the Schools Service Senior Management Team, in consultation with the Portfolio Holder for Education, will decide on the most appropriate means of engagement with key stakeholders, including, but not limited to, governors, headteachers, local members and diocesan authorities.

On completion of a review, officers will then develop draft recommendations. These will be shared with the appropriate stakeholders who will have the opportunity to provide written comments within 14 days of receipt of the draft recommendations.

### **Stage 2: Recommendations and Consultation**

Cabinet will receive and consider a report with **draft recommendations, together with any comments received from stakeholders**, along with a draft impact assessment.

If the draft recommendations are supported, in principle, by Cabinet then the following will take place:

- If the draft recommendations relate to an 'element of school reorganisation that requires the publication of proposals' or is 'a regulated alteration', as defined within the Code, then statutory procedures will be followed in accordance with the Welsh Government's **School Organisation Code**, including consultation; or

- If the draft recommendation is to proceed with establishing a **federation** of schools, then the statutory procedures set out in **The Federation of Maintained Schools (Wales) Regulations (2014)** will be followed, including consultation.

### **Stage 3: Decision-making following consultation**

Following consultation, a Consultation Report will be prepared. Cabinet of the Council will then consider the Consultation Report, along with a final impact assessment.

- a. If the proposals are related to an **'element of school reorganisation that requires the publication of proposals' or is 'a regulated alteration'**, as defined within the Code, Cabinet will be responsible for deciding whether to proceed with the publication of a statutory notice.

If Cabinet decides to proceed with the publication of a statutory notice, then this will be published in accordance with the School Organisation Code. Anyone wishing to make objections to a school organisation proposal has the opportunity to do so in writing within 28 days of the date on which the statutory notice was published.

Following the completion of the statutory notice period, an Objection Report will be drafted and published in accordance with the School Organisation Code, which will include a summary of the objections received and the Authority's response to those objections. This will be considered by Cabinet, which must decide to approve, reject or approve the proposals with modifications allowed by the Code; or

- b. In some cases, proposals require approval by the Welsh Ministers. The Welsh Ministers may decide to approve, reject or approve the proposals with modifications allowed by the Code; or
- c. If Cabinet supports a proposal to establish a **federation of schools**, then the process to establish a federation will be followed in accordance with the Federation of Maintained Schools (Wales) Regulations 2014.

## Summary

This Code on School Organisation ('the Code') is made under Sections 38 and 39 of the School Standards and Organisation (Wales) Act 2013 ('the 2013 Act').

Section 38 requires the Welsh Ministers to issue a Code that may impose requirements and include guidelines in respect of school organisation on the following (known collectively in this Code as "relevant bodies"):

- the Welsh Ministers;
- local authorities;
- the governing bodies of maintained schools<sup>1</sup>; and
- the promoters of proposals to establish voluntary schools.

The Code comes in to force on 1 October 2013 and will apply in respect of all school organisation proposals published by way of statutory notice on or after that day. Proposals published before 1 October 2013 will be determined in accordance with the arrangements made under the School Standards and Framework Act 1998 and the Code does not apply to them.

The Code contains the following elements:

1. It imposes requirements in accordance with which relevant bodies (or persons exercising a function for the purpose of the discharge, by a local authority or the governing body of a maintained school, of functions in Part 2 (changes which require proposals)) must act. Failure by a relevant body to comply with the requirements set out in this Code may result in a complaint to the Welsh Ministers or to the Public Services Ombudsman for Wales. Where mandatory requirements are imposed by the Code or by the 2013 Act or another statute or statutory instrument, it is stated that the relevant bodies **must** comply with the particular provision. Where practices are prohibited, it is stated that the relevant bodies **must not** use this practice.
2. It includes statutory guidance to which relevant bodies **must** have regard and sets out the policy context, general principles and factors that should be taken into account by those bringing forward proposals to reconfigure school provision and by those responsible for determining proposals. Where guidance is given by the Code, it is stated that relevant bodies **should** follow this guidance unless they can demonstrate that they are justified in not doing so.
3. It provides a description of the statutory requirements set out in the 2013 Act.

---

<sup>1</sup> The categories of maintained schools in Wales are community, voluntary controlled, voluntary aided, foundation and community special.

The Code builds on good practice which already exists amongst local authorities and others, but does not aim to give exhaustive guidance on all aspects of school organisation. Local authorities and others will need to ensure that in carrying out their school organisation functions they act at all times in ways which are reasonable and founded on the interests of learners.

This Code supersedes any guidance to be found in Welsh Government Guidance Circular No: 021/2009 school organisation proposals, National Assembly for Wales Circular 9/99: Organisation of School Places, and National Assembly for Wales Circular No: 48/2004 Guidance Accompanying the School Organisation Proposals by the National Council for Education and Training for Wales Regulations 2004.

The Code is primarily designed for the use of the relevant bodies but all those with an interest in school organisation matters may also find it useful.

# 1. Development and consideration of proposals

## 1.1 Key background principles and policies

The planning and development of effective school organisation proposals is crucial to the Welsh Government's goal of transforming education in Wales and providing better educational outcomes.

Relevant bodies **should** ensure that proposals comply with and support national policies and overarching aims, in particular the Welsh Government's commitment to increase school effectiveness, and narrow inequalities in achievement between advantaged and disadvantaged areas, groups and individuals.

Amongst the overarching principles and policies which **should** be taken into account by relevant bodies in developing school organisation proposals are the following:

- United Nations Convention on the Rights of the Child;
- A living language: a language for living – Welsh Language Strategy 2012-17;
- Welsh- medium Education Strategy;
- One Wales: One planet, a new sustainable development scheme for Wales May 2009 or any successor strategy;
- Child Poverty Strategy for Wales (issued February 2011 Information document number 95/2011), or any successor strategy;
- Faith in Education.

In addition, when developing school organisation proposals, the local plans to which relevant bodies **should** have regard include the following:

- Local plans for economic or housing development;
- Welsh in Education Strategic Plans (made under part 4 of the 2013 Act);
- Children and Young People's Plans (or successor plans);
- 21<sup>st</sup> Century Schools – Capital Investment Programme and the relevant wave of investment.

Finally, relevant bodies **should** have regard to the following Welsh Government guidance on related matters:

- Learner Travel Operational Guidance - April 2009;
- Measuring the capacity of schools in Wales, Circular No: 021/2011.

## 1.2 Factors to be taken into account in preparing, publishing, approving or determining school organisation proposals

The following paragraphs set out the factors which **should** be taken into account by relevant bodies when exercising their functions of preparing and publishing school organisation proposals, or approving/determining them. Paragraphs 1.3 to 1.6 are applicable in the case of all proposals.

### 1.3 Quality and standards in education

Relevant bodies **should** place the interests of learners above all others. With reference to the key questions of the Office of Her Majesty's Chief Inspector of Education and Training in Wales (Estyn), they **should** give paramount importance to the likely impact of the proposals on the quality of:

- outcomes (standards and wellbeing);
- provision (learning experiences, teaching, care support and guidance, and learning environment);and
- leadership and management (leadership, improving quality, partnership working and resource management)

at the school or schools which are the subject of the proposals and at any other school or educational institution which is likely to be affected. Relevant bodies **should** pay particular attention to the impact of the proposals on vulnerable groups, including children with Special Educational Needs (SEN).<sup>2</sup>

Relevant bodies **should** also consider the ability of the school or schools which are the subject of the proposals to deliver the full curriculum at the foundation phase and each key stage of education. This consideration **should** include the quality of curriculum delivery and the extent to which the structure or size of the school is impacting on this.<sup>3</sup>

Where proposals involve the transfer of learners to alternative provision there **should** normally be evidence<sup>4</sup> that the alternative would deliver outcomes and offer provision at least equivalent to that which is currently available to those learners (including learners with SEN). Proposers **should** ensure that the disruption to learners is minimised.

In assessing the impact of proposals on quality and standards in education and how effectively the curriculum is being delivered, relevant bodies **should** consider any relevant advice from Estyn, refer to the most recent Estyn reports or other evidence derived from performance monitoring, and take into consideration any other generally available information available on a school's effectiveness.

---

<sup>2</sup> The term Special Educational Needs (SEN) may in future be replaced by Additional Needs (AN).

<sup>3</sup> Primary legislation sets out the statutory aims of the school curriculum in Wales at section 99 of the Education Act 2002.

<sup>4</sup> Advice from Estyn might reasonably be judged as evidence in relation to alternative provision which is brand new.

## 1.4 Need for places and the impact on accessibility of schools

Local authorities **must** ensure that there are sufficient schools providing primary and secondary education for their area. Schools are regarded as sufficient if they are sufficient in number, character and equipment to provide for all pupils the opportunity of appropriate education<sup>5</sup>. In order to fulfil these duties, local authorities **must** ensure that they plan thoroughly and engage fully with relevant partners, including the appropriate religious bodies<sup>6</sup> for schools serving their area which have a designated religious character.

In the light of the above, relevant bodies **should** have regard to the following factors:

Where a school closure<sup>7</sup>, reduction in capacity or age range contraction is proposed:

- whether alternative school-based provision will have sufficient capacity and provide accommodation of at least equivalent quality, for existing and projected pupil numbers;

*In considering proposals relevant bodies **should** have regard to the relevant Building Regulations and associated Building Bulletins, and to the ‘Welsh Government’s circular on ‘Measuring the capacity of schools in Wales’ (Circular No: 021/2011). In addition, the Education (School Premises) Regulations 1999 set out the standards for school premises, including minimum areas of team game playing fields to which schools **must** have access. Statutory proposals **should** ensure that these standards are met.*

- with reference to the nature of the schools subject to proposals, whether the alternative school-based provision is sufficient to meet existing and projected demand for schools of the same:
  - a. language category as set out in “Defining schools according to Welsh medium provision” Welsh Assembly Government Information document No: 023/2007 (Information document No 023/2007); and
  - b. (if relevant) designated religious character;

*Proposals **should** ensure that the balance of school provision reflects the balance of demand. This means that where school provision is being reduced or removed, alternative school provision of the same nature (language category or, if relevant, religious character), wherever possible, **should** remain available and accessible to pupils in the local area.*

---

<sup>5</sup> Section 14 of the Education Act 1996.

<sup>6</sup> An appropriate religious body is, in the case of a Church in Wales or Roman Catholic school, the appropriate diocesan authority, or in the case of other schools, the body representing the religion and religious denomination stated in relation to the school in an order made under section 69(3) of the School Standards and Framework Act 1998.

<sup>7</sup> Any reference to ‘school closure’ included in this document means the discontinuance of a maintained school as set out in section 40 of the 2013 Act

*However in some areas it may not be compatible with the cost effective provision of education to continue to maintain access to schools of the same nature.*

*In all cases, existing pupils at a school where provision is being reduced or removed **must** be able to continue receiving an education that provides at least equivalent standards and opportunities for progression in their current language medium. Specific transition arrangements may be necessary in order to achieve this.*

*Where proposals affect schools where Welsh is a medium of instruction (for subjects other than Welsh) for some or all of the time, local authorities **should** carry out a Welsh Language Impact Assessment.*

- the nature of journeys to alternative provision and resulting journey times for pupils, including SEN pupils; in particular whether primary school pupils will have one-way journeys in excess of 45 minutes or secondary school pupils one way journeys of over an hour;

*Arrangements for accessing the alternative provision **should** encourage sustainable transport; and they **should** address the possible effect of any transport difficulties on pupils' engagement with and attendance at school. Likely walking or cycling routes for safety and accessibility **should** be assessed prior to bringing forward proposals.<sup>8</sup>*

Where a new school, increase in capacity or age range expansion is proposed;

- that there is evidence of current or future need/demand in the area for additional places, with reference to the school or proposed school's language category, designated religious character, and the gender intake (i.e. co-educational/single sex);

*The demand for additional provision of any type in an area **should** be assessed and evidenced (In the case of Welsh medium provision this would include an assessment of the demand for Welsh Medium education conducted in accordance with any regulations made under section 86 of the 2013 Act).*

- whether proposals will improve access for disabled pupils in accordance with requirements under the Equality Act 2010.

---

<sup>8</sup> Paragraphs 1.46 – 1.48 of the Welsh Government Learner Travel Operational Guidance - April 2009.

## 1.5 Resourcing of education and other financial implications

It is important that funding for education is cost effective. Relevant bodies **should** take into account the following factors in relation to the resourcing of education:

- Whether proposals will ensure a fairer and more equitable distribution of funding between mainstream schools within the local authority's area.

*Whilst some variation in the per capita funding provided to schools is to be expected, inefficient patterns of school organisation can result in uneven and unfair funding patterns where some schools receive a disproportionate share of funding at the expense of pupils attending other schools in the area. Proposals **should not** exacerbate such funding differences. Rather, wherever possible, they **should** contribute towards establishing a more equitable pattern of school funding.*

- what effect proposals will have on surplus provision in the area;

*Some spare places are necessary to enable schools to cope with fluctuations in numbers of pupils, but excessive numbers of unused places that could be removed mean that resources are tied up unproductively.*

*Where there are more than 10% surplus places in an area, local authorities **should** review their provision and **should** make proposals for school reorganisation if this will improve the effectiveness and efficiency of provision. This is especially important where individual schools, have "significant" levels of surplus places. A significant level of surplus provision is defined as 25% or more of a school's capacity (as defined in Circular 21/2011) and at least 30 unfilled places.*

*It **should not** normally be necessary to provide additional places at schools when there are others of the same type with surplus places within reasonable distance. However, proposals to increase the number of places in response to demand for a particular type of provision, e.g. Welsh medium, may still be appropriate; particularly if effective provision of school places is planned for the local authority area.*

- whether proposals form part of the local authority's 21<sup>st</sup> Century Schools Investment Programme and contributes to the delivery of sustainable schools for the 21<sup>st</sup> Century and to the better strategic management of the school estate through the removal of maintenance backlogs and school buildings which are in efficient or in poor condition.

Relevant bodies **should** also take into account the following factors in relation to finance:

- the recurrent costs of proposals over a period of at least 3 years and whether the necessary recurrent funding is available;

- additional transport costs incurred as a result of proposals;

*Proposers **should** take into account the requirement on local authorities to provide free transport provision under the Learner Travel (Wales) Measure and **should** seek the advice of Regional Transport Consortia in relation to the impact the proposal might have on associated transport costs and their affordability.*

- the capital costs of proposals and whether the necessary capital funding is available;
- the scale of any projected net savings (taking into account school revenue, transport and capital costs);

*In relation to proposals where substantial upfront capital investment is required (for example to support a substantial remodelling, refurbishment or a new build project), the costs and savings of the proposals **should** be calculated over the lifespan of the relevant building, and compared against the costs and savings associated with the maintenance of the status quo. Where a local authority's business case submission for funding under the 21<sup>st</sup> Century Schools Programme has been approved by the Welsh Government in line with the HM Treasury 5 case business model, this would provide sufficient evidence of the proposal's cost effectiveness in terms of capital expenditure;*

- whether, without the proposals, the schools affected would face budget deficits;
- whether any savings in recurrent costs will be retained in the local authority's local schools' budget; and
- whether the proceeds of sales (capital receipts) of redundant sites are to be made available to meet the costs of the proposal or contribute to the costs of future proposals which will promote effective management of school places.

*In general, local authorities **should** look to recycle assets from any surplus school buildings and sites in their ownership into the overall improvement of their schools estate rather than allocate those proceeds to projects outside the education portfolio, although these decisions ultimately rest with local authorities.*

## 1.6 Other general factors

Relevant bodies **should** take into account the following general factors:

- what impact proposals will have on educational attainment among children from economically deprived backgrounds;

- any equality issues, including those identified through equality impact assessments; and
- whether the school or schools involved are subject to any trust or charitable interests which might be affected by the proposals, for example in relation to the use or disposal of land.

*Proposals which affect charities **must** be consistent with charity law or the stated purpose of the charitable trust.<sup>9</sup> Advice **should** be sought from the Charities Commission or the Welsh Ministers (as the Principal Regulator of governing bodies which are charities) where there is any uncertainty.*

## 1.7 Specific factors in the consideration of school closures

There is no presumption in favour or against the closure of any type of school. The prime purpose of schools is the provision of education and any case for closure **should** be robust and in the best interests of educational provision in the area. Nevertheless, in some areas, a school may also be the main focal point for community activity, and its closure could have implications beyond the issue of the provision of education. This may be a particular feature in rural areas if school buildings are used as a place to provide services to the local community.

The case prepared by those bringing forward proposals **should** show that the impact of closure on the community has been assessed through the production of a **Community Impact Assessment**, and how any community facilities currently provided by the school could be maintained.

When considering whether a closure is appropriate, special attention **should** be given to the following:

- whether the establishment of multi-site schools might be considered as a means of retaining buildings, or the reasons for not pursuing this option;
- whether alternatives to closure, such as clustering, collaboration or federation with other schools, might be considered (taking account of the scope for use of ICT links between school sites) or the reasons for not pursuing these as an alternative;
- whether the possibilities of making fuller use of the existing buildings as a community or an educational resource could be explored;

(Local authorities **should** consider whether it would be feasible and economical to co-locate local services within the school to offset the costs of maintaining the school);

---

<sup>9</sup> All foundation and voluntary school governing bodies are charities under section 23 of the Schools Standards and Framework Act 1998 and community school sites may also be subject to charitable interests.

- the overall effect of a closure on the local community (including the loss of school based facilities which are used by the local community), particularly in rural areas or those receiving funding as part of regeneration activity; and
- how parents' and pupils' engagement with the alternative school and any facilities it may offer could be supported (e.g. how pupils; particularly any less advantaged pupils) will be helped to participate in after school activities).

Although under the 2013 Act the requirement to consult does not apply to proposals to discontinue small schools with fewer than 10 pupils at the preceding January census point<sup>10</sup> local authorities and governing bodies bringing forward such proposals **must** still take into account the factors set out in this Code.

## **1.8 Specific factors to be taken into account for proposals to add or remove nursery classes**

Relevant bodies **should** take into account the following specific factors:

- the standard of nursery education and the sufficiency of accommodation and facilities offered, both in the classroom and outdoors, and the viability of any school that wishes to add nursery places;
- whether there is a need for additional nursery places in the area;
- the levels of demand for certain types of nursery education e.g. Welsh medium or provision with a religious character;
- the effect of the proposals on other institutions, including private and third sector providers; and
- the extent to which proposals will integrate early years education with childcare services or are consistent with an integrated approach.

## **1.9 Specific factors to be taken into account for proposals to reorganise secondary schools or to add or remove sixth forms**

Relevant bodies **should** take into account the following specific factors:

- whether proposals will lead to an improvement in the educational or training achievements of persons who are above compulsory school age but below the age of 19;
- whether proposals will contribute to an appropriate range of relevant courses and qualifications and high quality, employer informed, vocational learning routes targeted at pupils of all abilities, whilst maintaining GCSE, AS/A level and other established courses, as required under the Learning and Skills (Wales) Measure 2009 for 14-19 year old learners;

---

<sup>10</sup> Section 56 of the 2013 Act defines a 'small school', for the purposes of deciding whether consultation is required, as a school with fewer than 10 registered pupils on the third Tuesday in January immediately preceding the date on which the proposals are made.

