### AGENDA

<b>1.</b>	<b>APOLOGIES</b>	<b>C250- 2015</b>
-----------	------------------	-------------------

To receive apologies for absence.

<b>2.</b>	<b>DECLARATIONS OF INTEREST</b>	<b>C251- 2015</b>
-----------	---------------------------------	-------------------

To receive any declarations of interest from Members relating to items to be considered on the agenda.

<b>3.</b>	<b>NANTMEL CHURCH IN WALES SCHOOL</b>	<b>C252- 2015</b>
-----------	---------------------------------------	-------------------

To consider a report by County Councillor Arwel Jones, Portfolio Holder for Education.

(Pages 3 - 32)

<b>4.</b>	<b>POWYS LOCAL DEVELOPMENT PLAN</b>	<b>C253- 2015</b>
-----------	-------------------------------------	-------------------

To consider a report by County Councillor Avril York, Portfolio Holder for Regeneration and Planning.

(Pages 33 - 1614)

<b>5.</b>	<b>BUDGET TIMETABLE UPDATE AND SPENDING REVIEW SUMMARY</b>	<b>C254- 2015</b>
-----------	--	-------------------

To consider a report by County Councillor Wynne Jones, Portfolio Holder for Finance.

(Pages 1615 - 1620)

<b>6.</b>	<b>FINANCIAL OVERVIEW AND FORECAST AS AT 31 OCTOBER 2015</b>	<b>C255- 2015</b>
-----------	--	-------------------

To consider a report by County Councillor Wynne Jones, Portfolio Holder for Finance.

(Pages 1621 - 1654)

<b>7.</b>	<b>WELSH MEDIUM STREAM AT YSGOL DOLAFON</b>	<b>C256- 2015</b>
-----------	---	-------------------

To consider a report by County Councillor Arwel Jones, Portfolio Holder for Education.

(Pages 1655 - 1688)

<b>8.</b>	<b>CRICKHOWELL SPECIALIST CENTRE</b>	<b>C257- 2015</b>
-----------	--------------------------------------	-------------------

To consider a report by County Councillor Arwel Jones, Portfolio Holder for Education.

(Pages 1689 - 1722)

<b>9.</b>	<b>SCHOOLS REORGANISATION POLICY 2015</b>	<b>C258- 2015</b>
-----------	---	-------------------

To consider a report by County Councillor Arwel Jones, Portfolio Holder for Education.

(Pages 1723 - 1810)

<b>10.</b>	<b>INVESTMENT PROPOSAL TO TAKE FORWARD INTEGRATION AT PACE</b>	<b>C259- 2015</b>
------------	--	-------------------

To consider a report by the Leader and by County Councillor Stephen Hayes, Portfolio Holder for Adult Social Care.

(Pages 1811 - 1844)

<b>11.</b>	<b>CORRESPONDENCE</b>	<b>C260- 2015</b>
------------	-----------------------	-------------------

To consider such correspondence as in the opinion of the Leader is of such urgency as to warrant consideration.

# C252- 2015

## CYNGOR SIR POWYS COUNTY COUNCIL.

### CABINET EXECUTIVE 15<sup>th</sup> December 2015

**REPORT AUTHOR:** County Councillor Arwel Jones  
Portfolio Holder for Education

**SUBJECT:** Nantmel C. in W. School

---

**REPORT FOR:** Decision

---

#### **Summary**

This report recommends the commencement of formal consultation on the closure of Nantmel C. in W. School from the 31<sup>st</sup> December 2016, with Rhayader C. in W. School to be named as the receiving school.

The report is supported by the following appendices:

- Appendix A – Data sheet for Nantmel C. in W. School
- Appendix B – Draft Equality Impact Assessment
- Appendix C – Draft Community Impact Assessment
- Appendix D – Financial Assessment

#### **Background**

On the 11<sup>th</sup> November 2014, Cabinet approved a new Powys School Transformation Policy, which set out the Council's vision and process for the transformation of primary and secondary schools in the county.

The Policy includes:

- a range of criteria to be used to determine which schools would be reviewed
- the establishment of a School Organisation Review Panel (SORP) to carry out reviews of schools
- the establishment of a School Review Process to be used to review schools

In December 2014, the SORP carried out an Initial Assessment of Schools in accordance with Stage 1 of the School Review Process, during which data for all schools was considered. Schools were also ranked against the criteria outlined in the School Transformation Policy. As a result of this Initial

Assessment of Schools, SORP agreed to carry out a detailed review of a number of schools, which included Nantmel C. in W. School.

Nantmel C. in W. School met the following criteria:

- Pupil Numbers: The school has had fewer than 50 pupils on roll for the three previous years
- Capacity: The percentage of surplus places in the school is higher than 15%
- Building Condition: The overall building condition is categorised as category D or C based on the Welsh Government's assessment of building condition
- Financial: The cost per pupil is more than 120% of the council's average for the sector

Dialogue has taken place with the governing body, acting headteacher, local member and diocesan representative during 2015 in accordance with Stage 2 of the School Review Process as described in the School Transformation Policy. This has included:

- An initial meeting to agree data in respect of the school and to discuss future options relating to the school
- An opportunity for the governing body to provide feedback on the options presented to them
- A SORP meeting to agree a draft recommendation in respect of the school
- A further meeting to discuss the draft recommendation to be considered by Cabinet and to give the governing body a further opportunity to present additional evidence.

In the feedback received from the Governing Body of Nantmel C. in W. School, the Governing Body stated that their preferred option was federation with Rhayader C. in W. School. However, following consideration of the data agreed with the school (attached as Appendix A) and the feedback received from the Governing Body, the SORP's view is that federation would not address the issues listed above relating to pupil numbers, capacity and cost per pupil. Therefore, the SORP's draft recommendation in respect of Nantmel C. in W. School is closure of the school from the 31<sup>st</sup> December 2016.

In accordance with the School Transformation Policy, Cabinet is required to consider draft impact assessments assessing equality issues and impact on the community when deciding whether or not to approve the SORP's draft recommendation. Draft impact assessment documents are attached as Appendix B and Appendix C.

### **Proposal**

- i) That Cabinet receive the SORP's draft recommendation in respect of Nantmel C. in W. School, which is as follows:

Closure of Nantmel C. in W. School from the 31<sup>st</sup> December 2016.  
Rhayader C. in W. School to be named as the receiving school.

- ii) That Cabinet approves the commencement of formal consultation in accordance with the School Organisation Code in respect of the closure of Nantmel C. in W. School from the 31<sup>st</sup> December 2016.

A financial analysis of the draft recommendation has been carried out, details of which are attached as Appendix D. It is estimated that implementation of this draft recommendation would lead to annual savings of £69,033.

### **One Powys Plan**

‘Transforming Learning and Skills’ is a key priority within the One Powys Plan, and the Authority’s aim is to ensure that ‘all children and young people are supported to achieve their potential’. The plan states that the Authority needs to ‘reorganise schools (primary, secondary and post 16) to ensure affordability, sustainability and appropriate leadership capacity’.

### **Options Considered/Available**

The SORP discussed a number of possible options with the Governing Body of Nantmel C. in W. School. These are outlined below, as well as an analysis of the Advantages and Disadvantages of each.

- i) **Status Quo**

Advantages	Disadvantages
No additional transport or travel required	Pupil numbers would continue to be below 50
Maintains provision in Nantmel	Surplus places would continue to be above the Authority’s accepted threshold
Maintains community facilities in Nantmel	Cost per pupil would continue to be significantly more than 120% of the Council’s average for primary schools
	Potentially difficult to recruit a permanent headteacher

- ii) **Closure of Nantmel C. in W. School and site**

Advantages	Disadvantages
------------	---------------

Would address the issue of low pupil numbers	Additional travel for those pupils for whom Nantmel C. in W. School is currently the closest school
Would reduce the Authority's overall surplus capacity in primary school	Loss of provision from Nantmel
Would address the issue around cost per pupil	Loss of community facilities in Nantmel
Permanent leadership arrangements in place in proposed receiving school	

iii) **Closure of Nantmel C. in W. School, but keep the site open as part of another school**

<b>Advantages</b>	<b>Disadvantages</b>
No additional transport or travel required	Pupil numbers on the Nantmel site would continue to be below 50
Maintains provision in Nantmel	Surplus places would continue to be above the Authority's accepted threshold
Maintains community facilities in Nantmel	
Permanent leadership arrangements in place in alternative school	Under the current funding arrangements, current pupil numbers on the Nantmel site would not attract sufficient funding to maintain 2 classes, therefore the site would need to be subsidised by the other school
Increased opportunities for networking and sharing good practice between staff	More difficult to run a school on two sites
	Nantmel C. in W. School would lose its own identity

iv) **Federation of Nantmel C. in W. School and Rhayader C. in W. School**

<b>Advantages</b>	<b>Disadvantages</b>
No additional transport or travel required	Pupil numbers in Nantmel C. in W. School would continue to be below 50
Maintains provision in Nantmel	

Maintains community facilities in Nantmel	Surplus places would continue to be above the Authority's accepted threshold
Permanent leadership arrangements in place in alternative school	Cost per pupil would continue to be significantly more than 120% of the Council's average for primary schools
Increased opportunities for networking and sharing good practice between staff	Rhayader C. in W. School would lose some control over their own school through the establishment of a joint Governing Body
Both schools would retain their own identity	

v) **Amalgamation of Nantmel C. in W. School and another school to create a new school on two sites**

<b>Advantages</b>	<b>Disadvantages</b>
No additional transport or travel required	Pupil numbers on the Nantmel site would continue to be below 50
Maintains provision in Nantmel	Surplus places would continue to be above the Authority's accepted threshold
Maintains community facilities in Nantmel	
Increased opportunities for networking and sharing good practice between staff	Under the current funding arrangements, current pupil numbers on the Nantmel site would not attract sufficient funding to maintain 2 classes, therefore the site would need to be subsidised by the other site. If the other site also had less than 50 pupils, this model would be unviable
	More difficult to run a school on two sites
	Both schools would lose their own identities

**Preferred Choice and Reasons**

Following consideration of each of the options and the feedback received from the Governing Body of Nantmel C. in W. School, the SORP's view is that option (ii), closure of the school, is the most suitable way forward.

### **Sustainability and Environmental Issues/Equalities/Crime and Disorder,/Welsh Language/Other Policies etc**

A draft Equality Impact Assessment has been produced and is attached as Appendix B. In addition, a draft Community Impact Assessment has been produced, and is attached as Appendix C.

The impact assessments will be updated following any formal consultation period to include qualitative information based on the responses received to the consultation.

### **Children and Young People's Impact Statement - Safeguarding and Wellbeing**

The authority's Schools Transformation Programme is intended to improve educational outcomes for children and young people. This aligns with the aspiration to improve safeguarding and well-being for children and young people.

### **Local Member(s)**

The following comments were received from local members:

Cllr D. O. Evans

"I am very much opposed to the draft recommendation to approve the commencement of formal consultation on the closure of the Nantmel Church in Wales School. Nantmel School is an award winning school and has enjoyed the reputation for being one of the most successful schools in Powys providing an excellent standard of education for its pupils. The draft recommendation is also opposed by the School Governors who are proud of the excellent educational and personal achievements of its pupils down through the years and whose paramount priority is to ensure that education continues on the Nantmel School site. The school is the heartbeat and focus of Community life in Nantmel, it binds the Community together and is very precious to everyone.

It is hugely disappointing that the basis for the whole report is NOT to address issues of a failing school; Nantmel has an excellent teaching history extending over 150 years. Rather it appears to simply be a cost saving exercise for the local authority with little attention paid to the wider impact and costs (socially as well as financially) which will fall to the to the community in terms of access to/availability of after school clubs, holiday clubs as well as the loss of the only public building in Nantmel for community events, social gatherings and so on.

At a recent meeting the Head of Schools Service, Mr Ian Roberts, stated that he had no concerns whatsoever over the standards of teaching and learning at Nantmel School and the last ESTYN report was good highlighting no important shortcomings and the ERW monitoring reports are also good. The Governors consider it a matter of great regret that the quality of education of the pupils has been considered irrelevant to the SORP's consideration. It is interesting and important to note that following a whole-day Core Visit 1 on the 6th November the challenge advisor has made the indicative assessment that the school should be moved up from amber to yellow.

I also have considerable doubts that the financial savings predicted by SORP if Nantmel School were to be closed can be achieved. Over recent months we have been provided with numerous statistics relating to the school and each time they have produced completely different results and predictions.

This gives me little confidence in their assessments. To continually dwell on the cost per pupil being above average is misleading. To arrive at an average cost per pupil you will necessarily have schools that cost less and schools that will cost more. It is obvious that providing school services in rural parts of Powys is greater than the urban parts of Powys - that is a fact of life that we in Powys deal with every day. Is every school with an above average cost per pupil at risk of closure?

Powys County Council's draft recommendation is also opposed by the parents, the Church in Wales, Nantmel Community Council, Chris Davies our member of Parliament, Kirsty Williams our member of the Welsh Assembly, the wider community who use the school for a plethora of community and social events and most importantly the pupils of Nantmel School whose welfare appears to have scant weight in the report evidenced by the fact that there are other viable alternative options to closure which are not being pursued by the Council.

Nantmel School is perfectly able and competent to operate as a stand-alone school but if there has to be a change in status then the Governing Body's

preferred option is Federation with Rhayader Church in Wales School.

Federation has been and is being adopted successfully in a number of Powys schools and this option as detailed at item 'iv' of the Portfolio Holder's report should at the very least should be given equal consideration at Nantmel with further investigative work undertaken by the Council. I am simply unable to agree to the closure of Nantmel School without being fully convinced that the Governors' preferred option of Federation is not viable.

I really do find it hard to believe that the Powys Schools Service are willing to pursue the closure of a first class rural school with an outstanding record of achievement and over 150 years of history of providing excellent teaching and education located in a well used and valuable Community Hub (the only one in fact). The impact would be devastating and so unnecessary especially given the small savings anticipated to be made. It would be displaying a disregard for the wishes and requirements of all those who live in the area and indeed of all those living in many similar rural Communities throughout Powys.

The well being of the pupils appears to be of secondary importance to SORP because the premise of the report and the draft proposal to close the school is being considered wholly on a financial basis. This is sad indeed and in any event any meagre savings predicted would not even pay the salary of a single one of the more senior officers we employ at Powys County Council.

As County Councillors we are the servants of the people of Powys and we need to treat them as equal partners. We need to listen and find out what matters to them and not necessarily to us. We must remember that it is our duty as County Councillors to do our very best to improve the conditions and facilities of those we represent. We must strive at all times to achieve the outcomes that the people are looking for and not what we as Councillors are looking for. I hope I can rely on all Cabinet members to support me in rejecting the proposal to close Nantmel School."

### **Other Front Line Services**

N/A

### **Support Services (Legal, Finance, Corporate Property, HR, ICT, Business Services)**

Legal: Legal advice has been sought throughout the SORP process in respect of Nantmel C. in W. School

Finance: "The Finance Business Partner for Schools confirms the estimated savings in the report, but notes that figures do not include an estimate of any redundancy costs at this stage."

HR: The Schools' HR Team continues to work closely with the Schools' Service with the aim of providing timely advice and support regarding any HR processes which may be required as a result of the proposal detailed in this report.

### **Local Service Board/Partnerships/Stakeholders etc**

N/A

### **Corporate Communications**

Communications Comment: 'The report is of public interest and requires a proactive news release and use of social media to publicise the recommendation.'

### **Statutory Officers**

The Strategic Director Resources (S151 Officer) notes the comments made by finance and notes that funding is in place to meet any redundancy costs.

The Solicitor to the Council ( Monitoring Officer) has commented as follows: " I note the legal comment and have nothing to add to the report."

### **Members' Interests**

The Monitoring Officer is not aware of any specific interests that may arise in relation to this report. If Members have an interest they should declare it at the start of the meeting and complete the relevant notification form.

<b>Recommendation:</b>	<b>Reason for Recommendation:</b>
<ol style="list-style-type: none"> <li>1. To receive the SORP's draft recommendation in respect of Nantmel C. in W. School.</li> <li>2. To approve the commencement of formal consultation with stakeholders in accordance with the School Organisation Code on the closure of Nantmel C. in W. School, with Rhayader C. in W. School to be named as the receiving school.</li> </ol>	To ensure future sustainability of primary education.

CABINET REPORT TEMPLATE VERSION 3

## Appendix A – Data sheet for Nantmel C. in W. School

The following data was discussed and agreed with the Governing Body of Nantmel C. in W. School during the School Organisation Review Panel (SORP)'s discussions with them in accordance with the School Transformation Policy 2014.

### i) Current and Historical Pupil Numbers

The total number of pupils in the school over the last 5 years is provided in the following table. This information is taken from the annual PLASC return, and includes all children recorded on the PLASC counting date, including nursery and three-year old children.

School	January 2015	January 2014	January 2013	January 2012	January 2011	January 2010
Nantmel	33	26	31	38	39	51

### ii) Projected Pupil Numbers (Excluding Nursery)

School	January 2016	January 2017	January 2018	January 2019	January 2020
Nantmel	29	29	30	30	30

### iii) Current Capacity

School	Total number of places	Number of surplus places (Jan 2015)	Total surplus capacity (Jan 2015)
Nantmel	62	30	48%

### iv) Building Condition

School	Condition	Suitability	Sustainability
Nantmel	C	C	C

A recent visit from an officer from property services has confirmed the above condition assessment, however if some minor DDA works was undertaken and aged windows replaced with double glazed units, the school would then be graded as a condition B school.

### v) Financial Information

School	School's Budget Share 2015-16	Funding per pupil 2015-16	Powys average funding per pupil 2015-16
Nantmel	£162,573	£4,926	£3,580

### vi) Quality of Education – Estyn Inspections

School	Date of Inspection	School's Current Performance	Prospects for Improvement	Follow-up activity
Nantmel	May 2012	Good	Good	N/A

**vii) Quality of Education – National School Categorisation System**

In the 2014/15 academic year, the school was categorised as follows:

School	Category	Definition
Nantmel	Amber	<p><i>'schools in need of improvement which:</i></p> <ul style="list-style-type: none"> <li><i>do not know and understand all the areas in need of improvement</i></li> <li><i>have many aspects of their performance which are not improving quickly enough'.</i></li> </ul>

**viii) Staffing**

	Headteacher	Teaching staff
Nantmel	Temporary shared arrangement with Rhayader C in W School until August 2016 (0.50)	<p>2 staff working full time as class teachers on fixed term contracts.</p> <p>2 staff on perm. contracts totalling 0.45 covering management time and SEN.</p>

**ix) Analysis of pupil travel patterns at Nantmel C in W School**

**a) Travel to Nantmel C. in W. School**

The home addresses of the 33 children attending Nantmel C. in W. School in January 2015 were analysed by the council's Research and Information Unit.

The closest school for the 33 pupils was as follows:

Closest School	Number of Pupils
Nantmel C. in W. School	20
Rhayader C. in W. School	4
Crossgates C.P. School	3
Llandrindod Wells C.P. School Cefnlllys	3
Llandrindod Wells C. in W. School Trefonnen	2
Newbridge-on-Wye C. in W. School	1

The average one way journey to school per child for pupils attending Nantmel C. in W. School in January 2015 was 2.98 miles.

**b) Travel to next closest school**

If there were no school in Nantmel, the next closest school for the children that were attending Nantmel C. in W. School in January 2015 would be as follows:

<b>Closest School</b>	<b>Number of Pupils</b>
Crossgates C.P. School	15
Rhayader C. in W. School	9
Llandrindod Wells C.P. School Cefnlllys	3
Llandrindod Wells C. in W. School Trefonnen	3
Newbridge-on-Wye C. in W. School	3

If there were no school in Nantmel, and the pupils transferred to their closest school, the average one way journey to school would be 3.23 miles.

**x) Other information**

There is no funded 3 year old early old setting at Nantmel C in W School.

This page is intentionally left blank

## Powys County Council

### Equality Impact Assessment (EqIA) – Decision Assessment reporting template

This EqIA reporting template is designed to assist in the analysis of gathered data and evidence, to determine the equality impact of a proposal to change existing practices of a Council service. Once complete, the template should be made fully accessible to the public e.g. inclusion with publicly available Cabinet reports and/or publication on the Powys County Council website. For confidential matters, this should be made available once a decision has been taken.

***N.B. Please contact the Council’s Organisational Development Officer (Equalities) early on in the process if you require advice to conduct an assessment.***

<b>Proposal</b>	To close Nantmel C in W School from the 31 <sup>st</sup> December 2016 with Rhayader C in W School to be named as the receiving school	<b>Lead Person undertaking the assessment</b>	Sarah Astley
<b>Service Area</b>	Schools Service	<b>Relevant Head of Service who has agreed this assessment</b>	Ian Roberts Head of Schools
<b>Date of Assessment</b>	19 <sup>th</sup> November 2015		

The Equality Act 2010, requires that public sector organisations in the exercise of their functions, pay due regard to the following ‘general duty’:

- (a) Eliminating discrimination, harassment, victimisation and any other conduct that is prohibited by or under this Act;**
- (b) Advancing equality of opportunity between persons who share a relevant protected characteristic and persons who do not share it;**
- (c) Fostering good relations between persons who share a relevant protected characteristic and persons who do not share it.**

*The protected characteristics include: age, disability, gender reassignment, pregnancy and maternity, race, religion or belief, marriage and civil partnership, sex and sexual orientation. This assessment also includes a consideration of impact upon people and communities whose language of choice is Welsh.*

The specific regulations for Wales [Equality Act 2010 (Statutory Duties) (Wales) Regulations 2011] require public sector bodies to monitor relevant policy and practises and then assess and report on the impact based upon an analysis of relevant data and evidence.

1. AIM or PURPOSE		
Briefly describe the aim or purpose of the change proposal being assessed.	<p>This consultation is about whether Powys County Council should commence the statutory process for the following:</p> <p>Closure of Nantmel C in W School from the 31<sup>st</sup> December 2016. Rhayader C in W School to be named as the receiving school.</p>	
2. OBJECTIVES		
Please state the current business objectives of the change proposal.	<p>The authority is considering commencing the statutory process to close Nantmel C in W School because:</p> <ul style="list-style-type: none"> <li>- The school has had fewer than 50 pupils on roll for the three previous years and numbers are not projected to increase to above 50</li> <li>- There are more than 15% surplus places at the school</li> <li>- The funding per pupil is more than 120% of the council's average</li> </ul>	
3. BENEFITS and OUTCOMES		
i) What are the intended benefits or outcomes from the change proposal?	<p>The benefits of the proposal are:</p> <ul style="list-style-type: none"> <li>- More efficient use of resources</li> <li>- Reduction in surplus places</li> </ul>	
4. CORPORATE RELEVANCE		
How does this change proposal relate to the Powys Change Plan and/or Powys One Plan?	<p>The proposal supports Powys County Council's vision for education, which is outlined within the One Powys Plan for 2014-17. 'Transforming Learning and Skills' is one of the priorities within this plan, and within this priority, the Plan states that</p> <p><i>'We need to re-organise schools (primary, secondary and post 16) to ensure affordability, sustainability and appropriate leadership capacity'</i></p>	
5. DATA USED		
<b>5.1. What data has been used to</b>	Profiling of service users, providing a breakdown of who uses the service by the protected characteristics.	✓

<b>conduct this assessment?</b>  <b>Tick/shade boxes as appropriate.</b>	Service user satisfaction rates, broken down by the protected characteristics.	
	Qualitative data (analysed against the protected characteristics) which provides evidence about current services users experience accessing the service.	
	Qualitative data gathered from those that are not currently using the service.	
	Complaints monitoring against the protected characteristics	
	Wider research reports and findings.	
	Relevant service based Equality Impact Assessment	
<b>5.2. Are there any gaps in the data?</b>	<b>Yes</b> <input type="checkbox"/> <input checked="" type="checkbox"/> Please state the gaps: Qualitative data is not currently provided  How will the gaps be addressed going forward?  Should Cabinet agree to proceed with formal consultation, qualitative data will be gathered during this process and the EqIA will be updated to reflect the qualitative information received.	<b>No</b> <input type="checkbox"/>
<b>6. DATA ANALYSIS</b>		
<b>6.1 Quantitative</b> <b>Summarise the key quantitative data analysis results, providing key headline statistics.</b>	Information on pupils who attend Nantmel C in W School can be obtained via the Pupil Level Annual School Census 2015 (PLASC), which shows the profile of pupils according to a range of criteria, including age, free school meals, gender, special educational needs, ethnicity, use of Welsh and disabilities. In relation to the protected characteristic groups, the profile of pupils at Nantmel C in W School is as follows:	

<p>Include data that relates to existing provision and also data relating to proposal. E.g. statistics generated from a consultation questionnaire.</p> <p><b>Key questions:</b></p> <p>i) Are certain groups currently underrepresented in service user figures? Will a change affect this?</p> <p>ii) How do satisfaction levels compare across the protected characteristic groups? How will a change affect this?</p>	<ul style="list-style-type: none"> <li>- 32 pupils in total, aged between 3 and 11. 26 pupils aged between 5 and 11.</li> <li>- Gender: Of the pupils attending the school, 17 (53%) are boys and 15 (47%) are girls.</li> <li>- Free school meals: 1 pupil (3%) is eligible for free school meals.</li> <li>- SEN: 0 pupils in the school have Statements of Special Educational Needs. 3 pupils (9%) have special needs but do not have a statement – 2 pupils (6%) are on School Action Plus, 1 pupil (3%) is on School Action</li> <li>- Disabilities: 3 pupils (9%) have additional learning needs</li> <li>- English as an Additional Language: English is not an additional language for any of the pupils at the school.</li> <li>- Welsh Language: 1 pupil (3%) comes from a home where some Welsh is spoken.</li> <li>- Race/ethnicity: PLASC only provides information about the ethnic group of pupils aged 5 and over. <ul style="list-style-type: none"> <li>- The ethnic group of pupils aged 5 and over at the school is as follows: <ul style="list-style-type: none"> <li>- White British – 24 (92%)</li> <li>- White and Black African – 1 (4%)</li> <li>- White and Black Caribbean – 1 (4%)</li> </ul> </li> </ul> </li> </ul> <p>This information shows that the proportion of pupils in the school that belong to the protected characteristic groups is very small. There are 3 pupils with additional learning needs that are in a protected characteristic group for disability, there are 2 pupils that are in a protected characteristic group due to their ethnic group and 1 pupil is eligible for Free School Meals. 1 pupil comes from a home where some Welsh is spoken.</p> <p>In addition to the PLASC data, information has been received from the governing body of Nantmel C in W School which suggests that a number of Gypsy Traveller pupils attend the school, however none of the pupils that were registered at the school on the PLASC counting date in January 2015 have been identified as Gypsy Travellers on the school's PLASC return.</p>
<p><b><u>6.2 Qualitative</u></b>  <b>Summarise the key qualitative data analysis, providing key themes or patterns.</b>  Include data that relates to existing provision and also data relating to proposal. E.g. protected characteristics</p>	<p>If Cabinet approves the commencement of formal consultation on the closure of Nantmel C in W School, this will be carried out in accordance with the requirements of the School Organisation Code (2013), and will include a meeting with pupils of Nantmel C in W School. This will provide qualitative data in respect of the proposal, and the impact on pupils that belong to the protected characteristic groups.</p> <p>Further detail will be added to the EqIA following the conclusion of any consultation period and consideration of the responses received.</p>

focus group on the proposal.

**Key questions:**

- i) Do certain groups have a different service user experience? How will a change affect this?
- ii) Have any areas for improvement been communicated by particular groups? Will a change have an impact upon these views?
- iii) What are the reasons behind some groups not using the service? How will a change affect this position?
- iv) What has consultation on your proposals revealed about impact on the protected characteristics?

**7. EqIA RESULT**

<p><b>Based on an analysis of the available qualitative and quantitative data, please tick/shade the appropriate box opposite to provide the EqIA assessment result.</b></p>	<p><b>The proposal does not present any adverse impact on equality.</b> [Proceed to question 10]</p>	
	<p><b>The proposal presents some adverse impact on equality.</b> [Proceed to question 8]</p>	✓
	<p><b>The proposal presents significant impact on equality</b> [Proceed to question 8]</p>	

**8. AREAS for IMPROVEMENT**

<p><b>Please provide detail of weak or sensitive areas</b></p>	<p>i) Based on the pupils that were registered at the school on the 2015 PLASC counting date,</p>
--	---

<p><b>of the proposal identified by the assessment.</b></p> <p>i) Which protected characteristic groups are particularly affected?</p> <p>ii) Will people on low incomes be affected?</p> <p>iii) Will Welsh speakers be affected?</p>	<p>three pupils are in a protected characteristic group due to having additional learning needs, and 2 pupils are in a protected characteristic group due to their ethnic group. In addition, information from the school's governing body suggests that pupils from the Gypsy Traveller community attend the school and would be impacted by the proposal.</p> <p>ii) Free transport will be provided to all qualifying pupils currently attending Nantmel C in W School. However, it is acknowledged that it may be more difficult for the parents of pupils on low incomes that live in Nantmel, due to the additional travel required of parents in order to attend activities at the school, or to collect pupils from after school activities. Based on the 2015 PLASC information, 1 pupil at the school was eligible for Free School Meals.</p> <p>iii) Although 1 pupil comes from a home where some Welsh is spoken, Nantmel C in W School is an English-medium school therefore it is not anticipated that the proposal would have an adverse impact on Welsh speakers.</p>
<p><b>9. EQUALITY IMPROVEMENT</b></p>	
<p><b>9.1 Having identified problematic aspects to the proposal, how will this now be addressed?</b></p> <p><i>i.e. Are you able to involve (in some capacity) people from protected characteristic groups, Welsh Speakers, people on low incomes, to assist you in this process?</i></p> <p>i) Can the impact be mitigated, and how will this be done?</p> <p>ii) Does the proposal require modification to reduce or remove this impact?</p> <p>iii) Should the proposal be considered for removal, owing to the degree of impact it is likely to have?</p>	<p>i) The authority is confident that the proposed receiving school and any other schools in the local area which pupils may prefer to transfer to would be able to meet the need of pupils currently attending Nantmel C in W School who belong to the protected characteristic groups. Free home to school transport would be provided to qualifying pupils to the proposed receiving school or to their closest school.</p> <p>ii) At the current time, the proposal does not require modification to reduce or remove the impact, however this EqIA will be reviewed and updated following any formal consultation exercise.</p> <p>iii) At the current time, the proposal should not be considered for removal. However this EqIA will be reviewed and updated following any formal consultation exercise.</p>

<b>9.2 Will the management of the impact as outlined in 9.1, be included in the Service Improvement Plan?</b>	<b>Yes</b> <input type="checkbox"/>  Date added.....  Reference.....	<b>No</b> <input checked="" type="checkbox"/>  If no, please explain why not: <b>Need was not identified at time of writing Service Strategy</b>
---	--	---

<b>10. ONGOING MONITORING</b>
-------------------------------

<b>How will the decision now be monitored on an ongoing basis to consider its impact over time?</b>		<b>Please tick/shade</b>
	Equality monitoring of uptake of the service within which the decision was made	
	Satisfaction monitoring of service users (broken down by protected characteristic)	
	Recording and analysing complaints/requests/compliments	
	Targeted periodic focus groups/service user interviews/feedback sessions	
	Other (please specify)	

<b>Monitoring arrangements</b>
--------------------------------

The Learning in the Community Programme Board is responsible for overseeing the strategic direction of the modernisation agenda: setting direction, implementing change, monitoring and reporting to the Cabinet of the Council.

Equality monitoring will form an integral part of the County Council’s arrangements for any school reorganisation and will be undertaken where a significant or material change in provision is proposed.

The Head of Schools Service will be responsible for on-going monitoring.

**Publication of results of the impact assessment**

The results of the impact assessment will be published on the Council's website

**Equality Impact Assessment Action Plan**

Any actions identified as a result of this impact assessment will be taken forward for inclusion in the Schools Service Business Plan

## Appendix C – Draft Community Impact Assessment

### Draft recommendation to close Nantmel C in W School

#### Draft Community Impact Assessment

##### 1. Introduction

The School Organisation Review Panel (SORP) has been reviewing Nantmel C in W School in accordance with the School Transformation Policy (2014) during 2015.

The SORP's draft recommendation is to close Nantmel C in W School from the 31<sup>st</sup> December 2016, with Rhayader C in W School to be named as the receiving school for pupils currently attending Nantmel C in W School. Free transport would be provided for qualifying pupils to Rhayader C in W School or their nearest alternative school.

In accordance with the Authority's School Transformation Policy (2014), Cabinet is required to consider a draft impact assessment assessing equality issues and impact on the community when determining whether or not to proceed with the formal statutory process.

An Equality Impact Assessment has been produced separately. This document considers the impact on the Community. The Assessment has been carried out based on the guidelines provided in the Welsh Government's School Organisation Code (2013).

##### 2. The Affected Communities

###### 2.1 Nantmel

Nantmel is a small village located approximately 5 miles from the town of Rhayader in Mid Powys. According to the 2011 Census, there are 637 residents in the area served by Nantmel Community Council<sup>1</sup>.

---

<sup>1</sup> 2011 Census information for the Nantmel Community Council area, taken from <http://www.powys.gov.uk/en/statistics/view-statistics-about-your-area/detailed-census-information/>

English is the main language spoken in the area, however according to the 2011 Census, 19% of the population have one or more skills in Welsh. 0.94% of the population belong to ethnic groups other than White.

The Welsh Index of Multiple Deprivation 2014 ranks areas known as Local Super Output Areas (LSOA) in terms of deprivation, where 1 is the most deprived and 1909 is the least deprived. The Nantmel LSOA is ranked as follows<sup>2</sup>:

Local Super Output Area (LSOA)	WIMD Rank 2014
Nantmel	1222

Nantmel C in W School is a Voluntary Controlled Church in Wales English-medium Primary School.

## 2.2 Rhayader

Rhayader is a small town located in Mid Powys. According to the 2011 Census, the Rhayader Community Council area had 2088 residents<sup>3</sup>.

English is the main language spoken in the area, however according to the 2011 Census, 20% of the population of Rhayader have one or more skills in Welsh. 1.15% of the population belong to ethnic groups other than White.

There is 1 Local Super Output Area within the town of Rhayader. The Welsh Index of Multiple Deprivation ranks the Rhayader LSOA as follows, where 1 is the most deprived LSOA and 1909 is the least deprived<sup>4</sup>:

Local Super Output Area (LSOA)	WIMD Rank 2014
Rhayader	1007

Rhayader C in W School is a Voluntary Controlled Church in Wales Primary School. It is a dual stream school, which means that pupils are either taught through the medium of Welsh or English.

## 2. Community Impact Assessment

### 2.1 Impact on pupil travel

---

<sup>2</sup> <https://statswales.wales.gov.uk/Catalogue/Community-Safety-and-Social-Inclusion/Welsh-Index-of-Multiple-Deprivation/WIMD-2014>

<sup>3</sup> 2011 Census information for the Rhayader Community Council area, taken from <http://www.powys.gov.uk/en/statistics/view-statistics-about-your-area/detailed-census-information/>

<sup>4</sup> <https://statswales.wales.gov.uk/Catalogue/Community-Safety-and-Social-Inclusion/Welsh-Index-of-Multiple-Deprivation/WIMD-2014>

The home addresses of the 33 children that were attending Nantmel C in W School at the last PLASC counting day in January 2015 were analysed by the council's Research and Information Unit. This analysis showed that Nantmel C in W School was only the closest school for 20 pupils, which is 61% of the pupils attending the school. The closest schools for all of the 33 pupils is summarised in the following table:

<b>Closest School</b>	<b>Number of Pupils</b>
Nantmel C. in W. School	20
Rhayader C. in W. School	4
Crossgates C.P. School	3
Llandrindod Wells C.P. School Cefnlllys	3
Llandrindod Wells C. in W. School Trefonnen	2
Newbridge-on-Wye C. in W. School	1

Based on this analysis, the average one way journey to school per child for pupils attending Nantmel C. in W. School in January 2015 was 2.98 miles.

If there were no school in Nantmel, the next closest school for the children that were attending Nantmel C. in W. School in January 2015 would be as follows:

<b>Closest School</b>	<b>Number of Pupils</b>
Crossgates C.P. School	15
Rhayader C. in W. School	9
Llandrindod Wells C.P. School Cefnlllys	3
Llandrindod Wells C. in W. School Trefonnen	3
Newbridge-on-Wye C. in W. School	3

Based on this analysis, the average one way journey to school per child for the pupils that were attending Nantmel C. in W. School in January 2015 would be 3.23 miles.

Should there be no school at Nantmel C. in W. School, there would be an increase in travel for the 20 pupils for whom Nantmel C. in W. School was their closest school. However, there would be a reduction in travel for the remaining 12 pupils, should they transfer to their closest school.

## **2.2 Extra-curricular activities provided by the schools**

### **Nantmel C in W School**

The following clubs are provided by the school outside school hours:

- i) Sports Clubs (some run by the pupils who have been elected as Sports Ambassadors), including Dragon Sports – cricket, netball, athletics, rounders
- ii) PE Club
- iii) Gardening Club
- iv) Other activity sessions, including craft, cookery, computer skills

The following extra-curricular activities are provided by the school: Guitar Club; Recorder Lessons; Chess Club; Cross-county Running; Swimming Lessons & Gala; Singing; Activities at the Willow Globe.

### **Rhayader C in W School**

The following clubs are provided by the school after school hours:

- i) Art Club
- ii) Gardening Club
- iii) Clwb yr Urdd
- iv) Dance Club
- v) Running Club
- vi) Sports Club

The following extra-curricular activities are provided during the school day:

Lego Club (lunchtime); Running Club (lunchtime); Sports activities (lunchtime); Singing/Music Lessons (lunchtime); Badminton Club (lunchtime)

## **2.3 Community Use of the School Building**

### **Nantmel C. in W. School**

The school's facilities are used by the community for the following activities:

'Play Radnor' use the school during the school holidays, as well as after school and lunchtimes, and they enjoy the benefit of the outdoor grass area.

A pre-school play group and a mother and toddler group meet at the school.

In addition, the school's facilities are used by the community regularly for the following activities:

Evening classes for children e.g. jewellery making; Children's parties; Charity auction; Women's Institute (monthly); Community Council meetings; Nantmel Show Committee meetings; Marquee section of Nantmel Show moved to the school in adverse weather; Golden Hour; Church services held in the school when St Cynllo's Church is inaccessible due to snow & ice; fundraising events for the church; refreshments and receptions after Harvest and Carol services, funerals, christenings, special occasions such as retirements.

### **Rhayader C in W School**

The school's facilities are used by the community for the following activities:

Community Nursery, Cylch Meithrin, Junior Football, Rhayader Running Club; Young Farmers Club

## **2.4 Other links with the community**

### **Nantmel C in W School**

The school has strong links with the community, which include the following:

Significant number of entries to the Nantmel Show; Current and former pupils help with setting up the Nantmel Show; Voluntary support for the school by members of the community – reading, after school clubs and sports, repair work on buildings and grounds; talks in support of the school garden; Annual school and community BBQ – WI involved in refreshment provision; Used as a Polling Station by Powys County Council; The school provides storage for tables, chairs and crockery which are used for community events; The school uses the Church for special school services, e.g. Harvest Service; Carol Service; mock weddings, Eisteddfod.

### **Rhayader C in W School**

The school has links with a number of organisations within the community, which include the following:

Church, Carad, Community Support, Carnival, Elan Valley Trust, YFC, Community Nursery, Male Voice Choir, Cylch Meithrin, Dyfed Powys Police, Rhayader RFC, Rhayader Under 5's, Rhayader Leisure Centre, Rainbows/Brownies & Scouts, WI & Mothers Union

## **2.4 Support that could be offered by the receiving school to Parents and Pupils that currently attend Nantmel C in W School**

Pupils from Nantmel C in W School and Rhayader C in W School are already participating together in a number of activities, such as Orienteering, School Discos, Cross Country, Residential Trips and Visits.

## **2.5 Conclusion**

The authority acknowledges that the closure of any school will have a detrimental impact on the facilities available in the local community. It is clear that the community of Nantmel makes extensive use of Nantmel C. in W. School's facilities for a wide range of activities and events, due to the fact that there is no other suitable location to hold these activities in the village. It is currently unclear where these activities could take place should Nantmel C. in W. School close.

In terms of extra-curricular activities, a wide range of activities are offered by both schools, and the authority is satisfied that pupils would have the opportunity to take part in a similar range of activities at the proposed receiving school. However, as many of these are offered after school, it is acknowledged that it would be more difficult for those pupils for whom Nantmel C. in W. School is their closest school to access these activities if they were reliant on home to school transport.

## Appendix D – Financial Assessment

### Closure of Nantmel C in W School

An assessment of the potential financial savings from the closure of Nantmel C in W School has been carried out. The estimated savings following closure of the school is provided below, based on the school's budget for 2015/16. The assessment does not include any possible redundancy costs

<b>Area of Funding</b>	<b>Full Year Saving</b>
<b>Total Delegated Budget not transferring with the pupils to their alternative school</b>	<b>72,853</b>
<b>Additional Projected Savings</b>	
Savings re Headteacher's Post (L12 – UPS3)	15,580
Projected Reduction in Canteen Subsidy	10,000
<b>Total Additional Savings</b>	<b>25,580</b>
<b>Total Estimated Savings</b>	<b>98,433</b>
Less Estimated Transport Costs	(30,400)
<b>Net Estimated Savings</b>	<b>69,033</b>

## CYNGOR SIR POWYS COUNTY COUNCIL

### Cabinet

15<sup>th</sup> December 2015

**REPORT AUTHOR:** County Councillor Avril York  
Portfolio Holder for Regeneration and Planning

**SUBJECT:** Powys Local Development Plan:  
a. Deposit Plan Representations and Responses  
b. Proposed Addendum of Focussed Changes  
c. Assessments of the Proposed Focussed Changes  
d. Submission of the LDP

---

**REPORT FOR:** Recommendation

---

## 1. Summary

1.1. To consider and approve the following documents:

- (a) The representations on the Deposit Plan and the recommended Council responses to the representations (Appendix 1);
- (b) The Proposed Addendum of Focussed Changes for public consultation purposes (Appendix 2);
- (c) The Assessments of the Proposed Focussed Changes for public consultation purposes (Appendices 3, 4 & 5); and

1.2. To approve the submission of the LDP to the National Assembly.

1.3 In order to save on printing costs these documents have been saved in the Members folder (on the x:drive – Members, LDP, Cabinet 20-12-2015), and can also be viewed on the Council's website.

## 2. Proposal

2.1 Powys County Council resolved at its meeting on the 23<sup>rd</sup> April 2015, to approve the Deposit Draft LDP for public consultation and, "That Cabinet be granted delegated power to agree the Council's responses to comments received in the deposit and subsequent consultation periods". (Council minute CC45 – 2015)

### **(a) The representations on the Deposit Plan and the recommended Council responses to the representations (Appendix 1).**

2.2 The deposit LDP and its accompanying assessments underwent a period of public consultation from the 8<sup>th</sup> June to the 20<sup>th</sup> July 2015. 884 representations were received from 254 individuals and organisations (representors). Of the total representations, just over 50% were in relation to the LDP's written statement, and just under 50% related to the proposals and inset maps.

2.3 According to the LDP Regulations (Regulation 22(1)), the LDP must not be submitted to the National Assembly unless and until the Council has considered the representations. The representations are attached as appendix 1 to this report, and are ordered by page order of the plan (using the refpoint system). A recommended response has been drafted for every representation.

2.4 The representations will be summarised in an updated Consultation Report that will be submitted to the National Assembly as one of the Examination Documents. In brief, the representations raise a variety of matters including:

- The LDP's proposed dwelling requirement and the deliverability and viability of housing allocations, and the need to demonstrate a 5 year supply of housing land.
- The quantity of employment land allocated, and the deliverability of these sites.
- Affordable housing requirements / targets.
- Gypsy and traveller site provision to meet identified needs and the deliverability of provision.
- Objections to site allocations as well as the suggestion of alternative site allocations.

**(b) The Proposed Addendum of Focussed Changes for public consultation purposes (Appendix 2); and**

**(c) The Assessments of the Proposed Focussed Changes for public consultation purposes (Appendices 3, 4 & 5).**

2.5 Having considered the representations made on the Deposit Plan, it is considered that some changes to the Plan would address some of the matters and issues raised by representors. These proposed changes are referred to as Focussed Changes, although they are non-statutory and not defined by legislation or regulation. It is considered appropriate to publish Focussed Changes in order to assist the Inspector appointed to conduct the Examination.

2.6 Welsh Government advises in its LDP Manual, 2015 that changes after deposit should be avoided wherever possible, but exceptionally it may prove necessary to consider proposing changes to ensure the plan is sound, for example where there has been a sudden, major change in local circumstances, new national planning policy has been introduced or deposit plan representations identify an unforeseen soundness issue. Further, it advises that this should be one set of an extremely limited number of focussed changes that reflect key pieces of evidence but do not go to the heart of the plan. It advises that consultation on these proposed changes should take place at the earliest opportunity to avoid delaying the examination process. It advises that immediately preceding submission of its LDP for examination, the LPA should commence advertising through public consultation (6 week period) an addendum to the deposit plan. This addendum should set out the focussed changes it wishes to be made, showing the new / revised policies and text, and supported by reasoning and robust evidence for the changes. Representations may only be made on the Focussed Changes.

2.7 Appendix 2 sets out the proposed Addendum of Focussed Changes to the deposit plan. The main changes proposed include:

- The inclusion of a strategic policy section to clarify the Plan's strategy.
- The redrafting of the development management section.

- An amended dwelling requirement, affordable housing target, and provision figure, based on a consideration of the representations, and further evidence.
- An amended employment land allocation provision, based on a further assessment of sites.
- Revisions to various policies and reasoned justifications.
- Housing site allocation changes, in particular in the Ystradgynlais area.

2.8 As with all changes to the plan, the following informing assessments of the proposed changes have been undertaken in accordance with relevant legislation and regulations:

- Strategic Environmental Assessment (Appendix 3).
- Sustainability Appraisal (Appendix 4).
- Habitats Regulatory Assessment (Appendix 5).

2.9 Assuming Cabinet approves the proposed Focussed Changes, these will be issued for public consultation as soon as possible, but by no later than the end of January. Please note that the minor editing changes identified as an appendix in the Focussed Changes will not be a matter for public consultation in line with the advice in the LDP Manual 2015.

#### **(d) Submission**

2.10 In order to commence the Examination process, Cabinet's authority is sought to submit the LDP and associated documents to the National Assembly.

### **3. One Powys Plan**

3.1 The One Powys Plan 2014-17, which incorporates the Powys Change Plan, sets out 5 priorities:

- Integrated health and adult social care.
- Children and Young People.
- Transforming learning and skills.
- Stronger, safer and economically viable Communities.
- Financially balanced and fit for purpose public services.

3.2 The LDP can support and facilitate each of the above priorities, as well as some of the actions and outcomes of the One Powys Plan where there are land use and development implications. Specific reference is made in the One Powys Plan to the LDP under the priority of **Stronger, safer and economically viable communities** which states the following action: "Align the Local Development Plan to ensure it provides a sustainable infrastructure that underpins the delivery of the One Powys Plan". The LDP will also be tested at Public Examination to ensure it has had regard to the One Powys Plan.

3.3 The principal risks are the failure to prepare the LDP in accordance with the Delivery Agreement and the various statutory regulations covering LDP preparation and assessments. This could leave the LDP and its preparation process open to a legal challenge and costs. It could leave the Council without an adopted development plan so that future decisions on planning applications are potentially based on out-of-date policies or on Welsh Government policy and advice that do not reflect the needs of the County.

#### **4. Options Considered/Available**

4.1 Preparation of the LDP is a statutory duty. The consideration of the LDP deposit representations is a statutory requirement.

4.2 There are options available in terms of whether or not to propose and consult on Focussed Changes, and the content of those changes. However it is considered expedient and also helpful to the Examination process to propose Focussed Changes.

4.3 The proposed Focussed Changes have been considered by the Local Development Plan Working Group, and where possible with local Members, and their comments and amendments incorporated where appropriate. Any additional changes that Cabinet may wish to introduce may require additional assessments in order to inform them.

4.4 Options on certain LDP matters have also been considered through the informing assessments.

4.5 Submission is also a statutory requirement and not optional.

#### **5. Preferred Choice and Reasons**

5.1 To approve each of the appendices, in order to agree the Council's responses to deposit representations, publish proposed Focussed Changes to the LD, and to submit the LDP to commence the Examination process.

#### **6. Sustainability and Environmental Issues/Equalities/Crime and Disorder,/Welsh Language/Other Policies etc**

6.1 The LDP has been informed by various assessments which seek to ensure the plan has been prepared having regard to its impact on and ability to address matters / issues of sustainability, the environment, equalities, etc. The plan for instance aims to contribute to sustainable development and to enhance the environment. It also includes policies that seek to support Welsh Language in Welsh speaking strongholds and to reduce crime through good design.

6.2 In 2016 the LDP will be subject to Public Examination by a Planning Inspector who will test the plan for 'soundness'. The soundness tests include tests on sustainability and consistency with other relevant strategies.

#### **7. Children and Young People's Impact Statement - Safeguarding and Wellbeing**

7.1 The plan includes objectives and policies that seek to facilitate healthy, sustainable living environments and places for the wellbeing of the County's population as a whole. The protection and provision of play and open spaces are one example where the LDP can support the well-being of children. Preparing and testing the Powys LDP through the assessment processes ensures that human health and wellbeing are considered.

#### **8. Local Member(s)**

8.1 The Powys LDP will directly affect all those Members with wards, either wholly or partly, located in Powys outside the Brecon Beacons National Park. Those Members with wards entirely within the National Park may be indirectly affected by nearby proposals.

## **9. Other Front Line Services**

9.1 The LDP has the potential to impact on all service areas in a number of possible ways e.g. where services have a 'land use' requirement, or where service delivery is impacted on by the levels of development and growth being planned. Three Portfolio Holders are represented on the LDP Working Group.

## **10. Support Services (Legal, Finance, HR, ICT, BPU)**

The Principal Solicitor (Planning): comments requested but none received.

Finance - The Finance Business Partner Place notes the contents of the report.

## **11. Local Service Board/Partnerships/Stakeholders etc**

11.1 The LDP has the potential to impact on the Local Service Board, partnerships and stakeholders in a number of possible ways e.g. where services have a 'land use' requirement, or where service delivery is impacted on by the levels of development and growth being planned. The LDP process is a statutory process which provides informal and formal opportunities for engagement and involvement. The individual partnership organisations of the LSB have had the opportunity to comment on the Deposit Draft LDP during its public consultation period, and can also comment on the proposed Focused Changes. Those making comments can also request to be heard by the appointed Planning Inspector at the Examination.

## **12. Communications**

12.1 The consultation on the proposed Focussed Changes and Assessment reports, as well as the submission will need to be communicated as widely as possible and must comply with regulatory requirements and the involvement processes set out in the LDP Delivery Agreement.

### **13.1 Statutory Officers**

The Solicitor to the Council (Monitoring Officer) has commented as follows: "Before making a decision in relation to this report, Members must ensure that they have read and considered the representations made during consultation, the Authority's draft responses and the proposed Focussed Changes."

Strategic Director, Resources (Section 151 Officer) notes the comments made by Finance.

### **Members' Interests**

The Monitoring Officer is not aware of any specific interests that may arise in relation to this report. If Members have an interest they should declare it at the start of the meeting and complete the relevant notification form.

### Background Papers used to prepare Report:

Previous Cabinet / Full Council Reports relating to the Powys LDP.  
LDP Delivery Agreement 2015.  
Legislation, Regulations, Planning Policy Wales, etc.  
One Powys Plan.

### Appendices

**Appendix 1** - The representations on the Deposit Plan and the recommended Council responses to the representations

**Appendix 2** - The Proposed Addendum of Focussed Changes for public consultation purposes

**Appendices 3, 4 & 5** - The Assessments of the Proposed Focussed Changes for public consultation purposes (SEA, SA, HRA)

## **Summary of Representations (by Issue) on the Deposit LDP 2015**

### **1. Preparation, Process and Plan Strategy**

Number of Representations: 83

Comments raised:

- Inset maps required for small villages.
- Categorisation of various settlements in the settlement hierarchy.
- Inclusion of white land in settlement development boundaries.
- Definition of rural buildings
- Comments relating to the LDP vision and its reference to the natural environment and landscape.
- Comments on the LDP objectives e.g. the separation of flooding and climate change.

### **2. Housing distribution and numbers**

Number of Representations: 52

Comments raised:

- Numerous comments relating to housing provision some of which see additional provision, including provision specific settlements, and some which consider provision to be adequate.

### **3. Housing Delivery and Infrastructure**

Number of Representations: 38

Comments raised:

- Settlement specific infrastructure issues such as the capacity of sewage treatment works.
- Implementation of CIL and the Council's approach to CIL vs S106 agreements.
- Concerns about the phasing of housing development (Policy H2) and housing density (policy H3)
- The deliverability and viability of housing allocations, and the need to demonstrate a 5 year supply of housing land.
- Comments about the provision of open space within housing developments (policy H14)

### **4. Housing – Affordable Housing**

Number of Representations: 26

Comments raised:

- Concerns regarding the viability of development as a result of providing affordable housing.
- Objections to the 'Enabled Exceptions Policy' (policy H6)
- Questions regarding the threshold at which affordable housing is sought and whether it should be lower to reflect evidence.

## **5. Other Specialist Housing and Gypsy and Travellers**

Number of Representations: 5

Comments raised:

- Ensuring the LDP provides sufficient gypsy and traveller sites to meet identified needs and the deliverability of that provision particularly where the need is immediate.
- Objections relating to the provision of a proposed gypsy site allocation in Machynlleth.

## **6. Transport and Community Facilities**

Number of Representations: 17

Comments raised:

- The transport infrastructure policy (policy T1) to be reworded to make reference to rural areas and the economic importance of transport infrastructure.
- Support for the provision of community facilities, although one comment states that the policy needs to be more specific.
- Objections to the loss of playing fields, with specific reference made to a field allocated as a housing allocation in Ystradgynlais.

## **7. Employment, Retail and Tourism**

Number of Representations: 53

Comments raised:

- Bronllys hospital site, reference should be included to the registered historic park and garden, that it should be termed a 'Health and Wellbeing Park', and the need for a development brief to be prepared.
- Provision of employment land – some comments supporting the level of provision, some objecting to the level of provision, and others questioning how the provision aligns with the evidence base.
- Some concerns at the loss of local employment land / small employment sites.
- Support for the town centre first approach for retail development.
- Need to better distinguish between primary and secondary frontages in retail centres.
- Policy wording on village shops and services to be strengthened (policy R4).
- Plan over emphasises the importance of the Montgomery Canal compared to other tourist facilities.
- Lack of policy in the plan on agricultural development / intensive livestock units.

## **8. Minerals, Waste and Renewable Energy**

Number of Representations: 58

Comments raised:

Waste:

- Compatibility with national policy framework including the Collections, Infrastructure and Market Sectors plan (CIM).
- Ensuring cross border consistency with neighbouring authorities.
- Clarity on the capacity of landfill and disposal of residual waste.

Minerals:

- Need to include a separate safeguarding policy, and clarity on sterilisation of mineral resources and buffer zones.
- Ensuring the crushed rock aggregate land bank is maintained and monitored within policy.

Renewable Energy

- Support for small scale, local / community projects.
- Support for the energy targets in the objective.
- Reword policy to provide reference to SSAs and clarify the different scales and types of renewable energy.
- Objections to large scale renewable energy / windfarm projects due to impacts on landscape, tourism, etc.

## **9. Development Management and the Environment**

Number of Representations: 66

Comments raised:

- Disaggregate the two development management policies into separate policies and the establishment of strategic policies to clarify the application of the LDP's strategy in policy terms.
- Many specific comments relating to the individual component criteria of the development management policies e.g. inclusion of reference to woodland, etc.

## **10. Welsh Language and Culture**

Number of Representations: 42

Comments raised:

- Incorporate the findings of the Sustainability Appraisal into the Welsh language section of the LDP.
- Ensure the policy aligns with TAN20 to ensure that the assessment of impacts on Welsh language takes place at the plan-making level, rather than requiring additional assessments at the planning application stage.
- Consider the viability impacts of Welsh language mitigation measures on different types of development.
- Consider how the LDP can better promote Welsh language.
- Concerns about the impact of development upon Welsh language strongholds / communities.

## **11. Allocated Sites**

Number of Representations: 281

Comments raised:

- Many site related comments including objections to specific sites and the suggestion of alternative sites for allocation. Those settlements with allocations generating the largest number of comments include: Builth Wells, Ystradgynlais and Boughrood and Llyswen.
- Comments relating to the site information in Appendix 1 of the LDP.
- Support for many of the LDP's allocations.
- Proportion of housing on mixed used allocations should be increased.

## **12. Alternative Sites**

Number of Representations: 106

Comments raised:

- Many site related comments suggesting alternative sites for allocation. Many of these proposals were previous Candidate Site suggestions and only a small number of new sites (not previously candidate sites) were proposed (approx. 25).

## **13. Plan Monitoring and Review**

Number of Representations: 6

Comments raised:

- Ensure the monitoring indicators are appropriate to measure the delivery of policies and to alert to their non-delivery.
- Trigger points for intervention should be checked.

## **14. Plan Monitoring and Review**

Number of Representations: 47

Comments raised:

- A small number of comments relating to the SEA and HRA.
- Comments relating to the non-inclusion (i.e. non-allocation) of candidate sites in the LDP.
- Development boundary amendments including comments suggesting amendments and querying the inclusion / exclusion of white land.
- Inclusion of a specific policy on National Parks.

*Question Representation Texts*

**Question: Council Response**

Representation Texts: Thank you for your comments. It is agreed that development of a site within five years would be a very satisfactory way to secure the required housing provision in Powys within the Plan period. However, with all the various factors at play, it is not possible to insist on completions within 5 years. That said, it should be recognised that the emphasis of the LDP has been on selecting suitable, available and deliverable sites that are capable of meeting the aims and objectives of the Strategy. Thus the Council fully expects the allocations to come forward without undue delay once an adopted Plan is in place. Furthermore Policy H2 3. aims to ensure that where planning permission has lapsed, new permissions will only be granted where the proposal satisfies current Development Plan policies and where deliverability is likely. The subject of encouraging starts and completions is likely to be one which warrants further attention and discussion within the Planning section and may be especially appropriate where review of the Plan or other evidence indicates a shortfall in provision. Please note that greenfield and brownfield land is defined in the glossary. National guidance (Planning Policy Wales) includes a comprehensive definition of previously developed (brownfield) land. Given the rural nature of Powys, the LDP Strategy does not centre on the development of brownfield land but the LDP reflects national policy which generally prioritises its use over and above greenfield so as to make the best available use of land. This has been taken into account where possible, for example in the assessment of candidate sites and in decision making on land allocations.

Council Response: 0

Question Representation Texts

**Question: Council Response**

Representation Texts: These comments are noted however, no changes are considered necessary to ensure that the plan is sound. The base date of the plan has previously been decided by Council and can not be changed. The local growth zones task and finish group was designed not by Council but the Welsh Assembly Government to look at the specific issues affecting the key market towns of Brecon, Llandrindod Wells, and Newtown and did not include Presteigne. Comments in support of the introduction of a Community Infrastructure Levy are noted.

Council Response:

0

**Question: 3d. (i) Representation Details**

Representation Texts: COMMENTS ON LOCAL DEVELOPMENT PLAN DEPOSIT DRAFT

- 1) • The period of the plan is stated as 2011 -2026: The Town Council feels it would make more sense to have later start date given that 2011 is already 3 years ago and felt 2015-2030 would be more sensible.
- 2) • It was noted in 2014 that the Local Growth Zones cover a central corridor. This excludes Presteigne and the Town Council feels that this growth should include other major towns, not just central corridor. It is important that development is encouraged throughout the County.
- 3) • Community Infrastructure Levy: The Town Council notes that this is being considered and supports this providing monies are spent locally to the area from which they are received. Monies received should be spent jointly with Town/Community Councils and should be kept strictly within the community containing the development from which the levy is raised.

*Question*      *Representation Texts*

**Question: 3d. (i)      Representation Details**

Representation Texts: The Community Council is surprised and concerned that measures supporting agriculture are largely omitted despite the sector employing some 11% of the Powys population. With UK food self sufficiency falling below 60% and rising export demand the LDP should be promoting measures to expand food production. The county is well placed to contribute significantly with high quality produce. There is also the potential to sustainably increase the availability of local food supplies as well as promote value added products, an area that North Powys is beginning to develop successfully. We submit that this is a significant omission.

The protection of top grade agricultural land should be extended to all categories as it is the diversity and mix of agriculture that is important and the land base is a valuable ecosystem in its own right.

Clarity is required as to the criteria for a mandatory EIA regarding development of farm buildings and ancillary structures and development where planning permission is not required. Neither issue should be left to a decision on a case by case basis.

Council Response: 0

**Question: 3d. (ii)      Desired changes to Document**

Representation Texts: Rectify significant omission of measures supporting agriculture. Extend protection of top grade agricultural land to all categories.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: We commend the recognition of the importance of biodiverse hedgerows and streams and the imperative for their protection although there seems to be a serious limit to the measures actually documented for the protection of biodiversity. We urge that LDP includes rigorously implementing the Hedgerow Regulations Act. A failure to do so has already resulted in the irreplaceable loss of biodiversity as well as landscape amenity. All applications for hedgerow removal should be subject to a full planning application and proper scrutiny by statutory consultees including the Community Council and the relevant Wildlife Trusts. Through sensible application of the regulations for ancient trees and hedgerows and the use of compensatory replanting where vital for efficient use of agricultural machinery then removal should not be deemed unacceptable.

Council Response:

Question Representation Texts

**Question: Council Response**

Representation Texts: The Council disagree with the proposed changes requested by the representor. The representor does not raise any new issues or evidence which lead the Local Planning Authority to change its conclusions. The proposed Development Management Policies adequately address the protection of adjacent protected landscapes (including National Parks and adjoining areas of Outstanding Natural Beauty).

Council Response:

0

Page 49

**Question: 3d. (i) Representation Details**

Representation Texts: Firstly, the National Park Authority would like to congratulate the Powys LDP team for the efforts made to address the significant concerns raised against the first Deposit LDP (2014). It is acknowledged that the level of work undertaken to achieve the revised Deposit is substantial and the team is to be congratulated. We are extremely encouraged to see the progress being made by yourselves to move towards an adopted plan and the certainty this will bring in relation to the future development in Powys. Undoubtedly this will be of benefit to the region and can only be supported by the NPA. Notwithstanding the above, we would like to draw your attention to the following issues we have identified with the deposit draft LDP (2015) and its compliance with National Planning Policy. We raise these concerns from our recent experiences of the Examination process and we hope what follows will benefit you in the production of a sound LDP. These are not objections per se, but we urge you address the points in your lead up to submission in the interests of soundness.

Please note that these are officer comments, which will be put before Members at the next available opportunity. Therefore they may be subject to amendment following NPA recommendation. We will advise you of any change accordingly.

6. National Park Policy

In accordance with section 62(2) of the Environment, any relevant Authority shall have regard to National Park purposes when performing any functions in relation to, or so as to affect, land in a National Park. Relevant Authorities include public bodies, government departments, local authorities and statutory undertakers. Accordingly, there is a need to define how the Council will consider developments that have potential to impact on the statutory purposes of the National Park. For your information Section 63 of the Environment Act (1995) sets out the statutory purposes of the National Park as follows:-

- To conserve and enhance the natural beauty, wildlife and cultural heritage of the National Park; and
- To promote opportunities for the public understanding and enjoyment of the special qualities of the National Park

We have provided you with comments to these ends in our previous responses to your LDP., and are concerned to see that this issue has not been addressed. Such a policy would demonstrate to developers that the consideration of National Park designation is a statutory duty of PCC and a material consideration in the determination of any relevant planning application.

Mewn perthynas â'r prawf hwn mae Awdurdod Parc Cenedlaethol Eryi yn ystyried fod Cynllun Datblygu Lleol Powys yn gadarn mewn perthynas â CDLI Eryri gafodd ei fabwysiadu yn 2011

General comments

Test C1 – This is a land use scheme that considers other relevant schemes, policies and strategies that relate to the area or nearby areas. With regard to this test Snowdonia National Park Authority considers that Powys' Local Development Plan is robust with regard to Snowdonia's Local Development Plan which was adopted in 2011.

Test CE1 – The plan notes a clear and understandable strategy and its policies and allocations flow logically from it, and where there are relevant cross-border matters it does not conflict with the development plans that have been prepared by nearby authorities. With regard to this test Snowdonia National Park Authority considers that Powys' Local Development Plan is robust with regard to Snowdonia's Local Development Plan which was adopted in 2011.

Question Representation Texts

**Question: Council Response**

Representation Texts: The Council disagree with the proposed changes requested by the Representer. The Representer does not raise new issues or evidence which lead the Local Planning Authorities to change its conclusions with regard to the designation of Special Landscape Areas within Powys. However specific sections of the plan have been amended to reflect the significance of the Powys Landscape this includes Objective 13 and the Development Management Policies.

Council Response:

0

Page 55

**Question: 3d. (i) Representation Details**

Representation Texts: Welsh Water ElanTrust or Elan Valley Trust as it is popularly known is a charitable trust charged with "the preservation, maintenance and enhancement for the benefit of the public of the area of great natural beauty comprising the Elan Valley and its natural aspect and features (and its animal and plant life)". To carry out this object it has a lease for 999 years of some 43,000 acres and owns the freehold of another 4,000 acres.

The Councils vision is .. "to provide sustainable development ... whilst celebrating protecting enhancing and making the most of its natural resources, native wildlife and habitats, heritage and distinctive characteristics". The Trust does not believe that the plan gives sufficient protection to landscape.

Whilst there is a reference to natural and built heritage; and to special qualities of Powys landscape and adjacent protected landscapes it is not made clear that there are in fact no protected landscapes within the area to which the plan applies i.e. Powys excluding the Brecon Beacons National Park. There is ample reference in connection with development proposals etc to have regard to certain national areas – protected SSSI's, and SAC's. These are protected for their scientific value rather than their landscape qualities.

The Structure Plan (1996) contained the following policy

"SPECIAL LANDSCAPE AREAS – proposals for development within or immediately adjacent to the following Special Landscape Areas must be appropriate and sensitive to their high quality and their special individual character and contain adequate measures to ensure that they will be satisfactorily integrated into the landscape;

The Wye Valley, the Upper Severn Valley, the Radnor Forest, the Western Uplands (i.e. Cambrian Mountains), the Berwyn Mountains including the Tanat Valley and Lake Vyrnwy, the border hills of eastern Montgomeryshire, and all Common Land".

While the presence of common land amongst specific areas may be an anomaly the other areas are those that would automatically spring to mind as being of high landscape value.

The Trust objected to the omission of the Special Landscape policy when the Unitary Development Plan was under consideration in the early 2000's. Two points on behalf of the Council made at the time were that SLA's were not scientifically based, and that there was no need for them – in that in Powys all of the landscape was of high quality.

by: Representation No

Filtered to show: (all of) Stage=V; Status=M

Rep'n/Para/Policy AccessNo DateLodgd Late? Status Modified Summary

3822.V1 20/07/2015  Summary: Objection to LDP with regard to protection of landscape

Source: Email Type: Objection Mode Oral (Examination) Status Maintained

However the following appeared in the Plan published in March 2010 at Para 4.4.5 on Page 45.

“In conjunction with the Countryside Council for Wales, the county council is developing a landscape database under the LANDMAP initiative. As part of the overall assessment of the environment the council intends to develop Supplementary Planning Guidance (SPG) in the form of a Landscape Assessment and Landscape Strategy for defined character areas based on the LANDMAP information. The information will be gathered in accordance with the process defined by the Countryside Council for Wales for LANDMAP”.

Why has this commitment apparently been jettisoned?

The European Landscape convention referred to the importance of landscape policy when it stated “landscape policy means an expression by the competent public authorities of general principles strategies and guidelines that permit the taking of specific measures aimed at the protection of, management and planning of landscapes – European Landscape convention, Article 1B(2000).

The predecessor of NRW – Countryside Council for Wales produced guidance on Special Landscape Areas in promoting their LANDMAP as a scientific assessment that the local authorities could use in recognising their SLA's. The Trust's letter of 8th August 2008 (enclosed) specifically raised this issue. This scientific approach has been adopted by both the two other councils within the Cambrian Mountains in respect of parts of their area – namely Carmarthenshire and Ceredigion.

Whilst the Trusts main interest may be in the Cambrian Mountains the principle is one of strategy for all the areas of landscape value within Powys.

The situation was endorsed by NRW in 2013 – “Special Landscape Areas are a non statutory designation applied by the local authority to define area of high landscape importance within their administrative boundary. Areas of high landscape importance may be designated for their intricate physical, environmental, visual, cultural and historical value in the contemporary landscape”.

Paragraph 13, page 19 of the Deposit states “the landscape of Powys is extremely diverse and includes upland landscapes and valleys that are scenically and historically important. Development which impacts on the landscape must be carefully managed and appropriately designed particularly in terms of visual impact”. Surely this no longer allows the approach being propounded by the Council that the whole of the county is of high landscape value resulting in no requirement for SLA's? The statement itself accepts that there are “landscapes and valleys” that need protection.

The Trustees believe there has not been sufficiently joined up thinking on the status of Landscape Areas. The Trust would like to illustrate this by reference to the example of the Elan Valley.

a)Its past and future is inextricably linked with that of the Cambrian Mountains in which it is situated but it has a number of unique characteristics.

b) Along with the earlier development of Lake Vyrnwy it is the only Victorian engineering scheme providing a clean water supply to a large recently urbanised people of a big city – within Wales.

c) The scheme stands as a monument to the ability of the engineers to produce a series of works which contribute to the creation of a unique landscape; the works have lasted without need of major refurbishment for more than 100 years.

d) Restrictions in the enabling legislation resulting in the absence of fencing on the watershed beyond that existing in 1892 have demonstrated the viability of agriculture on an enclosure basis which has been able to subsist without the chemicals – in general that is that have become pervasive since 1945 and still enjoys the virtues of hefting, and mutual self help within the community.

- e) Contributing to the semi natural landscape are :-
- The presence of more than a score of listed buildings
  - The Conservation Area of a Special Arts and Crafts Village as homes for those working in the continued management of the land.
  - A massive presence of ancient man whose extensive remains in this essentially undisturbed upland are continually being brought to light.
  - The existence of a number of areas as SSSI's and internationally significant for the diversity of habitat and presence particularly of upland birds and other wildlife in the extant meadow lands etc.
  - Remains of a number of mines from the 18th & 19th centuries etc.

f) Although much of this is protected through other specific legislation the existence of their combined features make the whole greater than the parts which should be noted in the development plan – and celebrated as such.

The above is merely an example of the way in which the recorded characteristics might be demonstrated in respect of each SLA that is indentified.

Developments and other proposals within the areas should reflect their ability to be accommodated without significant damage to, and where possible enhancement of the valued, historic, geological, ecological and cultural characteristics of the Special Landscape Area.

Council Response: 0

---

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: Reviewing all the recommendations made in the above representation, in order to help the Powys LDP sit in more comfortably with a Wales-wide approach. Notably taking into account the following organisations' work in maintaining and enhancing areas of high landscape value.

WG guidance,  
NRW advice,  
Neighbouring counties' provision of SLAs together with their SPGs

Council Response: 0

---

**Question: 4b Reason For Request To Speak At Hearing And Subject**

Representation Texts: There is an important issue of policy involved in the omission of a commitment to SLA's (Special Landscape Areas). The view of their strategic importance needs both emphasising, and the reason for their significance discussed.

Council Response: 0

Issue: 2015: Deposit Draft-01. Preparation, Process and Plan Strategy

Question Representation Texts

**Question: Council Response**

Representation Texts: The Council disagree with the proposed changes requested by the Representer. The Representer does not raise new issues or evidence which lead the Local Planning Authorities to change its conclusions with regard to the designation of Special Landscape Areas within Powys. However specific sections of the plan have been amended to reflect the significance of the Powys Landscape this includes Objective 13 and the Development Management Policies.

Council Response:

0

**Question: 3d. (i) Representation Details**

Representation Texts: The Cambrian Mountains Society (CMS) thanks Powys CC for this opportunity to comment on the Deposit LDP. The Society's comments are general in nature and as such fall under reference point 34.1 but throughout the representation links will be made to other parts of the documentation. The Society's major concern with the LDP is that it does not follow local, national or international ideas on sustaining and enhancing areas of high value landscapes. Many of the points the Society address here were presented in its 2014 Deposit Stage Representation but these have evolved over the last year.

.....

It is well known to PCC that CMS's preferred option for the Cambrian Mountains is to have the area designated as an Area of Outstanding Natural Beauty (AONB). Details of the Society's vision for the Cambrians can be found on its website: [www.cambrian-mountains.co.uk](http://www.cambrian-mountains.co.uk), navigating through the menu to 'AONB campaign.' As such the Society would hope that Powys' LDP has the flexibility to include further protected landscape designations. Although CMS's focus is on the Cambrians it would also point out that other areas of outstanding landscape quality are found in Powys and deserve more recognition. That the Authority is fully aware of such areas is evident from the topography map on page 8 of the Deposit with the Berwyns, Radnor Hills, Epynt, as well as the Cambrian Mountains pinpointed. In CMS's opinion all these areas are worthy of at least Special Landscape Area status (SLA) and the LDP should have in place Special Planning Guidance (SPG) to facilitate their protection. The SPG/SLA combination should help to inform all those concerned of the special qualities of each area and how any planning proposals might enhance not harm the area's special qualities. The Society notes that the LDP does make special mention of the Montgomery Canal as an outstanding feature within the County and that it has attracted both Site of Special Scientific Interest (SSSI) and Special area of Conservation (SAC) designations. Perhaps it too could be included as one of the County's SLA areas, albeit a very linear one.

That a strong landscape policy is an important element of any public administration's remit is clearly expressed by the European Landscape Convention:

'Landscape policy means an expression by the competent public authorities of general principles, strategies and guidelines that permit the taking of specific measures aimed at the protection, management and planning of landscapes'  
European Landscape Convention, Article 1b (2000)

The use of designations such as SLAs for areas of high landscape value have been used extensively in the land use planning system in the UK. Indeed in Edition 3, July 2010 of Planning Policy Wales the Welsh Assembly Government make it a requirement of local authorities to review the need for designation of SLAs. Previous to this, in response to WG's concern for special landscapes, CCW, an NRW legacy body, produced guidance note No. 1- Landmap and Special Landscape Areas – June 2008. Within both of these

Rep'n/Para/Policy AccessNo DateLodgd Late? Status Modified Summary

4349.V3 10/07/2015  Summary: Executive Summary - need for a policy on SLAs & SPGs

Source: Email Type: Objection Mode Written Status Maintained

documents the Geographical Information System (GIS) Landmap is strongly promoted as a formal scientific assessment tool that local authorities are advised to use in preparing SPGs concerning SLAs. Natural Resources Wales (NRW) still clearly see the benefits of SLA status:

'Special Landscape Areas are a non-statutory designation applied by the local authority to define areas of high landscape importance within their administrative boundary. Areas of high landscape importance may be designated for their intrinsic physical, environmental, visual, cultural and historical value in the contemporary landscape.'

NRW (2013 page 3)

It is of little use saying – all our county is of high landscape value, we do not need SLAs. This stance does little to protect the county's most valued countryside. Para 13, page 13, within the Key Issues and Considerations section of the Deposit states; 'The landscape of Powys is extremely diverse and includes upland landscapes and valleys that are scenically and historically important. Development which impacts on the landscape must be carefully managed and appropriately designed particularly in terms of visual impact.' Surely this paragraph alone points toward the implementation of SLAs!

In producing their LDPs neighbouring local authorities such as Carmarthenshire and Ceredigion have designated SLAs with linked SPGs. Carmarthenshire's SPG for Special Landscape Areas discusses the dilemma that whole of the county's landscape may be regarded as of outstanding quality. It moves on to how the authority successfully used Landmap's layering system, particularly focusing on the visual and sensory layer, to delineate a family of SLAs. Use was also made of CCW's Wales Tranquil Areas Map 2009 to help the authority in identifying 19 SLAs three of which are in the Cambrian Mountains. Notably the authority designated Mynydd Mallaen as an SLA to complement its status as an SSSI and Special Protected Area (SPA).

Ceredigion CC, as part of their LDP, has also produced what CMS regard as a very thorough SPG celebrating the Special Landscape Areas within the county. The SPG is clearly laid out including a location map for each SLA and key policy and management issues for that area. Again the authority makes extensive use of Landmap which they state in their LDP, "provides the basis of a consistent Wales-wide approach to landscape assessment." The County now has 13 SLAs two of which recognise the importance of the Cambrian Mountains (SLA12 – Northern Uplands and SLA13 – Southern Uplands).

.....

Nor does the LDP give ecosystem services any attention but in the linked Natural Heritage Topic Paper (Deposit version Paper, Jan 2015) the importance of these services and human well-being are highlighted as follows; 'The aim is to deliver benefits which increase human well-being, while also maintaining and enhancing ecological functions essential to continued delivery of ecosystem services' (page 59, para 7.19). CMS suggest that SLAs would be very appropriate areas for the Authority to put in action such ideas.

....

In conclusion CMS's preferred option for the Cambrians continues to be AONB designation, but it sees the setting-up of a network of SLAs across all three counties covering the Cambrian Mountains as a very positive move in safeguarding this unique landscape at the heart of Wales.

Issue: 2015: Deposit Draft-08.Minerals, Waste and Renewable Energy

Question Representation Texts

**Question: Council Response**

Representation Texts: The Executive Summary of the LDP (p.3) does not make reference to waste policy and therefore the Council does not agree that it requires amendment to reflect changes to national policy. The Waste Topic Paper which supports the LDP will be updated with the latest national policy and guidance.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: General Comments

I would advise wording changes to a number of the policies to ensure they are not overly restrictive and that they do not have unintended consequences.

I would advise the waste section is updated to reflect changes to national policy and the way in which we plan for waste. The terminology is not always correct.

I would advise looking again at the extent of minerals to be safeguarded within the LDP as the current areas are extensive and in my view safeguard mineral which is likely to be of little value.

I would advise reconsidering some of the monitoring targets and indicators.

Representation Texts: The Council agree to make amendments to the supporting text to address this issue, whilst it is planned that further work will be done through Supplementary Planning Guidance where NRW's input will be welcomed.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: (Contained in Cover Letter from Martin Cox, Head of Operations - Mid Wales, dated 16 July 2015)

Thank you for re-consulting Natural Resources Wales on the Deposit Draft of the Powys Local Development Plan (LDP). We have some comments and suggestions which are set out as follows and in Annex 1 of our response.