- whether proposals are likely to lead to increased participation in learning by pupils beyond compulsory school age, taking into account transport issues and costs to the learner and others, the affordability of such costs, and the likelihood of learners being willing to travel;
- the extent to which proposals contribute to the 14-19 agenda taking account of the views of local 14-19 networks and learning partnerships;
- the effect of proposals on 11-16 provision in schools;
- how proposals would affect the viability of institutions already providing good-quality post-16 provision, including school sixth forms, Further Education Institutions and private training organisations;
- how proposals might affect the sustainability or enhancement of Welsh medium provision in the local 14-19 network and wider area and promote access to availability of Welsh medium courses in post-16 education;
- the extent to which proposals will provide additional learner benefits compared with the status quo and other tenable options for post-16 organisation; and
- how proposals might affect the discretionary transport provision a local authority may provide to learners<sup>11</sup> above compulsory school age.

### **1.10 Specific factors to be taken into account for proposals to increase provision in voluntary schools or establish a new voluntary school**

Relevant bodies **should** take into account whether:

- the local authority has confirmed that it will meet its liability;
- the governing body of a voluntary aided school will be able to meet its financial responsibilities for repairs and capital work; and
- the proposed land tenure arrangements give the school sufficient security of occupation of the site.

*Where land tenure arrangements are not settled those determining proposals might indicate that they are minded to approve the proposals subject to satisfactory resolution of those issues. Such a decision could be appropriate where the promoters are unwilling to incur legal expenses to resolve the tenure issue until they know that there is a strong likelihood that the proposals will be approved.*

---

<sup>11</sup> Section 6 of the Learner Travel (Wales) Measure 2008 gives a local authority the power to provide discretionary transport where they think fit to facilitate the travel of learners. Paragraphs 2.1 – 2.8 of the Welsh Government Learner Travel Operational Guidance – April 2009 provides further guidance on this provision.

### **1.11 Specific factors in the consideration of proposals for the change of language medium**

Relevant bodies **should** take into account the following specific factor:

- the extent to which existing provision by the local authority of education in the medium of English and/or Welsh exceeds or falls short of demand or projected demand from parents for that type of provision, and the contribution the proposal would make to remedying that situation.

### **1.12 Specific factors in the consideration of proposals for the change of school category**

Relevant bodies **should** take into account the following specific factors:

- all categories of school - community, foundation, voluntary controlled or voluntary aided - are of equal status;
- all permissible proposals to change the category of a school will be considered on their individual merits<sup>12</sup> ; and
- whether, any benefits can be identified.

*Changing category has the potential to cause disruption to the running of the school and/or place added burdens on the governing body and/or add complexity to school reorganisation or admissions. Therefore, there **should** be a presumption against changes where benefits cannot be identified.*

- Whether any trust deed relating to the school allows for the change of category proposed. If there is any doubt, or if a variation in the trust deed is clearly necessary, proposers **should** make early contact with the Charity Commission.

### **1.13 Additional factors to be taken into account in preparing, publishing, approving or determining proposals for the reorganisation of SEN provision**

#### **Policies and principles**

The principles and plans set out elsewhere in this Code **should** be taken into account in the consideration of proposals for the reorganisation of maintained special schools and specialist resource bases in mainstream schools.

Relevant bodies **should** consider how proposals fit with the local authority's plans for promoting inclusion (i.e. providing for a higher proportion of pupils with SEN to attend

---

<sup>12</sup> Schools are not permitted to change their category to foundation and schools with a religious character may not become community schools.

mainstream settings) wherever that is appropriate in meeting a child or young person's individual needs, and with its overall strategy for ensuring adequate provision for the full range of SEN.

Relevant bodies **should** have regard to the factors set out below in relation to proposals affecting special schools and specialist resource bases in mainstream schools.

### **Standards of provision**

In addition to the usual considerations in relation to standards of provision, relevant bodies **should** consider:

- whether proposals will improve standards of accommodation for pupils with SEN, including building accessibility;
- how proposals will address any health, safety and welfare issues;
- how proposals, where appropriate, will support increased inclusion; and
- the impact of proposals on other SEN provision within the immediate and wider local authority area including out of county where appropriate.

### **Need for places and the impact on accessibility of schools**

In addition to the considerations listed in 1.4, relevant bodies **should** consider:

- whether there is a need for a particular type of SEN provision within the area;
- whether there is surplus SEN provision within the area;
- whether SEN provision would be more effective or efficient if regional provision were made; and
- the impact of proposals on the transportation of learners with SEN.

### **Other factors**

Relevant bodies **should** consider:

- how changes to SEN provision in schools are likely to impact on all other services provided in an area for pupils with disabilities and/or SEN.

## **1.14 Factors to be taken into account in approving/determining school organisation proposals**

When approving or determining proposals, relevant bodies:

- **must** consider whether there are any other related proposals;

- **must** ensure that the statutory consultation has been conducted in accordance with this Code (the requirement to consult does not apply to proposals to discontinue a school which is a small school);
- **must** ensure that the proposal has been published in accordance with this Code and the notice contains all the required information;
- **must** consider the consultation document and consultation report;
- **must** consider the objections and the objection report and any responses to the notice supporting the proposals;
- **should** consider, in the case of a proposal to change the category of a school, whether, there are any benefits. If no benefits can be identified, such proposals **should not** be approved; and
- **must not** approve change of category proposals where a variation in the trust deed is necessary but has not yet taken place.

## 2. Changes which require proposals

Statutory procedures are usually necessary to make significant changes to schools. The procedures are designed to enable changes to be made where they are considered necessary, but in a way which protects the interests of learners and allows interested parties the opportunity to have their say in the process.

### 2.1 Elements of school reorganisation that require the publication of proposals

Proposals **must** be published for the following elements of school reorganisation:

1. the opening of a maintained school (including a special school);
2. the closing of a maintained school (including a special school); and
3. a change in a school's category so that it becomes a school of another category<sup>13</sup>.

#### Proposals to change the category of a school

Category of school	Can become	Proposer
Community school*	VA or VC	Governing Body (GB)
Voluntary Aided (VA) school*	Community or VC	GB
Voluntary Controlled (VC) school*	Community or VA	GB
Foundation school*	Community, VA or VC	GB

\*Note that it is not possible for VA, VC or foundation schools with a designated religious character to become a community school through a change of category proposal. Similarly community schools cannot become VA or VC schools with a designated religious character. Community schools are not permitted to have a religious character and no alteration may be made to a maintained school that changes its designated religious character or causes it to acquire or lose a designated religious character.

### 2.2 Regulated alterations

In addition, proposals **must** be published for the following significant alterations (known as “regulated alterations”) to schools:

- the transfer of any school to a new site or sites unless a main entrance of the school on its new site or sites would be within 1.609344 kilometres

<sup>13</sup> Except to foundation – the 2012 Act prohibits schools from changing their category to foundation.

(one mile) of any of a main entrance of the school on its current site or sites;

- changing a school (including a special school) from single-sex to mixed or vice-versa. (A school is treated as admitting pupils of one sex only if the admission of pupils of the other sex is limited to pupils over compulsory school age, and does not exceed 25% of the age group in question);
- a change in the age range of a school (including a special school) by a year or more (not including the introduction or discontinuation of part-time or full-time Further Education or changes to provision for pupils over compulsory school age who are repeating a course of education completed before they reached the end of compulsory school age);
- the introduction of, or ending of, sixth form provision at a school;
- the alteration of the medium of instruction of a class of pupils in an age group or groups (including nursery pupils) at a primary school (or primary education in relation to middle or special schools) which falls within the description in column 1 of the table below so that it falls within the description in the corresponding entry in column 2.

<b>Column 1</b>	<b>Column 2</b>
At least 20% but no more than 80% of the teaching is conducted through the medium of English.	An increase or decrease of more than 20% in the teaching which is conducted through the medium of Welsh.
At least 20% but no more than 80% of the teaching is conducted through the medium of Welsh.	An increase or decrease of more than 20% in the teaching which is conducted through the medium of English.
More than 80% of the teaching is conducted through the medium of English, and some teaching is conducted through the medium of Welsh.	An increase of more than 10% in the teaching which is conducted through the medium of Welsh.
More than 80% of the teaching is conducted through the medium of Welsh, and some teaching is conducted through the medium of English.	An increase of more than 10% in the teaching which is conducted through the medium of English.
No teaching is conducted through the medium of Welsh.	More than 10% of the teaching is conducted through the medium of Welsh.
No teaching is conducted through the medium of English.	More than 10% of the teaching is conducted through the medium of English.
Some teaching is conducted through the medium of English.	No teaching is conducted through the medium of English.
Some teaching is conducted through the medium of Welsh.	No teaching is conducted through the medium of Welsh.

- the alteration of the teaching of pupils in a year group at a secondary school (or secondary education in relation to middle or special schools) which falls within the description in column 1 of the table below so that it falls within the description in the corresponding entry in column 2.

<b>Column 1</b>	<b>Column 2</b>
Five or more relevant subjects are taught (wholly or mainly) through the medium of Welsh to any pupils.	A decrease by four or more in the number of the relevant subjects taught (wholly or mainly) through the medium of Welsh to any pupils.
Five or more relevant subjects are taught (wholly or mainly) through the medium of English to any pupils.	A decrease by four or more in the number of the relevant subjects taught (wholly or mainly) through the medium of English to any pupils.
Every relevant subject is taught (wholly or mainly) through the medium of Welsh to all pupils.	Three or more relevant subjects are taught (wholly or mainly) through the medium of English to any pupils.
Every relevant subject is taught (wholly or mainly) through the medium of English to all pupils.	Three or more relevant subjects are taught (wholly or mainly) through the medium of Welsh to any pupils.
One or more relevant subject is taught (wholly or mainly) through the medium of Welsh to any pupils.	No relevant subject is taught (wholly or mainly) through the medium of Welsh to any pupils.
One or more relevant subject is taught (wholly or mainly) through the medium of English to any pupils.	No relevant subject is taught (wholly or mainly) through the medium of English to any pupils.

(Relevant subjects are defined as any subjects apart from English and Welsh which are taught at a school).

- an enlargement of the premises of a school (excluding nursery and special schools), which would increase the capacity of the school by at least 25% or 200 pupils as compared with the school's capacity on the appropriate date. In determining an increase in capacity all enlargements that have taken place since the appropriate date are to be taken into account together with the proposed enlargement. The "appropriate date" is the latest date of:
  - the date falling five years before the date on which it is planned to implement the proposals to make the enlargement;
  - the date when the school first admitted pupils;
  - the date (or the latest date) when any previous statutory proposals that involved enlarging the premises of the school were implemented.

For the purposes of an enlargement of school premises "capacity" is to be determined in accordance with the formulae set out from time to time by the Welsh Ministers (currently Circular No: 21/2011);

- the making permanent of a temporary enlargement of the school where that temporary enlargement would have been a regulated alteration when undertaken but for the fact that it was temporary;
- the reduction in the physical capacity of a mainstream school, except where the proposed capacity will be greater than the highest number of pupils on roll at the school at any time in the previous two school years prior to the publication of the proposal. In this context, "capacity" is to be determined in accordance with the formulae set out from time to time by the Welsh Ministers (currently Welsh Government Circular No: 21/2011 Measuring the Capacity of Schools in Wales)<sup>14</sup>;
- the addition or removal of SEN provision or any change in the type of such provision. This is where the provision is in a mainstream school but the pupils who are admitted are in addition to admission number of the school. The provision **must** also be recognised by the local authority as reserved for pupils with SEN;
- the introduction or ending of banding arrangements for the admission of pupils into a mainstream school (under section 101 of the School Standards and Framework Act 1998 (the 1998 Act));
- the introduction or ending of boarding, or an increase or decrease in boarding provision in mainstream schools by 50 pupils or 50% of capacity, whichever is the greater;
- for special schools (except where the school is in a hospital) an increase in the number of pupils for whom the school makes provision which, when taken together with all such previous increases in the number of pupils, would increase the number of pupils by 10% or the relevant number of such pupils (whichever is the lesser). The relevant number is 5 where the school only makes boarding provision, and is 20 in other cases. Any previous increase in the number of pupils is taken from the appropriate date. The appropriate date is whichever is the latest date of the following:
  - 19 January 2013;
  - the date when the school first admitted pupils; and
  - the date (or the latest date) when any previous statutory proposals that involved enlarging the premises of the school were implemented.
- for a special school, the introduction or ending of boarding provision, or the alteration of boarding provision such that the number of pupils for whom provision is made is increased or decreased by 5 pupils;

---

<sup>14</sup> The effect of this is that where schools have spare capacity that capacity can be removed without the need for a statutory proposal. However, where schools are full or near full, a proposal must be published to reduce the school's capacity.

- a change in the type of special educational needs for which a special school makes provision;
- the enlargement, or making permanent of a temporary enlargement, of the teaching space at a nursery school, by 50% or more;
- the addition or removal of provision (in a nursery school) which is recognised by the local authority as reserved for pupils with special educational needs;
- for a nursery school at which a group of pupils is taught wholly or mainly through the medium of Welsh, an alteration so that all the pupils are taught wholly or mainly through the medium of English;
- for a nursery school at which a group of pupils is taught wholly or mainly through the medium of English, an alteration so that all the pupils are taught wholly or mainly through the medium of Welsh.

### 2.3 Who can publish a proposal?

The following table sets out the powers to publish proposals under sections 41-45 of the 2013 Act:

<b>Local Authority</b>	<b>Governors of Foundation or Voluntary Schools</b>	<b>Promoters of New Voluntary Schools (including local authorities)</b>	<b>Governors of Community schools</b>
Proposals to discontinue a voluntary or foundation school.	Proposals to discontinue their school.		
Proposals to increase/decrease the capacity of a foundation or voluntary school without a religious character.	Proposals to make a significant alteration to their school.		
Proposals to establish, discontinue or make a significant alteration to community schools.		Proposals to establish a new voluntary school.	
Proposals to change the category of community schools.	Proposals to change the category of their school.		Proposals to change the category of their school.

Local authorities may also make proposals to add or remove school sixth forms at voluntary and foundation secondary schools, but only if they have first gained the consent of the Welsh Ministers to do so. Consent **must** be sought by means of a written application that clearly sets out the local authority's rationale for the proposal.

In addition, the 2013 Act provides the Welsh Ministers with the power to publish proposals to:

- a) remedy excessive or insufficient provision of school places (where they have already issued a direction to a local authority or governing body to that effect) (section 59);
- b) secure regional provision for special educational needs (where they have already issued a direction to a local authority/local authorities/governing bodies to that effect) (section 68); and
- c) add or remove school sixth forms (section 71) .

## 3. Consultation

### 3.1 Principles

Section 48 of the 2013 Act requires that before school organisation proposals are published under sections 41-45, they **must** first be subject to consultation. In addition, proposals published under section 68 by the Welsh Ministers to secure regional provision for special educational needs or published under section 71 to reorganise sixth forms **must** also be subject to prior consultation. The requirement to consult does not apply to proposals to discontinue a small school<sup>15</sup> made under section 43.

Case law has established that the consultation process **should**:

- be undertaken when proposals are still at a formative stage;
- include sufficient reasons and information for particular proposals to enable intelligent consideration and response;
- provide adequate time for consideration and response; and;
- ensure that the product of consultation is conscientiously taken into account when the ultimate decision is taken.

The process and guidance which follow have been developed with due regard to the principles listed above. Those considering bringing forward proposals will need to be fully aware of this process and guidance. However, proposers **must** be mindful of the four underlying principles and take any necessary additional steps to ensure that those principles are fully upheld.

From time to time proposers will have conducted 'informal' consultation with particular stakeholders at an earlier stage in the development of proposals. Such consultation **must not** be seen as a substitute for any part of the formal consultation processes set out below.

### 3.2 Consultation document

Those bringing forward statutory proposals **must** publish a consultation document in hard copy and electronically on their website or that of the relevant local authority. Hard copies **must** be available on request. Consideration **should** be given to publishing in other formats where accessibility might otherwise be an issue.

The following **must** receive either a hard copy of the consultation document or be emailed a link to the relevant website (but see also the section on Consultation with Children and Young People):

---

<sup>15</sup> The 2013 Act defines a small school as a school with fewer than 10 registered pupils on the third Tuesday in the January immediately preceding the date on which the proposals are made. This date is chosen as it is the date that all schools in Wales are required to submit the Pupil Level Annual Census to the Welsh Government; this includes the number of pupils on roll.

- the maintaining or proposed maintaining authority for any school likely to be affected by the proposals;
- any other local authority likely to be affected - including in the case of dedicated SEN provision any authority placing or likely to place statemented pupils in it;
- the Church in Wales and Roman Catholic Diocesan Authority for the area in which any school likely to be affected is located;
- any other appropriate religious body for any school likely to be affected by the proposals;
- the governing body any school which is the subject of the proposals and of other schools likely to be affected by the proposals, including those that might receive any displaced pupils;
- parents (and where possible prospective parents) carers and guardians, and staff members of those schools;
- the Welsh Ministers;
- Assembly Members (AMs) and Members of Parliament (MPs) representing the area served by/intended to be served by any school which is the subject of the proposals;
- Estyn;
- teaching and staff trade unions representing teachers and other staff at any school which is the subject of the proposals;
- the relevant Regional Education Consortium;
- the relevant Regional Transport Consortium;
- the Police and Crime Commissioner for the area served by/intended to be served by any school which is the subject of the proposals;
- any community or town council for the area served by/ intended to be served by any school which is the subject of the proposals;
- the local Communities First Partnership (in relevant areas);
- in the case of proposals affecting nursery provision, any independent providers who may be affected;
- in the case of proposals affecting nursery provision, the Children and Young People's Partnership and/or the Early Years Development and Childcare Partnerships where present;
- in the case of proposals affecting SEN provision, any relevant health or third sector bodies with an interest;
- in the case of proposals affecting secondary provision, any further education institutions serving the area of the school; and
- in the case of proposals affecting secondary provision, parents of pupils attending primary schools from which pupils normally transfer to that secondary school.

The consultation document **must** be issued during the term time of the schools affected and consultees **must** be given at least 42 days to respond to the document, with at least 20 of these being school days.

In the case of all proposals, the consultation document **must** contain the following information:

### **Description and Benefits**

- a detailed description of the status quo setting out its strengths and weaknesses and the reasons why change is considered necessary;
- a detailed description of the proposal or proposals (a proposer may consult on more than one potential proposal), the projected timetable for statutory procedures and for implementation of the proposals and any proposed interim arrangements which might be necessary for their implementation. In describing the proposals, proposers **should** normally refer to them using the terms set out in this Code (e.g. school closure) but where two or more existing schools become one school operating on more than one site (e.g. where former infant and junior schools become a primary school) the terms 'merger' or 'amalgamation' might be used;
- the expected benefits of the proposals and disadvantages when compared with the status quo;
- any risks associated with the proposals and any measures required to manage these;
- a description of any alternatives considered and the reasons why these have been discounted;
- information on any changes to learner travel arrangements were the proposals to be implemented and the impact on accessibility of provision.

### **Details of affected schools**

- the names, locations and categories (i.e. community, voluntary controlled, voluntary aided, foundation) of all existing schools likely to be affected by the proposals (for example, in the case of a proposal to close a school information **should** be provided about all the surrounding schools to which it might reasonably be considered that pupils may wish to transfer);
- the number of pupils on roll currently<sup>16</sup> and the figures recorded for the previous four annual school censuses at all existing schools likely to be affected by the proposals;

---

<sup>16</sup> For primary schools, the number of nursery pupils should be shown separately and excluded from forecasts.

- five year forecasts of pupil rolls at all existing schools likely to be affected by the proposals both currently (i.e. based on the existing configuration of schools) and if the proposals are implemented;
- the pupil places capacity<sup>17</sup> of all existing schools likely to be affected by the proposals;
- the number of nursery places at any existing school likely to be affected by the proposals;
- information about the quality of accommodation at all existing schools likely to be affected by the proposals including reference to the condition category of the school as identified by the 21<sup>st</sup> Century Schools Survey;
- the language medium of all existing schools likely to be affected by the proposals (using the Welsh Government Circular 23/2007 “Defining schools according to Welsh medium provision”).

### **Quality and standards in education**

- the likely impact of the proposals on the quality of the following (reference to relevant Estyn Key Questions are included in brackets):
  - a. outcomes (standards and wellbeing);
  - b. provision (learning experiences, teaching, care support and guidance, and learning environment);
  - c. leadership and management (leadership, improving quality, partnership working and resource management);

at the school or schools which are the subject of the proposals and at any other school or educational institution which is likely to be affected.

- information from the most recent Estyn reports for each school likely to be affected;
- the likely impact of the proposals on the ability of school or schools which are the subject of the proposals or any other school which is likely to be affected, to deliver the full curriculum at the foundation phase and each key stage of education.

### **Finance**

- the financial costs of the proposal and any potential savings (including where appropriate the current costs per pupil and the projected costs upon completion) – capital and recurrent (including school transport and staff costs);
- the sources from which capital funding will be provided;
- how any capital receipts or recurrent costs savings will be deployed;

---

<sup>17</sup> The Welsh Government Circular 21/2011 “Measuring the Capacity of Schools in Wales”.

## Land and buildings

- details of any potential transfer or disposal of land or buildings that may need to occur as a result of the proposals.

## Consultation details

- details of how people can make their views known including the address to which comments in writing can be made and the deadline for those comments;
- details of how people can ask further questions about the proposals;
- a statement to the effect that responses to consultation will not be counted as objections to the proposal and that objections can only be registered following publication of the notice;
- and explanation of the publication process, the making of objections and determination of published proposals;
- a pro-forma for comments, including an opportunity for consultees to suggest alternatives to the proposals and to register their wish to be notified of publication of the consultation report.

Where proposals involve establishing a new school the following information **must** also be included in the consultation document:

- the new school's:
  - a. proposed admission number and admission arrangements;
  - b. age range;
  - c. pupil places capacity and/or number of nursery places;
  - d. location;
  - e. category (i.e. Community, Voluntary Aided or Voluntary Controlled);
  - f. language category (as defined by Information document No. 023/2007);
  - g. details of the proposed accommodation to include a list of proposed facilities;
  - h. in the case of a special educational needs (SEN) resource base in a mainstream school or a special school, information on the special needs of the pupils proposed to be admitted;

- i. home to school transport arrangements (including any transitional arrangements) and the local authority's transport policy.<sup>18</sup>

Where proposals involve the closure of a school the following information **must** be included in the consultation document:

- details of any alternatives to closure that have been considered and the reasons why these have not been taken forward;
- the impact of proposals on the local community, particularly in rural areas and in areas designated for communities first programmes or successor programmes;
- the likely impact on staff of schools named in proposals;
- in the case of alternative provision:
  - a. the name and location of the proposed alternative provision;
  - b. a comparison of the quality and standard of education provided at the school from which pupils would be transferred and the proposed alternative school or schools and an outline of any steps necessary in order to ensure that any shortcomings in the latter are addressed;
  - c. admission arrangements at the proposed alternative school;
  - d. a comparison of the quality of accommodation at the school from which pupils would be transferred and at the proposed alternative and an outline of any steps necessary in order to ensure that any shortcomings in the latter are addressed;
  - e. information on any building works necessary to ensure that transferred children can be accommodated at the alternative provision;
  - f. the impact on pupils' journeys to school and on school transport costs; and
  - g. information regarding available walking routes to the alternative provision;
  - h. the language medium at the proposed alternative school.

Where proposals relate to a special school or involve specialist resource bases attached to mainstream schools the following information **must** be included in the consultation document:

- the impact on SEN provision;
- how proposals will contribute more generally to enhancing the quality of education and support for children with SEN.

---

<sup>18</sup> Section 3 of the Learner Travel (Wales) Measure 2008 sets a threshold for entitlement for free home to school transport provision at 2 miles or further for primary education and 3 miles or further for compulsory aged secondary school education.

Where any school involved or affected provides teaching through the medium of Welsh the following information **must** be included in the consultation document:

- the impact of proposals on the Welsh language (see the Welsh language impact assessment at Annex D).

Where the proposal concerns a school with a designated religious character the following information **must** be included in the consultation document:

- the impact on availability and access to places at a school with the same designated religious character.

Where the proposal concerns a change of category the following information **must** be included in the consultation document:

- the effect of the change of category on governance arrangements and the governing body's powers over policies and arrangements in respect of admissions, employment and the curriculum; and
- any proposed changes to policies and arrangements in respect of admissions, employment and the curriculum.

In some circumstances, proposers may consider it appropriate to consult on a range of options rather than one specific proposal, but in such cases, all of the information set out above **must** be provided in relation to each of the identified options.

A recommended template consultation document is at Annex C. Proposers are not required to adhere to the suggested format, but **must** ensure that any alternative format they choose to adopt provides the required information.

### **3.3 Consultation with children and young people**

Proposers **must** also make suitable arrangements to consult with pupils of any affected school (or part of a school in the case of provision reserved for children with SEN) and, where possible, with children and young people who are likely to attend those schools. As a minimum, this **must** include consultation with the school councils of the affected schools, but **should** also include consultation with individual learners where this is appropriate and practicable. Governing bodies **must** help facilitate this aspect of the consultation.

The information given to children and young people **must** be presented in such a way that it is relevant to their age and level of likely understanding and allows them to reach an informed opinion. The agreed children and young people's participation standards for Wales are available on the Welsh Government's website; proposers **should** refer to these and act in accordance with them.

If consulting with individual learners, proposers **should** produce and distribute a version or versions of the consultation document appropriate to the age/ages of the children and young people affected. The consultation document **should** also clearly

explain to children and young people the difference between the consultation and objection periods and how and when they can object to proposals. Where necessary, proposers **should** provide assistance to children and young people who wish to submit a consultation response.

### 3.4 Procedures

There is no requirement for proposers to hold consultation meetings although there will be circumstances where proposers will consider that meeting with certain groups of consultees will assist greatly in the dissemination of information and provide a suitable platform for the consultees to make their views known. Where meetings are arranged, proposers **should** ensure that they are arranged in such a way that consultees in any of the categories set out a paragraph 3.2 are treated fairly and equitably. A full written record **should** be made of the issues raised and the answers provided at any meetings which are held.

Proposers may use other ways to engage consultees as they think appropriate. For example, open days or 'drop-in' sessions might provide interested parties with a convenient way to access information, seek clarification and provide comments.

In the case of proposals to reorganise schools for which land and/or buildings are held on trust, or which have a designated religious character, the proposer **must** conduct consultation with the trustees and/or appropriate religious body before the consultation document is published. The proposer **must** allow 28 days for the receipt of comments and **must** have due regard to those comments before any decision is made to proceed to general consultation.

Where, in the course of consultation, a new option emerges which the proposers decide to pursue, they **must** consult afresh on this option before proceeding to publication.

### 3.5 Consultation reports

Within 13 weeks of the end of the period allowed for responses (and in any event prior to publication of the proposals), the proposer **must** publish a consultation report:

- summarising each of the issues raised by consultees;
- responding to these by means of clarification, amendment to the proposal or rejection of the concerns, with supporting reasons; and
- setting out Estyn's view (as provided in its consultation response) of the overall merits of the proposal.

The consultation report might also make recommendations – for example, to the local authority's executive or the governing body – about how to proceed i.e. to publish the proposals as consulted on with any appropriate modifications, to abandon the proposals and retain the status quo or to significantly recast the proposals and re-consult.

Proposers **must** ensure that any views expressed by children and young people affected by the proposals are highlighted in the consultation report and that it is accessible to them.

The consultation report **must** be published electronically, either on the proposer's website or if one is not available, on the relevant local authority's website. In addition, hard copies **must** be available on request. This **must** take place before any proposal is published.

The following **must** be advised of the availability of the consultation report:

- Pupils, parents (and where possible prospective parents) carers and guardians, and staff members of schools which are subject to the proposals;
- in the case of proposals affecting secondary provision, parents of pupils attending primary schools from which pupils normally transfer to that secondary school; and
- consultees who had requested notification.

The following **must** receive either a hard copy of the consultation report or be emailed a link to the relevant website:

- the maintaining or proposed maintaining authority for any school likely to be affected by the proposals;
- any other local authority likely to be affected – including in the case of dedicated SEN provision any authority placing or likely to place statement pupils in it;
- the Church in Wales and Roman Catholic Diocesan Authority for the area in which any school likely to be affected is located;
- any other appropriate religious body for any school likely to be affected by the proposals;
- the governing body of any school which is the subject of the proposals and of other schools likely to be affected by the proposals, including those that might receive any displaced pupils;
- the Welsh Ministers;
- Assembly Members (AMs) and Members of Parliament (MPs) representing the area served by/intended to be served by any school which is the subject of the proposals;
- Estyn;
- teaching and staff trade unions representing teachers and other staff at any school which is the subject of the proposals;
- the relevant Regional Education Consortium;

- the relevant Regional Transport Consortium;
- the Police and Crime Commissioner for the area served by/intended to be served by any school which is the subject of the proposals;
- any community or town council for the area served by/ intended to be served by any school which is the subject of the proposals;
- the local Communities First Partnership (in relevant areas);
- in the case of proposals affecting nursery provision, any independent providers who may be affected;
- in the case of proposals affecting nursery provision, the Children and Young People's Partnership and/or the Early Years Development and Childcare Partnerships where present;
- in the case of proposals affecting SEN provision, any relevant health or third sector bodies with an interest;
- in the case of proposals affecting secondary provision, any further education institutions serving the area of the school.

Unless proposers have applied for and been granted a time extension by the Welsh Ministers, proposals **must** be published within 26 weeks of the end of the period allowed for consultation responses, otherwise the proposals will lapse and a new consultation document **must** be issued to revive them.

Applications to the Welsh Ministers for a time extension **must** be made in writing before the 26 week period has elapsed and **must** set out the reasons why an extension is considered necessary. In deciding whether to approve an extension, the Welsh Ministers will take into account the reasons given for the application, the nature of the proposals and any other relevant factors. The Welsh Ministers would be unlikely to approve any application which would result in more than a year elapsing between the end of the period allowed for consultation responses and the publication of a statutory notice.

Statutory proposals are sometimes brought forward as a result of strategic reviews into school provision carried out by local authorities. Whilst it is good practice to consult on such reviews, such consultation **must not** take the place of the formal consultation necessary on individual proposals as required by the Code.

Where the prospective proposers are not a local authority they **should** discuss their intentions with the local authority which would maintain any proposed new or altered provision at an early stage, i.e. before formal consultation commences.

Proposers **should not** refer to the period allowed for objections as the consultation period. The term consultation only applies to the period before final decisions are made to proceed to publish a proposal.

Consultees can submit views either in favour of or against a proposal. Consultees **should** be advised that unfavourable comments made during the consultation period will not be treated as objections, and that if they wish to object, that they need to do so in writing during the statutory objection period. If consultees submit a request during the objection period that a response submitted at consultation stage should be treated as an objection, this **should** normally be accepted. Those responsible for publishing proposals **should** make every effort to ensure that those who have expressed opposition or concern during the consultation period are aware that statutory notices have been published.

## 4. Publication of statutory proposals

### 4.1 Manner of publication

Once the proposer decides to proceed with a proposal they **must** publish the proposal<sup>19</sup> by way of statutory notice.

Proposals **must** be published on a school day and the objection period (see 4.2) **must** include 15 school days (in addition to the day on which it is published).

The proposals **must** be published:

- i. on the proposer's website (if it has one);
- ii. on the website of the existing/proposed maintaining local authority, where the local authority is not the proposer;
- iii. by being posted at or near the main entrance to any existing school which is the subject of the proposal, or, if there is more than one main entrance, all of them;
- iv. where a new school is being established, in a conspicuous place in the area to be served by the school;
- v. by providing any school which is the subject of proposals with copies of the notice to distribute to pupils, parents carers and guardians, and staff members (the schools may distribute the notice by email);
- vi. in the case of proposals affecting secondary provision, parents of pupils attending primary schools from which pupils normally transfer to that secondary school.

Furthermore, on the day that they are published, the following **must** receive either a hard copy of the proposals or be emailed a link to the relevant website:

- the maintaining or proposed maintaining authority for any school likely to be affected by the proposals;
- any other local authority likely to be affected - including in the case of dedicated SEN provision any authority placing or likely to place statemented pupils in it;
- the Church in Wales and Roman Catholic Diocesan Authority for the area in which any school likely to be affected is located;
- any other appropriate religious body for any school likely to be affected by the proposals;
- the governing body of any school which is the subject of the proposals and of other schools likely to be affected by the proposals, including those that might receive any displaced pupils;
- the Welsh Ministers;

---

<sup>19</sup> Section 48 2013 Act.

- Assembly Members (AMs) and Members of Parliament (MPs) representing the area served by/intended to be served by any school which is the subject of the proposals;
- Estyn;
- teaching and staff trade unions representing teachers and other staff at any school which is the subject of the proposals;
- the relevant Regional Education Consortium;
- the relevant Regional Transport Consortium;
- the Police and Crime Commissioner for the area served by/intended to be served by any school which is the subject of the proposals;
- any community or town council for the area served by/ intended to be served by any school which is the subject of the proposals;
- the local Communities First Partnership (in relevant areas);
- in the case of proposals affecting nursery provision, any independent providers who may be affected;
- in the case of proposals affecting nursery provision, the Children and Young People's Partnership and/or the Early Years Development and Childcare Partnerships where present;
- in the case of proposals affecting SEN provision, any relevant health or third sector bodies with an interest;
- in the case of proposals affecting secondary provision, any further education institutions serving the area of the school.

It is no longer a requirement to publish the proposal in a newspaper.

## **4.2 Length of objection period**

The 2013 Act requires that anyone wishing to make objections to a school organisation proposal has the opportunity to do so. To be considered as statutory objections, objections **must** be made in writing or by email, and sent to the proposer within 28 days of the date on which the proposal was published ("the objection period").

## **4.3 Content of published proposals**

The published proposals **must** all contain the following information:

- the name of the persons or body publishing the proposal;
- the planned date of implementation (or dates if implementation is to be staged);

- details of how to obtain a copy of the consultation report;
- the date by which objections should be sent and the address to send them to, including the relevant email address.

#### Additionally

- proposals to establish a new school **must** state:
  - the proposed language category of the school as defined by Information Document No: 023/2007;
  - the name of the proposed maintaining local authority;
  - the location of the site of the school (and where appropriate the postal address);
  - whether the school will be single or mixed sex;
  - the age range of the school;
  - the category of the school - community, voluntary aided, voluntary controlled, community special;
  - whether the governing body or the local authority will be the admissions authority;
  - the proposed arrangements for transport of pupils;
  - the admission number for each relevant age group in the first year of implementation or at each stage of implementation - “admission number” is to be determined in accordance with the calculation set out from time to time by the Welsh Ministers (currently contained in the Welsh Government Circular No: 21/2011);
  - the proposed capacity of the school – “capacity” is to be determined in accordance with the formulae set out from time to time by the Welsh Ministers (currently Welsh Government Circular No: 21/2011);
  - for a special school, information on the type of SEN for which provision will be made;
  - whether the school will have a religious character, and if so the nature of that character and the proposed appropriate religious body;
  - whether the admission arrangements of the school will make any provision for selection by ability permitted by section 101 of the School Standards and Framework act 1998 (pupil banding);
  - in the case of a new voluntary school, whether the proposals are to be implemented by the local authority or the promoters and, if the proposals are to be implemented by both, the extent to which they are to be implemented by each such body.
- proposals to alter a school or change its category **must** state:
  - the name and address of the school subject to the proposal;

- the name of the maintaining local authority;
  - a description of the proposed alteration or change of category;
  - where the alteration involves enlargement, or a reduction in capacity, the current number of pupils, the capacity of the school and the proposed capacity – “capacity” is to be determined in accordance with the formulae set out from time to time by the Welsh Ministers (currently Welsh Government Circular No: 21/2011);
  - the number of pupils to be admitted in each relevant age group in the first year of implementation or at each stage of implementation;
  - in the case of a change in the type of SEN provision, the alternative provision for pupils and the impact on school transport; and
  - any implications the alteration might have on home to school transport provision.
- proposals to discontinue a school **must** state:
    - the name and address of school to be closed;
    - the name of the maintaining local authority;
    - the school’s religious character if it has one, and if so, the appropriate religious body;
    - details of the alternative school/s which pupils can attend, including any interim arrangements and the language category of the alternative school/s as defined by Information Document No: 023/2007;
    - details of any measures being taken to increase the number of places available in alternative schools; and
    - arrangements for transport of pupils to alternative schools.

**Note:** Sometimes a proposal will need to incorporate two separate elements, e.g. a school might transfer to a new site and also be enlarged. In this case two proposals, which can be incorporated into one statutory notice, may be necessary.

Annex B comprises several recommended statutory notice templates which proposers may find helpful in the construction of a statutory notice.

## 5. Determining proposals (other than proposals made by the Welsh Ministers)

### 5.1 Objection reports

Under section 49 of the 2013 Act proposers **must** publish a summary of the statutory objections and the proposer's response to those objections ("the Objection Report"). This **must** take place:

(a) in the case of a local authority that is required to determine its own proposals under section 53 of the Act (see 5.4 below), before the end of 7 days beginning with the day of its determination; and

(b) in all other cases, before the end of 28 days beginning with the end of the objection period.

The Objection Report **must** be published by being posted:

- i. on the proposer's website (if it has one);
- ii. on the website of the existing/proposed maintaining local authority, where this differs from i above.

In addition, hard copies **must** be made available on request.

The following **must** be advised of the availability of the Objection Report:

- Parents (and where possible prospective parents) careers and guardians, and staff members of schools which are the subject of the proposals; and
- in the case of proposals affecting secondary provision, parents of pupils attending primary schools from which pupils normally transfer to that secondary school.