We note the Section 2.4 Key Issues and Considerations for the LDP and the statement under point 18 which states that the LDP must protect air, water and land resources and quality and prevent inappropriate development; it continues to state that the plan should ensure Special Areas of Conservation (SACs) do not suffer from increased levels of nitrogen deposition as a result of development in Powys. We welcome and support these statements. We also consider that the policies set out in DM1 and DM2 provide the mechanisms to generally ensure these environmental considerations are addressed through the plan.

However, as we highlighted during our discussions in September 2012 in response to the Pollution and Flooding Topic Paper (dated 34 September 2012), and where we advised you under your heading of Emerging Issues that "The main sources of pollution that enter into watercourses in Powys are generated through agriculture and nutrient runoff. This issue is set to increase due to the agricultural practices and trends that the county are experiencing in terms of large scale intensive farming. The LDP needs to recognise this."

This trend has continued in Powys, especially areas within the Wye catchment. We would therefore welcome urgent discussions with you to identify a plan policy to ensure development is directed away from the areas which are experiencing increased nitrogen levels to air and water. As drafted, we consider the lack of such a policy to be a serious omission from the LDP and we would forward to discussing this further with you.

Council Response: 0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: Discuss, identify, and include a new policy to address this - to ensure development is directed away from the areas which are experiencing increased nitrogen levels to air and water.

Additional material submitted

Document:Draft Deposit Written Statement 2015, p.3

Issue: 2015: Deposit Draft-01. Preparation, Process and Plan Strategy

Question Representation Texts

**Question: Council Response**

Representation Texts: The Council disagree with the proposed changes requested by the Representer. The Representer does not raise new issues or evidence which lead the Local Planning Authority to change its conclusions with regard to the growth strategy for Knighton. The Council considers that the proposed settlement hierarchy is sound, based on a robust methodology with levels of growth and site allocations supported by a wide range of supporting evidence including access to services. The Council maintains that the tiers of settlements identified accurately reflect their role, function and overall level of sustainability. The Council consider that the distribution of housing across the Settlement Hierarchy is based on a sound rationale which supports the delivery of the LDP strategy and the longer term viability of settlements considered capable of supporting sustainable growth. Please note that some housing figures have been revised since the Deposit Plan as a result of updating work on planning permissions and further evidence gathering regarding the deliverability of sites - refer to the Focussed Changes document for detail.

Council Response:

0

**Question: 3d. (i) Representation Details**

Representation Texts: The written statement is the result of condensing analysis and research set out in over 100 documents. These have used a vast array of published and derived statistics to support the plan for Powys as a whole but there has been no "reality check" to ensure that it makes sense at local level. If it can be shown to be inadequate in one locality, then only by coincidental offsetting errors in other localities can it be adequate at County level. I shall therefore undertake a reality check using the town of Knighton as an example.

Knighton had a population of 3007 in the 2011 census which is slightly down on its population of 3043 in the 2001 census. There is little evidence of any recent population increase. One of the main reasons for this is the closure of its largest employers: the tyre factory, the clothing factory and most recently Benson Heating. Public transport is very limited and it is simply not practical to use the limited rail and bus services to travel to work outside the town; living in Knighton but working elsewhere requires you to have a car. If you have not got a car to travel to work and with few new jobs in town, then you have to move elsewhere; thus the reduction in population. It is therefore surprising to see the Powys Local Development Plan set out a need for 133 new houses in Knighton (sites P24 HC1, HAI, HA2, and HA3, see page 77), given the town's reduced number of large employers and the low proportion of the house numbers planned for Knighton in the Powys Unitary Development Plan which have actually been completed.

It is notable that Knighton is not included in a Local Growth Zone (see paragraph 3.3.8 on page 21) and has no employment site allocations (see Table EI on page 48). It has been downgraded from an Area to a District Retail Centre in the retail hierarchy (see page 61) despite having a catchment area, accessibility and retail and service provision comparable with Llandrindod Wells, an AreaRetail Centre. Although Knighton is the town in Powys with the greatest need for new retail floorspace, (see Table 4.1 Powys Retail Study Addendum 2015, Nathaniel Litchfield & Partners), Powys County Council proposes that this should be allocated to Presteigne (see paragraph 7.2.3 Powys Local Development Plan Topic Paper, Economy — Town Centres & Retail Development). Together these mean that Powys County Council has given no regard to promoting employment in Knighton. With no regard for promoting employment in Knighton, how is this consistent with the need for 133 new houses?

Of course we know from paragraphs 3.4.22 to 3.4.24 on page 27 that house numbers have been allocated to towns on a pro rata basis with existing household numbers. To use this method of allocation while ignoring local employment issues is simply poor practice and means that the plan as a whole is an illusion!

Issue: 2015: Deposit Draft-14.Miscellaneous

Question Representation Texts

**Question: Council Response**

Representation Texts: The Representer's comments are noted, however whereby the LDP does include policies to protect the County's natural assets (such as landscape) and to enable tourist developments much of this representation falls outside the scope of the LDP.

Council Response:

0

**Question: 3d. (i) Representation Details**

Representation Texts: The Welsh Assembly Government Guidelines run to 12 chapters in regard to future local development plans across Wales. Powys County Council deals in detail with only Chapter 9 Housing.Powys County Council are expanding policies from the Unitary Development Plan 2010 which fail to take in to consideration the current Welsh Assembly Government's Guidelines July 2014 in regard to housing.Chapter 11 of the Guidelines from WAG focuses on Tourism, Sport and Recreation. Montgomeryshire has huge potential in these areas but the current draft Local Development Plan fails to acknowledge this or make suggestions for development. Tourism is supported by the Welsh Assembly Government guidelines provided it is made to 'grow in a sustainable way and to make an increasing contribution to the economic, social and environmental well-being of Wales'. (Chapter 11 Planning Policy Wales 2014).

Montgomeryshire

The landscape in Montgomeryshire is extremely varied and extends across a huge swathe of Wales from Llanymynech on the English border to within a few miles of the west coast near Machynlleth. The range of landscape and terrain makes it one of the most interesting but under developed areas in the UK with a population density of <0.1people/acre. The area extends to over 483 thousand acres with numerous foot paths and areas of open access. Its proximity to the West Midlands and the good communication links at its border to England makes Montgomeryshire favourably placed for developing sustainable tourism. Shropshire has been developing tourism in the West of the county and there are plans to extend the M54 to Shrewsbury, improving communications to Montgomeryshire.

Area of Outstanding Natural Beauty. (AONB)

There has been for some time a call to protect Montgomeryshire with the AONB status. There is considerable evidence to suggest that far from being an impediment to development, gaining such a status increases foot-fall and gives a boost to local sustainable tourism. In June 2014 in a Plenary Debate at the National Assembly for Wales the issue of areas of outstanding natural beauty were discussed. ...'they are also a national asset that we must utilise not only to lever additional benefits to our citizens, but to deliver a range of key policy objectives.'

Footpaths/Rights of Way

In 2007 DEFRA published a research document 'The Social and Economic Benefits of Public Rights of Way'. It is clear from their publication that the benefits of a well maintained network of public rights of way increases well being, health and prosperity to the surrounding communities.Many of the footpaths and rights of way in Montgomeryshire are neglected

Status Maintained

and the signage is poor or absent. People rarely have the self confidence to navigate from maps and barbed wire is a frequent impediment to an otherwise enjoyable walk. It is evident that where facilities exist the footpaths/rights of way will be used, ie Llanymynech Heritage Area, Pont Llogel, Dyfnant Forest.

Experience has shown that most land owners are not adverse to public access to their land provided that due care and consideration are shown. Below is a list of areas that could be developed with advantage to the local economy and well being of residents of Montgomeryshire:

- Long distance paths/routes
- Cross Wales walks
- Short circular walks
- Cycle tracks including forest tracks and use of disused railway tracks
- Forestry ways - when felling applications are applied for access ways could be created as through ways or circular ways rather than 'dead ends'.
- Parking provision for access to footpaths and rights of way, 2/3 bay parking at intersection with roads
- Special interest walks
- Hill fort walk
- Guided walks
- Humping (climbing of hills over 1000 ft)
- Art and sculpture trails
- Links and consultation with special interest groups such as Ramblers, RNIB, CTC, Fieldfare Trust, BTCV
- Publications, maps, books and internet sites, geocache
- Montgomery canal

Llanfyllin Gateway to the Berwyns and Vyrnwy:

Llanfyllin is situated at the end of the A490 with routes that lead on to Lake Vyrnwy and Bala across the uplands of the Berwyns. The route to Bala across the moor lands has been featured on many occasions in the media for its beauty and remoteness.

At present few visitors stop in Llanfyllin so there are little benefits for the local economy from being on the edge of such outstanding countryside. It would benefit the town greatly to become the 'Gateway' to the Berwyns and Vyrnwy.

It is important that this is not in name only but would entail an information centre, cycle hire, mapping, guided walks, accommodation information, development and good signage of local walks and economic support for new businesses supporting tourism.

There is a disused railway track that connected Llanfyllin with Llansantffraid and Oswestry. It would be a great boost to the area to redevelop this as a cycle/walk way. The disused railway between Dolgellau and the coast has been developed in this way and draws a large number of diverse cyclists and walkers to that area. Shropshire is developing cycle ways and developing West Shropshire as a tourist destination and it would be advantageous to Montgomeryshire to link in to these developments. There is no doubt that inward development in the infrastructure of tourists is needed in the North of the county.

Growth through demand:

This document is intended as a roadmap to creating sustainable regeneration for Montgomeryshire. If there are jobs and employment in the area enabling young people to stay after school then there will be a growth of the settlements through local demand not dogma. Montgomeryshire has huge potential and natural advantages. It requires vision and leadership to realise the benefits.

*Question Representation Texts*

**Question: Council Response**

Representation Texts: The Representor lists a number of topics which can be addressed as follows: Greenfield over Brownfield - Powys has very little viable brownfield sites that are suitable for housing, therefore in order to meet housing need greenfield sites need to be developed. Avoid large housing areas - The LDP Strategy is to use a Sustainable Settlement Hierarchy this involves directing development to areas that have access to services (towns and large villages), this also happens to be where previous housing developments have taken place. Access to employment - It is recognised that not every allocation is near employment provision but by being near a range of services, public transport and main roads residents will be able to access opportunities available. Reduce - carbon emissions - situating development in Towns such as Llanfyllin within walking distance of a range of services and Public Transport Links reduces carbon emissions compared to building in unsustainable locations in open countryside. Barrier free housing developments - the site in Llanfyllin is next has a pavement giving pedestrian access to the rest of the town. It is on the outskirts of Llanfyllin but there are no deliverable constraint free sites left that are closer to the Town Centre. Can develop evidence based housing - the need for housing has been determined at the Powys level and then distributed to the most sustainable locations within the County. Failure to work with housing authorities - All of the housing authorities are consultees on the plan in addition Powys has worked with the Authorities when compiling evidence in the housing topic paper and the Local Housing Market Assessment. LDP failed to work with the Community - again all the Community Councils are consultees receiving copies of the plan, however there has been a certain amount of Member involvement (local County Councillors) and various times when Town and Community Councils have been asked for their opinions on local needs and issues and candidate sites. No evidence that sustainability has been considered - the LDP strategy is based on a sustainable settlement hierarchy, all sites and policies have been subject to a Sustainability Appraisal and Strategic Environmental Assessment.

**Question: 3d. (i) Representation Details**

Representation Texts: Powys Local Development Plan (LDP) Draft 2014

1.3 The LDP has been prepared in stages in accordance with all relevant legislation, regulations and guidance. (Deposit Draft, July 2014 )

by: Representation No

Filtered to show: (all of) Stage=V; Status=M

Rep'n/Para/Policy	AccessnNo	DateLodgd	Late?	Status	Modified	Summary
6192.V2		17/07/2015	<input type="checkbox"/>			Summary: Observations relating to the LDP (regulations and guidance) - Llanfyllin
Source: Email			Type: Comment		Mode	Written
					Status	Maintained

The following paragraphs examine this statement and look at a selection of the regulations and guidance that Powys County Council assert that they have followed.

Planning Inspectorate

This is the Executive Agency in the Department for Communities and Local Government and the National Assembly for Wales

Local consultation

The Planning Inspectorate state in their guide to examining plan documents that it ' should have fully involved everyone who has an interest in the document. And they should have had the chance to comment.' The following points show that the consultation of the Powys County Council have failed to follow this, the first of the Planning Inspectorates requirements.

1. Insufficient consultation time. The period allotted for reposes 28 July to 8 September 2014 is too short for a considered response ( the main document is over 110 pages long).
2. Insufficient time for viewing. All public viewings occurred between 28 July and 7 August for 6 hours on each of only seven occasions in different locations across Powys. There is no permanent display of this material. No material was available for interested parties to take away and peruse.
3. The officers expected that the public would access the internet and navigate their way through an impenetrable list of files. Social research has shown that the public do not have universal access to the internet so there needed to be other ways of accessing the information.
4. Inadequate publicity. County Times ran an article on the inside pages on the 11 July. There was no notice outside the Llanfyllin Institute (6/8/14) and the officers in attendance seemed surprised when advised that this would have been a good idea.
5. No notices of the LDP were sent to any households adjacent to the proposed development site in Llanfyllin or presumably any other intended sites in Powys.
6. No notices were sent to any parties who had objected to planning permission being sought on the land now covered by the LDP.
7. Auspicious timing. It is a well known device to seek consultation or permission during the summer months for contentious projects as many people are away on holiday and their normal work patterns are disrupted. It is important that extra time is allocated for consultation during this period to ensure that everyone has access to the consultation.
8. Llanfyllin Town Council were informed that a LDC consultation was to take place but received no information as to its content or impact on the town of Llanfyllin.
9. There is no evidence that Mid Wales Housing Association or Grwp Cynefin who manage affordable housing in mid Wales were consulted.

That the Council has failed in its obligations within the first paragraph of the planning Inspectorate guide lines does not bode well for the rest of the requirements. Whether the LDP is "sound, shown good judgment and able to be trusted" we will examine in detail.

The Welsh Assembly Government also has guidelines and expectations regarding planning and development.

Welsh Government Planning policy Wales  
Chapter 9 Housing

9.1.1 Previously developed land ... over green field sites. All the proposed sites in Llanfyllin are green field sites.

...promoting community regeneration.. It is difficult to see how a large, solid block of new housing on the edge of the town will achieve this end. There seems to be no justification

or evidence for believing that this will be the case.

Social research has shown that it is exactly this sort of development which stresses communities and can lead to conflict and loss of cohesion ie. Westbury, Shropshire, Rhyl North Wales.

9.1.2 ...avoid large housing areas...

The current LDP is an extended and expanded UDP adopted 2010. This was outmoded thinking four years ago and the expansion of this policy indicates a complete lack of application, vision and fresh thought in regard to the Welsh Assembly's guidelines and current urban planning awareness.

...good access to employment ..

Llanfyllin has a weak and vulnerable economy. It only has two employers of any size and one of these is relocating within the next year. To survive as a vibrant town the economy needs to have a range of employment opportunities and to encourage small businesses, start ups and diversification. The current Powys LDP does not address any of these issues.

...reducing the carbon emissions generated by maximising energy efficiency and minimising the use of energy from fossil fuel sources ...

The current proposal, sites most of the new housing on a north facing slope. This does not enable the properties to take advantage of passive solar gain and will lead to the majority of the windows facing north which have an adverse impact on energy consumption. This is of greatest import when considering social and affordable housing to avoid fuel poverty. PowysCounty Council do not seem to have grasp the basic principles of sustainable development.

...barrier free' housing developments ... ie services and facilities available to all regardless of disability or age.

The proposed large development site has its entrance at the point furthest from the town. This will considerably add to peoples' travel time and since the route is uphill will encourage the majority of the new residents to use cars. The site has a considerable gradient which is not conducive to supporting mobility of those with disability. The proposal will lead to an extended ribbon development outside the town which will not be conducive to social integration and sense of community.

9.1.4...can develop evidence-based market ..

Current research indicates that there is only limited demand for housing in Llanfyllin with the waiting list for social housing being majorly for bungalows for the elderly. Where the predicted need for 171 houses over the next 10 years comes from is uncertain?

9.2.1 In planning the provision for new housing, local planning authorities must work in collaboration with housing authorities, registered social landlords, house builders, developers, land owners and the community ...

Powys County Council have failed to work with the above housing authorities and the community. The sole contact that has been made appears to have been the land owners who have previously expressed a desire to develop their land for building.

9.2.3 Local planning authorities must ensure that sufficient land is genuinely available or will become available to provide a 5-year supply of land for housing...

...economic development and related job opportunities are not unreasonably constrained.

Whilst the land that has been selected for development would be available theproceeding points make it clear that it is far from desirable and that it was pursued as it was the easy option. The residents of north Powys deserve a considered and holistic approach to future development not a 'knee jerk', ill considered 'quick fix'.

9.2.4 Local planning authorities, in partnership with the community balancing social, economic and environmental needs.

The current LDP fails to work with the community, fails to balance social and economic needs and certainly does not consider environmental factors. Llanfyllin has great potential as a hub for sustainable tourism as at present is a very attractive town, sited on the edge of an area of outstanding natural beauty, even though there is no official designation of such.

---

9.2.5 ..sustainability appraisal and should be fully justified.

There is no evidence to indicate that sustainability has been considered at all. If Llanfyllin is to have additional housing then there must be balanced development with employment, services and amenity along side.

This document looks purely at Chapter 9 of the Local Development Plan in Llanfyllin. Chapter 9 has been highlighted as this appears to be the only area in which substantive and concrete proposals are espoused. Of the other 12 chapters set out by the Welsh Assembly Government in their Planning Policy Wales Edition 7, Powys County Council has paid lip service with good intentions but a complete absence of fresh vision for a sustainable future.

Although this document has focussed on Llanfyllin there can be little doubt that the lack of care, foresight, application or professionalism would be evident in regard to the other targeted settlements. Powys County Council has a track record of ill considered proposals such as the amalgamation/closure of several thriving senior schools in North Powys. There seems to be no understanding of the hundreds if not thousands of hours that are spent addressing these debacles. The externalising of costs and expertise in this way is not acceptable and in a right and just world the Council would be charged for the time the Council's incompetence wastes.

Cc Carl Sargeant, Minister for Housing and Regeneration, WAG

Question Representation Texts

**Question: Council Response**

Representation Texts: This representation is addressed through a series of more detailed representations attached to representor 6235. These include the following responses regarding policies DM1 and DM2, and the Annual Monitoring Framework as outlined in this representation:

Following the representations received the DM1 and DM2 policies have been split into a series of topic based policies. This includes a revised policy on 'Landscape' which has been drafted to accommodate some of CPRW's recommendations. It is accepted that landscape is not included within the 'Annual Monitoring Framework' but national guidance states that "it is not realistic or necessary for all policies to be monitored". However the SEA that has been produced in conjunction with the plan does contain monitoring targets for landscape.

**Question: 3d. (i) Representation Details**

Representation Texts: A joint submission for the Powys County Council 2015 Draft Deposit Local Development Plan.

Montgomery and Brecon & Radnor Branches  
 Campaign for the Protection of Rural Wales  
 Previous Responder No. 6193

Written by: Christine Hugh-Jones, Jill Kibble, Eva Moore, Peter Seaman, Wendy Toomey, Margaret Tregear  
 Address for correspondence: Peter Seaman MBE. peter.seaman@btinternet.com  
 Brynhyfryd, Scethrog, Brecon, LD3 7EQ

1. The Campaign for the Protection of Rural Wales (CPRW), established in 1928, is Wales' foremost countryside charity. Through its work as an environmental watchdog it aims to secure the protection and improvement of the rural landscape, environment and the well being of those living in the rural areas of Wales – aims which we are sure that Powys County Council also shares.
2. This report is prepared by Committee Members of the Montgomery and Brecon & Radnor Branches of CPRW which represent all of Powys.
3. CPRW would like to acknowledge the hard work in research, consultation and drafting that goes into preparing a report of this nature. We welcome the opportunity to comment and we hope that we may contribute to development of the issues we have highlighted through future dialogue with Powys County Council.
4. In our comments, our principle concerns have been with the topics of Biodiversity, Landscape, Renewable Energy, Historic Environment and Tourism. Obviously these topics are inextricably interrelated and spread throughout the LDP. We fully understand the immensity of your task in analysing responses and we have rigorously followed the

Reference Number system. This has resulted in a lot of forms and 2 documents which could not be inserted into the response format. We list these below and would be grateful if you could check our list and acknowledge receipt of all items on the list.

5. All the documents are signed in my name (Peter Seaman) however this has been a collaborative work, with members grouping in different ways to concentrate on the topics and references covered in our responses. Therefore we request that any one of the authors above be granted the right to speak at an Inspector's examination of the LDP, according to the topic of discussion.

6. In this general introduction to our response, we would like to mention some salient general issues which it would be too laborious to repeat under multiple references:

- CPRW is concerned that the structure chosen of screening first by DM1, and then by DM2 for site specifics, has led to less clear policy. There is some overlap between DM1 and DM2 and often protections have been weakened by absence of dedicated policies.
- We have also found many instances of listing of specific items where other items which should be included are missed out and where an introductory comprehensive description, in clear unambiguous words, of what is to be protected or enhanced would strengthen policies and guidance.
- We have found that the monitoring framework fails entirely to address the majority of the issues we are most concerned about and, for many topics, we do not anticipate effective action.
- We question whether PCC has sufficient professional resources to monitor and implement many aspects of policy and we regret that the problem is sometimes exacerbated by the lack of basic data-bases.
- Uncertainty over NRW's role, particularly NRW's conflicting functions in both developing natural resources and protecting them is a serious concern and CPRW is particularly aware that NRW is devolving more and more biodiversity and landscape screening to LPAs. We fear that an expanding 'black hole' is appearing where neither side fully addresses the responsibility.
- Some very important biodiversity issues are ignored by the LDP: examples are intensive agriculture developments and full regard to river catchments.
- CPRW would welcome opportunities for the Council to liaise with the public and improve joint working with local Conservation Groups, including wild-life trusts.
- We cannot agree that the SEA and HRA documents have been fully successful in underpinning the LDP and demonstrating its compatibility with their aims.
- Finally, we regret that there is no evidence of a will to extend protection to new natural assets (for example habitat areas, new rights of way etc.) to compensate for losses.

7. Earlier this year, CPRW produced a Manifesto in response to the 2014 Draft Deposit LDP. We note that there have been a few changes in line with our comments but, by and large, our concerns remain the same. We enclose a copy of this document in support of our current response.

*Question Representation Texts*

**Question: 3d. (i) Representation Details**

Representation Texts: What the Report says

ER 4.1 says sufficient knowledge of existing base line conditions is essential to assessing significant effects of LDP. Potential adverse impacts of planning decisions are recognised: 'fragmentation of habitats is a common problem leading to the isolation of species within tiny areas and increasing the chances of them becoming extinct'. However, no data are presented about decline between 2002 and 2015, which we may presume is severe.

ER Tables 5.3 and 4.1 show that the SEA objectives 1 & 2 are limited to statutory and non-statutory designated sites, NERC s42 lists of habitats and species and the selection of these in the Powys LBAP - of which over half the habitats and 1 in 7 of the species (31) were already threatened in 2002.

ER 4.1 Baseline Data identify current trends and some indicators that could be used for monitoring.

Rep'n/Para/Policy AccessNo DateLodgd Late? Status Modified Summary

6235.V27 20/07/2015  Summary: Executive Summary - SEA Topic Biodiversity

Source: Email Type: Objection Mode Written Status Maintained

ER 7 NB. This section is much expanded from DDLDP 2014. It finds minor, non-significant negative effects of policies on biodiversity because Policies H1 E1 E3 (allocated sites), TD3 (Montgomery Canal) and M1 (minerals) are mitigated by DM1 and further unspecified 'recommended' mitigation.

Appendix 4 sets out the sources of information to be used for monitoring in better detail with a 5 yearly monitoring frequency.

What is wrong

- PPW 5.4.5 bullet points say development plans should include active measures for conservation and enhancement of landscape and biodiversity, including sites outside designated areas, open spaces, amenity, and also promote planting of trees, and measures to secure carbon sinks (increased vegetation cover).  
The base line data only relate to some of these requirements and the LDP does not address them all.

- RE1 (renewable energy) should have been included on the negative side and DM2.3 (site-specifics) on the mitigation side.

- ER7 statements about non-significant effects are not supported by planning experience. DMI says development must not 'compromise or unacceptably adversely affect' a list of things. This phrasing is weak and open to interpretation in any particular instance. A series of adverse affects, judged 'acceptable' can result in overall decline in biodiversity targets. DM2.3 requires a development to 'protect, positively manage and wherever possible enhance', to produce net biodiversity gain. Experience shows this is not considered for the majority of projects approved under delegated powers or by committee, and, where it is, there is no guidance or procedure to assess 'net gain'.

- The "task" in Appendix 4 is merely to review the information in order to identify change. There is no account of what degree of change is desirable or unacceptable and no evidence of a will to take effective action to remedy negative trends or secure positive ones. The outcome will be time-consuming box-ticking reviews whose conclusions are NOT translated into planning decisions via strong policies.

- Note that there are NO AMRs in the LDP Written Statement Appendix 3. This means that biodiversity, which generally recognised to be suffering unprecedented progressive decline is only monitored every 5 years with the first round expected in 2021 or 2, twenty years after the BAP habitat & s42 lists were created.

- Note also there are NO triggers or actions in the LDP related to Policy impact on biodiversity with the aim of halting or reversing negative trends through Planning Policy. 5 yearly biodiversity monitoring will presumably be the responsibility of NRW rather than PCC and since PCC is also short of qualified Ecological expertise PCC will be not be sufficiently involved in conserving and enhancing biodiversity and there will be no check to the creeping cumulative deterioration

Council Response:

0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: Suggested changes  
The SEA and LDP should be properly integrated to make sure development is required to provide a net gain for biodiversity through appropriate refusals and adequate mitigation/compensations schemes and that the LDP demonstrates a will to address the disturbing trends in Powys biodiversity.

Issue: 2015: Deposit Draft-01. Preparation, Process and Plan Strategy

Question Representation Texts

**Question: Council Response**

Representation Texts: These comments are noted however, no changes are considered necessary to ensure that the plan is sound. Note the plan was promoted and advertised in accordance with the LDP Delivery Agreement and the LDP regulations. The responsibility for promoting and publicing candidate sites rests with the proposer of the candidate site rather than the planning authority. Candidate sites have been in the public relm since 2011.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: We believe that inadequate measures were taken to bring the proposal and consultation period dates to the attention of the Glanrhyd residents and wish to complain about these procedural defects and omissions. Whilst we accept that there is no obligation to contact affected residents individually, nevertheless the lack of notices in the local press (The Brecon and Radnor Express newspaper is not distributed locally), the non-availability at the stated venues of a supply of forms for residents to use to submit their comments, and the obtuse and totally incomprehensible procedure for commenting via the council website have all contributed to the disservice to taxpayers. The consultation period is resultantly shorter than envisaged and has therefore compromised our valid interests. This is not only contrary to natural justice but may also contravene the Council's own policy on this issue.

Am also appalled to hear that the five plan for seeking new sites began in 2011 and has only come to our attention a month ago, with objections needing to be in by 20th July. It makes us wonder if things have been deliberately kept quiet

Council Response: 0

**Question: 4b Reason For Request To Speak At Hearing And Subject**

Source: Website registration Type: Objection Mode Written Status Maintained

Document:Draft Deposit Written Statement 2015, p.3

Issue: 2015: Deposit Draft-07.Employment, Retail and Tourism

Question Representation Texts

**Question: 3d. (i) Representation Details**

Representation Texts: I am surprised that the Plan contains virtually no reference to agriculture, either in terms of support for appropriate agricultural development, or prevention of inappropriate development. My particular concern is with the latter, and I have a specific point to make with reference to large intensive livestock units. These can have a very considerable impact on the environment and landscape, and constitute a significant current trend in rural development. Since there appears to be no section of the Plan relating to this I am making my point here.  
The previous UDP had a separate policy (EC10) which related specifically to intensive livestock units, however there was no definition of these, leaving planning officers with little guidance in interpreting whether a development was or was not an 'intensive livestock unit'. I suggest that the new Plan should deal with the question of intensive livestock unit development (considering such schemes, as the UDP did, as a kind of industrial development, and requiring proper assessment of their environmental impact) and should include definitions of large intensive livestock units in the various sectors (poultry, dairy etc).

Council Response: 0

**6303 Lewis, Mr Kevin**

Rep'n/Para/Policy AccessnNo DateLodgd Late? Status Modified Summary

6303.V1 18/07/2015  Summary: Broadband in rural areas

Source: Website registration Type: Objection Mode Written Status Maintained

Document:Draft Deposit Written Statement 2015, p.3

Issue: 2015: Deposit Draft-14.Miscellaneous

Question Representation Texts

**Question: Council Response**

Representation Texts: The Council disagree with the proposed changes requested by the Representer. The Representer does not raise new issues or evidence which lead the Local Planning Authority to change its conclusions.  
The LDP recognises the importance of utility service improvements including telecommunication developments which can bring much needed access to broadband coverage vital to the sustainability of rural communities and economies. The plan also includes polices that would support appropriately located telecommunications development and opportunities for employment proposals in rural settlements.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: The plan makes very little (none?) reference to the opportunities afforded by the introduction of faster internet (fibre broadband) coming to rural areas. This will have a profound effect on the way we work, travel, shop, access services and where we live. Already in Powys there are people who work from home having moved to the area for the quality of life. The plan dismisses rural settlements from growth areas when in reality skilled workers from other regions are taking the opportunity to move to rural areas bringing with them disposable income that will boost local economies.

Council Response: 0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: Change policies on development to recognise and encourage the opportunities afforded by better, faster connectivity to the internet.

Council Response: 0

<hr/>						
<i>Question</i>	<i>Representation Texts</i>					
<b>Question:</b>	<b>Council Response</b>					
Representation Texts:	The comments are noted. The Council disagrees that the Plan lacks flexibility to deal with the next 10 years. The LDP is a land-use plan based on robust evidence. The LDP monitoring and review process will be used to ensure that Plan is kept up to date and is meeting its overall aims and objectives. No changes to the Plan are considered necessary in response to this representation. Please note however, that the Deposit Plan is now subject to a number of proposed Focussed Changes - see the separate Focussed Changes document for detail.					
Council Response:						0
<hr/>						
<b>Question: 3d. (i)</b>	<b>Representation Details</b>					
Representation Texts:	Having read the LDP and the Exectutive Summary the LDP lacks boldness and flexibility. Changes in economics, technology and social need are rapid and this plan lacks the flexibility to deal with the next 10 years. The LDP seems to dwell in the past and is resistant to change.					
Council Response:						0
<hr/>						
<b>Question: 3d. (ii)</b>	<b>Desired changes to Document</b>					
Representation Texts:	The plan needs to have greater flexibility to meet the rapid changes that modern society needs. Its a 2D policy in a 3D world.					
Council Response:						0
<hr/>

Rep'n/Para/Policy AccessnNo DateLodgd Late? Status Modified Summary

6360.V1//TD1 18/07/2015  Summary: Tourism - Comments on Supporting Evidence

Source: Email Type: Comment Mode Written Status Maintained

Document:Draft Deposit Written Statement 2015, p.65

Policy: TD1

Issue: 2015: Deposit Draft-07.Employment, Retail and Tourism

*Question* *Representation Texts*

**Question: Council Response**

Representation Texts: These comments are noted and the Council agrees to amend the text. The evidence base supporting the LDP refers to other tourism assets besides the Montgomery Canal and appropriate consideration will be given to them. See Focused Changes for details.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: The supporting evidence for the Tourism policies creates a misleading picture

Re Tourism Topic Paper Paras:4.2.4, 4.2.5, 4.4.1, 4.4.2. and Fig.1

1) The report creates a misleading picture of the importance of day visits to Powys: it is clear from para 4.2.4 that the picture is mixed, with Radnorshire only attracts 16% and generalisations should be avoided. More importantly, Fig 1 fails to mention Offa's Dyke National Trail which attracts a large number of tourists and for which figures are available.

2) This failure to mention the Offa's Dyke and Glyndwr's Way National Trails as major tourist attractions (either existing as for Offa's Dyke and potential as for Glyndwr's Way) is replicated at the paragraph numbers referenced above. This is particularly hard to understand given the importance of walking to the tourism sector in Powys.

3) In contrast, there is an overblown fixation with the Montgomery Canal, no doubt flowing from a meeting held. Whilst we do not object to some support being voiced for work relating to the canal, it forms a disproportionate element of the paper and thus also of the proposed policy headings. Support which appears to be based upon optimistic and wishful thinking rather than any hard evidence being evinced for the quoted benefits.

Council Response: 0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: We would prefer to see a more balanced paper which recognises more specifically the importance of the National Trails, and of walking and cycling as key strategic sub-sectors worthy of specific support in the policy objectives/documents.

Council Response: 0

Document: Draft Deposit Written Statement 2015, p.3

Issue: 2015: Deposit Draft-07.Employment, Retail and Tourism

*Question Representation Texts*

**Question: Council Response**

Representation Texts: These comments are noted. However, the Council is reliant on evidence provided during the plan preparation process and the externally sourced retail needs assessment identified need across the County. Presteigne and Knighton are afforded the same status in the retail hierarchy so one centre is not favoured over the other. Therefore no changes are considered necessary to ensure that the Plan is sound.

Council Response:

0

**Question: 3d. (i) Representation Details**

Representation Texts: The supporting evidence for the Retail policies are flawed and assessments fatuous.

Re: Powys Retail Study Addendum 2015 and Topic Paper: Economy - Town Centres & Retail Development

Addendum Paras: 4.14, 4.18, 4.24, 5.5 and  
Topic Paper Para: 7.2.3

This Representation cross references with RefPoint 34.74

The above references contain some totally fatuous assessments and conclusions relating to Presteigne and Knighton. These are based on the existence of a large foodstore in Knighton and the absence of one in Presteigne, thus Knighton is seen as gaining expenditure which is 'leaking' from Presteigne.

The fact is that this is just one retail sector out of many and there is effectively only sufficient demand for one large foodstore in a rural area with a low population and that happens to be in Knighton. The argument that this is solely responsible for drawing money out of Presteigne is laughable and has no relevance in today's society. There is no analysis of the amount of expenditure drawn away to the larger centres of Leominster and Ludlow with their chain supermarkets and discount retailers; nor is there any recognition of the volume of expenditure in both Presteigne and Knighton which is targeted at on-line food shopping (or indeed any on-line shopping).

There is therefore no case for favouring Presteigne above Knighton in terms of favouring new retail developments. The fact is that they are both small market towns which are in need of economic support through successful retail developments and neither should be advantaged or disadvantaged over the other.

Council Response:

0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: There is no case for favouring Presteigne above Knighton in terms of favouring new retail developments. The fact is that they are both small market towns which are in need of economic support through successful retail developments and neither should be advantaged or disadvantaged over the other.

Question Representation Texts

**Question: Council Response**

Representation Texts: The Council note your comments which will be taken into consideration in the forthcoming SPG.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: The Community Council strongly support the adoption of the core values for the 'Central Area' (Wales Spatial Plan Update) and in conjunction with the partnership approach of the One Powys Plan (2.3.9) and the Regeneration Action Plan accepts these as appropriate guiding principles for the LDP until 2026: High quality living and working in smaller scale settlements set within a superb environment, providing dynamic models of rural sustainable development, moving all sectors to higher value activities' (2.3.4).

In particular we would support the principle that: 'Development which impacts on the landscape must be carefully managed and appropriately designed particularly in terms of visual impact'. (Environmental Consideration Pt 13). However, the parameters for achieving this principle are not apparent in many aspects of the DDLDP and must be made transparent in further SPG guidance for clarity of purpose and to assist statutory consultees.

Source: Email Type: Objection Mode Written Status Maintained

Document:Draft Deposit Written Statement 2015, p.7, para.2.0

Issue: 2015: Deposit Draft-01. Preparation, Process and Plan Strategy

Question Representation Texts

**Question: Council Response**

Representation Texts: The Council notes these comments and agrees to amend 2.2.4 to reflect the historic environment beyond that of built heritage designations, however not as recommended by the representor listing individual types of designations, as this would necessitate the listing of all types of designations. It is proposed instead to refer to the designations collectively as historic and built heritage designations. The Council also agrees to amend 2.3.3 as recommended to match the content of PPW. The Council notes the proposed text change to 2.4.10, but considers no change is necessary to ensure the Plan is sound, as general reference to 'heritage' is appropriate in this context.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: The LDP should be clear about the primary obligation to protect the historic environment which is embedded in National Policy and has been upheld in Appeals and Law Courts. The LDP should use clear language about the full range of elements of the Historic Environment to be protected.

Council Response: 0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: 1. Paragraph 2.2.4 (page 9): Insert: 'Scheduled Ancient Monuments [SAMs] and entries in the Sites and Monuments Record' after 'built heritage designations' to read:

'.....built heritage designations, Scheduled Ancient Monuments [SAMs] and entries in the Sites and Monuments Record within Powys'

2. Paragraph 2.3.3 (page 10): Insert: 'while protecting' after 'amenity in the use of the land' to read:

'.....amenity in the use of land, while protecting natural resources and the historic environment.

3. Paragraph 2.4.10 (page 13): replace 'heritage' with 'historic environment' to read:

10. 'Visitors to Powys are drawn to the area for its outstanding scenery, historic environment and recreational activities. Protecting these attractions and supporting a sustainable and year-round tourism sector is a must for the LDP.'

Council Response: 0

<i>Question</i>	<i>Representation Texts</i>
-----------------	-----------------------------

**Question: Council Response**

Representation Texts: Thank you for your comments. A Focussed Change has been proposed to para 3.3.8. of the LDP. However the Council does not consider it necessary to include more detail on Local Growth Zones (LGZs) in the LDP as the LGZ concept continues to be developed with the support of the Welsh Government. LGZs are primarily an economic development initiative, and although relevant to Planning are not a land-use centric spatial strategy. The LDP is thus supportive but not the main tool for implementation. More detail on LGZs can be found on the Welsh Government website and further enquiries can be addressed to the Council's regeneration team.

Council Response:	0
-------------------	---

**Question: 3d. (ii) Desired changes to Document**

Question Representation Texts

**Question: Council Response**

Representation Texts: "Thank you for your representation. The strategic direction of the Powys Local Development Plan was determined at the Preferred Strategy Stage. The Council are not in a position to propose any changes at this stage that go to the heart of the Plan. Whilst the concept of a Central Growth Corridor was explored it was not brought forward into the Deposit Plan. Policy T1 supports appropriate transport infrastructure and traffic management improvements and seeks to support good transport links and development management policy safeguards key transport corridors (including the Heart of Wales Rail line) from incompatible development. Following consideration of representations received the Council propose to amend Policy T1 to make reference to Welsh Government priorities for promoting growth and sustainable jobs, tackling poverty, and ensuring sustainable rural communities. This amendment strengthens the emphasis on opportunities offered by such projects as the Heart of Wales line. See Focussed Change for details."

Council Response:

0

**Question: 3d. (i) Representation Details**

Representation Texts: Powys CC Revised Draft Deposit LDP for period 2011-2026

Representation by the Calon Cymru Network CIC

In making this response to the latest draft of the Powys Local Development Plan The Calon Cymru Network (CCN) is aware that Powys County Council has a large and heterogeneous area under its jurisdiction, with many diverse challenges consequent on a sparse population and struggling rural economy. The Local Development Plan, as drafted, references the Wales Spatial Plan 2008 which was based on the concept of settlement clusters and internal and external links and which recognised, through a settlement and retail hierarchy, that there are spatial links between the provision of retail, employment and housing. However these links were schematic and did not reflect transport infrastructure.

In paragraph 3.4.1 of the LDP written draft, under the section heading of 'Spatial Strategy-Where is development planned?' it is stated that: 'Having identified the main development needs in Powys for the plan period 2011-2026 it is important that the plan develops a spatial strategy to guide and distribute development to sustainable locations in accordance with the LDP'S objectives.' These sustainable locations relate wholly to the existing settlement pattern and mirror closely the current hierarchy of scale across the county.

Development needs over the plan period are predicted using standard projection methods based on current trends and, to that extent, the outcome is necessarily reactive rather than proactive (in other words seeking to meet perceived demands rather than actively encouraging new forms development, growth and enterprise).

In this respect the LDP very much follows the formula and policy structure of the current Unitary Development Plan and follows the now, potentially, superseded 2008 strategic approach.

Rep'n/Para/Policy AccessNo DateLodgd Late? Status Modified Summary

4889.V1/3/ 20/07/2015  Summary: The LDP Strategy - Consider Transport Infrastructure/Rural Heartland/Mid Wales Area Issues

Source: Email

Type: Objection

Mode Written

Status Maintained

CCN would respectfully suggest that there is a substantial missed opportunity here, particularly in relation to the rural heartland of Powys and Mid Wales generally, and this for two principal reasons:

1) There is a lack of emphasis on the opportunities offered by the Heart of Wales Railway Line which Welsh Government Policy is now committed to supporting in terms of improved infrastructure and services\*. This transport link provides a valuable and sustainable 'spine' inherited from the C19 but with increasing relevance to the development requirements of the C21 and beyond. The approach to growth evidenced in the LDP gives little attention to this infrastructural resource as a focus for, and stimulator of, future development of a sustainable nature for which the Mid Wales environment is ideally suited.

2) The Planning (Wales) Act 2015 has now been passed and offers a new approach for Local Authorities to consider and potentially cooperate across current administrative boundaries, namely the formation of Strategic Planning Areas to which LDPs can refer and evolve as an integral part of implementation.

At present a long-standing emphasis on the north and south of Wales continues to be reflected in Welsh Government's thinking but CCN is firmly of the view that there is a strong case for the consideration of a Mid Wales Strategic Planning Area focussed on the Heart of Wales Line.\*\* Much depends on the Authorities in Mid Wales persuading Welsh Government that such an approach is necessary and viable.

Whilst it is acknowledged that the LDP process, by its very nature, sits below the level of strategic planning it should be capable of providing a firm basis upon which a strategic approach can be built.

In this respect CCN urges Powys County Council to consider providing a policy template, within the LDP, for development in the centre of the County which will maximise the usage of the existing transport corridor with a view to seeking the establishment of a Mid Wales Strategic Planning Area and the eventual production of a Strategic Development Plan which can go some way to redressing the Regional imbalance in Wales.

\*CCN is currently working with the Heart of Wales Line Forum to establish The Heart of Wales Line Enterprise Network (HoWLEN). This project started in February 2015 and has received financial support from Mrs Edwina Hart, Minister for Economy, Science and Transport. HoWLEN is using a pioneering not-for-profit Company to make the line a key part of the delivery of new employment and sustainable regeneration along its route and in nearby communities.

\*\* The HoWLEN project is seen as a potential model for economic regeneration capable of being adopted by other rural railways, notably the Cambrian Line in Powys.

Issue: 2015: Deposit Draft-01. Preparation, Process and Plan Strategy

*Question Representation Texts*

**Question: Council Response**

Representation Texts: The basis for the Council's vision is set out within the Topic Paper LDP Strategy Deposit Version. The Council's vision has been informed by the One Powys Plan, the Wales Spatial Plan, statements of national, regional and local plans, strategies and programmes, key issues and considerations, and other strategies and plans; the Council's Committees and two Community Council liaison meetings; consultation comments received during the LDP process; and the informing plan assessments. The Council notes the concern raised by the Representor that the vision puts the economy first, however the Council considers that the need to protect and enhance native wildlife and habitats in the County is adequately reflected in the vision, and that economic development can be carefully managed in order to protect the County's natural heritage assets. No changes are considered necessary to ensure that the Plan is sound.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: "Our Vision of Powys 2026" as it stand is, we believe, a missed opportunity. Powys County Council appears to be putting the economy first and hoping that our natural environment will be resilient enough and we will get away with not experiencing continued biodiversity loss, neither will we suffer the worst effects of climate change.

Council Response: 0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: The Wildlife Trusts would like a vision that puts nature first.

The vision seems to suggest that jobs and housing is the driving force of the economy. We believe that in order to create a truly prosperous, sustainable and positive future for Powys, its people and visitors; its landscape, wildlife and natural heritage come first. Our natural environment is what makes Powys the "green heart of Wales".

We believe the overall vision needs a complete re-think.

Document:Draft Deposit Written Statement 2015, p.17, para.3.2.1

Issue: 2015: Deposit Draft-01. Preparation, Process and Plan Strategy

Question Representation Texts

**Question: Council Response**

Representation Texts: The Council agree to make the following changes: to insert 'outstanding landscapes' in the vision to read "As the 'green heart of Wales', Powys will be a place of vibrant and resilient communities providing sustainable development and economic opportunities set in a healthy, safe environment, whilst celebrating, protecting, enhancing and sustainably managing its natural resources, native wildlife and habitats, heritage, outstanding landscapes and distinctive characteristics."

Council Response:

0

**Question: 3d. (i) Representation Details**

Representation Texts: The Cambrian Mountains Society (CMS) thanks Powys CC for this opportunity to comment on the Deposit LDP. The Society's comments are general in nature and as such fall under reference point @34.1 but throughout the representation links will be made to other parts of the documentation. The Society's major concern with the LDP is that it does not follow local, national or international ideas on sustaining and enhancing areas of high value landscapes. Many of the points the Society address here were presented in its 2014 Deposit Stage Representation but these have evolved over the last year.

CMS supports the Authority's Vision for Powys 2026,@34.5. As the County sits in the 'green heart of Wales' CMS sees great value in 'celebrating, protecting, enhancing and making the most of its natural resources, native wildlife and habitats, heritage and distinctive characteristics.' The Society, however, is very concerned that this vision statement does not specifically draw out the outstanding landscapes within the County.

.....

In conclusion CMS's preferred option for the Cambrians continues to be AONB designation, but it sees the setting-up of a network of SLAs across all three counties covering the Cambrian Mountains as a very positive move in safeguarding this unique landscape at the heart of Wales.

Council Response:

0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: Reviewing all the recommendations made in the above representation, in order to help the Powys LDP sit more comfortably with a Wales-wide approach. Notably taking into account the following organisation' work in maintaining and enhancing areas of high landscape value.

WG guidance,  
NRW advice,  
Neighbouring counties' provision of SLAs together with their linked SPGs.

Issue: 2015: Deposit Draft-01. Preparation, Process and Plan Strategy

Question Representation Texts

**Question: Council Response**

Representation Texts: The Council disagree with the proposed changes requested by the Represor to the vision of the LDP. The basis for the Council's vision is set out within the Topic Paper LDP Strategy Deposit Version. The Council's vision has been informed by the One Powys Plan, the Wales Spatial Plan, statements of national, regional and local plans, strategies and programmes, key issues and considerations, and other strategies and plans; the Council's Committees and two Community Council liaison meetings; consultation comments received during the LDP process; and the informing plan assessments. The Council notes the concern raised by the Represor that the vision puts the economy first, however the Council considers that the need to protect and enhance native wildlife and habitats in the County is adequately reflected in the vision of the LDP and its policies, and that economic development can be carefully managed in order to protect the County's natural heritage assets. No changes are considered necessary to the vision to ensure that the Plan is sound.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: We are disappointed that PCC appears to be putting the economy first and hoping that our natural environment will be resilient enough and we will get away with not experiencing continued biodiversity loss and the worst effects of climate change. The vision seems to suggest that jobs and housing are the driving force for Powys. This is a mistake. Our natural environment is what makes Powys the 'green heart of Wales'. We believe the overall vision needs a complete re-think.

Council Response: 0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: Montgomeryshire Wildlife Trust urges PCC towards a vision with the natural environment at its heart.

Council Response: 0

Issue: 2015: Deposit Draft-01. Preparation, Process and Plan Strategy

*Question Representation Texts*

**Question: Council Response**

Representation Texts: The Council notes the concerns raised. The Plan has been amended to address these issues including the addition of a dedicated Development Management Policy on the Protection and Enhancement of the Historic Environment.

The Council notes the proposed text change to the wording of the Vision but considers no change is necessary to ensure the Plan is sound, as general reference to 'heritage' is appropriate in this context.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: 1. The DDLDP Vision includes the protection and enhancement of important material assets. It is difficult to reconcile 'enhancement' with any of the policies. Without positive measures and monitoring this remains a laudable aim without any tools for achievement. (Fails CE3)

2. The LDP should be clear about the primary obligation to protect the historic environment which is embedded in National Policy and has been upheld in Appeals and Law Courts. The LDP should use clear language about the full range of elements of the Historic Environment to be protected. (Fails C2 and CE1)

Council Response: 0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: 1. Describe how protective and enhancing measures will be implemented and incorporate into monitoring framework.

2. replace 'heritage' with 'historic environment' to read:  
'...whilst celebrating, protecting, enhancing and sustainably managing its natural resources, native wildlife and habitats, historic environment and distinctive characteristics.'

Council Response: 0

**Question: 4b Reason For Request To Speak At Hearing And Subject**

Representation Texts: See representation above

See also Point 5 from Rep V1:

5. All the documents are signed in my name (Peter Seaman) however this has been a collaborative work, with members grouping in different ways to concentrate on the topics and references covered in our responses. Therefore we request that any one of the authors above be granted the right to speak at an Inspector's examination of the LDP,

*Question*                      *Representation Texts*

**Question: Council Response**

Representation Texts: The Council disagree with the proposed changes requested by the Representor. The representor does not raise new issues or evidence which lead the Local Planning Authority to change its conclusions. Objective 2 relates to sustainable settlements and communities in the context of the sustainable settlement hierarchy. Objective 14 supports healthy communities and healthy lifestyles and already includes a reference to ensuring development (which would include residential, town centre, employment and educational development) provides opportunities for walking, cycling and open and play spaces. No change to the objectives is required.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: Objectives 2 and 14 should refer to development of safe walking and cycling routes between homes and other major land uses.

Council Response: 0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: Add to criteria 2 and 14 a reference to providing safe walking and cycling routes between residential areas and town centres, employment areas and educational facilities. This relates to representations by Powys Ramblers on Policy T1 (rep 2037).

Council Response: 0

Question Representation Texts

**Question: Council Response**

Representation Texts: The Council disagree with the proposed changes requested by the Representer. The Representer does not raise new issues or evidence which lead the Local Planning Authority to change its conclusions. Planning Policy Wales Paragraph 4.7.8 addresses development in the open countryside and as such this information should not be repeated in the LDP.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: Objective 3 includes a general presumption against inappropriate development in the countryside. This is an important policy statement rather than an objective. The objective is to protect the natural beauty of the countryside.

Council Response: 0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: The presumption against inappropriate development in the countryside should either be moved to Policy DM1 or repeated in that policy.

Question Representation Texts

**Question: 3d. (i) Representation Details**

Representation Texts: The Deposit Plan and the Powys Employment Needs Assessment (October 2012) recognises that the proposed 49ha provision is considerably higher than take up rates during the UDP period, and higher than the estimated future land required.

We recognise that the level of provision should reflect expected demand whilst allowing flexibility in the type, location, and scale of sites. However, we remain concerned regarding the deliverability of the proposed level particularly given that the Assessment states the "low levels of historic take up, coupled with a weaker economic outlook across the LDP period compared to the preceding 15 year period suggest the results of the quantitative assessment will be very challenging to deliver, particularly with adverse development economics in Powys and a constrained public sector."

We therefore have concerns regarding the realistic delivery of the proposed level of land allocated for employment, and consider that it fails to meet Test of Soundness CE2

(note: this rep text contained in Annex 1 to NRW letter)

Policy: RE1

Issue: 2015: Deposit Draft-08.Minerals, Waste and Renewable Energy

Question Representation Texts

**Question: 3d. (i) Representation Details**

Representation Texts: From a strategic point of view, the County Council has taken the view that all that it is required to do is to ensure that the electricity consumption of the whole of the County is equalled by the generation of electricity from renewable sources. This is immensely naive, since it has been clear for a very long time that this is not the strategic approach to renewable energy that the Welsh Government has been operating since the adoption of TAN 8 in 2005.

That approach involved the identification of seven strategic search areas – where each Council was expected to meet its own needs for renewables, but on the basis of the best sites across Wales to meet the Welsh Government’s targets and aspirations for the coming years. It is clearly understood that Powys CC did not willingly accept two of the SSAs in their Area as well as part of a third, and that that was reflected in the UDP preparation in the period after 2005 whilst they indicated that they would be lobbying WG to reduce the extent of the commitments that Powys was being expected to make. The result of their new “Objective-led approach” in the LDP is that they do not accept the figures set out in TAN8 and hence the whole basis of Welsh energy policy that has been in place for 10 years. At 3.2.1 they set this out in Objective 5 and it is reinforced in the text supporting RE1 from 4.10.6-4.10.8. Their aim here is to ensure that a further 50MW of installed capacity of renewable energy generating equipment is achieved by 2020. The sole basis for this approach, which is diametrically opposite to that of WG, is that this would equate to the entire energy consumption of Powys and is therefore the proportionate response that the County should make to Welsh energy needs.

The reality is that this approach simply ignores all the figures set out in TAN8. That looks at having an extra 430MW of onshore wind (let along any other renewables) in SSA Area B, of which only a very small amount has to date been consented. In Area C, the figure is a further 98MW, of which none can come from two of the schemes awaiting their decision after the Mid Wales conjoined inquiry, since they are on the Welsh Government’s own admission not within the SSA as defined and will not count towards its figures. Only a few weeks ago, consent was granted on appeal for a total of up to 49MW at Garreg Lwyd in Area C on a 17 turbine wind farm opposed by the County Council, and which takes up on paper the entire allowance that is being provided for by Powys in their LDP Objectives for the whole of their area.

Of the three SSAs in part or entirely within Powys, the figures at the start of 2015 were that 109MW of the 430MW needed under the SSA approach had been built or consented in Area B; none of the 98MNW needed in Area C had been built or consented; and none of the 212MW in Area D had been built or consented (although it is unlikely that more than approximately 30MW might have been expected to come from their area). Thus as of the time when this policy was being finalised, there was a shortfall against the national policy strategic approach of the order of about 558MW inside Powys – more than ten times the amount that they now still state in the text for their LDP is what they seek to achieve.

Council Response: 0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: Development both within and outside of TAN 8 should not be excluded where appropriate sites are identified, and can actively contribute towards WG targets on suitable sites. The suggested threshold of 50MW is considered to be inadequate and overly restrictive.

Council Response: 0

*Question Representation Texts*

**Question: Council Response**

Representation Texts: The Council does not feel that it is necessary to make the recommended changes to this objective the detail requested from the representor is included later in the plan within the detailed policy.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: "Objective 4: Climate Change and Flooding: To support the transition to a low carbon and low waste Powys through all development, including the reduction of waste to landfill and by directing development away from high flood risk and, where possible, to reduce or better manage existing flood risk for communities, infrastructure and businesses."

PPW7 13.3 sets a higher bar for active management of flood risk in relation to development than evidenced in this objective. This LDP objective should explicitly recognise the potential for flood risk reduction through development design and conservation of landscape features with a capacity for water retention, such as flood plains and upland water catchments.

Council Response: 0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: CPRW suggest the following rewording:  
 "Objective 4: To support the transition to a low carbon and low waste Powys through all development, including the reduction of waste to landfill and by directing development away from high flood risk sites. and, where possible better manage existing flood risk for communities, infrastructure and businesses Incorporate active measures to reduce flood risk to existing communities, infrastructure, businesses and permitted development through regulation of impermeable surfaces and by actively improving permeability in upland water catchments and along waterways through peat and vegetation/tree management."

Council Response: 0

**Question: 4b Reason For Request To Speak At Hearing And Subject**

Representation Texts: See representation above

Document:Draft Deposit Written Statement 2015, p.18, para.3.2.2

Issue: 2015: Deposit Draft-08.Minerals, Waste and Renewable Energy

**Question**      *Representation Texts*

**Question: 3d. (i)      Representation Details**

Representation Texts: Objective 5 sets out targets over the plan period for an additional 50,000KW renewable energy, 30,000KWt renewable biomass and 16,000KWt building integrated heat technology. Paras 24-31 of the Topic Paper 'Renewable and Low Carbon Energy' (Topic Paper) make clear the renewable energy target is intended to be achieved through onshore wind development, excluding 'strategic' developments over 25MW.

However, UK National Policy Statement EN1 (para 3.1.2) does not support technology specific renewable targets: 'The Government does not consider it appropriate for planning policy to set targets for or limits on different technologies'. Planning Policy Wales 7 (PPW7) 12.8.9 is taken as the justification for inclusion of specific targets but PPW7 cannot impose a requirement for targets contrary to UK energy policy. PPW7 states 'Local Planning Authorities should consider the contribution that their area can make towards developing and facilitating renewable and low carbon energy and ensuring that development plan policies enable this contribution to be delivered'. Powys have already sought to comply with this requirement through commissioning of the 2012 AECOM 'Renewable and Low Carbon Energy Assessment' document (REA) and inclusion of enabling policies within the LDP.

1.Onshore wind target 50,000KW: Since the draft LDP was written the political landscape has changed and the UK government has now announced that there is sufficient onshore wind energy in the national energy network (<http://www.publications.parliament.uk/pa/cm201516/cmhansrd/cm150618/wmstext/150618m0001.htm>) and will not support continued development. This target is therefore not only contrary to national policy but also unachievable and must be dropped. Other technologies and energy use reduction should be deployed.

Moreover, the REA should be treated with great caution in that the available 'wind resource' is calculated without reference to willingness of landowners to host wind turbines - land included as available even includes land belonging to the National Trust and land within the Brecon Beacons National Park. Constraints including those relating to accessibility by road, availability of grid connection, separation distance from bridleways, impact on rights of way and national trails, separation distance from waterways, settings (beyond a distance of 120m) of listed buildings and Scheduled Ancient Monuments have all been ignored. See REA maps 'Landscape impact on practically viable wind energy resource': from the landscape point of view, it is assumed that 2MW turbines, 120m to tip, can be placed anywhere, at a density of 5/km<sup>2</sup>, except where the footprint is in a LANDMAP Visual and Sensual aspect area for which 'Character and Scenic Quality' is listed as 'high' or 'outstanding'. The REA gives absolutely no indication of capacity for LDP purposes because it includes National Parks, ignores all other LANDMAP criteria, and ignores all views and all cumulative impacts. It also assumes turbines can infringe noise and visual amenity restrictions by being placed only 500m from houses. PPW7 12.9.3 requires a capacity study to take account of all impacts, including cumulative impacts. The REA is therefore not robust and credible evidence, has not been prepared in accordance with national policy and cannot support the targets within this objective.

Source: Email

Type: Objection

Mode Written

Status Maintained

Targets also fail to take into account 'strategic' wind energy schemes which may be permitted within the SSAs. Powys contains 3 SSAs and the visual dominance of SSA wind farms on areas outside the SSAs already has substantial adverse landscape impacts.

The authors of the DDLDP have not considered the potential impacts of this target, which would require proliferation of turbines on such a scale as to seriously conflict with biodiversity, pollution, amenity, tourism, landscape and heritage objectives and policies. Such proliferation is also not supported by TAN 8 Annex D 8.4, according to which outside the SSAs there should be 'no significant change in landscape character from wind turbine development.' While CPRW have concerns about TAN8, it is current policy and should inform the LDP. Such proliferation would also conflict with strategies (e.g. tourism hubs) within the Wales Spatial Plan, and with ambitions within the One Powys Plan to empower people to have a greater voice in local decision making and have a sense of pride in where they live (priority 4).

2.Biomass 30,000KWt and Building Integrated Heat 16,000KWt targets: These are based (see Topic Paper paras 32-36) on an assumed need for Powys to reach the national 12% heat renewables target by 2020, although this 12% target would in any case be achieved by inclusion of the biomass target alone. These targets are set without reference to REA findings that Powys is projected to be able to satisfy well over 25% of its electricity and heat consumption in 2026 with existing renewables capacity, and without consideration of the means and impacts of their achievement. Their inclusion is also contrary to national policy on targets.

'Energy Wales : A Low Carbon Transition 2012' removes targets and replaces these with energy aspirations so targets should no longer exist. Inclusion of targets, especially where, as here, they are not based on robust and credible evidence and they are not accompanied by any strategy for their implementation or by any consideration of likely impacts of development on this scale, is certain to lead to inappropriate development.

There is no sound evidence base for the statements in paras 30 and 31 of the Topic Paper concerning compatibility of the wind target with other LDP Objectives nor any evidence base regarding acceptability of impacts of renewable heat targets. Powys's experience of serious (and, as yet, uninvestigated) turbine noise problems and the widespread unpopularity of current existing and proposed wind developments does not support conclusions of Paras 30 and 31. Para 6.4.10 of the Strategic Environmental Assessment Non-Technical Summary (SEA) relating to renewables states 'Uncertain impacts were identified against the majority of SEA Objectives including those that relate to biodiversity, population and human health (nuisance and risk), soil, water, air, climatic factors, material assets and cultural heritage (the historic environment), landscape and geodiversity. This is because, the type, scale and exact location of development that may come forward under this policy [RE1] is largely unknown/unspecified and therefore it is not possible to ascertain if this policy will result in a positive or negative impact on these objectives at this stage.' Policies DM1 and DM2 do not cater for well documented impacts of existing renewable technologies (see comments on @34.91 below) and will be insufficient to ensure proper safeguards if targets require a specific scale of development to be pushed through planning each year.

Council Response:

0

**Question: 3d. (ii) Desired changes to Document**

- Representation Texts:
- The targets for renewable energy
  - are not based on robust evidence,
  - conflict with national policy and with other DDLDP policies and objectives,
  - have not been properly assessed as to their impacts,
  - are not accompanied by any strategy for achievement,
  - are inflexible,
  - have no legitimacy as both technology and area specific targets have now been removed across England and Wales,
  - will certainly result in inappropriate development.

The targets must be removed from Objective 5. CPRW suggest this should now read  
LDP Objective 5 – Energy and Water

To support the conservation of energy and water and to generate energy from appropriately located renewable sources to enable households, businesses and communities to meet their needs, where acceptable in terms of the economic, social, environmental and cumulative impacts.

Question Representation Texts

**Question: Council Response**

Representation Texts: Llandyssil is proposed in the LDP settlement hierarchy, as a "Small Village". Settlements classified as "Small Villages" do not benefit from designated development boundaries & allocations and a policy approach will be used to determine development proposals. No new issues or evidence are raised which lead the Council to change its conclusions in relation to its choice of settlements designated as Small Villages and Rural Settlements.

Council Response:

0

**Question: 3d. (i) Representation Details**

Representation Texts: Introduction

Powys County Council has prepared its deposit proposals document for the Powys Local Development Plan (LDP) which upon adoption will replace the Powys Unitary Development Plan and will be the basis for decisions on land use planning for all of Powys. This deposit proposals document includes the Authority's vision for housing site allocations and we hereby wish to make comment about such site allocations.

Candidate Site 375 was proposed during the call for Candidate Sites in April 2011 and has subsequently failed to be allocated as a housing site within the village of Llandyssil. We hereby appeal this non-allocation and are of the opinion that the Local Development Plan fails on the ground of soundness.

Soundness of Local Development Plan

The Local Development Plan fails on the ground of soundness criteria CE2. The site allocations do not realistically nor appropriately consider the relevant alternatives nor are they allocated on a robust or credible evidence Base. Site allocations have not been considered with consistent weighting to the sustainable development aims.

Candidate Site 375

Candidate Site 375 would provide a logistical and proportionate natural extension to the village. The site represents sustainable development within a sustainable village and it is a deliverable site. It has been previously noted that the site is constrained by flooding; however there is no history of flooding at the site and the associated brook is only minor. The site is capable of development within the next plan period.

The Site Appraisal Report submitted with the Candidate Site Proposal Form concluded that the site was suitable to a residential allocation on the grounds of settlement; delivery; site quality; and the wider environment; public transport and access; environmental sustainability; well being and; sustainability.

Candidate Site 375 is an appropriate site for housing in Llandyssil. The LDP designates Llandyssil as a "small village" on the basis it has a good range of services and community amenities; the village is therefore recognized as a sustainable location.

Rep'n/Para/Policy	AccessnNo	DateLodgd	Late?	Status	Modified	Summary
6267.V3/3.2.2/		16/07/2015	<input type="checkbox"/>			Summary: Objectives: Planning for Growth in Sustainable Places - Alternative Site Llandyssil
Source: Website registration		Type: Objection		Mode	Written	Status Maintained
<p>â€f Candidate Site Suitability</p> <p>Candidate Site 375 has good road access as it fronts the minor road at the North and east of the site. The site owner has control of the roadside boundary and can therefore provide satisfactory highway access.</p> <p>Overall, Site 375 provides a huge amount of benefit to the local community of Llandyssil, the access to the village could be improved through the housing development due to better infrastructure.</p> <p>The Candidate Site Report stated that all mains services were in place close by and the site could be easily connected to current services and infrastructure.</p> <p>The site is a deliverable site and the site owner would be willing to enter into a planning obligation to reduce the time limits on development to deliver the site in a shorter time period and to provide the required local needs housing numbers and community contributions.</p> <p>Conclusion</p> <p>Candidate Site 375 therefore fulfils the LDP Sustainable Development Aims. The site is a suitable residential site allocation on the grounds of settlement; delivery; site quality and the wider environment; public transport and access; environmental sustainability; well being and; sustainability. The site is an appropriate site for a housing allocation in Llandyssil and its range of services and community amenities; a development of this size would not be limited by any environmental and infrastructure capacity constraints. We would welcome a site visit to discuss the site and proposed housing allocation. Candidate site 375 is therefore preferable to all the other site allocations and the Local Development Plan should be amended accordingly.</p>

*Question Representation Texts*

**Question: 3d. (i) Representation Details**

Representation Texts:

LDP Objective 5 – Energy and Water (R.34.6)

The general principle of an objective supporting the generation of energy from appropriately located renewable resources is welcomed. Objective 5, however, fails the tests of soundness as currently worded – specifically Tests C2, CE1, CE2, CE3 and CE4.

The scope of the objective is too limited given its specific aim of supporting the generation of energy from renewable resources to enable “households, businesses and communities to meet their needs”. The scope should not be restricted to simply meeting the needs of households, businesses and communities. National policy makes it clear that the Welsh Government’s objective is to “promote the generation and use of energy from renewable and low carbon energy sources of all scales” (PPW, Para. 12.1.4).

The scope of Objective 5 should be extended to make it clear that the LDP will aim to generate energy from all appropriately located renewable resources (where acceptable in terms of the economic, social, environmental and cumulative impacts). Our client would have no objection to retaining reference to encouraging households, business and communities to meet their needs if it was secondary to the overall aim of supporting the generation of renewable energy.

It is also unclear what scale of renewable electricity generating technology Objective 5 relates to. No reference is made to specific scales of renewable electricity generating technology, which suggests that it relates to all forms and scales. The Monitoring Framework relating to renewable and low carbon energy

2 (AMR33) (R.34.106) also indicates that the 50,000kW target includes local authority wide and strategic schemes, rather than just micro and sub-local authority level installations. This is evident from the ‘indicator’ for AMR33, which refers to the number of kW renewable electricity facilitated per annum and the capacity of renewable energy development (MW) installed inside Strategic Search Areas by type.

Paragraph 4.10.7 of the Deposit Draft LDP, however, suggests that this is not the case and that the target relates to micro and sub-local authority scale energy schemes only. Given the significant capacity of the defined SSAs it is assumed that this position is correct and it is not intended to relate to strategic and local authority wide developments. Objective 5 should therefore be amended to clearly establish what scale of development is covered by any target set.

If the target of an additional 50,000kW installed capacity does relate solely to micro and sub-local authority scale schemes, it is still considered very low. Paragraph 12.9.1 of PPW states that local planning authorities should plan positively for all forms of renewable and low energy development using up to date and appropriate evidence. Paragraph 23 of the Renewable & Low Carbon Energy Topic Paper (March 2015) states that the ‘local targets’ are set in this context.

Rep'n/Para/Policy AccessNo DateLodgd Late? Status Modified Summary

6322.V1/3.2.2/ 20/07/2015  Summary: Objectives 5 - Energy & Water

Source: Email Type: Objection Mode Oral (Examination) Status Maintained

The Topic Paper also indicates that the 'local targets' in the LDP are derived from the Council's Renewable and Low Carbon Energy Assessment (REA). Whilst the REA forms part of the Council's evidence basis it is not entirely clear how the figure of 50,000kW was derived from this report. The REA indicates that the potential capacity from onshore wind alone, which is identified as the most dominant source of potential electricity capacity, is significant. Table 28 of the REA identifies potential renewable electricity generated in Powys by 2026, indicating that there is scope for 4,059MW installed capacity for wind (taking into account potential impacts on existing residential properties and landscape factors). Whilst identified as theoretical maximums, this indicates that there is significant potential for additional capacity from wind in Powys over and above that identified in Objective 5. PPW states that the Welsh Government is committed to using the planning system to "optimise renewable energy generation" (Para. 12.8.8). Given the potential for Powys as an authority to deliver substantial levels of energy from renewable sources (as evidenced by the REA), the current target set fails to 'optimise' renewable energy generation. Deriving a target on a pro-rata basis also fails to recognise that Powys is capable of delivering levels of renewable energy over and above that of many of the other Welsh authorities. Failing to identify a sufficiently ambitious target is also inconsistent with the Powys Regeneration Strategy (May 2011), thereby failing Test C1. The Strategy identifies renewable energy generation and green technologies as one of the principle aspects of the economy that should be targeted for support. Renewable energy is therefore identified as a key regeneration objective of the Strategy, aiming for Powys to be "a UK leader in renewable energy generation and energy conservation which will include a blend of public, private and community sector initiatives". The target set in Objective 5 is therefore not sufficiently ambitious and restricts opportunities for Powys to generate energy from renewable sources. It also limits associated benefits such as increased business rates, community benefits and employment generated by renewable energy. It is also recommended that the LDP is consistent in terms of how it expresses units of power, rather than interchange between either kilowatt (kW) or megawatt (MW). To be consistent with national policy it is recommended that the LDP refers to MW as the unit of power.

Issue: 2015: Deposit Draft-08.Minerals, Waste and Renewable Energy

Question Representation Texts

**Question: 3d. (i) Representation Details**

Representation Texts: The inclusion of Objective 5 which explicitly supports the generation of energy from appropriately located renewable resources is welcomed, however this support should not be limited to “enable households, businesses and communities to meet their need”. The inclusion of this wording conflicts with national policy contained in Planning Policy Wales (Edition 7, July 2014) (PPW) which supports renewable energy schemes of all scales. In line with national aspirations for the delivery of renewable resources, RWE Innogy UK Ltd urge Powys County Council to be more supportive of renewables, including onshore wind, throughout the Powys County Council Local Development Plan (Deposit Draft, July 2014) (LDP).  
 In the interests of clarity, Objective 5 should make clear that the provision of an additional 50,000kW (50MW) installed capacity of renewable electricity generating technology applies only to micro (<50kW) and sub-local authority schemes (<5MW) as clarified later in the LDP at @34.91 - @34.92: Policy RE1 ‘Renewable Energy’ (paragraph 4.10.7). This lack of clarity will also affect the ability to properly implement and monitor Objective 5 of the LDP.  
 The LDP does not set out where the 50,000kW (50MW) target set in Objective 5, and also referred to subsequently at Paragraph 4.10.7 @34.91 - @34.92, has been derived. Whilst reference is made to the ‘Renewable and Low Carbon Energy Assessment’ (AECOM, October 2012), the target in the LDP does not appear to relate to the potential renewable energy capacity identified in this document. A robust and credible evidence base should be set out clearly in the document as justification for this 50,000kW (50MW) target.  
 Generally, there is a need throughout the LDP to ensure consistent use of either kilowatt (kW) or megawatt (MW) as the unit of power. To ensure consistency with national policy contained in PPW, together with guidance contained in Technical Advice Note 8 ‘Planning for Renewable Energy’ (July 2005) (TAN8), it is considered that the MW unit of power is more appropriate than the kW unit of power.  
 For the reasons set out above, it is considered that Objective 5 in its current form fails to meet the Consistency (C2) and Coherence and Effectiveness (CE1, CE2 & CE3) tests of soundness.

Council Response: 0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: In the opening paragraph of LDP Objective 5, delete “to enable households, businesses and communities to meet their needs”.  
 At bullet point ii. of LDP Objective 5, replace “50,000kW” with “50MW” and insert additional text to clarify that the 50MW target relates to “micro and sub-local authority energy schemes (<5MW) only and that targets for Local Authority Wide (5 to 25MW) and Strategic (25MW to 50MW) schemes are set by the Welsh and UK Governments”.

Question Representation Texts

**Question: 3d. (i) Representation Details**

Representation Texts: The primary concern of CPRW is landscape and the environment but we have serious concerns as to the inclusion at 3.3.8 of 'taking forward Local Growth Zones' with respect to our interest in ensuring thriving rural communities.

There is no further elaboration of growth zones so it is impossible to assess how this will be applied in practice and whether Growth Zones these relate in any way to the previously proposed, but now discredited, Economic Corridors. If the Growth Zone concept is retained in the LDP, the function and boundaries of Growth Zones must be defined and the impacts assessed.

The plan does not clarify how the Growth Zones policy fits with any protective designations, how it applies to the Brecon Beacon National Park, or how it can be reconciled with many other LDP Policies and Objectives, for example those concerning economic regeneration, retail, transport, landscape and biodiversity and use of land.

Powys is not a county that requires economic regeneration having a strong entrepreneurial, diverse and innovative business base and virtual full employment (98.7%) with by far the best small business start up and retention rate in Wales and one of the highest in the UK. It also maintains a strong agriculture / forestry and tourism sector (together constituting 23% of Powys GDP).

An urban regeneration approach in a deeply rural area with many scattered communities and some 2/3rds of the population not living in the few relatively small towns is inappropriate.

A Growth Zone methodology could lead to the socio-economic impoverishment of the hinterland of small towns and villages leading to inequality of access and closure of local facilities and ultimately rural depopulation. It would also lead to increased use of private transport and reduced choice in education and employment for young people. If this is merely a reiteration of the employment sites policy then the LDP should say so.

Growth Zones have not been considered in an coherent and structured way. For the avoidance of any doubt CPRW proposes that all reference to Growth Zones are deleted.

Brecon and Talgarth lie within the Brecon Beacons National Park and are outside the scope of the LDP.

Chapter 12 of Planning Policy Wales states that the planning system has an important part to play in ensuring that the infrastructure on which communities and business' depend is adequate to accommodate proposed development. PPW also states that the capacity of existing infrastructure, and the need for additional facilities, should be taken into account in the preparation of development plans. As such we support that Deposit Plan objectives 9 & 10 recognise the importance of infrastructure and services.

Question Representation Texts

**Question: Council Response**

Representation Texts: The Council disagree with the proposed changes requested by the Representer. The Representer does not raise new issues or evidence which lead the Local Planning Authority to change Objective 11.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: The Radnorshire Wildlife Trust believe this objective as it stands does not allow for the effective delivery of Policy DM1 and other policies in this plan that purport to conserve and enhance biodiversity in Powys.

Council Response: 0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: We suggest the following wording:

“The ecosystems and biodiversity of Powys are its life-blood and make up the green heart of Mid Wales. Powys’ biodiversity; its species and habitats are extensive and found throughout the county. Our biodiversity is finite and will be protected from inappropriate development.”

Council Response: 0

Issue: 2015: Deposit Draft-01. Preparation, Process and Plan Strategy

Question Representation Texts

**Question: Council Response**

Representation Texts: The Council agree to change Objective 13 to read as follows:

The Landscape and the Historic Environment

i. Landscape

To protect, preserve and/or enhance the distinctive landscapes of Powys and adjoining areas, including protected landscapes.

ii. The Historic Environment

To protect, preserve and/or enhance the distinctive built heritage, historic environment and cultural assets of Powys and adjoining areas, including its architectural and archaeological heritage and Registered Historic Landscapes and to facilitate the reduction of the number of listed buildings at risk.

Council Response:

0

**Question: 3d. (i) Representation Details**

Representation Texts: The Cambrian Mountains Society (CMS) thanks Powys CC for this opportunity to comment on the Deposit LDP. The Society's comments are general in nature and as such fall under reference point @34.1 but throughout the representation links will be made to other parts of the documentation. The Society's major concern with the LDP is that it does not follow local, national or international ideas on sustaining and enhancing areas of high value landscapes. Many of the points the Society address here were presented in its 2014 Deposit Stage Representation but these have evolved over the last year.

....

Linked to this, the Society is also worried that the LDP objectives, in particular the Natural and Built Assets Objectives 11 & 13, @34.9 fails to give sufficient weight in protecting the County's high value landscapes.

....

In conclusion CMS's preferred option for the Cambrians continues to be AONB designation, but it sees the setting-up of a network of SLAs across all three counties covering the Cambrian Mountains as a very positive move in safeguarding this unique landscape at the heart of Wales.

Council Response:

0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: Reviewing all the recommendations made in the above representation, in order to help the Powys LDP sit more comfortably with a Wales-wide approach. Notably taking into account the following organisation' work in maintaining and enhancing areas of high landscape value.

**Appendix 1 - Deposit LDP Reps & Responses by Refpoint, Cabinet 15-12-15**

WG guidance,  
NRW advice,  
Neighbouring counties' provision of SLAs together with their linked SPGs.

Council Response: 0

---

**Question: 4b Reason For Request To Speak At Hearing And Subject**

Representation Texts: The representation concentrates on the provision of SLAs with a linked SPG document and it is this that CMS would like to speak to.

At a hearing session the Society would expand on details of a Cambrian Mountains SLA. For instance we would detail it's;

- boundaries,
- landscape qualities and features,
- key policy and management issues.

Issue: 2015: Deposit Draft-09.Development Management and Environment

Question Representation Texts

**Question: Council Response**

Representation Texts: Having considered the representations received and the Council's duties under the European Landscape Convention Objective 13 has been amended to incorporate the changes requested.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: 1. Landscapes: Powys has no 'protected' landscapes other than the BBNP, which is outside the scope of the LDP. This objective needs to make explicit its application to all Powys landscapes. There must also be special regard to the potential impact on views into and out of adjoining designated landscapes of development falling outside their boundaries.

2. Historic Environment: Including Landscape under Historic Environment is likely to lead to confusion and to overlooking the duty to preserve and/or enhance the landscape of Powys, including protected landscapes. The reduction of listed buildings at risk is very important but the other measures in Objective 13 are equally important.

Council Response: 0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: Suggested change: give objective a dual remit to read:

Objective 13 – Landscape and the Historic Environment

i Landscape

To protect, preserve and/or enhance the distinctive landscapes of Powys and adjoining areas, including protected landscapes.

ii The Historic Environment

To protect, preserve and/or enhance the distinctive build heritage and historic environment and cultural assets of Powys and adjoining areas, including its architectural and archaeological heritage and Registered Historic Landscapes and to facilitate the reduction of the number of listed buildings at risk.'

Council Response: 0

**Question: 4b Reason For Request To Speak At Hearing And Subject**

Question Representation Texts

**Question: Council Response**

Representation Texts:

"Mae'r Cyngor yn bwriadu diwygio ei agwedd o ran polisi'r iaith Gymraeg a Diwylliant er mwyn mynd i'r afael â materion a godwyd yn y sylwadau ac i sicrhau bod ei bolisi'n gyson â Pholisi Cenedlaethol. Mae'r cynllun yn cydnabod sensitifrwydd ieithyddol cymunedau Cymraeg ac mae'n cynnwys polisi sy'n ceisio lliniaru effaith datblygiadau mawr yn yr ardaloedd hyn. Gweler Newidiadau â Ffocws am Fanylion. Fel rhan o'r broses o lunio'r Cynllun Datblygu Lleol, comisiynodd y Cyngor ymchwil i weld yr effaith a gafodd datblygiadau mawr ar gymunedau Cymraeg traddodiadol. Mae'r Asesiad o'r Effaith ar yr Iaith Gymraeg yn rhan o Arfarniad o Gynaliadwyedd y Cynllun ac mae ei ganfyddiadau'n ategu'r agwedd ddiwygiedig o ran polisi'r iaith Gymraeg. Bydd hefyd yn cael ei ystyried wrth lunio'r Canllawiau Cynllunio Atodol ar fesurau lliniaru priodol ar yr iaith Gymraeg a Diwylliant. Mae'r iaith Gymraeg a Diwylliant ym Mhowys a sut i'w diogelu a'i hyrwyddo'n cael ei ystyried yn fanwl yn y papur pwnc ar yr iaith a Diwylliant. Roedd yr Arfarniad o Gynaliadwyedd y Cynllun yn cynnwys asesiad o effeithiau sylweddol tebygol y cynllun ac ar y defnydd o'r Gymraeg ym Mhowys. Yn unol â Nodyn Cyngor Technegol 20, fe wnaeth yr Arfarniad o Gynaliadwyedd y Cynllun asesu effaith y strategaeth ofodol, polisiâu a dyraniad y Gymraeg a chafwyd iddo gael effaith bositif yn gyffredinol. Mae'r CDU yn cynnwys meini prawf digonol ar fonitro er mwyn ystyried ac adolygu polisi'r Gymraeg a cheisiadau cynllunio cysylltiedig fel rhan o Adroddiadau Monitro Blynyddol y CDU a phrosesau adolygu'r Cynllun a ddaw o dan ganllawiau cynllunio cenedlaethol. The Council propose to amend its policy approach to Welsh Language and Culture to better address issues raised in the representation and to ensure its policy approach is consistent with National Policy. The plan recognises the linguistic sensitivity of Welsh speaking communities and includes policy that seeks to mitigate against the impact of large housing developments within these areas. See Focused Changes for details. As part of the preparation of the Local Development Plan (LDP) the Council did commissioned research to see the effect new housing developments have had on traditional Welsh Speaking Communities. This Welsh Language Impact Assessment forms part of the Sustainability Appraisal of the Plan and its findings supports the amended Welsh Language policy approach and will inform the preparation of Supplementary Planning Guidance on appropriate Welsh Language and Culture Mitigation Measures. Welsh Language and Culture in Powys and how to plan for its protection and enhancement is considered in detail in the Welsh Language and Culture Topic Paper. The Sustainability Appraisal of the plan included an assessment of the likely significant effects of the plan on the use of Welsh Language in Powys. In accordance with Technical Advice Note 20, the Sustainability Appraisal of the Plan assessed the impact of the spatial strategy, policies and allocations on the Welsh Language and was found to have an overall positive impact. The LDP includes sufficient monitoring criteria to enable consideration and review of Welsh Language policy and associated planning applications as part of LDP Annual Monitoring Reports and the Plan review processes provided under national planning guidance."

Council Response:

Cymraeg. Mae hi'n hanfodol bwysig felly nad yw'r Cynllun Datblygu Lleol yn tansellio bwriad y Gweithgor hwnnw nac yn gwrth-ddweud yr hyn y mae Cyngor Sir Powys ei hunan wedi'i ddatgan ei fod yn bwriadu ei wneud; sef ceisio atal dirywiad pellach yng nghanran siaradwyr Cymraeg y Sir.

Rydym yn galw ar Gyngor Sir Powys i gomisiynu ymchwil ac adroddiad i weld beth fu effaith datblygu tai newydd ar gymunedau traddodiadol Cymraeg yn y Cynllun Datblygu Lleol diwethaf.

Credwn bod cyfle yma i Gyngor Sir Powys ymwymo'n glir i'w addewid i fynd i'r afael â dirywiad yng nghanran y siaradwyr Cymraeg ym Mhowys trwy gyfyngu ar ddatblygiadau tai newydd yn yr ardaloedd traddodiadol Cymraeg.

Hoffem weld y Cyngor yn rhoi systemau asesu annibynnol mewn lle ar gyfer unrhyw ddatblygiadau i'r dyfodol i weld yr effaith ar yr iaith.

#### ATODIAD

Rhai sylwadau a gyflwynwyd gan Menter Maldwyn yn ystod y cyfnod cyntaf o ymgynghori ym Medi 2014

•Rydym yn croesawu bwriad y Cyngor i ystyried y Gymraeg wrth gynllunio ("The LDP needs to consider how it can contribute to promoting the use of the language and protecting Welsh culture"). Mae'r cynllun felly yn nodi'n glir bod angen cefnogi a gwarchod yr iaith Gymraeg. Serch hynny, mae nifer o'r bwriadau yn mynd yn groes i'r egwyddor hwnnw (e.e. datblygiadau mewn cymunedau fel Llanbryn-mair, lle mae dros 48% o siaradwyr Cymraeg yn ôl Cyfrifiad 2011. Felly hefyd ardaloedd fel Llanrhaeadr YM, Penybontfawr a Phontrobert a welodd gwmp yn nifer y siaradwyr Cymraeg eisoes.)

•Yn ôl Nodyn Cyngor Technegol TAN 20 Llywodraeth Cymru (Mehafin 2013), mae'r Cynllun Datblygu Lleol yn destun arfarniad cynaliadwyedd i wneud yn siŵr fod materion economaidd, cymdeithasol ac amgylcheddol yn cael eu hystyried – ac mae'r iaith Gymraeg yn dod i mewn i'r broses arfarniad hwnnw am ei bod yn "nodwedd ganolog o gymdeithas a chymunedau yn Nghymru a ganddi werth hanesyddol a diwylliannol sylweddol". Mae gofyn i'r CDLI gasglu data a thystiolaeth ynghyd ag ymgynghori. Ni welir dystiolaeth ddigonol yn y Cynllun bod data a thystiolaeth wedi'u casglu i ddangos anghenion ardaloedd penodol o ran yr iaith, nag ymgynghoriad â sefydliadau / mudiadau sy'n ymwneud â'r Gymraeg.

•O edrych ar y berthynas rhwng datblygiadau yn y gorffennol (e.e. Llangadfan yn Nyffryn Banw) mae canlyniadau Cyfrifiad 2011 o safbwynt siaradwyr Cymraeg yn dangos y gellir gwneud cysylltiad rhwng datblygu ystadau tai â chwmp yng nghanran y siaradwyr Cymraeg yn y cymunedau hynny sydd, yn ei dro, yn newid iaith gymunedol a pheryglu sefyllfa'r iaith mewn ardaloedd penodol o fewn Powys.

As an organisation who operates for the benefit of the Welsh language in the community, Menter Iaith Maldwyn welcomes the consideration that Powys County Council has given to the importance of the Welsh Language from the perspective of the development plan. I would like to emphasise that there is a need to consider the effect of development plans on the Welsh language – not only in communities where there is already a high percentage of Welsh speakers – but across the County.

We would also welcome Powys County Council's recent decision to establish a Welsh Language Working Group and are pleased to see that the council acknowledges the importance of the Welsh communities. It is therefore essential that the Local Development Plan does not undermine the intention of that Working Group or contradicts what Powys County Council itself has declared that it intends to do; that is to try and halt the further

deterioration of the percentage of Welsh speakers in the county.

We would like to call on Powys County Council to commission research and a report to see what effect new housing developments have had on traditional Welsh speaking communities during the last Local Development Plan.

We believe that there is an opportunity here for Powys County Council to clearly commit to its promise to get to grips with the deterioration of the percentage of Welsh speakers in Powys by restricting new housing developments in the traditionally Welsh speaking areas.

We would also like to see the Council establishing independent assessment systems for any developments in the future to see the effect on the language.

ATTACHMENT

Some comments presented by Menter Maldwyn during the first period of consultation in September 2014.

Menter Iaith Maldwyn welcomes Powys County Council's intention to consider the Welsh language in the planning process: "The LDP needs to consider how it can contribute to promoting the use of the language and protecting Welsh culture". The plan therefore notes clearly that there is a need to support and protect the Welsh language. However, a number of the proposals go against this principle (e.g. developments within communities such as Llanbrynmair, where, according to the 2011 Census, over 48% of the population are Welsh speakers. This is also the case in areas such as Llanrhaeadr YM, Penybontfawr and Pontrobert which has already seen a drop in the number of Welsh speakers.)

According to the Welsh Government's TAN 20 Technical Advice Note (June 2013), the Local Development Plan is the subject of a sustainability evaluation to ensure that economic, social and environmental matters are considered – and the Welsh language would be considered as part of that evaluation as it is "a central feature of the society and communities in Wales and the language has a substantial historical and cultural value". The Local Development Plan has to collate data and evidence as well as consult.

There is not sufficient evidence in the Plan that data and evidence have been collated to demonstrate the needs of specific communities with regard to the language, nor has there been a consultation with institutions/organisations that relate to the Welsh language.

In looking at the relationship between past developments and the Welsh language (e.g. Llangadfan in the Banw Valley) the results of the 2011 Census clearly shows that a connection can be made between the development of housing estates and the fall in the percentage of Welsh speakers within those communities, who in turn, change the language of a community and endanger the position of the language in specific areas in Powys.

*Question* *Representation Texts***Question: Council Response**

Representation Texts: Mae'r sylwadau hyn wedi'u nodi. Fodd bynnag, ni ystyrir bod angen gwneud unrhyw newidiadau er mwyn sicrhau bod y Cynllun yn gadarn. These comments are noted. However, no changes are considered necessary to ensure that the Plan is sound.

Council Response:

0

**Question: 3d. (i) Representation Details**

Representation Texts: Mae'r sylwadau yn y llythyr hwn yn berthnasol i'r ymgynghoriad cyhoeddus i'r Cynllun Datblygu Lleol Powys 2011-2026, Cynllun Adnau Drafft Powys 2015.

Un o brif amcanion strategol Comisiynydd y Gymraeg yw dylanwadu ar yr ystyriaeth a roddir i'r Gymraeg mewn datblygiadau polisi a deddfwriaeth, gan ddylanwadu gan amlaf ar lefel genedlaethol yng Nghymru, y Deyrnas Unedig ac ar adegau ar ddeddfwriaeth Ewropeaidd. Er hyn, mae Nodyn Cyngor Technegol 20 (TAN20) yn sefydlu rôl ymgynghorai i'r Comisiynydd ar Gynlluniau Datblygu Lleol, yn benodol, i ystyried effaith cynigion a pholisïau'r CDLI ar y Gymraeg. Rydym felly yn cyflwyno'r sylwadau isod ar sail y rôl ddiffiniedig hwn.

Cyd-destun

Prif nod y Comisiynydd yw hybu a hwyluso defnyddio'r Gymraeg. Gwneir hyn drwy ddwyn sylw at y ffaith bod statws swyddogol i'r Gymraeg yng Nghymru a thrwy osod safonau ar sefydliadau. Bydd hyn, yn ei dro yn arwain at sefydlu hawliau i siaradwyr Cymraeg.

Mae dwy egwyddor yn sail i waith y Comisiynydd:

- Ni ddylid trin y Gymraeg yn llai ffafriol na'r Saesneg yng Nghymru;
- Dylai personau yng Nghymru allu byw eu bywydau drwy gyfrwng y Gymraeg os ydynt yn dymuno gwneud hynny.

Dros amser fe fydd pwerau newydd i osod a gorfodi safonau ar sefydliadau yn dod i rym trwy is ddeddfwriaeth. Hyd nes y bydd hynny'n digwydd bydd y Comisiynydd yn parhau i arolygu cynlluniau iaith statudol trwy bwerau y mae wedi eu hetifeddu o dan Ddeddf yr Iaith Gymraeg 1993.

Mae'n ofynnol i Awdurdodau Cynllunio baratoi cynlluniau datblygu lleol sy'n gosod fframwaith polisi cynllunio defnydd tir dros gyfnod o 15 mlynedd. Mae Cynllun Adnau Drafft Powys (2015) yn nodi'r ddarpariaeth adeiladu i'w datblygu, ac ymhle y gellir eu hadeiladu dros gyfnod y cynllun. Mae'r Cynllun hwn eisoes wedi mynd trwy broesau amrywiol o ymgynghori ac ymgysylltu â'r cyhoedd.

Mae eich Cynllun Datblygu Lleol yn nodi fod lefelau siaradwyr Cymraeg yn amrywio ledled y sir, gyda'r ardaloedd i'r gogledd a'r de-orllewin â'r canrannau uchaf o siaradwyr Cymraeg. Un o brif amcanion y CDLI wrth ystyried datblygiadau tai newydd yw gwarchod a chefnogi'r Gymraeg a diwylliant Cymreig yn y Sir, yn benodol, cadarnleoedd y Gymraeg. Nodir yn y Cynllun bydd rhai datblygiadau tai newydd o fewn y cadarnleoedd hyn, ac y bydd cynigion am ddatblygiadau yn yr ardaloedd hyn ond yn cael eu caniatáu lle bydd effaith ar y Gymraeg wedi cael eu hystyried, a bod mesurau lliniaru unrhyw effeithiau negyddol yn eu lle.

Rhai mesurau lliniaru sy'n cael eu cynnig yn y Cynllun yw sicrhau darpariaeth tai fforddiadwy i ateb anghenion lleol, cyrsiau cynefino a gwersi iaith i staff, a cymorth a chyllid ar gyfer prosiectau a rhaglenni iaith a diwylliant. Ym Mhapur Pwnc Yr Iaith Gymraeg a'i Diwylliant 2014, cyfeirir at asesiad effaith y Gymraeg a gynhaliwyd gan Menter Iaith Castell-nedd Port Talbot yn ardal Ystradgynlais. Roedd y casgliadau o'r asesiad yn nodi'r canlynol:

- Bod cynnydd yn y ganran o bobl ifanc sy'n siarad Cymraeg, ond llai felly yn y tai newydd;
- Bod siaradwyr Cymraeg yn y datblygiad newydd yn llai tebygol o ddefnyddio'r Gymraeg yn eu bywydau beunyddiol;
- Bod darpariaeth a chefnogaeth i'r iaith, ond cyfyngir hyn gan yr arian sydd ar gael; a
- Bod y rhan fwyaf o'r ysgolion cynradd yn yr ardal yn rhai cyfrwng Saesneg.

Mae canfyddiadau'r asesiad hwn yn amlygu yr angen am fesurau lliniaru sydd yn effeithiol a chadarn, sy'n cefnogi'r iaith ar draws y sir, ac yn ateb anghenion y cymunedau hynny a ystyrir yn gadarnleoedd y Gymraeg. Bydd disgwyl i'r Cyngor arolygu effaith datblygiadau newydd ar y Gymraeg dros gyfnod y cynllun, ac ymateb yn gadarn i sicrhau nad yw datblygiadau yn cael effaith andwyol ar hyfywedd y Gymraeg.

Mae Bil Cynllunio Cymru 2014 yn ymgais i symleiddio prosesau cychwynnol cynllunio yng Nghymru, cryfhau elfennau megis gweithdrefnau gorfodi ac apeliadau, a rhoi pwerau i Weinidogion Cymru i benderfynu ar geisiadau cynllunio penodol. O fewn y ddeddfwriaeth, ceir darpariaethau yn ymwneud â'r Gymraeg, ac am y tro cyntaf, yn sefydlu sail statudol i'r angen i ystyried y Gymraeg yn y gyfundrefn gynllunio.

Mae'r ddeddfwriaeth yn gosod dyletswyddau statudol ar awdurdodau cynllunio i asesu

Status Maintained

effaith eu polisiau cynllunio ar y Gymraeg, tra hefyd yn gwneud yr iaith Gymraeg yn ystyriaeth berthnasol statudol o fewn y system gynllunio. Rhoddir yr hawl statudol felly i gynghorwyr ganiatáu neu wrthod datblygiadau ar sail eu heffaith ar yr iaith.

Bydd canllawiau atodol Llywodraeth Cymru, megis Polisi Cynllunio Cymru a TAN20 yn cael eu diwygio maes o law i adlewyrchu newidiadau i'r gyfraith, ac er bod cynlluniau datblygu lleol presennol wedi eu datblygu ar sail y gyfundrefn flaenorol, bydd disgwyl i awdurdodau cynllunio weithredu ar sail y ddeddfwriaeth newydd.

The comments in this letter are relevant to the public consultation on Powys Local Development Plan 2011-2026, Powys Draft Deposit Plan 2015.

One of the Welsh Language Commissioner's main strategic objectives is to influence the consideration given to the Welsh language in policy developments and legislation, usually on a national level in Wales, the United Kingdom and on occasion on European legislation. Despite this, Technical Advice Note 20 (TAN20) establishes a consultee role for the Commissioner in the case of Local Development Plans, specifically, to consider the impact of the LDP's proposals and policies regarding the Welsh language. We therefore submit the comments below on the basis of this defined role.

Context

The Commissioner's main aim is to promote and facilitate the use of the Welsh language. This is accomplished by drawing attention to the fact that the Welsh language has official status in Wales, and by setting the standards for organisations. This, in turn, will lead to establishing the entitlements of Welsh speakers.

The Commissioner's work is based on two principles:

- The Welsh language should not be treated less favourably than the English language in Wales;
- People in Wales should be able to live their lives through the medium of Welsh if they wish to do so.

Over time, secondary legislation will give new powers to set and enforce standards for organisations. Until such a time, the Commissioner will continue to review statutory language schemes through the powers inherited under the Welsh Language Act 1993.

Planning Authorities are required to prepare local development plans establishing the land use planning policy framework for a period of 15 years. Powys Draft Deposit Plan (2015) records the building provision to be developed and the locations where building will be permitted during the lifetime of the plan. This plan has already been through various consultation and public engagement processes.

Your Local Development Plant notes that the levels of Welsh speakers varies across the county, with the areas in the north and the south-west having the highest percentages of Welsh speakers. One of the main objectives of the LDP in considering new housing developments is safeguarding and supporting the Welsh language and the Welsh culture in the County, specifically in the Welsh-speaking strongholds. The Plan notes that there will be some new housing developments within these areas, and that proposals for developments in these locations will only be permitted where the effect on the Welsh language has been considered, including measures to mitigate any negative effects.

Some of the mitigation measures proposed in the Plan are ensuring the provision of affordable houses to meet local need, induction courses and language lessons for staff, and assistance and finance for projects and language and culture programmes. In the Welsh Language and Culture Topic Paper 2014, there is a reference to the impact assessment on the Welsh language held by Menter Iaith Castell-nedd Port Talbot in the Ystradgynlais area. The assessment's conclusions noted the following:

---

- There was an increase in the percentage of young people speaking Welsh, but it was lower in the new houses;
- That Welsh-speakers in the new developments were less likely to use Welsh in their everyday lives;
- That there was provision and support for the language, but that this was limited by the money available; and
- That most of the primary schools in the area were English-medium ones.

The assessment's findings demonstrate the need for mitigation measures which are effective and robust, which support the language across the county, and satisfy the needs of those communities which are considered to be strongholds of the Welsh language. The Council will be expected to review the effect of the new developments on the language over the period of the plan, and respond positively to ensure that developments do not have a detrimental effect on the viability of the Welsh language.

The Planning (Wales) Bill 2014 is an attempt to simplify initial planning processes in Wales, to strengthen elements such as enforcement and appeal procedures and give powers to Welsh Ministers to decide on specific planning applications. Within the legislation, there are provisions relating to the Welsh language, and for the first time, they establish a statutory basis for the need to consider the language in the planning system.

The legislation places statutory duties on planning authorities to assess the effects of their planning policies on the Welsh language whilst making the language a relevant statutory consideration within the planning system. The councillors have therefore been given a statutory entitlement to permit or refuse developments on the basis of their effects on the Welsh language.

Welsh Government supplementary planning guidance, such as Planning Policy Wales and TAN20 will eventually be amended to reflect changes in the law, and although the present local development plans have been developed on the basis of the previous organization, planning authorities will be expected to act on the basis of the new legislation.

Question Representation Texts

**Question: Council Response**

Representation Texts: "Ar ôl ystyried y sylwadau a dderbyniwyd a thystiolaeth ategol bellach a luniwyd, ystyrir bod y lefel hwn o ddarpariaeth tai'n parhau i fod yn briodol er mwyn sicrhau bod y Cynllun Datblygu Lleol yn gallu cyflwyno'r strategaeth, ei amcanion economaidd-gymdeithasol allweddol a'r hyblygrwydd eithaf i ymateb i dwf economaidd yn y dyfodol. Rydym yn ystyried y byddai gwro o'r ddarpariaeth tai hwn yn peryglu cadernid y cynllun wrth ddiwallu'r amcanion hyn. Cynhaliwyd ymchwil a chasglwyd tystiolaeth sylweddol wrth baratoi'r CDLI er mwyn ystyried cyfleoedd priodol am dai i'r sir ac i fynd i'r afael ag angen lleol am dai a dosbarthiad tai. Mae'r cyngor o'r farn bod dosbarthiad y tai ar draws yr Hierarchaeth Aneddiadau wedi'i seilio ar sail resymegol gadarn sy'n ategu'r broses o gyflwyno strategaeth y CDLI a hyfywedd tymor hir yr aneddiadau sy'n gallu cynnal twf cynaliadwy. Nid yn unig yr oedd categorïau aneddiadau (gan gynnwys Llanbryn-mair a Phontrobert) yn gysylltiedig â nifer y gwasanaethau ym mhob un o'r cymunedau hyn, ond roedd hefyd yn cynnwys dyfarniadau'n seiliedig ar resymau cynllunio a chynaliadwyedd. Mae'r Cyngor yn bwriadu diwygio ei agwedd o ran polisi'r laith Gymraeg a Diwylliant er mwyn mynd i'r afael â materion a godwyd yn y sylwadau ac i sicrhau bod ei bolisi'n gyson â Pholisi Cenedlaethol. Mae'r polisi hwn yn rhoi gwell cydnabyddiaeth i sensitifrwydd ieithyddol cymunedau Cymraeg (gan gynnwys cymunedau megis Llanbryn-mair a Phontrobert) ac mae'n cynnwys polisi sy'n ceisio lliniaru effaith datblygiadau mawr yn yr ardaloedd hyn. Gweler Newidiadau â Ffocws am fanylion. Mae'r laith Gymraeg a Diwylliant ym Mhowys a sut i'w diogelu a'i hyrwyddo'n cael ei ystyried yn fanwl yn y papur pwnc ar yr laith a Diwylliant. Roedd yr Arfarniad o Gynaliadwyedd y Cynllun yn cynnwys asesiad o effeithiau sylweddol tebygol y cynllun ac ar y defnydd o'r Gymraeg ym Mhowys. Yn unol â Nodyn Cyngor Technegol 20, fe wnaeth yr Arfarniad o Gynaliadwyedd y Cynllun asesu effaith y strategaeth ofodol, polisiau a dyraniad y Gymraeg a chafwyd iddo gael effaith positif yn gyffredinol ynghyd ag Arfarniad o Gynaliadwyedd y cynllun, cynhaliwyd hefyd Asesiad o'r Effaith ar y Gymraeg. Mae'r asesiad hwn yn rhan o'r Arfarniad ar Gynaliadwyedd ac fe'i gynhaliwyd er mwyn ceisio deall beth fydd effeithiau tebygol datblygiad tai newydd ar gymunedau Cymraeg, gan gynnwys effeithiau datblygiad tai newydd ar gymeriad a chydbwysedd ieithyddol cymuned. Os yw cais yn debygol o gael effaith ar grynodiad lleol o siaradwyr Cymraeg, daeth yr asesiad i'r casgliad y byddai angen asesu hyn a chael mesurau lliniaru fel y nodwyd yn yr asesiad. Having considered the representations received and further supporting evidence that has been prepared it is considered this level of housing provision remains appropriate to ensure the Local Development Plan (LDP) is capable of delivering the Strategy, its key socio-economic objectives and ensures maximum flexibility to respond to future economic growth. It is considered that any deviation from this housing supply provision would jeopardise the soundness of the plan in being able to meet these objectives. A significant amount of research and evidence gathering was undertaken during the preparation of the LDP to consider appropriate housing opportunities for the county and to address local housing need and housing distribution. The Council considers that the distribution of housing across the Settlement Hierarchy is based on a sound rationale which supports the delivery of the LDP strategy and the longer term viability of settlements considered capable of supporting sustainable growth. The categorisation of settlements (including Llanbryn-mair and Pontrobert) was not only linked to the number of services in each of these communities but also included matters of judgement based on planning and sustainability reasons. The Council propose to amend its policy approach to Welsh Language and Culture to better address issues raised in the representation and to ensure its policy approach is consistent with National Policy. This policy approach better recognises the linguistic sensitivity of Welsh speaking communities (including communities such as Llanbryn-mair and Pontrobert) and includes policy that seeks to mitigate against the impact of large housing developments within these areas. See Focused Changes for details. Welsh Language and Culture in Powys and how to plan for its protection and enhancement is considered in detail in the Welsh Language and Culture Topic Paper. The Sustainability Appraisal of the plan included an assessment of the likely significant effects of the plan on the use of Welsh Language in Powys. In accordance with Technical Advice Note 20, the Sustainability Appraisal of the Plan assessed the impact of the spatial strategy, policies and allocations on the Welsh Language and was found to have an overall positive impact. In conjunction with the Sustainability Appraisal of the plan a Welsh Language Impact Assessment was also undertaken. This assessment forms part of the Sustainability Appraisal and was undertaken to help understand the likely impacts of new housing development on Welsh speaking communities including impacts on the character and linguistic balance of a community associated with new housing development. The assessment concluded that should a development proposal be likely to affect a local concentration of Welsh speakers then this would need to be assessed and if necessary mitigated using methods identified in the assessment."

**Question: 3d. (i) Representation Details**

Representation Texts: Hoffwn i chi nodi fy sylwadau fel rhan o'ch ymgynghoriad ar Gynllun Datblygu Lleol Powys. Rwy'n croesawu'r targed y bydd y ganran sy'n siarad Cymraeg yn y Sir yn tyfu, yn ogystal â'r gydnabyddiaeth o bwysigrwydd cymunedau Cymraeg. Ond os am wireddu'r amcanion clodwiw hyn, mae angen newidiadau sylfaenol i'r cynllun, yn benodol:

\* Credaf nad yw'r tystiolaeth fod angen 6,071 o dai yn gadarn, gan nad yw'r methodoleg yn ystyried yr angen lleol am dai. Dylid lleihau'r ffigwr yn sylweddol.

\* Nid yw dosbarthiad y tai yn y cynllun yn addas gan nad yw wedi selio ar anghenion lleol. Mae angen casglu tystiolaeth o'r angen lleol am dai, ac ail-lunio'r dosbarthiad o dai rhwng ac o fewn cymunedau.

\* Bod y Cyngor yn comisiynu gwaith ymchwil i weld effaith datblygiadau tai newydd ar y cymunedau traddodiadol Cymraeg yn ystod y Cynllun Datblygu Lleol diwethaf.

\* O dderbyn sensitifrwydd ieithyddol y cymunedau traddodiadol Cymraeg, bod y cynllun yn cyfyngu ar ddatblygiadau tai newydd yn yr ardaloedd hynny am ddegawd hyd fydd effaith newidiadau'r ddegawd flaenorol wedi setlo.

\* Bod y Cyngor yn derbyn yr egwyddor o angen lleol yn sail cyn caniatáu unrhyw ddatblygiadau yn yr ardaloedd hynny.

\* Bod y Cyngor yn rhoi system asesu annibynnol mewn lle ar gyfer unrhyw ddatblygiadau arfaethedig i weld yr effaith ar y Gymraeg.

Heb gymryd y camau uchod, credaf nad yw'r Cynllun Datblygu Lleol yn gadarn. Edrychaf ymlaen at dderbyn eich ymateb i fy mhryderon.

I should like you to note my comments as part of your consultation on Powys Local Development Plan. I welcome the target of a growth in the percentage of Welsh-speakers in the county, as well as the recognition of the importance of Welsh communities. But if you wish to realise these commendable objectives, then there is a need to make some basic changes to the plan, in particular:

I don't believe firm evidence exists that 6,071 houses are required, since the methodology does not consider the local housing need. The figure should be substantially reduced.

The distribution of the houses in the plan is not suitable since it is not based on local

## C. Y GYMRAEG

Yn y lle cyntaf dylid croesawu'r ffaith fod y Cyngor Sir yn cydnabod pwysigrwydd y Gymraeg ar ddechrau'r ddogfen. Er enghraifft, nodir;

"Levels of Welsh language use vary across the county with higher usage found in the west and south west, although there are concerns that usage is falling in these traditional Welsh language strongholds. The LDP needs to consider how it can contribute to promoting the use of the language and protecting Welsh culture."

Yn yr un modd nodir fel nod ac amcan dan y pennawd 'Supporting Healthy Communities'; "LDP Objective 15 – Welsh Language and Culture: to support and protect Welsh language and culture in Powys and specifically the Welsh speaking strongholds of the north west and south west"

Hefyd croesawir y ffaith bod cydnabyddiaeth o fodolaeth TAN 20 a bodolaeth y cymunedau lle ceir mwy na 25% o siaradwyr Cymraeg.

"These documents require the Council to consider whether it has any communities where the use of the Welsh language is part of the social fabric and where it is so, it is appropriate that this be taken into account in land use planning"

Serch hynny, tra bo'r egwyddorion hyn i'w croesawu gwelir bwlch rhwng hyn a'r gweithredu ymarferol a'r hyn a fwriedir yn y Cynllun Datblygu.

Mae Nodyn Cyngor Technegol TAN20 Llywodraeth Cymru a gyhoeddwyd fis Mehefin 2014 yn datgan yn glir fel a ganlyn:

1.8 "Wrth lunio mae modd asesu effeithiau cronol a chyfunol llawer o ddatblygiadau ar y Gymraeg. Mae hyn yn gyfle i ystyried effeithiau ar gymunedau lleol ac ardaloedd ehangach y cynllun gyda'i gilydd."

2.2 "Er mwyn sicrhau y caiff materion economaidd, cymdeithasol ac amgylcheddol eu hystyried, mae'r CDLI yn destun i arfarniad o gynaliadwyedd. Mae'r iaith Gymraeg yn ffitio ym mhroses arfarniad o gynaliadwyedd am ei fod yn nodweddiadol ganolog o gymdeithas a chymunedau yng Nghymru a ganddi werth hanesyddol a diwylliannol sylweddol. Dylid felly asesu effeithiau iaith strategaeth, polisiâu a dyraniadau safle'r CDLI."

Casglu data perthnasol

2.8 "Disgwylir i Awdurdodau Cynllunio Lleol gasglu amrywiaeth o dystiolaeth i ategu strategaeth, polisiâu a dyraniadau safle'r CDLI, Gall ffynonellau defnyddiol o ddata ar y Gymraeg gynnwys y

broblem benodol, yn arbennig ymhlith pobl ifanc?

· Oes casgliad o siaradwyr Cymraeg mewn sectorau cyflogaeth benodol?  
Cyfleusterau cymunedol:

· Pa weithgareddau/cymdeithasau sydd ar gael drwy gyfrwng y Gymraeg?

· A oes cyfryngau lleol cyfrwng Cymraeg ee gorsafoedd radio, papurau newydd?

· Ble mae'r cyfleusterau cymunedol sy'n cynnig cyfleoedd i bobl sgwrsio yn Gymraeg? A ydynt mewn lleoliadau hygrych, cynaliadwy? Beth yw darpariaeth gynlluniedig y fath gyfleusterau yn y dyfodol?

2.10 "Ar ôl casglu data bydd angen ei ddadansoddi ac ystyried i ba raddau, a sut, y mae defnydd tir yn effeithio ar y Gymraeg."

2.11 "Y dasg allweddol ar yr adeg hon yw i'r awdurdod nodi'r hyn y mae am i'r CDLI ei gyflawni ar gyfer yr iaith Gymraeg."

2.12 "Bydd rhai neu bob un o'r ffactorau canlynol yn debygol o ddylanwadu ar ddull gweithredu'r ACLI:

· Ydy'r Gymraeg yn brif iaith, neu'n iaith bwysig i grwpiau penodol o fewn cymunedau yn ardal y cynllun?

· Ydy'r Gymraeg yn tyfu neu'n dirywio ar y cyfan?

· Patrymau mudo a phroffil oedran y rhai sy'n symud allan o'r ardal ac i mewn iddi. Faint o bwysau y mae hyn yn eu rhoi ar wasanaethau a seilwaith?

2.13 "Gall CDLI hefyd ystyried pa bolisiau a darpariaethau ar gyfer y Gymraeg a gynhwyswyd mewn cynlluniau datblygu blaenorol yn yr ardal:

· A gyflawnwyd yr amcanion?

· A ddefnyddiwyd polisiau ac a wnaed defnydd priodol ohonynt?

· Pa wersi a ddysgwyd o gynlluniau blaenorol a all lywio dull gweithredu'r CDLI?

Opsiynau'r Cynllun

2.16 "Mewn ardaloedd a chynllun lle mae'r Gymraeg yn agwedd bwysig ar gymunedau lleol dylai'r awdurdod cynllunio ystyried sut bydd pob opsiwn yn effeithio ar y Gymraeg wrth benderfynu pa opsiwn y dylid ei ddewis."

Dyraniad safle:

2.22 "Bydd maint a daliadaeth anheddau yn ffactorau sy'n cael effaith ar bennu os yw datblygiad yn ddylanwad cadarnhaol neu negyddol ar yr iaith"

Rheoli Datblygu

a. "Drwy gasglu tystiolaeth fanwl gywir y gellir ei mesur ac ymgysylltu ag ymgynghorwyr perthnasol, gan gynnwys Comisiynydd y Gymraeg, ar gam llunio'r cynllun mae disgwyl;

bod awdurdodau cynllunio lleol yn nodi eu safbwynt ar gynllunio a'r iaith Gymraeg drwy strategaeth a pholisïau'r CDLI a thrwy ddefnyddio Canllawiau Cynllunio Atodol."

Mae hyn yn amlygu nifer o ddiffygion yn y Cynllun Datblygu arfaethedig.

1. Nid yw'r Cynllun yn edrych ar y darlun llawn o ran y Gymraeg ac effaith cronus nifer o ddatblygiadau dros amser ar y cymunedau Cymraeg fel y adnabyddir hwy yn y Cynllun

2. Nid yw'r asesiad cynladwyedd a gyhoeddwyd gan y Cyngor yn cymryd digon o ystyriaeth o'r Gymraeg nac yn dangos dealltwriaeth iawn o natur fregus y cymunedau hynny. Nid yw'n ystyried yn llawn effaith datblygiadau tai mewn cymunedau Cymraeg megis Llanbrynmair, Pontrobert, Pen-y-bont-fawr a Llanrhaeadr ym Mochnant, i gyd yn gymunedau lle y gwelwyd gostyngiad sylweddol yn y canran o siaradwyr Cymraeg yng Nghyfrifiad 2011.

3. Ni ymddengys unrhyw broses ymchwil o gasglu data ar y Gymraeg oddi wrth Gomisiynydd y Gymraeg, Mentrau Iaith Maldwyn a Brycheiniog a Maesyfed;

4. Ni cheir unrhyw ddadansoddiad o ganlyniadau Cyfrifiad 2011 o ran y Gymraeg. Fel y nodir:

2.10 "Ar ôl casglu data bydd angen ei ddadansoddi ac ystyried i ba raddau, a sut, y mae defnydd tir yn effeithio ar y Gymraeg."

5. Noda TAN 20 yn glir: 2.16 "Mewn ardaloedd a chynllun lle mae'r Gymraeg yn agwedd bwysig ar gymunedau lleol dylai'r awdurdod cynllunio ystyried sut bydd pob opsiwn yn effeithio ar y Gymraeg wrth benderfynu pa opsiwn y dylid ei ddewis."

Er hyn maent yn awgrymu codi stad o 22 o dai yn safle Bryncoch, Llanbrynmair ynghyd a stadau o dai yn Penybontfawr, Llanrhaeadr ym Mochnant a Phontrobert i gyd mewn cymunedau lle gwelwyd cwmp sylweddol o ran y Gymraeg yng nghyfrifiad 2011.

6. Eto noda Tan 20: 2.22 "Bydd maint a daliadaeth anheddau yn ffactorau sy'n cael effaith ar bennu os yw datblygiad yn ddylanwad cadarnhaol neu negyddol ar yr iaith" ac eto bwriedir rhoi

datblygiad tai yn Llanbrynmair heb:

- Wneud unrhyw waith ymchwil na chasglu data o dystiolaeth o anghenion yr ardal
- Heb ystyried y ffaith fod Cyfrifiad 2011 yn dangos gostyngiad o 5% yn y nifer o siaradwyr Cymraeg

## CH. DYSGU O BROFIAD

Ardal Cyngor Cymuned 1991 % (3+) 2001 % (3+) 2011 (3+)

Llanerfyl	73%	57%	56%
Banwy	60%	60%	56%
Glantwymyn	69%	58%	53%
Llanfihangel	70%	64%	53%
Machynlleth	60%	54%	52%
Pen-y-bont-fawr	69%	55%	50%
Llanbrynmair	69%	53%	48%
Llanrhaeadr-ym-Mochnant	64%	53%	43%
Llanwddyn	62%	60%	38%
Llangynog	64%	50%	37%
Carno	57%	45%	36%
Llanfair Caereinion	42%	38%	36%

Un elfen sy'n drist iawn yn hyn oll, ac sy'n grisial clir, yw'r diffyg dysgu gwersi o'r hyn a wnaed dan gynlluniau blaenorol a'r effaith negyddol amlwg mae nifer o benderfyniadau blynyddoedd a fu wedi'u cael ar y cymunedau Cymraeg eu hiaith ym Mhowys.

Mae'r tabl uchod yn dangos yn glir y newid ym mhatrwm ieithyddol nifer o gymunedau Powys dros yr ugain mlynedd diwethaf ac yn ddi-os mae polisiâu cynllunio'r gorffennol wedi cyfrannu at hyn. Boed o ran diffyg dealltwriaeth neu ddiffyg gweledigaeth mae'n allweddol nad yw'r cynllun newydd yma yn ail adrodd camgymeriadau.

Er enghraifft cafwyd datblygiad tai cymdeithasol yn Nolfach ger Llanbrynmair a dim ond un person lleol sy'n byw yno. Mae hyn yn amlygu'r diffyg gwaith cartref o ran tystiolaeth o anghenion lleol. Yn yr un modd gwelwyd stadau eraill yn Llanbrynmair dros y ddegawd ddiwethaf ac mae'r mwyafrif llethol o'r preswylwyr yn methu a siarad Cymraeg. Mae hyn yn cael ei amlygu yn ffigyrau'r Cyfrifiad diwethaf lle gwelwyd gostyngiad o 5% yn y nifer o siaradwyr Cymraeg.

Yn yr un modd gwelwyd y Cyngor yn caniatáu i 15 o fynglo's cael eu hadeiladu yn Y Foel, Dyffryn Banw. Eto dim ond un person lleol sy'n byw ynddynt a'r gweddill ddim yn medru'r Gymraeg. Cymaint mae hyn yn ei wneud yw creu 'geto' Seisnig ar gyrion cymuned arferai fod yn Gymraeg ei hiaith.

Hefyd adeiladwyd 16 o dai yn Llangadfan, yn groes i ddymuniad llawer, ac eto dim ond 4 person lleol

sydd yno. Effaith uniongyrchol hyn yw newid patrwm ieithyddol y gymuned a thanseilio'r ychydig gymunedau ym Mhowys lle arferai'r Gymraeg fod yn iaith pob dydd.

Fel y dywed Emyr Lewis, mewn papur diweddar ar 'Cynllunio a'r Gymraeg':

"Gymaint yn fwy felly yw'r anawsterau i'r Gymraeg mewn llefydd lle mae hi'n iaith fwyafrifol o drwch blewyn, neu'n iaith lleiafrif swmpus. Yma mae'n parhau i gael ei defnyddio fel iaith gymunedol, ond nid iaith y cyfarchiad cyntaf. Mae datblygiadau tai mawrion yn prysuro ei thranc fel iaith gymunedol, ac mae'r ymdrechion i gymhathu hyd yn oed yn anos".

A dyna'n union yw sefyllfa cymunedau fel Llanbrynmair, Llangadfan, Pen-y-bont-fawr ac ati. Does dim ond rhaid edrych ar Gyfrifiad 2011 a'r canrannau o siaradwyr Cymraeg a medrir priodoli yn glir datblygiad stadau tai newydd yn y cymunedau hyn a'r gostyngiad yn y canran o siaradwyr Cymraeg.

Onid yw'n bryd agor llygaid a dysgu gwersi o hyn?

Please find attached my response to the new Local Development Plan. I would like to note that it is a response to the whole document with references to specific developments e.g. in Llanbrynmair etc. I would also like to note my wish to take part in any public inquiry that is conducted in the future unless due consideration is given to these matters prior to this.

#### C. THE WELSH LANGUAGE

Firstly, the fact that the County Council has acknowledged the importance of the Welsh Language at the start of the document should be welcomed. For example, it is noted;

"Levels of Welsh language use vary across the county with higher usage found in the west and south west, although there are concerns that usage is falling in these traditional Welsh language strongholds. The LDP needs to consider how it can contribute to promoting the use of the language and protecting Welsh culture."

In the same way, as an aim and objective under the heading 'Supporting Healthy Communities';

"LDP Objective 15 – Welsh Language and Culture: to support and protect Welsh language and culture in Powys and specifically the Welsh speaking strongholds of the north west and south west"

Also, the fact that recognition of the existence of TAN 20 is to be welcomed. Along with the existence of communities where more than 25% are Welsh speakers.

"These documents require the Council to consider whether it has any communities where the use of the Welsh language is part of the social fabric and where it is so, it

Status Maintained

is appropriate that this be taken into account in land use planning”

Mae Nodyn Cyngor Technegol TAN20 Llywodraeth Cymru a gyhoeddwyd fis Mehefin 2014 yn datgan yn glir fel a ganlyn:

However, although these principles are welcomed, there is a gap between this and the practical actions and what is intended in the Development Plan.

The Welsh Government’s Technical Advice Note TAN20 which was issued last June clearly states the following:

1.8 “During the process of drawing up the plan, it is possible to assess the cumulative and combined effects of many developments on the Welsh language. This is an opportunity to consider the overall effects of the plan on local communities and wider areas.”

2.2 “In order to ensure that economic, social and environmental matters are taken into consideration, the LDP is subject to a sustainability appraisal. The Welsh Language fits into the sustainability appraisal process as it is a central feature of society and communities in Wales, and has substantial historical and cultural value. Therefore, the effects of language strategy, policies and site allocations of the LDP should be assessed.”

Collecting relevant data

2.8 “It is expected that Local Planning Authorities will collect a variety of evidence to complement the strategy, policies and site allocations for the LDP; amongst useful sources for

Welsh language data are:

- Other departments within the local authority
- National Statistics Office
- The Welsh Language Commissioner
- Stats Wales –The Welsh Government Statistical Service
- Primary evidence: surveys of residents, focus groups etc

2.9 The following evidence could provide relevant indicators of the importance of the Welsh language to communities in the Plan area:

Census Data:

· The number of Welsh speakers / percentage of population which speaks Welsh at plan area level, community, electoral area, ward. Is there spatial concentration with a high percentage of Welsh speakers? Where are the biggest changes happening?

· How does the latest data compare with 2001, 1991 etc. Is the number of Welsh speakers increasing or decreasing, or is it stable?

· Do migration patterns affect the linguistic characteristics of the area?

· Is the profile of Welsh speakers a cause for concern?

Local strategies and initiatives:

· What are the authority's aims and objectives in its language strategy?

· Are the authority's strategies consistent with its Welsh Language Action Plan?

· What are the local Language Initiative's priorities and main actions?

Economic factors:

· An estimate of the number of people using Welsh in the workplace?

· What opportunities are there to use the language in the workplace. Is it always used, often, occasionally etc?

· What is the current and anticipated situation in regard to employment? Is unemployment a specific problem, especially amongst young people?

· Is there a predominance of Welsh speakers within specific employment sectors?

Community facilities:

· What activities/societies are available through the medium of Welsh?

· Are there local Welsh medium media available e.g. radio stations, newspapers?

· Where are the community facilities which offer the chance for people to chat in Welsh? Are they in accessible, sustainable locations? What planned provision is there for such facilities in the future?

2.10 "After collecting data, it will need to be analysed and consider to what extent, and how, use of land affects the Welsh language."

2.11 "The key task at this point in time is for the authority to note what it wants the LDP to achieve for the Welsh language."

2.12 "Some or all of the following factors are likely to influence the Local Planning Authority's approach:

- Is Welsh the main language, or is it the important language to certain groups within communities in the plan area?

- Is the Welsh language growing or diminishing on the whole?

- Migration patterns and age profile of those moving from and into the area. How much pressure does this put on services and infrastructure?

2.13 "The LDP could also consider what policies and provisions for Welsh were included in previous development plans for the area:

- Were the objectives fulfilled?

- Were policies used and was appropriate use made of them?

- What lessons were learned from previous plans which could guide the LDP approach?

Plan Options

2.16 "In areas which have a plan where the Welsh language is an important aspect of the local communities, the planning authority should consider how each option with affect the Welsh language, when deciding which option to choose."

Site allocation:

2.22 "Size and occupancy of dwellings are factors which affect determining if a development has a positive or negative influence on the language"

Managing Development

a. "By collecting measurable accurate evidence and engaging in relevant consultations, including the Welsh language Commissioner, at the planning stage of the plan, it is expected: that local planning authorities will note their point of view on planning and the Welsh language through the LDP strategy and policies and by using Supplementary Planning Guidelines."

Source: Email		Type: Objection		Mode	Written	Status Maintained

This highlights a number of failings in the proposed Development Plan.

1. The Plan does not look at the whole picture in regard to the Welsh language, and the cumulative effect of a number of developments over time on Welsh communities as identified in the Plan

2. The sustainability assessment published by the Council does not give sufficient consideration to the Welsh language, and neither does it demonstrate a true understanding of the fragile nature of those communities. It does not fully consider the effect housing developments would have on Welsh communities such as Llanbryn-mair, Pontrobert, Pen-y-bont-fawr and Llanrhaeadr ym Mochnant - all communities that have seen a substantial reduction in the percentage of Welsh speakers in the 2011 Census.

3. There is no evidence of research and data collection on the Welsh language from the Welsh Language Commissioner or from the Language Initiatives of Montgomeryshire and Brecon & Radnor;

4. There is no analysis of the 2011 Census results in relation to the Welsh language. As noted: 2.10 "After collecting data, it will need to be analysed and consider to what extent, and how, use of land affects the Welsh language."

5. TAN 20 clearly states: 2.16 "In areas which have a plan where the Welsh language is an important aspect of the local communities, the planning authority should consider how each option with affect the Welsh language, when deciding which option to choose."

6. Despite this, they suggest building an estate of 22 houses on the Bryn-coch site in Llanbryn-mair along with housing estates in Pen-y-bont-fawr, Llanrhaeadr ym Mochnant and Pontrobert – all communities which have seen a substantial reduction in Welsh speakers in the 2011 Census.

7. Again, Tan 20 states: 2.22 "Size and occupancy of dwellings are factors which affect determining if a development has a positive or negative influence on the language" and yet again, housing development is planned for Llanbryn-mair without:

- Any research or data collection of evidence of need in the area
- Considering the fact that the 2011 Census showed a 5% reduction in the number of Welsh speakers

D. LEARNING FROM EXPERIENCE

Community Council Area 1991 % (3+) 2001 % (3+) 2011 (3+)

Source: Email		Type: Objection		Mode	Written	Status Maintained

Banwy 60% 60% 56%  
 Glantwymyn 69% 58% 53%  
 Llanfihangel 70% 64% 53%  
 Machynlleth 60% 54% 52%  
 Pen-y-bont-fawr 69% 55% 50%  
 Llanbrynmair 69% 53% 48%  
 Llanrhaeadr-ym-Mochnant 64% 53% 43%  
 Llanwddyn 62% 60% 38%  
 Llangynog 64% 50% 37%  
 Carno 57% 45% 36%  
 Llanfair Caereinion 42% 38% 36%

One very sad element in all of this, and which is crystal clear, is the failure to learn from previous plans and the obvious negative effect that decisions made in the past have had on Welsh communities in Powys.

The above table clearly shows the change in the linguistic pattern of a number of communities in Powys over the last twenty years and undoubtedly the planning policies of the past have contributed to this. Be that due to a lack of understanding or lack of vision, it is essential that this new plan does not repeat the same mistakes.

For example, a social housing development took place in Dolfach near Llanbrynmair, and only one local person lives there. This highlights the lack of homework in regard to evidence of local need. In the same way, other estates in Llanbrynmair have been built over the last ten years, and the overwhelming majority of residents are not Welsh speakers. This is highlighted in the statistics from the last Census, which shows a decrease of 5% in the number of Welsh speakers.

In the same way, the council gave permission to build 15 bungalows in Foel, in the Banwy Valley. Yet again, only one local person lives on the estate with none of the remaining residents able to speak Welsh. This has led to the creation of an English 'ghetto' on the outskirts of what was a Welsh speaking community.

Also, 16 houses were built in Llangadfan, against the wishes of many, and yet again, only 4 local people live in these dwellings. A direct effect of this development is that is changing the linguistic pattern of the community, and undermining communities in Powys where the Welsh language used to be the language used on a daily basis.

As Emyr Lewis stated, in a recent paper on 'Planning and the Welsh language':

"The difficulties for the Welsh language are so much greater in places where it is only the majority language by a very small margin, or the language of a considerable minority. Here it is still used as a community language, but not the language of initial greetings. Development of large houses is speeding up its' demise as a community language, and efforts at integration are

---

even more difficult".

And that is the exact situation for communities such as Llanbrynmair, Llangadfan, Pen-y-bontfawr etc. We only have to look at the 2011 census results and the percentages of Welsh speakers to be able to attribute the development of new housing estates in these communities to the decrease in the percentage of Welsh speakers.

Isn't it time that we opened our eyes, and lessons were learnt from this?

Bydd hefyd yn cael ei ystyried wrth lunio'r Canllawiau Cynllunio Atodol ar fesurau lliniaru priodol ar yr iaith Gymraeg a Diwylliant. Mae'r CDU yn cynnwys meini prawf digonol ar fonitro er mwyn ystyried ac adolygu polisi'r Gymraeg a cheisiadau cynllunio cysylltiedig fel rhan o Adroddiadau Monitro Blynyddol y CDU a phrosesu adolygu'r Cynllun a ddaw o dan ganllawiau cynllunio cenedlaethol. Having considered the representations received and further supporting evidence that has been prepared it is considered this level of housing provision remains appropriate to ensure the Local Development Plan (LDP) is capable of delivering the Strategy, its key socio-economic objectives and ensures maximum flexibility to respond to future economic growth. It is considered that any deviation from this housing supply provision would jeopardise the soundness of the plan in being able to meet these objectives. A significant amount of research and evidence gathering was undertaken during the preparation of the LDP to consider appropriate housing opportunities for the county and to address local housing need and housing distribution. The Council considers that the distribution of housing across the Settlement Hierarchy is based on a sound rationale which supports the delivery of the LDP strategy and the longer term viability of settlements considered capable of supporting sustainable growth. The Council propose to amend its policy approach to Welsh Language and Culture to better address issues raised in the representation and to ensure its policy approach is consistent with National Policy. The plan recognises the linguistic sensitivity of Welsh speaking communities and includes policy that seeks to mitigate against the impact of large housing developments within these areas. See Focused Changes for details. As part of the preparation of the LDP the Council did commission research to see the effect new housing developments have had on traditional Welsh Speaking Communities. This Welsh Language Impact Assessment forms part of the Sustainability Appraisal of the Plan and its findings supports the amended Welsh Language policy approach and will inform the preparation of Supplementary Planning Guidance on appropriate Welsh Language and Culture Mitigation Measures. The LDP includes sufficient monitoring criteria to enable consideration and review of Welsh Language policy and associated planning applications as part of LDP Annual Monitoring Reports and the Plan review processes provided under national planning guidance."

**Question: 3d. (i) Representation Details**

Representation Texts: Hoffwn i chi nodi fy sylwadau fel rhan o'ch ymgynghoriad ar Gynllun Datblygu Lleol Powys. Rwy'n croesawu'r targed y bydd y ganran sy'n siarad Cymraeg yn y Sir yn tyfu, yn ogystal â'r gydnabyddiaeth o bwysigrwydd cymunedau Cymraeg. Ond os am wireddu'r amcanion cloddiw hyn, mae angen newidiadau sylfaenol i'r cynllun, yn benodol:

\* Credaf nad yw'r tystiolaeth fod angen 6,071 o dai yn gadarn, gan nad yw'r methodoleg yn ystyried yr angen lleol am dai. Dylid lleihau'r ffigur yn sylweddol.

\* Nid yw dosbarthiad y tai yn y cynllun yn addas gan nad yw wedi selio ar anghenion lleol. Mae angen casglu tystiolaeth o'r angen lleol am dai, ac ail-lunio'r dosbarthiad o dai rhwng ac o fewn cymunedau.

\* Bod y Cyngor yn comisiynu gwaith ymchwil i weld effaith datblygiadau tai newydd ar y cymunedau traddodiadol Cymraeg yn ystod y Cynllun Datblygu Lleol diwethaf.

\* O dderbyn sensitifrydd ieithyddol y cymunedau traddodiadol Cymraeg, bod y cynllun yn cyfyngu ar ddatblygiadau tai newydd yn yr ardaloedd hynny am ddegawd hyd fydd effaith newidiadau'r ddegawd flaenorol wedi setlo.

\* Bod y Cyngor yn derbyn yr egwyddor o angen lleol yn sail cyn caniatáu unrhyw ddatblygiadau yn yr ardaloedd hynny.

\* Bod y Cyngor yn rhoi system asesu annibynnol mewn lle ar gyfer unrhyw ddatblygiadau arfaethedig i weld yr effaith ar y Gymraeg.

Heb gymryd y camau uchod, credaf nad yw'r Cynllun Datblygu Lleol yn gadarn. Edrychaf ymlaen at dderbyn eich ymateb i fy mhryderon.

I should like you to note my comments as part of your consultation on Powys Local Development Plan. I welcome the target of a growth in the percentage of Welsh-speakers in the county, as well as the recognition of the importance of Welsh communities. But if you wish to realise these commendable objectives, then there is a need to make some basic changes to the plan, in particular:

I don't believe firm evidence exists that 6,071 houses are required, since the methodology does not consider the local housing need. The figure should be substantially reduced.

The distribution of the houses in the plan is not suitable since it is not based on local needs. Evidence needs to be collected of the local housing need, and the distribution needs to be changed between and within communities.

The council should commission research to see the effect the new housing developments have had on traditional Welsh--speaking communities during the period of the last Local Development Plan.

Given the linguistic sensitivity of the traditional Welsh-speaking communities, the plan

Gynaliadwyedd ac fe'i gynhaliwyd er mwyn ceisio deall beth fydd effeithiau tebygol datblygiad tai newydd ar gymunedau Cymraeg, gan gynnwys effeithiau datblygiad tai newydd ar gymeriad a chydbwysedd ieithyddol cymuned. Os yw cais yn debygol o gael effaith ar grynodiad lleol o siaradwyr Cymraeg, daeth yr asesiad i'r casgliad y byddai angen asesu hyn a chael mesurau lliniaru fel y nodwyd yn yr asesiad. Having considered the representations received and further supporting evidence that has been prepared it is considered this level of housing provision remains appropriate to ensure the Local Development Plan (LDP) is capable of delivering the Strategy, its key socio-economic objectives and ensures maximum flexibility to respond to future economic growth. It is considered that any deviation from this housing supply provision would jeopardise the soundness of the plan in being able to meet these objectives. A significant amount of research and evidence gathering was undertaken during the preparation of the LDP to consider appropriate housing opportunities for the county and to address local housing need and housing distribution. The Council considers that the distribution of housing across the Settlement Hierarchy is based on a sound rationale which supports the delivery of the LDP strategy and the longer term viability of settlements considered capable of supporting sustainable growth. The categorisation of settlements (including Llanbrynmair and Pontrobert) was not only linked to the number of services in each of these communities but also included matters of judgement based on planning and sustainability reasons. The Council propose to amend its policy approach to Welsh Language and Culture to better address issues raised in the representation and to ensure its policy approach is consistent with National Policy. This policy approach better recognises the linguistic sensitivity of Welsh speaking communities (including communities such as Llanbrynmair and Pontrobert) and includes policy that seeks to mitigate against the impact of large housing developments within these areas. See Focused Changes for details. Welsh Language and Culture in Powys and how to plan for its protection and enhancement is considered in detail in the Welsh Language and Culture Topic Paper. The Sustainability Appraisal of the plan included an assessment of the likely significant effects of the plan on the use of Welsh Language in Powys. In accordance with Technical Advice Note 20, the Sustainability Appraisal of the Plan assessed the impact of the spatial strategy, policies and allocations on the Welsh Language and was found to have an overall positive impact. In conjunction with the Sustainability Appraisal of the plan a Welsh Language Impact Assessment was also undertaken. This assessment forms part of the Sustainability Appraisal and was undertaken to help understand the likely impacts of new housing development on Welsh speaking communities including impacts on the character and linguistic balance of a community associated with new housing development. The assessment concluded that should a development proposal be likely to affect a local concentration of Welsh speakers then this would need to be assessed and if necessary mitigated using methods identified in the assessment."

**Question: 3d. (i) Representation Details**

Representation Texts: Cynllun Datblygu Lleol Powys

Ymateb Cangen Maldwyn Cymdeithas yr Iaith Gymraeg

Mae nifer o elfennau sy'n destun pryder mewn perthynas â'r Cynllun Datblygu Lleol newydd gan gynnwys:

Sail yr amcangyfrif o 6,071 o dai newydd i Bowys

Dosraniad y tai hynny i gymunedau penodol

Ystyriaeth o'r iaith Gymraeg fel iaith gymunedol ac effaith datblygiadau arfaethedig

Diffyg dysgu o brofiad effaith datblygiadau blaenorol

CRYNODEB O'R HYN A ELWIR AMDANO

1. Credaf nad yw'r dystiolaeth fod angen 6,071 o dai yn gadarn ac felly dylif lleihau'r ffigwr yn sylweddol.

2. Nid yw dosbarthiad y tai yn y cynllun yn addas gan nad yw wedi seilio ar anghenion lleol.

Status Maintained

3. Bod y Cyngor yn ail edrych ar yr elfennau yn ymwneud a'r Gymraeg a chynnalwydd cymunedau sensitif ieithyddol yn sgil Bil Cynllunio 2015 lle'r cydnabyddir y Gymraeg yn ystyriaeth berthnasol yn y drefn gynllunio.

4. Yn sgil y Bil Cynllunio, gelwir ar y Cyngor i gomisiynu gwaith ymchwil i weld effaith datblygiadau tai newydd ar y cymunedau traddodiadol Cymraeg, y rhai y cydnabyddir iddynt fod yn sensitif yn ieithyddol a dros 25% o siaradwyr Cymraeg, yn ystod y Cynllun Datblygu Lleol diwethaf.

5. O dderbyn sensitifwydd ieithyddol y cymunedau hynny, bod y cynllun yn cyfyngu ar ddatblygiadau tai newydd yn yr ardaloedd hynny am ddegawd hyd fydd effaith newidiadau'r cyfnod blaenorol wedi'u setlo.

6. O ystyried bodolaeth y Ddeddf Gynllunio 2015 newydd, sydd yn cydnabod y Gymraeg fel ystyriaeth cynllunio gyflawn a bod y gwaith yma gan Bowys heb ystyried hynny, bod y Cyngor hefyd yn rhoi mewn lle trefn o gomisiynu cwmni annibynnol allanol i wneud asesiadau iaith ar unrhyw ddatblygiadau oddi fewn yr ardaloedd o sensitifwydd ieithyddol.

### A. SAIL YR AMCANGYFRIF

Mae sawl agwedd o'r amcangyfrif yn y cynllun yn peri pryder. Yn y lle cyntaf mae'r ffigwr o 5,519 o dai a nodir sydd angen ar ddechrau'r ddogfen yn ymddangos yn ffigwr wedi'u dynnu o'r awyr. Oherwydd yn ddiweddarach yn y ddogfen nodir bod angen safleoedd ar gyfer 6,071 o dai er mwyn sicrhau'r 5,519. Golyga hyn eich bod yn clustnodi 552 o safleoedd yn fwy na'r hyn rydych yn cydnabod sydd eu hangen go iawn.

Yn ychwanegol at hynny, rydych yn datgan i 194 o dai cael eu hadeiladu'n flynyddol rhwng 2009 a 2013. Petai'r ffigwr hynny felly'n parhau am gyfnod y Cynllun o 2011 i 2026 dim ond 2,910 o safleoedd fyddai eu hangen.

Hyd yn oed petai rywun yn cymryd cyfartaledd yr adeiladu yn ystod yr 8 mlynedd diwethaf, sef 274 y flwyddyn, byddai'n golygu cyfanswm i Bowys o 4,110 o safleoedd. Golyga hynny bod y targed bron i 33% yn fwy nac hyd yn oed yr hyn oedd yn cael ei ddatblygu yn ystod penllanw adeiladu cyn y dirwasgiad.

Yn ychwanegol at hynny, mae nifer o ffactorau eraill sydd angen eu hystyried wrth gynllunio i'r dyfodol.

Fel y dengys ffigyrau'r Swyddfa Ystadegau a gyhoeddwyd ym Mehefin 2014, ymddengys bod poblogaeth Powys yn y cyfnod o ganol 2012 i 2013 wedi gostwng o 133,000 yn 2012 i 132,700 yn 2013, sef gostyngiad o 300 neu 0.2%.

Hefyd cyhoeddwyd pecyn o ystadegau defnyddiol gan Y Gwasanaethau Gwybodaeth a Dadansoddi

Status Maintained

Llywodraeth Cymru ar yr 20fed o Ragfyr 2013. Dengys y rheini fod patrwm mudo ar gyfer y sir rhwng 2001 a 2011. Dangosir bod 5,810 wedi mewnfudo tra bo allfudiad o 4,990 yn gadael ffigwr net o 820 o fewnfudwyr. O ddefnyddio'r ffigwr net yma fel cynsail ar gyfer oes y Cynllun Datblygu, sef 15 mlynedd rhwng 2011 a 2026, yna byddai ffigwr net o 1,230 o fewnfudwyr.

Ffactor arall allweddol ydy'r ffaith bod cydnabyddiaeth yn yr un ddogfen y rhagwelir gostyngiad yn y boblogaeth rhwng 0 a 15 yn y sir hyd at 2026.

"For a handful of authorities, (Powys ac eraill) the population aged 0 to 15 is expected to decrease based on both the higher and lower population variants and the principal projection"  
Rhagwelir gostyngiad o 17.1% yn 2011 i 15.5% yn 2026, efo'r niferoedd posib yn gostwng o 22,800 i 21,100.

Yr elfen arall dylanwadol ym mhoblogaeth Powys ydy'r canran o rhai dros 65 oed a rhagwelir hynny o bosib yn cynyddu o 22.9% yn 2011 i 30% yn 2026. Y pwynt allweddol yma ydy bydd hynny yn cynyddu'r galw am gartrefi henoed, fflatiau gwarchodol a gwasanaethau cyffelyb yn hytrach na stadau o dai newydd.

Yn ychwanegol at hyn, cyhoeddwyd ystadegau newydd gan Lywodraeth Cymru ym mis Chwefror 2014 gan gydnabod bod y rhagolygon blaenorol o ran twf poblogaeth yn anghywir. Yn lle gweld cynnydd o 284,000 o gartrefi yng Nghymru hyd at 2033 gostyngwyd hynny i 175,000, sef tua 7,954 y flwyddyn neu 119,318 hyd at 2026 sef oes y cynlluniau datblygu.

O dynnu ffigyrau twf Caerdydd ac Abertawe allan, cedwir tua 59,318 ar gyfer gweddill Cymru sy'n golygu mae 3,000 o dai ar y mwyaf y dylid ei adeiladu ym Mhowys hyd at 2026.

I grynhoi felly o ran yr elfen yma:

Mae'r rhagolwg o dai hyd at 2026 yn fwy yn flynyddol na'r hyn a ddigwyddodd dros yr 8 mlynedd diwethaf sy'n golygu dylai'r rhagolwg fod o leiaf 2,000 yn llai

Yn ychwanegol at hynny, dengys ffigyrau cyhoeddus bod y boblogaeth wedi gostwng rhwng 2012 a 2013

Dengys patrwm mudo'r ddegawd ddiwethaf mai ffigwr net y 15 mlynedd nesaf fyddai 1,230. Go brin fyddai'r rhain i gyd yn mynd i gartrefi newydd, ac felly unwaith eto mae'n anodd cyfiawnhau'r bwriad o 6,071 o dai newydd

Ceir cytundeb bydd y niferoedd hyd at 15 oed yn gostwng bydd wedyn yn dylanwadu ar y niferoedd o gartrefi i rai ifanc fydd eu hangen

Rhagwelir cynnydd yn y rhai dros 65 oed ac eto nid ystadau o dai newydd fydd angen arnynt ond yn hytrach gofal mewn cartrefi henoed, gofal gwarchodol ac ati.

Dengys ffigyrau diwygiedig Llywodraeth Cymru bod eu rhagolygon gwreiddiol ymhell ohoni ac ar sail hynny mai 3,000 ar y mwyaf o dai y dylid eu hadeiladu ym Mhowys ac nid 5,000.

#### B. DOSRANIAD Y TAI

Agwedd arall sy'n creu pryder yw'r dosraniad tai. Unwaith eto mae'r agwedd yma yn anwybyddu'r hyn a ddatganwyd mewn rhan arall o'r ddogfen, sef pwysigrwydd y Gymraeg mewn rhannau o'r Sir. Rhoddir Llanbrynmair fel pentref mawr, er bod Glantwymyn, Llangadfan a Llanerfyl yn cael eu nodi fel pentrefi bach. Mewn gwirionedd mae llawn cymaint o wasanaethau i'w cael yn y naill gymuned a'r llall ac mae'r dull arwynebol hyn o weithredu yn anwybyddu realiti ar lawr gwlad, sef bod pentrefi fel Glantwymyn neu Langadfan yn gwasanaethu ardal ddaearyddol llawer ehangach a bod rhwydweithiau cymdeithasol mewn ardal o'r fath yn bwysig.

Yn yr un modd prin y medrir honni fod Pontrobert yn bentref mawr. Dylid felly trosglwyddo Llanbrynmair a Phontrobert o'r categori pentrefi mawr i bentrefi bach.

Yn yr un modd dylid dileu'r ffin gaeth o amgylch Llanbrynmair er mwyn newid y pwyslais oddi wrth ddatblygu ystâd o dai diangen i un lle y medrid adlewyrchu gwir anghenion lleol ac un lle byddai modd adeiladu tai unigol fel bo angen yn y dyfodol. Mae'r patrwm o osod ffin gaeth o amgylch pentref gwledig yn newid natur y gymuned o fod yn un gwledig i fod yn un drefol ei naw.

Pryderon eraill a geir mewn perthynas â'r bwriad o ddatblygu safle Bryncoch, Llanbrynmair yw:

Ni wnaed unrhyw waith ymchwil na chasglu unrhyw ddata o dystiolaeth o anghenion yr ardal

Ni chymerwyd i ystyriaeth y ffaith bod hawl i 5 annedd wedi bod yno ers degawd a neb eisiau nhw

Ni ystyriwyd canlyniadau Cyfrifiad 2011, y gostyngiad o 5% yn y nifer o siaradwyr Cymraeg a'r newid cymdeithasol.

Mae hyd yn oed un o swyddogion Cyngor Powys wedi datgan yn bersonol i mi fod y ffigwr o 17 tŷ arall yma yn anghywir ac mewn gwirionedd ei fod o leiaf 14 yn fwy na'r hyn y dylai fod

Mae amheuaeth mai'r hyn sydd wedi digwydd felly yw fel y nodir yng nghymal 3.4.24 y Cynllun Datblygu sef;

"Lle nad yw anheddiad wedi gallu ymdopi â'i lefel datblygu pro rata, mae'r CDLI wedi ceisio ailneilltuo tir ar gyfer y diffyg mewn mannau eraill i sicrhau bod cyfanswm gofynion cyfnod y cynllun yn cael ei gyflawni. Yn yr achos cyntaf, mae'r CDLI wedi ceisio neilltuo tir ar gyfer y diffyg mewn aneddiadau gerllaw sydd yn y categori Trefi neu Bentrefi Mawr"

Mae gweithredu fel hyn yn mynd yn hollol groes i'r egwyddorion honedig o fewn y cynllun sef "Cefnogi a gwarchod yr iaith Gymraeg a diwylliant Cymreig ym Mhowys" (amcan 15).

## C. Y GYMRAEG

Yn y lle cyntaf dylid croesawu'r ffaith fod y Cyngor Sir yn cydnabod pwysigrwydd y Gymraeg ar ddechrau'r ddogfen. Er enghraifft, nodir:

"Mae lefelau'r iaith Gymraeg yn amrywio ledled y sir, gyda mwy o bobl yn ei defnyddio yn y gorllewin a'r de-orllewin, er bod yna bryderon bod ei defnyddio ar drai yn y cadarnleoedd y Gymraeg traddodiadol hyn. Mae angen i'r CDLI ystyried sut gall gyfrannu at hybu defnyddio'r iaith a gwarchod diwylliant Cymreig"

Yn yr un modd nodir fel nod ac amcan dan y pennawd 'Cefnogi Cymunedau Iach';

"Amcan 15 y CDLI – Yr iaith Gymraeg a Diwylliant Cymreig: Cefnogi a gwarchod yr iaith Gymraeg a diwylliant Cymreig ym Mhowys ac, yn benodol, cadarnleoedd y Gymraeg yn y gogledd-orllewin a'r de-orllewin."

Hefyd croesawir y ffaith bod cydnabyddiaeth o fodolaeth TAN 20 a bodolaeth y cymunedau lle ceir mwy na 25% o siaradwyr Cymraeg.

"These documents require the Council to consider whether it has any communities where the use of the Welsh language is part of the social fabric and where it is so, it is appropriate that this be taken into account in land use planning"

Serch hynny, tra bo'r egwyddorion hyn i'w croesawu gwelir bwch rhwng hyn a'r gweithredu ymarferol a'r hyn a fwriedir yn y Cynllun Datblygu.

Mae Nodyn Cyngor Technegol TAN20 Llywodraeth Cymru a gyhoeddwyd fis Mehefin 2014 yn datgan yn glir fel a ganlyn:

1.8 "Wrth lunio mae modd asesu effeithiau cronol a chyfunol llawer o ddatblygiadau ar y Gymraeg. Mae hyn yn gyfle i ystyried effeithiau ar gymunedau lleol ac ardaloedd ehangach y cynllun gyda'i gilydd."

2.2 "Er mwyn sicrhau y caiff materion economaidd, cymdeithasol ac amgylcheddol eu hystyried, mae' destun i arfarniad o gynaliadwyedd. Mae'r iaith Gymraeg yn ffio ym mhroses arfarniad o gynaliadwyedd am fod yn nodweddig ganolog o gymdeithas a chymunedau yng Nghymru a ganddi werth hanesyddol a diwylliannol sylweddol. Dylid felly asesu effeithiau iaith strategaeth, polisiau a dyraniadau safle'r CDLI." Casglu data perthnasol

mae polisiau cynllunio'r gorffennol wedi cyfrannu at hyn. Boed o ran diffyg dealltwriaeth neu ddiffyg gweledigaeth mae'n allweddol nad yw'r cynllun newydd yma yn ail adrodd camgymeriadau.

Er enghraifft cafwyd datblygiad tai cymdeithasol yn Nolfach ger Llanbryn-mair a dim ond un person lleol sy byw yno. Mae hyn yn amlygu'r diffyg gwaith cartref o ran tystiolaeth o anghenion lleol. Yn yr un modd gwelwyd stadau eraill yn Llanbryn-mair dros y ddegawd ddiwethaf ac mae'r mwyafrif llethol o'r preswylwyr yn methu a siarad Cymraeg. Mae hyn yn cael ei amlygu yn ffigurau'r Cyfrifiad diwethaf lle gwelwyd gostyngiad o 5% yn y nifer o siaradwyr Cymraeg.

Yn yr un modd gwelwyd y Cyngor yn caniatáu i 15 o dai unllawr gael eu hadeiladu yn Y Foel, Dyffryn Banw. Eto dim ond un person lleol sy'n byw ynddynt a'r gweddill ddim yn medru'r Gymraeg. Cymaint mae hyn yn ei wneud yw creu 'geto' Seisnig ar gyrion cymuned arferai fod yn Gymraeg ei hiaith.

Hefyd adeiladwyd 16 o dai yn Llangadfan, yn groes i ddymuniad llawer, ac eto dim ond 4 person lleol sydd yno. Effaith uniongyrchol hyn yw newid patrwm ieithyddol y gymuned a thansellio'r ychydig gymunedau ym Mhowys lle arferai'r Gymraeg fod yn iaith pob dydd.

Fel y dywed Emyr Lewis, mewn papur diweddar ar 'Cynllunio a'r Gymraeg':

"Gymaint yn fwy felly yw'r anawsterau i'r Gymraeg mewn llefydd lle mae hi'n iaith fwyafrifol o drwch neu'n iaith lleiafrif swmpus. Yma mae'n parhau i gael ei defnyddio fel iaith gymunedol, ond nid iaith y cyfarchiad cyntaf. Mae datblygiadau tai mawrion yn prysuro ei thranc fel iaith gymunedol, ac mae'r ymdrechion i gymhathu hyd yn oed yn anos".

A dyna'n union yw sefyllfa cymunedau fel Llanbryn-mair, Llangadfan, Penybontfawr ac ati. Does dim ond

rhad edrych ar Gyfrifiad 2011 a'r canrannau o siaradwyr Cymraeg, a medrir priodoli'n glir datblygiad stadau tai newydd yn y cymunedau hyn â'r gostyngiad yn y ganran o siaradwyr Cymraeg. Onid yw'n bryd agor llygaid a dysgu gwersi o hyn?

Powys Local Development Plan

There are a number of elements that are a cause for concern in relation to the new Local Development Plan, including:

- The basis for the estimated 6,071 new homes for Powys
- The distribution of these homes to specific communities
- Consideration of the Welsh language as a community language, and the effect of the proposed developments

- Failure to learn from experience of the effect of previous developments

A SYNOPSIS OF WHAT IS BEING CALLED FOR

1. I do not believe that the evidence is robust in demonstrating the need for 6,071 of houses and therefore the figure should be substantially reduced.

2. The distribution of the houses in the plan is not appropriate as it is not based on local need.

3. That the Council revisits the elements relating to the Welsh language and the sustainability of linguistically sensitive communities in the wake of the Planning Act 2015 where the Welsh language is acknowledged as a planning factor.

4. In view of the Planning Act, the Council is called upon to commission research to look at the effect of new housing developments on the traditional Welsh speaking communities, those communities that are acknowledged to be linguistically sensitive with over 25% of Welsh speakers, during the period of the last Local Development Plan.

5. Accepting the linguistic sensitivity of those communities, that the plan restricts new housing developments in those areas for a decade until the effects of the previous period of changes have been settled.

6. In consideration of the existence of the new Planning Act 2015, which acknowledges the Welsh language as a full planning consideration and due to the fact that this work from Powys has not considered this, that the Council puts in place a procedure for commissioning an external independent company to undertake a language assessment on any developments within these areas of linguistic sensitivity.

A. THE BASIS OF THE ESTIMATE

A number of aspects of the estimate in the plan cause concern. In the first place, the figure of 5,519 homes which is noted as the number of houses needed at the start of the document appears to be a number which has been plucked from the sky. As later in the document it is noted that sites are needed for 6,071 houses to ensure the achievement of 5,519. This means that you are designating 552 more sites than you acknowledge are really needed.

In addition to this, you state that 194 houses were built every year between 2009 and 2013. If such a figure was to continue therefore during the period of the Plan

Source: Email

Type: Objection

Mode Written

Status Maintained

from 2011 to 2026 only 2,910 sites would be needed.

Even if someone was to take the average of the building work during the last 8 years, that is 274 per year, this would mean a total of 4,110 sites for Powys. This means that the target is nearly 33% more than what was developed during the pinnacle of building work before the recession.

In addition, a number of other factors need to be considered in planning for the future.

As the National Statistics Office figures published in June 2014 demonstrate, it appears that the population in Powys from the period of mid 2012 — 2013 had reduced by 300 i.e. a reduction of 0.2% from 133,000 in 2012 to 132,700 in 2013. Also, a pack of useful statistics was published by the Welsh Assembly's Information and Analytical Services Division on 20th December 2013. These indicate the migration pattern for the county between 2001 and 2011. They showed that inward migration was 5,810, with outward migration at 4,990 leaving a net total of 820 immigrants. Using this net figure as a basis for the length of the Development Plan for 15 years between 2011 and 2026, the net figure would be a total of 1,230 immigrants.

Another key factor is the fact that is acknowledged in the same document that a decrease in population of those 0—15 is envisaged in the county up to 2026.

“For a handful of authorities, (Powys and others) the population aged 0 to 15 is expected to decrease, based on both the higher and lower population variants and the principal projection”

A reduction of 17.1% is expected in 2011 to 15.5% in 2026, with possible numbers reducing from 22,800 to 21,100.

The other influential element within the Powys population is the percentage of those over 65 years of age, and it is anticipated that this could possibly increase from 22.9% in 2011 to 30% in 2026. The key point here is that it would mean an increase in the need for homes for the elderly, sheltered accommodation and similar services rather than estates of new houses.

In addition, the Welsh Government published new statistics in February 2014 acknowledging that the previous population growth forecasts were incorrect.

Instead of seeing an increase of 284,000 homes in Wales up to 2033, this was cut to 175,000, i.e. approximately 7,954 per annum, or 119,318 up to 2026, which is the lifetime of the development plans.

Source: Email

Type: Objection

Mode Written

Status Maintained

If the growth figures for Cardiff and Swansea are taken out, that leaves approximately 59,318 for the rest of Wales, which means that at most, 3,000 homes should be built in Powys up to 2026.