The following **must** receive either a hard copy of the objection report or be emailed a link to the relevant website:

- the maintaining or proposed maintaining authority for any school likely to be affected by the proposals;
- any other local authority likely to be affected - including in the case of dedicated SEN provision any authority placing or likely to place statemented pupils in it;
- the Church in Wales and Roman Catholic Diocesan Authority for the area in which any school likely to be affected is located;
- any other appropriate religious body for any school likely to be affected by the proposals;

- the governing body of any school which is the subject of the proposals and of other schools likely to be affected by the proposals, including those that might receive any displaced pupils;
- the Welsh Ministers;
- Assembly Members (AMs) and Members of Parliament (MPs) representing the area served by/intended to be served by any school which is the subject of the proposals;
- Estyn;
- teaching and staff trade unions representing teachers and other staff at any school which is the subject of the proposal;
- the relevant Regional Education Consortium;
- the relevant Regional Transport Consortium;
- the Police and Crime Commissioner for the area served by/intended to be served by any school which is the subject of the proposals;
- any community or town council for the area served by/ intended to be served by any school which is the subject of the proposals;
- the local Communities First Partnership (in relevant areas);
- in the case of proposals affecting nursery provision, any independent providers who may be affected;
- in the case of proposals affecting nursery provision, the Children and Young People's Partnership and/or the Early Years Development and Childcare Partnerships where present;
- in the case of proposals affecting SEN provision, any relevant health or third sector bodies with an interest in the case of proposals affecting secondary provision, any further education institutions serving the area of the school;
- in the case of proposals affecting secondary provision, any further education institutions serving the area of the school.

## **5.2 Approval by the Welsh Ministers**

Proposals require approval by the Welsh Ministers if:

- (a) the proposals affect sixth form education; or
- (b) the proposals have been made by a proposer other than the relevant local authority and an objection has been made by that authority and has not been withdrawn in writing before the end of 28 days beginning with the end of the objection period.

Proposals affect sixth form education if:

(a) they are proposals to establish or discontinue a school providing education suitable only to the requirements of persons above compulsory school age; or

(b) they are proposals to make a regulated alteration to a school, the effect of which would be that provision of education suitable to the requirements of persons above compulsory school age at the school increases or decreases.

Where a proposal requires determination by the Welsh Ministers, the proposers **must** notify the Welsh Ministers within 35 days of the end of the objection period and forward to them copies of the statutory objections in addition to the objection report set out at paragraph 5.1. The proposer **must** also send to the Welsh Ministers any proposals which it considers are related to the proposals requiring determination. The Welsh Ministers will then decide whether these other proposals require determination by them.

The Welsh Ministers may decide to approve, reject or approve the proposals with modifications.

Modifications would normally only include changes to matters such as the timing of implementation or admission numbers. The Welsh Ministers **must not** make modifications that would in effect substitute a new proposal for the proposal which was published. Before making any modification, the Welsh Ministers **must** first consult with the proposer and the relevant governing body/ies and local authority (where they are not the proposers), and obtain the proposer's agreement to the modification.

Approvals can be made conditional on a specified event occurring by a specified date.

### **5.3 Approval by the local authority**

Proposals published under section 48 require approval under this section if:

- (a) they do not require approval by the Welsh Ministers;
- (b) they have been made by a proposer other than the relevant local authority; and
- (c) an objection to the proposals has been made and has not been withdrawn in writing before the end of 28 days beginning with the end of the objection period.

#### **Procedures**

Where proposals require approval by the local authority, the proposer **must** notify the local authority of a proposal requiring approval and forward to them the documents listed below within 35 days of the end of the objection period:

- a copy of the consultation document;

- a copy of the consultation report;
- a copy of the published notice;
- a copy of the objection report;
- copies of the statutory objections;
- copies of all of the above in relation to any proposals which are related to the proposals requiring approval.

Local authorities **must** decide whether any related proposals sent to them require their approval.

They **must** deal with all proposals which require approval without delay in so far as that is compatible with the proper consideration of the issues. In any event, the local authority **must** issue its decision, within 16 weeks (112 days) beginning with the end of the objection period. However a failure to comply with that time limit does not affect the validity of any decision reached.

Local authorities **must** decide whether to approve, reject or approve with modifications, the proposals.

Modifications can only include changes to matters related to implementation such as changes to admission numbers or to the timing of implementation. The local authority **must not** make modifications that would, in effect, substitute a new proposal for the proposal which was published. Before making any modification, the local authority **must** first consult with the proposer and obtain their consent to the modification. They **must** also obtain the consent of the Welsh Ministers. If consent cannot be obtained, and the local authority believes that the proposals are not acceptable in their published state, they **must** reject the proposals. The local authority **must** also consult with the governing body of any school to which the proposals relate (where the governing body is not the proposer).

Approvals may be made conditional on a specified event occurring by a specified date.

## 5.4 Determination by proposers

Where proposals do not require approval under section 50 and 51 of the 2013 Act, they fall to be determined by the proposer.

Under section 53 of the 2013 Act, determination by the proposer **must** be made within 16 weeks (112 days) of the end of the objection period. Where the proposer fails to determine the proposal within the period of 16 weeks it is taken to have withdrawn the proposal and it is required to republish the proposals if it wishes to proceed.

Where a local authority's proposals have received objections, and require determination under section 53 of the 2013 Act, the local authority **must not** approach the determination of these proposals with a closed mind. Objections **must**

be conscientiously considered alongside the arguments in respect of the proposals and in the light of the factors set out in section 1.3 – 1.14 of this Code. In these cases the objection report **must** be published at the same time as the decision is issued rather than within 28 days beginning with the end of the objection period.

## 5.5 Local authority decision making

Where local authorities are required to approve or determine proposals which have received objections, a proposed amendment<sup>20</sup> to Schedule 2 to the Local Authority (Executive Arrangements) (Functions and Responsibilities) (Wales) Regulations 2007 (as amended) will permit the local authority's executive to exercise this function. Executives and/or Cabinets are already responsible for overseeing school organisation planning, including decisions to consult on and to publish school organisation proposals and will have a well developed understanding of school organisation issues. This understanding, combined with their more general experience of decision making and the fact that they are democratically accountable to the local electorate, makes executives well placed to decide whether or not contested school organisation proposals should be approved.

However, if they choose to do so, local authorities will not be prevented by Schedule 2 to the relevant regulations from adopting alternative, locally agreed processes for taking such decisions. These might include the formation of a local decision making committee, potentially in collaboration with other local authorities in their region.

Where local authorities choose to follow this route, they will need to consider carefully how they will ensure that such bodies deliver fair and robust decision making.

Annex E provides details of a possible model for a local decision making committee.

## 5.6 Decision notification

Decisions (in relation to proposals which require approval or determination) **must** be made and issued in writing and **must** set out clearly the reasons for the decision.

Decisions **must** be published electronically on the proposer's website (if it has one) and that of the relevant local authority (if different).

The following **must** be advised of the availability of the decision:

- Parents (and where possible prospective parents) careers and guardians, and staff members of schools which are the subject of the proposals;
- In the case of proposals affecting secondary provision, parents of pupils attending primary schools from which pupils normally transfer to that secondary school.

---

<sup>20</sup> Once Part 3 of the 2013 Act is commenced, the Welsh Ministers intend to lay amending regulations to the Local Authorities (Executive Arrangements) (Functions and Responsibilities) (Wales) Regulations 2007 so that they come into force at the same time that Part 3 is operational.

The following **must** receive either a hard copy of the decision letter or be emailed a link to the relevant website:

- the maintaining or proposed maintaining authority for any school likely to be affected by the proposals;
- any other local authority likely to be affected - including in the case of dedicated SEN provision any authority placing or likely to place statemented pupils in it;
- the Church in Wales and Roman Catholic Diocesan Authority for the area in which any school likely to be affected is located;
- any other appropriate religious body for any school likely to be affected by the proposals;
- the governing body of any school which is the subject of the proposals and of other schools likely to be affected by the proposals, including those that might receive any displaced pupils;
- the Welsh Ministers;
- Assembly Members (AMs) and Members of Parliament (MPs) representing the area served by/intended to be served by any school which is the subject of the proposals;
- Estyn;
- teaching and staff trade unions representing teachers and other staff at any school which is the subject of the proposals;
- the relevant Regional Education Consortium;
- the relevant Regional Transport Consortium;
- the Police and Crime Commissioner for the area served by/intended to be served by any school which is the subject of the proposals;
- any community or town council for the area served by/ intended to be served by any school which is the subject of the proposals;
- the local Communities First Partnership (in relevant areas);
- in the case of proposals affecting nursery provision, any independent providers who may be affected;
- in the case of proposals affecting nursery provision, the Children and Young People's Partnership and/or the Early Years Development and Childcare Partnerships where present;
- in the case of proposals affecting SEN provision, any relevant health or third sector bodies with an interest;
- in the case of proposals affecting secondary provision, any further education institutions serving the area of the school.

## 5.7 Referral of local authority decisions to the Welsh Ministers

Under section 54 of the 2013 Act where proposals have been approved or rejected by a local authority the following bodies may within 28 days refer the proposals to the Welsh Ministers for consideration:

- i. Another local authority affected by the proposals;
- ii. The appropriate religious body for any school affected;
- iii. The governing body of a voluntary or foundation school subject to the proposals;
- iv. A trust holding property on behalf of a voluntary or foundation school subject to the proposals; and
- v. A further education institution affected by the proposals.

The bodies making the referral will need to set out why they believe that the decision reached by the local authority is wrong.

The Welsh Ministers will decide whether the bodies referred to in i, ii and iv are affected by the proposals and therefore require consideration.

Where a proposal requires consideration by the Welsh Ministers, the local authority **must** provide them, on request, with copies of the statutory objections and any other information considered necessary by the Welsh Ministers.

Where a proposal requires their consideration the Welsh Ministers may decide to approve, reject or approve the proposals with modifications.

Modifications would normally only include changes to matters such as the timing of implementation or admission numbers. The Welsh Ministers **must not** make modifications that would in effect substitute a new proposal for the proposal which was published. Before making any modification, the Welsh Ministers **must** first consult with the proposer and the relevant governing body/ies and local authority (where they are not the proposers), and obtain the proposer's agreement to the modification.

Approvals can be made conditional on a specified event occurring by a specified date.

Proposals to discontinue a small school may not be referred to the Welsh Ministers.

## 6. Implementing proposals

### 6.1 Implementation – general

Proposals **must** normally be implemented as determined or approved (with or without modifications).

However, if a proposer is satisfied, after consultation with any affected governing body, that a proposal would be unreasonably difficult to implement on the original implementation date, or that circumstances have so altered since the proposal was approved that its implementation on the original date was inappropriate, it may modify the proposal so that its implementation is delayed by up to three years.

If a proposer is satisfied, after consultation with any affected governing body, either that implementation of proposals would be unreasonably difficult or that circumstances have so altered since the proposals were approved that their implementation would be inappropriate altogether, it may determine that the proposals should be abandoned.

In the case of proposals to close a school, and after consultation with any affected governing body, a proposer may also determine to bring forward implementation by a period of up to 13 weeks. Implementation **must** only be brought forward where a school has no remaining pupils on roll or so few pupils that delivery of the curriculum is severely compromised.

Where proposals have received approval by the local authority or the Welsh Ministers, proposers **must** only make a determination to delay, bring forward or abandon a proposal with the agreement of the Welsh Ministers. Any such application for agreement **must** be made in writing with the proposer's reasons clearly set out.

Notification of any determination to delay, bring forward or abandon a proposal **must** be given to relevant parties including the Welsh Ministers, Estyn, the maintaining local authority, the relevant Regional Transport Consortia and the governing bodies, parents, pupils and staff of any affected school, as appropriate, within seven days of it being made. The notification **must** set out, briefly, the reasons for that determination.

If a proposal has been approved by the Welsh Ministers or by a local authority subject to a specified event occurring by a specified date, and that condition is not met by that date, the proposals **must** be considered as rejected unless the proposer has sought and received agreement from the Welsh Ministers or the local authority to have that condition varied by the substitution of a later date.

### 6.2 Implementation – change of category

Part 3 of Schedule 5 to the 2013 Act sets out full details relating to the transfer of land. Any transfers will take place on the implementation date. Where a community school becomes a voluntary aided or voluntary controlled school, any land other than

playing fields held by a local authority transfers automatically to the school's trustees.

Where a foundation, voluntary aided or voluntary controlled school without a religious character becomes a community school any publicly funded land transfers automatically to the local authority. Publicly funded land is defined in schedule 4 to the 2013 Act and includes land provided by the local authority or by means of a capital grant (within the meaning of Chapter 6 of Part 3 to the Education Act 1996). Any other land held by trustees or the governing body **must** be transferred to the local authority by means of a transfer agreement to be drawn up by the parties. Such a transfer may be subject to an agreed payment by the local authority. If the parties are unable to reach agreement in relation to a transfer, either party may apply Welsh Ministers to exclude the transfer of any area of land. The Welsh Ministers **must** then decide whether or not to direct its exclusion.

## 7. The closure of a school with fewer than 10 registered pupils

Where a school has fewer than 10 registered pupils (or there are no pupils remaining at a school) at the January census point the 2013 Act permits governing bodies/local authorities to undertake a streamlined procedure to bring about official closure.

This consists solely of the issue of the notice of closure – the requirement for general consultation being waived, provided sufficient equivalent school places have been identified which would be reasonably accessible to those pupils actually or potentially displaced. If objections are made, the proposal would be determined in all cases by the proposer. However, before bringing forward such proposals, proposers **must** seek the views of any trust with an interest in the school or the appropriate religious body and take these views into account before proceeding.

In the case of schools where some pupils remain, proposers **must** make sure that the closure notice is brought to the pupils' attention, that its meaning is made clear to them, and that appropriate steps are taken to enable these pupils to respond to the notice if they so wish. It is essential that pupils are provided with the opportunity to contribute to the decision making process and proposers **must** ensure that full account is taken of any views they express before a final decision is taken.

Proposers are encouraged to share information with parents and other schools and **should** ensure that they receive a copy of the notice. Any schools identified as those most likely to receive pupils **must** also be notified.

The existence of streamlined procedures in relation to the proposed closure of schools with fewer than 10 registered pupils does not mean that governing bodies or local authorities are required to bring forward closure proposals in relation to such schools. The possible closure of such schools **should** be considered in the light of the factors set out at section 1.

## 8. Proposals by the Welsh Ministers to rationalise school places

Where the Welsh Ministers have previously directed a local authority or governing body to bring forward proposals to remedy excessive or insufficient school places, they may publish their own proposals to the same effect.

The specific criteria upon which the Welsh Ministers might decide to issue a direction or subsequently publish a proposal, would vary depending on the circumstances pertaining to a particular area, but in general terms these are powers of last resort and would be used where a local authority has failed to ensure that:

- their area is served by schools which are sufficient in number, character and equipment to provide for all pupils the opportunity of appropriate education; or
- each child in their area has reasonable access to one of those schools; or
- funding for education is cost effective and resources are used to secure the best possible educational outcomes for children and young people.

The proposals **must** be published in accordance with the provisions included in Chapter 4 above.

Any person may object to the proposals within the 28 day objection period. If objections are received, the Welsh Ministers **must** cause a local inquiry to be held to consider the proposals. Any other school organisation proposals which have been published and not determined **must** be referred to the local inquiry if the Welsh Ministers believe they are related to the proposal which is the subject to objection (and unless the Welsh Ministers form the opinion that they should be implemented).

The local inquiry **must** be conducted by a person appointed for that purpose by the Welsh Ministers and in accordance with any procedures set out by them at the time of the local inquiry's establishment.

Where a local inquiry has been held, the Welsh Ministers **must** consider the report of the person conducting the local inquiry. They may then do one of the following:

1. adopt with or without modifications, or determine not to adopt any of the proposals made by the Welsh Ministers;
2. approve with or without modifications, or reject any other proposals which are referred to the local inquiry;
3. make further proposals to rationalise school places.

If the Welsh Ministers decide to make further proposals there is no requirement to cause a further local inquiry to be held.

Where these further proposals made by the Welsh Ministers have not been referred to a local inquiry the Welsh Ministers may after considering any objections:

1. adopt the proposal with or without modifications; and
2. determine not to adopt the proposal.

Modifications made by the Welsh Ministers **should** normally extend only to include changes to admission numbers or to the timing of implementation. The Welsh Ministers **must not** make modifications that would in effect substitute a new proposal for the proposal which was published.

Proposals can be approved or adopted subject to a specified event occurring by a specified date.

Proposals approved or adopted **must** be implemented in accordance with Chapter 6 above.

## 9. Proposals by the Welsh Ministers for regional provision for special educational needs

Where the Welsh Ministers have previously made an order directing a local authority or a governing body to bring forward school organisation proposals for the purpose of securing regional provision for children with special educational needs, they may publish their own proposals to the same effect.

The proposals **must** be consulted upon in accordance with Chapter 3 above and published in accordance with Chapter 4.

Any person may object to the proposals within the 28 day objection period.

The Welsh Ministers may, after considering any objections;

1. adopt the proposals with or without modification;
2. determine not to adopt the proposals.

Modifications made by the Welsh Ministers **should** normally extend only to include changes to admission numbers or to the timing of implementation. The Welsh Ministers **must not** make modifications that would in effect substitute a new proposal for the proposal which was published.

Proposals can be adopted subject to a specified event occurring by a specified date.

Proposals which are adopted **must** be implemented in accordance with Chapter 6 above.

## 10. Proposals by the Welsh Ministers to restructure sixth form education

Under section 71 of the 2013 Act, the Welsh Ministers may make proposals for:

1. the establishment by a local authority of a school or schools to provide secondary education suitable to the requirements of sixth formers only (a 'sixth form school');
2. the introduction or ending of sixth form provision at a school, or;
3. the discontinuance of a sixth form school.

The proposals **must** be consulted upon in accordance with Chapter 3 above and published in accordance with Chapter 4.

Any person may object to the proposals within the 28 day objection period.

The Welsh Ministers may, after considering any objections;

1. adopt the proposals with or without modification
2. determine not to adopt the proposals

Modifications made by the Welsh Ministers **should** normally extend only to include changes to admission numbers or to the timing of implementation. The Welsh Ministers **must not** make modifications that would in effect substitute a new proposal for the proposal which was published.

Proposals can be adopted subject to a specified event occurring by a specified date.

Proposals which are adopted **must** be implemented in accordance with Chapter 6 above.