To sum up this element therefore:

- The estimate for houses up to 2026 is a higher annual figure than the figure for the last 8 years, which means the estimate should be approximately at least 2,000 less.
- In addition to that, the public statistics show that the population has fallen between 2012 and 2013
- The migration pattern for the last decade shows that the net figure for the last fifteen years would be 1,230. It's highly unlikely that these would all move to new homes, so yet again, it's difficult to justify the intention to build 6,071 new homes.
- It is agreed that the number of young people up to 15 years of age will reduce, which will then have an effect on the number of homes needed by young people
- It is anticipated that the number of over 65 year olds will increase, and again these will not need estates of new houses, but rather care in homes for the elderly, sheltered accommodation etc.
- The revised Welsh Government figures show that their original forecasts were a long way off, and based on that, a maximum of 3000 homes should be built in Powys not 5,000.

**B. ALLOCATION OF HOUSING**

Another aspect which causes concern is the allocation of housing. Once again, this aspect ignores what has already been stated in another part of the document, namely the importance of the Welsh language in parts of the county. Llanbrynmair is identified as a large village, although Cemmaes Road, Llangadfan and Llanerfyl are identified as small villages. In fact, there are an equal number of services in each of these communities, and this very superficial method ignores the reality of the situation, namely that villages like Cemmaes Road or Llangadfan serve a much larger geographical area, and that social networks in such an area are extremely important.

In the same way, you can hardly claim that Pontrobert is a large village. Therefore

Source: Email Type: Objection Mode: Written Status: Maintained

Llanbrynmair and Pontrobert should be moved from the large village category to that of small villages.

And in the same way, the confined boundary around Llanbrynmair should be eliminated in order to change the emphasis from developing an estate of unnecessary houses to one which would truly represent local needs, and one where individual houses could be built as and when needed in the future. The pattern of placing a confined boundary around rural villages changes the whole nature of a community from a rural to an urban one.

Other concerns in relation to the intention to develop the Bryncoch site in Llanbrynmair are as follows:

- No research has been done and no data collected on the evidence of need in the area.
- The fact that there has been permission to build 5 dwellings there for ten years and no-one wants to build has not been taken into account.
- The results of the 2011 Census have not been taken into account, showing a reduction of 5% in the number of Welsh speakers, and the social change.
- One of Powys County Council's officers has told me personally that the figure of another 17 houses here is incorrect and that it is actually 14 more that it should be for the community.
- There are misgivings that what has actually happened is as noted in clause 3.4.25 of the Development Plan, namely;

"Where a settlement has been unable to accommodate its pro-rata level of development, the LDP has sought to re-allocate the shortfall elsewhere to ensure that the total requirements for the plan period are met. In the first instance, the LDP has sought to allocate the shortfall to nearby settlements categorised as Towns or Large Villages"

- Acting in this manner goes completely against the supposed principles within the plan: "to support and protect the Welsh language"

C. THE WELSH LANGUAGE

Firstly, the fact that the County Council has acknowledged the importance of the Welsh Language at the start of the document should be welcomed. For example, it is noted;

“Levels of Welsh language use vary across the county with higher usage found in the west and south west, although there are concerns that usage is falling in these traditional Welsh language strongholds. The LDP needs to consider how it can contribute to promoting the use of the language and protecting Welsh culture.”

In the same way, as an aim and objective under the heading ‘Supporting Healthy Communities’;

“LOP Objective 15— Welsh Language and Culture: to support and protect Welsh language and culture in Powys and specifically the Welsh speaking strongholds of the north west and south west”

Also, the fact that recognition of the existence of TAN 20 is to be welcomed. Along with the existence of communities where more than 25% are Welsh speakers.

“These documents require the Council to consider whether it has any communities where the use of the Welsh language is part of the social fabric and where it is so, it is appropriate that this be taken into account in land use planning”

Mae Nodyn Cyngor Technegol TAN20 Llywodraeth Cymru a gyhoeddwyd fis Mehefin 2014 yn datgan yn glir fel a ganlyn:

However, although these principles are welcomed, there is a gap between this and the practical actions and what is intended in the Development Plan.

The Welsh Government’s Technical Advice Note TAN20 which was issued last June clearly states the following:

1.8 “During the process of drawing up the plan, it is possible to assess the cumulative and combined effects of many developments on the Welsh language. This is an opportunity to consider the overall effects of the plan on local communities and wider areas.”

2.2 “In order to ensure that economic, social and environmental matters are taken into consideration, the LOP is subject to a sustainability appraisal. The Welsh Language fits into the sustainability appraisal process as it is a central feature of society and communities in Wales, and has substantial historical and cultural value. Therefore, the effects of language strategy, policies and site allocations of the LOP should be assessed.”

Collecting relevant data

2.8 “It is expected that Local Planning Authorities will collect a variety of evidence to complement the strategy, policies and site allocations for the LDP; amongst useful sources for Welsh language data are:

- Other departments within the local authority
- National Statistics Office
- The Welsh Language Commissioner
- Stats Wales —The Welsh Government Statistical Service
- Primary evidence: surveys of residents, focus groups etc

2.9 The following evidence could provide relevant indicators of the importance of the Welsh language to communities in the Plan area:

Census Data:

- The number of Welsh speakers/percentage of population which speaks Welsh at plan area level, community, electoral area, ward. Is there spatial concentration with a high percentage of Welsh speakers? Where are the biggest changes happening?
- How does the latest data compare with 2001, 1991 etc. Is the number of Welsh speakers increasing or decreasing, or is it stable?
- Do migration patterns affect the linguistic characteristics of the area?
- Is the profile of Welsh speakers a cause for concern?

Local strategies and initiatives:

- What are the authority's aims and objectives in its language strategy?
  - Are the authority's strategies consistent with its Welsh Language Action Plan?
  - What are the local Language Initiative's priorities and main actions?
- Economic factors:
- An estimate of the number of people using Welsh in the workplace?
  - What opportunities are there to use the language in the workplace. Is it always used, often, occasionally etc?

- What is the current and anticipated situation in regard to employment? Is unemployment a specific problem, especially amongst young people?
- Is there a predominance of Welsh speakers within specific employment

sectors?

Community facilities:

- What activities/societies are available through the medium of Welsh?
- Are there local Welsh medium media available e.g. radio stations, newspapers?
- Where are the community facilities which offer the chance for people to chat in Welsh? Are they in accessible, sustainable locations? What planned provision is there for such facilities in the future?

2.10 "After collecting data, it will need to be analysed and consider to what extent, and how, use of land affects the Welsh language."

2.11 "The key task at this point in time is for the authority to note what it wants the LOP to achieve for the Welsh language."

2.12 "Some or all of the following factors are likely to influence the Local Planning Authority's approach:

- Is Welsh the main language, or is it the important language to certain groups within communities in the plan area?
- Is the Welsh language growing or diminishing on the whole?
- Migration patterns and age profile of those moving from and into the area. How much pressure does this put on services and infrastructure?

2.13 "The LDP could also consider what policies and provisions for Welsh were included in previous development plans for the area:

- Were the objectives fulfilled?
- Were policies used and was appropriate use made of them?
- What lessons were learned from previous plans which could guide the LDP approach?

Plan Options

2.16 "In areas which have a plan where the Welsh language is an important aspect of the local communities, the planning authority should consider how each option will affect the Welsh language, when deciding which option to choose."

Site allocation:

2.22 "Size and occupancy of dwellings are factors which affect determining if a development has a positive or negative influence on the language"

Managing Development

a. "By collecting measurable accurate evidence and engaging in relevant consultations, including the Welsh language Commissioner, at the planning stage of the plan, it is expected: that local planning authorities will note their point of view on planning and the Welsh language through the LOP strategy and policies and by using Supplementary Planning Guidelines."

This highlights a number of failings in the proposed Development Plan.

1. The Plan does not look at the whole picture in regard to the Welsh language, and the cumulative effect of a number of developments over time on Welsh communities as identified in the Plan

2. The sustainability assessment published by the Council does not give sufficient consideration to the Welsh language, and neither does it demonstrate a true understanding of the fragile nature of those communities. It does not fully consider the effect housing developments would have on Welsh communities such as Llanbrynmair, Pontrobert, Pen-y-bont-fawr and Llanrhaeadr ym Mochnant - all communities that have seen a substantial reduction in the percentage of Welsh speakers in the 2011 Census.

3. There is no evidence of research and data collection on the Welsh language from the Welsh Language Commissioner or from the Language Initiatives of Montgomeryshire and Brecon & Radnor;

4. There is no analysis of the 2011 Census results in relation to the Welsh language. As noted: 2.10 "After collecting data, it will need to be analysed and consider to what extent, and how, use of land affects the Welsh language."

5. TAN 20 clearly states: 2.16 "In areas which have a plan where the Welsh language is an important aspect of the local communities, the planning authority should consider how each option with affect the Welsh language, when deciding which option to choose."

6. Despite this, they suggest building an estate of 22 houses on the Bryncoch site in Llanbrynmair along with housing estates in Pen-y-bont-fawr, Llanrhaeadr ym Mochnant and Pontrobert — all communities which have seen a substantial reduction in Welsh speakers in the 2011 Census.

Z Again, Tan 20 states: 2.22 "Size and occupancy of dwellings are factors which affect determining if a development has a positive or negative influence on the language" and yet again, housing development is planned for Llanbrynmair without:

- Any research or data collection of evidence of need in the area
- Considering the fact that the 2011 Census showed a 5% reduction in the number of Welsh speakers

D. LEARNING FROM EXPERIENCE

Community Council Area 1991 % (3+) 2001 % (3+) 2011 (3+)

IJanerfyl 73% 57% 56%

Banwy 60% 60% 56%

Glantwymyn 69% 58% 53%

Llanfihangel 70% 64% 53%

Machynlleth 60% 54% 52%

Pen-y-bont-fawr 69% 55% 50%

Llanbrynmair 69% 53% 48%

Llanrhaeadr-ym-Mochnant 64% 53% 43%

Llanwddyn 62% 60% 38%

Llangynog 64% 50% 37%

Carno 57% 45% 36%

LlanfairCaereinion 42% 38% 36%

One very sad element in all of this, and which is crystal clear, is the failure to learn from previous plans and the obvious negative effect that decisions made in the past have had on Welsh communities in Powys.

The above table clearly shows the change in the linguistic pattern of a number of communities in Powys over the last twenty years and undoubtedly the planning policies of the past have contributed to this. Be that due to a lack of understanding or lack of vision, it is essential that this new plan does not repeat the same mistakes.

For example, a social housing development took place in Dolfach near Llanbrynmair, and only one local person lives there. This highlights the lack of homework in regard to evidence of local need. In the same way, other estates in Llanbrynmair have been built over the last ten years, and the overwhelming majority of residents are not Welsh speakers. This is highlighted in the statistics from the last Census, which shows a decrease of 5% in the number of Welsh speakers. In the same way, the council gave permission to build 15 bungalows in Foel, in the Banwy Valley. Yet again, only one local person lives on the estate with none of the remaining residents able to speak Welsh. This has led to the creation of an English 'ghetto' on the outskirts of what was a Welsh speaking community.

Source: Email		Type: Objection		Mode	Written	Status Maintained

Also, 16 houses were built in Llangadfan, against the wishes of many, and yet again, only 4 local people live in these dwellings. A direct effect of this development is that is changing the linguistic pattern of the community, and undermining communities in Powys where the Welsh language used to be the language used on a daily basis.

As Emyr Lewis stated, in a recent paper on 'Planning and the Welsh language':  
 "The difficulties for the Welsh language are so much greater in places where it is only the majority language by a very small margin, or the language of a considerable minority. Here it is still used as a community language, but not the language of initial greetings. Development of large houses is speeding up its' demise as a community language, and efforts at integration are even more difficult".

And that is the exact situation for communities such as Llanbrynmair, Llangadfan, Pen-y-bont fawr etc. We only have to look at the 2011 census results and the percentages of Welsh speakers to be able to attribute the development of new housing estates in these communities to the decrease in the percentage of Welsh speakers.

Isn't it time that we opened our eyes, and lessons were learnt from this?

Bydd hefyd yn cael ei ystyried wrth lunio'r Canllawiau Cynllunio Atodol ar fesurau lliniaru priodol ar yr laith Gymraeg a Diwylliant. Mae'r CDU yn cynnwys meini prawf digonol ar fonitro er mwyn ystyried ac adolygu polisi'r Gymraeg a cheisiadau cynllunio cysylltiedig fel rhan o Adroddiadau Monitro Blynnyddol y CDU a phrosesau adolygu'r Cynllun a ddaw o dan ganllawiau cynllunio cenedlaethol. Having considered the representations received and further supporting evidence that has been prepared it is considered this level of housing provision remains appropriate to ensure the Local Development Plan (LDP) is capable of delivering the Strategy, its key socio-economic objectives and ensures maximum flexibility to respond to future economic growth. It is considered that any deviation from this housing supply provision would jeopardise the soundness of the plan in being able to meet these objectives. A significant amount of research and evidence gathering was undertaken during the preparation of the LDP to consider appropriate housing opportunities for the county and to address local housing need and housing distribution. The Council considers that the distribution of housing across the Settlement Hierarchy is based on a sound rationale which supports the delivery of the LDP strategy and the longer term viability of settlements considered capable of supporting sustainable growth. The Council propose to amend its policy approach to Welsh Language and Culture to better address issues raised in the representation and to ensure its policy approach is consistent with National Policy. The plan recognises the linguistic sensitivity of Welsh speaking communities and includes policy that seeks to mitigate against the impact of large housing developments within these areas. See Focused Changes for details. As part of the preparation of the LDP the Council did commission research to see the effect new housing developments have had on traditional Welsh Speaking Communities. This Welsh Language Impact Assessment forms part of the Sustainability Appraisal of the Plan and its findings supports the amended Welsh Language policy approach and will inform the preparation of Supplementary Planning Guidance on appropriate Welsh Language and Culture Mitigation Measures. The LDP includes sufficient monitoring criteria to enable consideration and review of Welsh Language policy and associated planning applications as part of LDP Annual Monitoring Reports and the Plan review processes provided under national planning guidance."

\* Credaf nad yw'r tystiolaeth fod angen 6,071 o dai yn gadarn, gan nad yw'r methodoleg yn ystyried yr angen lleol am dai. Dylid lleihau'r ffigur yn sylweddol.

\* Nid yw dosbarthiad y tai yn y cynllun yn addas gan nad yw wedi selio ar anghenion lleol. Mae angen casglu tystiolaeth o'r angen lleol am dai, ac ail-lunio'r dosbarthiad o dai rhwng ac o fewn cymunedau.

\* Bod y Cyngor yn comisiynu gwaith ymchwil i weld effaith datblygiadau tai newydd ar y cymunedau traddodiadol Cymraeg yn ystod y Cynllun Datblygu Lleol diwethaf.

\* O dderbyn sensitifrydd ieithyddol y cymunedau traddodiadol Cymraeg, bod y cynllun yn cyfyngu ar ddatblygiadau tai newydd yn yr ardaloedd hynny am ddegawd hyd fydd effaith newidiadau'r ddegawd flaenorol wedi setlo.

\* Bod y Cyngor yn derbyn yr egwyddor o angen lleol yn sail cyn caniatáu unrhyw ddatblygiadau yn yr ardaloedd hynny.

\* Bod y Cyngor yn rhoi system asesu annibynnol mewn lle ar gyfer unrhyw ddatblygiadau arfaethedig i weld yr effaith ar y Gymraeg.

Heb gymryd y camau uchod, credaf nad yw'r Cynllun Datblygu Lleol yn gadarn. Edrychaf ymlaen at dderbyn eich ymateb i fy mhryderon.

I should like you to note my comments as part of your consultation on Powys Local Development Plan. I welcome the target of a growth in the percentage of Welsh-speakers in the county, as well as the recognition of the importance of Welsh communities. But if you wish to realise these commendable objectives, then there is a need to make some basic changes to the plan, in particular:

I don't believe firm evidence exists that 6,071 houses are required, since the methodology does not consider the local housing need. The figure should be substantially reduced.

The distribution of the houses in the plan is not suitable since it is not based on local needs. Evidence needs to be collected of the local housing need, and the distribution needs to be changed between and within communities.

The council should commission research to see the effect the new housing developments have had on traditional Welsh--speaking communities during the period of the last Local Development Plan.

Given the linguistic sensitivity of the traditional Welsh-speaking communities, the plan

should limit new housing developments in those areas for a decade until the effects of the previous decade's changes of have settled.

The Council should accept the principle of local need as a basis before allowing any developments in those areas.

The Council has an independent assessment system in place for any proposed developments, to look at the effect on the Welsh language.  
Without the above measures, I don't believe that the Local Development Plan is sufficiently robust.

I look forward to receiving your response to my concerns.

Mae'r Cyngor yn bwriadu diwygio ei agwedd o ran polisi'r laith Gymraeg a Diwylliant er mwyn mynd i'r afael â materion a godwyd yn y sylwadau ac i sicrhau bod ei bolisi'n gyson â Pholisi Cenedlaethol. Mae'r cynllun yn cydnabod sensitifwydd ieithyddol cymunedau Cymraeg ac mae'n cynnwys polisi sy'n ceisio lliniaru effaith datblygiadau mawr yn yr ardaloedd hyn. Gweler Newidiadau â Ffocws am fanylion. Fel rhan o'r broses o lunio'r Cynllun Datblygu Lleol, comisiynodd y Cyngor ymchwil i weld yr effaith a gafodd datblygiadau mawr ar gymunedau Cymraeg traddodiadol. Mae'r Aseiad o'r Effaith ar yr laith Gymraeg yn rhan o Arfarniad o Gynaliadwydd y Cynllun ac mae ei ganfyddiadau'n ategu'r agwedd ddiwygiedig o ran polisi'r laith Gymraeg. Bydd hefyd yn cael ei ystyried wrth lunio'r Canllawiau Cynllunio Atodol ar fesurau lliniaru priodol ar yr laith Gymraeg a Diwylliant. Mae'r CDU yn cynnwys meini prawf digonol ar fonitro er mwyn ystyried ac adolygu polisi'r Gymraeg a cheisiadau cynllunio cysylltiedig fel rhan o Adroddiadau Monitro Blynyddol y CDU a phrosesu adolygu'r Cynllun a ddaw o dan ganllawiau cynllunio cenedlaethol. Having considered the representations received and further supporting evidence that has been prepared it is considered this level of housing provision remains appropriate to ensure the Local Development Plan (LDP) is capable of delivering the Strategy, its key socio-economic objectives and ensures maximum flexibility to respond to future economic growth. It is considered that any deviation from this housing supply provision would jeopardise the soundness of the plan in being able to meet these objectives. A significant amount of research and evidence gathering was undertaken during the preparation of the LDP to consider appropriate housing opportunities for the county and to address local housing need and housing distribution. The Council considers that the distribution of housing across the Settlement Hierarchy is based on a sound rationale which supports the delivery of the LDP strategy and the longer term viability of settlements considered capable of supporting sustainable growth. The Council propose to amend its policy approach to Welsh Language and Culture to better address issues raised in the representation and to ensure its policy approach is consistent with National Policy. The plan recognises the linguistic sensitivity of Welsh speaking communities and includes policy that seeks to mitigate against the impact of large housing developments within these areas. See Focused Changes for details. As part of the preparation of the LDP the Council did commission research to see the effect new housing developments have had on traditional Welsh Speaking Communities. This Welsh Language Impact Assessment forms part of the Sustainability Appraisal of the Plan and its findings supports the amended Welsh Language policy approach and will inform the preparation of Supplementary Planning Guidance on appropriate Welsh Language and Culture Mitigation Measures. The LDP includes sufficient monitoring criteria to enable consideration and review of Welsh Language policy and associated planning applications as part of LDP Annual Monitoring Reports and the Plan review processes provided under national planning guidance."

\* Credaf nad yw'r tystiolaeth fod angen 6,071 o dai yn gadarn, gan nad yw'r methodoleg yn ystyried yr angen lleol am dai. Dylid lleihau'r ffigur yn sylweddol.

\* Nid yw dosbarthiad y tai yn y cynllun yn addas gan nad yw wedi selio ar anghenion lleol. Mae angen casglu tystiolaeth o'r angen lleol am dai, ac ail-lunio'r dosbarthiad o dai rhwng ac o fewn cymunedau.

\* Bod y Cyngor yn comisiynu gwaith ymchwil i weld effaith datblygiadau tai newydd ar y cymunedau traddodiadol Cymraeg yn ystod y Cynllun Datblygu Lleol diwethaf.

\* O dderbyn sensitifrydd ieithyddol y cymunedau traddodiadol Cymraeg, bod y cynllun yn cyfyngu ar ddatblygiadau tai newydd yn yr ardaloedd hynny am ddegawd hyd fydd effaith newidiadau'r ddegawd flaenorol wedi setlo.

\* Bod y Cyngor yn derbyn yr egwyddor o angen lleol yn sail cyn caniatáu unrhyw ddatblygiadau yn yr ardaloedd hynny.

\* Bod y Cyngor yn rhoi system asesu annibynnol mewn lle ar gyfer unrhyw ddatblygiadau arfaethedig i weld yr effaith ar y Gymraeg.

Heb gymryd y camau uchod, credaf nad yw'r Cynllun Datblygu Lleol yn gadarn. Edrychaf ymlaen at dderbyn eich ymateb i fy mhryderon.

I should like you to note my comments as part of your consultation on Powys Local Development Plan. I welcome the target of a growth in the percentage of Welsh-speakers in the county, as well as the recognition of the importance of Welsh communities. But if you wish to realise these commendable objectives, then there is a need to make some basic changes to the plan, in particular:

I don't believe firm evidence exists that 6,071 houses are required, since the methodology does not consider the local housing need. The figure should be substantially reduced.

The distribution of the houses in the plan is not suitable since it is not based on local needs. Evidence needs to be collected of the local housing need, and the distribution needs to be changed between and within communities.

The council should commission research to see the effect the new housing developments have had on traditional Welsh--speaking communities during the period of the last Local Development Plan.

Given the linguistic sensitivity of the traditional Welsh-speaking communities, the plan

should limit new housing developments in those areas for a decade until the effects of the previous decade's changes of have settled.

The Council should accept the principle of local need as a basis before allowing any developments in those areas.

The Council has an independent assessment system in place for any proposed developments, to look at the effect on the Welsh language.  
Without the above measures, I don't believe that the Local Development Plan is sufficiently robust.

I look forward to receiving your response to my concerns.

Question Representation Texts

**Question: Council Response**

Representation Texts: "Ar ôl ystyried y sylwadau a dderbyniwyd a thystiolaeth ategol bellach a luniwyd, ystyrir bod y lefel hwn o ddarpariaeth tai'n parhau i fod yn briodol er mwyn sicrhau bod y Cynllun Datblygu Lleol yn gallu cyflwyno'r strategaeth, ei amcanion economaidd-gymdeithasol allweddol a'r hyblygrwydd eithaf i ymateb i dwf economaidd yn y dyfodol. Rydym yn ystyried y byddai gwro o'r ddarpariaeth tai hwn yn peryglu cadernid y cynllun wrth ddiwallu'r amcanion hyn. Cynhaliwyd ymchwil a chasglwyd tystiolaeth sylweddol wrth baratoi'r CDLI er mwyn ystyried cyfleoedd priodol am dai i'r sir ac i fynd i'r afael ag angen lleol am dai a dosbarthiad tai. Mae'r cyngor o'r farn bod dosbarthiad y tai ar draws yr Hierarchaeth Aneddiadau wedi'i seilio ar sail resymegol gadarn sy'n ategu'r broses o gyflwyno strategaeth y CDLI a hyfywedd tymor hir yr aneddiadau sy'n gallu cynnal twf cynaliadwy. Mae'r Cyngor yn bwriadu diwygio ei agwedd o ran polisi'r laith Gymraeg a Diwylliant er mwyn mynd i'r afael â materion a godwyd yn y sylwadau ac i sicrhau bod ei bolisi'n gyson â Pholisi Cenedlaethol. Mae'r cynllun yn cydnabod sensitifwydd ieithyddol cymunedau Cymraeg ac mae'n cynnwys polisi sy'n ceisio lliniaru effaith datblygiadau mawr yn yr ardaloedd hyn. Gweler Newidiadau â Ffocws am fanylion. Fel rhan o'r broses o lunio'r Cynllun Datblygu Lleol, comisiynodd y Cyngor ymchwil i weld yr effaith a gafodd datblygiadau mawr ar gymunedau Cymraeg traddodiadol. Mae'r Aseiad o'r Effaith ar yr laith Gymraeg yn rhan o Arfarniad o Gynaliadwydd y Cynllun ac mae ei ganfyddiadau'n ategu'r agwedd ddiwygiedig o ran polisi'r laith Gymraeg. Bydd hefyd yn cael ei ystyried wrth lunio'r Canllawiau Cynllunio Atodol ar fesurau lliniaru priodol ar yr laith Gymraeg a Diwylliant. Mae'r CDU yn cynnwys meini prawf digonol ar fonitro er mwyn ystyried ac adolygu polisi'r Gymraeg a cheisiadau cynllunio cysylltiedig fel rhan o Adroddiadau Monitro Blynyddol y CDU a phrosesu adolygu'r Cynllun a ddaw o dan ganllawiau cynllunio cenedlaethol. Having considered the representations received and further supporting evidence that has been prepared it is considered this level of housing provision remains appropriate to ensure the Local Development Plan (LDP) is capable of delivering the Strategy, its key socio-economic objectives and ensures maximum flexibility to respond to future economic growth. It is considered that any deviation from this housing supply provision would jeopardise the soundness of the plan in being able to meet these objectives. A significant amount of research and evidence gathering was undertaken during the preparation of the LDP to consider appropriate housing opportunities for the county and to address local housing need and housing distribution. The Council considers that the distribution of housing across the Settlement Hierarchy is based on a sound rationale which supports the delivery of the LDP strategy and the longer term viability of settlements considered capable of supporting sustainable growth. The Council propose to amend its policy approach to Welsh Language and Culture to better address issues raised in the representation and to ensure its policy approach is consistent with National Policy. The plan recognises the linguistic sensitivity of Welsh speaking communities and includes policy that seeks to mitigate against the impact of large housing developments within these areas. See Focused Changes for details. As part of the preparation of the LDP the Council did commission research to see the effect new housing developments have had on traditional Welsh Speaking Communities. This Welsh Language Impact Assessment forms part of the Sustainability Appraisal of the Plan and its findings supports the amended Welsh Language policy approach and will inform the preparation of Supplementary Planning Guidance on appropriate Welsh Language and Culture Mitigation Measures. The LDP includes sufficient monitoring criteria to enable consideration and review of Welsh Language policy and associated planning applications as part of LDP Annual Monitoring Reports and the Plan review processes provided under national planning guidance."

\* Credaf nad yw'r tystiolaeth fod angen 6,071 o dai yn gadarn, gan nad yw'r methodoleg yn ystyried yr angen lleol am dai. Dylid lleihau'r ffigur yn sylweddol.

\* Nid yw dosbarthiad y tai yn y cynllun yn addas gan nad yw wedi selio ar anghenion lleol. Mae angen casglu tystiolaeth o'r angen lleol am dai, ac ail-lunio'r dosbarthiad o dai rhwng ac o fewn cymunedau.

\* Bod y Cyngor yn comisiynu gwaith ymchwil i weld effaith datblygiadau tai newydd ar y cymunedau traddodiadol Cymraeg yn ystod y Cynllun Datblygu Lleol diwethaf.

\* O dderbyn sensitifrydd ieithyddol y cymunedau traddodiadol Cymraeg, bod y cynllun yn cyfyngu ar ddatblygiadau tai newydd yn yr ardaloedd hynny am ddegawd hyd fydd effaith newidiadau'r ddegawd flaenorol wedi setlo.

\* Bod y Cyngor yn derbyn yr egwyddor o angen lleol yn sail cyn caniatáu unrhyw ddatblygiadau yn yr ardaloedd hynny.

\* Bod y Cyngor yn rhoi system asesu annibynnol mewn lle ar gyfer unrhyw ddatblygiadau arfaethedig i weld yr effaith ar y Gymraeg.

Heb gymryd y camau uchod, credaf nad yw'r Cynllun Datblygu Lleol yn gadarn. Edrychaf ymlaen at dderbyn eich ymateb i fy mhryderon.

I should like you to note my comments as part of your consultation on Powys Local Development Plan. I welcome the target of a growth in the percentage of Welsh-speakers in the county, as well as the recognition of the importance of Welsh communities. But if you wish to realise these commendable objectives, then there is a need to make some basic changes to the plan, in particular:

I don't believe firm evidence exists that 6,071 houses are required, since the methodology does not consider the local housing need. The figure should be substantially reduced.

The distribution of the houses in the plan is not suitable since it is not based on local needs. Evidence needs to be collected of the local housing need, and the distribution needs to be changed between and within communities.

The council should commission research to see the effect the new housing developments have had on traditional Welsh--speaking communities during the period of the last Local Development Plan.

Given the linguistic sensitivity of the traditional Welsh-speaking communities, the plan

should limit new housing developments in those areas for a decade until the effects of the previous decade's changes of have settled.

The Council should accept the principle of local need as a basis before allowing any developments in those areas.

The Council has an independent assessment system in place for any proposed developments, to look at the effect on the Welsh language.  
Without the above measures, I don't believe that the Local Development Plan is sufficiently robust.

I look forward to receiving your response to my concerns.

*Question* *Representation Texts***Question: Council Response**

Representation Texts: "Ar ôl ystyried y sylwadau a dderbyniwyd a thystiolaeth ategol bellach a luniwyd, ystyrir bod y lefel hwn o ddarpariaeth tai'n parhau i fod yn briodol er mwyn sicrhau bod y Cynllun Datblygu Lleol yn gallu cyflwyno'r strategaeth, ei amcanion economaidd-gymdeithasol allweddol a'r hyblygrwydd eithaf i ymateb i dwf economaidd yn y dyfodol. Rydym yn ystyried y byddai gwro o'r ddarpariaeth tai hwn yn peryglu cadernid y cynllun wrth ddiwallu'r amcanion hyn. Cynhaliwyd ymchwil a chasglwyd tystiolaeth sylweddol wrth barato'r CDLI er mwyn ystyried cyfleoedd priodol am dai i'r sir ac i fynd i'r afael ag angen lleol am dai a dosbarthiad tai. Mae'r cyngor o'r farn bod dosbarthiad y tai ar draws yr Hierarchaeth Aneddiadau wedi'i seilio ar sail resymegol gadarn sy'n ategu'r broses o gyflwyno strategaeth y CDLI a hyfywedd tymor hir yr aneddiadau sy'n gallu cynnal twf cynaliadwy. Mae'r Cyngor yn bwriadu diwygio ei agwedd o ran polisi'r laith Gymraeg a Diwylliant er mwyn mynd i'r afael â materion a godwyd yn y sylwadau ac i sicrhau bod ei bolisi'n gyson â Pholisi Cenedlaethol. Mae'r cynllun yn cydnabod sensitifwydd ieithyddol cymunedau Cymraeg ac mae'n cynnwys polisi sy'n ceisio lliniaru effaith datblygiadau mawr yn yr ardaloedd hyn. Gweler Newidiadau â Ffocws am fanylion. Fel rhan o'r broses o lunio'r Cynllun Datblygu Lleol, comisiynodd y Cyngor ymchwil i weld yr effaith a gafodd datblygiadau mawr ar gymunedau Cymraeg traddodiadol. Mae'r Aseiad o'r Effaith ar yr laith Gymraeg yn rhan o Arfarniad o Gynaliadwydd y Cynllun ac mae ei ganfyddiadau'n ategu'r agwedd ddiwygiedig o ran polisi'r laith Gymraeg. Bydd hefyd yn cael ei ystyried wrth lunio'r Canllawiau Cynllunio Atodol ar fesurau lliniaru priodol ar yr laith Gymraeg a Diwylliant. Mae'r CDU yn cynnwys meini prawf digonol ar fonitro er mwyn ystyried ac adolygu polisi'r Gymraeg a cheisiadau cynllunio cysylltiedig fel rhan o Adroddiadau Monitro Blynnyddol y CDU a phrosesu adolygu'r Cynllun a ddaw o dan ganllawiau cynllunio cenedlaethol. Having considered the representations received and further supporting evidence that has been prepared it is considered this level of housing provision remains appropriate to ensure the Local Development Plan (LDP) is capable of delivering the Strategy, its key socio-economic objectives and ensures maximum flexibility to respond to future economic growth. It is considered that any deviation from this housing supply provision would jeopardise the soundness of the plan in being able to meet these objectives. A significant amount of research and evidence gathering was undertaken during the preparation of the LDP to consider appropriate housing opportunities for the county and to address local housing need and housing distribution. The Council considers that the distribution of housing across the Settlement Hierarchy is based on a sound rationale which supports the delivery of the LDP strategy and the longer term viability of settlements considered capable of supporting sustainable growth. The Council propose to amend its policy approach to Welsh Language and Culture to better address issues raised in the representation and to ensure its policy approach is consistent with National Policy. The plan recognises the linguistic sensitivity of Welsh speaking communities and includes policy that seeks to mitigate against the impact of large housing developments within these areas. See Focused Changes for details. As part of the preparation of the LDP the Council did commission research to see the effect new housing developments have had on traditional Welsh Speaking Communities. \* Nid yw dosbarthiad y tai yn y cynllun yn addas gan nad yw wedi selio ar anghenion lleol. Mae angen casglu tystiolaeth o'r angen lleol am dai, ac ail-lunio'r dosbarthiad o dai rhwng ac o fewn cymunedau.

\* Bod y Cyngor yn comisiynu gwaith ymchwil i weld effaith datblygiadau tai newydd ar y cymunedau traddodiadol Cymraeg yn ystod y Cynllun Datblygu Lleol diwethaf.

\* O dderbyn sensitifrydd ieithyddol y cymunedau traddodiadol Cymraeg, bod y cynllun yn cyfyngu ar ddatblygiadau tai newydd yn yr ardaloedd hynny am ddegawd hyd fydd effaith newidiadau'r ddegawd flaenorol wedi setlo.

\* Bod y Cyngor yn derbyn yr egwyddor o angen lleol yn sail cyn caniatáu unrhyw ddatblygiadau yn yr ardaloedd hynny.

\* Bod y Cyngor yn rhoi system asesu annibynnol mewn lle ar gyfer unrhyw ddatblygiadau arfaethedig i weld yr effaith ar y Gymraeg.

Heb gymryd y camau uchod, credaf nad yw'r Cynllun Datblygu Lleol yn gadarn. Edrychaf ymlaen at dderbyn eich ymateb i fy mhryderon.

I should like you to note my comments as part of your consultation on Powys Local Development Plan. I welcome the target of a growth in the percentage of Welsh-speakers in the county, as well as the recognition of the importance of Welsh communities. But if you wish to realise these commendable objectives, then there is a need to make some basic changes to the plan, in particular:

I don't believe firm evidence exists that 6,071 houses are required, since the methodology does not consider the local housing need. The figure should be substantially reduced.

The distribution of the houses in the plan is not suitable since it is not based on local needs. Evidence needs to be collected of the local housing need, and the distribution needs to be changed between and within communities.

The council should commission research to see the effect the new housing developments have had on traditional Welsh--speaking communities during the period of the last Local Development Plan.

Given the linguistic sensitivity of the traditional Welsh-speaking communities, the plan

should limit new housing developments in those areas for a decade until the effects of the previous decade's changes of have settled.

The Council should accept the principle of local need as a basis before allowing any developments in those areas.

The Council has an independent assessment system in place for any proposed developments, to look at the effect on the Welsh language.  
Without the above measures, I don't believe that the Local Development Plan is sufficiently robust.

I look forward to receiving your response to my concerns.

*Question* *Representation Texts***Question: Council Response**

Representation Texts: "Ar ôl ystyried y sylwadau a dderbyniwyd a thystiolaeth ategol bellach a luniwyd, ystyrir bod y lefel hwn o ddarpariaeth tai'n parhau i fod yn briodol er mwyn sicrhau bod y Cynllun Datblygu Lleol yn gallu cyflwyno'r strategaeth, ei amcanion economaidd-gymdeithasol allweddol a'r hyblygrwydd eithaf i ymateb i dwf economaidd yn y dyfodol. Rydym yn ystyried y byddai gwro o'r ddarpariaeth tai hwn yn peryglu cadernid y cynllun wrth ddiwallu'r amcanion hyn. Cynhaliwyd ymchwil a chasglwyd tystiolaeth sylweddol wrth barato'r CDLI er mwyn ystyried cyfleoedd priodol am dai i'r sir ac i fynd i'r afael ag angen lleol am dai a dosbarthiad tai. Mae'r cyngor o'r farn bod dosbarthiad y tai ar draws yr Hierarchaeth Aneddiadau wedi'i seilio ar sail resymegol gadarn sy'n ategu'r broses o gyflwyno strategaeth y CDLI a hyfywedd tymor hir yr aneddiadau sy'n gallu cynnal twf cynaliadwy. Mae'r Cyngor yn bwriadu diwygio ei agwedd o ran polisi'r laith Gymraeg a Diwylliant er mwyn mynd i'r afael â materion a godwyd yn y sylwadau ac i sicrhau bod ei bolisi'n gyson â Pholisi Cenedlaethol. Mae'r cynllun yn cydnabod sensitifwydd ieithyddol cymunedau Cymraeg ac mae'n cynnwys polisi sy'n ceisio lliniaru effaith datblygiadau mawr yn yr ardaloedd hyn. Gweler Newidiadau â Ffocws am fanylion. Fel rhan o'r broses o lunio'r Cynllun Datblygu Lleol, comisiynodd y Cyngor ymchwil i weld yr effaith a gafodd datblygiadau mawr ar gymunedau Cymraeg traddodiadol. Mae'r Aseiad o'r Effaith ar yr laith Gymraeg yn rhan o Arfarniad o Gynaliadwyedd y Cynllun ac mae ei ganfyddiadau'n ategu'r agwedd ddiwygiedig o ran polisi'r laith Gymraeg. Bydd hefyd yn cael ei ystyried wrth lunio'r Canllawiau Cynllunio Atodol ar fesurau lliniaru priodol ar yr laith Gymraeg a Diwylliant. Mae'r CDU yn cynnwys meini prawf digonol ar fonitro er mwyn ystyried ac adolygu polisi'r Gymraeg a cheisiadau cynllunio cysylltiedig fel rhan o Adroddiadau Monitro Blynyddol y CDU a phrosesu adolygu'r Cynllun a ddaw o dan ganllawiau cynllunio cenedlaethol. Having considered the representations received and further supporting evidence that has been prepared it is considered this level of housing provision remains appropriate to ensure the Local Development Plan (LDP) is capable of delivering the Strategy, its key socio-economic objectives and ensures maximum flexibility to respond to future economic growth. It is considered that any deviation from this housing supply provision would jeopardise the soundness of the plan in being able to meet these objectives. A significant amount of research and evidence gathering was undertaken during the preparation of the LDP to consider appropriate housing opportunities for the county and to address local housing need and housing distribution. The Council considers that the distribution of housing across the Settlement Hierarchy is based on a sound rationale which supports the delivery of the LDP strategy and the longer term viability of settlements considered capable of supporting sustainable growth. The Council propose to amend its policy approach to Welsh Language and Culture to better address issues raised in the representation and to ensure its policy approach is consistent with National Policy. The plan recognises the linguistic sensitivity of Welsh speaking communities and includes policy that seeks to mitigate against the impact of large housing developments within these areas. See Focused Changes for details. As part of the preparation of the LDP the Council did commission research to see the effect new housing developments have had on traditional Welsh Speaking Communities. This Welsh Language Impact Assessment forms part of the Sustainability Appraisal of the Plan and its findings supports the amended Welsh Language policy approach and will inform the preparation of Supplementary Planning Guidance on appropriate Welsh Language and Culture Mitigation Measures. The LDP includes sufficient monitoring criteria to enable consideration and review of Welsh Language policy and associated planning applications as part of LDP Annual Monitoring Reports and the Plan review processes provided under national planning guidance."

should limit new housing developments in those areas for a decade until the effects of the previous decade's changes of have settled.

The Council should accept the principle of local need as a basis before allowing any developments in those areas.

The Council has an independent assessment system in place for any proposed developments, to look at the effect on the Welsh language. Without the above measures, I don't believe that the Local Development Plan is sufficiently robust.

I look forward to receiving your response to my concerns.

*Question* *Representation Texts***Question: Council Response**

Representation Texts: "Ar ôl ystyried y sylwadau a dderbyniwyd a thystiolaeth ategol bellach a luniwyd, ystyrir bod y lefel hwn o ddarpariaeth tai'n parhau i fod yn briodol er mwyn sicrhau bod y Cynllun Datblygu Lleol yn gallu cyflwyno'r strategaeth, ei amcanion economaidd-gymdeithasol allweddol a'r hyblygrwydd eithaf i ymateb i dwf economaidd yn y dyfodol. Rydym yn ystyried y byddai gwro o'r ddarpariaeth tai hwn yn peryglu cadernid y cynllun wrth ddiwallu'r amcanion hyn. Cynhaliwyd ymchwil a chasglwyd tystiolaeth sylweddol wrth baratoir CDLI er mwyn ystyried cyfleoedd priodol am dai i'r sir ac i fynd i'r afael ag angen lleol am dai a dosbarthiad tai. Mae'r cyngor o'r farn bod dosbarthiad y tai ar draws yr Hierarchaeth Aneddiadau wedi'i seilio ar sail resymegol gadarn sy'n ategu'r broses o gyflwyno strategaeth y CDLI a hyfywedd tymor hir yr aneddiadau sy'n gallu cynnal twf cynaliadwy. Mae'r Cyngor yn bwriadu diwygio ei agwedd o ran polisi'r laith Gymraeg a Diwylliant er mwyn mynd i'r afael â materion a godwyd yn y sylwadau ac i sicrhau bod ei bolisi'n gyson â Pholisi Cenedlaethol. Mae'r cynllun yn cydnabod sensitifwydd ieithyddol cymunedau Cymraeg ac mae'n cynnwys polisi sy'n ceisio lliniaru effaith datblygiadau mawr yn yr ardaloedd hyn. Gweler Newidiadau â Ffocws am fanylion. Fel rhan o'r broses o lunio'r Cynllun Datblygu Lleol, comisiynodd y Cyngor ymchwil i weld yr effaith a gafodd datblygiadau mawr ar gymunedau Cymraeg traddodiadol. Mae'r Aseiad o'r Effaith ar yr laith Gymraeg yn rhan o Arfarniad o Gynaliadwydd y Cynllun ac mae ei ganfyddiadau'n ategu'r agwedd ddiwygiedig o ran polisi'r laith Gymraeg. Bydd hefyd yn cael ei ystyried wrth lunio'r Canllawiau Cynllunio Atodol ar fesurau lliniaru priodol ar yr laith Gymraeg a Diwylliant. Mae'r CDU yn cynnwys meini prawf digonol ar fonitro er mwyn ystyried ac adolygu polisi'r Gymraeg a cheisiadau cynllunio cysylltiedig fel rhan o Adroddiadau Monitro Blynnyddol y CDU a phrosesau adolygu'r Cynllun a ddaw o dan ganllawiau cynllunio cenedlaethol. Having considered the representations received and further supporting evidence that has been prepared it is considered this level of housing provision remains appropriate to ensure the Local Development Plan (LDP) is capable of delivering the Strategy, its key socio-economic objectives and ensures maximum flexibility to respond to future economic growth. It is considered that any deviation from this housing supply provision would jeopardise the soundness of the plan in being able to meet these objectives. A significant amount of research and evidence gathering was undertaken during the preparation of the LDP to consider appropriate housing opportunities for the county and to address local housing need and housing distribution. The Council considers that the distribution of housing across the Settlement Hierarchy is based on a sound rationale which supports the delivery of the LDP strategy and the longer term viability of settlements considered capable of supporting sustainable growth. The Council propose to amend its policy approach to Welsh Language and Culture to better address issues raised in the representation and to ensure its policy approach is consistent with National Policy. The plan recognises the linguistic sensitivity of Welsh speaking communities and includes policy that seeks to mitigate against the impact of large housing developments within these areas. See Focused Changes for details. As part of the preparation of the LDP the Council did commission research to see the effect new housing developments have had on traditional Welsh Speaking Communities. This Welsh Language Impact Assessment forms part of the Sustainability Appraisal of the Plan and its findings supports the amended Welsh Language policy approach and will inform the preparation of Supplementary Planning Guidance on appropriate Welsh Language and Culture Mitigation Measures. The LDP includes sufficient monitoring criteria to enable consideration and review of Welsh Language policy and associated planning applications as part of LDP Annual Monitoring Reports and the Plan review processes provided under national planning guidance."

\* Credaf nad yw'r tystiolaeth fod angen 6,071 o dai yn gadarn, gan nad yw'r methodoleg yn ystyried yr angen lleol am dai. Dylid lleihau'r ffigur yn sylweddol.

\* Nid yw dosbarthiad y tai yn y cynllun yn addas gan nad yw wedi selio ar anghenion lleol. Mae angen casglu tystiolaeth o'r angen lleol am dai, ac ail-lunio'r dosbarthiad o dai rhwng ac o fewn cymunedau.

\* Bod y Cyngor yn comisiynu gwaith ymchwil i weld effaith datblygiadau tai newydd ar y cymunedau traddodiadol Cymraeg yn ystod y Cynllun Datblygu Lleol diwethaf.

\* O dderbyn sensitifrydd ieithyddol y cymunedau traddodiadol Cymraeg, bod y cynllun yn cyfyngu ar ddatblygiadau tai newydd yn yr ardaloedd hynny am ddegawd hyd fydd effaith newidiadau'r ddegawd flaenorol wedi setlo.

\* Bod y Cyngor yn derbyn yr egwyddor o angen lleol yn sail cyn caniatáu unrhyw ddatblygiadau yn yr ardaloedd hynny.

\* Bod y Cyngor yn rhoi system asesu annibynnol mewn lle ar gyfer unrhyw ddatblygiadau arfaethedig i weld yr effaith ar y Gymraeg.

Heb gymryd y camau uchod, credaf nad yw'r Cynllun Datblygu Lleol yn gadarn. Edrychaf ymlaen at dderbyn eich ymateb i fy mhryderon.

I should like you to note my comments as part of your consultation on Powys Local Development Plan. I welcome the target of a growth in the percentage of Welsh-speakers in the county, as well as the recognition of the importance of Welsh communities. But if you wish to realise these commendable objectives, then there is a need to make some basic changes to the plan, in particular:

I don't believe firm evidence exists that 6,071 houses are required, since the methodology does not consider the local housing need. The figure should be substantially reduced.

The distribution of the houses in the plan is not suitable since it is not based on local needs. Evidence needs to be collected of the local housing need, and the distribution needs to be changed between and within communities.

The council should commission research to see the effect the new housing developments have had on traditional Welsh--speaking communities during the period of the last Local Development Plan.

Given the linguistic sensitivity of the traditional Welsh-speaking communities, the plan

Representation Texts: "Ar ôl ystyried y sylwadau a dderbyniwyd a thystiolaeth ategol bellach a luniwyd, ystyrir bod y lefel hwn o ddarpariaeth tai'n parhau i fod yn briodol er mwyn sicrhau bod y Cynllun Datblygu Lleol yn gallu cyflwyno'r strategaeth, ei amcanion economaidd-gymdeithasol allweddol a'r hyblygrwydd eithaf i ymateb i dwf economaidd yn y dyfodol. Rydym yn ystyried y byddai gwro o'r ddarpariaeth tai hwn yn peryglu cadernid y cynllun wrth ddiwallu'r amcanion hyn. Cynhaliwyd ymchwil a chasglwyd tystiolaeth sylweddol wrth baratoi'r CDLI er mwyn ystyried cyfleoedd priodol am dai i'r sir ac i fynd i'r afael ag angen lleol am dai a dosbarthiad tai. Mae'r cyngor o'r farn bod dosbarthiad y tai ar draws yr Hierarchaeth Aneddiadau wedi'i seilio ar sail resymegol gadarn sy'n ategu'r broses o gyflwyno strategaeth y CDLI a hyfywedd tymor hir yr aneddiadau sy'n gallu cynnal twf cynaliadwy. Mae'r Cyngor yn bwriadu diwygio ei agwedd o ran polisi'r laith Gymraeg a Diwylliant er mwyn mynd i'r afael â materion a godwyd yn y sylwadau ac i sicrhau bod ei bolisi'n gyson â Pholisi Cenedlaethol. Mae'r cynllun yn cydnabod sensitifwydd ieithyddol cymunedau Cymraeg ac mae'n cynnwys polisi sy'n ceisio lliniaru effaith datblygiadau mawr yn yr ardaloedd hyn. Gweler Newidiadau â Ffocws am fanylion. Fel rhan o'r broses o lunio'r Cynllun Datblygu Lleol, comisiynodd y Cyngor ymchwil i weld yr effaith a gafodd datblygiadau mawr ar gymunedau Cymraeg traddodiadol. Mae'r Aseiad o'r Effaith ar yr laith Gymraeg yn rhan o Arfarniad o Gynaliadwydd y Cynllun ac mae ei ganfyddiadau'n ategu'r agwedd ddiwygiedig o ran polisi'r laith Gymraeg. Bydd hefyd yn cael ei ystyried wrth lunio'r Canllawiau Cynllunio Atodol ar fesurau lliniaru priodol ar yr laith Gymraeg a Diwylliant. Mae'r CDU yn cynnwys meini prawf digonol ar fonitro er mwyn ystyried ac adolygu polisi'r Gymraeg a cheisiadau cynllunio cysylltiedig fel rhan o Adroddiadau Monitro Blynyddol y CDU a phrosesau adolygu'r Cynllun a ddaw o dan ganllawiau cynllunio cenedlaethol. Having considered the representations received and further supporting evidence that has been prepared it is considered this level of housing provision remains appropriate to ensure the Local Development Plan (LDP) is capable of delivering the Strategy, its key socio-economic objectives and ensures maximum flexibility to respond to future economic growth. It is considered that any deviation from this housing supply provision would jeopardise the soundness of the plan in being able to meet these objectives. A significant amount of research and evidence gathering was undertaken during the preparation of the LDP to consider appropriate housing opportunities for the county and to address local housing need and housing distribution. The Council considers that the distribution of housing across the Settlement Hierarchy is based on a sound rationale which supports the delivery of the LDP strategy and the longer term viability of settlements considered capable of supporting sustainable growth. The Council propose to amend its policy approach to Welsh Language and Culture to better address issues raised in the representation and to ensure its policy approach is consistent with National Policy. The plan recognises the linguistic sensitivity of Welsh speaking communities and includes policy that seeks to mitigate against the impact of large housing developments within these areas. See Focused Changes for details. As part of the preparation of the LDP the Council did commission research to see the effect new housing developments have had on traditional Welsh Speaking Communities. This Welsh Language Impact Assessment forms part of the Sustainability Appraisal of the Plan and its findings supports the amended Welsh Language policy approach and will inform the preparation of Supplementary Planning Guidance on appropriate Welsh Language and Culture Mitigation Measures. The LDP includes sufficient monitoring criteria to enable consideration and review of Welsh Language policy and associated planning applications as part of LDP Annual Monitoring Reports and the Plan review processes provided under national planning guidance."

\* Credaf nad yw'r tystiolaeth fod angen 6,071 o dai yn gadarn, gan nad yw'r methodoleg yn ystyried yr angen lleol am dai. Dylid lleihau'r ffigur yn sylweddol.

\* Nid yw dosbarthiad y tai yn y cynllun yn addas gan nad yw wedi selio ar anghenion lleol. Mae angen casglu tystiolaeth o'r angen lleol am dai, ac ail-lunio'r dosbarthiad o dai rhwng ac o fewn cymunedau.

\* Bod y Cyngor yn comisiynu gwaith ymchwil i weld effaith datblygiadau tai newydd ar y cymunedau traddodiadol Cymraeg yn ystod y Cynllun Datblygu Lleol diwethaf.

\* O dderbyn sensitifwydd ieithyddol y cymunedau traddodiadol Cymraeg, bod y cynllun yn cyfyngu ar ddatblygiadau tai newydd yn yr ardaloedd hynny am ddegawd hyd fydd effaith newidiadau'r ddegawd flaenorol wedi setlo.

\* Bod y Cyngor yn derbyn yr egwyddor o angen lleol yn sail cyn caniatáu unrhyw ddatblygiadau yn yr ardaloedd hynny.

\* Bod y Cyngor yn rhoi system asesu annibynnol mewn lle ar gyfer unrhyw ddatblygiadau arfaethedig i weld yr effaith ar y Gymraeg.

Heb gymryd y camau uchod, credaf nad yw'r Cynllun Datblygu Lleol yn gadarn. Edrychaf ymlaen at dderbyn eich ymateb i fy mhryderon.

I should like you to note my comments as part of your consultation on Powys Local Development Plan. I welcome the target of a growth in the percentage of Welsh-speakers in the county, as well as the recognition of the importance of Welsh communities. But if you wish to realise these commendable objectives, then there is a need to make some basic changes to the plan, in particular:

I don't believe firm evidence exists that 6,071 houses are required, since the methodology does not consider the local housing need. The figure should be substantially reduced.

The distribution of the houses in the plan is not suitable since it is not based on local needs. Evidence needs to be collected of the local housing need, and the distribution needs to be changed between and within communities.

The council should commission research to see the effect the new housing developments have had on traditional Welsh--speaking communities during the period of the last Local Development Plan.

Given the linguistic sensitivity of the traditional Welsh-speaking communities, the plan

should limit new housing developments in those areas for a decade until the effects of the previous decade's changes of have settled.

The Council should accept the principle of local need as a basis before allowing any developments in those areas.

The Council has an independent assessment system in place for any proposed developments, to look at the effect on the Welsh language.  
Without the above measures, I don't believe that the Local Development Plan is sufficiently robust.

I look forward to receiving your response to my concerns.

Bydd hefyd yn cael ei ystyried wrth lunio'r Canllawiau Cynllunio Atodol ar fesurau lliniaru priodol ar yr laith Gymraeg a Diwylliant. Mae'r CDU yn cynnwys meini prawf digonol ar fonitro er mwyn ystyried ac adolygu polisi'r Gymraeg a cheisiadau cynllunio cysylltiedig fel rhan o Adroddiadau Monitro Blynnyddol y CDU a phrosesau adolygu'r Cynllun a ddaw o dan ganllawiau cynllunio cenedlaethol. Having considered the representations received and further supporting evidence that has been prepared it is considered this level of housing provision remains appropriate to ensure the Local Development Plan (LDP) is capable of delivering the Strategy, its key socio-economic objectives and ensures maximum flexibility to respond to future economic growth. It is considered that any deviation from this housing supply provision would jeopardise the soundness of the plan in being able to meet these objectives. A significant amount of research and evidence gathering was undertaken during the preparation of the LDP to consider appropriate housing opportunities for the county and to address local housing need and housing distribution. The Council considers that the distribution of housing across the Settlement Hierarchy is based on a sound rationale which supports the delivery of the LDP strategy and the longer term viability of settlements considered capable of supporting sustainable growth. The Council propose to amend its policy approach to Welsh Language and Culture to better address issues raised in the representation and to ensure its policy approach is consistent with National Policy. The plan recognises the linguistic sensitivity of Welsh speaking communities and includes policy that seeks to mitigate against the impact of large housing developments within these areas. See Focused Changes for details. As part of the preparation of the LDP the Council did commission research to see the effect new housing developments have had on traditional Welsh Speaking Communities. This Welsh Language Impact Assessment forms part of the Sustainability Appraisal of the Plan and its findings supports the amended Welsh Language policy approach and will inform the preparation of Supplementary Planning Guidance on appropriate Welsh Language and Culture Mitigation Measures. The LDP includes sufficient monitoring criteria to enable consideration and review of Welsh Language policy and associated planning applications as part of LDP Annual Monitoring Reports and the Plan review processes provided under national planning guidance."

\* Credaf nad yw'r tystiolaeth fod angen 6,071 o dai yn gadarn, gan nad yw'r methodoleg yn ystyried yr angen lleol am dai. Dylid lleihau'r ffigur yn sylweddol.

\* Nid yw dosbarthiad y tai yn y cynllun yn addas gan nad yw wedi selio ar anghenion lleol. Mae angen casglu tystiolaeth o'r angen lleol am dai, ac ail-lunio'r dosbarthiad o dai rhwng ac o fewn cymunedau.

\* Bod y Cyngor yn comisiynu gwaith ymchwil i weld effaith datblygiadau tai newydd ar y cymunedau traddodiadol Cymraeg yn ystod y Cynllun Datblygu Lleol diwethaf.

\* O dderbyn sensitifrydd ieithyddol y cymunedau traddodiadol Cymraeg, bod y cynllun yn cyfyngu ar ddatblygiadau tai newydd yn yr ardaloedd hynny am ddegawd hyd fydd effaith newidiadau'r ddegawd flaenorol wedi setlo.

\* Bod y Cyngor yn derbyn yr egwyddor o angen lleol yn sail cyn caniatáu unrhyw ddatblygiadau yn yr ardaloedd hynny.

\* Bod y Cyngor yn rhoi system asesu annibynnol mewn lle ar gyfer unrhyw ddatblygiadau arfaethedig i weld yr effaith ar y Gymraeg.

Heb gymryd y camau uchod, credaf nad yw'r Cynllun Datblygu Lleol yn gadarn. Edrychaf ymlaen at dderbyn eich ymateb i fy mhryderon.

I should like you to note my comments as part of your consultation on Powys Local Development Plan. I welcome the target of a growth in the percentage of Welsh-speakers in the county, as well as the recognition of the importance of Welsh communities. But if you wish to realise these commendable objectives, then there is a need to make some basic changes to the plan, in particular:

I don't believe firm evidence exists that 6,071 houses are required, since the methodology does not consider the local housing need. The figure should be substantially reduced.

The distribution of the houses in the plan is not suitable since it is not based on local needs. Evidence needs to be collected of the local housing need, and the distribution needs to be changed between and within communities.

The council should commission research to see the effect the new housing developments have had on traditional Welsh--speaking communities during the period of the last Local Development Plan.

Given the linguistic sensitivity of the traditional Welsh-speaking communities, the plan

should limit new housing developments in those areas for a decade until the effects of the previous decade's changes of have settled.

The Council should accept the principle of local need as a basis before allowing any developments in those areas.

The Council has an independent assessment system in place for any proposed developments, to look at the effect on the Welsh language.  
Without the above measures, I don't believe that the Local Development Plan is sufficiently robust.

I look forward to receiving your response to my concerns.

\* Credaf nad yw'r tystiolaeth fod angen 6,071 o dai yn gadarn, gan nad yw'r methodoleg yn ystyried yr angen lleol am dai. Dylid lleihau'r ffigur yn sylweddol.

\* Nid yw dosbarthiad y tai yn y cynllun yn addas gan nad yw wedi selio ar anghenion lleol. Mae angen casglu tystiolaeth o'r angen lleol am dai, ac ail-lunio'r dosbarthiad o dai rhwng ac o fewn cymunedau.

\* Bod y Cyngor yn comisiynu gwaith ymchwil i weld effaith datblygiadau tai newydd ar y cymunedau traddodiadol Cymraeg yn ystod y Cynllun Datblygu Lleol diwethaf.

\* O dderbyn sensitifrydd ieithyddol y cymunedau traddodiadol Cymraeg, bod y cynllun yn cyfyngu ar ddatblygiadau tai newydd yn yr ardaloedd hynny am ddegawd hyd fydd effaith newidiadau'r ddegawd flaenorol wedi setlo.

\* Bod y Cyngor yn derbyn yr egwyddor o angen lleol yn sail cyn caniatáu unrhyw ddatblygiadau yn yr ardaloedd hynny.

\* Bod y Cyngor yn rhoi system asesu annibynnol mewn lle ar gyfer unrhyw ddatblygiadau arfaethedig i weld yr effaith ar y Gymraeg.

Heb gymryd y camau uchod, credaf nad yw'r Cynllun Datblygu Lleol yn gadarn. Edrychaf ymlaen at dderbyn eich ymateb i fy mhryderon.

I should like you to note my comments as part of your consultation on Powys Local Development Plan. I welcome the target of a growth in the percentage of Welsh-speakers in the county, as well as the recognition of the importance of Welsh communities. But if you wish to realise these commendable objectives, then there is a need to make some basic changes to the plan, in particular:

I don't believe firm evidence exists that 6,071 houses are required, since the methodology does not consider the local housing need. The figure should be substantially reduced.

The distribution of the houses in the plan is not suitable since it is not based on local needs. Evidence needs to be collected of the local housing need, and the distribution needs to be changed between and within communities.

The council should commission research to see the effect the new housing developments have had on traditional Welsh--speaking communities during the period of the last Local Development Plan.

Given the linguistic sensitivity of the traditional Welsh-speaking communities, the plan

should limit new housing developments in those areas for a decade until the effects of the previous decade's changes of have settled.

The Council should accept the principle of local need as a basis before allowing any developments in those areas.

The Council has an independent assessment system in place for any proposed developments, to look at the effect on the Welsh language.  
Without the above measures, I don't believe that the Local Development Plan is sufficiently robust.

I look forward to receiving your response to my concerns.

*Question* *Representation Texts***Question: Council Response**

Representation Texts: "Ar ôl ystyried y sylwadau a dderbyniwyd a thystiolaeth ategol bellach a luniwyd, ystyrir bod y lefel hwn o ddarpariaeth tai'n parhau i fod yn briodol er mwyn sicrhau bod y Cynllun Datblygu Lleol yn gallu cyflwyno'r strategaeth, ei amcanion economaidd-gymdeithasol allweddol a'r hyblygrwydd eithaf i ymateb i dwf economaidd yn y dyfodol. Rydym yn ystyried y byddai gwro o'r ddarpariaeth tai hwn yn peryglu cadernid y cynllun wrth ddiwallu'r amcanion hyn. Cynhaliwyd ymchwil a chasglwyd tystiolaeth sylweddol wrth barato'r CDLI er mwyn ystyried cyfleoedd priodol am dai i'r sir ac i fynd i'r afael ag angen lleol am dai a dosbarthiad tai. Mae'r cyngor o'r farn bod dosbarthiad y tai ar draws yr Hierarchaeth Aneddiadau wedi'i seilio ar sail resymegol gadarn sy'n ategu'r broses o gyflwyno strategaeth y CDLI a hyfywedd tymor hir yr aneddiadau sy'n gallu cynnal twf cynaliadwy. Mae'r Cyngor yn bwriadu diwygio ei agwedd o ran polisi'r laith Gymraeg a Diwylliant er mwyn mynd i'r afael â materion a godwyd yn y sylwadau ac i sicrhau bod ei bolisi'n gyson â Pholisi Cenedlaethol. Mae'r cynllun yn cydnabod sensitifwydd ieithyddol cymunedau Cymraeg ac mae'n cynnwys polisi sy'n ceisio lliniaru effaith datblygiadau mawr yn yr ardaloedd hyn. Gweler Newidiadau â Ffocws am fanylion. Fel rhan o'r broses o lunio'r Cynllun Datblygu Lleol, comisiynodd y Cyngor ymchwil i weld yr effaith a gafodd datblygiadau mawr ar gymunedau Cymraeg traddodiadol. Mae'r Aseiad o'r Effaith ar yr laith Gymraeg yn rhan o Arfarniad o Gynaliadwydd y Cynllun ac mae ei ganfyddiadau'n ategu'r agwedd ddiwygiedig o ran polisi'r laith Gymraeg. Bydd hefyd yn cael ei ystyried wrth lunio'r Canllawiau Cynllunio Atodol ar fesurau lliniaru priodol ar yr laith Gymraeg a Diwylliant. Mae'r CDU yn cynnwys meini prawf digonol ar fonitro er mwyn ystyried ac adolygu polisi'r Gymraeg a cheisiadau cynllunio cysylltiedig fel rhan o Adroddiadau Monitro Blynyddol y CDU a phrosesu adolygu'r Cynllun a ddaw o dan ganllawiau cynllunio cenedlaethol. Having considered the representations received and further supporting evidence that has been prepared it is considered this level of housing provision remains appropriate to ensure the Local Development Plan (LDP) is capable of delivering the Strategy, its key socio-economic objectives and ensures maximum flexibility to respond to future economic growth. It is considered that any deviation from this housing supply provision would jeopardise the soundness of the plan in being able to meet these objectives. A significant amount of research and evidence gathering was undertaken during the preparation of the LDP to consider appropriate housing opportunities for the county and to address local housing need and housing distribution. The Council considers that the distribution of housing across the Settlement Hierarchy is based on a sound rationale which supports the delivery of the LDP strategy and the longer term viability of settlements considered capable of supporting sustainable growth. The Council propose to amend its policy approach to Welsh Language and Culture to better address issues raised in the representation and to ensure its policy approach is consistent with National Policy. The plan recognises the linguistic sensitivity of Welsh speaking communities and includes policy that seeks to mitigate against the impact of large housing developments within these areas. See Focused Changes for details. As part of the preparation of the LDP the Council did commission research to see the effect new housing developments have had on traditional Welsh Speaking Communities. This Welsh Language Impact Assessment forms part of the Sustainability Appraisal of the Plan and its findings supports the amended Welsh Language policy approach and will inform the preparation of Supplementary Planning Guidance on appropriate Welsh Language and Culture Mitigation Measures. The LDP includes sufficient monitoring criteria to enable consideration and review of Welsh Language policy and associated planning applications as part of LDP Annual Monitoring Reports and the Plan review processes provided under national planning guidance."

I welcome the target of a growth in the percentage of Welsh-speakers in the county, as well as the recognition of the importance of Welsh communities. But if you wish to realise these commendable objectives, then there is a need to make some basic changes to the plan, in particular:

I don't believe firm evidence exists that 6,071 houses are required, since the methodology does not consider the local housing need. The figure should be substantially reduced.

The distribution of the houses in the plan is not suitable since it is not based on local needs. Evidence needs to be collected of the local housing need, and the distribution needs to be changed between and within communities.

The council should commission research to see the effect the new housing developments have had on traditional Welsh--speaking communities during the period of the last Local Development Plan.

Given the linguistic sensitivity of the traditional Welsh-speaking communities, the plan

should limit new housing developments in those areas for a decade until the effects of the previous decade's changes of have settled.

The Council should accept the principle of local need as a basis before allowing any developments in those areas.

The Council has an independent assessment system in place for any proposed developments, to look at the effect on the Welsh language.  
Without the above measures, I don't believe that the Local Development Plan is sufficiently robust.

I look forward to receiving your response to my concerns.

Representation Texts: "Ar ôl ystyried y sylwadau a dderbyniwyd a thystiolaeth ategol bellach a luniwyd, ystyrir bod y lefel hwn o ddarpariaeth tai'n parhau i fod yn briodol er mwyn sicrhau bod y Cynllun Datblygu Lleol yn gallu cyflwyno'r strategaeth, ei amcanion economaidd-gymdeithasol allweddol a'r hyblygrwydd eithaf i ymateb i dwf economaidd yn y dyfodol. Rydym yn ystyried y byddai gwro o'r ddarpariaeth tai hwn yn peryglu cadernid y cynllun wrth ddiwallu'r amcanion hyn. Cynhaliwyd ymchwil a chasglwyd tystiolaeth sylweddol wrth baratoi'r CDLI er mwyn ystyried cyfleoedd priodol am dai i'r sir ac i fynd i'r afael ag angen lleol am dai a dosbarthiad tai. Mae'r cyngor o'r farn bod dosbarthiad y tai ar draws yr Hierarchaeth Aneddiadau wedi'i seilio ar sail resymegol gadarn sy'n ategu'r broses o gyflwyno strategaeth y CDLI a hyfywedd tymor hir yr aneddiadau sy'n gallu cynnal twf cynaliadwy. Mae'r Cyngor yn bwriadu diwygio ei agwedd o ran polisi'r laith Gymraeg a Diwylliant er mwyn mynd i'r afael â materion a godwyd yn y sylwadau ac i sicrhau bod ei bolisi'n gyson â Pholisi Cenedlaethol. Mae'r cynllun yn cydnabod sensitifwydd ieithyddol cymunedau Cymraeg ac mae'n cynnwys polisi sy'n ceisio lliniaru effaith datblygiadau mawr yn yr ardaloedd hyn. Gweler Newidiadau â Ffocws am fanylion. Fel rhan o'r broses o lunio'r Cynllun Datblygu Lleol, comisiynodd y Cyngor ymchwil i weld yr effaith a gafodd datblygiadau mawr ar gymunedau Cymraeg traddodiadol. Mae'r Aseiad o'r Effaith ar yr laith Gymraeg yn rhan o Arfarniad o Gynaliadwyedd y Cynllun ac mae ei ganfyddiadau'n ategu'r agwedd ddiwygiedig o ran polisi'r laith Gymraeg. Bydd hefyd yn cael ei ystyried wrth lunio'r Canllawiau Cynllunio Atodol ar fesurau lliniaru priodol ar yr laith Gymraeg a Diwylliant. Mae'r CDU yn cynnwys meini prawf digonol ar fonitro er mwyn ystyried ac adolygu polisi'r Gymraeg a cheisiadau cynllunio cysylltiedig fel rhan o Adroddiadau Monitro Blynnyddol y CDU a phrosesu adolygu'r Cynllun a ddaw o dan ganllawiau cynllunio cenedlaethol. Having considered the representations received and further supporting evidence that has been prepared it is considered this level of housing provision remains appropriate to ensure the Local Development Plan (LDP) is capable of delivering the Strategy, its key socio-economic objectives and ensures maximum flexibility to respond to future economic growth. It is considered that any deviation from this housing supply provision would jeopardise the soundness of the plan in being able to meet these objectives. A significant amount of research and evidence gathering was undertaken during the preparation of the LDP to consider appropriate housing opportunities for the county and to address local housing need and housing distribution. The Council considers that the distribution of housing across the Settlement Hierarchy is based on a sound rationale which supports the delivery of the LDP strategy and the longer term viability of settlements considered capable of supporting sustainable growth. The Council propose to amend its policy approach to Welsh Language and Culture to better address issues raised in the representation and to ensure its policy approach is consistent with National Policy. The plan recognises the linguistic sensitivity of Welsh speaking communities and includes policy that seeks to mitigate against the impact of large housing developments within these areas. See Focused Changes for details. As part of the preparation of the LDP the Council did commission research to see the effect new housing developments have had on traditional Welsh Speaking Communities. This Welsh Language Impact Assessment forms part of the Sustainability Appraisal of the Plan and its findings supports the amended Welsh Language policy approach and will inform the preparation of Supplementary Planning Guidance on appropriate Welsh Language and Culture Mitigation Measures. The LDP includes sufficient monitoring criteria to enable consideration and review of Welsh Language policy and associated planning applications as part of LDP Annual Monitoring Reports and the Plan review processes provided under national planning guidance."

*Question* *Representation Texts***Question: Council Response**

Representation Texts: "Ar ôl ystyried y sylwadau a dderbyniwyd a thystiolaeth ategol bellach a luniwyd, ystyrir bod y lefel hwn o ddarpariaeth tai'n parhau i fod yn briodol er mwyn sicrhau bod y Cynllun Datblygu Lleol yn gallu cyflwyno'r strategaeth, ei amcanion economaidd-gymdeithasol allweddol a'r hyblygrwydd eithaf i ymateb i dwf economaidd yn y dyfodol. Rydym yn ystyried y byddai gwro o'r ddarpariaeth tai hwn yn peryglu cadernid y cynllun wrth ddiwallu'r amcanion hyn. Cynhaliwyd ymchwil a chasglwyd tystiolaeth sylweddol wrth baratoi'r CDLI er mwyn ystyried cyfleoedd priodol am dai i'r sir ac i fynd i'r afael ag angen lleol am dai a dosbarthiad tai. Mae'r cyngor o'r farn bod dosbarthiad y tai ar draws yr Hierarchaeth Aneddiadau wedi'i seilio ar sail resymegol gadarn sy'n ategu'r broses o gyflwyno strategaeth y CDLI a hyfywedd tymor hir yr aneddiadau sy'n gallu cynnal twf cynaliadwy. Mae'r Cyngor yn bwriadu diwygio ei agwedd o ran polisi'r laith Gymraeg a Diwylliant er mwyn mynd i'r afael â materion a godwyd yn y sylwadau ac i sicrhau bod ei bolisi'n gyson â Pholisi Cenedlaethol. Mae'r cynllun yn cydnabod sensitifwedd i eithyddol cymunedau Cymraeg ac mae'n cynnwys polisi sy'n ceisio lliniaru effaith datblygiadau mawr yn yr ardaloedd hyn. Gweler Newidiadau â Ffocws am fanylion. Fel rhan o'r broses o lunio'r Cynllun Datblygu Lleol, comisiynodd y Cyngor ymchwil i weld yr effaith a gafodd datblygiadau mawr ar gymunedau Cymraeg traddodiadol. Mae'r Aseiad o'r Effaith ar yr laith Gymraeg yn rhan o Arfarniad o Gynaliadwyedd y Cynllun ac mae ei ganfyddiadau'n ategu'r agwedd ddiwygiedig o ran polisi'r laith Gymraeg. Bydd hefyd yn cael ei ystyried wrth lunio'r Canllawiau Cynllunio Atodol ar fesurau lliniaru priodol ar yr laith Gymraeg a Diwylliant. Mae'r CDU yn cynnwys meini prawf digonol ar fonitro er mwyn ystyried ac adolygu polisi'r Gymraeg a cheisiadau cynllunio cysylltiedig fel rhan o Adroddiadau Monitro Blynnyddol y CDU a phrosesu adolygu'r Cynllun a ddaw o dan ganllawiau cynllunio cenedlaethol. Having considered the representations received and further supporting evidence that has been prepared it is considered this level of housing provision remains appropriate to ensure the Local Development Plan (LDP) is capable of delivering the Strategy, its key socio-economic objectives and ensures maximum flexibility to respond to future economic growth. It is considered that any deviation from this housing supply provision would jeopardise the soundness of the plan in being able to meet these objectives. A significant amount of research and evidence gathering was undertaken during the preparation of the LDP to consider appropriate housing opportunities for the county and to address local housing need and housing distribution. The Council considers that the distribution of housing across the Settlement Hierarchy is based on a sound rationale which supports the delivery of the LDP strategy and the longer term viability of settlements considered capable of supporting sustainable growth. The Council propose to amend its policy approach to Welsh Language and Culture to better address issues raised in the representation and to ensure its policy approach is consistent with National Policy. The plan recognises the linguistic sensitivity of Welsh speaking communities and includes policy that seeks to mitigate against the impact of large housing developments within these areas. See Focused Changes for details. As part of the preparation of the LDP the Council did commission research to see the effect new housing developments have had on traditional Welsh Speaking Communities. This Welsh Language Impact Assessment forms part of the Sustainability Appraisal of the Plan and its findings supports the amended Welsh Language policy approach and will inform the preparation of Supplementary Planning Guidance on appropriate Welsh Language and Culture Mitigation Measures. The LDP includes sufficient monitoring criteria to enable consideration and review of Welsh Language policy and associated planning applications as part of LDP Annual Monitoring Reports and the Plan review processes provided under national planning guidance."

Council Response:

0

**Question: 3d. (i) Representation Details**

Representation Texts: Hoffwn i chi nodi fy sylwadau fel rhan o'ch ymgynghoriad ar Gynllun Datblygu Lleol Powys. Rwy'n croesawu'r targed y bydd y ganran sy'n siarad Cymraeg yn y Sir yn tyfu, yn ogystal â'r gydnabyddiaeth o bwysigrwydd cymunedau Cymraeg. Ond os am wireddu'r amcanion cloddiw hyn, mae angen newidiadau sylfaenol i'r cynllun, yn benodol:

\* Credaf nad yw'r tystiolaeth fod angen 6,071 o dai yn gadarn, gan nad yw'r methodoleg yn ystyried yr angen lleol am dai. Dylid lleihau'r ffigur yn sylweddol.

\* Nid yw dosbarthiad y tai yn y cynllun yn addas gan nad yw wedi selio ar anghenion lleol. Mae angen casglu tystiolaeth o'r angen lleol am dai, ac ail-lunio'r dosbarthiad o dai rhwng ac o fewn cymunedau.

\* Bod y Cyngor yn comisiynu gwaith ymchwil i weld effaith datblygiadau tai newydd ar y cymunedau traddodiadol Cymraeg yn ystod y Cynllun Datblygu Lleol diwethaf.

\* O dderbyn sensitifrydd ieithyddol y cymunedau traddodiadol Cymraeg, bod y cynllun yn cyfyngu ar ddatblygiadau tai newydd yn yr ardaloedd hynny am ddegawd hyd fydd effaith newidiadau'r ddegawd flaenorol wedi setlo.

\* Bod y Cyngor yn derbyn yr egwyddor o angen lleol yn sail cyn caniatáu unrhyw ddatblygiadau yn yr ardaloedd hynny.

\* Bod y Cyngor yn rhoi system asesu annibynnol mewn lle ar gyfer unrhyw ddatblygiadau arfaethedig i weld yr effaith ar y Gymraeg.

Heb gymryd y camau uchod, credaf nad yw'r Cynllun Datblygu Lleol yn gadarn. Edrychaf ymlaen at dderbyn eich ymateb i fy mhryderon.

I should like you to note my comments as part of your consultation on Powys Local Development Plan. I welcome the target of a growth in the percentage of Welsh-speakers in the county, as well as the recognition of the importance of Welsh communities. But if you wish to realise these commendable objectives, then there is a need to make some basic changes to the plan, in particular:

I don't believe firm evidence exists that 6,071 houses are required, since the methodology does not consider the local housing need. The figure should be substantially reduced.

The distribution of the houses in the plan is not suitable since it is not based on local needs. Evidence needs to be collected of the local housing need, and the distribution needs to be changed between and within communities.

The council should commission research to see the effect the new housing developments have had on traditional Welsh--speaking communities during the period of the last Local Development Plan.

Given the linguistic sensitivity of the traditional Welsh-speaking communities, the plan

should limit new housing developments in those areas for a decade until the effects of the previous decade's changes of have settled.

The Council should accept the principle of local need as a basis before allowing any developments in those areas.

The Council has an independent assessment system in place for any proposed developments, to look at the effect on the Welsh language.  
Without the above measures, I don't believe that the Local Development Plan is sufficiently robust.

I look forward to receiving your response to my concerns.