## **11. Governing body notice to discontinue a foundation or voluntary school**

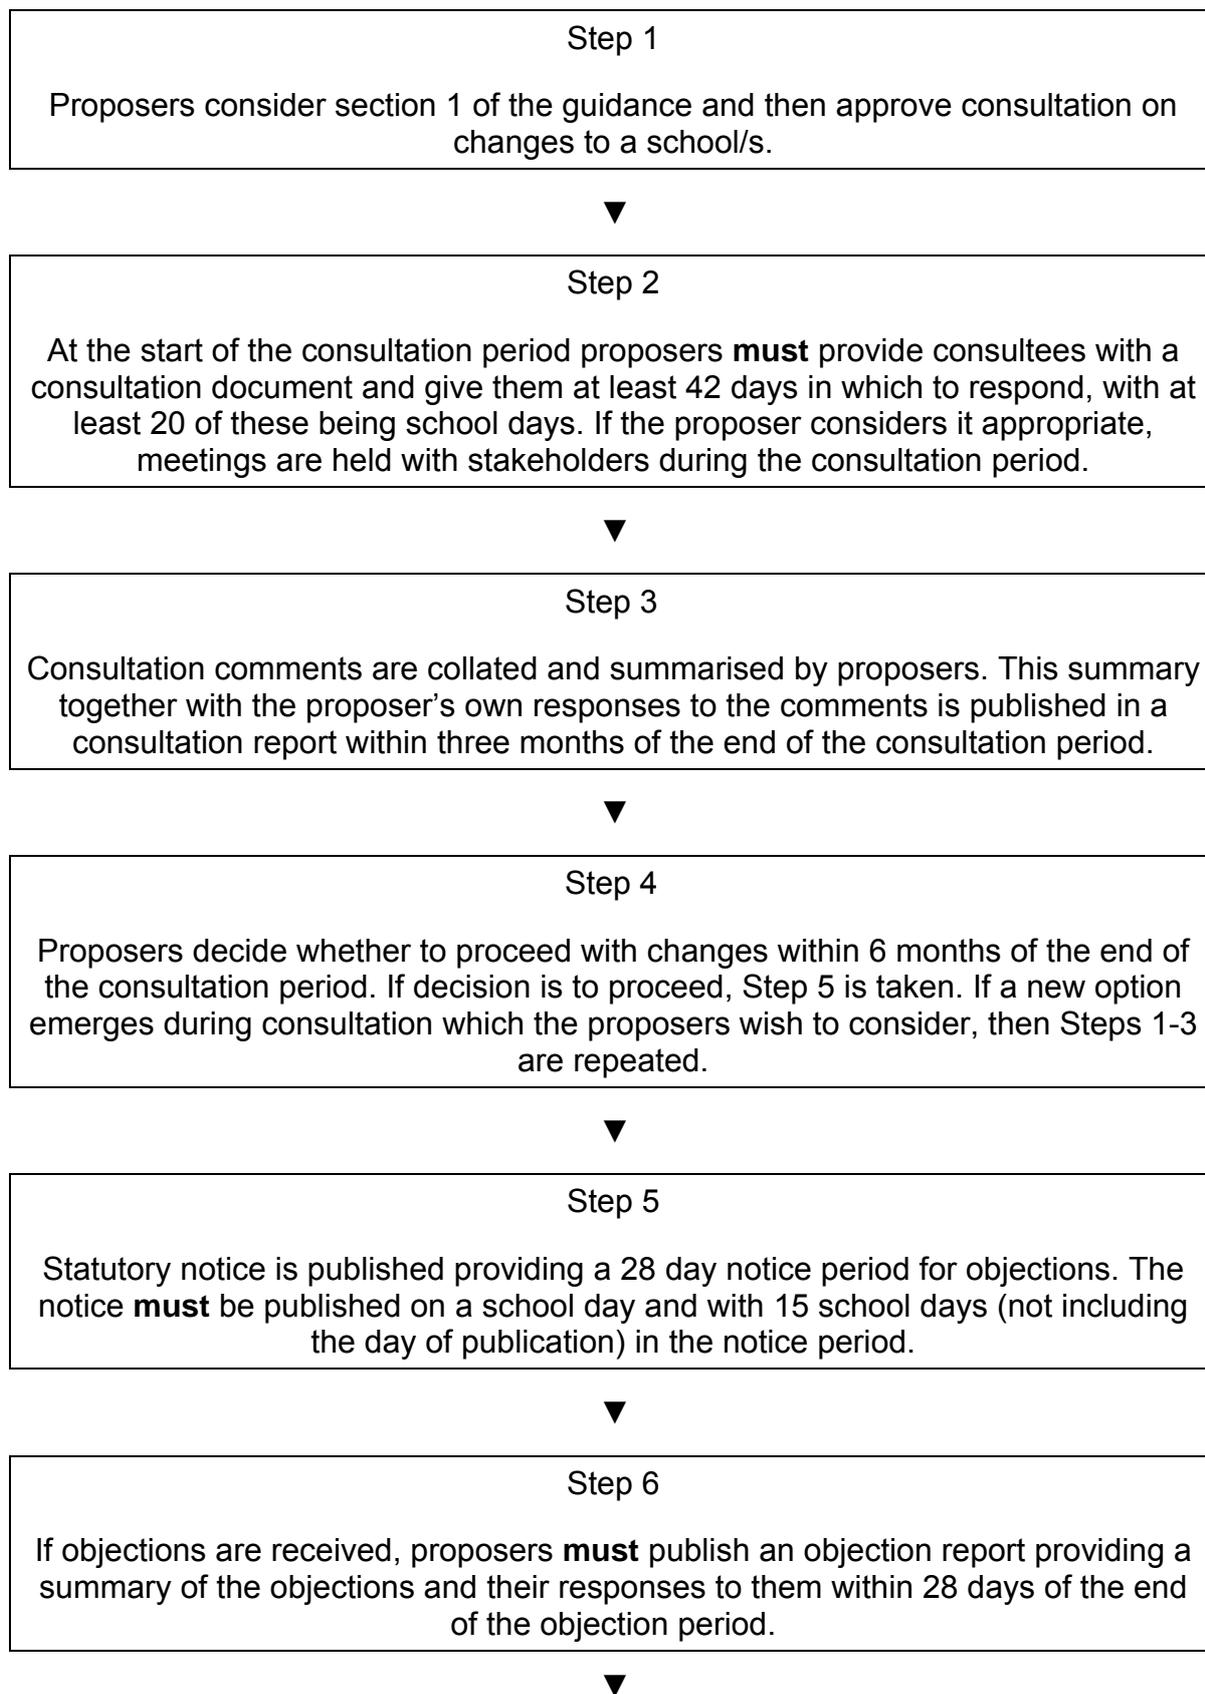

Section 80 of the 2013 Act permits the governing body of a foundation or voluntary school to discontinue the school by giving the Welsh Ministers and the local authority responsible for maintaining the school two years notice of its intention to do so.

Being given notice, the governing body **must**:

1. gain the consent of the Welsh Ministers if expenditure has been incurred on the school premises (otherwise than in connection with repairs) by the Welsh Ministers or local authority;
2. consult the Welsh Ministers if discontinuing the school would affect facilities for full time education suitable to requirements of persons over compulsory school age who have not attained the age of 19; and
3. consult the trustees for any land or buildings held on trust and/or the appropriate religious body where the school has a designated religious character and have regard to any comments which are received.

Where governing bodies require advice in relation to property held on charitable trust, they **should** contact the Charity Commission.

## Annex A: Illustrative flow chart for statutory proposals

Step 7a	Step 7b	Step 7c
<p>If the proposal does not require approval by the Welsh Ministers or the local authority, it <b>must</b> receive final determination by proposers within 16 weeks of the end of the objection period.</p>	<p>If the proposal requires determination by the Welsh Ministers, the proposer <b>must</b> send to the Welsh Ministers within 35 days of the end of the objection period the objections and the objection report. The Welsh Ministers will normally determine proposals within 16 weeks of the end of objection period.</p>	<p>If the proposal requires determination by the local authority, the proposer <b>must</b> send to the local authority within 35 days of the end of the objection period the consultation document, the consultation report, the published notice, the objections and the objection report.</p> <p>The local authority <b>must</b> issue a decision within 16 weeks of the end of the objection period.</p> <p>Within 28 days of the local authority's determination proposals may be referred to the Welsh Ministers by the following:</p> <ul style="list-style-type: none"> <li>i. Another local authority;</li> <li>ii. The appropriate religious body for any school affected (the diocesan authority);</li> <li>iii. The governing body of a voluntary or foundation school; subject to the proposals</li> <li>iv. A trust holding property on behalf of a voluntary or foundation school; subject to the proposals</li> <li>v. A further education institution affected by the proposals.</li> </ul>

Step 8
<p>If proposals receive approval or the proposer determines to implement them, they <b>should</b> be implemented in accordance with the date given in the statutory notice, or any subsequent modified date.</p>

## Annex B: Examples of statutory notices

### Example of a statutory notice to establish a new community or voluntary school

[Insert name and address of those publishing the proposals].

Notice is given in accordance with section 41 of the School Standards and Organisation Act 2013 and the School Organisation Code that [*proposer's name*], having consulted such persons as required, propose to establish a new [*state language category*<sup>21</sup>] school to be maintained by [*state name of maintaining local authority*] at [*state location and, where appropriate, the postal address*] for [*boys*]/ [*girls*]/ [*boys and girls*] aged [*insert age range*].

The [*insert name of proposer*] undertook a period of consultation before deciding to publish this proposal. A consultation report containing a summary of the issues raised by consultees, the proposer's responses and the views of Estyn is available on [*insert the proposer's website or if one is not available the relevant local authority's website*].

It is proposed to implement the proposal on [*insert date*]. [*Where implementation is planned in stages, the date on which each stage is planned to be implemented should be given*].

The proposed new school will be a [*insert community or voluntary aided or voluntary controlled*] school.

[*insert the governing body or the name of the local authority*] will be the admission authority.

The admission number for [*state the relevant age group or age groups*<sup>22</sup>] at the new school in the first school year in which the proposals have been implemented is [*state number*] [*Where the proposals are to be implemented in stages, the admission number in the first school year in which each stage has been implemented must be given*]. [*If there is to be a separate admission number for the sixth form it should be included*].

The new school's pupil capacity will be [*insert capacity figure*<sup>23</sup>]. [*It would also be useful to include the number of nursery places being provided if appropriate*].

[*For a special school, information on the special educational needs of pupils for which provision will be made*].

---

<sup>21</sup> Proposers should refer to the Welsh Assembly Government information document 23/2007 Defining schools according to Welsh medium provision.

<sup>22</sup> A "relevant age" group" is defined in section 142(1) of the 1998 Act as meaning "an age group in which pupils are normally admitted (or, as the case may be, will normally be admitted) to the school". There could, therefore, be more than one relevant age group, in which case the number to be admitted must be given in relation to each such relevant age group.

<sup>23</sup> Proposers should refer to the Welsh Government Circular 21/2011 Measuring the capacity of schools in Wales.

*[Give information on whether it is proposed that the admission arrangements for the new school will make provision for pupil banding].*

*[In the case of a new voluntary school, give information about its religious character and proposed appropriate religious body if it is to have a religious character].*

*[Give information about the proposed arrangements for transport of pupils to the new school].*

*[In the case of proposals to establish a new voluntary school, state whether the proposals are to be implemented by the local education authority or the promoters, and, if the proposals are to be implemented by both, the extent to which they are to be implemented by each such body].*

Within a period of 28 days after the date of publication of these proposals, that is to say by *[insert date]* any person may object to the proposals.

Objections should be sent to *[name and address of proposer]*.

Signed .....

For the *[local authority]*.

*[Date – **should** be the same as the date of publication].*

## **EXPLANATORY NOTE**

*[It may be useful to include an Explanatory Note explaining the proposals in simple language and providing further information and background to the proposals].*

**Example of a statutory notice to discontinue a maintained community, foundation, voluntary or nursery school**

*[Insert name and address of those publishing the proposals].*

Notice is given in accordance with section 43 of the School Standards and Organisation Act 2013 and the School Organisation Code that *[proposer's name]*, having consulted such persons as required, propose to discontinue *[name and address of school]*. The school is currently maintained by *[state name of maintaining local authority]* *[and if relevant, state school's religious character]*.

The *[insert name of proposer]* undertook a period of consultation before deciding to publish this proposal. A consultation report containing a summary of the issues raised by consultees, the proposer's responses and the views of Estyn is available on *[insert the proposer's website or if one is not available the relevant local authority's website]*.

It is proposed to implement the proposals on *[insert date]* (2).

*[Insert details of the schools which pupils at the school to be discontinued may attend, including any interim arrangements and the language category of the alternatives as defined by Information Document No: 023/2007].*

*[Insert details of any other measures proposed to be taken to increase the number of school places available in consequence of the proposed discontinuance].*

*[Insert particulars of the proposed arrangement for transport of pupils to other schools].*

Within a period of 28 days after the date of publication of these proposals, that is to say by *[insert date]* any person may object to the proposals.

Objections should be sent to *[name and address of the proposer]*.

Signed .....

For the *[local authority or governing body]*.

*[Date – **should** be the same as the date of publication].*

**EXPLANATORY NOTE**

*[It may be useful to include an Explanatory Note explaining the proposals in simple language and providing further information and background to the proposals].*

## **Example of a statutory notice to make a regulated alteration to a maintained community, foundation, voluntary or nursery school**

Notice is given in accordance with section 42 of the School Standards and Organisation Act 2013 and the School Organisation Code that [*proposer's name*], having consulted such persons as required, proposes to alter [*name and address of school*] so that [*add description of proposed change/s*]. The school/s is/are currently maintained by [*state name of maintaining local authority*].

The [*insert name of proposer*] undertook a period of consultation before deciding to publish this proposal. A consultation report containing a summary of the issues raised by consultees, the proposer's responses and the views of Estyn is available on [*insert the proposer's website or if one is not available the relevant local authority's website*].

It is proposed to implement the proposal on [*insert date*]. [*Where implementation is planned in stages, the date on which each stage is planned to be implemented **should** be given*].

[*Where the alteration involves enlargement, or a reduction in capacity, insert*], The current number of pupils at the school is [*insert number*], the pupil capacity of the school is [*insert pupil places capacity<sup>24</sup>*] and the proposed capacity once the proposal is implemented will be [*insert proposed capacity*].

[*Where the alteration involves enlargement, or a reduction in capacity insert*] The admission number for [*state the relevant age group or age groups<sup>25</sup>*] at the school in the first school year in which the proposals have been implemented will be [*state number*] [*include a separate sixth form number if appropriate*] [*Where the proposals are to be implemented in stages, the admission number in the first school year in which each stage has been implemented **must** be given*]. [*where appropriate*] There will be xx nursery places.

[*Where the alteration involves a change in the type of SEN provision, provide information on the alternative provision for pupils and the impact on school transport*].

Within a period of one 28 days after the date of publication of these proposals, that is to say by [*insert date*] any person may object to the proposals.

Objections should be sent to [*name and address of the proposer*].

The [*insert name of proposer*] will publish a summary of any such objections made (and not withdrawn in writing) within the objection period, together with their

---

<sup>24</sup> Proposers should refer to the Welsh Government Circular 21/2011 Measuring the capacity of schools in Wales.

<sup>25</sup> A "relevant age group" is defined in section 142(1) of the 1998 Act as meaning "an age group in which pupils are normally admitted (or, as the case may be, will normally be admitted) to the school". There could, therefore, be more than one relevant age group, in which case the number to be admitted must be given in relation to each such relevant age group.

observations thereon, within the period of 28 days after the end of the objection period.

Signed .....

For the [*local authority or governing body*].

[*Date – **should** be the same as the date of publication*].

## **EXPLANATORY NOTE**

[*It may be useful to include an Explanatory Note explaining the proposals in simple language and providing further information and background to the proposals*].

## Annex C: Consultation document template

The following template sets out a suggested but not mandatory format for the information which is required to be included in a consultation document. This outline of the contents is not exhaustive and proposers would be expected to include additional elements depending on the nature and context of the proposals under consideration.

### Introduction - Explanation of the consultation exercise

This section might set out that the proposers were considering the reorganisation of school places in a particular area and name the school/s affected. It might explain that before moving forward with its proposals, the proposers wished to seek the views of all those with a likely interest in the proposal/proposals so that their views can be taken into account before decisions are made.

This section might then set out the process by which consultation will be conducted, including:

- a list of all those being consulted (The interested parties with whom proposers **must** consult are set out at Section 3 of the Code. However, it is expected that proposers would also consult with interested parties who are not included in this list where that was appropriate in the context of a specific proposal);
- if meetings are to be held, the date, time, venue and audience of any such meetings (allowing sufficient notice for likely attendees);
- the name and address of the person to whom written comments on the proposal/s should be sent, and the deadline for the receipt of these comments;
- the arrangements made for children and young people to participate; and
- the details of any other consultation arrangements such as open days, exhibitions, etc.

### Background to the proposal/s

This might set out the following details for all schools affected or likely to be affected by the proposals, including schools which might in future be expected to receive additional pupils, and special schools:

- the names, locations, categories and language categories of all existing schools likely to be affected by the proposal (for example in the case of a proposal to close a school information **should** be provided about all the surrounding schools which it may be reasonably considered that pupils may wish to transfer);
- the number of pupils on roll currently and the figures recorded for the previous four annual school censuses at all existing schools likely to be

- affected by the proposals (for primary schools, the number of nursery pupils **should** be shown separately and excluded from forecasts);
- five year forecasts of pupil rolls at all the existing schools likely to be affected by the proposal both currently (i.e. based on the existing configuration of schools) and if the proposal is implemented;
- the pupil places capacity (based on the Welsh Government Circular No 21/2011"Measuring the Capacity of Schools in Wales");
- the number of nursery places where applicable;
- the number of sixth form places where applicable; and
- the quality of accommodation with reference to categories of condition of the buildings of the schools as provided in any schools surveys.

Where the proposal is to establish a new school:

- the new school's:
  - proposed admission number and admission arrangements;
  - age range;
  - pupil places capacity and/or number of nursery places;
  - location and accessibility;
  - category;
  - language category (and an explanation of this); and;
  - details of the proposed accommodation to include a list of proposed facilities;
  - the home to school transport arrangements and policy of the local authority together with information of safe walking routes; and
  - In the case of a special educational needs (SEN) resource base in a mainstream school or a special school, information on the special needs of pupils.

Where the proposal is to close a school:

- details of any alternatives to closure that have been considered and the reasons why these have not been taken forward;
- the impact on any affected school or provider – particularly on alternative schools named in a closure proposal;
- the impact of the proposals on the local community, particularly in rural areas and in areas designated for Communities First programmes or successor programmes;
- the likely impact on staff of schools named in a proposal;
- in the case of the transfer of pupils to a different location:

- the name and location of the proposed alternative provision;
- a comparison between the quality and diversity of education provided at the school from which pupils would be transferred and the proposed alternative/s and an outline of any steps necessary in order to ensure that any shortcomings in the latter are addressed;
- admission arrangements at the proposed alternative school;
- a comparison between the quality of accommodation at the school from which pupils would be transferred and the proposed alternative and an outline of any steps necessary in order to ensure that any shortcomings in the latter are addressed;
- information on how the transferred children will be accommodated at the alternative school including projected class sizes following implementation;
- the impact on pupils' journeys to school;
- the availability of safe waking routes to alternative schools.

Where proposals relate to a special school or involve dedicated SEN provision in a mainstream school:

- the impact on SEN provision; and
- how the proposals will contribute more generally to enhancing the quality of education and support for children with SEN.

Where any school involved or affected provides teaching through the medium of Welsh:

- the impact of proposals on the Welsh language (see Welsh language impact assessment at Annex D).

Where the proposal concerns a school with a designated religious character:

- the impact on availability and access to schools of the same religious character.

Where the proposal concerns a change of category:

- the effect of the change of category on governance arrangements and the governing body's powers over policies and arrangements in respect of admissions, employment and the curriculum; and
- any proposed changes to policies and arrangements in respect of admissions, employment and the curriculum.

Where the proposal involves a potential disposal or transfer of land or buildings, details of the same.

This section might also explain why the current schools provision is considered inadequate or unsatisfactory by reference, as appropriate, to the factors set out in Section 1 of the Code.

### **The proposals - Description and rationale**

This section might set out a detailed description of the status quo and the precise nature of the intended change/s, including the effect on all schools which are the subject of the statutory proposal/s involved in its implementation, and all others which are likely to be affected.

This section might also include the following information, as appropriate:

- The expected revisions to the local school data (as set out in the background section above) once the proposals are implemented;
- Implementation dates and details of any transition arrangements;
- Revenue savings/costs;
- Capital funding costs, including the source of any such funding;
- Description of any new accommodation;
- Proposed new admission arrangements;
- Proposed new transport arrangements and the accessibility of alternatives;
- Staffing issues;
- Community Impact Assessment;
- Welsh Language Impact Assessment;
- Equality Impact Assessment;
- Likely benefits to children and young people, in accordance with the seven core aims of the United Nations Convention on the Rights of the Child.

This section might also set out the rationale for change – the inadequacies of the status quo (as well as any strengths it may have) and the benefits that the changes will bring with reference to Section 1 of the Code. If appropriate, the disadvantages of the proposals might also be set out with an explanation of why these disadvantages are outweighed by the benefits. The paramount importance of educational standards **should** be emphasised, and there **should** be direct reference to how the proposal would benefit overall education provision in the locality and address other factors set out in Section 1 of the Code.

Consideration of alternatives, if appropriate, and reasons why these have not been pursued, might also be included in this section.

## **Explanation of the statutory process**

This section might set out the statutory process by which the proposals will be published and approved/determined including the intended date of publication of the notice/s; an explanation of the objection period and the ways in which objections will be treated, and assurance that anyone can object to the proposal.

## **Response Pro-forma**

A response pro-forma for comments, including an opportunity for consultees to register their wish to be notified of publication of the consultation report, **should** be attached to the consultation document.

## Annex D: Community impact and Welsh-medium impact assessments

The Welsh Government takes the view that the requirement for assessments should not be overly burdensome and does not consider that it is necessary to commission such work from external consultants. Local authorities are already under a duty to carry out equality impact assessments which could provide the basis for the impact assessments specified in this guidance.

### Community Impact

Impact assessments **should** ideally be included in consultation documents. Whilst these notes do not prescribe what should be included in a community impact assessment, proposers might include the following:

- information on the proportion of pupils from the catchment area that attend the school;
- information on the proportion of pupils from outside the catchment area that attend the school;
- information about any other facilities the school accommodates e.g. youth club/play group;
- information about any other facilities or services the school provides e.g. after school clubs, community library;
- if accommodation, facilities or services are provided by a school, where they would be provided in the event of closure;
- whether other facilities available in the immediate local or wider community will or could be enhanced in the event of a school closure (e.g. improvements to village halls, playgrounds, provision of holiday play schemes);
- information about the facilities and services provided at any alternative school;
- information about the distance and travelling time involved in attending an alternative school of the same language category;
- how parents' and pupils' engagement with the alternative school and any facilities it may offer could be supported (e.g. how pupils (and particularly any less advantaged pupils) will be helped to participate in after school activities);
- Information about any wider implications the changes would have on public transport provisions;
- Information on wider community safety issues.

## Welsh language Impact

These notes are not prescriptive or exhaustive but the impact assessment in respect of the Welsh language might include the following:

- information on the language category of the school;
- information on the language category of any alternative school;
- information about standards in the Welsh language in the school and any alternative school;
- information about after school activities which provide additional opportunities to use Welsh in the school and any alternative school (e.g. Urdd clubs);
- information about whether the school provides facilities for members of the community to learn Welsh, or undertake activities through the medium of Welsh, and where any alternative facilities could be provided;
- whether it might be appropriate to provide additional after school facilities at any alternative school to further secure standards in the Welsh language;
- how parents' and pupils' engagement with any alternative school and any specific language enhancement it offers could be supported (e.g. how pupils will be helped to participate in Urdd clubs);
- information on how the proposal fits with the authority's Welsh in Education Strategic Plan and any future actions that will be needed in consequence of the change to continue to comply with the scheme or meet targets in the scheme.

## **Annex E: Local decision making committee**

The model set out below represents one potential way of establishing a 'local decision making committee'.

The size of the committee would be significant in shaping its effectiveness. Too large and it would be unwieldy and difficult to establish a consensus. Too small and there might be too little debate and too narrow a perspective. A committee with five members might represent an ideal size.

The make up of the committee will also be important in determining how it is perceived. If the intention is to emphasise its separation from the local authority's executive, it might be necessary to 'disqualify' members of the executive and anyone who has a connection to the local authority, proposer (if different from the local authority) or the school to which the proposals relate, which might raise doubts over their ability to act impartially regarding the proposal.

Providing they are not 'disqualified', local authorities might decide to appoint committees made up of local authority members only, or of persons unconnected with the local authority (including members of another local authority), or of any combination of the two.

Where a school with a designated Church in Wales or Roman Catholic religious character (or which is intended to have such a religious character) is the subject of a proposal, the local authority might invite the Diocesan Board of Education for the relevant diocese of the Church in Wales or the Bishop of the relevant Roman Catholic Church diocese to nominate a representative to be one of the members of the committee. In the case of any other voluntary school with a designated religious character, the person or persons by whom the foundation governors are appointed might be invited to nominate a representative.

Local authorities might want to ensure that at least one member of the committee has direct experience of working in the education sector. An existing or former member of a school's senior management team or an experienced school governor might be suitable in this respect.

In the event that the committee is to be comprised of local authority members only, the local authority might want to consider making it politically balanced in the sense set out at sections 15 and 16 of the Local Government and Housing Act 1989.

The local authority may wish to recruit, train and retain a pool of eligible persons and appoint to a committee as and when required. This would provide a number of advantages including reducing the time needed to set up a committee when required and helping the local authority to ensure potential committee members have sufficient training.

Local authorities could also co-operate to develop shared regional pools. This would increase the potential number of eligible and suitably experienced candidates whilst at the same time providing more opportunities for committee members to gain experience and develop expertise in making school organisation decisions.

However, when appointing panels from any such regional pool, local authorities might want to ensure at least some members have specific local knowledge.

The local authority would want to ensure that all committee members receive appropriate training before considering proposals, and that experienced committee members are kept abreast of any amendments to guidance and are given the opportunity of undertaking refresher training. Training need not be extensive but might look to ensure that committee members are familiar with the guidance contained in the Code and are familiar with the relevant parts of the 2013 Act. Two or more local authorities could collaborate to deliver training which, in addition to possible financial savings, could provide benefits such as the wider sharing of good practice.

It would be advisable for the committee to have the services of a clerk provided by the local authority. Whilst the clerk would not be a member of the committee they might act as an independent source of advice. To enable this, clerks would need a good understanding of the Code and the relevant parts of the 2013 Act and would have received appropriate training. The local authority, where necessary, would need to provide the committee with appropriate legal advice. It would be advisable for the clerk not to have been involved at any stage in the proposal that the committee are considering or to have any interest in any decision reached by the committee members.

The key tasks of the clerk would be to:

- make the necessary administrative arrangements for the committee;
- be an independent source of advice on procedure, the Code and the relevant parts of the 2013 Act;
- record the proceedings, decision and the reasons for it; and
- ensure notification and publication of the decision in accordance with paragraph 5.13.

To enable a committee to reach an informed decision, the local authority would need to forward to the appointed clerk the documents set out paragraph 5.3 above, shortly after the end of the objection period. It would be advisable for the committee to reach its decision on the basis of this written evidence rather than seek or consider new information (unless they consider it will assist in the determination within the timescale), or consider oral representations.

## CYNGOR SIR POWYS COUNTY COUNCIL.

### CABINET EXECUTIVE 15 December 2015

**REPORT AUTHOR:** The Leader

**County Councillor Stephen Hayes  
Portfolio Holder for Adult Social Care**

**SUBJECT: INVESTMENT PROPOSAL TO TAKE FORWARD  
INTEGRATION AT PACE**

---

**REPORT FOR: Decision**

---

#### Summary

It is widely recognised that health and social care services need to be much better co-ordinated around the individual to ensure the right care is offered at the right time and in the right place. Powys has the fastest growing elderly population in Wales and a new approach is required in order to avoid unaffordable increases in spending.

Powys County Council (PCC) and Powys Teaching Health Board (PTHB) are working together and increasingly (currently on a small scale) integrating services. We have the advantage of co-terminous boundaries; this is unique in Wales.

Powys County Council and Powys THB have a track record of partnership working. However, during 2015 a stronger focus on integrated working has developed, in line with such developments across the UK and beyond and in response the Welsh Government policy direction especially the Social Services & Wellbeing Act 2014.

**Existing Section 33 agreements:** Powys THB and Powys County Council have in place an over-arching Section 33 agreement through which the organisations manage joint arrangements for IT services, reablement services, the Glan Irfon Integrated Health and Social Care project, joint equipment and substance misuse services. Both organisations are fully committed at Board and Cabinet level to further integration as set out in the unique Powys response to the Commission on Public Service Governance and Delivery, published in Jan 2014 and outlined the opportunities for further integration in an Expression of Interest paper submitted to Welsh Government in November 2014.

**Current Integration Plan:** In June 2015, Powys THB and PCC's Joint Management Team agreed to prioritise two key work streams as part of the 2015/16 Integration Plan:

1. Implementing “One Place” approach to integrated services for Older People. It is anticipated that by bringing together health and social care through shared processes, information and co-location opportunities for individuals to be supported at home will be maximised. This project will develop integrated pathways and, through developing a detailed understanding of the locality population, inform the operational structures required. Two early implementers (one in South Powys and one in North Powys) have been selected.
2. Developing a single organisational development approach - including a joint leadership and management framework; team working and joint scrutiny and governance. This also includes the development of a Joint Management Team and revised Joint Partnership Board.

## **Proposal**

This report sets out a proposal to give detailed consideration to accelerating the programme of integration already underway between Powys County Council and Powys Teaching Health Board. The detail of the proposal is contained within Appendix 1. The proposal at this stage is to seek support to undertake a detailed assessment of the potential to integrate health and social care (primarily adult social care) as a means of improving patient/citizen experience and outcomes from care services, efficiency and sustainability. A full options appraisal to determine the most suitable mechanism for delivering integration of health and social care will be undertaken as part of the detailed assessment.

An indicative timeline for this consideration and any subsequent decision making could fall broadly as outlined below:

- Phase 1 – January - September 2016: Detailed assessment exercise (including options appraisal and due diligence)
- Presentation of findings for decision September 2016 (with interim report considered during April/May 2016)
- Phase 2 – September 2016: Implementation of findings September 2016 onwards dependent on the assessment and subsequent decision making (shadow arrangements)
- Phase 3 – April 2017: Embedding implementation and benefits realisation (March 2017) – dependent on outcomes of phases 1 and 2.

The report also outlines how the expected reconstituted Joint Partnership Board will provide oversight and leadership of the integration of health and social care, along with both organisations commitments as a result of the Social Services and Wellbeing Act. This facilitates governance and strategic oversight of integration by elected members of Powys County Council and independent members of Powys Teaching Health Board.

These proposals are in line with both the THB's Annual Plan and the County Council Service Improvement Plan for adult social care in particular.

### **One Powys Plan**

The Powys One Plan vision was set by Powys Local Service Board and indicates a drive for integrated service change in the County. This has resulted in improvements to services in Powys, particularly in relation to children's services through the Children and Young People's Partnership and for older people - there has also been developing collaboration in shared support functions.

The One Powys Plan 2014-17 outlines the strategic priorities for multi-agency working to support and respond to clearly evidence the local needs of communities in Powys. The reduction in funding available and other government policy changes are leading to a fundamental change in methods of commissioning and the delivery of local services. To achieve the vision of "Strong Communities in the Green Heart of Wales" One Powys Plan (2014-2017) is focused on 5 strategic change programmes.

- Integrated Health and Adult Social Care
- Transforming Learning and Skills
- Children, Young People and Families
- Stronger, safer and economically viable communities
- Organisational and Partnership Development.

The Integrated Medium Term Plan sets out the THB's approach to planning and delivery of services for the residents of Powys for the three year period 2015-18. The plan is designed around the vision set out by the Board to deliver "truly integrated care centred on the needs of the individual" through six inter-related aims:

- Improving Health and Wellbeing;
- Ensuring the Right Access;
- Striving for Excellence;
- Involving the People of Powys;
- Making Every Pound Count;
- Always with our staff.

The establishment of Powys Health and Adult Social Care Integrated Leadership Board has strengthened the joint working which has already taken place between the health board and social care for many years. During 2014/15 the multidisciplinary learning disabilities team was further developed: senior practitioners; adult social workers; community nurses; occupational therapists; clinical psychologist; and speech and language therapist are now based under one roof.

If integration is to progress, there may be a need for both PTHB and PCC to manage more risk than is customary. Key benefits and risks of accelerated integration of health and social care will be further identified during the next phase of detailed work.

Benefits of integration across health and social care highlighted during an initial review include:

- Seamless service user care;
- Value for money;
- Stemming growth.
- Joined up approach welcomed by staff and the people of Powys.

Risks highlighted during an initial review include:

- Service user impact if integration does not go well.
- Need for regulatory framework and national performance requirements to catch up with integrated approach (e.g. capital, performance management of both health and social care) – how will the national interface be managed?
- Delivery of the integration agenda will consume considerable resource, hence becoming a significant distraction to core delivery during transition.
- Assurance will be required that PCC will remain an entity beyond accelerated integration of health and social care, otherwise the benefits of integration will be outweighed by the detrimental effects of a loss of terminosity.

### **Options Considered/Available**

Integration is already underway in Powys, however progressing by means of localised good practice at delivery level forgoes the benefits in service delivery, organisational and financial terms which may be available through accelerated, strategic integration.

By committing resources to thorough investigation of potential models of integration with a view to an accelerated joint PCC/PTHB decision to integrate at strategic level, with revised governance addressing the need for elected/independent member oversight and direction, there is an opportunity to strengthen ongoing integration activity and accelerate pace.

### **Preferred option**

The preferred option is to invest resource in detailed investigation of integration of health and social care in Powys. A full options appraisal to determine the most suitable mechanism for delivering integration of health and social care will be undertaken as part of the detailed assessment.

At the same time the opportunity will be taken to strengthen effective governance and oversight by means of the Joint Partnership Board comprising a revised membership of the Leader of Powys County Council and the Portfolio-holders for Finance and Adult Social Care, together with three independent members of Powys Teaching Health Board. The Joint Partnership Board would direct and oversee the strategic progress of integration, and in respect of integration would be the reporting body for Joint Management Team.

### **Sustainability and Environmental Issues/Equalities/Crime and Disorder,/Welsh Language/Other Policies etc**

There is a requirement placed on the Council to provide good quality services for the individuals who reside in Powys. These services have to be sustainable and flexible to meet the future need of the individuals who require these services. Promotion of health and well-being, choice and flexibility is also essential by placing the 'citizen' at the centre of service provision.

### **Children and Young People's Impact Statement - Safeguarding and Wellbeing**

Key stakeholders, including the Children and Young People's Partnership have been consulted with.

### **Local Member(s)**

This applies to all electoral divisions.

### **Other Front Line Services**

Current operational management structures would need to be reviewed in order to determine the most suitable arrangements for integrated health and social care (this will also be dependent on agreement of scope of services included in the changed arrangements).

Integrated services cannot be delivered in addition to business as usual without additional resourcing or agreement to areas of work that can be suspended. Current areas of executive attention and leadership will need to be considered carefully when evaluating reprioritisation to enable discussion on integration. There is a significant risk of reputational damage to both organisations if integration is not smooth and successful.

There will be a requirement to identify the preferred model of employment and cost implications of change. Depending on the option selected it may be necessary to harmonise pay and conditions. This will need to be addressed in the detailed phase of work. Workforce planning to suit the needs of the service model will need to be undertaken. Back office requirements (workforce systems, training delivery etc.) will also need to be determined so that there is clarity about support. The corporate services impact on both organisations will need to be fully understood and elements associated with social care identified within wider organisational functions. This would include change management arrangements.

An Equality Impact Assessment will be required in the detailed phase of work, and ongoing monitoring of impact beyond integration. This is to ensure no section of the community are disadvantaged, in accordance with the Equality Act 2010, section 149.

There will be a requirement to ensure staff are fully engaged with and supported through the integration of health and social care. This will involve developing and resourcing a staff engagement plan, managing and developing trade union relationships and following the mechanism for changing management arrangements.

## **Support Services (Legal, Finance, Corporate Property, HR, ICT, BPU)**

Corporate Property - "This could lead to benefits in operational effectiveness from co-location and shared use of property and the more efficient use of space".

Finance – the Finance Business Partner notes the comments in the report to give detailed consideration to accelerating the programme of integration already underway between Powys County Council and Powys Teaching Health Board. Powys has the fastest growing elderly population in Wales and a new approach is required in order to avoid unaffordable increases in spend, improving patient/citizen outcomes and delivery of sustainable services. Integrated services cannot be delivered in addition to business as usual without additional resourcing or agreement to areas of work that can be suspended to remain within the current financial envelope. There will be a requirement to identify the preferred model of employment and cost implications of change.

Legal – The recommendations can be supported from a legal point of view.

Human Resources – no comment received.

Business Services – no comment received.

## **Local Service Board/Partnerships/Stakeholders etc**

Partnership working between the health board and local authority is well established in Powys. The proposal at this stage is focused on seeking *support to undertake a detailed assessment of the potential to integrate health and social care* and thus deepen the partnership further. The Local Service Board and Partnership Service Board will be kept informed.

## **Corporate Communications**

Comment: The report is of public interest and requires proactive communication support and action throughout the process.

## **Statutory Officers**

The view of the Strategic Director Resources (Section 151 Officer) - The better co-ordination of health and social care services is a requirement if the whole system is to be financially sustainable. The financial pressures that Powys County Council faces in Adult Services are in large part a product of the county having the fastest growing elderly population in Wales. In order to balance the council's financial position a new approach is needed and the S151 Officer supports a development that helps meet this requirement. The unique advantage (in Wales) that co-terminous boundaries provide will assist the delivery of a new approach. Learning from approaches adopted elsewhere in the UK around funding mechanisms will assist the development of the model and also ensure an effective response to Welsh Government's policy direction.

The Solicitor to the Council (Monitoring Officer) has commented as follows: “I note the legal comment and have nothing to add to the report.”

**Members’ Interests**

The Monitoring Officer is not aware of any specific interests that may arise in relation to this report. If Members have an interest they should declare it at the start of the meeting and complete the relevant notification form.

<b>Recommendation:</b>	<b>Reason for Recommendation:</b>
<p><b>It is recommended that Cabinet:</b></p> <ul style="list-style-type: none"> <li><b>a) Notes the content of the detailed report (appendix 1);</b></li> <li><b>b) Powys County Council and Powys Teaching Health Board will jointly undertake a detailed assessment of the potential to integrate health and social care in accordance with the ‘preferred option’ above.</b></li> <li><b>c) Approves the strengthening of the Joint Partnership Board as described in the report, to oversee and direct the integration programme, receive and consider reports arising out of the detailed assessment work, and make recommendations to Cabinet and PTHB Board accordingly.</b></li> </ul>	<p><b>To explore integration of health and social care as a mechanism to deliver a sustainable services in Powys.</b></p>

## **INVESTMENT PROPOSAL TO ACCELERATE INTEGRATION OF HEALTH AND SOCIAL CARE**

### **1.0 INTRODUCTION**

This report sets out a proposal to give detailed consideration to accelerating the programme of integration already underway between Powys Teaching Health Board and Powys County Council. The proposal at this stage is focused on seeking *support to undertake a detailed assessment of the potential to integrate health and social care* (primarily adult social care) as a means of improving patient/citizen experience and outcomes from care services, efficiency and sustainability.