Fel rhan o'r broses o lunio'r Cynllun Datblygu Lleol, comisiynodd y Cyngor ymchwil i weld yr effaith a gafodd datblygiadau mawr ar gymunedau Cymraeg traddodiadol. Mae'r Aseiad o'r Effaith ar yr laith Gymraeg yn rhan o Arfarniad o Gynaliadwyedd y Cynllun ac mae ei ganfyddiadau'n ategu'r agwedd ddiwygiedig o ran polisi'r laith Gymraeg. Bydd hefyd yn cael ei ystyried wrth lunio'r Canllawiau Cynllunio Atodol ar fesurau lliniaru priodol ar yr laith Gymraeg a Diwylliant. Mae'r CDU yn cynnwys meini prawf digonol ar fonitro er mwyn ystyried ac adolygu polisi'r Gymraeg a cheisiadau cynllunio cysylltiedig fel rhan o Adroddiadau Monitro Blynyddol y CDU a phrosesu adolygu'r Cynllun a ddaw o dan ganllawiau cynllunio cenedlaethol. Having considered the representations received and further supporting evidence that has been prepared it is considered this level of housing provision remains appropriate to ensure the Local Development Plan (LDP) is capable of delivering the Strategy, its key socio-economic objectives and ensures maximum flexibility to respond to future economic growth. It is considered that any deviation from this housing supply provision would jeopardise the soundness of the plan in being able to meet these objectives. A significant amount of research and evidence gathering was undertaken during the preparation of the LDP to consider appropriate housing opportunities for the county and to address local housing need and housing distribution. The Council considers that the distribution of housing across the Settlement Hierarchy is based on a sound rationale which supports the delivery of the LDP strategy and the longer term viability of settlements considered capable of supporting sustainable growth. The Council propose to amend its policy approach to Welsh Language and Culture to better address issues raised in the representation and to ensure its policy approach is consistent with National Policy. The plan recognises the linguistic sensitivity of Welsh speaking communities and includes policy that seeks to mitigate against the impact of large housing developments within these areas. See Focused Changes for details. As part of the preparation of the LDP the Council did commission research to see the effect new housing developments have had on traditional Welsh Speaking Communities. This Welsh Language Impact Assessment forms part of the Sustainability Appraisal of the Plan and its findings supports the amended Welsh Language policy approach and will inform the preparation of Supplementary Planning Guidance on appropriate Welsh Language and Culture Mitigation Measures. The LDP includes sufficient monitoring criteria to enable consideration and review of Welsh Language policy and associated planning applications as part of LDP Annual Monitoring Reports and the Plan review processes provided under national planning guidance."

\* Credaf nad yw'r tystiolaeth fod angen 6,071 o dai yn gadarn, gan nad yw'r methodoleg yn ystyried yr angen lleol am dai. Dylid lleihau'r ffigur yn sylweddol.

\* Nid yw dosbarthiad y tai yn y cynllun yn addas gan nad yw wedi selio ar anghenion lleol. Mae angen casglu tystiolaeth o'r angen lleol am dai, ac ail-lunio'r dosbarthiad o dai rhwng ac o fewn cymunedau.

\* Bod y Cyngor yn comisiynu gwaith ymchwil i weld effaith datblygiadau tai newydd ar y cymunedau traddodiadol Cymraeg yn ystod y Cynllun Datblygu Lleol diwethaf.

\* O dderbyn sensitifrydd ieithyddol y cymunedau traddodiadol Cymraeg, bod y cynllun yn cyfyngu ar ddatblygiadau tai newydd yn yr ardaloedd hynny am ddegawd hyd fydd effaith newidiadau'r ddegawd flaenorol wedi setlo.

\* Bod y Cyngor yn derbyn yr egwyddor o angen lleol yn sail cyn caniatáu unrhyw ddatblygiadau yn yr ardaloedd hynny.

\* Bod y Cyngor yn rhoi system asesu annibynnol mewn lle ar gyfer unrhyw ddatblygiadau arfaethedig i weld yr effaith ar y Gymraeg.

Heb gymryd y camau uchod, credaf nad yw'r Cynllun Datblygu Lleol yn gadarn. Edrychaf ymlaen at dderbyn eich ymateb i fy mhryderon.

I should like you to note my comments as part of your consultation on Powys Local Development Plan. I welcome the target of a growth in the percentage of Welsh-speakers in the county, as well as the recognition of the importance of Welsh communities. But if you wish to realise these commendable objectives, then there is a need to make some basic changes to the plan, in particular:

I don't believe firm evidence exists that 6,071 houses are required, since the methodology does not consider the local housing need. The figure should be substantially reduced.

The distribution of the houses in the plan is not suitable since it is not based on local needs. Evidence needs to be collected of the local housing need, and the distribution needs to be changed between and within communities.

The council should commission research to see the effect the new housing developments have had on traditional Welsh--speaking communities during the period of the last Local Development Plan.

Given the linguistic sensitivity of the traditional Welsh-speaking communities, the plan

should limit new housing developments in those areas for a decade until the effects of the previous decade's changes of have settled.

The Council should accept the principle of local need as a basis before allowing any developments in those areas.

The Council has an independent assessment system in place for any proposed developments, to look at the effect on the Welsh language.  
Without the above measures, I don't believe that the Local Development Plan is sufficiently robust.

I look forward to receiving your response to my concerns.

I would like to you note my comments as part of your consultation on Powys' Local Development Plan. I welcome the target that the number of Welsh speakers in the County will increase, as well as acknowledging the importance of Welsh communities. But if these commendable objectives are to be realised, fundamental changes need to be made to the plan, specifically:

\* I don't believe that the evidence that 6,071 houses are needed is robust, as the methodology hasn't considered the need for local housing. This figure should be greatly reduced.

\* The distribution of housing in the plan isn't appropriate as it isn't based on local needs. Evidence is needed of the local need for housing and realign the distribution of housing between and within communities.

\* That the Council commissions research to measure the effect of new housing developments on traditional Welsh communities during the previous Local Development Plan.

\* In considering the linguistic sensitivity of traditional Welsh communities, that the

Question Representation Texts

**Question: 3d. (i) Representation Details**

Representation Texts: Employment

Spatial distribution of employment land

The Welsh Government supports economic growth however, it is crucial that this economic growth meets the authority's objectives.

The authority's evidence identifies that manufacturing is expected to decline and that there are no individual sectors expected to grow (Economy – Employment & Economic Development topic paper 4.5.2). There are significant concerns about the loss from the County of people in their 20s and 30s. The evidence states that a large proportion of the workforce works outside the traditional B-class uses and that self-employed businesses and small start-ups are important for the local economy. It is not clear how the allocated sites or employment policies have been shaped by this evidence. The authority needs to explain how the policy framework and allocations will support small business growth, new start-ups and support an economy more likely to retain young workers. It is not clear how the authority's approach has been influenced by wider regional evidence or the larger than local approach set out in TAN 23.

Employment Provision

The LDP allocates 49 hectares for B1, B2 & B8 uses. The employment land review projects a requirement for 3 – 5 hectares (Economy – Employment & Economic Development topic paper 4.4.2). By making allowances for upgrading the existing employment stock, ensuring choice and a range of sites and a flexibility allowance, the projected requirement is increased to 40-56 hectares.

Some explanation is provided in the background papers (e.g. para 4.6.6 of the LDP Strategy topic paper). However, further clarification is required to justify the scale of provision. In particular, whilst there may be a need to upgrade and/or replace existing employment stock for modern business occupiers, it is unclear how this upgrading/replacing is likely to require an estimated 21 to 29 hectares of land. It is not clear who the future modern business occupiers will be or the likelihood of business relocating to the allocated sites, especially based on the conclusions of the viability study (para. 12.12).

Planning policy supports flexibility and a range and choice of sites and recognises that large historical employment sites can require considerable time to come forward. However, in the absence of likely demand for this scale of provision, it is important the authority further clarifies how these sites have been considered for other potential uses and whether sites could be released for other uses which could support the delivery of other objectives.

The authority should clarify what the implications would be on types of jobs (skills and salaries) and homes if land take were to meet the allocated 49ha over the plan period. Further clarification is necessary to explain how the supporting assessment work, in particular the Welsh Language Impact Assessment (WLIA), has taken account of the scale of employment allocations. Further clarification is required on what kind of jobs the authority is expecting for the allocated sites. Are the required skills available locally, or would this encourage job migration into the area and increase pressure on housing/Welsh language?

Site Selection

TAN 23 requires a sequential approach to site selection for employment sites in rural areas. Further clarification is required on whether a sequential approach was used.

Deliverability

The majority of the allocated employment sites were included in the UDP. The authority's explanation as to why these sites have not come forward (LDP Strategy topic paper; Appendix E) should be expanded to clarify why these sites have remained in the plan. How can the authority be confident these sites will be deliverable and meet employment requirements over the life of the plan? Being candidate sites alone is not enough of a justification to include them in the LDP. More certainty on deliverability and viability is required.

Question Representation Texts

**Question: 3d. (i) Representation Details**

Representation Texts: The Deposit Plan and the Powys Employment Needs Assessment (October 2012) recognises that the proposed 49ha provision is considerably higher than take up rates during the UDP period, and higher than the estimated future land required.

We recognise that the level of provision should reflect expected demand whilst allowing flexibility in the type, location, and scale of sites. However, we remain concerned regarding the deliverability of the proposed level particularly given that the Assessment states the "low levels of historic take up, coupled with a weaker economic outlook across the LDP period compared to the preceding 15 year period suggest the results of the quantitative assessment will be very challenging to deliver, particularly with adverse development economics in Powys and a constrained public sector."

We therefore have concerns regarding the realistic delivery of the proposed level of land allocated for employment, and consider that it fails to meet Test of Soundness CE2

(note: this rep text contained in Annex 1 to NRW letter, this is duplicate text to that recorded at RepPoint 34.6)

Council Response:

Question Representation Texts

**Question: 3d. (i) Representation Details**

Representation Texts: CPRW broadly supports a planned, low level expansion of employment land which sits well with the full employment economy and the defining characteristics of entrepreneurship, innovation and small, sustainable, steadily growing business. Powys does not have a failing economy and imposed 'regeneration' strategies or an economy skewed artificially towards construction risk destabilising a sound and organically growing economic base. It is not a high wage economy but official data shows that there has been a steady increase in average wages over the last 12months.

Empty industrial units on the existing well landscaped sites must be fully upgraded and utilised before seeking further land.

Paragraph 3.3.8

It is evident that the Growth Zone concept has not been considered in any cogent and structured way. Please see our comments on Objective 8 where CPRW proposes that all reference to Growth Zones is deleted.

Brecon and Talgarth lie within the Brecon Beacons National Park and are outside the scope of the LDP.

Council Response: 0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: Delete reference to growth zones throughout LDP and supporting documents.

Council Response: 0

**Question: 4b Reason For Request To Speak At Hearing And Subject**

Representation Texts: See representation above

See also Point 5 from Rep V1:

5. All the documents are signed in my name (Peter Seaman) however this has been a collaborative work, with members grouping in different ways to concentrate on the topics and references covered in our responses. Therefore we request that any one of the authors above be granted the right to speak at an Inspector's examination of the LDP, according to the topic of discussion.

*Question Representation Texts*

**Question: Council Response**

Representation Texts: The Council disagree with the proposed changes requested by the Represntor, this land is not used for employment at the moment and has yet to secure planning permission so cannot be seen as a net loss. Additionally this site would be permitted for employment land in the LDP under Policy E2.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: Ref Point 34.12 states that 49 ha of employment land is required "in order to sustain the communities and the economy of Powys and to provide job opportunities for all ages, particularly young people, it is important that the LDP supports economic development."

The Powys CC target for the Supply of Employment Land / Development - AMR 14 as stated on p.125 of the revised Deposit LDP 2015 sets out that there should be no net loss of employment land.

Removal of sites such as the loss of the Old Station Yard Llanfyllin contradicts this target and goes against the policies DM1 93), E1, E2 and E3 that in turn contribute to AMR 14.

Not only is there a net loss but a total loss of employment land in Llanfyllin.

Additional Evidence:

A) Accordance with LDP's Strategy and Candidate Site Assessment Methodology

Question Representation Texts

**Question: Council Response**

Representation Texts: This Representation is considered to be in support of the Deposit Local Development Plan. The Plan seeks to direct development to the main centres best served by public transport. This town centre first approach means retail development is directed to the most appropriate locations. No changes are therefore required.

Council Response:

0

**Question: 3d. (i) Representation Details**

Representation Texts: CPRW supports the retail strategy based on revitalising the centre of market towns; the realistic assessment of what a low population area requires and limiting new retail development to sites within walking distance of centres rather than taking out of town green field sites and increasing traffic volume. The transport policy, particularly regarding public transport, must support this strategy.

*Question Representation Texts*

**Question: Council Response**

Representation Texts: Thank you for your comments. The Council does not agree that the LDP housing land target should be increased to 6,600 dwellings or more or that additional housing land allocations are required. The Council has found it necessary to revisit the housing growth figures following representations made on the Deposit Plan including the Welsh Government's (WG) fundamental concerns over deliverability and viability. The WG considers the Deposit Plan has a challenging target taking into account historical annual completions and in particular the low number of housing completions in the last few years which impact on and significantly increase the required build rates over the remaining Plan period. The WG is asking the Council to set a housing target which is at foremost deliverable and ensures that a 5 year housing supply can be met in line with the requirements of TAN1. It is apparent that the annual build requirement over the plan period must be set at a level which is considered deliverable and not unrealistically high. The Council is proposing that the housing land target is reduced, to be effected through a Focussed Change. Please note that the evidence for the revised housing land target is fully set out in the revised Housing Topic Paper (Dec 2015). Relevant parts of the Plan have been amended accordingly (again through proposed Focussed Changes) to align with the new housing data. This includes an update of the settlement allocations table in Appendix 1 which has been revised as a result of i) further work on deliverability ii) the consideration of site allocation representations received in response to the Deposit Plan and iii) to reflect new planning history as at the revised base date for planning permission information (1 April 2015). Taking account of the proposed Focussed Changes, the Council considers that the proposed growth and spatial strategy is sound, based on a robust methodology with levels of growth and site allocations supported by a wide range of supporting evidence.

Council Response:

0

**Question: 3d. (i) Representation Details**

Representation Texts: There are major concerns regarding the soundness of the housing land requirements in the Deposit LDP Strategy and is objected to on the grounds highlighted in the accompanying Submission Document. .

The LDP Housing Requirement 2011 – 2026 of 6,071 dwellings to deliver a dwelling requirement of 5,519 is objected to. Whilst it is acknowledged that this represents an increase in provision from the previous 2014 Deposit Plan, which stood at 5,000, it is considered that the figure continues to constitute under-provision. In this context the objection is justified by an analysis of the detailed reasons given for the current dwelling requirement in the Topic Paper : Population and Housing

Question Representation Texts

**Question: 3d. (i) Representation Details**

Representation Texts: A. Objection under soundness tests C2, CE2: Fundamental issues that we consider present a significant degree of risk for the authority if not addressed prior to submission stage, and may have implications for the plan's strategy:

1 Housing Deliverability

The authority has not adequately demonstrated that the level of housing provision in the LDP is viable and deliverable within the plan period. This raises signification questions regarding the delivery of both affordable and market housing, implications for the strategy, key issues and objectives, and the ability of the authority to maintain a 5 year land supply. The delivery of housing is central to the plan's strategy and therefore goes to the heart of the plan.

Whilst the Welsh Government supports aspirational authorities who wish to deliver on the key issues and objectives through housing growth, it is unclear if an assessment of site delivery and the relationship to the trajectory has been undertaken in Powys.

We note that build rates are required to increase to double the average of the past ten years (+140 units per annum to approximately 650 units between 2020-2022). The authority and the industry are best placed to explain the capacity of the development industry to accommodate this step change. The Welsh Government does not seek to speculate on what this number may be; all plans must be based on a robust assessment of viability. The authority has a challenging housing target; therefore it is imperative that annual completion rates are delivered as expected. This is to ensure that a five year supply can be maintained. The low level of completions at the start of the plan period (2011-2013) will significantly increase the annual build requirement of 368 units over the remaining plan period. Raising the annual build requirement will impact on the housing trajectory and the ability of the authority to demonstrate a 5-year housing land supply.

The Council's viability assessment implies that a significant proportion of housing provision is unviable raising questions regarding the deliverability of the plan as a whole. The Assessment (Powys Local Development Plan and Community Infrastructure Levy Viability Assessment October 2014) models 12 residential sites against a range of affordable housing targets (including a zero rate) across different sub-areas of the County. In each price area, the study indicates the sites "are broadly representative of the type of development that is likely to come forward in Powys in the future" (para 9.2, page 89). Whilst the model includes assumptions comparable with others across Wales, it is difficult to ascertain how the assumptions lead to negative land values in the majority of cases. The authority must demonstrate how these negative values affect the deliverability of the housing provision.

Having considered Table 10.5 (CIL viability assessment) the authority needs to demonstrate that the housing provision included in the plan is deliverable. The authority should provide further information to give certainty that over 40% of the housing required can be delivered in the identified timescales. The authority must demonstrate how the viability findings affect all components of the housing supply.

The Population and Housing topic paper provides evidence on past windfall rates and completions over the last three years (Table 18). Given the historical completions on small and windfall sites, this appears at odds with the Councils own viability evidence. This requires clarification. In addition, the viability evidence also indicates that brownfield sites are unviable across Powys. The authority must demonstrate how this approach has informed Policy H4 and whether any of the housing provision is located on such sites.

*Question Representation Texts*

**Question: Council Response**

Representation Texts: Thank you for your comments. The Council does not agree that the LDP housing land target should be increased or that additional housing land allocations are required. The Council has found it necessary to revisit the housing growth figures following representations made on the Deposit Plan including the Welsh Government's (WG) fundamental concerns over deliverability and viability. The WG considers the Deposit Plan has a challenging target taking into account historical annual completions and in particular the low number of housing completions in the last few years which impact on and significantly increase the required build rates over the remaining Plan period. The WG is asking the Council to set a housing target which is at foremost deliverable and ensures that a 5 year housing supply can be met in line with the requirements of TAN1. It is apparent that the annual build requirement over the plan period must be set at a level which is considered deliverable and not unrealistically high. The Council is proposing that the housing land target is reduced, to be effected through a Focussed Change. The evidence for the revised housing land target is fully set out in the revised Housing Topic Paper (Dec 2015). Relevant parts of the Plan have been amended accordingly (again through proposed Focussed Changes) to align with the new housing data. This includes an update of the settlement allocations table in Appendix 1 which has been revised as a result of i) further work on deliverability ii) the consideration of site allocation representations received in response to the Deposit Plan and iii) to reflect new planning history as at the revised base date for planning permission information (1 April 2015). Taking account of the proposed Focussed Changes, the Council considers that the proposed growth and spatial strategy is sound, based on a robust methodology with levels of growth and site allocations supported by a wide range of supporting evidence. As regards the phasing of sites, the delivery trajectory is not intended to artificially restrict development, it is a tool to provide information on how the Plan will meet the requirement of a 5 year supply and will not be applied rigidly. The Council would not wish to stymie suitable development coming forward.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: Consideration of Housing Supply by the Plan

Overall / Plan-Wide Housing Land Supply (@ 34.14)

Housing Requirement

With regards to the supply of housing land across the Authority over the plan period, it is noted that the Local Authority has updated its housing requirement in the Deposit LDP to be based on the Welsh Government's local authority level 2011-based Household Projections. For Powys, this shows a projected growth of 4,600 households over the plan period (2011-2026), from 58,429 to 62,964 in 2026. Having deducted the 17.74% of households living in the BBNP and accounting for an 8% conversion rate (based on vacancy rates), this gives a starting point of 4,087 dwellings. Taking into account various factors, including the need to plan for a higher level of housing growth, the LDP includes a forecasted dwelling requirement of 5,519 dwellings (368 p.a.). An additional 10% contingency means that the plan makes provision for 6,071 dwellings, which is equivalent to 405 dwellings p.a.

Household Formation

by: Representation No

Filtered to show: (all of) Stage=V; Status=M

Rep'n/Para/Policy	AccessnNo	DateLodgd	Late?	Status	Modified	Summary
1933.V1/3.3.12/		17/07/2015	<input type="checkbox"/>			Summary: Housing Growth
Source: Email		Type: Objection		Mode	Oral (Examination)	Status Maintained

It is acknowledged in the Deposit LDP that the average household size in Powys is projected to decrease from 2.24 persons per household in 2011 to 2.13 persons per household over the period to 2026. Bearing this in mind, we would make the case that the proposed housing supply fails to fully account for the increase in levels of single person households projected over the Plan period, which is projected to account for 34% of all households by 2026 (with one- and two-person households accounting for 74% of all households). Although the 2011 Census found that the number of households had not grown as fast as previously believed (resulting in a perceived reduced requirement for new housing by 2026), we would argue that the combination of an ageing population, an increased supply of housing and economic upturn enabling more young people to live alone/in smaller households, will result in increased household formation over the plan period. Accordingly, the resulting proposed level of housing supply is considered to be too low.

Leading on from this, it is not considered that the Deposit Plan housing projections adequately consider the impacts of any latent demand for housing, which has been temporarily suppressed during the recent economic downturn and recession. It is considered that a more stable economic situation which is now beginning to emerge will result in a future increase in housing requirements and housing growth, as those who have awaited improvements in the economic situation progress with currently dormant demands for additional / different housing requirements.

Accordingly, lower building rates in recent years will likely reverse and result in significantly higher building rates in the coming years - as house builders aim to 'catch-up' with, and provide for, this latent housing demand across the Authority. In any event the Plan period (which extends to 2026) needs to factor in patterns of demand over a considerable period, and should not just be based on the short term historic situation (which is universally accepted as being unprecedented).

Likewise, it should be noted that Powys County Council's most recent Joint Housing Land Availability Assessment (February 2015) shows that the Council could only demonstrate a 1.5 year housing supply on 1st April 2014, and confirms that the Authority has not maintained a five year land supply since 2011. The low levels of supply, in conjunction with the recent economic downturn, has therefore further limited and subdued development rates across the County – this was particularly evident in 2011/12 when the number of completions fell to just 98. It is also noted that the Land Supply Assessment table included in the Council's 'Housing and Delivery of New Housing' Topic Paper (2015) shows an expected 4.1 year supply in 2014, as opposed to 1.5 years. This Topic Paper, which provides background information to the Deposit LDP, does not therefore accurately represent the current housing land supply position and it is as such considered that it is also likely to be inaccurate in terms of calculating the supply going forwards over the plan period.

Furthermore, it is considered that the LDP fails to provide for a pro-growth strategy, as advocated by Carl Sargeant, Minister for Housing and Regeneration in his recent written statement – 'Stimulating Home Building in Wales.' This confirms that the Welsh Government's main priority is to build homes. It is not considered that the housing provision proposed within the Deposit LDP would be consistent with these objectives, as it does not encourage or give priority to housing growth, but may in effect subdue it over the plan period.

Reliance on Windfall Sites

It is noted that around 17% of Powys's dwelling supply is planned to be delivered through windfall sites. This relates to 1,008 dwellings and equates to approximately 84 dwellings per annum over the remaining 12 years of the plan period.

It is not considered sound that such a high percentage of the total housing supply relies on windfall sites coming forward for development. Such a situation is likely to result in an under provision in the total dwelling supply and will restrict the ability of the LDP to provide for the housing needs of the local population over the plan period. It is considered that only through specific and well considered/evidenced allocations can delivery accurately and robustly be achieved. Accordingly, the provision for windfall and small sites within the total dwelling supply should be reduced, with a consequential identification and allocation of further suitable and deliverable sites for residential development.

Phased Housing Land Supply

In terms of the phased housing land supply proposed within the Deposit LDP, a number of issues are raised with the proposals. These relate to both the phasing itself, and the sites allocated within the phasing periods – these concerns are discussed further below.

by: Representation No

Filtered to show: (all of) Stage=V; Status=M

Rep'n/Para/Policy	AccessnNo	DateLodgd	Late?	Status	Modified	Summary
1933.V1/3.3.12/		17/07/2015	<input type="checkbox"/>			Summary: Housing Growth
Source: Email		Type: Objection		Mode	Oral (Examination)	Status Maintained

The need for the phasing of housing sites over the LDP period is questioned, as it is considered that this artificially 'splits' up the housing land supply across the Plan, and will give developers and landowners uncertainty as to when they are 'permitted' to progress with an otherwise allocated site. The proposed phasing of sites therefore unduly restricts an already constricted housing market and one which is in need of immediate and short-term intervention.

Furthermore, it is considered that the phasing will reduce the ability of the Plan to be flexible when sites allocated within early phases do not come forward at the 'correct' time, when other allocated sites provided later within the plan period (and which have been assessed as being suitable for development) are able to be brought forward more quickly. This will further artificially and unduly restrict the ability of the Plan to provide for the housing needs of the Authority within a timely manner.

It is acknowledged that the 'Housing and Delivery of New Housing' Topic Paper (2015) accepts that to ensure that the shortfall during the early years of the LDP is addressed, build rates will at some point need to surpass the average annual build requirement of 368 new housing units. Nevertheless, the Council does not expect annual build rates to peak until the middle part of the plan, in years 2020 to 2021, and only anticipates a 5.1 year housing supply in 2015. The 'performance' of the Plan in providing for housing growth, and ensuring an adequate supply of housing land, is therefore highly risky and prone to failure.

Notwithstanding our comments above, it is considered that the highest number of dwelling units should be encouraged to be delivered within the initial period of the remaining plan period. This will allow for greater flexibility in the early part of the Plan, and will give the opportunity for greater numbers of sites to come forward over this initial period. This is particularly important considering that the Council has not managed to maintain a housing land supply since the beginning of the plan period, and moreover given the immediate and pressing need to address the current acute shortage and the need to respond to the market

Summary

To summarise, it is our view that the Plan does not sufficiently take account of the projected decrease in household size and the related steady rise in single households up to 2026. In addition, it is argued that the Plan does not provide for latent demand, which has been temporarily suppressed during the recent economic downturn and recession, as demonstrated by the council's lack of 5 year supply over the past few years. It therefore fails to meet the Welsh Government's demands for a pro-growth strategy.

Moreover, the Plan's reliance on windfall sites is likely to result in an under-provision in the total dwelling supply and will restrict the ability of the LDP to provide for the housing needs of the local population over the plan period. This makes the case for the allocation of further and additional new sites in a range and choice of locations and which are deliverable.

Furthermore, it is considered that there should be greater flexibility and provision in the early part of the Plan, to give the opportunity for greater numbers of sites to come forward over this initial period. Accordingly, it is our view that the proposed phasing arrangements should be removed from the plan, to ensure that sites are able to come forward in a timely manner in response to market demands.

Council Response:

0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: Increase the overall housing numbers to ensure that the needs of the Authority are provided for, including a reduction in the provision for windfall sites and removal of the phasing requirements.

Issue: 2015: Deposit Draft-03. Housing - Delivery and Infrastructure

*Question*      *Representation Texts*

**Question:**      **Council Response**

Representation Texts:      i. The Plan's dwelling requirement is explained in detail in the Population and Housing Topic Paper, which has been updated through the LDP process as new evidence and issues emerge. The plan has been written having regard to the LDP's being prepared by neighbouring authorities such as the Brecon Beacons National Park Authority to ensure consistency. The BBNPA's adopted LDP will continue to be monitored by the BBNPA and should it fail to deliver in terms of housing provision, this will necessitate further action by the BBNPA and potentially a review of its LDP.

The most recent source of comparable measure of the number of households and the number dwellings is the 2011 Census which showed across Powys there were 63,482 dwellings of which 53,345 were occupied by resident households. The home vacancy rate in the dwelling stock is therefore calculated to be 8.1%.

ii. The Council agrees that the flexibility allowance of 10% may need to be reviewed as the overall housing requirement is being reviewed to be in accordance with the recently updated TAN 1 which requires that a 5 year supply is demonstrated which may require a reduction in the housing requirement.

iii. The amount of housing expected from windfalls was calculated in the Deposit LDP on the average from last the 3 years of windfall applications which is considered a conservative number considering the 3 years used follow a period of recession and recent monitoring of planning applications being processed by the Council indicates that housing from windfall will be a reliable source going forward into the LDP and in line if not more than the annual number estimated.

Iv. Additional work is being carried out by the Council on the delivery of housing to ensure that a 5 year supply of housing land is provided by the LDP. This work will be published through an updated Housing Delivery / Trajectory topic paper (to be published in Jan 2016).

V. Refail and Berriew are addressed in the Council's response to 1938.V3.

Council Response:      0

**Question: 3d. (i)**      **Representation Details**

Representation Texts:      The calculation of future housing requirement is difficult to follow and appears to be based on assumption rather than evidence.

For instance, it appears to be assumed that 17.7% of all new development will take place within the BBNP, the same percentage as exists at present. This is too broad an assumption. It may well be that permission to develop becomes increasingly difficult to obtain in the BBNP, and thus persons who might be expected to go there would have to be accommodated elsewhere in the County, that is, outside the BBNP, thus adding to the total housing need in the remainder of the County.

Whilst it may be correct that 8.0% of existing dwellings were unoccupied on census night 2011, this does not mean that they are not occupied on other nights or there may be legitimate reasons for non-occupation – second homes, for instance. The reason for this discrepancy does not appear to have been explored and it cannot simply be assumed that the same percentage will be carried forward into the future. It may be that some of the houses were unfit, but new houses would all be fit to live in and so the percentage might be different.

---

It is suggested that a 10% flexibility allowance may not be sufficiently generous, particularly in an area that does not attract major housebuilders wishing to build out sites as quickly as possible. The flexibility allowance should be tested against past trends to see if it is appropriate in achieving overall targets.

To achieve the target provision a significantly higher level of housing may need to be allocated, reliance on windfall development is a risky strategy that might or might not deliver the appropriate amount of development. The Plan should be based on certainty, or measures that will take the risk element out of the equation.

Council Response:

0

---

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: The figures for the provision of housing should be more carefully examined and explained, and positive policies aimed at ensuring that the required levels of housing are produced should be adopted, rather than policies that simply try to allocate sites without corresponding certainty of delivery.

Further sites should be allocated, having regard to the function of the various settlements and their ability to produce additional housing.

Elsewhere it has been argued that development in certain small villages might assist the sustainability of larger villages. In this submission the case of Berriew and Refail is spotlighted. These villages very much work together, albeit they are recognisable as separate entities. Nevertheless they are separated by the draft plan into different categories of settlement, one being classified as a large village (Berriew) though there is no additional specified new allocation for housing, and the other (Refail) a small village, where development is to be restricted.

Given the proximity of these villages to each other and to the main road network in the County, it would be appropriate to regard them as a sustainable community, and seek to guide further development towards them.

Council Response:

Issue: 2015: Deposit Draft-02. Housing - Distribution and Numbers

*Question Representation Texts*

**Question: Council Response**

Representation Texts: Thank you for your comments. The Council does not agree that the LDP housing land target should be increased or that additional housing land allocations are required. The Council has found it necessary to revisit the housing growth figures following representations made on the Deposit Plan including the Welsh Government's (WG) fundamental concerns over deliverability and viability. The WG considers the Deposit Plan has a challenging target taking into account historical annual completions and in particular the low number of housing completions in the last few years which impact on and significantly increase the required build rates over the remaining Plan period. The WG is asking the Council to set a housing target which is at foremost deliverable and ensures that a 5 year housing supply can be met in line with the requirements of TAN1. It is apparent that the annual build requirement over the plan period must be set at a level which is considered deliverable and not unrealistically high. The Council is proposing that the housing land target is reduced, to be effected through a Focussed Change. The evidence for the revised housing land target is fully set out in the revised Housing Topic Paper (Dec 2015). Relevant parts of the Plan have been amended accordingly (again through proposed Focussed Changes) to align with the new housing data. This includes an update of the settlement allocations table in Appendix 1 which has been revised as a result of i) further work on deliverability ii) the consideration of site allocation representations received in response to the Deposit Plan and iii) to reflect new planning history as at the revised base date for planning permission information (1 April 2015). Taking account of the proposed Focussed Changes, the Council considers that the proposed growth and spatial strategy is sound, based on a robust methodology with levels of growth and site allocations supported by a wide range of supporting evidence. As regards the phasing of sites, the delivery trajectory is not intended to artificially restrict development, it is a tool to provide information on how the Plan will meet the requirement of a 5 year supply and will not be applied rigidly. The Council would not wish to stymie suitable development coming forward.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: Overall / Plan-Wide Housing Land Supply (@ 34.14)

Housing Requirement

With regards to the supply of housing land across the Authority over the plan period, it is noted that the Local Authority has updated its housing requirement in the Deposit LDP to be based on the Welsh Government's local authority level 2011-based Household Projections. For Powys, this shows a projected growth of 4,600 households over the plan period (2011-2026), from 58,429 to 62,964 in 2026. Having deducted the 17.74% of households living in the BBNP and accounting for an 8% conversion rate (based on vacancy rates), this gives a starting point of 4,087 dwellings. Taking into account various factors, including the need to plan for a higher level of housing growth, the LDP includes a forecasted dwelling requirement of 5,519 dwellings (368 p.a.). An additional 10% contingency means that the plan makes provision for 6,071 dwellings, which is equivalent to 405 dwellings p.a.

Household Formation

It is acknowledged in the Deposit LDP that the average household size in Powys is projected to decrease from 2.24 persons per household in 2011 to 2.13 persons per household over the period to 2026. Bearing this in mind, we would make the case that the proposed housing supply fails to fully account for the increase in levels of single person

Source: Email		Type: Objection		Mode	Oral (Examination)	Status Maintained

households projected over the Plan period, which is projected to account for 34% of all households by 2026 (with one- and two-person households accounting for 74% of all households). Although the 2011 Census found that the number of households had not grown as fast as previously believed (resulting in a perceived reduced requirement for new housing by 2026), we would argue that the combination of an ageing population, an increased supply of housing and economic upturn enabling more young people to live alone/in smaller households, will result in increased household formation over the plan period. Accordingly, the resulting proposed level of housing supply is considered to be too low.

Leading on from this, it is not considered that the Deposit Plan housing projections adequately consider the impacts of any latent demand for housing, which has been temporarily suppressed during the recent economic downturn and recession. It is considered that a more stable economic situation which is now beginning to emerge will result in a future increase in housing requirements and housing growth, as those who have awaited improvements in the economic situation progress with currently dormant demands for additional / different housing requirements.

Accordingly, lower building rates in recent years will likely reverse and result in significantly higher building rates in the coming years - as house builders aim to 'catch-up' with, and provide for, this latent housing demand across the Authority. In any event the Plan period (which extends to 2026) needs to factor in patterns of demand over a considerable period, and should not just be based on the short term historic situation (which is universally accepted as being unprecedented).

Likewise, it should be noted that Powys County Council's most recent Joint Housing Land Availability Assessment (February 2015) shows that the Council could only demonstrate a 1.5 year housing supply on 1st April 2014, and confirms that the Authority has not maintained a five year land supply since 2011. The low levels of supply, in conjunction with the recent economic downturn, has therefore further limited and subdued development rates across the County – this was particularly evident in 2011/12 when the number of completions fell to just 98. It is also noted that the Land Supply Assessment table included in the Council's 'Housing and Delivery of New Housing' Topic Paper (2015) shows an expected 4.1 year supply in 2014, as opposed to 1.5 years. This Topic Paper, which provides background information to the Deposit LDP, does not therefore accurately represent the current housing land supplyposition and it is as such considered that it is also likely to be inaccurate in terms of calculating the supply going forwards over the plan period.

Furthermore, it is considered that the LDP fails to provide for a pro-growth strategy, as advocated by Carl Sargeant, Minister for Housing and Regeneration in his recent written statement – 'Stimulating Home Building in Wales.' This confirms that the Welsh Government's main priority is to build homes. It is not considered that the housing provision proposed within the Deposit LDP would be consistent with these objectives, as it does not encourage or give priority to housing growth, but may in effect subdue it over the plan period.

Reliance on Windfall Sites

It is noted that around 17% of Powys's dwelling supply is planned to be delivered through windfall sites. This relates to 1,008 dwellings and equates to approximately 84 dwellings per annum over the remaining 12 years of the plan period.

It is not considered sound that such a high percentage of the total housing supply relies on windfall sites coming forward for development. Such a situation is likely to result in an under provision in the total dwelling supply and will restrict the ability of the LDP to provide for the housing needs of the local population over the plan period. It is considered that only through specific and well considered/evidenced allocations can delivery accurately and robustly be achieved. Accordingly, the provision for windfall and small sites within the total dwelling supply should be reduced, with a consequential identification and allocation of further suitable and deliverable sites for residential development.

Phased Housing Land Supply

In terms of the phased housing land supply proposed within the Deposit LDP, a number of issues are raised with the proposals. These relate to both the phasing itself, and the sites allocated within the phasing periods – these concerns are discussed further below.

The need for the phasing of housing sites over the LDP period is questioned, as it is considered that this artificially 'splits' up the housing land supply across the Plan, and will give developers and landowners uncertainty as to when they are 'permitted' to progress with an otherwise allocated site. The proposed phasing of sites therefore unduly restricts

---

an already constricted housing market and one which is in need of immediate and short-term intervention.

Furthermore, it is considered that the phasing will reduce the ability of the Plan to be flexible when sites allocated within early phases do not come forward at the 'correct' time, when other allocated sites provided later within the plan period (and which have been assessed as being suitable for development) are able to be brought forward more quickly. This will further artificially and unduly restrict the ability of the Plan to provide for the housing needs of the Authority within a timely manner.

It is acknowledged that the 'Housing and Delivery of New Housing' Topic Paper (2015) accepts that to ensure that the shortfall during the early years of the LDP is addressed, build rates will at some point need to surpass the average annual build requirement of 368 new housing units. Nevertheless, the Council does not expect annual build rates to peak until the middle part of the plan, in years 2020 to 2021, and only anticipates a 5.1 year housing supply in 2015. The 'performance' of the Plan in providing for housing growth, and ensuring an adequate supply of housing land, is therefore highly risky and prone to failure.

Notwithstanding our comments above, it is considered that the highest number of dwelling units should be encouraged to be delivered within the initial period of the remaining plan period. This will allow for greater flexibility in the early part of the Plan, and will give the opportunity for greater numbers of sites to come forward over this initial period. This is particularly important considering that the Council has not managed to maintain a housing land supply since the beginning of the plan period, and moreover given the immediate and pressing need to address the current acute shortage and the need to respond to the market

Summary

To summarise, it is our view that the Plan does not sufficiently take account of the projected decrease in household size and the related steady rise in single households up to 2026. In addition, it is argued that the Plan does not provide for latent demand, which has been temporarily suppressed during the recent economic downturn and recession, as demonstrated by the council's lack of 5 year supply over the past few years. It therefore fails to meet the Welsh Government's demands for a pro-growth strategy.

Moreover, the Plan's reliance on windfall sites is likely to result in an under-provision in the total dwelling supply and will restrict the ability of the LDP to provide for the housing needs of the local population over the plan period. This makes the case for the allocation of further and additional new sites in a range and choice of locations and which are deliverable.

Furthermore, it is considered that there should be greater flexibility and provision in the early part of the Plan, to give the opportunity for greater numbers of sites to come forward over this initial period. Accordingly, it is our view that the proposed phasing arrangements should be removed from the plan, to ensure that sites are able to come forward in a timely manner in response to market demands.

Council Response: 0

Question Representation Texts

**Question: Council Response**

Representation Texts: Thank you for your comments. The Council does not agree that the LDP housing land target should be increased to 6,600 dwellings or more or that additional housing land allocations are required. The Council has found it necessary to revisit the housing growth figures following representations made on the Deposit Plan including the Welsh Government's (WG) fundamental concerns over deliverability and viability. The WG considers the Deposit Plan has a challenging target taking into account historical annual completions and in particular the low number of housing completions in the last few years which impact on and significantly increase the required build rates over the remaining Plan period. The WG is asking the Council to set a housing target which is at foremost deliverable and ensures that a 5 year housing supply can be met in line with the requirements of TAN1. It is apparent that the annual build requirement over the plan period must be set at a level which is considered deliverable and not unrealistically high. The Council is proposing that the housing land target is reduced, to be effected through a Focussed Change. Please note that the evidence for the revised housing land target is fully set out in the revised Housing Topic Paper (Dec 2015). Relevant parts of the Plan have been amended accordingly (again through proposed Focussed Changes) to align with the new housing data. This includes an update of the settlement allocations table in Appendix 1 which has been revised as a result of i) further work on deliverability ii) the consideration of site allocation representations received in response to the Deposit Plan and iii) to reflect new planning history as at the revised base date for planning permission information (1 April 2015). Taking account of the proposed Focussed Changes, the Council considers that the proposed growth and spatial strategy is sound, based on a robust methodology with levels of growth and site allocations supported by a wide range of supporting evidence.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: There are major concerns regarding the soundness of the housing land requirements in the Deposit LDP Strategy and is objected to on the grounds highlighted in the accompanying Submission Document. .

The LDP Housing Requirement 2011 – 2026 of 6,071 dwellings to deliver a dwelling requirement of 5,519 is objected to. Whilst it is acknowledged that this represents an increase in provision from the previous 2014 Deposit Plan, which stood at 5,000, it is considered that the figure continues to constitute under-provision. In this context the objection is justified by an analysis of the detailed reasons given for the current dwelling requirement in the Topic Paper : Population and Housing (See accompanying Submission Document)

Council Response: 0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: A minimum requirement of 6,000 dwellings, allowing for a build rate of 400 units a year, should be applied, with an additional 10% flexibility allowance. As a consequence specific housing land allocations for an additional 1,000 dwellings, which should include the site being promoted, are necessary.

**Question: 3d. (i)**      **Representation Details**

Representation Texts: Over the Plan period (2011-2026), Policy H1 seeks to maintain a 5 year supply of land for housing and purports to provide land for 6,071 dwellings to meet the dwelling requirement of 5,519 additional dwellings.

This provision equates to an average completion rate of 368 dwellings per annum. This is well below the average annual completion rate of 423 dwellings per annum achieved in Powys in more buoyant years between 2004/5 and 2006/7, according to the 'Welsh Housing Statistics' and the UDP required annual completions rate of 410 dpa.

This level of house building is unlikely to support sustainable economic growth, while also accommodating a growth in households accompanied by a decline in household size. There is insufficient evidence to justify the proposed level of growth and consequently insufficient headroom to be able to respond to upturns in the market and achieve the desired sustainable economic growth, and what the house building industry could deliver in the future. The proposed level is significantly below the (circa) 7,700 dwellings for PCC as the recommended growth option set out in the Sustainability Appraisal Report: Powys Local Development Plan, April 2015 (Appendix 2 - Consideration of Growth Options and Alternatives at Preferred Strategy). This was considered the option that would "provide enough scope to provide a range of housing types, sizes & tenures which reflect housing needs until 2026". The proposed housing requirement does not seek to address the factors that PCC says are important when setting a housing requirement, including: the need to increase levels of net migration; the retention of young out-migrants; and the need to deliver affordable housing.

The Minister for Housing and Regeneration has made it clear to Local Planning Authorities that it may not be wise to plan for a future on the basis of evidence from a period of economic downturn, as appears to be the case with PCC's proposal to meet a dwelling requirement of 5,519 dwellings over the period 2011-2026. (Ref: PPW paragraphs 9.2.2 and 9.2.1.)

Source: Email			Type: Objection		Mode	Written
				Status		Maintained

Certainly, the 2011 principal projection uses a five year migration, which has been calculated over a period of economic recession which could have reduced in-migration for that period. Moreover, the recession itself will have reduced the expressed demand for housing over that period due to affordability and limited mortgage liquidity.

In February 2014 a new set of household projections for Wales, based on 2011 census, were published by the Welsh Government's Knowledge and Analytical Service. The assumptions underlying these projections are based on past trends, which have been significantly affected by recent past economic conditions resulting from the global economic downturn. As a consequence they may give rise to lower household projections and higher household sizes than in previous projections. It is therefore important that this is borne in mind when using the projections for planning.

Planning Policy Wales (PPW) sets out the Welsh Government's planning policy on how the projections should be used when planning for new homes. It states that the latest Welsh Government local authority level household projections should form the starting point for assessing housing requirements. However, PPW is clear that local planning authorities should consider the appropriateness of the projections for their area, based on all sources of local evidence and it is not prudent for plans to replicate a period of exceptionally poor economic performance.

Moreover, partly as a consequence of the above and partly as consequence of a lack of further evidence on deliverability, as set out in the final column against proposed allocations at Appendix1, we do not believe PCC can demonstrate that sufficient land would be genuinely available or will become available and deliverable to provide a 5-year supply of land for housing judged against the general objectives and the scale and location of development that should be provided for in the development plan. This means that sites must be free, or readily freed, from planning, physical and ownership constraints, and economically feasible for development, so as to create and support sustainable communities where people want to live. There must be sufficient sites suitable for the full range of housing types. For land to be regarded as genuinely available it must be a site included in a Joint Housing Land Availability Study (Ref: PPW Housing - Chapter 9 paragraphs 9.2.3).

The Powys County Council Joint Housing Land Availability Study (JHLAS) April 2014 (published February 2015) concludes that there was only 1.5 years supply of housing land in the Powys Local Planning Authority (LPA) area on 01/04/2014

*Question Representation Texts*

**Question: Council Response**

Representation Texts: Thank you for your comments. The Council does not agree that the LDP housing land target should be increased or that additional housing land allocations are required. The Council has found it necessary to revisit the housing growth figures following representations made on the Deposit Plan including the Welsh Government's (WG) fundamental concerns over deliverability and viability. The WG considers the Deposit Plan has a challenging target taking into account historical annual completions and in particular the low number of housing completions in the last few years which impact on and significantly increase the required build rates over the remaining Plan period. The WG is asking the Council to set a housing target which is at foremost deliverable and ensures that a 5 year housing supply can be met in line with the requirements of TAN1. It is apparent that the annual build requirement over the plan period must be set at a level which is considered deliverable and not unrealistically high. The Council is proposing that the housing land target is reduced, to be effected through a Focussed Change. Please note that the evidence for the revised housing land target is fully set out in the revised Housing Topic Paper (Dec 2015). Relevant parts of the Plan have been amended accordingly (again through proposed Focussed Changes) to align with the new housing data. This includes an update of the settlement allocations table in Appendix 1 which has been revised as a result of i) further work on deliverability ii) the consideration of site allocation representations received in response to the Deposit Plan and iii) to reflect new planning history as at the revised base date for planning permission information (1 April 2015). Taking account of the proposed Focussed Changes, the Council considers that the proposed growth and spatial strategy is sound, based on a robust methodology with levels of growth and site allocations supported by a wide range of supporting evidence. Please note that site allocation representations will be responded to separately.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: There are major concerns regarding the soundness of the housing land requirements in the Deposit LDP Strategy and is objected to on the grounds highlighted in the accompanying Submission Document. .

The LDP Housing Requirement 2011 – 2026 of 6,071 dwellings to deliver a dwelling requirement of 5,519 is objected to. Whilst it is acknowledged that this represents an increase in provision from the previous 2014 Deposit Plan, which stood at 5,000, it is considered that the figure continues to constitute under-provision. In this context the objection is justified by an analysis of the detailed reasons given for the current dwelling requirement in the Topic Paper : Population and Housing (See accompanying Submission Document)

Council Response: 0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: A minimum requirement of 6,000 dwellings, allowing for a build rate of 400 units a year, should be applied, with an additional 10% flexibility allowance. As a consequence specific housing land allocations for an additional 1,000 dwellings, which should include the site being promoted, are necessary.

In this context the objection is justified by an analysis of the detailed reasons given for the current dwelling requirement in the Topic Paper : Population and Housing

We generally support the categorisation of settlements, particularly in this case the identification of Newbridge on Wye as one of the 44 large villages identified. In promoting the site in question, we do however, object to the scale of development proposed in Newbridge on Wye. We elaborate on this in our representations on Housing Policies.

Question Representation Texts

**Question: Council Response**

Representation Texts: These comments are noted. The Representor does not raise new issues or evidence which lead the Council to change its conclusions in relation to the Strategy or its Sustainable Settlement Hierarchy. Development in the open countryside away from existing settlements is strictly controlled in line with national policy contained in Planning Policy Wales. Policy H1 section 3. and supporting text at 4.6.2. sets out the circumstances in which development in locations outside of Towns, Large Villages and Small Villages will be determined in accordance with national policy and technical advice notes. No changes are considered necessary to ensure that the Plan is sound.

Council Response:

0

**Question: 3d. (i) Representation Details**

Representation Texts: In my opinion Powys Local Development Plan (LDP) is unsound and should be changed. It is not appropriate. To do well (LDP) policy need to make more simple and make things easier planning process, and ensure that planning system become more democratic. If there is suitable site for dwelling, planning rules must be according to merit. Unfortunately people like me and people of Wales, what we had before us did the complete opposite. Powys planning system should empower people in communities across the Powys, so that people in Powys have more control over their life and their community belongings (sic).

Additional Supporting Documents:

Question Representation Texts

**Question: Council Response**

Representation Texts: Thank you for your comments. The Council does not agree that the LDP housing land target should be increased or that additional housing land allocations are required. The Council has found it necessary to revisit the housing growth figures following representations made on the Deposit Plan including the Welsh Government's (WG) fundamental concerns over deliverability and viability. The WG considers the Deposit Plan has a challenging target taking into account historical annual completions and in particular the low number of housing completions in the last few years which impact on and significantly increase the required build rates over the remaining Plan period. The WG is asking the Council to set a housing target which is at foremost deliverable and ensures that a 5 year housing supply can be met in line with the requirements of TAN1. It is apparent that the annual build requirement over the plan period must be set at a level which is considered deliverable and not unrealistically high. The Council is proposing that the housing land target is reduced, to be effected through a Focussed Change. The evidence for the revised housing land target is fully set out in the revised Housing Topic Paper (Dec 2015). Relevant parts of the Plan have been amended accordingly (again through proposed Focussed Changes) to align with the new housing data. This includes an update of the settlement allocations table in Appendix 1 which has been revised as a result of i) further work on deliverability ii) the consideration of site allocation representations received in response to the Deposit Plan and iii) to reflect new planning history as at the revised base date for planning permission information (1 April 2015). Taking account of the proposed Focussed Changes, the Council considers that the proposed growth and spatial strategy is sound, based on a robust methodology with levels of growth and site allocations supported by a wide range of supporting evidence. As regards the phasing of sites, the delivery trajectory is not intended to artificially restrict development, it is a tool to provide information on how the Plan will meet the requirement of a 5 year supply and will not be applied rigidly. The Council would not wish to stymie suitable development coming forward.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: Consideration of Housing Supply by the Plan

Overall / Plan-Wide Housing Land Supply (® 34.14)

Housing Requirement

With regards to the supply of housing land across the Authority over the plan period, it is noted that the Local Authority has updated its housing requirement in the Deposit LDP to be based on the Welsh Government's local authority level 2011-based Household Projections. For Powys, this shows a projected growth of 4,600 households over the plan period (2011-2026), from 58,429 to 62,964 in 2026. Having deducted the 17.74% of households living in the BBNP and accounting for an 8% conversion rate (based on vacancy rates), this gives a starting point of 4,087 dwellings. Taking into account various factors, including the need to plan for a higher level of housing growth, the LDP includes a forecasted dwelling requirement of 5,519 dwellings (368 p.a.). An additional 10% contingency means that the plan makes provision for 6,071 dwellings, which is equivalent to 405 dwellings p.a.

Household Formation

Source: Email		Type: Objection		Mode	Oral (Examination)	Status Maintained

It is acknowledged in the Deposit LDP that the average household size in Powys is projected to decrease from 2.24 persons per household in 2011 to 2.13 persons per household over the period to 2026. Bearing this in mind, we would make the case that the proposed housing supply fails to fully account for the increase in levels of single person households projected over the Plan period, which is projected to account for 34% of all households by 2026 (with one- and two-person households accounting for 74% of all households). Although the 2011 Census found that the number of households had not grown as fast as previously believed (resulting in a perceived reduced requirement for new housing by 2026), we would argue that the combination of an ageing population, an increased supply of housing and economic upturn enabling more young people to live alone/in smaller households, will result in increased household formation over the plan period. Accordingly, the resulting proposed level of housing supply is considered to be too low.

Leading on from this, it is not considered that the Deposit Plan housing projections adequately consider the impacts of any latent demand for housing, which has been temporarily suppressed during the recent economic downturn and recession. It is considered that a more stable economic situation which is now beginning to emerge will result in a future increase in housing requirements and housing growth, as those who have awaited improvements in the economic situation progress with currently dormant demands for additional / different housing requirements.

Accordingly, lower building rates in recent years will likely reverse and result in significantly higher building rates in the coming years - as house builders aim to 'catch-up' with, and provide for, this latent housing demand across the Authority. In any event the Plan period (which extends to 2026) needs to factor in patterns of demand over a considerable period, and should not just be based on the short term historic situation (which is universally accepted as being unprecedented).

Likewise, it should be noted that Powys County Council's most recent Joint Housing Land Availability Assessment (February 2015) shows that the Council could only demonstrate a 1.5 year housing supply on 1st April 2014, and confirms that the Authority has not maintained a five year land supply since 2011. The low levels of supply, in conjunction with the recent economic downturn, has therefore further limited and subdued development rates across the County – this was particularly evident in 2011/12 when the number of completions fell to just 98. It is also noted that the Land Supply Assessment table included in the Council's 'Housing and Delivery of New Housing' Topic Paper (2015) shows an expected 4.1 year supply in 2014, as opposed to 1.5 years. This Topic Paper, which provides background information to the Deposit LDP, does not therefore accurately represent the current housing land supply position and it is as such considered that it is also likely to be inaccurate in terms of calculating the supply going forwards over the plan period. Furthermore, it is considered that the LDP fails to provide for a pro-growth strategy, as advocated by Carl Sargeant, Minister for Housing and Regeneration in his recent written statement – 'Stimulating Home Building in Wales.' This confirms that the Welsh Government's main priority is to build homes. It is not considered that the housing provision proposed within the Deposit LDP would be consistent with these objectives, as it does not encourage or give priority to housing growth, but may in effect subdue it over the plan period.

Reliance on Windfall Sites

It is noted that around 17% of Powys's dwelling supply is planned to be delivered through windfall sites. This relates to 1,008 dwellings and equates to approximately 84 dwellings per annum over the remaining 12 years of the plan period.

It is not considered sound that such a high percentage of the total housing supply relies on windfall sites coming forward for development. Such a situation is likely to result in an under provision in the total dwelling supply and will restrict the ability of the LDP to provide for the housing needs of the local population over the plan period. It is considered that only through specific and well considered/evidenced allocations can delivery accurately and robustly be achieved. Accordingly, the provision for windfall and small sites within the total dwelling supply should be reduced, with a consequential identification and allocation of further suitable and deliverable sites for residential development.

Phased Housing Land Supply

In terms of the phased housing land supply proposed within the Deposit LDP, a number of issues are raised with the proposals. These relate to both the phasing itself, and the sites allocated within the phasing periods – these concerns are discussed further below.

Rep'n/Para/Policy AccessNo DateLodgd Late? Status Modified Summary

6298.V1/3.3.12/ 17/07/2015  Summary: Housing Growth

Source: Email Type: Objection Mode Oral (Examination) Status Maintained

The need for the phasing of housing sites over the LDP period is questioned, as it is considered that this artificially 'splits' up the housing land supply across the Plan, and will give developers and landowners uncertainty as to when they are 'permitted' to progress with an otherwise allocated site. The proposed phasing of sites therefore unduly restricts an already constricted housing market and one which is in need of immediate and short-term intervention.

Furthermore, it is considered that the phasing will reduce the ability of the Plan to be flexible when sites allocated within early phases do not come forward at the 'correct' time, when other allocated sites provided later within the plan period (and which have been assessed as being suitable for development) are able to be brought forward more quickly. This will further artificially and unduly restrict the ability of the Plan to provide for the housing needs of the Authority within a timely manner.

It is acknowledged that the 'Housing and Delivery of New Housing' Topic Paper (2015) accepts that to ensure that the shortfall during the early years of the LDP is addressed, build rates will at some point need to surpass the average annual build requirement of 368 new housing units. Nevertheless, the Council does not expect annual build rates to peak until the middle part of the plan, in years 2020 to 2021, and only anticipates a 5.1 year housing supply in 2015. The 'performance' of the Plan in providing for housing growth, and ensuring an adequate supply of housing land, is therefore highly risky and prone to failure.

Notwithstanding our comments above, it is considered that the highest number of dwelling units should be encouraged to be delivered within the initial period of the remaining plan period. This will allow for greater flexibility in the early part of the Plan, and will give the opportunity for greater numbers of sites to come forward over this initial period. This is particularly important considering that the Council has not managed to maintain a housing land supply since the beginning of the plan period, and moreover given the immediate and pressing need to address the current acute shortage and the need to respond to the market

Summary

To summarise, it is our view that the Plan does not sufficiently take account of the projected decrease in household size and the related steady rise in single households up to 2026. In addition, it is argued that the Plan does not provide for latent demand, which has been temporarily suppressed during the recent economic downturn and recession, as demonstrated by the council's lack of 5 year supply over the past few years. It therefore fails to meet the Welsh Government's demands for a pro-growth strategy.

Moreover, the Plan's reliance on windfall sites is likely to result in an under-provision in the total dwelling supply and will restrict the ability of the LDP to provide for the housing needs of the local population over the plan period. This makes the case for the allocation of further and additional new sites in a range and choice of locations and which are deliverable.

Furthermore, it is considered that there should be greater flexibility and provision in the early part of the Plan, to give the opportunity for greater numbers of sites to come forward over this initial period. Accordingly, it is our view that the proposed phasing arrangements should be removed from the plan, to ensure that sites are able to come forward in a timely manner in response to market demands.

Representation Texts:	The objection is noted. A new Strategic Policy (SP1) is proposed through a Focussed Change at section 3.5.
Council Response:	

0

**Question: 3d. (i) Representation Details**

Representation Texts:	Spatial Strategy The plan's spatial strategy is set out in section 3 of the LDP and in the LDP Spatial Strategy topic paper. As presented the plan does not clearly express its spatial strategy. There is no policy contained in the plan to ensure that the spatial strategy is delivered. The housing commitments/allocations are based on a hierarchy of settlements and the background work provides evidence to justify the authority's approach. A clear spatial strategy policy in the plan would allow for future monitoring and will ensure that the aims of the LDP are delivered. Without a policy and a clear reference to the strategic split between the hierarchical tiers, there is a risk that the location of new development could undermine the spatial strategy.

Issue: 2015: Deposit Draft-02. Housing - Distribution and Numbers

*Question Representation Texts*

**Question: 3d. (i) Representation Details**

Page 334

Representation Texts: Paragraph 3.4.22 is clear that: "In providing sufficient land to meet future housing and economic needs, and to ensure sustainable development, the LDP apportions more land to higher tier settlements (Towns and Large Villages). In order to facilitate this, a pro-rata apportionment based on household numbers was used.

In the deposit draft version of the plan recommended to the Council at its meeting on 27th May 2014, 10 separate housing allocations at Ystradgynlais were recommended for inclusion with an overall capacity identified at 318 dwellings.

It is our understanding (N.B. the matter was not properly minuted) following a request made at that meeting by one Councillor, that the Council resolved that site P58/HC9 (76 dwellings at Penrhos Farm, Ystradgynlais) be deleted from Inset Map P58E and that the Portfolio Holder for Regeneration and Planning be given delegated authority to deal with site specific issues with local Members, including a replacement allocation. It is also the case that there is no minute which recorded the reason why the site at Penrhos Farm was proposed for removal from Inset Map P58E.

For the record, the way the decision to delete site P58/HC9 from the list of proposed allocations was handled, without as far as we know any proper consideration of the planning merits of the matter, is the subject of a separate ombudsman complaint.

It is our understanding that the main reason why a local Member proposed that the site be removed from the Inset Map was because she was under the impression that the site had been purchased by the current landowners using public funds. We have since provided the Council with documentary evidence that this is absolutely not the case and note that, in any event, this is irrelevant.

It is also clear that since the meeting of the Council on 27th May 2014, Officers have been unable to identify a suitable alternative allocation or allocations in Ystradgynlais to make up the numbers. The settlement is consequently 76 dwellings short in respect of the level of allocation the Council had deemed appropriate to be apportioned to this settlement.

It is also not clear when, where, and how the plans of neighbouring authorities will impact on Powys and how this has been reflected in the preferred strategy and the housing allocations for Ystradgynlais. The proposed limits here in this growth area could have cross boundary implications for Swansea and Neath Portalbot.

Council Response: 0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: Reinstate (as a minimum) Site P58/HA9 Land at Penrhos Farm 76 dwellings at Appendix 1 in order to return the overall allocation at Ystradgynlais (as a minimum) to 318 dwellings, in accordance with the recommendation by officers to the meeting of the Council on 27th May 2014. ENTER WELSH INTO DATABASE BEFORE ENGLISH TRANSLATION."

"A significant amount of research and evidence gathering was undertaken during the preparation of the LDP to consider appropriate housing opportunities for the county and to address local housing need and housing distribution. The Council considers that the distribution of housing across the Settlement Hierarchy is based on a sound rationale which supports the delivery of the LDP strategy and the longer term viability of settlements considered capable of supporting sustainable growth. The categorisation of settlements (including Llanbryn-mair and Pontrobert) was not only linked to the number of services in each of these communities but also included matters of judgement based on planning and sustainability reasons. The Council propose to amend its policy approach to Welsh Language and Culture to better address issues raised in the representation and to ensure its policy approach is consistent with National Policy. This policy approach better recognises the linguistic sensitivity of Welsh speaking communities (including communities such as Llanbryn-mair and Pontrobert) and includes policy that seeks to mitigate against the impact of large housing developments within these areas. See Focused Changes for details. Welsh Language and Culture in Powys and how to plan for its protection and enhancement is considered in detail in the Welsh Language and Culture Topic Paper. The Sustainability Appraisal of the plan included an assessment of the likely significant effects of the plan on the use of Welsh Language in Powys. In accordance with Technical Advice Note 20, the Sustainability Appraisal of the Plan assessed the impact of the spatial strategy, policies and allocations on the Welsh Language and was found to have an overall positive impact. In conjunction with the Sustainability Appraisal of the plan a Welsh Language Impact Assessment was also undertaken. This assessment forms part of the Sustainability Appraisal and was undertaken to help understand the likely impacts of new housing development on Welsh speaking communities including impacts on the character and linguistic balance of a community associated with new housing development. The assessment concluded that should a development proposal be likely to affect a local concentration of Welsh speakers then this would need to be assessed and if necessary mitigated using methods identified in the assessment."

Status Maintained

"Where a settlement has been unable to accommodate its pro-rata level of development, the LDP has sought to re-allocate the shortfall elsewhere to ensure that the total requirements for the plan period are met. In the first instance, the LDP has sought to allocate the shortfall to nearby settlements categorised as Towns or Large Villages"

· Mae gweithredu fel hyn yn mynd yn hollol groes i'r egwyddorion honedig o fewn y cynllun sef "to support and protect the Welsh language".

Please find attached my response to the new Local Development Plan. I would like to note that it is a response to the whole document with references to specific developments e.g. in Llanbryn-mair etc. I would also like to note my wish to take part in any public inquiry that is conducted in the future unless due consideration is given to these matters prior to this.

**B. ALLOCATION OF HOUSING**

Another aspect which causes concern is the allocation of housing. Once again, this aspect ignores what has already been stated in another part of the document, namely the importance of the Welsh language in parts of the county. Llanbryn-mair is identified as a large village, although Cem-maes Road, Llangadfan and Llanerfyl are identified as small villages. In fact, there are an equal number of services in each of these communities, and this very superficial method ignores the reality of the situation, namely that villages like Cem-maes Road or Llangadfan serve a much larger geographical area, and that social networks in such an area are extremely important.

In the same way, you can hardly claim that Pont-robert is a large village. Therefore Llanbryn-mair and Pont-robert should be moved from the large village category to that of small villages.

And in the same way, the confined boundary around Llanbryn-mair should be eliminated in order to change the emphasis from developing an estate of unnecessary houses to one which would truly represent local needs, and one where individual houses could be built as and when needed in the future. The pattern of placing a confined boundary around rural villages changes the whole nature of a community from a rural to an urban one.

Other concerns in relation to the intention to develop the Bryn-coch site in Llanbryn-mair are as follows:

· No research has been done and no data collected on the evidence of need in the area.

Source: Email Type: Objection Mode Written Status Maintained

---

- The fact that there has been permission to build 5 dwellings there for ten years and no-one wants to build has not been taken into account.
- The results of the 2011 Census have not been taken into account, showing a reduction of 5% in the number of Welsh speakers, and the social change.
- One of Powys County Council's officers has told me personally that the figure of another 17 houses here is incorrect and that it is actually 14 more that it should be for the community.
- There are misgivings that what has actually happened is as noted in clause 3.4.25 of the Development Plan, namely;
 

“Where a settlement has been unable to accommodate its pro-rata level of development, the LDP has sought to re-allocate the shortfall elsewhere to ensure that the total requirements for the plan period are met. In the first instance, the LDP has sought to allocate the shortfall to nearby settlements categorised as Towns or Large Villages”
- Acting in this manner goes completely against the supposed principles within the plan: “to support and protect the Welsh language”.

Policy: H1 Issue: 2015: Deposit Draft-01. Preparation, Process and Plan Strategy

*Question Representation Texts*

**Question: Council Response**

Representation Texts: Thank you for your comments. The Council considers that the proposed Settlement Strategy and sustainable Settlement Hierarchy is sound, based on a robust methodology with levels of growth and site allocations supported by a wide range of supporting evidence. The Council maintains that the tiers of settlements identified accurately reflect their role, function and overall level of sustainability and that the distribution of housing across the Settlement Hierarchy is based on a sound rationale which supports the delivery of the LDP strategy and the longer term viability of settlements considered capable of supporting sustainable growth. The Council is in favour of Village (Action) Plans so as to enable further community involvement on how Small Villages may develop - the emphasis is on the suitability of infill sites (as extensions to Small Villages are an exception for affordable homes only). The Council does not agree that land allocations should be made in the lower tier settlements (Small Villages and Rural Settlements). Due to the nature of rural settlements, the LDP does not support new open market housing, instead the Strategy directs these to higher tier settlements. New affordable dwellings are only supported in rural settlements where justified and any dwellings in the open countryside must accord with national policy. The housing growth figures in the Plan are supported by evidence set out in the Housing Topic paper, this work has included an analysis of planning permissions in the lower tier settlements and informed the presumptions as to the growth expected over the LDP period. The contingency/flexibility allowance is in place to balance uncertainty and furthermore the LDP monitoring and review process will be used to ensure that the Plan is meeting its overall aims and objectives. The Representor does not raise new issues or evidence which lead the Council to change its conclusions in relation to the Strategy and no changes are considered necessary to ensure that the Plan is sound. However, please be aware that the Housing Topic paper has been updated since Deposit and further work has been undertaken on deliverability - this evidence has informed proposed focussed changes to the Housing chapter of the Deposit Plan. Please refer to the Focussed Changes document.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: Firstly, the National Park Authority would like to congratulate the Powys LDP team for the efforts made to address the significant concerns raised against the first Deposit LDP (2014). It is acknowledged that the level of work undertaken to achieve the revised Deposit is substantial and the team is to be congratulated. We are extremely encouraged to see the progress being made by yourselves to move towards an adopted plan and the certainty this will bring in relation to the future development in Powys. Undoubtedly this will be of benefit to the region and can only be supported by the NPA. Notwithstanding the above, we would like to draw your attention to the following issues we have identified with the deposit draft LDP (2015) and its compliance with National Planning Policy.

We raise these concerns from our recent experiences of the Examination process and we hope what follows will benefit you in the production of a sound LDP. These are not objections per se, but we urge you address the points in your lead up to submission in the interests of soundness.

Please note that these are officer comments, which will be put before Members at the next available opportunity. Therefore they may be subject to amendment following NPA

recommendation. We will advise you of any change accordingly.

1. Settlement Strategy and distribution of housing provision.

The NPA notes the contents of the Settlement Strategy set out at 3.4 of the LDP and support the proposal to deliver the majority of housing within the Towns. We also support the acknowledgement that smaller settlements require some development to meet community needs, however we have concerns that the plan fails to provide enough certainty to achieve the delivery aspirations and meet community needs. From our understanding of the settlement strategy you aim to deliver 21% of your housing need within Small villages, Rural Settlements and 'Other' which is presumed includes an element of open countryside (as set out 6.12 of the LDP Strategy Topic Paper).

The plan does not allocate any land within these tiers, and as such one fifth of your housing need is to be delivered through windfall. Which, based on pasts completion rates, seems overly ambitious. Especially given the following two considerations:-

a. Larger infill sites within Rural Settlements will be reliant on community agreement though development of a village plan.

b. Rural Settlements will only bring forward affordable, rather than market housing.

In relation to point (a) above, The aspiration to utilise community planning within 'Small Settlements' is something we support, being very similar to our own aims within the National Park. However, from our experiences to date, the development of such plans is a lengthy process which involves significant resources. We would suggest it is more appropriate for the Council to work to allocate such sites in concert with the community prior to submission so they can rightfully contribute towards the defined housing need and provide certainty to these communities moving forward. Secondly, addressing point (b) much has been made in your supporting statement in relation to how the LDP housing provision provides for a similar level of growth as was seen in completions pre-recession. However we would urge caution at projecting figures from one policy framework to another.

This LDP proposes only enabling a Affordable Housing within such locations, which may not be as desirable to a developer than less restricted forms of development enabled under previous policy regimes, especially in the North of the county where you are experiencing negative residual land values for residential development. As such the 16% that will be delivered here cannot be guaranteed, and we urge caution in relying upon this in your housing figures.

*Question*      *Representation Texts*

**Question:**      **Council Response**

Representation Texts: Thank you for your comments. The Council does not agree that the growth or spatial strategy is unsound. The Sustainable Settlement Hierarchy was established at the Preferred Strategy stage followed by the subsequent pro-rata apportionment of growth so as to ensure that development was directed only to the locations suitable to receive it. Decison making has taken account of settlement infrastructure and environmental constraints and settlements and sites have been subject to SA/SEA. Officers have exercised a degree of professional judgement in land allocations based on settlement and site evidence and stakeholder feedback. The policy in Small Villages is flexible and follows guidance in TAN 6 Planning for Sustainable Rural Communities (July 2010) which recognises that in rural areas settlement boundaries can limit the provision of housing to meet local needs, advising at paragraph 2.26 that: "In smaller settlements, planning authorities should consider including criteria based policy against which planning applications can be assessed, rather than identifying settlement boundaries".

The Council does not agree that Refail should be re-classified to become part of the Large Village tier with Berriew. The criteria based approach to development in Small Villages provides flexibility for suitable development to come forward. Please be advised that the LDP Appendix 1 (settlement allocations table) is being revised through Focussed Changes as a result of i) further work on deliverability ii) the consideration of site allocation representations received in response to the Deposit Plan and iii) to reflect new planning history as at the revised base date for planning permission information (1 April 2015). Taking account of the proposed Focussed Changes, the Council considers that the proposed growth and spatial strategy is sound, based on a robust methodology with levels of growth and site allocations supported by a wide range of supporting evidence.

Council Response: 0

**Question: 3d. (i)**      **Representation Details**

Representation Texts: The settlement hierarchy is insufficiently sensitive to actual relationships that exist between nearby settlements. Categorisation in the fashion suggested is too rigid to take into account interdependencies, and does not recognise the manner in which some settlements function in support of, or to provide services for, others. These relationships are an important element in the creation of sustainable rural community networks. Berriew and Refail operate very much in tandem, depending upon each other for certain services and facilities and for support for their services. The two settlements should be regarded as a single entity when considering expansion in allocation plans. This is not to say that development must be allowed to stretch between the two villages, but there should be recognition that they do not operate as separate and discrete entities. Development in one will support services in the other, and it may be, in other situations that allowing development in the smaller of two or more dependent settlements would sustain the group services, and maintain an important character or feature in a larger settlement. The hierarchy established in the paragraphs quoted is too blunt a tool to foster sensible sustainable patterns

Council Response: 0

**Question: 3d. (ii)**      **Desired changes to Document**

Representation Texts: The paragraphs quoted need to be revised to accept the possibility that sustainable development might be best achieved through considering interdependencies between settlements, and looking at certain groupings to see where development could best be placed – which might not be entirely in line with the categorisation as it exists at present.

<b>1938.V3/3.4.4/</b>		17/07/2015	<input type="checkbox"/>			Summary: Powys Sustainable Settlement Hierarchy
Source: Email		Type: Objection		Mode	Oral (Examination)	Status Maintained

---

Certainly in the case of Refail and Berriew there is a dependence which should be nurtured to foster a sustainable arrangement without accepting that one or other of the settlements may grow while the other may not, irrespective of the affect on character and function of the settlements.

Systems that operate between settlements, particularly in rural areas are often complex, but are the essence of rural ways of life and supporting communities. This needs to be recognised in the text of the reference points concerned. Officer note - this rep form quoted three Refpoints - 34.18, 34.20 and 34.21.

Council Response: 0

---

**Question: 4b Reason For Request To Speak At Hearing And Subject**

Representation Texts: Housing figures and the ability of plans to produce appropriate levels of housing require detailed examination and discussion. Not all larger villages will be suitable to accept new housing developments while smaller villages that support particular large villages might be better placed to accept development. These relationships need to be developed and identified through discussion.

Council Response:

0

**Question: 3d. (i) Representation Details**

Representation Texts: 4) ALTERNATIVE SITES.

It is accepted that a degree of housing development is required throughout the county, but this should be directed to the appropriate areas.

Llanfyllin town, which is less 4 miles away, is an important regional centre for north east Powys. Rather than re-designate Llanfechain as a 'large village', development should be concentrated in Llanfyllin. There has been no significant housing development in the town since the 1950's.

If the 11% rule is applied here, then this would mean identifying sites for between 200 and 300 new dwellings.

It is significant that a new sewage works has recently been constructed in Llanfyllin.

Document:Draft Deposit Written Statement 2015, p.25, para.3.4.11

Issue: 2015: Deposit Draft-03. Housing - Delivery and Infrastructure

*Question Representation Texts*

**Question: Council Response**

Representation Texts: In response to the concern raised regarding lack of car parking of the village, this is noted. However, it is also noted that the Representor requests measures to be incorporated into existing developments to alleviate existing problems. AI;l development proposals are expected to meet parking standards in accordance with the LDP's development management policies. Further guidance is also provided by PPW, TAN18: Transport, the Wales Parking Standards 2008, the Council's Design Guide for Industrial and Residential Infrastructure, Manual for Streets and Manual for Streets II. Such standards would generally expect sufficient on-site parking provision to serve the proposed development. Whilst it may not be possible to directly address pre-existing parking problems within proposed developments, ensuring adequate parking is provided to serve proposed development should mean that parking problems are not exacerbated. In addition, the LDP policy T1 - Transport Infrastructure is supportive of transport infrastructure such as car parks should an acceptable site come forward at some point during the LDP period. As a result of this representation, no changes are considered necessary to the LDP.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: Infrastructure – Car parking. As this Council pointed out when commenting on the first draft of the LDP in Apr 2013, the lack of car parking is becoming an increasing issue in the village. Any new build should be asked to incorporate measures designed to alleviate the problem.

Council Response: 0

Question Representation Texts

**Question: Council Response**

Representation Texts: The Council considers that the proposed settlement hierarchy is sound, based on a robust methodology with levels of growth and site allocations supported by a wide range of supporting evidence. The Council maintains that the tiers of settlements identified accurately reflect their role, function and overall level of sustainability. The Council consider that the distribution of housing across the Settlement Hierarchy is based on a sound rationale which supports the delivery of the LDP strategy and the longer term viability of settlements considered capable of supporting sustainable growth.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: When asked to comment on the LDP Strategy Llanfechain Community Council represented against being designated a 'Large Village' arguing that the title did not reflect the character of the village; this sentiment was strongly felt.

Moreover, the facilities the community enjoys and on which the designation of being a 'Large Village' were partly based are 'fragile'; the shop and Hall are dependent on voluntary assistance and some local/PCC funding; and if it were not for substantial investment by a concerned local benefactor the Pub would probably have been lost. That there is limited local employment, poor public transport and limited road infrastructure further suggests we should not be subject to any substantial development.

We would also note that being bounded in the north by a river and its flood plain and to the south the parallel B4393, and having the local sewage works (whose capacity has been questioned) in close proximity, the possibility for substantial development is constrained. So we would ask that you consider re-designating this village a 'Small Village'.

Council Response: 0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: Based on the points made above, we would ask that you consider re-designating this village (Llanfechain) as a 'Small Village'.

Council Response:

0

**Question: 3d. (i) Representation Details**

Representation Texts: 3) VILLAGE STATUS  
The suggestion that the village be re-classified as a 'large village' cannot be justified.

We already have a large village, Llansantffraid, which is less than 2 miles away. This has developed naturally and has a thriving business and commercial hub, together with the appropriate support services.

The simple criteria, which is now being applied to define a large village, would make the vast majority of villages in Powys fall within the definition of "Large Village".

One would assume that a logical planning policy would provide one large village servicing a number of smaller villages within the immediate vicinity.

To try and artificially create a second large village, so close to an already large village, is to say, at the least, illogical.

In the longer term the existence of two large villages will create a demand for a duplication of services, which will lead to additional costs for the local authority.

...

5) INADEQUATE SEWAGE SYSTEM

The Uanfechain sewage works and infrastructure was constructed over 50 years ago and to serve a much smaller village. In the intervening years the number of dwellings has probably doubled. The modern family lifestyle also means a much greater water usage for the individual householder. There is obviously potential for over-load of the sewage treatment plant, at peak times, which could lead to environmental pollution, or sewage "backing-up" within the system.

If the village is re-classified as a "large village" this will trigger additional "Windfall developments" which would create a greater load on the plant.

The Severn Trent Water Authority should be lobbied to upgrade / re-construct the works. This should be a comprehensive civil engineering project to include new trunk sewers to

serve not only the new areas, but also to existing dwellings, not on the mains system. This should be undertaken before any further housing development areas are scheduled.

It would be criminally irresponsible of the Authority to schedule any further large scale housing whilst knowing that there is a major and increasing risk of environmental pollution.

...

It is understood that the community council did not object to the re-designation of the village status. We believe this decision to be unsafe and not representative of village opinion and If this matter is eventually taken to the ombudsman we will contest this.

Question Representation Texts

**Question: Council Response**

Representation Texts: The Council disagree with the change requested by the Representor for Cilmerly to be re-classified as a Large Village. The Representor does not raise new issues or evidence which lead the Council to change its conclusions in relation to the Strategy or its choice of settlements designated as Small Villages and Rural Settlements. Reference is made to supporting additional housing particularly adjoining Morgannwg. Land adjacent to Morgannwg was put forward as a candidate site (site reference 86), however the land has not been allocated as it is a small Housing Site (less than 0.25 ha) and therefore does not require an LDP Allocation as the acceptability of developing the site can be determined through the planning application process judging the proposal against the policy/criteria found in the adopted development plan.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: Cilmerly should be considered as a "large village" and support additional housing development on suitable sites, particularly that adjacent to Morgannwg.

Question Representation Texts

**Question: Council Response**

Representation Texts: "The Council disagree with the proposed changes requested by the Representor. The Representor does not raise new issues or evidence which lead the Local Planning Authority to change its conclusions with regard to the designation of Boughrood and Llywen within the settlement hierarchy. The Council considers that the proposed settlement hierarchy is sound, based on a robust methodology with levels of growth and site allocations supported by a wide range of supporting evidence including access to services. The Council maintains that the tiers of settlements identified accurately reflect their role, function and overall level of sustainability. The Council consider that the distribution of housing across the Settlement Hierarchy is based on a sound rationale which supports the delivery of the LDP strategy and the longer term viability of settlements considered capable of supporting sustainable growth."

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: It needs to be noted here that within the LDP there is a mistake that must be rectified. The Council have grouped Llyswen and Boughrood together as one village, this is incorrect they are two separate villages and are managed by two separate Community Councils. What is the reason for this? By grouping the two together makes it look like one big village and therefore justification could be given to the council for inclusion of such a big site. This is incorrect and must be changed.

Council Response: 0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: Separate Llyswen as a Small Village on its own

Council Response: 0

Question Representation Texts

**Question: Council Response**

Representation Texts: "The Council disagree with the proposed changes requested by the Representor. The Representor does not raise new issues or evidence which lead the Local Planning Authority to change its conclusions with regard to the designation of Boughrood and Llywen within the settlement hierarchy. The Council considers that the proposed settlement hierarchy is sound, based on a robust methodology with levels of growth and site allocations supported by a wide range of supporting evidence including access to services. The Council maintains that the tiers of settlements identified accurately reflect their role, function and overall level of sustainability. The Council consider that the distribution of housing across the Settlement Hierarchy is based on a sound rationale which supports the delivery of the LDP strategy and the longer term viability of settlements considered capable of supporting sustainable growth."

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: In the LDP, the villages of Boughrood and Llysven are grouped together as one large village. These two villages are divided by the River Wye and each have their own Community Council and different County Councillors so should have been shown as two villages. By combining them as a large village the allocation of houses is increased which should not be the case.

Council Response: 0

**Question: 3d. (ii) Desired changes to Document**

The Council consider that the distribution of housing across the Settlement Hierarchy is based on a sound rationale which supports the delivery of the LDP strategy and the longer term viability of settlements considered capable of supporting sustainable growth."

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: We are aware that Llyswen and Boughrood are being identified within the Plan as one village. However they are two separate villages with two community councils and should be recognised as such within the LDP. Llyswen is a small rural village and another development within its boundaries would seriously compromise its character.

Council Response: 0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: Separate Llyswen as a Small Village on its own

The Council consider that the distribution of housing across the Settlement Hierarchy is based on a sound rationale which supports the delivery of the LDP strategy and the longer term viability of settlements considered capable of supporting sustainable growth."

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: We believe that Llyswen and Boughrood have been wrongly classified as being a single large village. The two should be classed separately as small villages since they have different identities, each having its own Parish Council and a distinct separation point with the bridge over the River Wye. Historically the two villages were in the separate districts/counties of Brecknockshire and Radnorshire.

Council Response: 0

Question Representation Texts

**Question: Council Response**

Page 364

Representation Texts: "The Council disagree with the proposed changes requested by the Representor. The Representor does not raise new issues or evidence which lead the Local Planning Authority to change its conclusions with regard to the designation of Boughrood and Llywen within the settlement hierarchy.The Council considers that the proposed settlement hierarchy is sound, based on a robust methodology with levels of growth and site allocations supported by a wide range of supporting evidence including access to services. The Council maintains that the tiers of settlements identified accurately reflect their role, function and overall level of sustainability. The Council consider that the distribution of housing across the Settlement Hierarchy is based on a sound rationale which supports the delivery of the LDP strategy and the longer term viability of settlements considered capable of supporting sustainable growth."

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: In the LDP you state that Boughrood and Llyswen are one village, this is factually incorrect and as such must be altered. Both are completely separate villages and should not be classed as one. Both villages are managed by two separate Community Councils and as such have different needs. Therefore by amending your details in the LDP and showing Llyswen truly as one village this shows that Llyswen should not be sustaining such a large development proposal.

Council Response: 0

**Question: 3d. (ii) Desired changes to Document**

Question Representation Texts

**Question: Council Response**

Representation Texts: These comments are noted. The Council disagree with the change requested by the Representer for Rhosgoch to be re-classified as a Small Village. The Representer does not raise new issues or evidence which lead the Council to change its conclusions in relation to the Strategy or its choice of settlements designated as Small Villages and Rural Settlements. The LDP does not set out to name rural settlements instead there is a definition included within the policy. The categorisation of settlements was not only linked to the number of facilities but also included matters of judgement based on planning and sustainability reasons. No changes are considered necessary on this matter to ensure that the Plan is sound. On the question of the housing land the Council does not agree that the LDP housing land target should be increased to 6,600 dwellings or more. The Council has found it necessary to revisit the housing growth figures following representations made on the Deposit Plan including the Welsh Government's (WG) fundamental concerns over deliverability and viability. The WG considers the Deposit Plan has a challenging target taking into account historical annual completions and in particular the low number of housing completions in the last few years which impact on and significantly increase the required build rates over the remaining Plan period. The WG is asking the Council to set a housing target which is at foremost deliverable and ensures that a 5 year housing supply can be met in line with the requirements of TAN1. It is apparent that the annual build requirement over the plan period must be set at a level which is considered deliverable and not unrealistically high. The Council is proposing that the housing land target is reduced, to be effected through a Focussed Change. Please note that the evidence for the revised housing land target is fully set out in the revised Housing Topic Paper (Dec 2015). Relevant parts of the Plan have been amended accordingly (again through proposed Focussed Changes) to align with the new housing data. This includes an update of the settlement allocations table in Appendix 1 which has been revised as a result of i) further work on deliverability ii) the consideration of site allocation representations received in response to the Deposit Plan and iii) to reflect new planning history as at the revised base date for planning permission information (1 April 2015).

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: Policy H1 is objected to on the basis of the reduced housing land target. The non-inclusion of the land at the Old Inn, Rhosgoch as a Small Village under the provisions of Policy H1.2 is also objected to. See attached Submission Document for the reasons suggested.

Question Representation Texts

**Question: Council Response**

Representation Texts: These comments are noted. The Representor does not raise new issues or evidence which lead the Council to change its conclusions in relation to the Strategy or its choice of settlements designated as Small Villages and Rural Settlements. No changes are considered necessary to ensure that the Plan is sound. The categorisation of settlements (including Dolau) was not only linked to the number of facilities but also included matters of judgement based on planning and sustainability reasons.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: The Llanfihangel Rhydithon Community consists of four rural settlements, namely, Tanhouse, Kingshead, Llanfihangel Rhydithon & Dolau. However, for many, many years the residents have regarded all four settlements as being part of the village of Dolau. This is recognized by the Powys County Council Highways Department by the fact that drivers entering the area along the A488 from either direction, or approaching along the C1058, meet the village sign DOLAU and not any of the names of the settlements.

Therefore, the Community Council believe that all four Settlements should be grouped together as a small Village with the name Dolau.

The reason for making this request is concerned with housing. As individual Settlements, only limited development to meet affordable housing for local needs would be allowed in any of them but, as a small village, it would be possible for some open market housing as well as affordable housing to be built. Residents believe that this would be advantageous in a number of ways, not least of which would be the possibility of more families coming to live in the Village and adding to the numbers of children in the Primary School.

Council Response: 0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: Group together the four rural settlements (Tanhouse, Kingshead, Llanfihangel Rhydithon & Dolau) and categorise the grouping as a small village with the name Dolau.

Question Representation Texts

**Question: Council Response**

Representation Texts: The Council disagree with the proposed changes requested by the Represor in relation to the need for a development boundary around the Small Village of Llanfihangel-Tal-Y-Llyn. The Represor does not raise new issues or evidence which lead the Local Planning Authority to change its conclusions. TAN 6 Planning for Sustainable Rural Communities (July 2010) recognises that in rural areas settlement boundaries can limit the provision of housing to meet local needs, advising at paragraph 2.26 that: "In smaller settlements, planning authorities should consider including criteria based policy against which planning applications can be assessed, rather than identifying settlement boundaries". One of the key disadvantages of settlement boundaries is that this creates a general presumption that residential development within a settlement boundary is acceptable. In Powys's smaller settlements this is particularly problematic as it places an undue pressure on infill development which can impact on a settlement's character. Additionally, this presumption in favour of development artificially increases land values within boundaries compared to those outside of the settlement boundaries and also creates "hope values" on land adjoining settlement boundaries (i.e. land that could be included sometime in a future plan review or as a potential "rounding off" development site). The latter reduces the opportunities for "rural exceptions" affordable housing, and increases the affordability gap in rural settlements as the supply of housing land is restricted. It is considered that this may be one of the key reasons for the limited number of rural exception sites for affordable housing that have been proposed and delivered over the lifetime of the Unitary Development Plan. The approach towards housing provision in small villages is set out in policy H1 point 2 which explains that in Small Villages, housing development will be supported i) on small infill gaps between existing dwellings capable of accommodating 1 or 2 units or in suitable larger infill gaps where identified in a village plan prepared by a community and adopted as SPG, and ii) On sites forming minor logical extensions to small villages for affordable housing in accordance with Policies H5 and H7.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: 34.21 - Small Villages - Llangors Community Council objects to there being no development boundary for Llanfihangel Talyllyn as it creates less control over new building and does not give any reassurance to current residents and a clear statement to potential purchasers, regarding property in the area. This concern has been expressed to the Community council by many residents as previously submitted to Powys County Council as part of the LDP process. It is unacceptable to consider applications on a "policy approach". Past experience appears to show that interpretation of policy varies between planning officers, developers and community members which causes disagreements within small local communities. Neighbouring villages in the BBNPA areas have clear defined boundaries and concern is raised that due to this fact, Llanfihangel Talyllyn will be forced to develop more than its facilities allow. 3.4.16 - if no development boundary is drawn what is the definition of an infill site and an exception site within policy?

Council Response: 0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: For future clarity Llanfihangel Talyllyn needs a development boundary.

Document:Draft Deposit Written Statement 2015, p.26, para.3.4.15

Issue: 2015: Deposit Draft-01. Preparation, Process and Plan Strategy

Question Representation Texts

**Question: Council Response**

Representation Texts: These comments are noted. The Representor does not raise new issues or evidence which lead the Council to change its conclusions in relation to the Strategy or its choice of settlements designated as Small Villages and Rural Settlements. No changes are considered necessary to ensure that the Plan is sound. The categorisation of settlements (including Llanfihangel Rhydithon, Dolau) was not only linked to the number of facilities but also included matters of judgement based on planning and sustainability reasons.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: Test of Soundness CE2 states: The Strategy, policies and allocations are realistic and appropriate having considered the relevant alternatives and/or are founded on a robust and credible evidence base.

Llanfihangel Rhydithon Community encompasses three linked settlements which operate socially, educationally and economically as one community.

The three linked settlements are:

- The area around the Railway Station (19 houses/farms)
- The area around St Michaels Church (15 houses/farms)
- The Tanhouse area (20 houses/farms +5 granted planning permission)

The following facilities and services provide opportunities for the whole community:

The Railway station, St Michael's Church, Tanhouse Chapel, Llanfihangel Rhydithon Primary School, Village Hall and Community Centre and Fronwen Garage.

The separation of the community of Llanfihangel Rhydithon (Dolau) into 2 or 3 separate rural settlements (as in the LDP) is an artificial construction which does not correspond with how the community operate in reality.

The above facilities and the way in which the community operates suggest that Llanfihangel Rhydithon more closely fits the description of a small village rather than that of separate small rural settlements.

Council Response: 0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: Reclassify Llanfihangel Rhydithon (Dolau) as a small village rather than as 2 or 3 discrete rural settlements.

Council Response: 0

*Question Representation Texts*

**Question: Council Response**

Representation Texts: Thank you for your comments. The Council considers that the proposed Settlement Strategy and Sustainable Settlement Hierarchy is sound, based on a robust methodology with levels of growth and site allocations supported by a wide range of supporting evidence. The Council disagree with the proposed changes requested by the Representer in relation to the need for a development boundary around Small Villages or the re-classification of Llanigon. TAN 6 Planning for Sustainable Rural Communities (July 2010) recognises that in rural areas settlement boundaries can limit the provision of housing to meet local needs, advising at paragraph 2.26 that: "In smaller settlements, planning authorities should consider including criteria based policy against which planning applications can be assessed, rather than identifying settlement boundaries". One of the key disadvantages of settlement boundaries is that this creates a general presumption that residential development within a settlement boundary is acceptable. In Powys's smaller settlements this is particularly problematic as it places an undue pressure on infill development which can impact on a settlement's character. Additionally, this presumption in favour of development artificially increases land values within boundaries compared to those outside of the settlement boundaries and also creates "hope values" on land adjoining settlement boundaries (i.e. land that could be included sometime in a future plan review or as a potential "rounding off" development site). The latter reduces the opportunities for "rural exceptions" affordable housing, and increases the affordability gap in rural settlements as the supply of housing land is restricted. It is considered that this may be one of the key reasons for the limited number of rural exception sites for affordable housing that have been proposed and delivered over the lifetime of the Unitary Development Plan. The Council is in favour of Village (Action) Plans so as to enable further community involvement on how Small Villages may develop - with the emphasis on the suitability of infill sites (as extensions to Small Villages are an exception for affordable homes only). The Representer does not raise new issues or evidence which leads the Council to change its conclusions in relation to the Strategy and no changes are considered necessary to ensure that the Plan is sound. However, please be aware that the Housing Topic paper has been updated since Deposit and further work has been undertaken on deliverability - this evidence has informed proposed focussed changes to the Housing chapter of the Deposit Plan. Furthermore in response to the concern over certainty, the Council confirms that the LDP monitoring and review process will be used to ensure that the Plan is meeting its overall aims and objectives.

Council Response:

0

**Question: 3d. (i) Representation Details**

Representation Texts: Spatial Distribution of Housing

The LDP proposes a spatial distribution strategy through which 2,623 dwellings will be delivered through allocations in towns and large villages, and a further 1,008 delivered as windfall.

It is accepted that towns are seen as the principal location for accommodating housing, given their existing provision and range of services, facilities, employment and accessibility.

297 (5%) of the identified requirement is expected to be provided at the identified small villages, through completions (34), existing commitments (195) and windfall sites (68). It is noted that Powys has a significantly dispersed rural population, with around 60% of the population living in villages, hamlets and other rural areas. It is important therefore that the plan adequately supports and promotes the growth and viability of the rural area.

Rep'n/Para/Policy AccessNo DateLodgd Late? Status Modified Summary

1933.V2/3.4.15/ 17/07/2015  Summary: Small Village Development growth & reclassification of Llanigon

Source: Email Type: Objection Mode Oral (Examination) Status Maintained

It is acknowledged that the plan allows for some housing growth in Powys's small villages, albeit limited to infill sites for open market housing and affordable housing exception sites. Nevertheless, a compelling case exists for adopting an approach to specifically identify sites at these locations, not least if suitable sites can be identified that have the capacity to accommodate such growth with certainty, and in a deliverable and sustainable way (as the proposed would). It is considered that this would represent a far more logical approach to promoting the growth of the villages, as opposed to allowing a more sporadic and 'windfall' approach to achieving overall numbers of additional units. We are of the view that the current strategy would inevitably result in ad-hoc, piece-meal 'windfall' development, and would strongly argue accordingly that the addition of a settlement boundary and housing allocations to certain smaller settlements (in particular those that have been classified differently previously) would allow the identified 'small villages' to develop in a much more sustainable, comprehensive and planned manner. This approach would be no less sustainable than apportioning the vast majority to towns and large villages – as many settlements function in combination and in a sustainable way (LLanigon and Hay onWye for example), and given that the majority of the Plan's population (60%) reside in smaller settlements and their surrounds.

Assessment of the Suitability of the Settlement for Development

It is noted that Llanigon was identified in the Council's UDP as a 'large village'. It is noted that the settlement is now proposed to be designated as a 'small village' to reflect the number of households resident in the settlement on both sides of the Brecon Beacons National Park boundary. Nevertheless, we would argue that the village continues to play an important role in providing for the local community, whilst also making use of a number of facilities and employment opportunities in surrounding settlements. Indeed, we would note that the village remains closely connected to nearby Hay on Wye, which has been identified in the deposit LDP as a town. Hay on Wye, which is only 2.5km from Llanigon, benefits from a large number of services and facilities, including health care, a supermarket, pubs, cafes and restaurants and shopping facilities, as well as numerous sources of employment, by virtue of Brecon Pharmaceuticals (on Brecon Road) and within the tourism industry, and would therefore clearly be able to support this additional housing at Llanigon.

In addition, it is considered that as well as Llanigon being suitable for residential growth, the proposed additional housing development would assist in supporting the existing services within Llanigon, which consist of a church, community hall and bus links both along with other services in the surrounding local area. Moreover, it would likely promote further facilities which would secure the future viability of the settlement, whilst also ensuring that a range of housing is available to provide for the housing needs of the local population. As acknowledged in the Council's UDP, designated small villages "fulfil an important community and social function in their own area" and housing growth is seen as a "means of ensuring the sustainability of local communities and the future viability of rural villages in Powys."

It is considered that Llanigon plays an important part and role in conjunction with Hay on Wye, and will (as it has done historically) alleviate development pressure on the historic town by providing a logical, suitable and deliverable site for the area's housing needs.

Council Response: 0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: The establishment of settlement boundaries and allocations within the identified 'small villages' and /or the reclassification of Llanigon as a 'Large Village'.

Council Response: 0

**Question: 4b Reason For Request To Speak At Hearing And Subject**

Representation Texts: We would wish to speak to the Inspector regarding our representations on the council's proposed housing supply and provision, in particular the council's strategy at the small villages and regarding the allocation of land south of Willow Glade at Llanigon (See V3).

**Question: 3d. (i) Representation Details**

Representation Texts: Ref village classification

I write to you with regards to Norton being classified as a small village not a large one.

I note that in e-mail correspondence Powys states the county councils LDP working group decided on balance that it should be classed as a small village.

I also note that Powys states that a degree of judgement was exercised.

I also note that Powys state that they drew a tight line around the village to exclude the residents of Norton Manor and the residential homes park which has since applied to have its residential dwellings all classed as permanent and which Presteigne and Norton Town Council supported, does this mean that Norton manor residents are now in no man's land?

With regards to facilities, the proximity of a town was supposed to be part of the judgement process and to be considered in the classification.

The facilities of Presteigne and Norton are classed as not part of Norton even though the Town Council policy has always been that the facilities of Presteigne have been developed for both Norton and Presteigne, indeed Wentes Meadow recreation park, Wilson Terrace playing fields, the skate board park, public toilets, the allotments, tennis courts and the new multi-use games area are all closer to Norton than many parts of Presteigne.

As you can see there appears to have been an injustice, many factors could have swayed the judgement and Norton could have been classed as a large village, but for reasons best known to the County Council none of these factors have been taken into consideration.

In essence if Norton Manor had been included under the Norton population and the facilities on Wentes Meadow which is situated right on the boundary of Presteigne and Norton parishes had been classed as available to Norton it could and indeed should have been classed as a large village.

So considering all the above facts I object to Norton being classified as a small village and ask that it be reclassified as a large village.

Question Representation Texts

**Question: Council Response**

Representation Texts: Thank you for your representation. The Council maintains that the tiers of settlements identified accurately reflect their role, function and overall level of sustainability and that the distribution of housing across the Settlement Hierarchy is based on a sound rationale which supports the delivery of the LDP strategy and the longer term viability of settlements considered capable of supporting sustainable growth. The Council disagree with the proposed changes requested by the Representer in relation to the reclassification of Cyfronydd to a Small Village. The Representer does not raise new issues or evidence which lead the Local Planning Authority to change its conclusions.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: I ask for re-assessment of the settlement of Cyfronydd to a new category vis-à-vis small in fill sites/small village. Particularly as Parliamentary Departments and Assembly and Local Government keep calling for more housing.

Council Response: 0

**Question: 3d. (ii) Desired changes to Document**

Question Representation Texts

**Question: Council Response**

Representation Texts: The Council considers that the proposed settlement hierarchy is sound, based on a robust methodology with levels of growth and site allocations supported by a wide range of supporting evidence including access to services. The Council maintains that the tiers of settlements identified accurately reflect their role, function and overall level of sustainability. The Council disagree with the proposed changes requested by the Representer in relation to the need for development boundaries around Small Villages. TAN 6 Planning for Sustainable Rural Communities (July 2010) recognises that in rural areas settlement boundaries can limit the provision of housing to meet local needs, advising at paragraph 2.26 that: "In smaller settlements, planning authorities should consider including criteria based policy against which planning applications can be assessed, rather than identifying settlement boundaries". One of the key disadvantages of settlement boundaries is that this creates a general presumption that residential development within a settlement boundary is acceptable. In Powys's smaller settlements this is particularly problematic as it places an undue pressure on infill development which can impact on a settlement's character. Additionally, this presumption in favour of development artificially increases land values within boundaries compared to those outside of the settlement boundaries and also creates "hope values" on land adjoining settlement boundaries (i.e. land that could be included sometime in a future plan review or as a potential "rounding off" development site). The latter reduces the opportunities for "rural exceptions" affordable housing, and increases the affordability gap in rural settlements as the supply of housing land is restricted. It is considered that this may be one of the key reasons for the limited number of rural exception sites for affordable housing that have been proposed and delivered over the lifetime of the Unitary Development Plan. The Council is in favour of Village (Action) Plans so as to enable further community involvement on how Small Villages may develop with the emphasis on the suitability of infill sites (as extensions to Small Villages are an exception for affordable homes only). Furthermore in response to the concern over certainty, the LDP monitoring and review process will be used to ensure that the Plan is meeting its overall aims and objectives. The Representer does not raise new issues or evidence which lead the Council to change its conclusions in relation to the Strategy and no changes are considered necessary to ensure that the Plan is sound.

Council Response:

0

**Question: 3d. (i) Representation Details**

Representation Texts: This submission objects to selected policy provisions of the plan, namely section 34.21

We would encourage the council to adopt an approach to Norton and other small villages to specifically identify sites in "small villages" and to introduce a settlement boundary and housing allocations to certain smaller settlements, to allow these to develop in a more sustainable, comprehensive and planned manner.

It is noted that the plan allows for some housing growth in the small villages identified although limited on infill sites and affordable housing exception sites. We feel the present proposal would lead to sporadic and piecemeal development. If settlement boundaries were introduced, site can be identified that have capacity and can be delivered in a sustainable, comprehensive and planned manner.

This would be no less sustainable than the present proposal to allocate the vast majority to towns and large villages as many settlements, towns, large and small villages work together in a sustainable way and given that a large majority of the counties population reside in smaller settlements and their surroundings, eg Presteigne and Norton.

Council Response:

<i>Question</i>	<i>Representation Texts</i>
-----------------	-----------------------------

**Question: Council Response**

Representation Texts: "The Council disagree with the proposed changes requested by the Representor. The Representor does not raise new issues or evidence which lead the Local Planning Authority to change its conclusions with regard to the designation of Beguildy within the settlement hierarchy. The Council considers that the proposed settlement hierarchy is sound, based on a robust methodology with levels of growth and site allocations supported by a wide range of supporting evidence including access to services. The Council maintains that the tiers of settlements identified accurately reflect their role, function and overall level of sustainability. The Council consider that the distribution of housing across the Settlement Hierarchy is based on a sound rationale which supports the delivery of the LDP strategy and the longer term viability of settlements considered capable of supporting sustainable growth."

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: This submission objects to selected policy provisions of the plan, namely section 34.2 1/34.46 assessment of Norton as a "small village" and distribution of housing.

With relation to Norton, the LDP Strategy Topic Paper (June 2015) which details how each settlement has been classified, identifies that Norton benefits from two services and an estimated population of 300 and therefore the reason why the council enters Norton in the "small village" category.

This estimate of the population does not take into account the total number of electors or the wider settlement including that of Norton Manor Estate which has a recently submitted planning application to seek a Certificate of Lawful Use to establish that the residential units on the site are permanently occupied through the year.

We consider that, if successful the units on this site should be counted as part of Norton, in addition to the facilities it provides.

Status Maintained

---

In addition it is considered that Norton has always been part of Presteigne and Norton Community council. Presteigne is identified as a town in the Deposit LDP. The town in 1.6 miles away, benefits from a large number of services and facilities and would provide additional support to housing developments at Norton. For example the new allotments provided by Presteigne Town Council are only 0.9 miles from Norton and are, in fact, closer to residents of Norton than many residents in Presteigne.

Also the Wentes Meadow Park within 1.1 miles of Norton and is again closer to Norton than many residents of Presteigne provides facilities such as tennis courts, play area, skateboard park and toilets.

If the population of Norton included Norton Manor Estate it would take numbers into the "large village" category.

When considering the village of Norton, the Council's LDP working group did consider the classification of Norton as a large or a small village and decided on balance it should be small.

We would seek reconsideration of that decision based on the above information and feel that the balance would now tip in favour of it being classified as a large village within the settlement hierarchy.

Question Representation Texts

**Question: Council Response**

Representation Texts: Thank you for your representation. The Council recognises that the lack of development boundaries in Small Villages does create some uncertainty. However the basis of the LDP policy in this tier is that new development should be well-integrated. The LDP approach towards housing provision in small villages is set out in policy H1 point 2 which explains that in Small Villages, housing development will be supported i) on small infill gaps between existing dwellings capable of accommodating 1 or 2 units or in suitable larger infill gaps where identified in a village plan prepared by a community and adopted as SPG, and ii) On sites forming minor logical extensions to small villages for affordable housing in accordance with Policies H5 and H7. The Representor does not raise new issues or evidence which lead the Council to change its conclusions on the approach taken towards Small Villages. As the LDP has not separated Leighton into different parts as in past plans, the intention is that Leighton should be considered as a whole. It is recognised that the settlement functions in this manner and that locally Leighton Pentre (which was designated in the UDP) is not distinguished separately.

Council Response: 0

**Question: 3d. (i) Representation Details**

Issue: 2015: Deposit Draft-01. Preparation, Process and Plan Strategy

Question Representation Texts

**Question: Council Response**

Representation Texts: These comments are noted. The Representor does not raise new issues or evidence which lead the Council to change its conclusions in relation to the Strategy or its choice of settlements designated as Small Villages and Rural Settlements. No changes are considered necessary to ensure that the Plan is sound. The categorisation of settlements (including Coedway) was not only linked to the number of facilities but also included matters of judgement based on planning and sustainability reasons. The Council does not agree that Policy H1 should be changed to provide for larger infill sites as these are enabled in Small Villages provided they come forward through a Village (Action) Plan.

Council Response:

0

**Question: 3d. (i) Representation Details**

Representation Texts: I would like to make representation for Coedway's designation to be changed from ' Rural Settlement' to 'Small Village' plus amendment of policy H1 34.46, to include a larger amount of infilling than at present proposed, and give below my reasons:

Housing: Coedway consists of approx. 40 houses, plus four farms and 100+ static caravans. It also contains provision for a reasonable amount of housing on previously designated building land - to be constructed during the plan period.

Employment: Coedway contains several units in a small Business Park, plus employment on farms and at the public house.

Village Facilities: Coedway has a chapel and a very popular and busy public house.

Close proximity of other facilities: School at Crew Green - one mile from Coedway; Village shop, café and petrol station at Llandrinio - approx three miles from Coedway; Village hall at Alberbury - one mile from Coedway.

Bus route: Coedway has a regular bus service from Shrewsbury to Oswestry.

Proximity of towns: Coedway is equidistant from Oswestry, Shrewsbury and Welshpool - approx. 20 minutes travelling time to each town.

Access to tourist Attractions: The B4393 through Coedway is the main access route to the very popular tourist area of Lake Vyrnwy, and to many more of Mid wales' tourist attractions.

Council Response:

0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: I would like Coedway's designation to be changed from ' Rural Settlement' to 'Small Village', together with amendment of policy H1, 34.46 to include accommodation for more

*Question*                      *Representation Texts*

**Question:**                      **Council Response**

Representation Texts:                      These comments are noted. The Representor does not raise new issues or evidence which lead the Council to change its conclusions in relation to the Strategy or its choice of settlements as designated in the Sustainable Settlement Hierarchy. The categorisation of settlements (including Coedway) was not only linked to the number of facilities but also included matters of judgement based on planning and sustainability reasons. The Council disagrees that Coedway should be reclassified as a Large Village. The Council considers the nearby settlement of Crewgreen is the more appropriate location for housing growth in this locality.

Council Response: 0

**Question: 3d. (i)                      Representation Details**

Representation Texts:                      I would like to make representation for Coedway's designation to be changed from 'Rural Settlement' to 'Large Village and give my reasons below:

Housing: Coedway consists of approx. 40 houses, plus four farms and 100+ static caravans.

Employment: Coedway contains several units in a small Business Park, plus employment on farms and at the public house.

Village Facilities: Coedway has a chapel and a very popular and busy public house.

Close proximity of other facilities: School at Crew Green - one mile from Coedway; Village shop, café and petrol station at Llandrinio - approx three miles from Coedway; Village hall at Alberbury - one mile from Coedway.

Bus route: Coedway has a regular bus service from Shrewsbury to Oswestry.

Proximity of towns: Coedway is equidistant from Oswestry, Shrewsbury and Welshpool - approx. 20 minutes travelling time to each town.

Question Representation Texts

**Question: Council Response**

Representation Texts: These comments are noted. However, no changes are considered necessary to ensure that the Plan is sound. The Powys LDP Topic Paper LDP Strategy June 2015 includes the preferred strategy hierarchy table (2012) which includes reference to Norton having 1 bus service. This information was correct at this point in time and may change over the plan period. The categorisation of settlements (including Norton) was not only linked to the number of facilities but also included matters of judgement based on planning and sustainability reasons.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: I would like to state that in Norton village you have said there is one facility, which I take is the bus service.

This must not be taken as a true statement as the L.D.P. is for the next ten years, and whilst at the moment we have this one one facility, it could be taken away from us at any time.

Therefore, it must not be counted as a facility.

Council Response: 0

Question Representation Texts

**Question: Council Response**

Representation Texts: Thank you for your comments. The Council considers that the proposed Settlement Strategy and Sustainable Settlement Hierarchy is sound, based on a robust methodology with levels of growth and site allocations supported by a wide range of supporting evidence. The Council disagree with the proposed changes requested by the Representer in relation to the need for development boundaries around Small Villages or the re-classification of Norton. TAN 6 Planning for Sustainable Rural Communities (July 2010) recognises that in rural areas settlement boundaries can limit the provision of housing to meet local needs, advising at paragraph 2.26 that: "In smaller settlements, planning authorities should consider including criteria based policy against which planning applications can be assessed, rather than identifying settlement boundaries". One of the key disadvantages of settlement boundaries is that this creates a general presumption that residential development within a settlement boundary is acceptable. In Powys's smaller settlements this is particularly problematic as it places an undue pressure on infill development which can impact on a settlement's character. Additionally, this presumption in favour of development artificially increases land values within boundaries compared to those outside of the settlement boundaries and also creates "hope values" on land adjoining settlement boundaries (i.e. land that could be included sometime in a future plan review or as a potential "rounding off" development site). The latter reduces the opportunities for "rural exceptions" affordable housing, and increases the affordability gap in rural settlements as the supply of housing land is restricted. It is considered that this may be one of the key reasons for the limited number of rural exception sites for affordable housing that have been proposed and delivered over the lifetime of the Unitary Development Plan. The Council is in favour of Village (Action) Plans so as to enable further community involvement on how Small Villages may develop - with the emphasis on the suitability of infill sites (as extensions to Small Villages are an exception for affordable homes only). The Representer does not raise new issues or evidence which lead the Council to change its conclusions in relation to the Strategy and no changes are considered necessary to ensure that the Plan is sound. However, please be aware that the Housing Topic paper has been updated since Deposit and further work has been undertaken on deliverability - this evidence has informed proposed focussed changes to the Housing chapter of the Deposit Plan. See the Focussed Changes document. Furthermore, the LDP monitoring and review process will be used to ensure that the Plan is meeting it's overall aims and objectives .

Council Response:

0

**Question: 3d. (i) Representation Details**

Representation Texts: The LDP proposes a spatial distribution strategy through which 2,623 dwellings will be delivered through allocations in towns and large villages, and a further 1,008 delivered as windfall.

It is accepted that towns are seen as the principal location for accommodating housing, given their existing provision and range of services, facilities, employment and accessibility.

297 (5%) of the identified requirement is expected to be provided at the identified small villages, through completions (34), existing commitments (195) and windfall sites (68). It is noted that Powys has a significantly dispersed rural population, with around 60% of the population living in villages, hamlets and other rural areas. It is important therefore that the plan adequately supports and promotes the growth and viability of the rural area.

It is acknowledged that the plan allows for some housing growth in Powys's small villages, albeit limited to infill sites for open market housing and affordable housing exception sites. Notwithstanding this, a compelling case exists for adopting an approach to specifically identify sites at these locations, not least if suitable sites can be identified that have

Source: Email Type: Objection Mode Oral (Examination) Status Maintained

the capacity to accommodate such growth with certainty, and in a deliverable and sustainable way (as the proposed would). It is considered that this would represent a far more logical approach to promoting the growth of the villages, as opposed to allowing a more sporadic and 'windfall' approach to achieving overall numbers of additional units. We are of the view that the current strategy would inevitably result in ad-hoc, piece-meal 'windfall' development, and would strongly argue accordingly that the addition of a settlement boundary and housing allocations to certain smaller settlements would allow the identified 'small villages' to develop in a much more sustainable, comprehensive and planned manner. This approach would be no less sustainable than apportioning the vast majority to towns and large villages – as many settlements function in combination and in a sustainable way (Norton and Presteigne for example), and given that the majority of the Plan's population (60%) reside in smaller settlements and their surrounds.

Assessment of the Suitability of the Settlement for Development (@ 34.21 / 34.46)

It is noted that Norton was identified in the Council's UDP as a 'small village', and continues to be recognised as a 'small village' in the Deposit LDP. The LDP Strategy Topic Paper (June 2015), which details how each settlement has been classified, identifies that Norton benefits from two services and an estimated population of 300. This equates to 600 'points' which enters it into the 'Small Village' category. It is also noted that the Council's working group decided 'on balance' to classify Norton as a small village and that the Council has acknowledged that a degree of judgement was exercised.

The Council has drawn a tight line around Norton village, meaning that the population estimates do not take into account the total number of electors and the fact that there are 276 properties within the wider settlement. Whilst some of these properties are located in outlying areas, they would still rely upon key services and have a geographical connection to Norton.

The two facilities identified are the bus stop and employment. The Hierarchy however does not take into account Norton Manor which includes a restaurant, pub and ballroom. This facility is often used by the local community as a meeting place/community hall and for general gatherings. The former hotel has recently been sold, however if it is re-opened as a hotel/function centre there is no doubt that this should be counted as a facility available to Norton. It should also be noted that Norton Church will soon be installing a toilet that will be available to the public when it is open.

The tight line drawn around the village also excludes Norton Manor Estate, a development of park homes for the over 55s. There are over 60 units on the site which are a mixture of one and two bedroom units. If a conservative estimate of two people per unit was used, this would equate to over 100 additional people living on the site. The population of Norton would therefore increase to 400 and, in light of the additional facility, the settlement would now benefit from over 1200 points, thus elevating the settlement to a 'large village'. It should also be noted that an application has recently been submitted which seeks to lawfully establish (via a Certificate of lawful use application) that the residential units on the site are permanently occupied throughout the year. This would establish unequivocally that the units on this site should be counted as part of Norton, in addition to the facilities it provides.

In addition, it is considered that the village continues to play an important role in providing a range of services for the local community, whilst also making use of a number of facilities and employment opportunities in surrounding settlements. Indeed, we would note that the village remains closely connected to nearby Presteigne, which is identified as a town in the Deposit LDP. The town, which is merely 1.6 miles away, benefits from a large number of services and facilities, and would provide additional support to housing developments at Norton. For example, new allotments provided by Presteigne Town Council are located only 0.9 miles from Norton, situated right on the boundary between the two parishes. Moreover, the Wentes Meadow Park, with its tennis courts, Skateboard Park, toilets, play area, and community barn, is located closer to Norton (1.1 miles) than many of the estates in Presteigne, and the nearest hotel and shop in Presteigne are located only 1.5 miles from the village boundary. It is understood that the town council's investment in such facilities is done so on the basis that they will be for the use of both parishes, thereby significantly increasing the number of services and facilities serving Norton and supporting Norton's re-classification as a 'large village'.

It is considered that, in addition to being suitable for residential growth, additional housing development would assist in supporting the viability of the existing services, both within Norton itself and within the surrounding local area, and in promoting further facilities which would secure the future viability of the settlement, whilst also ensuring that a range of housing is available to provide for the housing needs of the local population. As acknowledged in the Council's UDP, designated small villages "fulfil an important community and social function in their own area" and housing growth is seen as a "means of ensuring the sustainability of local communities and the future viability of rural villages in Powys."

**6298.V2/3.4.15/** 17/07/2015  Summary: Small Village development growth and the reclassification of Norton

Source: Email Type: Objection Mode Oral (Examination) Status Maintained

---

It is considered that Norton plays an important part and role in conjunction with Presteigne, and will (as it has done historically) alleviate development pressure on the historic town by providing a logical, suitable and deliverable site for the area's housing needs.

It would appear, through the previous site selection process, that when determining the status of Norton within the settlement hierarchy, the process was not solely based on a purely mathematical calculation or points structure, but an element of discretion as to other influential matters that could elevate the status of the village from being classified as a 'small' to 'large village'. As set out above, and as previously acknowledged, the decision was made 'on balance' of the information provided, and with this additional information we believe that this could 'tip the balance'. We would strongly argue therefore that it is appropriate to consider Norton as a 'large village' within the settlement hierarchy.

Issue: 2015: Deposit Draft-01. Preparation, Process and Plan Strategy

Question Representation Texts

**Question: Council Response**

Representation Texts: These comments are noted. The Representor does not raise new issues or evidence which lead the Council to change its conclusions in relation to the Strategy or its choice of settlements designated as Small Villages and Rural Settlements. No changes are considered necessary to ensure that the Plan is sound. The categorisation of settlements (including Dolau) was not only linked to the number of facilities but also included matters of judgement based on planning and sustainability reasons.

Council Response:

0

**Question: 3d. (i) Representation Details**

Representation Texts: Dolau has been not recognised as a 'Small Village' and by default has been included as a 'Rural Settlement'. This is an oversight and does not recognise the amenities that are existent in the village. Dolau is well recognised throughout the area as a village made up of 3 linked settlements that act as a conglomerate to contribute to make one village. The current UDP separates the village by random development lines that are purely arbitrary and do not reflect how the village exists in reality. In total there are approx 62 houses and farms within the settlement areas (16 around school; 30 in the extended area of railway station; 16 around the Church). In addition there is planning permission for another 20 or so residential units contributing to a village greater than some listed in the LDP proposal. The amenities offered in the immediate area are a school, a village hall, a rail station, a Church (St. Michaels), a chapel (Tanhouse) an off road sales specialist, an off road training school, several egg producing units, a sawmill, a riding stable and small enterprises ran as home businesses. Other villages in Powys with similar characteristics to Dolau have been treated as Small Villages (e.g. Leighton and Forden) and as such, Dolau should be treated also.

Council Response:

0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: Include Dolau as a small village.

Document:Draft Deposit Written Statement 2015, p.26, para.3.4.18

Issue: 2015: Deposit Draft-01. Preparation, Process and Plan Strategy

Question Representation Texts

**Question: Council Response**

Representation Texts: The Council disagree with the proposed changes requested by the Representer. The Representer does not raise new issues or evidence which lead the Local Planning Authorities to change its conclusions with regard to the definition of Rural Settlements. The current definition should not lead to sporadic residential development in the open countryside as policy H7 is an exceptions policy, applicable only where there is a proven local need for an affordable home and the policy makes it clear that development should be "integrated within" or form a "minor, logical extension" to a Small Village or a Rural Settlement. Thus outlying sites would not fulfil this criteria and would fail to be considered a sustainable location for new housing. The LDP is therefore in line with PPW's principle that new house building in such areas should be strictly controlled and no changes are considered necessary to make the Plan sound. Please note that a new Strategic Policy (SP1) is proposed as a Focussed Change and this policy provides further clarification on the location of new development and how growth is being directed through the sustainable settlement strategy.

Council Response:

0

**Question: 3d. (i) Representation Details**

Representation Texts: Firstly, the National Park Authority would like to congratulate the Powys LDP team for the efforts made to address the significant concerns raised against the first Deposit LDP (2014). It is acknowledged that the level of work undertaken to achieve the revised Deposit is substantial and the team is to be congratulated. We are extremely encouraged to see the progress being made by yourselves to move towards an adopted plan and the certainty this will bring in relation to the future development in Powys. Undoubtedly this will be of benefit to the region and can only be supported by the NPA.

Notwithstanding the above, we would like to draw your attention to the following issues we have identified with the deposit draft LDP (2015) and its compliance with National Planning Policy. We raise these concerns from our recent experiences of the Examination process and we hope what follows will benefit you in the production of a sound LDP. These are not objections per se, but we urge you address the points in your lead up to submission in the interests of soundness.

Please note that these are officer comments, which will be put before Members at the next available opportunity. Therefore they may be subject to amendment following NPA recommendation. We will advise you of any change accordingly.

**2. Definition of Rural Settlements**

We understand that there is a need to deliver housing within rural settlements, however we have concerns that the definition of Rural Settlements offered at 3.4.19 of the LDP, lacks clarity in application and potentially could lead to the sporadic development of residential development in areas of open countryside. The particular area of uncertainty surrounds the final statement that such settlements could be 'more dispersed'. These needs to be defined, many communities within rural wales are made up of scattered farmsteads, these are dispersed communities, however, they are not sustainable locations for new development. Such development here would be contrary to the requirements of PPW which states at 9.3.6 New house building...in the open countryside away from established settlements, should be strictly controlled...[and]require special justification. Council are urged to revisit this definition, either through the definition of an extent of such infilling (as with BBNPA's own Level 4 Settlements) or clear parameters are given setting out how such settlements would be defined to avoid abuse of this policy and

Issue: 2015: Deposit Draft-02. Housing - Distribution and Numbers

Question Representation Texts

**Question: Council Response**

Representation Texts: Thank you for your comments. However, the LDP is aligned with national planning policy which directs development to sustainable locations whilst restricting development in less sustainable areas, particularly the open countryside. Rural Settlements have been assessed as lower tier settlements in the Sustainable Settlement Hierarchy for Powys and are not considered an appropriate location for further housing growth unless substantiated by exceptional reasons (such as affordable local homes, agricultural need etc). Allowing these settlements to develop could be to the detriment of supporting new growth in towns and large villages which are higher up in the hierarchy and offer a better range of services and facilities generally without the same reliance on the private car that is predominant in the more rural areas. The Representor does not raise new issues or evidence which leads the Council to change its conclusions in relation to the Strategy and no changes are considered necessary to ensure that the Plan is sound.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: It is noted that Rural Settlements 'are considered suitable for limited development to meet affordable housing for local needs only through single rural affordable homes, where they are well integrated into the settlement and are acceptable in terms of environmental and infrastructure capacity constraints.' This is unacceptable as this will curtail development of open market housing in rural areas. The knock-on effect will be that existing open market housing will rise in value (as they are no longer being built) and therefore the cost of housing in rural areas will rise. Also, landowners will be reluctant to release land for 'affordable housing' and therefore availability of new housing will be curtailed even further.

Council Response: 0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: Rural Settlements should be allowed to develop naturally and sympathetically by allowing infill, discrete and sustainable small scale developments (less than, say, 5). Stronger consideration should be given to the quality of the proposals rather than the numeracy.

Question Representation Texts

**Question: Council Response**

Representation Texts: These comments are noted. However, no changes are considered necessary to ensure that the Plan is sound. The representor states "that 3.4.21 contains a statement that the protection of the 'finite resource' of open countryside will take the form of specific and detailed policies within the LDP to cover developments of major impact in the open countryside." They then go on to say that " The LDP does not contain such policies and obvious omissions include detailed policies for renewable energy development etc....". However the text taken from para 3.4.21 has been taken out of context - there is no intention to have a policy within the plan to cover the eventuality of all major developments in the countryside. Policies have been written where it is felt they are needed whilst all development will need to comply with development management policies.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: CPRW supports the hierarchical approach that limits new build to infill in small villages and rural settlements. It would be more desirable that such build is either open market or affordable in order to sustain a range of accommodation in thriving communities. Extending settlements outwards beyond their boundaries is not desirable. The reuse of redundant buildings in open countryside is supported.

However, 3.4.21 contains a statement that the protection of the 'finite resource' of open countryside will take the form of specific and detailed policies within the LDP to cover developments of major impact in the open countryside. The LDP does not contain such policies and obvious omissions include detailed policies for renewable energy development, pylons and large scale or industrial farming units. Please see for instance CPRW comments @34.91 and @34.26.

Council Response: 0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: Changes required: Inclusion of specific policies relating to developments within the open countryside which carry major impacts, including renewable energy developments, pylons, intensive poultry and animal farming units – see CPRW comments @34.91 and @34.26.

Council Response: 0

Document:Draft Deposit Written Statement 2015, p.27, para.3.4.22

Issue: 2015: Deposit Draft-02. Housing - Distribution and Numbers

*Question Representation Texts*

**Question: 3d. (i) Representation Details**

Representation Texts: Paragraph 3.4.22 is clear that: "In providing sufficient land to meet future housing and economic needs, and to ensure sustainable development, the LDP apportions more land to higher tier settlements (Towns and Large Villages). In order to facilitate this, a pro-rata apportionment based on household numbers was used.

In the deposit draft version of the plan recommended to the Council at its meeting on 27th May 2014, 10 separate housing allocations at Ystradgynlais were recommended for inclusion with an overall capacity identified at 318 dwellings.

It is our understanding (N.B. the matter was not properly minuted) following a request made at that meeting by one Councillor, that the Council resolved that site P58/HC9 (76 dwellings at Penrhos Farm, Ystradgynlais) be deleted from Inset Map P58E and that the Portfolio Holder for Regeneration and Planning be given delegated authority to deal with site specific issues with local Members, including a replacement allocation. It is also the case that there is no minute which recorded the reason why the site at Penrhos Farm was proposed for removal from Inset Map P58E.

For the record, the way the decision to delete site P58/HC9 from the list of proposed allocations was handled, without as far as we know any proper consideration of the planning merits of the matter, is the subject of a separate ombudsman complaint.

It is our understanding that the main reason why a local Member proposed that the site be removed from the Inset Map was because she was under the impression that the site had been purchased by the current landowners using public funds. We have since provided the Council with documentary evidence that this is absolutely not the case and note that, in any event, this is irrelevant.

It is also clear that since the meeting of the Council on 27th May 2014, Officers have been unable to identify a suitable alternative allocation or allocations in Ystradgynlais to make up the numbers. The settlement is consequently 76 dwellings short in respect of the level of allocation the Council had deemed appropriate to be apportioned to this settlement.

It is also not clear when, where, and how the plans of neighbouring authorities will impact on Powys and how this has been reflected in the preferred strategy and the housing allocations for Ystradgynlais. The proposed limits here in this growth area could have cross boundary implications for Swansea and Neath Portalbot.

See V5 - New site

Council Response:

0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: Reinstate (as a minimum) Site P58/HA9 Land at Penrhos Farm 76 dwellings at Appendix 1 in order to return the overall allocation at Ystradgynlais (as a minimum) to 318 dwellings, in accordance with the recommendation by officers to the meeting of the Council on 27th May 2014. (See V5 - New site)

Document:Draft Deposit Written Statement 2015, p.34, para.3.4.23

Issue: 2015: Deposit Draft-02. Housing - Distribution and Numbers

Question Representation Texts

**Question: Council Response**

Representation Texts: Thank you for your comments. The Council acknowledges your concerns that Ystradgynlais should be awarded higher housing numbers. Please note that the Housing Topic Paper and the LDP Strategy Topic Paper are being updated. A number of Focussed Changes are proposed to the Plan in the light of the revisions and updated evidence and in response to Representations made at the Deposit Plan stage. Please refer to the separate Focussed Changes document and the Ystragynlais map and Appendix 1 settlement allocations table for any Focussed Changes regarding land allocations in Ystradgynlais.

Council Response:

0

**Question: 3d. (i) Representation Details**

Representation Texts: The amount of housing allocated in Ystradgynlais does not flow logically from the strategy. The Local Development Plan does not meet coherence and effectiveness test - CE1.

The LDP's spatial strategy is housing based (para.3.4.2). Levels of development have been allocated to settlements commensurate with their size (number of households) and position in the sustainable settlement hierarchy (para.3.4.3 and strategic objectives LDP1&2).

Ystradgynlais is identified as a Town in the settlement hierarchy (refpoint 34.19). It is one of only two 'urban town' settlements in Powys (2.2.7).

Of the settlements identified as the primary focuses for housing growth (Towns and Large Villages), Ystradgynlais has the second most households after Newtown (Appendix F, Strategy Topic Paper 2015).

Of the 6071 houses to be provided by the plan, 4815 will be delivered in the Towns and Large Villages and 1256 will be delivered in Small Villages and Rural/Other locations (LDP, Table H2).

A simple analysis (see table 1 attached) shows that if the 4815 houses were allocated to settlements commensurate with their size (as is the LDP's strategy, para.3.4.3), 520 houses would be allocated to Ystradgynlais.

Appendix 1 to the LDP shows that just 237 are allocated in Ystradgynlais. With an allowance of 44\* for windfall development, the total provided in the town is just 281. This is 231 houses or 46% short.

(\*LDP table H2 gives a windfall allowance of 412 in Towns & Large Villages. Ystradgynlais accounts for 10.79% of all the households in settlements identified as Town and Large Villages in the LDP).

Further analysis (see Table 2 attached) shows the maximum potential for development in over the LDP period (as at 11/07/2015) Ystradgynlais is 474 houses. This level of development is highly unlikely to occur and would require all undeveloped Unitary Development Plan allocations to obtain planning permission before the Local Development Plan

by: Representation No

Rep'n/Para/Policy	AccessNo	DateLodgd	Late?	Status	Modified	Summary
6205.V2/3.4.23/		20/07/2015	<input type="checkbox"/>			Summary: Apportioning Growth - Request for more housing allocations in Ystradgynlais
Source: Post or in person		Type: Objection		Mode: Oral (Examination)		Status: Maintained

is adopted. The figure is also generous as the windfall projection is added on top of a known large windfall site awaiting determination. Even when considered against this upper range, the allocation of houses to the town of Ystradgynlais is significantly short (by 46 houses or 9%).

The LDP Strategy Topic Paper, P46, Appendix D, justifies the deviation from pro-rata apportionment because of a lack of suitable housing sites. The justification states that sites have been discounted for 'political' reasons and because physical/environmental constraints have impacted the ability to demonstrate that sites are both viable and deliverable.

Appendix F of the LDP Strategy Topic Paper details the Pro-rata growth target (dwellings) by settlement (Column F). It is based on a provision of 4000 homes rather than 6071. Furthermore there is no explanation of the 'political' reasons. The distribution of growth to Ystradgynlais is not founded on a robust and credible evidence base. The LDP does not meet coherence and effectiveness test - CE2.

For purposes of comparison, the 2010 Powys Local Housing Market Assessment (fig 97, p180) shows the Ystradgynlais border local housing market area as home to 8% of Powys' population. Were 8% of the 6071 directed to the Ystradgynlais border local housing market area, the allocation would be 486. Furthermore the LHMA (2010), (para.13.40,p.239) explains that 69 additional dwellings are required annually (2010-2015). Projected over the plan period of the LDP, it gives a requirement of 1035 dwellings for the Ystradgynlais border local housing market area.

The Ystradgynlais border housing market area includes the town, Ystradgynlais, and large villages, Abercrave and Coelbren, the small village Caehopkin and the village of Penycae which is in the Brecon Beacons National Park.

Analysis (see Table 3 attached) shows that just 272 houses are allocated in the Ystradgynlais border housing market area. With an allowance of 51 for windfall development in Towns and Large Villages and assuming\*\*7 will be developed in Caehopkin and very few, say 20, will come forward in the rural/other areas. The total provision in the area is 350. This is 136 short of the 486 'in proportion' allocation. It is 685 short of the projected need.

(\*\*Table H2 suggests 297 is provided between 45 small villages and 959 in rural area. The Ystradgynlais housing market area is classified as 'Town and fringe - less sparse' (LHMA para.12.8), it is geographically small compared to other housing market areas in Powys. Accordingly a provision of just 20 of the 959 is suggested, despite the housing market area having 8% of Powys' population).

There is no evidence to suggest that regard has been given to the Local Housing Market Assessment (2010) when determining the distribution of housing growth. The allowance for just 350 houses in the housing market area is out of sync with the evidence. The LDP does not meet consistency test - C1).

Attached:

- Table 1: In proportion allocations by settlement for Towns & Large Villages.
- Table 2: Maximum potential for development in Ystradgynlais (as at 11/07/2015).
- Table 3: LDP allocation to the Ystradgynlais border local housing market area.

Council Response:

0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: The LDP strategy is to allocate housing to settlements commensurate with their size (number of households) and position in the sustainable settlement hierarchy (para 3.4.3).  
 More provision for housing should be made in Ystradgynlais on 'fresh allocations'. It is the second largest town in Powys and is one of only two 'urban towns' in Powys.

Source: Post or in person Type: Objection Mode Oral (Examination) Status Maintained

---

An additional 230 homes should be allocated in Ystradgynlais: Part of this is deliverable by enlarging LDP allocation P58 HA3 (with adjoining land) to accommodate 150 dwellings in total.

In settlements where there are significant 'over allocations' as detailed in the LDP Strategy Topic Paper, Appendix D, allocations should be withdrawn to a level in keeping the 'in proportion' strategy, especially in large villages. Both Boughrood & Llyswen and Bronllys are large villages with very significant over allocations, justified partly at least for undisclosed 'political reasons'. It is also noted that Llanfyllin has a very large provision, 171 allocated + assumed 7 windfall, compared to its in proportion share of 78.

As the fundamental strategy, the LDP must contain a table showing the theoretical 'in proportion' allocation for each of the Towns and Large Villages. This table must include a column detailing the LDP's overall (allocation and windfall projection) provision in each to demonstrate the strategy is being adhered to 'broadly' by the detail of the plan. This table should be included under paragraph 3.4.3 of the LDP.

Council Response: 0

Issue: 2015: Deposit Draft-02. Housing - Distribution and Numbers

*Question Representation Texts*

**Question: Council Response**

Representation Texts: Thank you for your comments. The Council does not agree that the growth or spatial strategy is unsound. The Sustainable Settlement Hierarchy was established before the subsequent pro-rata apportionment of growth so as to ensure that development was directed only to the locations suitable to receive it. Decision making has taken account of settlement infrastructure and environmental constraints and settlements and sites have been subject to SA/SEA. Officers have exercised a degree of professional judgement in land allocations based on settlement and site evidence and stakeholder feedback. The apportionment of growth is set out in the LDP Strategy Topic Paper - Appendix D explains the basis of deviations. The Council has found it necessary to revisit the housing growth figures following representations made on the Deposit Plan including the Welsh Government's (WG) fundamental concerns over deliverability and viability. The Council is proposing that the housing land target is reduced, to be effected through a Focussed Change. Please note that the evidence for the revised housing land target is fully set out in the revised Housing Topic Paper (Dec 2015). Relevant parts of the Plan have been amended accordingly (again through proposed Focussed Changes) to align with the new housing data. Appendix 1 (settlement allocations table) has been revised as a result of i) further work on deliverability ii) the consideration of site allocation representations received in response to the Deposit Plan and iii) to reflect new planning history as at the revised base date for planning permission information (1 April 2015). Taking account of the proposed Focussed Changes, the Council considers that the proposed growth and spatial strategy is sound, based on a robust methodology with levels of growth and site allocations supported by a wide range of supporting evidence. Please note that site allocation representations will be responded to separately.

Council Response:

0

**Question: 3d. (i) Representation Details**

Representation Texts: The proposed distribution of growth (Table H2 of @34.14) simply apportions housing growth based on the numbers of households that currently exist as set out in paragraph 3.4.22 (@34.24). Such an approach lacks any consideration of the sustainability of development in any particular settlement and does not therefore set out a coherent strategy to develop policies and allocations (CE1).

Indeed, Appendix B of the Powys Local Development Plan Topic Paper LDP Strategy (June 2015) identifies that Four Crosses has the third greatest population of any Large Village, and that it is in fact greater than that in a number of designated Towns. It also has as many main facilities as many of the designated Towns and more than the majority of other Large Villages. Furthermore, Four Crosses lies within the Central Growth Corridor which was formerly identified as being appropriate to accommodate additional growth (that could not be accommodated elsewhere). On this basis alone, Four Crosses would appear to be a more sustainable location for growth than other Large Villages. However, the distribution of growth does not reflect this.

By way of example, Four Crosses is proposed to accommodate 46 dwellings in Appendix F as compared to Guilsfield which has fewer main facilities and does not lie in the Central Growth Corridor which is proposed to accommodate 65 dwellings. Based on this information, it is clear that Four Crosses provides a sustainable location for further development.

Not only does the distribution fail to take account of the sustainability credentials of settlements, it also does not allocate sites in accordance with the apportionment outlined within the LDP (@34.24). Again, this is best illustrated by way of example. Appendix F of the Powys Local Development Plan Topic Paper LDP Strategy (June 2015) identifies that there is a need for 65 dwellings in Guilsfield and that 53 are already subject to a commitment, leaving a remainder of 12 to be identified. However, the LDP proposes to allocate

**Appendix 1 - Deposit LDP Reps & Responses by Refpoint, Cabinet 15-12-15**

by: Representation No

Filtered to show: (all of) Stage=V; Status=M

*Rep'n/Para/Policy AccessNo DateLodgd Late? Status Modified Summary*

**6210.V1/3.4.22/** 20/07/2015  Summary: Apportioning Growth - Lack of Coherency/Consistency

Source: Email Type: Objection Mode Oral (Examination) Status Maintained

two sites, each of which will deliver more than 12 dwellings, with a combined capacity of 39 dwellings. However, in other Large Villages such as Abercrave, insufficient allocations are being proposed. Evidently, the level of allocation has not been informed by the apportioned distribution and is being inconsistently applied.

The result of this is that some Large Villages (such as Guilsfield) have a greater housing requirement than Large Villages with a greater range of facilities in an area identified as being suitable to accommodate additional growth (such as Four Crosses). In some instances (such as Guilsfield) this distribution is then further exacerbated by the over-allocation of sites as compared to the apportioned requirement. This is an incoherent strategy of distribution, from which the identified allocations do not logically flow and as such fail test CE1 of soundness. The distribution and allocations are not founded on the evidence base and as such fail test CE2 of soundness.

This is not to say that the over-delivery of dwellings should be resisted, as opportunities for sustainable development should be exploited. However, as the identified distribution is being exceeded in some settlements where opportunities for sustainable development exist, this should be applied consistently such that these opportunities can be exploited in all Towns and Large Villages both now and on a flexible basis in the future. This can be achieved by allocating additional sites, such as Plas Foxen, Four Crosses, within the LDP or by amending Policy H1 to allow for sustainable development adjacent to Development Boundaries. However, Policy H1 of the LDP does not allow for this, by placing an absolute constraint on development (other than for affordable housing) outside of the Development Boundaries.

Council Response:

0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: In order to address the issues identified above greater flexibility is required to be built into the housing policies set out in the LDP. Policy H1 as currently drafted should be revised to ensure that it includes a mechanism whereby sustainable sites, including those outside of the Development Boundary, will be considered in circumstances where a housing shortage has been identified.

The distribution of housing should be amended to reflect the sustainability credentials of each Town and Large Village, taking account of the level of main facilities in the settlement and whether or not they lie within the Central Growth Corridor.

The allocation of sites should be responsive to the distribution of housing (once amended as above) to provide for an equitable and justified level of development at each settlement based on its sustainability credentials.

Council Response:

0

**Question: 4b Reason For Request To Speak At Hearing And Subject**

Representation Texts: To explore the need for greater flexibility to be included within the LDP's housing policies and to consider the merits of the release of the site at Plas Foxen, Four Crosses.

Council Response:

0

Rep'n/Para/Policy AccessnNo DateLodgd Late? Status Modified Summary

2179.V1/4.0/ 17/07/2015  Summary: Policies for Making Planning Decisions - New Policy for Telecommunication Development

Source: Email Type: Objection Mode Written Status Maintained

Document:Draft Deposit Written Statement 2015, p.29, para.4.0

Issue: 2015: Deposit Draft-09.Development Management and Environment

Question Representation Texts

**Question: Council Response**

Representation Texts: The Council disagree with the proposed changes requested by the Representer. The Representer does not raise new issues or evidence which lead the Local Planning Authority to change its conclusions. The Development Management Polices apply to all new development (including new telecommunications development). Specific reference is made to the importance of utility service improvements including telecommunications development and the need for development to be in accordance with relevant national policy (including PPW chapter 12 - Infrastructure and TAN 19 - Telecommunications).

Council Response:

0

**Question: 3d. (i) Representation Details**

Representation Texts: We would take this opportunity to comment that we consider it important that there remains in place a telecommunications policy within the emerging Local Development Plan. It is recognised that telecommunications plays a vital role in both the economic and social fabric of communities. National Policy recognises the importance of telecommunications through paragraphs 12.11 to 12.13 of Chapter 12: Infrastructure & Services of Planning Policy Wales Edition 7 (July 2014). Technical Advice Note 19: Telecommunications (TAN19) also provides clear guidance as to the main issues surrounding telecommunications development. These include the legislative framework, siting and design issues, levels of consultation and issues surrounding electromagnetic fields (EMFs). Clear guidance is also given regarding what should be included within local plan (now LDP) policy.

Paragraph 12.12.1 of Planning Policy Wales states that:

“Development plans should set out policies and proposals for the location of telecommunications development...and including criteria-based policies to guide telecommunications developments...”

Paragraph 12.12.2 of Planning Policy Wales states that the criteria used in policy relating to telecommunications developments should be sufficiently flexible to accommodate technical changes and may be concerned with the siting and appearance of apparatus, including location and landscaping requirements designed to minimise the impact on amenity consistent with operational requirements.

As indicated above, the formulation of policy does not exist in isolation and there are numerous documents which will affect the formulation of any telecommunications policy, the most important of these being Planning Policy Wales. On this basis we would suggest that a concise and flexible telecommunications policy should be included within the emerging Local Development Plan. Such a policy should give all stakeholders a clear indication of the issues that telecommunications development will be assessed against. We would suggest a

Rep'n/Para/Policy	AccessnNo	DateLodgd	Late?	Status	Modified	Summary
2179.V1/4.0/		17/07/2015	<input type="checkbox"/>			Summary: Policies for Making Planning Decisions - New Policy for Telecommunication Development
Source: Email		Type: Objection		Mode	Written	Status Maintained

policy which reads;

“Proposals for telecommunications development will be permitted provided that the following criteria are met: -

(i) the siting and appearance of the proposed apparatus and associated structures should seek to minimise impact on the visual amenity, character or appearance of the surrounding area;

(ii) if on a building, apparatus and associated structures should be sited and designed in order to seek to minimise impact to the external appearance of the host building;

(iii) if proposing a new mast, it should be demonstrated that the applicant has explored the possibility of erecting apparatus on existing buildings, masts or other structures. Such evidence should accompany any application made to the (local) planning authority.

(iv) If proposing development in a sensitive area, the development should not have an unacceptable effect on areas of ecological interest, areas of landscape importance, archaeological sites, conservation areas or buildings of architectural or historic interest.

When considering applications for telecommunications development, the (local) planning authority will have regard to the operational requirements of telecommunications networks and the technical limitations of the technology.”

We would consider it appropriate to introduce the policy and we would suggest the following;

“Mobile communications are now considered an integral part of the success of most business operations and individual lifestyles. With the growth of services such as mobile internet access, demand for new telecommunications infrastructure is continuing to grow. The authority is keen to facilitate this expansion whilst at the same time minimising any environmental impacts. It is our policy to reduce the proliferation of new masts by encouraging mast sharing and siting equipment on existing tall structures and buildings.”

Council Response:

0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: Include a concise and flexible telecommunications policy (as proposed) within the emerging Local Development Plan.

*Question Representation Texts*

**Question: Council Response**

Representation Texts: The Council propose Focused Changes to the supporting text of policy DM(X) to ensure the LDP addresses matters raised by LDP representation 27.V24, in order to reflect the importance of the Historic Environment Record as a key source for heritage information, and to ensure the LDP meets the soundness tests.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: Section 8 of Policy DM1 should also note the importance of the 76,000 heritage assets within the Historic Environment Record for Powys and the need to consider the effects that adverse development might have on them. All heritage assets are material considerations of the planning process - not merely those that are nationally designated as your current list implies.

I would draw your attention to a comparison with Section 9 in Policy DM1 which contains a mixture of statutory and non-statutory items.

Council Response: 0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: Addition of item vii to section 8

8. vii. Historic assets listed in the Powys Historic Environment Record

Question Representation Texts

**Question: Council Response**

Representation Texts: This representation is considered to be in support of the Deposit Local Development Plan. It is noted that Policy DM1 (7) has been removed and replaced by policy SP2 - Safeguarding of Strategic Assets. This policy adequately addresses safeguarding of Strategic Assets (including Canals and Waterways). Also Policy TD3 - Montgomery Canal and Associated Development also seeks to protect the Canal from incompatible development. See focused changes for details.

Council Response: 0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: Paragraph 7(ii)d: Committee welcomes the specific mention of the Montgomery Canal, though it would like to see stronger protection afforded to it than 'must not compromise, or unacceptably adversely affect'.

Council Response: 0

*Question* *Representation Texts*

**Question: Council Response**

Representation Texts: The Council disagree with the proposed changes requested by the Representer. The representer does not raise new issues or evidence which lead the Local Planning Authority to change its conclusions. A prolonged period of marketing is defined by the Development Management Policies as at least 6 months. This is an established figure.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: 34.26 4.2.11 Refers to a prolonged period for marketing purposes is at least 6 months. 6 months is not seen as a prolonged period of time to market any property when considering any future planning changes/applications. How and where the property is marketed is not defined in the policy.

Council Response: 0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: Review the length of time for marketing a property, change from 6 months and extend significantly. For clarity, define how property should be marketed - locally so that communities are aware of the potential sale, nationally if need be and ensure substantial evidence of the marketing details are submitted with any subsequent planning application. When considering the application ensure the value the property has been marketed at a realistic sale price before granting any change of use/lifting of planning conditions etc.

*Question Representation Texts*

**Question: Council Response**

Representation Texts: The Council disagree with the proposed changes requested by the Representer. The Representer does not raise new issues or evidence which lead the Local Planning Authority to change its conclusions. A prolonged period of marketing is defined by the Development Management Policies as at least 6 months. This is an established figure and how marketing is to take place will be addressed at planning application stage.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: 4.2.11 The prolonged period for marketing any property before submitting a planning application for any change to its current status should be longer than 6 months. This is unrealistic and enables change of use applications to be successful far too easily in some cases.

Council Response: 0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: Redefine the definition for the prolonged period of marketing for any matter in the whole LDP policy.

Council Response: 0

Policy: DM1

Issue: 2015: Deposit Draft-09.Development Management and Environment

Question Representation Texts

**Question: Council Response**

Representation Texts: Council agrees with the comments. The DM policy has been reconfigured to include a specific section relating to the natural environment. This enables greater clarity between the Policy and the Proposals and Inset Map. The situation regarding SLA's and SINC's will be clarified in the Topic Paper.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: Natural Environment  
 The statutory and non-statutory environmental designations in Powys are listed in Criterion 9 of Policy DM1. In accordance with paragraph 5.4.6 of PPW, such policies should, wherever practical, be clearly identified on the proposals map or be capable of being identified from clear criteria in the policy. At present, not all listed designations are illustrated on the proposals map, for example, carbon stores and Wildlife Trust Reserves. Conversely, there are designations on the proposals map that are not listed in Policy DM1. To aid clarity, the Council should consider the use of a constraints map or appendices and confirm if non-statutory designations, such as Special Landscape Areas and SINC's, have been surveyed in Powys as they are not listed in Criterion 9 of Policy DM1. Conversely, there are designations on the proposals map that are not listed in Policy DM1. It should be clear to the users of the plan where designations are and which policies apply.

Policy DM1

In accordance with PPW, the Natural Environment topic paper recognises the importance of conserving native woodland and protecting and planting trees in Powys. It is therefore unclear why a locally-specific conservation policy is omitted from the plan.

Council Response: 0

(DAMs) have informed the site selection in the deposit plan (published January 2015). The authority should also explain how sites affected by flooding issues are phased in the housing trajectory and whether there are any impacts on the 5 year supply.

The LDP includes sites within flood risk zone C2 on account of extant planning permissions. It is important that the plan does not affirm these sites as allocations on an on-going basis throughout the plan period. Should existing permissions expire, any fresh applications will need to be reassessed in the light of up-to-date policy and guidance concerning highly vulnerable development and flood risk. The authority should ensure that the wording of policy H2 (3) is strong enough to ensure such developments will be refused in future.

Council Response:

0

**Question: 3d. (i) Representation Details**

Representation Texts: REPRESENTATION 1 OF 6

Background on The Coal Authority

The Coal Authority is a Non-Departmental Public Body sponsored by the Department of Energy and Climate Change (DECC). The Coal Authority was established by Parliament in 1994 to: undertake specific statutory responsibilities associated with the licensing of coal mining operations in Britain; handle subsidence claims which are not the responsibility of licensed coalmine operators; deal with property and historic liability issues; and provide information on coal mining.

The main areas of planning interest to the Coal Authority in terms of policy making relate to:

- the safeguarding of coal in accordance with the advice contained in Minerals Planning Policy Wales and MTAN2 in Wales;
- the establishment of a suitable policy framework for energy minerals including hydrocarbons in accordance with the advice contained in Minerals Planning Policy Wales and MTAN2 in Wales; and
- ensuring that future development is undertaken safely and reduces the future liability on the tax payer for subsidence and other mining related hazards claims arising from the legacy of coal mining in accordance with the advice in Planning Policy Wales and MTAN2 in Wales.

Background on Coal Mining Issues in Powys

Surface Coal Resources, Development and Prior Extraction

As you will be aware, the Powys Council area contains coal resources which are capable of extraction by surface mining operations. These resources outside of the Brecon Beacons National Park cover a small area in the north-east adjacent to Shropshire, and the area around Ystradgynlais

The Coal Authority is keen to ensure that coal resources are not unnecessarily sterilised by new development. Where this may be the case, The Coal Authority would be seeking prior extraction of the coal. Prior extraction of coal also has the benefit of removing any potential land instability problems in the process. Contact details for individual operators that may be able to assist with coal extraction in advance of development can be obtained from the Confederation of Coal Producers' website at [www.coalpro.co.uk/members.shtml](http://www.coalpro.co.uk/members.shtml).

As The Coal Authority owns the coal on behalf of the state, if a development is to intersect the ground then specific written permission of The Coal Authority may be required.

Rep'n/Para/Policy AccessNo DateLodgd Late? Status Modified Summary

1481.V1/4.2/DM1 15/07/2015  Summary: Policy DM1 - Strategic Planning Matters - Mineral Sterilisation

Source: Email Type: Objection Mode Oral (Examination) Status Maintained

Coal Mining Legacy

As you will be aware, the Powys Council area has been subjected to coal mining which will have left a legacy. Whilst most past mining is generally benign in nature, potential public safety and stability problems can be triggered and uncovered by development activities.

Problems can include collapses of mine entries and shallow coal mine workings, emissions of mine gases, incidents of spontaneous combustion, and the discharge of water from abandoned coal mines. These surface hazards can be found in any coal mining area, particularly where coal exists near to the surface, including existing residential areas.

Within the Powys Council area there are approximately 486 recorded mine entries. A range of other mining legacy features are present, in total The Coal Authority High Risk Development Area covers approximately 0.32% of the Council area.

Mine entries may be located in built up areas, often under buildings where the owners and occupiers have no knowledge of their presence unless they have received a mining report during the property transaction. Mine entries can also be present in open space and areas of green infrastructure, potentially just under the surface of grassed areas. Mine entries and mining legacy matters should be considered by Planning Authorities to ensure that site allocations and other policies and programmes will not lead to future public safety hazards. No development should take place over mine entries even when treated.

Although mining legacy occurs as a result of mineral workings, it is important that new development recognises the problems and how they can be positively addressed. However, it is important to note that land instability and mining legacy is not always a complete constraint on new development; rather it can be argued that because mining legacy matters have been addressed the new development is safe, stable and sustainable.

As The Coal Authority owns the coal and coal mine entries on behalf of the state, if a development is to intersect the ground then specific written permission of The Coal Authority may be required.

With specific reference to Policy DM1 - Strategic Planning Matter

Whilst The Coal Authority broadly supports the thrust of policy criterion 13 which seeks to prevent the sterilisation of minerals, sub criterion ii. is not considered to properly reflect the provisions of MPPW paragraph 15 and paragraphs 26 to 31 and 49 to 54 of MTAN2.

National planning policy allows for a range of exceptional circumstances within which coal working may be acceptable within 500m of settlements. The policy appears to be mixing up issues of safeguarding within MSAs with the aspect of where mineral working may not be acceptable. These aspects relate to different policy objectives and should be addressed separately.

Council Response:

0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts:

DELETE the following text

ii.Minerals are not of commercial interest within the following radii of a proposed development:

- a.100m (sand and gravel);
- b.200m (hard rock);
- c.500m (Coal); or

**Appendix 1 - Deposit LDP Reps & Responses by Refpoint, Cabinet 15-12-15**

Source: Email		Type: Objection		Mode	Oral (Examination)	Status Maintained

SO Policy DM1 should be AMENDED to read:

"13. The sterilisation of minerals in a safeguarded area unless:

- i. The development is temporary and restoration to enable future extraction of the mineral is agreed; or
- ii. The development is of a very minor nature such as an extension to a dwelling; or
- iii. There is an overriding need in the public interest for the development."

Also see our additional representation where we suggest a new policy is necessary to actually designate the Mineral Safeguarding Areas, this would be a more appropriate place to then address this issue of sterilisation.

Council Response: 0

**Question: 4b Reason For Request To Speak At Hearing And Subject**

Representation Texts: The specified concerns regarding Policy DM1.

To ensure that the LDP policy is compliant with the provisions of national planning policy and to make the issue of mineral sterilisation clearer for the plan user.

Council Response: 0

Question Representation Texts

**Question: Council Response**

Representation Texts: These comments are noted. However, no changes are considered necessary to ensure that the Plan is sound.

Council Response:

0

**Question: 3d. (i) Representation Details**

Representation Texts: Powys County Council: Revised Powys Deposit Draft LDP Public Consultation SUBMISSION ON BEHALF OF NATIONAL GRID

National Grid has appointed Amec Foster Wheeler to review and respond to development plan consultations on its behalf. We are instructed by our client to submit the following representation with regards to the current consultation on the above document.

National Grid owns and operates the high voltage electricity transmission system in England and Wales and operate the Scottish high voltage transmission system. National Grid also owns and operates the gas transmission system. In the UK, gas leaves the transmission system and enters the distribution networks at high pressure. It is then transported through a number of reducing pressure tiers until it is finally delivered to our customer. National Grid own four of the UK's gas distribution networks and transport gas to 11 million homes, schools and businesses through 81,000 miles of gas pipelines within North West, East of England, West Midlands and North London.

To help ensure the continued safe operation of existing sites and equipment and to facilitate future infrastructure investment, National Grid wishes to be involved in the preparation, alteration and review of plans and strategies which may affect our assets.

National Grid infrastructure within Powys County Council's administrative area

Electricity Transmission

National Grid has one high voltage overhead lines within Powys County Council's administrative area. This forms an essential part of the electricity transmission network in England and Wales.

Line Ref: 4YU line

Description: 400kV overhead transmission line from Swansea substation to Walham Substation in Tewkesbury via Rassau substation in Blaenau Gwent.

National Grid has provided information in relation to electricity transmission assets via the following internet link:

<http://www2.nationalgrid.com/uk/services/land-and-development/planning-authority/shape-files/>

Gas Transmission

National Grid has one high pressure gas transmission pipeline within the administrative area of Powys County Council:

Pipeline: FM28

Feeder Detail: Felindre to Three Cocks

National Grid has provided information in relation to gas transmission assets via the following internet link:

<http://www2.nationalgrid.com/uk/services/land-and-development/planning-authority/shape-files/>

National Grid requests that any High Pressure Major Accident Hazard Pipelines (MAHP) are taken into account when site options are developed in more detail. These pipelines form an essential part of the national gas transmission system and National Grid's approach is always to seek to retain our existing transmission pipelines in situ.

Electricity and Gas Distribution

Other electricity distribution networks in Powys are not operated by National Grid but regional distribution operators. Both Western Power Distribution and Scottish Power energy Networks own and operate the local electricity distribution network in Powys Council's administrative area. Wales and West Utilities owns and operates the gas distribution network in Powys Council's administrative area. Contact details for both distribution companies can be found at [www.energynetworks.org.uk](http://www.energynetworks.org.uk).

SPECIFIC COMMENTS

The National Grid Mid Wales Connection Project is proposing the construction of a new 400kV electricity connection, between Shropshire and Powys, to facilitate the transmission of wind generated electricity in Mid Wales to the existing electricity transmission in England. Further information on this project can be obtained via the project website: <http://www.midwalesconnection.com/>

Mid Wales Connection – Draft Route

[Map: see hard copy]

Further Advice

National Grid is happy to provide advice and guidance to the Council concerning our networks. If we can be of any assistance to you in providing informal comments in confidence during your policy development, please do not hesitate to contact us. In addition the following publications are available from the National Grid website or by contacting us at the address overleaf:

- National Grid's commitments when undertaking works in the UK - our stakeholder, community and amenity policy;
  - Specification for Safe Working in the Vicinity of National Grid High Pressure Gas Pipelines and Associated Installations - Requirements for Third Parties; and
  - A sense of place - design guidelines for development near high voltage overhead lines.
  - T/SP/SSW22 – Specification for safe working in the vicinity of National Grid high pressure gas pipelines and associated installations – requirements for third parties.
- <http://www2.nationalgrid.com/WorkArea/DownloadAsset.aspx?id=33968>

Please remember to consult National Grid on any Development Plan Document (DPD) or site-specific proposals that could affect our infrastructure. We would be grateful if you could add our details shown below to your consultation database:

Question Representation Texts

**Question: Council Response**

Representation Texts: The Council agree to include a reference to the protection of electricity transmission connections. It is noted that Policy DM1 (7) has been removed and replaced by policy SP2 - Safeguarding of Strategic Assets. This policy adequately addresses safeguarding of Strategic Assets (including electricity transmission connections). See focused changes for details.

Council Response:

0

**Question: 3d. (i) Representation Details**

Representation Texts: Policy DM1: Strategic Planning Matters

All proposals for development must not compromise, or unacceptably adversely affect, either on their own or in combination with existing or approved development, the following:

.....