Powys County Council and Powys THB has a track record of developing partnership working. During 2015 however a stronger focus on integrated working has developed, in line with such developments across the UK and beyond and in response the Welsh Government policy direction. This proposal is therefore in line with both the THBs Annual Plan and the County Council Service Improvement Plan for adult social care in particular.

### **1.1 PURPOSE OF THE PAPER**

The proposal is to undertake *a detailed assessment of the potential and impact of accelerating the integration health and adult social care on a large scale*. Children's services would also be considered. A full options appraisal to determine the most suitable mechanism for delivering integration of health and social care will be undertaken as part of the detailed assessment.

Specifically, an indicative timeline for this consideration and any subsequent decision making could fall broadly as outlined below:

- Phase 1: Detailed assessment exercise (including options appraisal and due diligence) January 2016-September 2016.
- Presentation of findings for decision September 2016 (with interim report considered during April/May 2016)
- Phase 2: Implementation of findings September 2016 onwards dependent on the assessment and subsequent decision making (shadow arrangements)
- Phase 3: Embedding implementation and benefits realisation (April 2017) – dependent on outcomes of phases 1 and 2.

### **1.2 CONTEXT**

It is widely recognised that health and social care services need to be much better co-ordinated around the individual to ensure the right care is offered and the right time and in the right place. Powys has the fastest growing elderly population in Wales and a new approach is required in order to ensure support and services are sustainable and to avoid unaffordable increases in spending.

Evidence suggests that people often experience fragmented services within the NHS and between health and social care. This is because our population's care needs have changed faster than our health and care systems have been able to respond, resulting in a mis-match between the kind of care that people need and the services

that they end up getting. This well-known problem requires new ways of delivering services, where care is much more co-ordinated than it is today. This is often described as integrated care.

The umbrella term “integration” has many meanings, including:

- System level integration – common characteristics of these integrated systems contributing to their performance include multispecialty practice, aligned incentives, use of ICT, accountability for performance and defined populations.
- Cohort level integration – focuses on the needs of particular groups of service users, for example older people or those with specific conditions – such as integrated health and social care for older people, or disease management for those with long-term conditions.
- Service user level integration – a diverse range of approaches can be utilised to deliver improved care co-ordination for individuals and carers, these include telehealth, telecare, virtual wards, personal budgets and case management.

All three levels can include a range of teams/services/organisations involved in meeting the needs of service users including various teams within and across the health board and local authority, third sector and private sector services.

The case for integrated care is reinforced by the need to develop whole-system working to address the demands arising from an ageing population and increases in the number of people with multiple long-term conditions. The evidence of the benefits, in particular to the experience of service users and their families, seen when organisations and services work together, make a compelling case for care to be co-ordinated around the needs of people and populations. Developing integrated care means overcoming barriers between primary and secondary care, physical and mental health, and health and social care to provide the right care at the right time in the right place.

Although integrated care has been a longstanding policy aspiration of successive governments, progress has been limited and patchy, reflecting fundamental differences between the NHS and social care system in terms of:

- Funding
- Governance
- Accountability.

**Co-terminosity:** Powys Teaching Health Board and Powys County Council are the only health board and local authority that is co-terminous. Within Powys there is political will to maximise co-terminosity and desire to witness delivery of integrated services. The importance of the population served by both PTHB and PCC being the same should not be underestimated. Having a 1:1 relationship between health board and local authority, with the same population served by both, makes integration of services less complex than in situations with multiple partners with differing populations to serve. The shared population of both organisations has signalled its desire for joined up public services.

**Powys One Plan:** Through the vision set by Powys Local Service Board in the Powys One Plan to drive for integrated service change in the County, there have been improvements to services in Powys, particularly in relation to children’s services

through the Children and Young People's Partnership and for older people. There has also been strong collaboration in developing shared support functions.

**Existing Section 33 agreements:** Powys THB and Powys County Council have in place an over-arching Section 33 agreement through which the organisations manage joint arrangements for IT services, reablement services, the Glan Irfon Integrated Health and Social Care project, joint equipment and substance misuse services. Both organisations are fully committed at Board and Cabinet level to further integration as set out in the unique Powys response to the Commission on Public Service Governance and Delivery, published in Jan 2014 and outlined the opportunities for further integration in an Expression of Interest paper submitted to Welsh Government in November 2014.

**Current Integration Plan:** In June 2015, Powys THB and PCC's Joint Management Team agreed to prioritise two key work streams as part of the 2015/16 Integration Plan:

1. Implementing "One Place" approach to integrated services for Older People. It is anticipated that by bringing together health and social care through shared processes, information and co-location opportunities for individuals to be supported at home will be maximised. This project will develop integrated pathways and, through developing a detailed understanding of the locality population, inform the operational structures required. Two early implementers (one in South Powys and one in North Powys) have been selected.
2. Developing a single organisational development approach - including a joint leadership and management framework; team working and joint scrutiny and governance. This also includes the development of a Joint Management Team and revised Joint Partnership Board.

**Expectations of WG Policy and new legislation:** Much of current WG policy and legislative framework expects health and social care organisations to plan and commission services together based on the needs of the population. This is particularly so for:

- Older people's services
- Services for people with a learning disability
- Support and services for carers
- Services for people with mental and emotional health needs.

In particular the Social Services and Wellbeing (Wales) Act 2014 significantly drives forward the potential for integration with Ministerial powers to direct organisations to pool resources in order to improve services for the population.

**Regulator/Inspectorate expectations:** Powys County Council's social care have been reviewed by the Inspectorate (Care and Social Services Inspectorate for Wales). CSSIW stress the need to modernise adult care services, with strong assertion that services can only truly modernise if they are integrated. To date, changes have been made with varying levels of success. It is important to note that integrated work such as the Glan Irfon development, involved both CSSIW and

Healthcare Inspectorate Wales, demonstrating a more joined up approach to regulation and inspection.

### **2.0 FIVE CASE MODEL**

Optimising public value is the primary aim of public sector spending. The Better Business Case approach, using the Five Case Model, is the Welsh Government's best practice for planning and cost justifying spending proposals and enabling effective business decisions. The Five Case Model provides the framework and tools to enable effective decision making when scoping and planning spending proposals in a robust and thorough manner and can be used at the strategy level, the programme level and individual project level. The investment proposal for accelerated integration across health and social care in Powys is therefore presented in this format.

The Five Case Model requires consideration of:

1. The **strategic case** – strategic fit and clear investment objectives;
2. The **economic case** – optimising value for money;
3. The **commercial case** – attractiveness to the market and procurement arrangements;
4. The **financial case** – affordability;
5. The **management case** – deliverability and plans for delivery.

Each of these sections will be considered in the following pages, with considerable focus on the strategic case for accelerated integration across health and social care in Powys to aid PTHB Board and PCC Cabinet in determining their decision to proceed with detailed assessment work on accelerated integration.

Whilst the Five Case Model is utilised here, it is important to note that the service user experience and a wish to enhance it are key drivers.

At this stage, the Five Case Model is presented at a high and summary level. Should the Board and Cabinet endorse the proposal to undertake the detailed assessment work a more in-depth case would be brought forward for consideration and decision. This summary therefore also seeks to highlight the aspects of specific and detailed work that would be undertaken.

### **2.1 STRATEGIC CASE**

#### **2.1.1 National**

There are a significant number of key national drivers for integration across health and social care, some of which include legislation, including:

- Social Services and Wellbeing (Wales) Act (2014)
- The Welsh Government Strategy 'Together for Health' (2012)
- The Welsh Government Prudent Healthcare principles (2012)
- The Primary Care Plan (2014)
- Devolution, Democracy and Delivery, Welsh Government (2014)
- The Welsh Government Outcomes Framework (2014)

- Working Differently, Working Together, (Workforce and OD framework that supports Together for Health) (2012)
- Commission on Public Service Governance and Delivery (2014) (Williams Commission)
- Wellbeing of Future Generations Act (2014)
- The Strategy for Older People in Wales; Living Longer, Ageing Well (2013-2023)
- Framework for Delivering Integrated Health and Social Care for Older People with Complex Needs (2014)
- A Decade of Austerity in Wales. The funding pressures facing the NHS in Wales to 2015/26 (June 2014)

*The Commission on Public Service Governance and Delivery* published in January 2014 made specific reference to Powys suggesting closer working and potential merger. *Devolution, Democracy and Delivery* (the Welsh Government response to the Williams Commission report in 2014) agreed with the assessment of the acute geographic and demographic delivery challenges in Powys. WG provided a commitment to work with PTHB and PCC to explore the scope for greater strategic and front line integration between PTHB and PCC; evaluate the possible merger of the two organisations in the longer term. Recently Welsh Government has been supporting conversations regarding integration rather than merger which would add further cost, delay and complexity to integrated service delivery.

The THB works closely with a wide range of stakeholders including local authorities, neighbouring providers and commissioners of health services within Wales and across the border, third sector, the independent sector, other public bodies, academic partners, the Community Health Council, volunteers and not least service users and carers. Working in partnership supports the Health Board and Powys County Council to deliver with partners the six statutory well being goals contained within the Well-Being of Future Generations (Wales) Act:

- A prosperous Wales
- A resilient Wales
- A healthier Wales
- A more equal Wales
- A Wales of cohesive communities
- A Wales of vibrant culture and thriving Welsh Language.

The Act also highlights governance principles that underpin the development of our strategy as a Health Board and Powys County Council with partner bodies:

- Long term thinking – public bodies should seek to consider the likely effect over a 25 year period
- An integrated approach – how well-being objectives impact upon each other and in turn on the objectives of other public bodies
- Preventative action – deploying resources now in order to prevent problems occurring or getting worse
- Collaboration – acting collaboratively with other bodies to assist in the achievements of the objectives of all

- Engagement – involving the people and communities whose well-being is being considered and engaging them and others in finding sustainable solutions.

The Social Services and Wellbeing (Wales) Act 2014, coming into force on 6<sup>th</sup> April 2016, creates a new legislative framework that brings together and modernises the law governing social care and aspects of healthcare in Wales. It aims to improve well-being outcomes for people with care and support needs, through better co-ordination and enhanced partnership working by public authorities. In many respects, the Act shares similarities with the principles of prudent healthcare. The challenge in social care, as in health, is to develop substantial models of service in terms of financial and workforce resources, which help effectively manage demand and are fair for all. Fundamentally, the Act seeks to promote integration across health and social care to the greatest possible extent. The Minister for Health and Social Services recently published the outcome of Regulation 9 (Cooperation and Partnerships) indicating that under the Act Powys would be seen as a region in its own right (as opposed to being placed in the Mid and West Wales region as has been the case over the last 2 years).

### **2.1.2 Local**

Within Powys the key drivers for integration include:

- The themes of the single integrated plan for Powys (2013), the Powys One Plan: Yn Un (2011, 2014-17);
- Powys THB Integrated Medium Three Year Plan 2014-2017;
- PCC medium term financial strategy;
- Hearts and Minds: Together for Mental Health in Powys (2012) – a mental health strategy for Powys
- The Mid-Wales Study (2014);
- Improvements required as set out within the THB's Annual Quality Statement;
- The Demand and Capacity Report commissioned by the Health Board and received in December 2014.
- Director of Social Services report (2014-2015)

The One Powys Plan 2014-17 outlines the strategic priorities for multi-agency working to support and respond to clearly evidence the local needs of communities in Powys. The reduction in funding available and other government policy changes are leading to a fundamental change in methods of commissioning and the delivery of local services. To achieve the vision of "Strong Communities in the Green Heart of Wales" One Powys Plan (2014-2017) is focused on 5 strategic change programmes.

- Integrated Health and Adult Social Care
- Transforming Learning and Skills
- Children, Young People and Families
- Stronger, safer and economically viable communities
- Organisational and Partnership Development.

The Integrated Medium Term Plan sets out the THB's approach to planning and delivery of services for the residents of Powys for the three year period 2015-18. The

plan is designed around the vision set out by the Board to deliver “truly integrated care centred on the needs of the individual” through six inter-related aims:

- Improving Health and Wellbeing;
- Ensuring the Right Access;
- Striving for Excellence;
- Involving the People of Powys;
- Making Every Pound Count;
- Always with our staff.

## **2.2 PTHB Transformation Programme**

Powys Teaching Health Board has established a Transformation Programme; an internal programme to the Health Board, focused on strengthening primary and community health services in Powys to deliver sustainable services which provide value for money for our population and for future generations. The Transformation Programme is being managed through four core programmes and is:

- Developing our strategic delivery model for how future services will be provided;
- Strengthening our commissioning arrangements;
- Developing and reforming current provided services;
- Bringing adult mental health services management arrangements back into Powys to enable greater integration.

Currently, Powys County Council transformational activity is managed and reported through the Powys One Plan arrangements. Two different structures and governance arrangements for transformational activity in PTHB and PCC are in place. The layers of governance therefore require review combined with the requirements set out in part 9 of the Social Services and Wellbeing Act 2014 to ensure readiness for implementation of the act in April 2016, which will be undertaken jointly by PCC and PTHB in the coming weeks. It is expected that the reconstituted Joint Partnership Board will provide oversight and leadership of the integration of health and social care.

### **2.2.1 Strategic Delivery Model Programme**

Discussions regarding the future and development of health services invariably involve social care. The health and care service continuum utilised by service users has multiple interactions, interdependencies and a high proportion of service users in common. The clear steer from PTHB Clinical Reference Group in September 2015 was that the scope of the SDM Programme should be revised to include health and social care. There was support for the stance of the Clinical Reference Group when considered by the SDM Programme Board, which agreed the scope of the SDM programme should be adjusted to: health and care, all age. There are significant opportunities to develop truly integrated approaches across health, social care and housing elements for the longer term.

## **2.3 Existing arrangements in Powys**

The establishment of Powys Health and Adult Social Care Integrated Leadership Board has strengthened the joint working which has already taken place between the

health board and social care for many years. During 2014/15 the multidisciplinary learning disabilities team was further developed: senior practitioners; adult social workers; community nurses; occupational therapists; clinical psychologist; and speech and language therapist are now based under one roof.

PCC is moving towards the business intelligence model. Real time data is available for children's services. Real time enables team managers to readily access and review performance. Heads of Service and senior managers use the information to report on a quarterly basis to elected members.

Social care staff are accommodated in a range buildings across Powys. There are examples of small, stand-alone units but the majority of staff are housed in mixed accommodation alongside local authority colleagues. In Builth Wells, social care staff are able to access the open plan office accommodation alongside community nursing and specialist nurse colleagues. This enables discussion and learning across professions and has been cited as a distinct advantage of the multidisciplinary office accommodation provided in Glan Irfon Health and Social Care centre. An assessment of accommodation issues (including the current approach to property leases/maintenance, locations of staff accommodation and where clients seen, due diligence assessment of property) will need to be undertaken during phase 1.

PCC has an internal system to manage validation of post-holders registered with the Care Council for Wales, which is required every three years. Occupational therapists, registered managers for domiciliary care, registered managers for fostering and adoption also must maintain professional registration, as must all social workers across the workforce in both adult social care and children's services. Residential children's workers have a code of practice to which they must adhere. Within health nurses, therapists (physiotherapists, dieticians, occupational therapists, speech and language therapists, podiatrists, audiologists, radiologists) and medical staff must maintain registration with their relevant professional body, including revalidation as required. Both PTHB and PCC operate internal systems to manage validation and there may be an opportunity to create a single validation system for Powys through integration of health and social care. Professional registration is an area of high importance and will be explored in the detailed phase of work during 2016, and any live professional or regulatory issues will be highlighted at this point.

There is a prescribed, national approach for managing claims against social care. Within the Welsh NHS "Putting Things Right" prescribes the approach required for managing concerns, complaints, and claims. As part of the detailed assessment an understanding will need to be gained of how the two separate, prescribed systems could be managed in parallel.

There are a large number of service and professional policies operated by PTHB and PCC. The implications of a change of management arrangements for social care on these would need to be understood as part of the detailed assessment.

Planning and implementation for the Community Care Information Solution (CCIS) is underway, in advance of launch in June 2017. This system will enable staff to access a single service user record. Data gathered through CCIS will also inform the joint strategic needs assessment.

## **2.4 Experience of integration elsewhere**

*“The world, as we have created it, is a process of our thinking. It cannot be changed without changing our thinking.” Albert Einstein*

Key messages:

- Focus on strong collective vision and patient/citizen outcomes;
- Stability of leadership and constancy of message;
- Work on organisational development – at all levels (noting the Canterbury experiences);
- Some evidence of cost avoidance by better coordination of services and reduction in duplication;
- Evidence that a bottom-up approach leads to pockets of integration led by key innovators/supporters – results in patchy integration;
- In hindsight many areas took too long to integrate – could have gone further and faster.

Effective partnership structures can support the development and rapid implementation of integrated service models drawing on resources and expertise from across the system. The critical ingredients in building a sense of shared accountability across the system include:

- A shared vision and strategy for integrated care;
- A governance structure that makes it clear which organisations are accountable for each aspect of delivery;
- Agreeing system-wide metrics for defining success, and monitoring performance against these regularly.

A key enabler is an emphasis on changes being “from within”. By drawing on the intrinsic motivation of people working in health and social care and tapping into professional pride there is an opportunity to add to the evidence base highlighting the positive relationship between staff engagement and organisational performance.

A desktop review of learning from integrated models elsewhere were found to closely align with the findings of the Barker Commission. Barker identified 10 key characteristics in these organisations:

1. Consistent leadership that embraces common goals and aligns activities throughout the organisation;
2. Quality and system improvement is seen as a core strategy;
3. Significant investment in developing the skills and capacity to support performance improvement;
4. Robust primary care at the centre of the system;
5. Engaging patients in their care and in the design of care;
6. Promoting professional cultures that support teamwork, continuous improvement and patient engagement;

7. More effective integration of care promoting seamless care transitions;
8. Information as a platform for guiding improvement;
9. Effective learning strategies and methods to test and scale up;
10. Providing and enabling environment to buffer short-term factors that undermine success.

The Barker Commission findings are reinforced by those of:

- Cameron, Lark, Bostock and Coomber (2015);
- The Welsh Government realistic evaluation of integrated Health and Social Care (2013);
- Lessons from Total Place (2015);
- Quinton (2015).

### **3.0 ECONOMIC CASE**

The Health Board has an approved three year IMTP (2015/6-2017/8) which sets out the service, workforce and corresponding financial consequences for the period. The plan assumes significant levels of transformation and efficiency in delivery of services in order to live within the allocation levels assumed from Welsh Government. In doing so, the health board has set a savings programme of £15.5m over the 3 year period (2% per year) in order to stand still. There is no scope built into the plan for the management of additional services with financial burdens, to do so would need to be self financing (through funding and other deliverable efficiency measures) in order to ensure continued financial viability of the health board.

The Council is now in a strategic financial planning situation that sees year on year reductions in its funding as part of the UK Government's fiscal management approach. This is further compounded by a reduction in its population and an increase in demand from areas such as Adult Services. Whilst the funding reductions affect all local government in Wales it is particularly challenging for Powys coming against a background of having the worst average Welsh local government settlements over the last 9 years. The council's response is to look at alternative models of service delivery and at the same time refresh its financial plan to deliver savings of 20% across services over the next 3 years. The policy has been adjusted to provide an element of protection to Adult Services in 2016/17 by not seeking savings from the service but it will have to meet its own pressures such as inflation and demand for services.