- 7. Important material assets and their operation including:
  - i. Strategic infrastructure including:
    - a. Transport and strategic or town centre car parks and safeguarded corridors.
    - b. Reservoirs and water supplies.
    - c. Sennybridge Training Area.
    - d. Best and most versatile Agricultural land (Grades 1, 2 and 3a).
    - e. Windfarms in Strategic Search Areas
  - ii. Important tourism assets and visitor attractions
    - a. National Cycle Network routes.
    - b. National Trails.
    - c. Local Trails and public rights of way.
    - d. Montgomery canal.
    - e. Open access land and common land.
    - f. Royal Welsh Agricultural showground.
  - iii. Potential future routes along linear features such as former transport corridors and railway lines.

The proposed National Grid connection route potentially crosses strategic transport routes.

 7. Important material assets and their operation including:  
 i. Strategic infrastructure including:  
 a. Transport routes, strategic or town centre car parks and safeguarded corridors.  
 b. Reservoirs and water supplies.  
 c. Sennybridge Training Area.  
 d. Best and most versatile Agricultural land (Grades 1,2 and 3a).  
 e. Windfarms in Strategic Search Areas.  
 [Include] : f. Electricity transmission connections.  
 ii. Important tourism assets and visitor attractions  
 a. National Cycle Network routes.  
 b. National Trails.  
 c. Local Trails and public rights of way.  
 d. Montgomery canal.  
 e. Open access land and common land.  
 f. Royal Welsh Agricultural showground.  
 iii. Potential future routes along linear features such as former transport corridors and railway lines.  
 [And...]  
 4.2.12 Important Material Assets and their Operation. Powys contains many 'material' assets of national and regional importance which should be safeguarded. The LDP seeks to protect these assets and their operation. Various types of material asset are listed, but the list is not exhaustive. For instance, strategic infrastructure includes the east / west and north / south rail routes,  
 [Insert:] existing and proposed electricity transmission connections, [end]  
 trunk roads, proposed and committed bypass routes, reservoirs, and the Ministry of Defence's (MOD) Sennybridge training area. Any proposals for development, including wind turbines, within the MOD's Safeguarding Zones will be referred to the MOD for consideration and comment. These Safeguarding Zones ensure operational facilities such as explosive stores, radar facilities and range areas are not compromised.

Representation Texts: Policy DM1: Strategic Planning Matters

All proposals for development must not compromise, or unacceptably adversely affect, either on their own or in combination with existing or approved development, the following:

.....

- 13. "The sterilisation of minerals in a safeguarded area unless:
  - i. The development is temporary and restoration to enable future extraction of the mineral is agreed; or
  - ii. Minerals are not of commercial interest within the following radii of a proposed development:
    - a. 100m (sand and gravel);
    - b. 200m (hard rock);
    - c. 500m (Coal); or
  - iii. The development is of a very minor nature such as an extension to a dwelling; or
  - iv. There is an overriding need in the public interest for the development.

The proposed National Grid connection route runs through safeguarded sand and gravel and slate areas; however the policy acknowledges development in the area if there is an overriding need in the public interest.

3449.V1/4.2/DM1 17/07/2015  Summary: Policy DM1 - Proposed growth in Llanfechain

Source: Post or in person Type: Comment Mode Written Status Maintained

Document:Draft Deposit Written Statement 2015, p.29, para.4.2

Policy: DM1

Issue: 2015: Deposit Draft-03. Housing - Delivery and Infrastructure

Question Representation Texts

**Question: Council Response**

Representation Texts: The Council disagree with the proposed changes requested by the Representer. The Representer does not raise new issues or evidence which lead the Council to change its conclusions in relation to the Strategy or its choice of settlements designated as Large Villages.

Council Response:

0

**Question: 3d. (i) Representation Details**

Representation Texts: The present community council to date has expressed a view that it would prefer Llanfechain to be a small village in the Sustainable Settlement Hierarchy and is requesting to change from Large village. Either way there is a recommended growth of 11% (25 dwellings).

I refer now to the Preferred Strategy Consultation Draft (2012) 7.3.6 quote "However, it is acknowledged that an 11% growth will not be possible or desirable in every settlement due to insufficient land or facilities, constraints or local community aspirations"

Main point of my argument is that I consider the very inadequate road infrastructure immediate to the village to be a major constraint on further large development and likely engendered traffic increase.

34.26 Policy DM1 Strategic Planning Matters - 4.2 Infrastructure  
(I will refer to the P31 Inset Map: Llanfechain. Also UDP and draft LDP)

Llanfechain is a nucleated settlement based around a medieval church and bridging point of the River Cain. The older part of the village is a conservation area.

The roads to the north of the bridge are very narrow - single track for the most part, and have to carry heavy commercial traffic to serve the farms. Previous candidate sites in this northern section have not been selected on the grounds of flooding (zone C2) and poor road infrastructure. Also it has been deemed by planners that housing growth here could add to the traffic flow through the village out on the B4393. The UDP accords with the LDP update on this.

The road through the village from the bridge to the public house resembles a narrow country lane. Traffic movement is exacerbated by the on-road parking where adjacent properties have no accommodation for vehicles. For the most part there is no pavement. It is a very attractive road but quite dangerous.

Beyond the public house the road widens and straightens as it heads south-east to join the B4393. there are two junctions on this section. Opposite the Public House there is a connecting road to the school and Maes Mechain estate. Nearer the junction a road on the left serves an estate of about 30 houses. This is Maes Dinas estate completed about 25 years ago. It has no connecting roads/footways to the Maes Derw estate.

The junction with the B4393 is very dangerous. There is a 40mph limit on the B4393. Past community councils have asked unsuccessfully for this limit to change to 30mph. The B4393 descends from the west into a very steep bend before the junction. On moving out of the village road onto the B4393 visibility is limited looking west and traffic suddenly

appears as one pulls out. The village road is narrow, so it is tight pulling out to go east. The problem is to miss the kerb and miss moving into the path of oncoming vehicles. Large vehicles turning into the village need all the two lanes here to manoeuvre. My point is that everyone has to accept this junction as a challenge. The opportunity to create another entrance to the village was, to my mind, overlooked in the 1980's when two fields became available for housing development. If the school site (899) becomes deliverable for housing in the future resulting traffic increase would put further pressure on the junction with the B4393. The preferred candidate site (711) would also put pressure on this junction if housing is built here. In the Site Status report for 711 Highways comment as follows "...have concerns and recommend (orange) with more info required regarding the Maes Dinas access point. Number of dwellings will have to be limited to minimise impact on the junction with B road (red)".

The Maes Derw estate has no direct link to the village either by road or footway. Many of the properties are bungalows occupied by retired people who often use cars to visit the village amenities etc. The junction with the B4393 needs to be accessed with care as the speed limit on the B4393 is 40mph. Candidate site 1068 would place a further estate to the north of Maes Derw with resulting further traffic putting pressure on this junction. The Site status report says that Highways would require a second access point to reduce the impact on existing junction.

Is it appropriate in terms of sustainability to require the existing road infrastructure of Llanfechain to take on the potential traffic increase of an 11% growth in dwelling? It is hard to see a way of mitigating this problem other than by a rethink. Policy DM1 - Strategic Planning Matters 4.2 states that "All proposals for development must not compromise, or unacceptably adversely affect .....the following. 1. The integrity, role or objectives of a settlement ... or lead to unacceptable detrimental pressure on existing community facilities, public service provision or infrastructure"

Llanfechain Community Council, in seeking 'small village' designation, could look to an Enabling Policy which permits a minimal number of open market housing to support the provision of affordable housing adjacent to the village. A survey carried out by the Rural Enabling Officer in May 2012 shows strong support for affordable homes to be built in Llanfechain. Such very modest growth might meet the identified need for affordable homes, but lessen the potential traffic impact on the vulnerable road infrastructure.

Document:Draft Deposit Written Statement 2015, p.29, para.4.2

Policy: DM1

Issue: 2015: Deposit Draft-09.Development Management and Environment

Question Representation Texts

**Question: Council Response**

Representation Texts: The Council propose to amend the Policy to make reference to Council's support for the Nutrient management plan as suggested by the representor. See Focused Changes for details.

Council Response:

0

Page 437

**Question: 3d. (i) Representation Details**

Representation Texts: With regard to our interests, we are satisfied that the plan is sound and legally compliant. However, we recommend minor modifications to both the Local Development Plan (LDP) and the HRA with regard to the River Wye Special Area of Conservation (SAC). These modifications would confirm Powys Council's commitment to working with partners to achieve the favourable conservation status of the River Wye SAC by 2027, through the catchment-wide Nutrient Management Plan (NMP) process. The NMP is critical to underpinning the HRA's conclusion that the Local Development Plan has no likely significant effects on the River Wye SAC.

The River Wye SAC  
 Powys Local development Plan 2011-2026 (Document 34)  
 I would draw your attention to our previous response dated the 08 September 2014, our ref 127836 (copy attached). We can not see that a change has been made to the LDP committing Powys Council to the NMP "process".

TAKEN FROM SEPTEMBER 2014 RESPONSE  
 Habitats Regulations Assessment Screening Report (Document 19)  
 At the pre-deposit stage, the HRA Screening report concluded that the Local Development Plan had the potential to have likely significant effects on the following European sites in England:  
 - Downton Gorge SAC  
 River Clun SAC  
 River Dee and Bala Lake SAC  
 River Wye SAC  
 Likely significant effects on Downton Gorge SAC, the River Clun SAC and the River Dee and Bala Lake SAC have now been screened out. Natural England is satisfied with this conclusion.  
 Further screening work has been undertaken with regard to the River Wye SAC. Our comments on this are as follows.  
 The River Wye SAC

Mode Written

Status Maintained

Natural England welcomes the recognition that the River Wye SAC is sensitive to pollution, particularly water quality and nutrient enrichment (HRA Appendix 3 – Site vulnerabilities). We welcome the references to the Nutrient Management Plan for the River Wye SAC within the HRA.

The HRA states that “The River Wye Nutrient Management Plan addresses the in combination impacts of the LDP, surrounding development plans and existing discharge and abstraction along the river” (p45). It goes on to advise that the focus of additional HRA work should therefore be on other impacts, e.g. habitat loss, loss of connectivity and disturbance.

It is Natural England’s view that in order to rely on the NMP to avoid likely significant effects on the River Wye SAC, the LDP needs to firmly commit Powys Council to the NMP ‘process’ . Whilst the NMP itself has recently been finalised, further work is required to define the actions which partners will take in order to achieve favourable conservation status by 2027 . As these conversations are ongoing, Powys Council needs to be signed up to the NMP ‘process’ and committed to working with partners and to undertaking any actions which fall to it (by agreement). Stating this commitment within the LDP supports the HRA’s conclusion that the LDP does not result in likely significant effects on the River Wye SAC.

We recommend a minor modification to the supporting text for policy DM1 – Strategic Planning Matters; this policy includes a requirement that all proposals do not compromise, or unacceptably adversely affect the natural environment, integrity or conservation objectives of European sites (9.i) (® 16.26). We recommend amending the supporting text to include reference to the NMP and Powys Council’s commitment to this process and any resulting actions which should fall to the council.

We also recommend amending the HRA to explain that the NMP ‘process’ is ongoing and confirm Powys’ commitment to this. We suggest incorporating this into the paragraphs which already refer to the NMP (pages 42 & 45).

It is our view that the changes which we have recommended would make it clear that Powys are cooperating fully with the NMP process, and that this would underpin the HRA’s conclusion that there are no likely significant effects on the River Wye SAC as a result of the Local Development Plan.

Council Response:

0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: We recommend a minor modification to the supporting text for policy DM1 – Strategic Planning Matters; this policy includes a requirement that all proposals do not compromise, or unacceptably adversely affect the natural environment, integrity or conservation objectives of European sites (9.i) (® 16.26). Question Representation Texts

**Question: Council Response**

Representation Texts: The Council disagree with the proposed changes requested by the Representer. The Representer does not raise new issues or evidence which lead the Local Planning Authority to change its conclusions. The policy was prepared in accordance with national and regional guidance and is supported by the Topic Paper Community Facilities (January 2015).

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: The Theatres Trust is wary about the use of 'viability' as many community and cultural facilities are not viable in developer terms, but are essential social infrastructure for the health and well-being of the local community. It is also unclear at is meant by 'community facility'. The policy would provide better protection if it were worded along the lines of:  
 The council will resist the loss or change of use of existing community facilities unless:  
 - replacement facilities are provided on site or within the vicinity which meet the need of the local population, or  
 - necessary services can be delivered from other facilities without leading to, or increasing, any shortfall in local provision, and  
 - it has been clearly demonstrated that there is no community need for the facility or demand for another community use on site.  
 The policy also needs an entry in the glossary (also to support Policy C1, page 74) for 'community facility' recommend this all-encompassing description which obviates the need to list examples, and suggest "community facilities provide for the health, welfare, social, educational, spiritual, leisure and cultural needs of the community".

Council Response: 0

**Question: 3d. (ii) Desired changes to Document**

Issue: 2015: Deposit Draft-09.Development Management and Environment

*Question Representation Texts*

**Question: Council Response**

Representation Texts: The Council disagree with the proposed changes requested by the Representer. The Representer does not raise new issues or evidence which lead the Local Planning Authority to change its conclusions. The Development Management Policies adequately address the protection of public rights of way. Development Management Policies provide adequate consideration of all aspects of the natural and historical environment (including areas in conservation trust ownership).

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: Powys Ramblers support Policy DM1 7(ii)c. However, effects on public rights of way arise from individual planning applications and are site-specific rather than strategic in nature. This criterion should either be repeated in Policy DM2 or cross-referenced in that policy. The criteria in 7(ii)c should also include areas in conservation trust ownership with organisations such as the National Trust, RSPB and Elan Valley Welsh Water Trust. These organisations jointly own a significant proportion of the county.

Council Response: 0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: Repeat the reference to public rights of way in Policy DM2 or cross-reference. Add a further category: areas in conservation body ownership.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: Policy DM1 Strategic Planning Matters Part 13

The Mineral Products Association (MPA) objects to this policy in part 13 dealing with mineral safeguarding in that the policy omits an important consideration of safeguarding good practice.

The policy fails to meet standards of good practice as recommended by the British Geological Survey (BGS) in its good practice guidance published in 2011. Albeit this guidance is restricted to England, its principles have been recognised at Examination in Wales as being applicable to the Welsh context. This guidance recommends the inclusion of development management criteria for Local Plans, most of which the Draft revised LDP has, except for the important principle of prior extraction. Without this provision the policy lacks coherence, it falls short of good practice and it is unclear because it leaves out necessary issues such as redesign of development from consideration. It fails Soundness Tests CE1, CE2 and CE3.

Council Response: 0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: We therefore suggest the inclusion of another criterion in part 13 as follows,

“the mineral can be extracted satisfactorily prior to the incompatible development taking place; or”

Council Response: 0

**Question: 4b Reason For Request To Speak At Hearing And Subject**

Representation Texts: The Mineral Products Association (MPA) is the trade association for the aggregates, asphalt, cement, concrete, dimension stone, lime, mortar and silica sand industries. With the recent addition of The British Precast Concrete Federation (BPCF) and the British Association of Reinforcement (BAR), it has a growing membership of 450 companies and is the sectoral voice for mineral products. MPA membership is made up of the vast majority of independent SME companies throughout the UK, as well as the 9 major international and global companies. It covers 100% of GB cement production, 90% of aggregates production and 95% of asphalt and ready-mixed concrete production and 70% of precast concrete production. Each year the industry supplies £9 billion of materials and services to the £120 billion construction and other sectors. Industry production represents the largest materials flow in the UK economy and is also one of the largest manufacturing sectors.

Question Representation Texts

**Question: Council Response**

Representation Texts: The Council propose to amend Policy to make reference to addressing Key Issues and Objectives. It also agrees with the suggested text changes and changes to the designations list. See Focused Changes for details. The Council's position re definitions of landscape characteristics and qualities however can be found by referring to LANDMAP. Other comments are noted. However, no changes are considered necessary to ensure that the Plan is sound.

Council Response:

0

**Question: 3d. (i) Representation Details**

Representation Texts: As you are aware, we have consistently expressed concern about how the LDP will address the risk posed by future developments, including agricultural developments, in terms of the potential for additional nutrient loading on sensitive air and water environments. We note the issue has been considered in the 'Key Issues and Considerations for the LDP' and within the 'LDP Objectives'. Furthermore, Policy DM1 appears to be capable of dealing adequately with the matter for Development Management purposes under criterion 9. However, the explanatory text for criterion 9 does not make it obvious what this criterion is intended to do i.e. address one of the Key Issues and the LDP Objective, as there is no mention of air quality or water quality.

For this reason, we request that paragraph 4.2.13, The Historic and Natural Environment, is amended as follows (additional text shown in red - officer note - for red text, see original documentation):

Powys contains important historic and (semi) natural environments which are protected through designations made at European, National and local levels. Many of these natural and semi natural environments are sensitive to air and water pollution from developments, including agricultural developments. These natural and semi natural environments are valuable non-renewable resources which are also important for education, leisure, and the economy. Guidance on the protection of these resources is contained in PPW, TAN5 - Nature Conservation and Planning and Circulars. Supplementary Planning Guidance will be prepared where necessary. In order to assess the acceptability of a development proposal against criterion 9 of Policy DM1, proposals which would be likely to result in increased nutrient loading to the environment, such as intensive livestock units, will be required to assess the potential impacts in respect of water and air quality, to ensure that they do not adversely affect these natural and semi natural environments.

In addition to the comments given above, as per the advice contained within our letter dated 8th September 2014, we recommend that you provide further explanatory text to state that in relation to European Sites, the requirements of the Habitats Regulations will also need to be complied with in the consideration of any development proposals.

Part 9: The terms 'integrity' and 'conservation objectives' are not usually associated with all of the interests listed in Part 9 of the Policy. We therefore recommend that the first sentence of Part 9 of the Policy is amended to read: "The natural environment, including:"

Paragraph 9(i) of the policy refers to European Protected Habitats in addition to European Protected Sites. It is not clear if the policy is intending to encompass all habitats included on Annex I of the Habitats Directive. We would support this approach but suggest Annex I habitats are listed separately from European sites in the list in 9.

Further, to avoid an important gap in the coverage of the Plan, we advise that Part 9 of the policy should also include the following

Source: Email		Type: Objection		Mode: Oral (Examination)		Status: Maintained

- (i) Protected species, both those protected by the Habitats Directive, the Wildlife and Countryside Act.
- (ii) Habitats and species of principal importance for biodiversity conservation in Wales.

Paragraph 9(viii) To provide greater certainty to users of the Plan, a definition is required of what constitutes an 'important carbon store'. NRW would welcome further discussion with PCC on this matter.

Further, for improved clarity we recommend that paragraph 4.2.15 supporting the Policy should briefly define what is meant by the "characteristics and special qualities of Powys landscape"

We consider that the changes to DM1 outlined above are required to meet tests of Soundness CE1

(Rep Text is contained in Annex 1 to the NRW letter of 16 July)

Council Response:

0

Question Representation Texts

Question: 3d. (i) Representation Details

Representation Texts: In its current form the Local Plan does not meet the tests of soundness with regard to providing realistic, appropriate and flexible policies (criteria CE2 and CE4) and fails to have regard to the Wales Spatial Plan (criteria C2) for Newtown.

1) Newtown

Newtown is identified in the Wales Spatial Plan (2008 Update) as a "primary key settlement", with a key role in the Severn Valley area and important to the development of Central Wales. The town lies in a strategic transport corridor and is a foci for development in the Powys Local Growth Zone.

It is therefore particularly surprising that the town has only two employment allocations, both of which have delivery problems:

-Site MUA1 "St. Giles Golf Course" on the east side of Newtown is proposed for a development of a mix of employment and housing. This site has been allocated for employment uses since its inclusion in the Montgomeryshire Local Plan and, whilst it is recognised that the current proposal is for a mix of uses to assist the viability of the site's development, given the site's current use as a Golf Course it is considered that the deliverability of the entirety of this site within the Plan period is questionable; and

-Site EA1 "Llanidloes Road" has been allocated for employment uses since its inclusion in the Unitary Development Plan. In addition, a significant proportion of the site lies within a flood risk zone.

2) In addition, the employment site identified in the neighbouring settlement of Abermule also has deliverability issues as it falls within a flood risk area (DAM C2).

3) It is therefore considered imperative that, given the strategic importance of the settlement's role in the Central Wales area, additional employment opportunities should be provided in the settlement to ensure that a sufficient supply of land is available in the Plan period. This is reinforced within the LDP Strategy Topic Paper, June 2015 (paragraphs 4.6.1 & 4.6.2) which states:

"4.6.1 Economic Scenarios

The level of provision has been tested across a number of economic scenarios which indicate a relatively modest amount of land required to accommodate expansion of the economy. Nonetheless, the Plan is being produced when the Plan area is still experiencing the impact of the recession. There is, however, optimism and increasing confidence within the business community in the Plan area, evidenced by the recent work being undertaken by the Mid Wales Manufacturing Group and the Welsh Government on employment property development, and the establishment of a regional partnership structure and a strategic framework to promote and develop sustainable economic development in Mid Wales, namely "Growing Mid Wales", which will identify priorities and opportunities for strategic regional investment and comprises Ceredigion County Council and Powys County Council and other organisations and structures holding a specific interest in the economic well-being of the region. Therefore, by providing an ambitious level of employment land the Authority seeks to ensure that economic growth is not constrained within the Plan area,

4.6.2 Churn and Replacement of Existing Premises

by: Representation No

Filtered to show: (all of) Stage=V; Status=M

Rep'n/Para/Policy	AccessnNo	DateLodgd	Late?	Status	Modified	Summary
5611.V1/4.2/DM1		15/07/2015	<input type="checkbox"/>			Summary: Policy DM1 - Strategic Planning Matters - Newtown Employment/ Mixed Use Land Allocations
Source: Email		Type: Objection		Mode	Oral (Examination)	Status Maintained

The ENA identifies the primary driver of future employment land provision is the need to replace and upgrade the existing supply of premises, a significant amount of land has therefore been included to meet this specific requirement. Provision of land in this regard is considered appropriate given the enabling work currently being undertaken, as highlighted in Welsh Government Business Minister Edwina Hart AM's meeting with representatives of Powys Businesses on the 20th November 2014 where it was identified that a report is being prepared in regards to business accommodation in Powys and the possibility of Welsh Government re-entering the property market in response to concerns that existing property is becoming out-dated, not fit for modern business needs, in need of investment and the number of vacant suitable premises for business growth is just not available. This leads to the conclusion that the LDP must plan for the allocation of suitable land which is readily available and which can accommodate new, bespoke and fit-for purpose employment units.

4) Given the above, it is contended that the employment allocation proposals identified for Newtown do not meet the tests of soundness as they do not pay sufficient regard to the Wales Spatial Plan (Criteria C2), are sufficiently realistic or appropriate (Criteria CE2) and sufficiently flexible to deal with changing circumstances (Criteria CE4).

An additional site is required to help deliver the Plan's aspirations for Newtown and keep the Plan flexible, realistic and achievable.

Council Response: 0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: An additional allocated employment or mixed use site is required to help deliver the Plan's aspirations for Newtown and keep the Plan flexible, realistic and achievable.

Council Response: 0

**Question: 4b Reason For Request To Speak At Hearing And Subject**

Representation Texts: Glanhafren Hall and its surrounding land will play an important part in the future of Newtown, being located at the western entrance to the town and potentially providing a gateway to the town. Furthermore, the LDP's current proposals would sterilise the western edge of the town as a mineral safeguarding area. The long-term future of Newtown merits consideration at the hearings.

Question Representation Texts

**Question: Council Response**

Representation Texts: This Representation is noted. The Council agrees to amend the text to include a specific minerals safeguarding policy. See Focused Changes for details.

Safeguarding of minor sandstone formations and sand and gravel deposits with their attendant safeguarding margins is in line with national guidelines for safeguarding potential aggregates. The Minerals Planning Authority therefore considers no changes are necessary.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: Mineral Resource Safeguarding

The Proposals Maps apply an extensive resource safeguarding area to a large swathe of land along the River Severn. There are several problems with this blanket safeguarding of sand and gravel deposits.

Firstly, the blanket designation sterilises the long-term expansion of towns and villages in the Severn Valley. In particular it could be applied in a manner that sterilises the expansion of Newtown on its western side.

Secondly, this blanket designation is unrealistic because land on the edge of towns will have a higher land value that is likely to render it unviable for mineral working. Furthermore, it is highly unlikely that mineral working would be permitted in close proximity to an existing town due to its harmful impact on residential amenity.

Thirdly, it is inappropriate to safeguard the land around a grade II listed building (Glanhafren Hall) for mineral working, as mineral extraction would conflict with policies to protect the setting of a listed building.

In light of the above, the mineral resource safeguarding designation fails to be realistic and appropriate (criteria CE2). We suggest that this is corrected by amending the Proposals Maps to roll back the mineral safeguarding area from the urban edge.

Policy DM1.13(ii) only allows development where minerals are, "not of commercial interest". This is impractical in its current wording, as the majority of applicants for development proposals are not in a position to judge the commercial viability of mineral schemes either now or at some undetermined point in the future. Neither is the Council in a position to realistically judge the current commercial interest in mineral working, let alone judge potential future commercial interest. Section (ii) of policy MD1.13 is impractical and inappropriate and therefore should be removed.

Policy DM1.13(iv) is vague in its wording. It is not clear whether the natural expansion of a town would constitute an, "overriding need in the public interest". Greater clarity is needed on whether development is acceptable on the edge of existing towns. Suggested amended text is provided in section 3d(iii) below.

**Question: Council Response**

Representation Texts: This Representation is considered to be in support of the Deposit Local Development Plan. No changes are therefore required.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: POLICY DM1 7(ii)  
 Glandwr Cymru - the Canal & River Trust in Wales supports Policy DM1 7(ii), which states that development proposals must not compromise or unacceptably adversely affect important tourism assets and visitor attractions and their operation, including the Montgomery Canal, either on their own or in combination with existing or approved development. The Montgomery Canal is a much-loved and attractive waterway which is well-used for leisure walking, cycling and canoeing, and the restoration of the canal to full navigation is ongoing. The value of the waterway as a visitor attraction is therefore set to increase significantly over the plan period to 2026, in addition to the multi-functional roles of the waterway as leisure and recreation asset and a haven for wildlife and heritage.

Question Representation Texts

**Question: 3d. (i) Representation Details**

Representation Texts: To determine Policy RE1, instead of a sensible coherent policy approach to criteria, there is a referral back to all other policies in the plan. DM1 and DM2 are obviously the key policies in this respect, but they apply to all developments. Not only that, but there are inherent tensions even between these two policies, and some simple examples will suffice to show why this is the case. DM1 refers to strategic planning matters and the key sentence is that all proposals for development must not compromise or unacceptably adversely affect, either on their own or in combination with existing or approved development the following ... and then gives a list of 13 areas of concern.

Thus when we look at 8 on the historic environment we have the inclusion of settings of heritage assets – and the policy requires that these must not be compromised or unacceptably adversely affected. This wording follows that which is still contained in Policy E3 of the UDP and it means that there is in place a balancing exercise under which the acceptability of a scheme can be tested, thus allowing for the benefits to be weighed against the harm, as envisaged in very precise terms by PPWales.

However, when DM2 is reviewed the test is very different. Here development will be permitted where it complies with all of 15 criteria, and when we look at heritage assets we see that under DM2 criterion 4, proposals must protect, preserve and/or enhance sites and features of historic and built heritage importance and contribute to preserving local distinctiveness, sense of place and setting. It has been a failing of planning policies at the local level for many years that they fail to recognise that it is improbable that most development is going to be able to protect, preserve and enhance heritage assets.

Under the Court tests, even for Grade I listed buildings, there are situations where it may be acceptable for there to be a level of harm arising to a heritage asset, especially when one is dealing with setting rather than fabric, as a result of the need for the development. One has only to look at the very recent Garreg Lwyd decision to see how this operates in practice. It simply cannot be the case that on the one hand DM1 recognises that there has to be a test of acceptability, whereas DM2 sets out an absolute test that if a proposal does not preserve protect and/or enhance a heritage asset or its setting it will not be permitted.

The same goes for nature conservation where the requirements of DM1 in criterion 9 are inconsistent with those of DM 2 in criterion 3. All of the criteria in DM1 and DM2 need to be examined to see how it is possible for any of the conflicting requirements to be met by any scheme under both policies. Finally, criterion 11 of DM2 requires that development will be permitted if it complies with “The characteristics and special qualities of Powys landscape...and the visual amenity enjoyed by users of those areas”. This may raise again the issue of “incidental” in RE1, but apart from that it is simply not a credible policy criterion to require that something must comply absolutely with “characteristics and special qualities of the Powys landscape”.

There is no room for manoeuvre and this policy as set out is effectively saying that unless developments have no effects on the characteristics and special qualities of Powys, and no effects on heritage assets and no effects on nature conservation, then they simply cannot be permitted. That may of course be the intended theme underpinning the approach, but it is not a tenable one.

Council Response:

Document:Draft Deposit Written Statement 2015, p.29, para.4.2

Policy: DM1

Issue: 2015: Deposit Draft-09.Development Management and Environment

*Question* *Representation Texts*

**Question: Council Response**

Representation Texts: Whilst Woodlands are included in the Natural and Semi natural Green Spaces listed 4.2.5, the Council propose to amend the Development Management Policy to make specific reference to woodlands, trees and hedgerows which will largely address the Representors concerns. See Focused Changes for details.

Council Response:

0

**Question: 3d. (i) Representation Details**

Representation Texts: The list of topics under Strategic Planning Matters fails to include woodland. This is a serious omission, ignoring the Welsh Government's Woodlands for Wales Strategy. Woodland helps mitigate flooding, is a carbon store, is a source of education, recreation and employment and is critical for biodiversity. Furthermore, LDP Objective 11 wishes to see a net gain in biodiversity, this requires protection of existing biodiversity assets. I should like to see woodland as a separate numbered topic, however if that is not considered appropriate I should like to see them included under topic no 9, with at least woodlands in public ownership and those owned by charity safeguarded. Para 4.2.19 refers to carbon stores but fails to mention woodland.

Council Response:

0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: As a separate topic under DM1 I should like the following added:  
The integrity, management objectives and amenity value of woodlands:  
i in public ownership  
ii those owned or managed by charity

Council Response:

0

by: Representation No

Policy: DM1

Issue: 2015: Deposit Draft-09.Development Management and Environment

*Question Representation Texts*

**Question: 3d. (i) Representation Details**

Representation Texts: It is clear that both NRW and the County Ecologist had reservations about the ability of the Draft LDP policies to achieve proper conservation of biodiversity. These policies have not been significantly strengthened within the DDLDP and a number of recommendations from NRW and the Ecologist have not been implemented. Nutrient pollution is a problem in Powys's rivers and the Natural Heritage Topic Paper (Topic Paper) identifies the current status of 9 out of 13 Powys Special Areas of Conservation and 2 out of 3 Special Protection Areas as 'unfavourable'. These are among the most protected sites within the county; the poor status of these sites is evidence of the inadequacy of existing protections and monitoring and the need for strong, effective and clear protections within the planning system.

The Welsh Government is currently working on a Nature Recovery Plan (<http://gov.wales/consultations/environmentandcountryside/nature-recovery-plan/?lang=en>), as required by UN Convention on Biological Diversity, to address the deterioration of biodiversity in Wales. The consultation document recognises that many habitats and species are in decline and under pressure from land use change and pollution. Measures proposed to reverse biodiversity declines and restore degraded habitats include the integration of biodiversity values into plans and strategies. The LDP should have regard to the goals of this Welsh Government plan and contain aspirations and clear measures to actively seek through effective policies not only to conserve but also to improve biodiversity through the planning process.

Key priority 3 for Central Wales in the Wales Spatial Plan Area Strategies also sets out the goal of conservation of ecosystems and biodiversity.

1.Cumulative impacts: It is very important that policy DM1 is reworded to include cumulative evaluation with proposed developments. Currently there are several types of development, in particular single wind turbines and intensive livestock units, where multiple proposals are often under consideration concurrently. No proper assessment of potential cumulative impacts, which may have far-reaching implications for biodiversity and natural heritage, can be reached without consideration of other proposals within the planning system, as well as those consented or operational. As drafted the policy will not deliver acceptable cumulative impacts and thus conflicts with DDLDP conservation objectives.

2.Policy DM1 - first sentence: is not compliant with Regulation 62 of the Habitats Regulations, which does not allow for 'acceptability' to be part of the Regulation 61 test. This was pointed out by NRW and needs to be addressed, perhaps by appropriate rewording of DM1 (9).

3.Policy DM1 (9): Carbon stores: For this policy to be workable, a definition of the term 'important carbon stores' is required. This category should include trees, woodlands and peat soils (see Paragraph 2.4.11 and PPW7 5.2.9). See also Paragraph 4.2.19: Carbon Stores. The recognition of the importance of the carbon stores in the peat and dark soil deposits of the central Wales uplands is welcomed. Given the fragility and regeneration time scale for peat this resource must be afforded special protection. Peat is also essential to the control of water flow. Damage from concrete, access tracks and excavation will not only destroy existing peat, release carbon and create continuous die back but could have serious consequences for downstream flood risk. The LDP must give more weight to the conservation and regeneration of this important natural resource. There is a particular risk from the construction of upland windfarms. CPRW seriously questions why this aspect has been omitted as a primary consideration in the siting of renewable energy installations in the uplands. (PPW7 5.1.2)

4.Policy DM1 (9) Gap in coverage of the plan: NRW and the former County Ecologist recommended in response to draft LDP that DM1 (9) should be extended to include:  
 •UK Priority BAP habitats,  
 •Section 42 habitats and species of principal importance for biodiversity conservation in Wales,

Source: Email Type: Objection Mode Written Status Maintained

•Protected species, including those protected under the Habitats Directive and Wildlife and Countryside Act and the exclusion of these was identified by NRW as "an important gap in the coverage of the Plan". This requirement is also set out in TAN 5 3.2.6&3.3.2 and PPW 5.2.1-8&5.4.2. This advice has been only partially addressed and the remaining significant omissions undermine the potential effectiveness of the DDLDP. The current 'unfavourable' status of the majority of Special Areas of Conservation and Special Protection Areas (see above) demonstrates that these too should be included in DM1 (9) .

Council Response:

0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: Changes:

- 1.DM1 cumulative evaluation to be amended to include proposed developments as follows: ".....either on their own or in combination with proposed, approved or existing existing or approved development, the following:"
- 2.DM1 to be reworded to comply with Habitats Regulations,
- 3.DM1 (9) – insertion of definition of 'important carbon stores'. CPRW would suggest: Important carbon stores, including peat soils, trees and woodlands',
- 4.DM1 (9) – inclusion of further categories:
  - UK Priority BAP habitats,
  - Protected species, including those protected under the Habitats Directive and Wildlife and Countryside Act,
  - Special Areas of Conservation and Special Protection Areas,
- 5.DM1 (9) – amendment of category (ii) to read:
  - National (Wales) and Local Biodiversity Action Plan Habitats and Species
- 6.DM1 (9) Amendment of wording to read 'The natural environment, integrity or, conservation objectives or conservation status of.'

Question Representation Texts

**Question: Council Response**

Representation Texts: These comments are noted. However, no changes are considered necessary to ensure that the Plan is sound. The forthcoming Nature Recovery Plan is one of many pieces of legislation that will come into force during the lifetime of the Plan, to which the LDP will need to comply. Whilst we do not anticipate any problems in doing this there will be opportunities to review the LDP should that be necessary. Cumulative impacts of renewable energy proposals is dealt with in the revised RE1 Policy and an SPG is being considered with regard to intensive agricultural units.

The paragraph relating to important carbon stores will be removed.

The Landscape policy has been redrafted to take on-board all the representations made on the Deposit Plan to produce a clearer more positive landscape policy that fulfils the requirements of the European Landscape Convention.

Council Response:

0

**Question: 3d. (i) Representation Details**

Representation Texts: Requirement for County Landscape Officer

As a landscape organisation, it is of major concern to CPRW that there is now no statutory consultee with a remit to provide independent advice to planners on landscape or to monitor impacts. Powys County Council planners cannot rely on NRW as statutory consultee with regard to landscape. NRW's remit is strictly limited to designated landscapes and landscapes of national importance. Powys has no designated landscapes outside the BBNP, and many if not most developments will principally affect landscapes of local and regional importance (as defined by LANDMAP).

Without a County Landscape officer planners are unable either to make informed decisions on landscape impacts or to properly monitor landscape change.

In the absence of a landscape officer the plan is fundamentally unsound in terms of mechanisms for implementation and monitoring and fails soundness test CE3.

CPRW reiterates arguments made in the Manifesto (attached) concerning the dependence of the County's economic prosperity and the wellbeing of residents on the outstanding quality of the Powys landscape. Powys landscapes are a factor in business relocation and investment, recruitment, relocation of homeworkers, the self-employed and small enterprises and, of course, landscape quality underpins the vital tourism sector, a major and growing source of income and employment within the county. Powys has almost double the number of self-employed workers compared with the Welsh average (17.4% as opposed to 9%) and also the highest number of home workers. Both sectors are growing and bring a mix of varied skills as well as spend to the local economy, supporting local trades and contributing to community life and the viability of rural communities. These are not negligible considerations for a sustainable future for rural communities and a broader demographic. Conservation of landscape quality is therefore necessary to achievement of the objectives of the One Powys Plan and Wales Spatial Plan.

This view is supported by PPW 5.1.1:

"The natural heritage of Wales includes its geology, land forms and biodiversity and its natural beauty and amenity. It embraces the relationships between landform and landscape, habitat and wildlife, and their capacity to sustain economic activity and to provide enjoyment and inspiration. The natural heritage and valued landscapes of Wales are

Status Maintained

not confined to statutorily designated sites but extend across all Wales..."

and 5.1.2 sets out a clear requirement for local plans to properly protect landscapes and to have regard to Directives and Conventions (including the European Landscape Convention) to which the UK is signatory:

"The Welsh Government's objectives for the conservation and improvement of the natural heritage are to:

- Promote the conservation of landscape and biodiversity...
- Ensure that action in Wales contributes to meeting international responsibilities and obligations for the natural environment..."

Whilst paragraphs 2.4.13 and 4.2.16 reflect these national objectives, the policies within the DDLDP are not currently sufficient to ensure appropriate protections. Introducing robust policies and guidance that value and protect the quality of the Powys environment will inevitably promote economic viability and resilience, and wellbeing of residents.

CPRW reiterates comments made in the Manifesto (attached) regarding the application of the European Landscape Convention (ELC) to the Powys Local Development Plan. PPW7 is clear as to this requirement. The ELC requires signatories to integrate landscape conservation into plans:

- Using clear and explicit language and to
- Apply conservation aims (ie protection, management and planning) to all landscapes within plan area
- Recognise landscape in a holistic sense, ie acknowledge social, amenity, cultural, wellbeing and economic importance of landscape
- Understand the landscape baseline and identify and assess landscapes within the plan area
- Involve people in landscape planning and promote training and education in landscape policy, protection, management and planning
- Integrate landscape issues into all relevant plan policies
- Raise awareness of the value of landscapes, their role and changes to them

The ELC defines "landscape planning" as a strong forward-looking action to enhance, restore or create landscapes.

Natural England have prepared a checklist for the application of the ELC to local plans. Application of this checklist shows the DDLDP still falls far short of implementing the intentions of the ELC; the DDLDP is therefore unsound as it is in conflict with recommendations regarding landscape protection contained within PPW7. The checklist exercise, together with comments regarding compliance of the LDP with the requirements of the ELC (and PPW7) is set out in the attached pdf document.

Please also refer to attached European Landscape Convention checklist as applied to Powys Draft Deposit LDP.

Cumulative impacts Policy DM1: It is very important that policy DM1 is reworded to include cumulative evaluation with other proposed developments awaiting determination. Currently there are several types of development, in particular single wind turbines and intensive livestock units, where multiple proposals are often under consideration concurrently. No proper assessment of potential cumulative impacts, which may have far-reaching implications for biodiversity, visual and sensory landscape characteristics and natural heritage, can be reached without consideration of other proposals within the planning system, as well as those consented or operational. As drafted the policy fails to implement the necessary full cumulative assessment to avoid conflict with DDLDP conservation objectives.

Policy DM1.11: CPRW concur with NRW that the phrase 'characteristics and special qualities' requires clarification. The reference to visual amenity is welcome but currently ambiguous. CPRW feel the application of this protection to users of Powys landscapes and not just to users of adjacent protected landscapes needs to be made explicit.

(see also attached paper regarding the European Landscape Convention checklist)

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: Requirement for statutory landscape consultee to be addressed.

Changes required:

- DM1 cumulative evaluation to be amended to include proposed developments as follows:

".....either on their own or in combination with proposed, approved or existing existing or approved development, the following:"

- Policy DM1.11 to be revised along following lines: "The characteristics and special qualities of Powys landscape (as defined by LANDMAP and including broad, open uplands, peat moors, small hills and valleys, traditional field boundaries, small lanes, woodlands, rivers and streams, open views and relative absence of intrusive development) and adjacent protected landscapes (National Parks and Areas of Outstanding Natural Beauty) and the visual amenity enjoyed by users of both Powys landscapes and adjoining areas"

Paragraph 4.2.13 for clarity insert 'and historic environment' after 'cultural heritage' to read

'Environment Act the Council have a duty to conserve and enhance the wildlife, natural beauty, cultural heritage and historic environment of the Brecon Beacons National Park '

Question Representation Texts

Question: Council Response

Representation Texts: The Development Management policies have been redrafted to take on-board all the representations made on the Deposit Plan, this has resulted in a series of topic based Development Management policies. With regards to the omission of "Special Areas of Conservation" from this list. SACs are included within European Protected Sites (SAC/SPA/RAMSAR) so no changes are considered necessary. With regards to the objection to Paragraph 10 of DM1 "The achievement of the Water Framework Directive's overarching objectives." this paragraph was drafted to include representations made following the first consultation on the deposit plan (July 2014) again the council believe that no further changes are necessary. The same can be said for paragraph 4.2.15 this is text that has been drafted in consultation with statutory consultees.

Council Response:

0

Page 466

Question: 3d. (i) Representation Details

Representation Texts: In our objections, we have considered:

The Water Framework Directive

NRW ambitions for all water bodies

In respect of its River Basin Management Plans (RBMPs), there is an objective to achieve 50% of all water bodies at Good or better status (or potential) by 2015 and work towards the delivery of objectives for Protected Areas such as Natura 2000 sites and Bathing Waters. This target relates to the whole of Wales and so takes into account parts of the Severn and Dee River Basins and the whole of the Western Wales River Basin. CPRW therefore argues that a 'pollution neutral' position is too low to achieve NRW's ambitions. Local authorities, along with other public bodies, have a general responsibility not to compromise the achievement of UK compliance with EU Directives, including the WFD. Non-compliance with EU Directives could potentially lead to the European Commission bringing legal proceedings and fines against the UK.

The opinion of the Advocate General (AG) delivered on 23 October 2014. AG is proposing to the European Court the following interpretation of the WFD:

1) Article 4, paragraph 1 a) i) of the WFD, must be interpreted as meaning that the Member States are required (except if they apply a derogation in line with the WFD) to refuse to authorize a project if it could cause a deterioration in the status of a waterbody (WB), or jeopardise the achievement of a good surface water status or good ecological potential and good surface water chemical status by the date prescribed by the WFD;

2) The concept of "deterioration" in Article 4, paragraph 1 a) i) of the WFD must be interpreted as meaning alterations as regards a substance or a quality element used in the assessment of ecological status within the meaning of Annex V of the Directive, without this alteration necessarily resulting in a change of classification within the meaning of the Annex. This means that non-deterioration refers not only to non-deterioration between classes, but also within classes.

1. "All proposals for development must not compromise, or unacceptably adversely affect, either on their own or in combination with existing or approved development, the following"

We object to the double qualification highlighted above in italics and underlined.

The reasons for this objection are:- it implies two standards – one which does not compromise, and one which does not unacceptably adversely affect. This is confusing and potentially indicates that there are two standards.

We object to the use of the word "unacceptable".

The reason for this objection is that it is not defined to whom it would be unacceptable – the developer or the Planning Authority or Natural Resources Wales or EU regulations

such as the Water Framework Directive?

The following change should therefore be made. Replace "All proposals for development must not compromise, or unacceptably adversely affect, either on their own or in combination with existing or approved development, the following" with "Development which could cause a deterioration in the status of a water body and jeopardise the achievement of a good surface water status or good ecological potential or good surface water chemical status will be refused"

2. Paragraph 9 of DM1 – the list of protected sites.

We object to the omission of "Special Areas of Conservation" from this list. This should be inserted into the list.

3. Paragraph 10 of DM1 "The achievement of the Water Framework Directive's overarching objectives."

We object to the qualification 'overarching objectives'

The reason for this objection is that the term 'overarching objective' implies that some details of the Water Framework Directive may be disregarded. The term should be deleted.

4. 4.2.15. 4.2.15 Achievement of Water Quality Standards in line with the Water Framework Directive.

We object to the following part of 4.2.15 "Development proposals that encourage a 'pollution neutral' position represent a means through which growth may be allowed whilst ensuring pollution does not damage the integrity of designated sites and their ability to support the features for which they are designated"

The reasons for this objection are:

a. 'Pollution neutral' is not a clear and precise statement. It could be interpreted as an acceptance of a level of pollution in a water course or, alternatively, as permission to compensate for introducing a new source of pollution by making unrelated improvements in another source of pollution. This is again contrary to the Advocate General opinion cited above (in particular "the Member States are required (except if they apply a derogation in line with the WFD) to refuse to authorize a project if it could cause a deterioration in the status of a waterbody (WB), For example. The following map is taken from the Water Watch Wales website (data from Natural Resources Wales) and illustrates a selection of Water Framework Directive (WFD) water bodies in Powys.

[MAP AND LEGEND INSERTED (see hard copy)]

From the legend opposite there are examples of water bodies in Powys which are classified 'poor'.

A development proposal within a 'poor' waterbody area that is 'pollution neutral' implies that it would be acceptable to maintain the 'poor' status of that waterbody.

This conflicts with the LDP Objective 11 which states "and where possible to ensure development enhances them and produces a net gain for biodiversity"

There is we believe a mismatch between the objective and the policy, and the policy is weaker than the ambitions of NRW and the requirements of the WFD.

The following change should therefore be made. Deletion of all of "Development proposals that encourage a 'pollution neutral' position represent a means through which growth may be allowed whilst ensuring pollution does not damage the integrity of designated sites and their ability to support the features for which they are designated"

b. We object to the use of the word 'encourage' in 4.2.15 as in "Development proposals that encourage a 'pollution neutral' position". How can a development proposal encourage something? A development proposal either can reduce pollution or can increase pollution – it cannot encourage...."  
 This statement should be re-drafted in a way which reflects the ambitions of the WFD, the opinion of the Advocate General and NRW through incorporation of a requirement that Development which could cause a deterioration in the status of a water body and jeopardise the achievement of a good surface water status or good ecological potential and good surface water chemical status will be refused.

We object to the qualification 'overarching objectives'

The reason for this objection is that the term 'overarching objective' implies that some details of the Water Framework Directive may be disregarded. The term should be deleted.

4. 4.2.15. 4.2.15 Achievement of Water Quality Standards in line with the Water Framework Directive.

We object to the following part of 4.2.15 "Development proposals that encourage a 'pollution neutral' position represent a means through which growth may be allowed whilst ensuring pollution does not damage the integrity of designated sites and their ability to support the features for which they are designated"

The reasons for this objection are:

a. 'Pollution neutral' is not a clear and precise statement. It could be interpreted as an acceptance of a level of pollution in a water course or, alternatively, as permission to compensate for introducing a new source of pollution by making unrelated improvements in another source of pollution. This is again contrary to the Advocate General opinion cited above (in particular "the Member States are required (except if they apply a derogation in line with the WFD) to refuse to authorize a project if it could cause a deterioration in the status of a waterbody (WB),  
For example. The following map is taken from the Water Watch Wales website (data from Natural Resources Wales) and illustrates a selection of Water Framework Directive (WFD) water bodies in Powys.

[MAP AND LEGEND INSERTED (see hard copy)]

From the legend opposite there are examples of water bodies in Powys which are classified 'poor'.

A development proposal within a 'poor' waterbody area that is 'pollution neutral' implies that it would be acceptable to maintain the 'poor' status of that waterbody.

This conflicts with the LDP Objective 11 which states "and where possible to ensure development enhances them and produces a net gain for biodiversity"

There is we believe a mismatch between the objective and the policy, and the policy is weaker than the ambitions of NRW and the requirements of the WFD.

The following change should therefore be made. Deletion of all of "Development proposals that encourage a 'pollution neutral' position represent a means through which growth

may be allowed whilst ensuring pollution does not damage the integrity of designated sites and their ability to support the features for which they are designated”

b. We object to the use of the word ‘encourage’ in 4.2.15 as in “Development proposals that encourage a ‘pollution neutral’ position”. How can a development proposal encourage something? A development proposal either can reduce pollution or can increase pollution – it cannot encourage....”

This statement should be re-drafted in a way which reflects the ambitions of the WFD, the opinion of the Advocate General and NRW through incorporation of a requirement that Development which could cause a deterioration in the status of a water body and jeopardise the achievement of a good surface water status or good ecological potential and good surface water chemical status will be refused.

Policy: DM1

Issue: 2015: Deposit Draft-07.Employment, Retail and Tourism

Question Representation Texts

**Question: Council Response**

Representation Texts: This Representation is noted. The Council agrees to amend the text of Policy DM1 to make specific reference to public houses. See Focused Changes for details.

The Council disagree with the proposed changes to increase the minimum period for marketing from six to 12 or 18 months as requested by the Representer. No new evidence was submitted to prove the need for this request which would lead the Local Planning Authority to change its conclusions.

Council Response:

0

**Question: 3d. (i) Representation Details**

Representation Texts: Policy DM1 and the explanatory text at 4.2.11 give protection to existing shops, and services but do not mention public houses. Pubs should be given specific mention as important facilities for the community, often providing a valuable role in small villages and rural areas. This is the approach adopted in the current Unitary Development Plan (7.10.1 and Policy RP10).

Para 4.2.11 refers to the need for a flexible approach to the use of existing premises and suggests a period for marketing purposes as at least six months. In Powys a period of six months is not sufficient to successfully market a pub. Many public houses have been closed for periods of up to four years before re-opening as a pub. The text could be improved by allowing a period of 12 or 18 months for marketing.

Examples of pubs that have been closed for extensive periods are Knighton Hotel, Knighton (closed for 4years 1994-8), Castle, Rhayader (closed for a few years in the 1990s) and the Harp, Old Radnor (rescued by the Landmark Trust in 1972 after being closed for a few years). There are similar examples in Breconshire and Montgomeryshire.

Council Response:

0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: Amend marketing period for pubs to 12 months or 18 months

Issue: 2015: Deposit Draft-09.Development Management and Environment

*Question Representation Texts*

**Question: Council Response**

Representation Texts: Having considered the representations recieved on the Development Management Policies the Council propose a focused change to Policies DM1, DM2 & DM3. The focused change proposes a suite of Development Management Policies to address different issues rather than 3 comprehensive Policies. See Focused Changes for details. The Council disagree with the proposed changes requested by the Representor in relation to visual amenity by users and consideration of carbon stores. The Representor does not raise new issues or evidence which lead the Local Planning Authority to change its conclusions.

Council Response:

0

**Question: 3d. (i) Representation Details**

Representation Texts: Policy DM1 (R.34.26)

Our client has significant concerns regarding the inclusion of 'compromise' in Policy DM1. The expectation that all proposals for development will not 'compromise' the defined criteria is not realistic or appropriate and is likely to lead to differing interpretation. In many instances this would lead to a clear conflict with national policy.

The inclusion of 'compromise' is also unnecessary given that the policy already requires proposals to not 'unacceptably adversely affect' the defined criteria. This is more than adequate on its own and much more easily defined. As a result, Policy DM1 fails the tests of soundness (C2, CE2). To remedy this reference to 'compromise' should be deleted.

Turning to the criteria set out in Policy DM1, the safeguarding of 'windfarms in Strategic Search Areas' under Criterion 7(i)(e) is supported.

Reference to 'important carbon stores' in Criterion 9 (viii) should be supported by additional text in the explanatory paragraphs recognising the potential for development proposals to mitigate and restore resources, such as peatlands, through suitable land management practices (as supported by PPW, Para. 5.4.5). Development proposals that effect carbon stores should be considered on a case by case basis through the development management process.

The scope of Criterion 11 has been extended beyond that contained in the July 2014 Deposit Draft to include the "visual amenity enjoyed by users". This requirement is likely to be subject to differing interpretation and could unnecessarily restrict development. It is therefore recommended that it is deleted from Policy DM1.

Policy DM1, or the supporting explanatory text, should also make it clear that the assessment of development proposals against the defined criteria must form part of a balancing exercise. In doing so, this would allow any perceived harm under one specific area to be weighed against the wider benefits.

Question Representation Texts

**Question: Council Response**

Representation Texts: Having considered the representations recieved on the Development Management Policies the Council propose a focused change to Policies DM1, DM2 & DM3. The focused change proposes a suite of Development Management Policies to address different issues rather than 3 comprehensive Policies. See Focused Changes for details.

Council Response:

0

**Question: 3d. (i) Representation Details**

Representation Texts: It is agreed that the test set out in the opening paragraph of LDP Policy DM1 relating to not "unacceptably adversely affect" is the correct test and one that is regularly used in development plans. The use of the term "compromise" is less regularly used and therefore less well defined and tested in land use planning terms. It is considered that the term "unacceptably adversely affect" test is sufficient and the "compromise" is undefined, unnecessary and potentially confusing.

For the reason set out above, it is considered that LDP Policy DM1 in its current form fails to meet the Coherence and Effectiveness (CE2) test of soundness. References in the accompanying paragraphs 4.2.1 to 4.2.17 to national policy and guidance is welcomed and ensures that the Coherence and Effectiveness (CE4) test is met.

Council Response:

0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: In the opening paragraph of LDP Policy DM1, delete "compromise, or".

Document:Draft Deposit Written Statement 2015, p.36

Policy: DM2

Issue: 2015: Deposit Draft-03. Housing - Delivery and Infrastructure

*Question* *Representation Texts*

**Question: Council Response**

Representation Texts: The Council disagree with the proposed changes requested by the Representer. The Representer does not raise new issues or evidence which lead the Local Planning Authority to change its conclusions.

Welsh Water provided comments on the LDP during the deposit period. They raised no objection to the proposed housing allocations in Presteigne. They stated that the local sewerage network could accommodate foul flows in relation to proposed allocations however off site sewers may be required which could be provided through the sewer requisition scheme under Sections 98-101 of the Water Industry Act 1991. They also stated that Presteigne Wastewater Treatment Works (WwTW) has limited capacity and dependant on the pace and build rate of development there will ultimately be a time when increased capacity is required. Should developers wish to proceed in advance of any regulatory improvements then financial contributions from developers are required to fund the necessary improvements.

These sewerage capacity issues are noted in Appendix 1 of the plan and any new development of allocations in Presteigne will need to overcome these issues.

No housing allocations are proposed in Norton as it is categorised as a small village in the LDP. Any infill development in this village will need to conform with the LDP Development Management policies. This will negate any unacceptable adverse effects relating to utilities on the surrounding environment.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: Sewerage Capacity in Presteigne and Norton. Of significant concern is the lack of sewerage capacity in the area. Recent developments have been hampered by Welsh Water objections stating that the system has reached capacity. The Town Council is pressing for capital investment urgently as without this all plans for development will be unable to proceed. The County Council also needs to press for urgent action by Welsh Water. If no action is taken the LDP may well have run out before the necessary infrastructure is in place.

Council Response: 0

*Question Representation Texts*

**Question: Council Response**

Representation Texts: The Council disagree with the proposed changes requested by the representor. The representor does not raise new issues or evidence which lead the Local Planning Authority to change its conclusions. Development Management Policy states that 'proposals that generate significant travel demands will only be permitted where adequate public and other sustainable forms of transport are incorporated as part of the proposal and are consistent with the role and function of the transport network'. Planning Obligations Policy enables contributions to support sustainable modes of trasport, improved traffic management and rights of way in relation of new development in association with new development.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: Significant new housing development is stated as only being permitted where adequate public and other sustainable forms of transport are incorporated as part of the proposal and are consistent with the role and function of the transport network. The Council needs to consider the consistency of this statement with the current and any future plans to cut bus services, plans which will leave some towns and large villages without public transport.

Council Response: 0

Daeth yr Asesiad i'r casgliad nad oedd byggythiad na pherygl i'r datblygiad o fewn y Cynllun, yn amodol ar effaith gronol y polisiâu, ac y byddai mwyafrif y safleoedd yn gallu ymdopi â chostau sy'n gysylltiedig â gofynion polisiâu. Dan y polisiâu arfaethedig, byddai angen i unrhyw oblygiadau cynllunio sy'n gysylltiedig â mesurau lliniaru'r laith Gymraeg a Diwylliant fod yn berthnasol, yn angenrheidiol ac yn ymwneud â maint y datblygiad a bydd yn benodol i'r datblygiad er mwyn osgoi gofynion cyfuno uchaf Adran 106 neu fel y cyflwynwyd gan y Rheoliadau. Manylion pellach i'w gweld yn Rhwymedigaethau Cynllunio - Canllawiau Cynllunio Atodol. The Council propose to amend its policy approach to Welsh Language and Culture to address issues raised in the representation and to ensure its policy approach is consistent with National Policy. See Focused Changes for details. The amended Welsh Language Policy approach applies to the higher tier settlements listed in the Policy and these settlements are identified on the proposal maps. The Viability Assessment of the Plan included an assessment of the impact on development viability of the emerging LDP policies to ensure that the level of affordable housing and other policy requirements (including emerging Welsh Language and Planning Obligations Policy) where appropriate and if they would add inviable costs of development. The Assessment concluded that development, subject to the cumulative impact of the policies, within the Plan was not threatened nor put at risk and that the majority of sites would be able to bear the costs associated with policy requirements. Under the proposed policy approach any Planning Obligations associated with Welsh Language and Culture mitigation measures will need to be relevant, necessary and related to the scale of development and will be specific to the development to avoid the maximum pooling requirements of Section 106 or as introduced by the Regulations. Details will be further explained in Planning Obligations - Supplementary Planning Guidance."

**Question: 3d. (i) Representation Details**

Representation Texts: Welsh Language

Compliance with TAN 20

In accordance with TAN 20, the SA of Powys's LDP assessed the impact of the spatial strategy, policies and allocations on the Welsh language and was found to have an overall positive impact. To comply with TAN 20, the findings of the SA on the Welsh language should be included in the reasoned justification to Policy DM2. The SA of the plan assessed the implication of the housing requirement and all the components of housing supply on the Welsh language, which included an allowance for windfall sites.

To align with TAN 20, applications on non-allocated sites should not be subject to a further assessment of impacts on the Welsh language. The authority should explain why Criterion 15 of Policy DM2 is seeking to refuse applications on the basis of the Welsh language when the SA has evidenced a positive impact from all proposed development in the plan. Specifically, Criterion 15 (i) is seeking to refuse housing development in Welsh-speaking strongholds, which does not lead to more than a 5-year housing land supply. On this basis, it is unclear how the requirement for a 5-year supply will be maintained and whether it applies to individual settlements or the plan area. Similarly it is unclear what

**Question: Council Response**

Representation Texts: These comments are noted, however Severn Trent Water have a planned project to update the sewage treatment works in Llanfechain (2017). This should address the concerns raised.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: 5) INADEQUATE SEWAGE SYSTEM  
The Uanfechain sewage works and infrastructure was constructed over 50 years ago and to serve a much smaller village. In the intervening years the number of dwellings has probably doubled. The modern family lifestyle also means a much greater water usage for the individual householder. There is obviously potential for over-load of the sewage treatment plant, at peak times, which could lead to environmental pollution, or sewage "backing-up" within the system.

If the village is re-classified as a "large village" this will trigger additional "Windfall developments" which would create a greater load on the plant.

The Severn Trent Water Authority should be lobbied to upgrade / re-construct the works. This should be a comprehensive civil engineering project to include new trunk sewers to serve not only the new areas, but also to existing dwellings, not on the mains system. This should be undertaken before any further housing development areas are scheduled.

It would be criminally irresponsible of the Authority to schedule any further large scale housing whilst knowing that there is a major and increasing risk of environmental pollution.

**Question: Council Response**

Representation Texts: This Representation is noted. The Council agrees to amend the text to provide clarity with regards to buffer zones and existing minerals operations. See Focused Changes for details.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: Policy DM2 – sensitive development must not take place within the buffer zone of the following operations (unless justified by detailed analysis):  
Hard rock, coal, sand and gravel

1) Wording is not particularly helpful as it isn't clear what this applies to. Buffers are identified around existing operations and should be identified around any new operations and any extensions to existing operations. A change in wording would help address this.

2) There doesn't appear to be any explanation within the justification [DM2 -Criterion 12] as to what 'detailed analysis' would be undertaken. It would be helpful to explain why the policy has been included and that there may be circumstances in which the policy won't be so rigorously applied, for example, where encroachment into a buffer zone has already occurred.

Council Response: 0

Question Representation Texts

**Question: Council Response**

Representation Texts: The Council agree to make the following changes: Insert "disturbance to protected species" into 'Dark Skies and External Lighting Policy'. Insert " Thought needs to be given on how external lighting schemes can avoid potential impacts to nocturnal wildlife, particularly protected species, such as bats, otters and badgers. Dark wildlife movement corridors should be left, e.g. no external lighting of boundary habitat features, wildlife corridors, and watercourses." following policy DM1 in Dark Skies and external lighting supporting text. Insert: "Welsh Circular 10/99 Planning Requirement in Respect of the Use of Non-Mains Sewerage incorporating Septic Tanks in New Development" and will need to demonstrate that the quality of surface and groundwaters will not be adversely effected (in line with Water Framework Directive objectives)". after 'Any non mains sewerage proposal must comply with' in the utilities supporting text. Insert "Further information is found in TAN 15 – Development and Flood Risk and The Chief Planning Policy Officers Letter (9th January 2015) -Planning Policy on Flood Risk and Insurance Industry Changes." into the last sentence of the supporting text for the Development and Flood Risk policy.

Council Response:

0

**Question: 3d. (i) Representation Details**

Representation Texts: Policy DM2 – Detailed and Site Specific Planning Matters  
 © 34.28 We note the reference to TAN15 in paragraph 4.2.31. As you are aware, on 9th January 2014, Welsh Government sent a letter to all Chief Planning Officers to clarify national planning policy in respect of development and flood risk. Among other matters, the CPO letter sets out flood consequence assessment (FCA) requirements for individual planning applications, including the need to take account of the potential impact of climate change including a flood event which has a 0.1% (1 in 1000 year) probability of occurrence.

The implications of this are that where we are consulted on proposed developments located within an area shown to be at risk from tidal flooding, we will advise that an allowance for climate change should be applied for the 0.1% tidal event. Our advice for proposed developments within areas at risk from fluvial flooding has not changed.

To aid clarity for future developers on the requirements for FCAs, reference to this letter to Chief Planning Officers should be included in paragraph 4.2.31.

(Rep Text contained in Annex 1 to NRW letter)

Criterion 11: Whilst we generally welcome this criterion and the clarification provided in paragraph 4.2.40, as lighting has the potential to impact on protected species, especially bats, we suggest that protected species are also included in the criterion.

4.2.15 Achievement of Water Quality Standards in line with the Water Framework Directive.

NRW suggest that the following wording is incorporated, to demonstrate that the WFD is at the heart of LDP policy:

Question Representation Texts

**Question: Council Response**

Representation Texts: The Council disagree with the proposed changes requested by the Representer. The DM policy has now been reconfigured to include specific sections which should improve the clarity and remove any potential for misunderstanding between its constituent parts.

Council Response:

0

**Question: 3d. (i) Representation Details**

Representation Texts: To determine Policy RE1, instead of a sensible coherent policy approach to criteria, there is a referral back to all other policies in the plan. DM1 and DM2 are obviously the key policies in this respect, but they apply to all developments.

Not only that, but there are inherent tensions even between these two policies, and some simple examples will suffice to show why this is the case. DM1 refers to strategic planning matters and the key sentence is that all proposals for development must not compromise or unacceptably adversely affect, either on their own or in combination with existing or approved development the following ... and then gives a list of 13 areas of concern. Thus when we look at 8 on the historic environment we have the inclusion of settings of heritage assets – and the policy requires that these must not be compromised or unacceptably adversely affected. This wording follows that which is still contained in Policy E3 of the UDP and it means that there is in place a balancing exercise under which the acceptability of a scheme can be tested, thus allowing for the benefits to be weighed against the harm, as envisaged in very precise terms by PPWales.

However, when DM2 is reviewed the test is very different. Here development will be permitted where it complies with all of 15 criteria, and when we look at heritage assets we see that under DM2 criterion 4, proposals must protect, preserve and/or enhance sites and features of historic and built heritage importance and contribute to preserving local distinctiveness, sense of place and setting. It has been a failing of planning policies at the local level for many years that they fail to recognise that it is improbable that most development is going to be able to protect, preserve and enhance heritage assets. Under the Court tests, even for Grade I listed buildings, there are situations where it may be acceptable for there to be a level of harm arising to a heritage asset, especially when one is dealing with setting rather than fabric, as a result of the need for the development.

One has only to look at the very recent Garreg Lwyd decision to see how this operates in practice. It simply cannot be the case that on the one hand DM1 recognises that there has to be a test of acceptability, whereas DM2 sets out an absolute test that if a proposal does not preserve protect and/or enhance a heritage asset or its setting it will not be permitted.

The same goes for nature conservation where the requirements of DM1 in criterion 9 are inconsistent with those of DM 2 in criterion 3. All of the criteria in DM1 and DM2 need to be examined very carefully to see how it is possible for any of the conflicting requirements to be met by any scheme under both policies. Just as a final point, criterion 11 of DM2 requires that development will be permitted if it complies with “The characteristics and special qualities of Powys landscape...and the visual amenity enjoyed by users of those areas”. This may raise again the issue of “incidental” in RE1, but apart from that it is simply not a credible policy criterion to require that something must comply absolutely with “characteristics and special qualities of the Powys landscape”.

There is no room for manoeuvre and this policy as set out is effectively saying that unless developments have no effects on the characteristics and special qualities of Powys,

Question Representation Texts

**Question: Council Response**

Representation Texts: The Council disagrees with the Representer in respect of there being no clear mechanism for the protection of Biodiversity or for the monitoring of impacts of policies. However the DM policy has been reconfigured to include a specific section relating to the natural environment and the Council does agree with the need to include the impacts of external lighting upon biodiversity and have ammended Policy accordingly. See Focused Changes for details.

Council Response:

0

**Question: 3d. (i) Representation Details**

Representation Texts: Policy DM2 (3): "Proposals shall protect, positively manage and wherever possible, positively enhance biodiversity and geodiversity interests to produce a net gain for the county including the enhanced connectivity of habitats."

This brief policy does not follow requirements of TAN5 & PPW7 and cannot achieve LDP objectives given the lack of clear information as to how this protection or enhancement is to be achieved. Test CE3 requires that a policy have 'clear mechanisms for implementation'. CPRW are very concerned that there are currently no clear mechanisms within the DDLDP either for protection of biodiversity, nor for monitoring of impacts of policies.

TAN5 3.3.2 states that:

"Where relevant, local development plans should include policies that:

- Set out general criteria against which all development proposals will be tested for their compatibility with nature conservation objectives and/or sustainable development principles;
- Draw attention to the legal procedures that would apply to developments likely to have a significant effect on an internationally designated site and refer to the sites shown on the proposals map;
- Safeguard nationally and locally designated sites whilst making clear the relative weight to be attached to the different designations;
- Protect ancient woodlands, veteran trees and other trees of nature conservation value;
- Encourage the conservation and management of features of the landscape of major importance for wild flora and fauna;
- Give local expression to the protection and, where possible, enhancement of species and their habitats, especially those with legal protection and those of principal importance for biodiversity conservation in Wales;

Rep'n/Para/Policy AccessNo DateLodgd Late? Status Modified Summary

6235.V16//DM2 20/07/2015  Summary: Policy DM2 – Detailed and Site Specific Planning Matters - Biodiversity

Source: Email Type: Objection Mode Written Status Maintained

- Apply the precautionary principle where appropriate;
- Create strong links to national and local Biodiversity Action Plans and include provision for helping to meet their targets by habitat creation and management;
- Provide for the conservation, enhancement, sustainable management and, where appropriate, the restoration of networks of natural habitats including wildlife corridors and other green space, and networks and chains of open space;
- Address the local implications of climate change, including potential effects of habitat change, the risks of coastal flooding and erosion and river basin flood management issues;
- Anticipate, plan and manage the effects of natural processes, with minimum intervention;
- Provide for the conservation, enhancement, sustainable management and, where appropriate, the restoration of locally distinctive natural habitats;
- Protect locally designated sites of demonstrably substantive nature conservation value;
- Make proposals for necessary new development in ways and at locations that are consistent with the nature conservation objectives and policies in the plan itself and with national planning policies.”

Further recommendations are contained in PPW7 5.4.5. While PPW7 does recommend that local plans should not unnecessarily duplicate criteria, it is not assumed that there will be no need for any specific policies. PPW7 7.5.1 states that “Development plans should include criteria-based policies to deal with development not specifically allocated in the development plan”. Wales Spatial Plan 15.42 & 15.45 supports the importance of biodiversity conservation.

Conservation and enhancement of Powys’s natural heritage is such an important issue, both in view of the international and national legal framework which needs to be satisfied, and because of the richness and importance of Powys’s natural heritage, that CPRW believe biodiversity policy needs to be wholly redrafted and expanded to achieve LDP objectives and satisfy legal requirements.

1.Habitat Connectivity: CPRW welcome the reference within DM2 (3) to habitat connectivity, but the effectiveness of this policy depends on clarity within the DDLDP as to how this conservation and enhancement of habitat connectivity will be achieved. Policy should identify the features which contribute to connectivity, which will include: hedgerows, ditches and banks, stone walls, streams, banks of waterways, tree belts, lines of trees, woodlands, veteran trees, parklands, green lanes, river corridors, lakes, ponds, roadside verges, or habitat mosaics or networks of other locally important habitats including peat bogs, heath land, wetlands, and species rich grasslands. (PPW7 5.2.8 & 5.4.3)

2.Trees and Woodlands: The DDLDP contains no policies for the protection of trees and hedgerows. PPW7 5.2.9:

“Trees, woodlands and hedgerows are of great importance, both as wildlife habitats and in terms of their contribution to landscape character and beauty. They also play a role in tackling climate change by trapping carbon and can provide a sustainable energy source. Local planning authorities should seek to protect trees, groups of trees and areas of woodland where they have natural heritage value or contribute to the character or amenity of a particular locality. Ancient and semi-natural woodlands are irreplaceable habitats of high biodiversity value which should be protected from development that would result in significant damage.”

And 5.2.10

“Local planning authorities should, as appropriate, make full use of their powers to protect and plant trees to maintain and improve the appearance of the countryside and built up areas.”

Natural Heritage Topic Paper makes reference to the need to include policies regarding trees and TAN5 3.2.2 and 3.3.2 also support the requirement for such policies. At present the DDLDP contains no policies to conserve, enhance or increase these important connective habitats.

3.Paragraph 4.2.47 While protected species are a conservation priority, it should be made clear that conservation objectives are not confined to these species. The DDLDP should have regard for the conservation objectives of PPW7, the Wales Spatial Plan and the Welsh Government's ambition to reverse deterioration of biodiversity.

4.Paragraph 4.2.50 Once again CPRW would endorse the remarks of the former County Ecologist, supported by NRW, in their response to the draft LDP:

"Site Appraisal also needs to include potential impacts to features of biodiversity value such as habitats and species, protected sites, hedgerows, trees, etc. An Extended Phase 1 habitat survey and a BIS data search is likely to be required which identifies potential impacts of the development proposals as well as site specific opportunities for biodiversity enhancements. Pre-application advice can also be sought on ecology matters.

The Concept Plan needs to include provision for biodiversity and any protected species or other mitigation, compensation or enhancements proposed. Areas for biodiversity need to be designed in e.g. green roofs, ponds, wildflower meadows, native landscape planting areas, and wildlife corridors for connectivity, etc."

Once again, we do not understand why NRW and Ecologist advice has not been implemented.

5.County Ecologist also advised the inclusion of a requirement for mitigation, compensation and enhancement measures to be required and specified.

Both 5 and 6 are desirable inclusions, and would support the goals of Objective 11.

6.Topic Paper 8.29 makes reference to the need for the LDP to recognise the national approach to ecosystem services and incorporate this within its policies. This would accord with goals of the Future Generations (Wales) Act and Welsh Government Ecosystems Approach. We cannot see this reflected in DDLDP policies on biodiversity.

7.Paragraph 4.2.51 A definition of 'important trees, hedgerows' is required. Whilst the Hedgerow Regulations provide some clarity with regard to hedgerows, there is no similar definition for trees. The existence of a TPO is not a reliable guide, as award of TPO status is a reactive process, and many trees of significant landscape, biodiversity and amenity value will not have TPO status.

8.Paragraph 4.2.51 NRW recommended inclusion of 'biodiversity, and' in this paragraph, bullet point 3, after 'contribute significantly to' – to reflect PPW7 identification of biodiversity as an objective of good design.

9.Policy DM2.11: Regard should be had to the potential impacts of external lighting schemes on wildlife and features of biodiversity value, including boundary features (such as woodland edges, watercourses, hedgerows) that provide corridors for nocturnal wildlife e.g. otters, bats, badgers etc. (PPW7 13.13.2)

10.Planning strategy: The following recommendation by the former County Ecologist in response to the draft LDP has not been implemented.

(Response to 16.3 Draft LDP) "The LDP needs to define appropriate areas for certain types of developments, such as intensive livestock units for poultry, pigs, cattle, dairy and single wind turbines. This is so that sensitive areas are avoided or where applications are proposed they need to have an EIA. For example, it is understood that the River Ithon is currently over the phosphate limits. Therefore, there should be no more intensive livestock units such as poultry within the zone of influence whereby the proposed development could be hydrologically linked to the River Wye SAC. Such developments should be able to demonstrate no impacts alone or in combination. This is required to satisfy the HRA and the WFD.

Where such developments may affect designated sites supporting sensitive grassland or other habitats vulnerable to nutrient enrichment, then they should be directed away from sensitive areas. In particular they should be encouraged in areas where there is capacity for nutrient enrichment where the existing background levels will not be exceeded.

Nutrient producing developments and single wind turbines, if not managed, once operational, or located appropriately have a high risk of causing significant long term impacts to the countryside and wildlife of Powys. 2.2.28 states that the quality of natural environment and natural landscapes are the county's key tourism draw. However, many of the

Source: Email			Type: Objection			Mode Written
						Status Maintained

habitats that make up the countryside and landscapes are struggling to function without assistance and therefore development proposals need to ensure that measures to increase the resilience of the particular ecosystem are a key feature of any biodiversity enhancement requirements.”

(Response to 16.17 Draft LDP) “Intensive livestock units should be located away from watercourses and also to ensure that land which receives manure is located well away from any watercourses to reduce the potential for nutrient enrichment of watercourses as a result of surface water run-off. Poultry units and other intensive livestock units should be located where background nutrient levels have capacity for nutrient deposition, i.e. in areas that have not already exceeded their background levels, and they should be located away from tributaries hydrologically connected to the SAC rivers.”

The need for such strategic planning is supported by provisions of PPW7 13.11.12, which also requires an LDP to set out criteria by which applications for potentially polluting developments will be determined.

The decline in water quality through nutrient pollution, concurrent with a wholly unplanned proliferation of intensive poultry units, is indication that such identification of suitable and unsuitable sites is also essential for achievement of EU directive requirements. The absence of site identification as above will impact on potential for achievement of air and water quality, amenity and biodiversity objectives.

Council Response:

0

Page 500

**Question: 3d. (ii) Desired changes to Document**

Representation Texts:

Changes: DM2 (3) is insufficient and will not achieve objectives or satisfy legal requirements. The DDLDP requires the inclusion of an appropriate criteria based policy on biodiversity having regard to requirements of PPW7 and TAN 5 and including:

- 1.Measures for conservation of habitat connectivity & identification of the features which contribute to connectivity,
- 2.Measures for protection of trees, hedgerows and woodlands,
- 3.Making explicit the desirability of conservation of all biodiversity,
- 4.Measures to incorporate biodiversity issues into site appraisal and concept etc.,
- 5.Qualification along the lines that ‘development cannot be approved unless appropriate commensurate mitigation, compensation and enhancements are provided to fully offset any unavoidable loss of features of biodiversity value by achieving no net loss and, wherever possible, a net gain. Proposals shall include clear descriptions of any such measures required.’
- 6.Inclusion of provisions relating to ecosystems services,

And also:

- 7.A definition is required of ‘important trees, hedgerows’ within 4.2.51, including landscape and amenity value, as well as biodiversity value,
- 8.Inclusion of phrase ‘biodiversity, and’ within 4.2.51 bullet point 3, after ‘contribute significantly to’,
- 9.Consideration of lighting impacts on wildlife within DM2 (11),

10.Site identification for potentially polluting developments & inclusion of criteria by which applications for polluting developments will be determined. This point could be addressed through supplementary planning guidance.

Additionally, in paragraph 4.2.46, last sentence, for greater clarity insert 'Detrimental impacts' between 'built heritage' and 'should be considered' to read: 'Lighting can also have a detrimental impact on biodiversity and built heritage. Detrimental impacts should be considered under policy DM1'

*Question Representation Texts*

**Question: Council Response**

Representation Texts: Having considered the representations recieved on the Development Management Policies the Council propose a focused change to Policies DM1, DM2 & DM3. The focused change proposes a suite of Development Management Policies to address different issues rather than 3 comprehensive Policies. See Focused Changes for details. The Council also propose a focused change to amend Policy RE1 - Renewable Energy. See Focused change for details.