PCC Cabinet expects adult social services to make a contribution to organisational savings. In the current year there is a cost reduction programme in place which seeks to reduce costs by £1.7m within adult social care. In 2016/17 the adult social services budget will be frozen. In the subsequent 2 years a saving of 5% per year is required. These savings target for adult social services are significantly lower than in other PCC service areas but do not take account of funding for cost pressures which, on the basis of new requirements; demographic growth; and complexity of care, increase the savings required to 27% over the next three years (from 2015/16).

Learning from experience elsewhere, it is evident that integration can have a significant impact on stemming demand for services:

- In South Warwickshire Discharge to Access was associated with a 33% reduction in length of stay, a 15% drop in new admissions to nursing homes post-discharge, and a 15% drop in mortality;
- The Canterbury health system can claim it saved patients more than a million days of waiting for treatment in just four clinical areas. Fewer people are entering care homes as more are supported in the community. A rising curve of demand for residential care has been flattened. Better, quicker care, with more of it provided without the need for a hospital visit, is being delivered. A health system that in 2007 was almost NZ\$17m in deficit on a turnover of just under \$1.2bn was in 2010/11 on track to make an \$8m surplus;
- The Canterbury case study makes a strong case that without the drive since 2007 to transform the way health and social care systems function the main hospital would have required many more beds and much larger capital investment to meet future demand;
- Experience in South Lanarkshire demonstrates integrated care limits growth rather than taking costs out;
- The King's Fund cite how the demand curve for services can be flattened through integration.

A detailed assessment of the potential economic impact of accelerated integration across health and social care is required as part of phase 1.

Based on an enhanced understanding of the economic impact of integration a detailed option appraisal will be undertaken which will enable PTHB Board and PCC Cabinet to determine the most suitable option for delivering integration across health and social care in Powys.

#### **4.0 MANAGEMENT CASE**

The Kings Fund cite how bottom-up integration can be slow and patchy – it is suggested that a more ambitious approach would be suitable. The constancy of senior leadership and course is deemed important but collective leadership at multiple levels is critical. Evidence suggests that professional, organisational and financial silos hamper progress. Integration takes time but there is potential to speed up. Organisational restructuring is considered a risk. Staff engagement and building on the workforce's intrinsic motivation is a key enabler.

In Sheffield, the Right First Time programme provided a highly effective platform for partnership working across the city, including health and social care. The strength of this relationship is supported by the fact that the partner organisations involved all cover the same geography, and the by the stability of leadership and high-level relationships in the city.

A further consideration is whether integration of health and social care takes place with services in their current format or whether an agreed level of service transformation takes place first. Whilst the detailed assessment is undertaken, PCC

has a duty to continue to deliver services and a level of service improvement and incremental change can be expected in doing so. Detailed transformational change plans have been developed by Powys County Council and implementation is ongoing. PTHB and PCC will wish to determine at the earliest opportunity during this detailed assessment a strategic approach to transformational change.

An initial review of potential benefits highlight the key benefits of integration across health and social care being:

- Seamless service user care;
- Value for money;
- Stemming growth;
- Joined up approach welcomed by staff and the people of Powys.

Key risks highlighted during an initial review include:

- Service user impact if integration does not go well;
- Need for regulatory framework and national performance requirements to catch up with integrated approach (e.g. capital, performance management of both health and social care) – how will the national interface be managed?;
- Delivery of the integration agenda will consume considerable resource, hence becoming a significant distraction to core delivery during transition;
- Assurance will be required that PCC will remain an entity beyond accelerated integration of health and social care, otherwise the benefits of integration will be outweighed by the detrimental effects of a loss of terminosity;
- Service user safety must be protected at all times through integration of services;
- Potential nervousness amongst current providers of services to PTHB and PCC regarding integration;
- Ability of the organisations to manage a complex picture – change of management arrangements for adult mental health NHS staff and local integration already underway in local integration teams alongside accelerated integration. How will organisations maximise opportunities for learning?
- Assurance will be required that both organisations will remain beyond accelerated integration of health and social care, otherwise the benefits of integration will be outweighed by the detrimental effects of a loss of terminosity. The people of Powys need organisations dedicated to the county and who can effectively manage the cross-border issues that arise from the country's geographical location.

It is argued that there is a need for both PTHB and PCC to manage more risk than is customary in order to the benefits of integration to be realised. Risks must be reasoned and clear. Key benefits and risks of accelerated integration of health and social care will be further developed during the next phase of detailed work.

## **5.0 COMMERCIAL CASE**

The commercial case for change will be looked into as part of the detailed assessment. Areas requiring exploration and confirmation include risk sharing agreements; the legal relationship between organisations; and mechanisms for contractual management.

Elsewhere, the use of shared metrics as a way of assessing whole-system performance is a key feature of partnership working in the two areas covered by Northumbria Healthcare Foundation Trust – Northumberland and North Tyneside. In addition to 18 metrics used internally within the acute trust for measuring integrated care, eight system-wide metrics have been agreed for use across the two areas. Progress against these metrics is monitored in each area through bi-monthly integration board meetings involving commissioners, NHS providers and social care management.

Airedale also provides an examples of well-developed governance arrangements for partnership working. All local partners, including NHS organisations and the local authority, have signed up to a five-year Right Care strategy, which emphasises overcoming organisational boundaries, a more proactive approach to care, a focus on health and wellbeing as well as illness and supporting more people at home.

### **6.0 FINANCIAL CASE**

The financial case for change developed during the detailed assessment will include:

- A description of the capital and revenue consequences of integration across health and social care;
- Identification of sources of funding and future trends in incomes/funding;
- Income and expenditure will be identified;
- Balance sheet treatment will be determined;
- Practicalities including income arrangements and authorised signatory lists/policy described;
- Future demand based upon demand modelling already undertaken.

Differences in NHS and local authority allocations (NHS 3 years, local authority 1 year) will need to be worked through and agreement reached as to how it will be managed moving forward.

Learning from Consolidated Learning from Wales stresses the importance of “one system, one budget” providing important rhetorical support for thinking and acting differently when the starting point was overlapping systems and multiple budgets.

### **7.0 RESOURCES AND APPROACH TO PHASE 1**

#### **7.1 Programme Management arrangements**

It is proposed that all further work exploring the feasibility and detail of accelerated integration is taken forward under separate programme management arrangements. The interdependencies between the SDM programme and accelerated integration programme are evident and will need to be managed carefully. Particular attention will need to be paid to ensuring clarity of staff, stakeholder, service user and Powys population understanding of:

- The case for change in public services in Powys;
- The potential benefits of accelerated integration across health and social care;

- The logic behind investing in two parallel programmes to achieve this (SDM and accelerated integration), as well as other transformational and service improvement activity.

The programme would be managed in line with the joint programme management methodology adopted by PTHB and PCC, which is rooted in best practice and aims to provide consistency of approach across both organisations. By adhering to the joint methodology programme roles, responsibilities, requirements and outputs should be clear and readily understood across PTHB and PCC. A robust oversight mechanism, via Joint Partnership Board, will need to be agreed in order to provide PTHB Board and PCC Cabinet with assurance as to the status and progress of this high profile and wide-ranging programme.

In order to deliver integrated health and social care in the current state (with development of service model post change) it is suggested that an experienced Transformation/Programme Director, reporting to the CEOs of PTHB and PCC, and appropriate programme infrastructure would be secured. In light of the statutory responsibilities of the Director of Social Services there will be a requirement to establish a close working connection. The Transformation/Programme Director would provide leadership to this work across PTHB and PCC. In order to ensure the right calibre of applicant is attracted to the post, it is suggested that the position should be offered on a substantive basis. The post holder would be able to support joint approaches to working across PTHB and PCC beyond integration of health and social care and co-ordinate the new model of delivery for health and social care.

A table showing resource requirements is provided in section 7.2.

Back fill arrangements would be required for current employees designated to the service lead and administrative roles. Further support would need to be made available from colleagues across PTHB and PCC as required, and this more difficult to quantify.

Under the leadership of a Programme Director, work streams could be established focussed on the following areas:

- Leadership and Governance (including service improvement/transformation);
- Workforce and Organisational Development (WOD);
- Quality and Safety;
- Information and ICT;
- Finance.

Each of these work streams are described in more detail in the following pages.

### **7.1.1 Leadership and governance**

Structures and governance accountabilities will be an area for particular attention. It is essential that the relationship between PTHB and PCC and the accountability for delivery is clear and well understood. Linked to this, the statutory and performance reporting requirements will need to be understood.

Change on the scale described in this paper would result in a considerable learning and development need to be addressed within both PTHB and PCC. Steps have already been taken to ensure mechanisms are in place to facilitate a joined up approach including the established Joint Management Team and changes to the terms of reference of the Joint Partnership Board.

Change management rules and requirements which would take precedence should integration across health and social care take place will need to be thoroughly understood and adhered to. This may require the input and advice of Powys Community Health Council, legal services and others.

In considering the change management requirements associated with integration across health and social care the work stream will also determine requirements for engaging with stakeholders (including staff, service users, stakeholder organisations and the people of Powys) and ensure robust arrangements are in place to facilitate regular and timely two-way communication. A communications and engagement plan will be developed which will describe the approach to be used and detailed activity.

It is highly likely that both PTHB and PCC will require external and legal advice throughout the process. At this stage, this is difficult to quantify and may be dependent on final agreement of the scope of services to be integrated.

The programme team will also wish to define the preferred approach to integration. Considerations could include a stage plan approach to integration to alleviate risk associated with wholesale integration approach. This would also minimise risks to service users during transition, enable lessons to be learned and then scaling up to take place.

An Equality Impact Assessment will be required in the detailed phase of work, and ongoing monitoring of impact beyond integration. This is to ensure no section of the community are disadvantaged, in accordance with the Equality Act 2010, section 149.

Current operational management structures would need to be reviewed in order to determine the most suitable arrangements for integrated health and social care (this will also be dependent on agreement of scope of services included in the changed arrangements). There may be workforce and human resource challenges in this regard which may result in potentially significant changes.

Integrated services cannot be delivered in addition to business as usual without additional resourcing or agreement to areas of work that can be suspended. Current areas of executive attention and leadership will need to be considered carefully when evaluating reprioritisation to enable discussion on integration. There is a significant risk of reputational damage to both organisations if integration is not smooth and successful.

The statutory Director of Social Services will need to ensure the requirements of Part 8 of the Social Care and Wellbeing Act are complied with to ensure accountability

and legal compliance. The Director of Social Services undertakes the role of Senior Information Risk Officer within PCC. The Director of Social Services is required to compile an annual Director's report which provides an evaluation of the effectiveness of the delivery of social services including progress on the previously agreed improvement priorities along with future improvement priorities whilst describing national, regional and local context in support of this and an evaluation of activity is undertaken.

### **7.1.2 Expert reference group**

An external expert reference panel would be convened under the leadership governance work stream of the programme. The panel would draw together individuals representing key organisations that would interact with integrated services. Mechanisms for accessing panel members will be determined during the detailed phase of work, but could involve an initial face-to-face meeting and thereafter either videoconference or email discussions. A small allowance for costs to host an initial meeting are included in the resource section. Proposed panel members are:

- Helen Howson, Bevan Innovators;
- Robin Miller, University of Birmingham;
- Imelda Richardson, Care Services Standards Inspectorate Wales;
- Rhian Huw-Williams, Care Council for Wales;
- Wales Audit Office representative;
- The Association of Directors of Social Services Cymru.

Key roles such as Director of Primary and Community Care & Strategic Director of People along with senior manager colleagues, will be required to prioritise integration in order to facilitate a smooth transition. Backfill arrangements to enable this to occur need to be carefully considered.

The Bevan Commission has recognised the need to strengthen innovation and leadership within NHS Wales to respond to the growing demands and challenges we face in responding to these. We require different solutions, not more of the same to sustain NHS Wales in meeting the needs of local people. The Commission believes that to help us address this we must adopt a more innovative and prudent approach to healthcare, making the most of all the skills and resources we have available to us, including those of the public, patients and the third sector. Encouraging and nurturing everyone to be involved; those employed in the system as well as those using the services will be essential.

The Bevan Commission Innovators aims to help Health Boards and Trusts achieve this by identifying and capturing the enthusiasm and the passion of 'early innovators' at all levels within the NHS and in local communities. The Innovators will help to capture the passion, energy and enthusiasm that people feel for their NHS in Wales, highlighting and sharing new ways of working, whilst creating a wider social movement for change that is owned and valued by everyone. The Innovators will become agents for change within and across systems.

The Bevan Academy, a national innovation hub hosted by Swansea University aims to encourage and motivate innovative collaboration, including the Bevan Innovators,

across Wales. It will use different expertise from a range of organisations to help test out and drive new ways of thinking and prudent working in practice. The Academy will form a Hub of Hubs, building upon and bringing together existing local and regional expertise through a network of specialist Bevan Innovation Hubs across Wales. These will ensure that the intellectual, professional and practical skills available are used to best effect to support and inform better health and social care in Wales and transformative innovation. Health Boards and Trusts will be asked to consider an area in which they have a particular expertise or interest to lead and drive change sharing with others to help ensure more sustainable solutions to support better health and social care. We believe that Powys Health Board working with Powys County Council together and with other partners would be well placed to lead and drive a Bevan Innovation Hub on Integrated Care.

### **7.1.3 Workforce and Organisational Development (WOD)**

Ensuring the workforce and organisational development factors associated with integration of health and social care are fully understood during the detailed assessment will be key to success.

There will be a requirement to identify the preferred model of employment and cost implications of change. Depending on the option selected it may be necessary to harmonise pay and conditions. This will need to be understood in the detailed phase of work. Workforce planning to suit the needs of the service model will need to be undertaken. Back office requirements (workforce systems, training delivery etc.) will need to be determined. The corporate services impact on both organisations will need to be fully understood and elements associated with social care disentangled from wider organisational functions to also change management arrangements.

There will be a requirement to ensure staff are fully engaged with and supported through the integration of health and social care. This will involve developing and resourcing a staff engagement plan, managing and developing trade union relationships and implementing the mechanism for changing management arrangements.

Beyond integration there is a further risk with regard to the differing cultures in the organisations and significant organisational development resource would be required to overcome. Learning from Canterbury (New Zealand), Jonkoping County (Sweden) and Intermountain Healthcare (USA) Barker (2008) emphasises the importance of strengthening capacity and capability through the development of the workforce. To support this, long term commitments to training and development brought impressive results.

### **7.1.4 Quality and Safety**

Ensuring continued delivery of high quality and safe services will be a primary concern for all involved in the integration of health and social services in Powys. A service due diligence exercise will be required which will include any outstanding legal cases, transference of contracts/legal agreements, development of a legacy statement and service risk management.

Also under the quality and safety work stream will be the requirement to ensure suitable and robust service user experience and incident reporting mechanisms are in place to manage integrated health and social care services.

**7.1.5 Information and ICT**

The existing joint ICT department, highlighted earlier in this paper, is a good starting point for understanding the potential impact of integration across health and social care, although PTHB and PCC will wish to determine any additional resource requirements in order to undertake the detailed assessment and potentially implement change.

**7.1.6 Finance**

Dedicated finance resource will be required to fully understand social care systems and requirements and inform the detailed assessment. The detailed assessment will inform the resource required for implementation.

The scope of integrated services will determine the level of funding to be provided for delivery of services. In order to gain a detailed understanding and assurance of sufficient finances it is suggested that, during the detailed phase of work, advisors are appointed with an understanding of social care, who could act as an intermediary between PTHB and PCC and ensure the best interests of both organisations are protected. It is thought that a level of independence in assessing finances undertaking a due diligence process would be of benefit.

An explicit agreement regarding financial arrangements is required from the outset. The due diligence process will test service demand/cost trends against indicative allocation.

**7.2 Summary of resource requirements**

A table summarising the anticipated minimum resource requirements for the detailed phase of work is provided below:

Work stream	Role	Indicative banding (NHS Agenda for Change)	Cost (mid point of pay scale plus on-costs)	Phase		
				1	2	3
Leadership and Governance/ Programme resourcing	Transformation/Programme Director	NHS Very Senior Manager	£156,000	1	1	0.5
	Administrative Support	Band 4	£25,582	1	1	0.5
	PTHB Service Lead	Band 8B	£66,462	1	1	1
	PCC Service Lead Older People's Integration	SM1	£73,112	1	1	1
	PCC Service Lead	SM1	£73,112	1	1	1

## Appendix 1

	LD and Mental Health					
	Policy Officer	Band 7	£92,638	2	2	0
	Business Process/Pathway Engineering	Band 7	£46,319	1	1	0
	Consultation and Communication Officer	Band 7	£46,319	1	1	0
	Programme Manager	Band 8A	£55,579	1	1	0.5
	Backfill for Locality and Directorate team members	tbc	tbc			
Workforce and Organisational Development	Programme Workforce Lead	Band 8A	£55,579	1	1	1
Quality and Safety	Programme Q&S lead	Band 8A	£55,579	1	1	0.5
Information and ICT	Tbc	tbc	tbc			
Finance	Programme Finance Lead	Band 8A	£55,579	1	1	0.5

It should be noted that this is an early indication, and will require further refinement. Additional non-programme resources may also be required in terms of colleague time and expertise from across PTHB and PCC. There is a need to ensure delivery of integration of health and social care without negatively impacting on other areas of organisational performance and service delivery through adequate programme resourcing.

If this work progresses and is a strategic priority, there will be a need to understand the impact of re-prioritising work load.

### 7.3 Resourcing and timescales

Indicative resourcing and timescales for the work are:

Phase of Work	Timescale	Staff Resources
Rationale for accelerated integration presented to PTHB Board and PCC Cabinet	December 2015	Existing PMO resource
Full analysis of options, including due diligence (Phase 1)	January 2016 – September 2016	£467,751.67
Prepare to Implement (Phase 2)	September 2016 – March 2017	£400,930.00
Implementation and Embedding (Phase 3)	April 2017 – March 2018	£442,424.50
	Total:	£1,311,106.17

Other non-pay costs:

<b>Description</b>	<b>Activity</b>	<b>Estimated costs</b>
External Expert Reference Panel	Initial meeting to be followed by virtual meetings	£5000.00
Support costs	Venue hire, travel	£2000.00
External Finance Support	Due Diligence	£50,000.00
External support	Due diligence testing	£50,000.00
Audit charges	Auditing process	£50,000.00
Legal advice	Detail regarding fee charging, Mental Health Act and other areas	£50,000.00
Engagement and consultation	Engagement and consultation regarding integration and subsequent adjustments to pathways etc.	£100,000.00
External support	Additional specific areas of work	£100,000.00

It is anticipated that resourcing will be made available by the Welsh Government to support accelerated integration of health and social care in Powys.

## **8.0 Conclusion**

The strategic case for change in the way in which health and social care is delivered in Powys is compelling. Local and national drivers create a suitable external environment for accelerated integration across health and social care. There are issues and challenges identified through the Five Case Model approach that require further exploration, in the form of a detailed assessment, to facilitate the integration of health and social care in Powys.

Matters such as organisational governance, agreement of accountabilities and finance need to be progressively addressed as the current small scale integration spreads. PTHB and PCC have an opportunity to capitalise on the opportunity to accelerate integration and become pathfinders in Wales for truly integrated services.