Council Response:

0

**Question: 3d. (i) Representation Details**

Representation Texts: Policy DM2 (R.34.28)  
 Policy DM2 is not considered sound on the basis that it fails Tests C2, CE1, CE2 and CE4. The requirement for proposals to “protect, positively manage and wherever possible enhance biodiversity and geodiversity interests to provide a net gain” set out in Criterion 3 goes beyond national policy. Likewise, Criterion 4 is more restrictive than national policy relating to historic and built heritage. There should also be recognition in Policy DM2, or the related explanatory text, that in some instances Criterion 3 and 4 can be met through appropriate mitigation measures.  
 The explanatory text relating to Criterion 7 is considered unduly restrictive. Paragraph 4.2.35 states that “where possible, developments should be connected to the existing infrastructure but in locations where there is no spare capacity, future development will be constrained until the capacity is increased or a satisfactory alternative can be found”. This wording is of significant concern in relation to onshore wind energy projects. Generally when onshore wind energy schemes come forward there is a need to reinforce the grid connection, this is invariably delivered after a scheme is permitted. The supporting text should be amended to reflect this and ensure that the policy is suitably flexible as to the stage that the necessary infrastructure is provided.  
 Criterion 10 refers to “the amenities enjoyed by the occupants or users of nearby or proposed properties”. To meet the tests of soundness the application of Criterion 10 should be restricted to existing properties or those that benefit from planning permission. This would be consistent with Paragraph 4.2.44 of the Deposit Draft, which refers to ‘approved development’. The wording should therefore be amended to refer to “existing and approved development” only, with ‘proposed properties’ being deleted.  
 Criterion 11(ii) should be amended to read “an unacceptably adverse effect on the visibility of the night sky”. Assessment against a requirement to not cause ‘an adverse effect’ is too restrictive. The addition of ‘unacceptably’ would be consistent with the wording used elsewhere in the LDP when assessing impacts. Given that Policy DM2 is intended to be applied to the determination of all development proposals, the

Source: Email Type: Objection Mode Oral (Examination) Status Maintained

wording of Criterion 13 is not realistic or sufficiently flexible. It is not appropriate to expect the “design, layout, size, scale, mass and materials of the development to complement...the character of the surrounding area” in all instances. This is expanded upon in Paragraph 4.2.51, stating that development design should “complement its environs and contribute positively to the character...and maintain the character and quality of the landscape”. Whilst this may be applicable to certain forms of development, it cannot reasonably be applied to onshore wind schemes. It would be wholly unrealistic to expect proposals for such schemes to ‘complement’ the character of the surrounding area. This is even more pertinent if Policy DM2 is taken to apply to all development proposals, including those within, or adjacent to, defined SSAs.

Question Representation Texts

**Question: Council Response**

Representation Texts: Having considered the representations recieved on the Development Management Policies the Council propose a focused change to Policies DM1, DM2 & DM3. The focused change proposes a suite of Development Management Policies to address different issues rather than 3 comprehensive Policies. See Focused Changes for details.

Council Response:

0

**Question: 3d. (i) Representation Details**

Representation Texts: The opening paragraph of LDP Policy DM2 states that "In addition to the requirements set out in National Guidance, all proposals for development will be permitted where they comply with the following [set of criteria]". It is difficult to see how some of the criteria set out in Policy DM2 of the LDP differ significantly from the relevant policies already set out in the corresponding sections of PPW. Powys CC should consider amending or deleting parts of Policy DM2 which duplicate and fail to add anything substantive to national policy. There is no justification or evidence for departing from accepted terminology used in PPW at criterion 3 of LDP Policy DM2. "protect and enhance" and "positively manage" (LDP); "conserve and enhance" and "appropriate management" (PPW); and criterion 4. "protect, conserve and...enhance" (LDP); "preserve and enhance" (PPW). Criteria 3 and 4 should be amended to reflect the accepted terminology used in PPW.

At criterion 10, it is considered that the inclusion of "proposed properties" is too broad and that only neighbouring residential properties which 'lawfully exist or have an extant planning permission' at the time of making a decision should be included. For example, speculative applications for new residential properties could be made in locations where there is no policy support for such developments and/or no realistic likelihood of receiving planning consent simply to frustrate other planning applications. This stance is in line with succeeding paragraph 4.2.38 which seeks to explain the criteria set out in LDP Policy DM2 and takes neighbouring uses to include "approved development".

At criterion 11. ii. it is considered that the appropriate policy test should be an 'unacceptable' adverse effect on the visibility of the night sky.

For the reasons set out above, it is considered that LDP Policy DM2 in its current form fails to meet the Consistency (C2) and Coherence and Effectiveness (CE2) tests of soundness.

References in the accompanying paragraphs 4.2.18 to 4.2.47 to national policy and guidance is welcomed and ensures that the Coherence and Effectiveness (CE4) test is met.

Council Response:

0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: Firstly, to consider whether all the criteria set out in Policy DM2 are necessary given that most, if not all, of the matters are already set out in greater detail in PPW.

If considered necessary, at criterion 3 of LDP Policy DM2 replace "protect, positively manage and wherever possible enhance" with "conserve, appropriately manage and wherever possible enhance".

If considered necessary, at criterion 4 of LDP Policy DM2 replace "protect, conserve and wherever possible enhance" with "preserve and wherever possible enhance".

*Question Representation Texts*

**Question: Council Response**

Representation Texts: This representation is considered to be in support of the Deposit Local Development Plan. No change is therefore required. It is noted that having considered the representations recieved on the Development Management Policies the Council propose a focused change to Policies DM1, DM2 & DM3. The focused change proposes a suite of Development Management Policies to address different issues rather than 3 comprehensive Policies. The change does not change the intent of the policy approach to utilities, infrastructure and efficient use of resources. See Focused Changes for further details.

Council Response:

0

**Question: 3d. (i) Representation Details**

Representation Texts: POLICY DM2: DETAILED AND SITE SPECIFIC PLANNING MATTERS (34.28)  
The tackling of surface water at source is a vital component of sustainable development and we fully support the objectives of paragraph 6. The Flood and Water Management Act 2010 reinforces the obligations for developers to incorporate sustainable drainage systems as part of their developments, as such we support this policy of managing surface water at source as it will mitigate against overloaded sewers which can ultimately lead to flooding.

We support the objective of paragraph 7 as utility services and infrastructure are a fundamental pre-requisite of a development proceeding, and their importance for the promotion of new sustainable development is referenced in Planning Policy Wales Chapter 12.

We support the objective of paragraph 14 which requires development to demonstrate a sustainable and efficient use of resources by including measures to achieve water conservation and efficiency.

*Question Representation Texts*

**Question: Council Response**

Representation Texts: The Council agree to make the following changes: Amend Para. 4.2.46 to clarify that the impact of lighting schemes on protected species will also be considered by inserting "protected species" after "dark landscapes,". Amend third bullet point of paragraph 4.2.51 by inserting "biodiversity, and" after "contribute significantly to" .

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: @ 34.29 Para. 4.2.46  
We welcome the clarification that the effects on dark landscapes will one of the issues to be considered. However, lighting schemes also have the potential to cause disturbance to certain protected species such as bats. We therefore suggest, for completeness, that this final sentence is amended to clarify that the impact of lighting schemes on protected species will also be considered by inserting "protected species" after "dark landscapes,".

@ 34.29 Paras. 4.2.50, 4.2.51

We welcome the clarity provided in these paragraphs. We support the clarification in the third bullet point that the development design should safeguard and enhance landscape features to protect local character. However, given that Figure 4.4 of Planning Policy Wales (edition 7, 2014) identifies biodiversity enhancement as an objective of good design, we recommend that the third bullet point of paragraph 4.2.51 is amended by inserting "biodiversity, and" after "contribute significantly to" .

(Rep Text contained in Annex 1 to NRW letter)

Council Response: 0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: @ 34.29 Para. 4.2.46

*Question Representation Texts*

**Question: 3d. (i) Representation Details**

Representation Texts: Deliverability

It is for the authority to demonstrate what other planning obligations/contributions will or will not be covered and how this relates to Regulation 122 of the Community Infrastructure Levy (CIL) Regulations 2010. The Community Infrastructure Viability Assessment has included the detailed components of the viability assessment. The authority has indicated some prioritisation in its reasoned justification to DM3, however this is not comprehensive and further clarification is required to ensure that no policy vacuum will appear given the pooling of S106 contributions has been limited. This should not be left to an early review of the plan and it is not in the interest of the plan to create a policy void. Further explanation is required to clarify how this issue will be addressed.

The Community Infrastructure Viability Assessment (paragraph 13.29) states that the authority "is in the process of establishing requirement for infrastructure to support new development and the costs of providing this." It would be useful if this information was available in order to gain further understanding on the deliverability of sites.

Representation Texts:

DM3  
 Glandwr Cymru - the Canal & River Trust in Wales supports in principle Policy DM3 which states that planning obligations will be sought to ensure that development provides for adequate infrastructure necessary to serve the proposal and that satisfactory maintenance and/or restoration arrangements are received and that benefits in the public interest are secured where these are relevant and reasonably related to the proposal and required to enable it to proceed.  
 New development in the vicinity of the Montgomery Canal may place an additional burden on the canal infrastructure, for example as a result of the increased use of the towpath by pedestrians and cyclists, increased vehicular traffic crossing historic canal bridges or increased water levels due to the introduction of surface water run-off or provide opportunities for further enhancement or restoration. The need for developers to contribute towards necessary improvements to the canal infrastructure should be fully considered by developers and the local planning authority and we would be grateful for the opportunity to comment on proposals at the pre-application stage to assist in respect of this. This could usefully be reflected in the supporting text to Policy DM3.

Council Response:

0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts:

Amend the supporting text to Policy DM3 supporting text to Policy DM3. to highlight the need for developers to contribute towards necessary improvements to the canal infrastructure as part of their proposals to mitigate the impacts arising from development.

Council Response:

0

Document:Draft Deposit Written Statement 2015, p.44

Policy: DM3

Issue: 2015: Deposit Draft-03. Housing - Delivery and Infrastructure

Question Representation Texts

**Question: Council Response**

Representation Texts: The Council disagrees that there is a need for the suggested sentence to be added to the policy and the Council considers that viability is adequately given an appropriate level of emphasis in the draft policy DM3 and is already referenced in the reasoned justification (second paragraph). (Note - Focussed Changes are proposed to the Development management section / policies, which incorporate the wording of paragraph 4.2.56 of the deposit LDP).

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: Policy DM3 states that:  
 "Planning obligations will be sought by agreement with applicants, where necessary, to ensure that:  
 1. The development provides for adequate infrastructure necessary to serve the proposal, and that satisfactory maintenance arrangements are achieved;  
 2. Benefits in the public interest are secured where these are relevant and reasonably related to the proposal, and required to enable it to proceed."  
 Whilst supporting paragraph 4.2.56 states that "Planning obligations will be negotiated and the viability of development will be taken into account", it is considered that a stronger emphasis on viability should be included within the policy text itself, in order to comply with paragraph 3.7.1 of Planning Policy Wales (7th Edition, July 2014) which states that "it is essential that arrangements are fair to both the developer and the community" with regards to planning obligations.  
 Therefore based on the above, Policy DM3 in its current form is considered to fail Coherence and Effectiveness Soundness Test C2 in that it does not have regard to national policy.

Council Response: 0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: It is considered that the proposed planning obligations policy does not meet the Tests of Soundness as set out within the Local Development Plan Manual, June 2006. Therefore, in order to make the Powys Local Development Plan 'sound' with regards to Policy DM3, it is recommended that an additional sentence is added to the policy text, stating:  
 "In seeking planning obligations, the Local Planning Authority will pay due regard to the potential impacts on the viability of the proposed development"  
 This will help to ensure that greater weight is placed on the viability of the proposed development when planning obligations are negotiated, which will in turn ensure that arrangements are fair to both the developer and the community in accordance with Planning Policy Wales.

Council Response: 0

**Question: 4b Reason For Request To Speak At Hearing And Subject**

Representation Texts: In order to present our case and representations verbally to the Inspector and to address any questions or comments of the Inspector or the Council.

**Question: Council Response**

Representation Texts: This representation is considered to be in support of the Deposit Local Development Plan. No changes are therefore required.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: POLICY DM3: PLANNING OBLIGATIONS (34.30)

Water and sewerage infrastructure is a vital commodity for nearly all types of development and any improvements required to our assets to meet future development proposals would need to align with our 5 year rolling programme of Capital Improvements (Asset Management Plans – AMP's). Whilst the Local Development Plan will have a longer timeframe, water companies are governed by a Regulatory 5 year AMP therefore where development proposals would create the need for additional infrastructure in advance of regulatory improvement we would expect developers to meet this cost. This approach is re-enforced by Planning Policy Wales Chapter 12.

We note that your authority will consider introducing a CIL following adoption of the LDP. As Dwr Cymru Welsh Water is a 'not for profit' company (different to all other water companies in England and Wales), we would fully support the introduction of CIL as our Business Plans have to be affordable to customers i.e. the cost of our capital investment, approved by our Regulator, is primarily funded through our customers bills therefore we see CIL as an effective mechanism to supplement our funding and meet any shortfalls in capital expenditure costs.

Policy: E1

Issue: 2015: Deposit Draft-07.Employment, Retail and Tourism

*Question Representation Texts*

**Question: 3d. (i) Representation Details**

Representation Texts: Firstly, the National Park Authority would like to congratulate the Powys LDP team for the efforts made to address the significant concerns raised against the first Deposit LDP (2014). It is acknowledged that the level of work undertaken to achieve the revised Deposit is substantial and the team is to be congratulated. We are extremely encouraged to see the progress being made by yourselves to move towards an adopted plan and the certainty this will bring in relation to the future development in Powys. Undoubtedly this will be of benefit to the region and can only be supported by the NPA.  
Notwithstanding the above, we would like to draw your attention to the following issues we have identified with the deposit draft LDP (2015) and its compliance with National Planning Policy. We raise these concerns from our recent experiences of the Examination process and we hope what follows will benefit you in the production of a sound LDP. These are not objections per se, but we urge you address the points in your lead up to submission in the interests of soundness.

Please note that these are officer comments, which will be put before Members at the next available opportunity. Therefore they may be subject to amendment following NPA recommendation. We will advise you of any change accordingly.

**3. Employment Strategy**

Policy E1 of the Draft Deposit LDP (2014) sets out 49 Hectares of employment land. We believe that this is an ambitious target. Whereas we support the objective to provide for improved employment opportunities within the region, there is a risk (as set out in TAN 23) that over allocation may stymie releasing such sites for other beneficial uses, or conversely place pressure on the sites for other, less desirable uses. We acknowledge it is a careful balance, and suggest that in order to ensure that the plan is delivering on its aims that a further monitoring indicator is included. This indicator should look at current occupancy/vacancy rates and uptake of development on allocated sites. Appropriate triggers and actions should be included to address findings relating to a lesser uptake in employment sites than anticipated, including the need to review the employment strategy.

Question Representation Texts

**Question: 3d. (i) Representation Details**

Representation Texts: 34.36 Policy E1 - Employment Proposals on Allocated Employment Sites

Please see our comments above to LDP Objective 1. (officer note - recorded at V.5)

Additionally, there are several business parks within the Plan area where the infrastructure has already been installed, but there has been little or no take up of units. One issue is the relatively poor design of some of the sites and their lack of acknowledgement to local design and vernacular, and a total lack of sense of place. Buttington Cross is one such example. As some of the proposed employment allocations such as Machynlleth and Llanidloes are in small market towns, there is a need to respect their location and they should therefore be developed sensitively to blend with the character of the respective towns

To meet test of soundness CE1, we recommend that advice on respecting the character of towns, villages and the countryside when considering employment and mixed use sites is added to the supporting text of Policy E1 or E3.

Additional comments on individual sites are provided in relation to Annex 1.

(note: this rep text contained in Annex 1 to NRW letter)

Council Response:

Issue: 2015: Deposit Draft-07.Employment, Retail and Tourism

Question Representation Texts

Question: 3d. (i) Representation Details

Representation Texts: It is proposed that Candidate Site no. 660 be allocated for Mixed Use development in accordance with Policy E3 and Employment Site Allocation table E1.

[This Representation Cross-references with RefPoints 35.75 and 34.104 ]

The Council's own previous assessment of Candidate site No 660 stated that, "Site consists of undulating pasture land adjoining a complex of listed buildings. The site lies to the west of Newtown but does not bound the current UDP settlement boundary. The site was previously allocated for residential development in the Deposit Version Montgomeryshire Local Plan but was omitted in the modifications to that document. The site is highly visible on the approach to the settlement from the West and is currently constrained by lack of an adequate highways access, however these issues may be addressed as the proposed Newtown By-Pass would join the existing Trunk Road close to the candidate site. The precise line of the proposed by-pass and junction arrangements are still being determined and there are also other issues raised by stakeholders. Therefore, the acceptability of this site for allocation would be subject to confirmation of by-pass proposals and further discussion with stakeholders. Nonetheless, it is considered that site commitments and more appropriate site allocations identified elsewhere will meet the housing requirement of the settlement over the Plan period".

In response, it is noted that funding for the By-Pass has now been secured with the National Transport Plan indicating completion by 2017. It is therefore contended that the Council should now be planning to realise the potential opportunities provided by the construction of the by-pass and therefore that the Local Development Plan should build in flexibility to deal with the changing circumstances that will accompany this major change. In this regard, whilst site EA1 was a prominent site at the entrance to the town, the completion of the Newtown bypass will reduce its visibility. A replacement Gateway Site at Glanhafren Hall that does not have any flooding or other technical problems and has better visibility from the bypass is more likely to be delivered, creating a more realistic, appropriate and sufficiently flexible Plan. In addition, a flagship site on site 660 could be accompanied by a long-term vision of a green corridor along the Mochdre Brook, creating an enhanced linear park as an integral part of the town's long-term expansion plans.

With regard to the Council's comment that "site commitments and more appropriate site allocations identified elsewhere will meet the housing requirement of the settlement over the Plan period" it should be noted that candidate site 660 is put forward for mixed use rather than only residential development. It is therefore considered that the information provided above, in respect of proposed allocations P48 MUA1, P48 EA1 and P02 EC1, highlights the need for the allocation of candidate site 660 for employment purposes. The need for a mix of uses on site is justified by the uncertainty surrounding the deliverability of the proposed mixed use site P48 MUA1, the environment of the site including nature of surrounding development and by viability issues (as detailed within the findings and recommendations of the Powys Employment Needs Assessment (2012), Powys Employment Needs Assessment Addendum (2015) and the LDP & CIL Viability Assessment (October 2014)).

ADDITIONAL SUPPORTING EVIDENCE:

A) Sustainability Appraisal Re-assessment

The Sustainability Appraisal (SA) for site 660 is incorrect in the following respects:

by: Representation No

Filtered to show: (all of) Stage=V; Status=M

Rep'n/Para/Policy AccessNo DateLodgd Late? Status Modified Summary

5611.V3//E3 15/07/2015  Summary: Table E1 - Employment Site Allocations - Newtown

Source: Email Type: Objection Mode Oral (Examination) Status Maintained

i) Will development of this site avoid the loss of the Best and Most Versatile (BMV) agricultural land?  
 - Site 660 scores negatively on resource use due to involving the loss of best and most versatile land. This is incorrect. The site lies in grade 4/5 land, as shown on the official Agricultural Land Classification map reproduced below.

Source: Agricultural Land Classification Map 1985 (uploaded 2013 to <http://publications.naturalengland.org.uk/publication/6172638548328448>)

ii) Is the site well served by existing services (including access, water, drainage, energy supply) or is it realistically capable of being serviced by any necessary infrastructure (eg by upgrading)?; and  
 Can the site be safely accessed and can the highway network serving the site adequately accommodate the associated traffic implications?  
 - Aims 8 & 9 – Site 660 scores negatively on both measures because “inadequate highways access – may be resolved following completion of Newtown By-Pass”. Now that the Newtown By-Pass has been confirmed, this negative should be amended to a Significant Positive as the site will have excellent road access.

iii) Will the development proposals provide employment facilities and/or support the needs of businesses to expand, re-locate, diversify etc.; and  
 Will the development proposals contribute to providing a mix of uses in the settlement?  
 - A negative impact is recorded against business impact. The Appraisal incorrectly states that the site “proposes a re-use of an existing employment facility, although this may enable business re-location, expansion etc”. On the contrary, the site is a greenfield site proposed for mixed use development and offers great potential as a flagship site at the entrance to the town, boosting Newtown’s image and business offer.

iv) Do the proposals provide employment opportunities and/or the potential for upskilling the local workforce?  
 - Development of the site will bring jobs, which should score positively on the skills and employment category.

We respectfully request that the SA is amended accordingly to reflect the above points.

Council Response:

0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts:

© 34.42 Table E1 - Employment Site Allocations  
 Add Glanhafren Hall as a providing 2 hectares of land for Mixed Use.

© 34.104  
 Appendix 1 – Settlement Allocations  
 Add site MUA2 for Newtown:  
 3.68 hectares as a mixed employment and residential allocation that will provide a high-end office / business park as a flagship site at the entrance to Newtown with high quality design and some residential units (including affordable) on the parts of the site that are closest to Glanhafren Hall. Landscaping and ecological enhancement will create a buffer between the two uses.

Policy: E4

Issue: 2015: Deposit Draft-07.Employment, Retail and Tourism

Question Representation Texts

**Question: 3d. (i) Representation Details**

Representation Texts: Firstly, the National Park Authority would like to congratulate the Powys LDP team for the efforts made to address the significant concerns raised against the first Deposit LDP (2014). It is acknowledged that the level of work undertaken to achieve the revised Deposit is substantial and the team is to be congratulated. We are extremely encouraged to see the progress being made by yourselves to move towards an adopted plan and the certainty this will bring in relation to the future development in Powys. Undoubtedly this will be of benefit to the region and can only be supported by the NPA. Notwithstanding the above, we would like to draw your attention to the following issues we have identified with the deposit draft LDP (2015) and its compliance with National Planning Policy. We raise these concerns from our recent experiences of the Examination process and we hope what follows will benefit you in the production of a sound LDP. These are not objections per se, but we urge you address the points in your lead up to submission in the interests of soundness.

Please note that these are officer comments, which will be put before Members at the next available opportunity. Therefore they may be subject to amendment following NPA recommendation. We will advise you of any change accordingly.

7. Bronllys Hospital Site

Following on from the previous point, we have concerns in relation to Policy E4. Redevelopment of the Bronllys site has potential significant influence on the National Park, in terms of social, environmental and economic impacts. The policy position provides no clear certainty as to the role of the site in terms of housing provision, employment provision or the potential effects this will have on the settlements of Talgarth and Bronllys, not to mention huge environmental impact. We urge you to reconsider allocation of the site, however if this is not possible, then Policy E4 should be reworded to make it essential that a development brief is developed for the site in consultation with the National Park Authority. Such a development brief should be agreed by both PCC and NPA prior to adoption as SPG.

*Question Representation Texts*

**Question: 3d. (i) Representation Details**

Representation Texts: I am writing to you on behalf of Powys Health and Well Being Action Group an organisation formed when 3,144 residents of Powys signed a petition in support of Bronllys Hospital remaining at the heart of their community as a NHS facility offering inpatient palliative and restorative medical care from fully qualified trained clinicians.  
In February 2015 the Welsh Assembly Government instructed Powys teaching Health Board together with Powys County Council to engage and work with Powys Health and Well Being Action Group to develop a Well Being Park in the grounds of Bronllys Community Hospital for the benefit of residents requiring these services in Powys.

To enable this to come to fruition it is imperative that Bronllys Hospital with all its grounds be redesignated from "Health Park" to "Health and Well Being Park" in the new Local Development Plan.

Policy: T1

Issue: 2015: Deposit Draft-06.Transport and Community Facilities

*Question Representation Texts*

**Question: Council Response**

Representation Texts: The Council disagree with the proposed changes requested by the Represntor. The Represntor does not raise new issues or evidence which lead the Local Planning Authority to change its conclusions. Policy T1 supports the coordination of a wide range of traffic management measures and transport interchange developments that will maximise the efficiency and safety of the transport system including road, rail, pedestrian and cyclist travel networks and connections in relation to new development. Objective 14 supports healthy communities and healthy lifestyles and already includes a reference to ensuring development (which would include residential, town centre, employment and educational development) provides opportunites for walking, cycling and open and play spaces. No change to the policy or objectives is required.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: Policy T1 should refer to development of safe routes tp work, towns and schools on foot, using existing or newly created footpaths and bridleways. The same applies to cycle routes. The same comment relates to Objective 14.

Council Response: 0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: Add a new criterion: develop safe walking and cycling routes between residential areas and town centres, work places, schools and colleges. Insert similar wording to Objective 14.

Question Representation Texts

**Question: Council Response**

Representation Texts: This representation is considered to be in support of the Deposit Local Development Plan. No change is therefore required.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: POLICY T1  
 Glandwr Cymru - the Canal & River Trust in Wales supports Policy T1, which supports the provision and improvement of sustainable forms of travel. The towpath of the Montgomery Canal provides a well-used and much-loved route for leisure walking and cycling, in addition to the use of the canal itself for leisure cruising and canoeing. Significant sections of the canal towpath have recently been improved through a partnership between Glandwr Cymru - the Canal & River Trust in Wales, Powys County Council and Sustrans and these works are set to continue subject to further funding being secured. Such works will help to increase the use of the towpath by walkers and cyclists and open up access to the waterway by wheelchair users and families with pushchairs.

Document:Draft Deposit Written Statement 2015, p.49

Policy: T1 Issue: 2015: Deposit Draft-06.Transport and Community Facilities

*Question* *Representation Texts*

**Question:** **Council Response**

Representation Texts: The Council propose to amend Policy T1 to make specific eference to 'Active Travel' as suggested by the representer. See Focused Changes for details. The Transport Topic Paper considered the Mid Wales (Joint) Local Transport Plan as well as the Active Travel (Wales) Act. The need for integrated transport services is recognised by Policy T1 which supports the coordination of a wide range of traffic management measures and transport interchange developments that will maximise the efficiency and safety of the transport system.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: This section requires considerable strengthening as transport underpins many aspects of the LDP and is particularly critical in such a rural and dispersed area to ensure equality of access to services for communities. The section needs to link to the Regional Transport Plan to have validity and show how this Plan will be delivered through the LDP.

The need for integrated public transport services is not addressed. The retail, housing and employment strategies are all interlinked with transport as the LDP clearly shows in the hierarchical approach. Without policies in place to ensure parallel development there is a significant danger that outlying communities will be left without services and unable to access those in their nearest town / large village.

Good access to services across the Central Wales area is stated as a key determinant of quality of life particularly in tackling the significant geographical and social inequalities of health, social care and well being in the predominantly rural area. This underpins the viability of our county and the integration of transport into planning is vital at every level to the maintenance of strong rural communities. It also needs to be shown how the LDP will conform to the Active Travel Act.

Council Response: 0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: Policy T1 is inadequate and requires redraft to properly address the issues of transport in a rural area and satisfy policy requirements.

Council Response: 0

**Question: 4b Reason For Request To Speak At Hearing And Subject**

Representation Texts: See representation above

*Question* *Representation Texts*

**Question:** **Council Response**

Representation Texts: The Council disagree with the proposed changes requested by the Representer. The Representer does not raise new issues or evidence which lead the Local Planning Authority to change its conclusions. The LDP is a land use plan and policy T1 supports appropriate transport infrastructure and traffic management improvements and seeks to support good transport links and development management policy protects key tranport corridors. It is beyond the scope of the plan to deliver access to services outside the County.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: The policy on transport does not include any infrastructure improvements based on economic improvement. Good transport links are key drivers in economic development and are therefore essential to the viability of the residents of Powys. This includes swift and efficient access to services and employment both within and outside of the county.

Council Response: 0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: Include a statement along the lines of 'improving the transport network within the county'.

Question Representation Texts

**Question: Council Response**

Representation Texts: The Council propose to amend Policy T1 to make reference to Welsh Government Priorities and the Active Travel Act as suggested by the representor. See Focused Changes for details.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: Suggested amendments: Suggested changes support Welsh Government priorities as stated in the Joint Local Transport Plan and the Active Travel (Wales) Act 2013. Para. suggested changes 4.5.3 correct two typos.

Policy T1 – Transport Infrastructure @ 34.44

Transport infrastructure and traffic management improvements will be permitted where they support Welsh Government priorities for promoting growth and sustainable jobs, tackling poverty, and ensuring sustainable rural communities. In particular this would be where such measures:

- 1.Improve the safety of transport users, especially those making 'active travel' journeys by walking or cycling.
- 2.Reduce traffic congestion and/or improve the local environment.
- 3.Reduce demand for travel by private transport.
- 4.Provide, promote and improve sustainable forms of travel.

4.5.1This policy seeks to support the coordination of a wide range of traffic management measures and transport interchange developments that will maximise the efficiency and safety of the transport system including road, rail, pedestrian and cyclist travel networks and connections.

4.5.2Appropriately located public transport interchange developments support sustainable travel and can reduce the demand for travel by private car. Developments that support public and private transport integration, such as Park and Ride/Share Schemes and Bus Stops that complement the use of local and national bus or rail services, taxi ranks and train and bus stations will be supported.

4.5.3Proposals that benefit rail passengers operations and proposals that support rail freight opportunities opportunites will be encouraged. Transport policy applicable to all developments including the safeguarding of key transport corridors, the requirements for transport assessments and travel plans, and access and parking requirements are addressed in policies DM1 and DM2. @ 34.45

Question Representation Texts

**Question: Council Response**

Representation Texts: The Council agrees that Policy H1 should be primarily about allocated sites which will deliver housing and not discuss affordable housing provision in such detail. The Council is proposing a Focussed Change to address this issue.

The Council disagrees that reference to village plans needs to be deleted from Policy H1. Although village plans are not statutory plans the Council consider such plans to be useful in relation to positive engagement with local communities and how they would like to see their villages develop and give valuable opportunity for input from relevant stakeholders. The policy wording is intended to be favourable towards small infill gaps (1 or 2 units) without the need for a village plan whilst development of larger infill gaps should be identified and agreed by a village plan. Given that housing development within this tier of settlement is subject to compliance with a policy rather than through allocations identified on an inset map, it is considered appropriate that housing developments of 3 or more dwellings should be supported by the community through a village plan.

Council Response:

0

**Question: 3d. (i) Representation Details**

Representation Texts: Policy H1 is entitled housing provision and starts by identifying the number of houses to be delivered by the plan it then moves on to how this housing provision will be supported, however it then gives no support other than to identify how affordable housing will be provided. Policy H4 is the affordable housing policy so should cover these issues. This policy should be about the allocated sites which will deliver the housing.

Concern is raised at the reference to 'village plans' in 2 i) of the policy. The HBF are not aware of any formal process in the Welsh Planning system for creating 'village plans'. It appears that the policy suggests that these could be adopted as SPG but this seems an unusual use for an SPG and a very bureaucratic way to decide whether or not housing provision of 1 or 2 units is acceptable. This is likely to deter developers due to the time delay and the added uncertainty added to the already complex and lengthy planning process which would still have to be complied with. In reality how many communities are likely to support and plan for new houses, what if no site are agreed to under this process it will then lead to under delivery of housing and affordable housing. This whole concept seems to add extra complexity to the planning system, cause delay and is more likely to lead to under delivery of housing.

Council Response:

0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: Remove the detail reference to how affordable housing will be delivered in policy H1 and include details of the allocated sites.

The requirement to agree site of 1 or 2 units by use of a village plan formed through the SPG process should be removed from this policy.

Question Representation Texts

**Question: Council Response**

Representation Texts: The Council disagree with the proposed changes requested by the Represor in relation to the need for development boundaries around Small Villages. The LDP intentionally removes development boundaries from Small Villages. TAN 6 Planning for Sustainable Rural Communities (July 2010) recognises that in rural areas settlement boundaries can limit the provision of housing to meet local needs, advising at paragraph 2.26 that: "In smaller settlements, planning authorities should consider including criteria based policy against which planning applications can be assessed, rather than identifying settlement boundaries". One of the key disadvantages of settlement boundaries is that this creates a general presumption that residential development within a settlement boundary is acceptable. In Powys's smaller settlements this is particularly problematic as it places an undue pressure on infill development which can impact on a settlement's character. Additionally, this presumption in favour of development artificially increases land values within boundaries compared to those outside of the settlement boundaries and also creates "hope values" on land adjoining settlement boundaries (i.e. land that could be included sometime in a future plan review or as a potential "rounding off" development site). The latter reduces the opportunities for "rural exceptions" affordable housing, and increases the affordability gap in rural settlements as the supply of housing land is restricted. It is considered that this may be one of the key reasons for the limited number of rural exception sites for affordable housing that have been proposed and delivered over the lifetime of the Unitary Development Plan. The LDP approach towards housing provision in small villages is set out in policy H1 point 2 which explains that in Small Villages, housing development will be supported i) on small infill gaps between existing dwellings capable of accommodating 1 or 2 units or in suitable larger infill gaps where identified in a village plan prepared by a community and adopted as SPG, and ii) On sites forming minor logical extensions to small villages for affordable housing in accordance with Policies H5 and H7. In response to the Representors concerns, it should be noted therefore that only affordable housing is supported on extension sites and these should be "minor" in nature. The Represor does not raise new issues or evidence which lead the Council to change its conclusions on the approach taken towards Small Villages.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: Policy H1 - Minor Logical Extensions to small villages - Llangors Community Council are concerned about this statement within the policy and that Ribbon Development will occur. It appears that the community/residents view of the position of minor logical extensions to a village does not always coincide with the view of a planning officer and usually falls in favour of the developer. This statement therefore cannot be justified in such a policy and enforces the point that small villages should have a development boundary to avoid ambiguity and potential future disagreements.

Council Response: 0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: To ensure a clear policy regarding development, small villages should have development boundaries.

Question Representation Texts

**Question: Council Response**

Representation Texts: Thank you for your comments. The Council has found it necessary to revisit the housing growth figures following representations made on the Deposit Plan including the Welsh Government's (WG) fundamental concerns over deliverability and viability. The WG considers the Deposit Plan has a challenging target taking into account historical annual completions and in particular the low number of housing completions in the last few years which impact on and significantly increase the required build rates over the remaining Plan period. The WG is asking the Council to set a housing target which is at foremost deliverable and ensures that a 5 year housing supply can be met in line with the requirements of TAN1. It is apparent that the annual build requirement over the plan period must be set at a level which is considered deliverable and not unrealistically high. The Council is proposing that the housing land target is reduced, to be effected through a Focussed Change. Please note that the evidence for the revised housing land target is fully set out in the revised Housing Topic Paper (Dec 2015). Relevant parts of the Plan have been amended accordingly (again through proposed Focussed Changes) to align with the new housing data. This includes an update of the settlement allocations table in Appendix 1 which has been revised as a result of i) further work on deliverability ii) the consideration of site allocation representations received in response to the Deposit Plan and iii) to reflect new planning history as at the revised base date for planning permission information (1 April 2015). Taking account of the proposed Focussed Changes, the Council considers that the proposed growth and spatial strategy is sound, based on a robust methodology with levels of growth and site allocations supported by a wide range of supporting evidence.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: The reduced housing build target of 5,519 new homes is more realistic than former targets but there is still insufficient evidence on which to base this number or to determine where new build is allocated. The inclusion of a 10% margin appears excessive and has resulted in a number of highly unsuitable sites being included. That these have serious highway, environmental and heritage constraints is clearly evidenced in Officer comments. Such sites should not be coming forward for development. The large numbers of houses allocated to some of the smaller towns and large villages are too high to be easily assimilated sustainably into the existing communities (for example Abermule and Montgomery) particularly given the lack of evidence that there is this level of demand. No evidence is provided that there is a requirement for new build in the areas identified. Generally there is insufficient hard evidence to support the housing target.

*Question*                      *Representation Texts*

**Question:                      Council Response**

Representation Texts: Thank you for your comments. Policy H2 point 1.i) relates to how development should provide a mix of housing types to meet the range of identified local housing needs. The Council will use available evidence (including work undertaken by the Housing Team) to inform the planning application process and the design/type/size/mix of dwellings permitted. Alongside this, the Plan has a suite of affordable housing policies which seek to address the provision of low cost housing. The LDP Strategy directs most new development to Towns and Large Villages where open market and affordable housing is supported within the development boundary. Small Villages and Rural Settlements have a more restrictive approach so that the strategy is not compromised and so that the Plan is consistent with national policy regarding sustainable locations, exceptions sites and the stringent protection of the open countryside. No changes are considered necessary to ensure that the Plan is sound. For your information, the Council would draw your attention to the Focussed Changes document and the proposed addition of new Strategic Policy SP1 relating to the apportionment of growth and clarifying the approach taken towards development in each of the hierarchy tiers.

Council Response: 0

**Question: 3d. (i)                      Representation Details**

Representation Texts: There are concerns as to whether the DDLDP will deliver a sufficient range of housing types available to meet existing and changing needs. The assertion of the high cost of housing in Powys is not supported by house prices elsewhere. Opportunities may be missed to encourage returning young people and other incomers.

Limits to the number of individual developments in small villages, rural settlements and open country is appropriate but a mix of housing types is essential. Flexibility can meet the varying needs of those wishing to move to the area or with extended families.

Re-classifying Llandyssil as a Small Village and Aberbechan as a Rural Settlement is more appropriate to infrastructure, situation and development potential. Allowing well designed infill is accepted but we propose either open market or affordable housing be permitted given the need for a mix of housing types. There is ambiguity regarding the 'boundaries' of small villages and rural settlements and this needs clarification to prevent inappropriate development coming forward.

Question Representation Texts

**Question: 3d. (i) Representation Details**

Representation Texts: Housing Provision

The housing provision of 5,519 is based on the Welsh Government's 2011 household projections. This figure deviates above the 2011 projections by approximately 1,000 units. It is understood the authority have deviated above the 2011 figure to help meet the affordable housing need identified in the LHMA and to take account of higher past build rates in Powys. Given the concerns raised in Category A in relation to viability and deliverability, the authority need to set out the level of deviation and explain why they have determined to deviate above the 2011 projections. The authority need to explain how the aspiration to exceed the 2001 figures is balanced against deliverability.

There are contradictory statements in background papers. Examples include the following:

- The Population and Housing paper provides some justification on the migration rate, which is set at the 5-year migration rate, but then states that this rate may be too high as the mid-year estimates are indicating a further decline in inward migration. Clarification is required to explain how the conclusion of this paper ties in with the LDP Strategy topic paper (appendix A; point 20) which states that inward migration of 21 – 30 year olds needs to be higher if the size of the workforce is to be contained and how the migration rates relate to the employment and housing provision.
- In the Housing and Delivery topic paper, the housing trajectory shows a significant increase in the delivery of housing from <300p.a. in 2015 to >600p.a. in 2021. This appears to be based on the site delivery profile, but it is questioned whether it is realistic based on the content of the Population and Housing topic paper. The trajectory should include all components of housing supply including windfall and small sites. The land supply assessment in Table 1 should evidence a 5-year supply up to 2026. Actual completions from 2011-2013 should be illustrated on the trajectory and the LA should confirm completions for 2014 and 2015.
- The Population and Housing topic paper provides information on the size of households, however it remains unclear how the authority has taken this on board. Is the LDP providing the necessary housing as identified in the topic paper of 1 – 2 bedroom households and has the provision taken into account that this rate may change over the plan period if the economy picks up?

*Question Representation Texts*

**Question: Council Response**

Representation Texts: Thank you for your comments. The Council has found it necessary to revisit the housing growth figures following representations made on the Deposit Plan including the Welsh Government's (WG) fundamental concerns over deliverability and viability. The WG considers the Deposit Plan has a challenging target taking into account historical annual completions and in particular the low number of housing completions in the last few years which impact on and significantly increase the required build rates over the remaining Plan period. The WG is asking the Council to set a housing target which is at foremost deliverable and ensures that a 5 year housing supply can be met in line with the requirements of TAN1. It is apparent that the annual build requirement over the plan period must be set at a level which is considered deliverable and not unrealistically high. The Council is proposing that the housing land target is reduced, to be effected through a Focussed Change. Please note that the evidence for the revised housing land target is fully set out in the revised Housing Topic Paper (Dec 2015). Relevant parts of the Plan have been amended accordingly (again through proposed Focussed Changes) to align with the new housing data. This includes an update of the settlement allocations table in Appendix 1 which has been revised as a result of i) further work on deliverability ii) the consideration of site allocation representations received in response to the Deposit Plan and iii) to reflect new planning history as at the revised base date for planning permission information (1 April 2015). Please refer to the Focussed Changes document for any proposed amendments to the Site Allocations in Builth Wells. Taking into account the proposed Focussed Changes, the Council considers that the proposed growth and spatial strategy is sound, based on a robust methodology with levels of growth and site allocations supported by a wide range of supporting evidence.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: The Revised Deposit Draft LDP includes parcels of land within Builth which are not deliverable. This is evidenced by the fact that these parcels of land have been included for some time within development plans. While these parcels of land are now being designated as 'white land' it is obvious they are being relied upon to form part of the buffer number of houses coming forward during the plan period if designated sites are not built out. This provides a distorted view of the housing and allocation for Builth Wells over the plan period. There is no clear evidence base for the inclusion of some of these parcels of land as to why they have been promoted despite comments to the contrary by some of the authors of the LOP. We therefore have challenged, and will continue to challenge, the inclusion of these parcels of land for their inclusion for quite arbitrary reasons.

The final issue that we raise is in terms of the data upon which the LPA has based its judgement. There is a clash between two fundamental documents upon which the Local Authority has based its numbers. These are the LHMA 2015 which states that Builth Wells and Llanwrtyd Wells have an affordable housing target of 20 dwellings per year. However according to the Powys County Council LDP and CIL Assessment of 2014 only 204 dwellings have been allowed for in total for Builth Wells and Liandrindod Wells. 20% of these shall be affordable which shall equate to approximately 40 dwellings in total. With this in mind we continue to have no confidence in the data upon which the Local Authority has based its projections as it is fundamentally incorrect.

Council Response: 0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: Land that has no prospect of being delivered over the plan period should not be included within said plan such as PCC UDP HA5 and HA7 which is now shown as white land in

*Question*      *Representation Texts*

**Question:**      **Council Response**

Representation Texts:      i. The most recent source of comparable measure of the number of households and the number dwellings is the 2011 Census which showed across Powys there were 63,482 dwellings of which 53,345 were occupied by resident households. The home vacancy rate in the dwelling stock is therefore calculated to be 8.1%.  
 ii. The Council agrees that the flexibility allowance of 10% may need to be reviewed as the overall housing requirement is being reviewed to be in accordance with the recently updated TAN 1 which requires that a 5 year supply is demonstrated which may require a reduction in the housing requirement.  
 iii. The amount of housing expected from windfalls was calculated on the average from last the 3 years of windfall applications which is considered a conservative number considering the 3 years used follow a period of recession and recent monitoring of planning applications being processed by the Council indicates that housing from windfall will be a reliable source going forward into the LDP and in line if not more than the annual number estimated.

Please note that the response in relation to Refail is addressed in response to representation number 1938.V3.

Council Response:

0

**Question: 3d. (i)**      **Representation Details**

Representation Texts:      The calculation of future housing requirement is difficult to follow and appears to be based on assumption rather than evidence.

For instance, it appears to be assumed that 17.7% of all new development will take place within the BBNP, the same percentage as exists at present. This is too broad an assumption. It may well be that permission to develop becomes increasingly difficult to obtain in the BBNP, and thus persons who might be expected to go there would have to be accommodated elsewhere in the County, that is, outside the BBNP, thus adding to the total housing need in the remainder of the County.

Whilst it may be correct that 8.0% of existing dwellings were unoccupied on census night 2011, this does not mean that they are not occupied on other nights or there may be legitimate reasons for non-occupation – second homes, for instance. The reason for this discrepancy does not appear to have been explored and it cannot simply be assumed that the same percentage will be carried forward into the future. It may be that some of the houses were unfit, but new houses would all be fit to live in and so the percentage might be different.

It is suggested that a 10% flexibility allowance may not be sufficiently generous, particularly in an area that does not attract major housebuilders wishing to build out sites as quickly as possible. The flexibility allowance should be tested against past trends to see if it is appropriate in achieving overall targets.

To achieve the target provision a significantly higher level of housing may need to be allocated, reliance on windfall development is a risky strategy that might or might not deliver the appropriate amount of development. The Plan should be based on certainty, or measures that will take the risk element out of the equation.

There seems little science, or reasoning in the proposed phasing of development. Market forces will inevitably phase development, unless constricted by planning policy. Given that there is a need to produce levels of housing not previously achieved there does not appear to be much of a case to further restrict supply through artificial phasing policies.

1938.V2//H1		17/07/2015	<input type="checkbox"/>			Summary: Policy H1 - Housing Provision
Source: Email		Type: Objection		Mode	Oral (Examination)	Status Maintained
Council Response:						0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: The figures for the provision of housing should be more carefully examined and explained, and positive policies aimed at ensuring that the required levels of housing are produced should be adopted, rather than policies that simply try to allocate sites without corresponding certainty of delivery.

Further sites should be allocated, having regard to the function of the various settlements and their ability to produce additional housing.

Elsewhere it has been argued that development in certain small villages might assist the sustainability of larger villages. In this submission the case of Berriew and Refail is spotlighted. These villages very much work together, albeit they are recognisable as separate entities. Nevertheless they are separated by the draft plan into different categories of settlement, one being classified as a large village (Berriew) though there is no additional specified new allocation for housing, and the other (Refail) a small village, where development is to be restricted.

Given the proximity of these villages to each other and to the main road network in the County, it would be appropriate to regard them as a sustainable community, and seek to guide further development towards them.

Policy H1 should be modified to recognise the sort of relationships that may exist between settlements and to identify sites within such communities (rather in within particular village development boundaries) that will ensure the provision of sufficient housing to meet targets. Development boundaries should also be made flexible so that if certain allocated sites are not coming forward or insufficient land to being developed, they can be easily realigned to allow other sites to come forward without having to await of full plan review.

Council Response: 0

**Question: 4b Reason For Request To Speak At Hearing And Subject**

Representation Texts: The delivery of housing is a key element in a Local Development Plan, and ensuring that housing in sufficient quantity is produced is a prime aim of any such plan. The issues are complex and best examined through discussion.

Question Representation Texts

**Question: Council Response**

Representation Texts: Thank you for your comments which are noted. It is not possible to give assurances that this particular parcel of land will not be considered as appropriate for development. The policy for the development of Small Villages is deliberately flexible with the emphasis on infill sites or extensions for exceptions housing with regard to affordable homes. The LDP approach weighs up flexibility over certainty. Whilst development boundaries can help to provide certainty they also

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: Our interest is in OS Field Number 8432, which is adjacent to our house and to the north west of Felinfach. Felinfach is designated as a Small Village in the Development Plan.

As we understand it, in the case of Small Villages housing development can only take place on small infill gaps between existing houses (with a maximum of 2) or on larger, but again infill, gaps between existing houses and only on "suitable" land identified by the Community Council and then adopted by Supplementary Planning Guidance. In this latter case there will have to be appropriate provision for affordable housing. However, in addition, development for affordable housing would be supported on sites forming "minor logical extensions" to small villages (Policy H1 2(ii)). This gives us great cause for concern.

In 2006 we were successful in persuading the Planning Inspector that the then Unitary Development Plan should be amended by the deletion of all reference to "residential allocation" on this land. (See Inspector's Report ref. 2660.D1). We hope we are wrong, but we are concerned that the Council may be attempting to have a second bite at this particular cherry. We do not wish, at this stage, to rehearse the arguments we advanced at Inquiry on the last occasion but would indeed wish to do so in person if it becomes necessary. It will only become necessary in our opinion if it is not made clear that housing development in Field Number 8432 will never be considered as a "minor logical extension" to Felinfach.

Council Response: 0

In this latter case there will have to be appropriate provision for affordable housing. However, in addition, development for affordable housing would be supported on sites forming "minor logical extensions" to small villages (Policy H1 2(ii)). This gives us great cause for concern.

In 2006 we were successful in persuading the Planning Inspector that the then Unitary Development Plan should be amended by the deletion of all reference to "residential allocation" on this land. (See Inspector's Report ref. 2660.D1). We hope we are wrong, but we are concerned that the Council may be attempting to have a second bite at this

particular cherry. We do not wish, at this stage, to rehearse the arguments we advanced at Inquiry on the last occasion but would indeed wish to do so in person if it becomes necessary. It will only become necessary in our opinion if it is not made clear that housing development in Field Number 8432 will never be considered as a "minor logical extension" to Felinfach.

*Question Representation Texts*

**Question: Council Response**

Representation Texts: Having considered the objection made by the Representor to the reduced housing land target, it is considered this level of housing provision remains appropriate to ensure the LDP is capable of delivering the Strategy, its key socio-economic objectives and ensures maximum flexibility to respond to future economic growth. It is considered that any deviation from this housing supply provision would jeopardise the soundness of the Plan in being able to meet these objectives. It is considered that the number of dwellings provided for in the plan, will provide a deliverable and sufficient housing land supply. The LDP is supported by a substantial evidence base regarding infrastructure and site deliverability. Detailed site assessments have been undertaken on the allocated sites and the Council considers these to provide a range and choice of deliverable sites. This has included extensive consultation with internal Council departments and statutory consultees to identify any site constraints, which are detailed within the appendices of the LDP. The Council does not consider that there is a need to allocate additional land in Newbridge on Wye. The suitability of these specific sites, including the site specifically referred to by the Representor (site reference 75 - the former POW camp), for allocation purposes is considered under the Site Status Report and responses received to the Deposit Local Development Plan in respect of specific sites are responded to separately under the responses to site representations.

Council Response:

0

**Question: 3d. (i) Representation Details**

Representation Texts: Newbridge on Wye - Representation

This representation is specifically in regard to the development of Newbridge-on-Wye.

It is apparent that the LDP does not conform to the Consistency Tests C1 and C2. The LDP does not follow National Guidance, Policies and Strategies.

1) Newbridge-on-Wye Sites

Several sites in Newbridge on Wye were submitted to the LDP Candidate Register in 2011. All (bar an existing planning consent) were not carried through to the current candidate list. It therefore appears as though Powys Planning Department do not envisage any development in Newbridge-on-Wye until at least 2026. The Planning Department have come to this conclusion despite being offered many suitable sites.

1a) Having reviewed Powys Planning Departments Options Appraisal Tool for Newbridge-on-Wye Site 75, the reasons for not expanding the settlement became apparent.

Site 75 contained former Prisoner of War Camp (POW) buildings. The site is currently overgrown and untidy. It is also in a prominent position adjoining the A470 north/ south trunk road at the entrance to Newbridge-on-Wye. The Prisoner of War Camp is a logical extension of the North West side of Newbridge-on-Wye.

The Options Appraisal Tool for the POW site appears to show that the development would be sustainable. The site is free from flooding, free of contaminated land, free of environmental constraints, would contain affordable homes, already has sustainable forms of transport and the area has limited ecological value.

Source: Email

Type: Objection

Mode Written

Status Maintained

However, under "Resource Use" the site has been highlighted as "significantly negative". I do not believe the development of a brown field site can be significantly negative. By building on a brown field site you preserve the best and most versatile agricultural land elsewhere.

1b) The Options Appraisals Tool also shows that the current level of services and infrastructure are restricting the development of Newbridge on Wye. This is because the Waste Water Treatment Works are at capacity.

1c) Finally the Options Appraisal Tool highlights the Community Council's preference not to proceed with the development.

1d) I do not believe that the development of Newbridge-on-Wye should be prevented due to a lack of necessary infrastructure or by a NIMBY approach.

2) Housing Strategy

National Guidance states a sound development plan should identify sites that are "robust and credible". The sites must be suitable, available and probable. All of which candidate site 75 is.

A broad direction of Welsh Government policy is contained within the 2010 National Housing Strategy "Improving Lives and Communities". The focus of the National Housing Strategy is on improving people's lives through:

- providing more housing and more choice;
- improving homes and communities, and
- improving housing related services and support.

I do not think the current vision for Newbridge-on-Wye meets any of these criteria.

3) Net Migration

Powys is currently suffering from net migration, with a large number of 15 —29 year olds moving from the area. I see no likelihood of this changing if you do not provide them with rural affordable homes. A mix of affordable and family homes will help to help sustain rural communities and retain people in their local communities. What you are proposing in Newbridge-on-Wye is a continuation of the current housing stock. There are no new homes and no new opportunities for local people, directly contrasting the 2010 housing strategy.

4) Summary

In summary, I do not think your vision for Newbridge-on Wye meets National Planning Policy.

The Powys draft LDP is therefore unsound under the Consistency Tests C1 and C2. It is also unsound under the Coherence and Effectiveness Tests CE2.

In light of the above I ask you to review your plans for growth in Newbridge-on-Wye.

Question Representation Texts

**Question: Council Response**

Representation Texts: The Council disagree with the proposed changes requested by the Represor in relation to the need for a development boundary and/or land allocations in Small Villages. TAN 6 Planning for Sustainable Rural Communities (July 2010) recognises that in rural areas settlement boundaries can limit the provision of housing to meet local needs, advising at paragraph 2.26 that: "In smaller settlements, planning authorities should consider including criteria based policy against which planning applications can be assessed, rather than identifying settlement boundaries". One of the key disadvantages of settlement boundaries is that this creates a general presumption that residential development within a settlement boundary is acceptable. In Powys's smaller settlements this is particularly problematic as it places an undue pressure on infill development which can impact on a settlement's character. Additionally, this presumption in favour of development artificially increases land values within boundaries compared to those outside of the settlement boundaries and also creates "hope values" on land adjoining settlement boundaries (i.e. land that could be included sometime in a future plan review or as a potential "rounding off" development site). The latter reduces the opportunities for "rural exceptions" affordable housing, and increases the affordability gap in rural settlements as the supply of housing land is restricted. It is considered that this may be one of the key reasons for the limited number of rural exception sites for affordable housing that have been proposed and delivered over the lifetime of the Unitary Development Plan. The Council is in favour of Village (Action) Plans so as to enable further community involvement on how Small Villages may develop - with the emphasis on the suitability of infill sites (as extensions to Small Villages are an exception for affordable homes only). The Represor does not raise new issues or evidence which lead the Council to change its conclusions in relation to the Strategy and no changes are considered necessary to ensure that the Plan is sound.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: I'm not able to understand the council approach here policy is strongly worded but the suitable sites which are in suitable locations are not allowed on the LDP plan. I feel if they were it would give those sites more certainty, in the past smaller sites have been accepted on the plan why not on this plan?

Council Response: 0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: I'm not able to understand the council approach here policy is strongly worded but the suitable sites which are in suitable locations are not allowed on the LDP plan. *Question Representation Texts*

**Question: Council Response**

Representation Texts: The Council does not agree that the housing land requirement in the Deposit LDP constitutes under-provision. It is proposed that policy H1 is amended through a Focussed Change - see Focussed Changes document. This is so that the policy reflects updated housing evidence as detailed in the revised Housing Topic Paper (December 2015).

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: There are major concerns regarding the soundness of the housing land requirements in the Deposit LDP Strategy and is objected to on the grounds highlighted in the accompanying Submission Document. .

The LDP Housing Requirement 2011 – 2026 of 6,071 dwellings to deliver a dwelling requirement of 5,519 is objected to. Whilst it is acknowledged that this represents an increase in provision from the previous 2014 Deposit Plan, which stood at 5,000, it is considered that the figure continues to constitute under-provision. In this context the objection is justified by an analysis of the detailed reasons given for the current dwelling requirement in the Topic Paper : Population and Housing (See accompanying Submission Document)

Council Response: 0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: A minimum requirement of 6,000 dwellings, allowing for a build rate of 400 units a year, should be applied, with an additional 10% flexibility allowance. As a consequence specific housing land allocations for an additional 1,000 dwellings, which should include the site being promoted, are necessary.

Council Response: 0

*Question Representation Texts*

**Question: Council Response**

Representation Texts: Having considered the objection made by the Representor to the reduced housing land target, it is considered this level of housing provision remains appropriate to ensure the LDP is capable of delivering the Strategy, its key socio-economic objectives and ensures maximum flexibility to respond to future economic growth. It is considered that any deviation from this housing supply provision would jeopardise the soundness of the Plan in being able to meet these objectives. It is considered that the number of dwellings provided for in the plan, will provide a deliverable and sufficient housing land supply. The LDP is supported by a substantial evidence base regarding infrastructure and site deliverability. Detailed site assessments have been undertaken on the allocated sites and the Council considers these to provide a range and choice of deliverable sites. This has included extensive consultation with internal Council departments and statutory consultees to identify any site constraints, which are detailed within the appendices of the LDP. The Council does not consider that there is a need to allocate additional land in Built Wells. The suitability of the site specifically referred to by the Representor (Tai ar y Bryn), for allocation purposes is considered under the Site Status Report and responses received to the Deposit Local Development Plan in respect of specific sites are responded to separately under the responses to site representations.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: Policy H1 is objected to on the basis of the insufficient housing land target and the non-inclusion of the land to the east of Tai Ar Y Bryn and its omission from the site schedule in Appendix 1 – Settlement Allocations.

- Built Wells needs more land to be allocated for housing development as the 131 dwellings currently provided for is too low for a town with its sustainability credentials and its status in the settlement hierarchy as provided for by Planning Policy Wales and the Wales Spatial Plan;
- There is uncertainty regarding the status of unallocated land within the settlement boundary and the extent to which this can meet housing need;
- More sites are required to realise affordable housing targets;

See full justification for the above in the accompanying Submission Document

*Question Representation Texts*

**Question: Council Response**

Representation Texts: Having considered the representations received and the supporting evidence that has been prepared, it is considered that the number of dwellings provided for in the plan, will provide a deliverable and sufficient housing land supply. Having considered the representations received and further supporting evidence that has been prepared it is considered this level of housing provision remains appropriate to ensure the LDP is capable of delivering the Strategy, its key socio-economic objectives and ensures maximum flexibility to respond to future economic growth. It is considered that any deviation from this housing supply provision would jeopardise the soundness of the Plan in being able to meet these objectives. Sufficient allocated land or sites with the benefit of planning permission are available elsewhere within the settlement and plan area to meet future residential land requirements. The suitability of these specific sites, including the site specifically referred to by the Representor (West of Ithon Road, Llandrindod Wells), for allocation purposes is considered under the Site Status Report and responses received to the Deposit Local Development Plan in respect of specific sites are responded to separately under the responses to site representations.

Council Response:

0

**Question: 3d. (i) Representation Details**

Representation Texts: Policy H1 is objected to on the basis of the reduced housing land target (see separate form). The non-inclusion of the land to the West of Ithon Road, Llandrindod Wells and its omission from the site schedule in Appendix 1 – Settlement Allocations. It is noted that the Policy also seeks to maintain a 5 year supply of housing. For reasons explained in the Full Submission attached we consider that unless a sufficient range and choice of sites is provided, Powys County Council will struggle to achieve a 5 year land supply both on adoption and throughout the plan period.

The first part of the policy refers to development in Towns and Large Villages. We consider that development of the site in question would be compatible with the requirement as it would form a logical extension to the settlement of Llandrindod Wells, complementing the land to the East which is proposed to be allocated..

This Representation also references Refpoints R34.47 and R34.104

*Question Representation Texts*

**Question: Council Response**

Representation Texts: Thank you for your comments. The concerns regarding the future growth of Guilsfield are noted. Guilsfield is a settlement which has a number of planning constraints. The LDP strategy is clear that the pro-rata growth will be directed to Large Villages according to their capacity to accommodate growth with regard to environmental and infrastructure capacity constraints. The Council has found it necessary to revisit the Powys housing growth figures following representations made on the Deposit Plan including the Welsh Government's (WG) fundamental concerns over deliverability and viability. The WG considers the Deposit Plan has a challenging target taking into account historical annual completions and in particular the low number of housing completions in the last few years which impact on and significantly increase the required build rates over the remaining Plan period. The WG is asking the Council to set a housing target which is at foremost deliverable and ensures that a 5 year housing supply can be met in line with the requirements of TAN1. It is apparent that the annual build requirement over the plan period must be set at a level which is considered deliverable and not unrealistically high. The Council is proposing that the housing land target is reduced, to be effected through a Focussed Change. Please note that the evidence for the revised housing land target is fully set out in the revised Housing Topic Paper (Dec 2015). Other parts of the Plan are amended accordingly - see Focussed Changes document. Further to representations received on the Deposit Plan the land allocations in Guilsfield are being re-considered. Please refer to the separate Focussed Changes document and the Guilsfield map and Appendix 1 settlement allocations table for any Focussed Changes regarding land allocations in this settlement. Please note that site allocation representations are beng responded to separately.

*Question Representation Texts*

**Question: Council Response**

Representation Texts: The Council does not agree that the housing land requirement in the Deposit LDP constitutes under-provision. It is proposed that policy H1 is amended through a Focussed Change - see Focussed Changes document. This is so that the policy reflects updated housing evidence as detailed in the revised Housing Topic Paper (December 2015).

Council Response:

0

**Question: 3d. (i) Representation Details**

Representation Texts: Over the Plan period (2011-2026), Policy H1 seeks to maintain a 5 year supply of land for housing and purports to provide land for 6,071 dwellings to meet the dwelling requirement of 5,519 additional dwellings.

This provision equates to an average completion rate of 368 dwellings per annum. This is well below the average annual completion rate of 423 dwellings per annum achieved in Powys in more buoyant years between 2004/5 and 2006/7, according to the 'Welsh Housing Statistics' and the UDP required annual completions rate of 410 dpa.

This level of house building is unlikely to support sustainable economic growth, while also accommodating a growth in households accompanied by a decline in household size. There is insufficient evidence to justify the proposed level of growth and consequently insufficient headroom to be able to respond to upturns in the market and achieve the desired sustainable economic growth, and what the house building industry could deliver in the future. The proposed level is significantly below the (circa) 7,700 dwellings for PCC as the recommended growth option set out in the Sustainability Appraisal Report: Powys Local Development Plan, April 2015 (Appendix 2 - Consideration of Growth Options and Alternatives at Preferred Strategy). This was considered the option that would "provide enough scope to provide a range of housing types, sizes & tenures which reflect housing needs until 2026". The proposed housing requirement does not seek to address the factors that PCC says are important when setting a housing requirement, including: the need to increase levels of net migration; the retention of young out-migrants; and the need to deliver affordable housing.

The Minister for Housing and Regeneration has made it clear to Local Planning Authorities that it may not be wise to plan for a future on the basis of evidence from a period of economic downturn, as appears to be the case with PCC's proposal to meet a dwelling requirement of 5,519 dwellings over the period 2011-2026. (Ref: PPW paragraphs 9.2.2 and 9.2.1.)

Certainly, the 2011 principal projection uses a five year migration, which has been calculated over a period of economic recession which could have reduced in-migration for that period. Moreover, the recession itself will have reduced the expressed demand for housing over that period due to affordability and limited mortgage liquidity.

In February 2014 a new set of household projections for Wales, based on 2011 census, were published by the Welsh Government's Knowledge and Analytical Service. The assumptions underlying these projections are based on past trends, which have been significantly affected by recent past economic conditions resulting from the global economic downturn. As a consequence they may give rise to lower household projections and higher household sizes than in previous projections. It is therefore important that this is borne in mind when using the projections for planning.

Planning Policy Wales (PPW) sets out the Welsh Government's planning policy on how the projections should be used when planning for new homes. It states that the latest

Welsh Government local authority level household projections should form the starting point for assessing housing requirements. However, PPW is clear that local planning authorities should consider the appropriateness of the projections for their area, based on all sources of local evidence and it is not prudent for plans to replicate a period of exceptionally poor economic performance.

Moreover, partly as a consequence of the above and partly as consequence of a lack of further evidence on deliverability, as set out in the final column against proposed allocations at Appendix1, we do not believe PCC can demonstrate that sufficient land would be genuinely available or will become available and deliverable to provide a 5-year supply of land for housing judged against the general objectives and the scale and location of development that should be provided for in the development plan. This means that sites must be free, or readily freed, from planning, physical and ownership constraints, and economically feasible for development, so as to create and support sustainable communities where people want to live. There must be sufficient sites suitable for the full range of housing types. For land to be regarded as genuinely available it must be a site included in a Joint Housing Land Availability Study (Ref: PPW Housing - Chapter 9 paragraphs 9.2.3).

The Powys County Council Joint Housing Land Availability Study (JHLAS) April 2014 (published February 2015) concludes that there was only 1.5 years supply of housing land in the Powys Local Planning Authority (LPA) area on 01/04/2014.

Document:Draft Deposit Written Statement 2015, p.50

Policy: H1

Issue: 2015: Deposit Draft-02. Housing - Distribution and Numbers

*Question Representation Texts*

**Question: Council Response**

Representation Texts: Thank you for your comments. The Council does not agree that the LDP housing land target should be increased or that additional housing land allocations are required. The Council has found it necessary to revisit the housing growth figures following representations made on the Deposit Plan including the Welsh Government's (WG) fundamental concerns over deliverability and viability. The WG considers the Deposit Plan has a challenging target taking into account historical annual completions and in particular the low number of housing completions in the last few years which impact on and significantly increase the required build rates over the remaining Plan period. The WG is asking the Council to set a housing target which is at foremost deliverable and ensures that a 5 year housing supply can be met in line with the requirements of TAN1. It is apparent that the annual build requirement over the plan period must be set at a level which is considered deliverable and not unrealistically high. The Council is proposing that the housing land target is reduced, to be effected through a Focussed Change. Please note that the evidence for the revised housing land target is fully set out in the revised Housing Topic Paper (Dec 2015). Relevant parts of the Plan have been amended accordingly (again through proposed Focussed Changes) to align with the new housing data. This includes an update of the settlement allocations table in Appendix 1 which has been revised as a result of i) further work on deliverability ii) the consideration of site allocation representations received in response to the Deposit Plan and iii) to reflect new planning history as at the revised base date for planning permission information (1 April 2015). The delivery trajectory has also been reviewed. Please note this is intended as a tool to provide indicative information on how the Plan will meet the requirement of a 5 year supply. Monitoring and review will track how the Plan is meeting its aims and objectives in practice. Taking account of the proposed Focussed Changes, the Council considers that the proposed growth and spatial strategy is sound, based on a robust methodology with levels of growth and site allocations supported by a wide range of supporting evidence.

Council Response:

0

**Question: 3d. (i) Representation Details**

Representation Texts: The 2015 Deposit Plan has significantly reduced the total housing land requirement from a figure of 7,700 dwellings set-out in the earlier LDP Preferred Strategy to a total of 6,071 in the currently deposited plan, over the Plan Period.

Whilst it is acknowledged within the Preferred Strategy that the preferred level of growth would need to be reviewed following the publication of the initial 2011 census results in July 2012, the currently proposed housing figure, is only marginally above the scenario presented in the Strategy based on past completion rates (average 2005-2010 JHLAS) which would have provided a total housing provision of 4,900. This option was dismissed at the time on the basis that, 'a constant build rate cannot be assumed.'

The basis of the reduced housing requirement of 6,071 is justified as being in accordance with the Welsh Government's based Local Authority Household Projections.

However, it is clear that the figure presented has relied fully on the Welsh Government's latest household projections, with no other policy considerations. This appears inconsistent with the advice contained within PPW (Edition 7, July 2014) which requires that local planning authorities should, 'consider the appropriateness of the projections for their area, based upon all sources of local evidence.'

Indeed, it is relevant to note that the approach taken within the Preferred Strategy in determining an acceptable housing requirement had taken on board a number of policy considerations and was notably slightly higher than past completion rates, as well household estimates and had allowed for a higher level growth than in the most recent past.

5788.V1//H1 20/07/2015  Summary: Does not support housing requirements - Policy H1

Source: Email Type: Objection Mode Oral (Examination) Status Maintained

---

More significantly, is the fact that the overall Plan Strategy, its objectives and spatial strategy remain unaltered from the earlier Preferred Strategy document, which had put forward a significantly higher level of housing provision, which must bring into question the strategic direction and deliverability of the current Deposit Plan.

Council Response: 0

---

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: It is proposed that revisions are made to the currently proposed housing requirements over the Plan Period, as set-out with Policy H1, to more accurately reflect the housing needs of the Plan Area, as previously evidenced in the Preferred Strategy document and to ensure that delivery of the Plan Strategy within the current 2015 deposit plan can be achieved.

Further housing allocations are required, preferably by the inclusion of sites previously supported by the LPA assessment process arising out of the Candidate Site submissions, in order to ensure adequate housing supply over the plan period. The publication of LDP document 'housing and delivery of new housing provision' dated June 2015 appears to conclude satisfactory housing delivery meeting the required land supply figure. However the reasonableness of the figures and projections within this document is open to significant critical review as consistent delivery over the plan period as presumed is not likely to be achievable especially given historic, current and projected market trends.

Council Response: 0

*Question Representation Texts*

**Question: Council Response**

Representation Texts: The dwelling requirement and housing provision set out by Policy H1 are based on evidence set out in the Population and Housing Topic paper. This evidence continues to be reviewed and the Council intends to propose Focussed Changes relating to the dwelling requirement, and to ensure that a 5 year housing land supply can be maintained.

The representation relating to the inclusion of the proposed site within the plan is addressed in the response to representation 6071.V2.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: Policy H1 is objected to on the basis of the reduced housing land target. We also wish to object to the non-inclusion of the land at Cynlais School Playing Field and its omission from the site schedule in Appendix 1 site under Policy H1.

We note that the Policy also seeks to maintain a 5 year supply of housing. For reasons explained in the previous section we consider that unless a sufficient range and choice of sites is provided, Powys County Council will struggle to achieve a 5 year land supply, not only on adoption but throughout the plan period.

The first part of the policy refers to development in Towns and Large Villages. We consider that development of the site in question would be compatible with the requirement as it would form a logical extension to the settlement of Ystradgynlais to a defensible development boundary formed by the A4067.

Council Response: 0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: Allocation of the site at former Cynlais School, Playing Fields, Ystradgynlais.

Council Response: 0

**Question: 4b Reason For Request To Speak At Hearing And Subject**

Representation Texts: To contribute to overall discussions regarding the alternative site proposed

Question Representation Texts

**Question: Council Response**

Representation Texts: Diolch am eich sylwadau. Roedd angen i'r Cyngor ystyried y ffigyrau cynnydd tai eilwaith yn dilyn y sylwadau a wnaed ar y Cynllun Adnau, gan gynnwys pryderon sylfaenol Llywodraeth Cymru (LIC) ynglŷn â hyfywedd a'r gallu i gyflenwi'r cynllun. Mae LIC yn credu bod gan y Cynllun Adnau darged anodd, o ystyried tai a gwblhawyd yn hanesyddol, ac yn enwedig nifer isel y tai a gwblhawyd yn ystod yr ychydig flynyddoedd diwethaf, sy'n effeithio ar y cyfraddau adeiladu gofynnol dros weddill cyfnod y Cynllun, ac yn cynyddu'r cyfraddau hyn. Mae LIC yn gofyn i'r Cyngor osod targed tai y mae modd ei gyrraedd, ac sy'n sicrhau bod modd cyflenwi gofyniad TAN 1 o ran tai am 5 mlynedd. Mae'n amlwg bod yn rhaid gosod targed adeiladu blynyddol dros gyfnod y cynllun ar lefel y mae modd ei gyflenwi ac nid ar lefel afrealistig o uchel. Mae'r Cyngor yn cynnig bod modd gostwng y targed o ran tir ar gyfer tai trwy newidiadau arbennig. Sylwch fod y dystiolaeth ar gyfer y targed diwygiedig ynglŷn â thir ar gyfer tai wedi'i nodi'n llawn yn y Papur Pwnc ar Dai (Rhagfyr 2015). Mae'r rhannau perthnasol o'r Cynllun wedi'u diwygio'n unol â hyn (unwaith eto trwy newidiadau arbennig arfaethedig) fel eu bod yn cyd-fynd â'r data newydd ar dai. Mae hyn yn cynnwys diweddariad o'r tabl dyraniadau anheddau yn Atodiad 1 sydd wedi'i adolygu o ganlyniad i i) ragor o waith ar y posibilrwydd o gyflenwi'r targed ii) ystyried y sylwadau ynglŷn â dyrannu safleoedd a dderbyniwyd mewn ymateb i'r Cynllun Adnau, a iii) adlewyrchu hanes cynllunio newydd fel dyddiad sail diwygiedig ar gyfer gwybodaeth ynglŷn â chaniatâd cynllunio (1 Ebrill 2015). Gan ystyried y newidiadau arbennig arfaethedig, mae'r Cyngor o'r farn fod y twf arfaethedig a'r strategaeth ofodol yn gadarn, ar sail methodoleg ddiogel, gydag amrywiaeth eang o dystiolaeth yn cefnogi'r lefelau twf a'r dyraniadau safle. Mewn ymateb i bryderon ynghylch y cydbwysedd/math o dai y mae gofyn eu darparu ym Mhowys, mae Polisi H2 pwynt 1.i) yn esbonio sut y dylai datblygiad ddarparu ymgyssgedd o fathau o dai i ddiwallu'r amrywiaeth yn yr anghenion tai lleol a nodwyd. Bydd y Cyngor yn defnyddio'r wybodaeth sydd ar gael (gan gynnwys gwaith gan y Tîm Tai) i ddarparu gwybodaeth ar gyfer y broses caniatâd cynllunio a dyluniad/math/cydbwysedd yr anheddau sy'n cael eu ceisio a'u caniatáu mewn lleoliad unigol.

Thank you for your comments. The Council has found it necessary to revisit the housing growth figures following representations made on the Deposit Plan including the Welsh Government's (WG) fundamental concerns over deliverability and viability. The WG considers the Deposit Plan has a challenging target taking into account historical annual completions and in particular the low number of housing completions in the last few years which impact on and significantly increase the required build rates over the remaining Plan period. The WG is asking the Council to set a housing target which is at foremost deliverable and ensures that a 5 year housing supply can be met in line with the requirements of TAN1. It is apparent that the annual build requirement over the plan period must be set at a level which is considered deliverable and not unrealistically high. The Council is proposing that the housing land target is reduced, to be effected through a Focussed Change. Please note that the evidence for the revised housing land target is fully set out in the revised Housing Topic Paper (Dec 2015). Relevant parts of the Plan have been amended accordingly (again through proposed Focussed Changes) to align with the new housing data. This includes an update of the settlement allocations table in Appendix 1 which has been revised as a result of i) further work on deliverability ii) the consideration of site allocation representations received in response to the Deposit Plan and iii) to reflect new planning history as at the revised base date for planning permission information (1 April 2015). Taking account of the proposed Focussed Changes, the Council considers that the proposed growth and spatial strategy is sound, based on a robust methodology with levels of growth and site allocations supported by a wide range of supporting evidence. In response to concerns over the mix/type of housing required in Powys, Policy H2 point 1.i) relates to how development should provide a mix of housing types to meet the range of identified local housing needs. The Council will use available evidence (including work undertaken by the Housing Team) to inform the planning application process and the design/type/size/mix of dwellings sought and permitted in a given locality.

Representation Texts: Gweler yn yr atodiad fy ymateb i'r CDLI newydd. Carwn nodi ei fod ar sail ymateb i'r ddogfen gyfan ond efo cyfeiriad at datblygiadau penodol ee yn Llanbrynmair ac ati. Carwn nodi hefyd dymuniad i fod yn rhan mewn unrhyw ymchwiliad cyhoeddus a gynhelir yn y dyfodol oni fydd ystyriaeth wedi'u gwneud cyn hynny o'r materion hyn

### A. SAIL YR AMCANGYFRIF

Mae sawl agwedd o'r amcangyfrif yn y cynllun yn peri pryder. Yn y lle cyntaf mae'r ffigwr o 5,519 o dai a nodir sydd angen ar ddechrau'r ddogfen yn ymddangos yn ffigwr wedi'u dynnu o'r awyr. Oherwydd yn ddiweddarach yn y ddogfen nodir bod angen safleoedd ar gyfer 6,071 o dai er mwyn sicrhau y 5,519. Golyga hyn eich bod yn clustnodi 552 o safleoedd yn fwy na'r hyn rydych yn cydnabod sydd eu hangen go iawn.

Yn ychwanegol at hynny, rydych yn datgan i 194 o dai cael eu hadeiladu'n flynyddol rhwng 2009 a 2013. Petai'r ffigwr hynny felly'n parhau am gyfnod y Cynllun o 2011 i 2026 dim ond 2,910 o safleoedd fyddai eu hangen.

Hyd yn oed petai rywun yn cymryd cyfartaledd yr adeiladu yn ystod yr 8 mlynedd diwethaf, sef 274 y flwyddyn, byddai'n golygu cyfanswm i Bowys o 4,110 o safleoedd. Golyga hynny bod y targed bron i 33% yn fwy nac hyd yn oed yr hyn oedd yn cael ei ddatblygu yn ystod penllanw adeiladu cyn y dirwasgiad.

Yn ychwanegol at hynny, mae nifer o ffactorau eraill sydd angen eu hystyried wrth gynllunio i'r dyfodol.

Fel y dengys ffigyrau'r Swyddfa Ystadegau a gyhoeddwyd yn Fehefin 2014, ymddengys bod poblogaeth Powys yn y cyfnod o ganol 2012 i 2013 wedi gostwng o 300 sef 0.2% sef gostyngiad o 133,000 yn 2012 i 132,700 yn 2013.

Hefyd cyhoeddwyd pecyn o ystadegau defnyddiol gan Y Gwasanaethau Gwybodaeth a Dadansoddi Llywodraeth Cymru ar yr 20fed o Ragfyr 2013. Dengys y rheini fod patrwm mudo ar gyfer y sir rhwng 2001 a 2011. Dangosir bod 5,810 wedi mewnfudo tra bo allfudiai o 4,990 yn gadael ffigwr net o 820 o fewnfudwyr. O ddefnyddio'r ffigwr net yma fel cynsail ar gyfer oes y Cynllun Datblygu, sef 15 mlynedd rhwng 2011 a 2026, yna byddai ffigwr net o 1,230 o fewnfudwyr.

Ffactor arall allweddol ydy'r ffaith bod cydnabyddiaeth yn yr un ddogfen y rhagwelir gostyngiad yn y boblogaeth rhwng 0 a 15 yn y sir hyd at 2026.

"For a handful of authorities, (Powys ac eraill) the population aged 0 to 15 is expected to decrease based on both the higher and lower population variants and the principal projection"

6089.V2//H1 20/07/2015  Summary: Does not support Housing Estimate

Source: Email

Type: Objection

Mode Written

Status Maintained

Rhagwelir gostyngiad o 17.1% yn 2011 i 15.5% yn 2026, efo'r niferoedd posib yn gostwng o 22,800 i 21,100.

Yr elfen arall dylanwadol ym mhoblogaeth Powys ydy'r canran o rhai dros 65 oed a rhagwelir hynny o bosib yn cynyddu o 22.9% yn 2011 i 30% yn 2026. Y pwynt allweddol yma ydy bydd hynny yn cynyddu'r galw am gartrefi henoed, fflatiau gwarchodol a gwasanaethau cyffelyb yn hytrach na stadau o dai newydd.

Yn ychwanegol at hyn, cyhoeddwyd ystadegau newydd gan Lywodraeth Cymru ym mis Chwefror 2014 gan gydnabod bod y rhagolygon blaenorol o ran twf poblogaeth yn anghywir. Yn lle gweld cynnydd o 284,000 o gartrefi yng Nghymru hyd at 2033 gostyngwyd hynny i 175,000, sef tua 7,954 y flwyddyn neu 119,318 hyd at 2026 sef oes y cynlluniau datblygu. O dynnu ffigyrau twf Caerdydd ac Abertawe allan, cedwir tua 59,318 ar gyfer gweddill Cymru sy'n golygu mae 3,000 o dai ar y mwyaf y dylid ei adeiladu ym Mhowys hyd at 2026.

I grynhoi felly o ran yr elfen yma:

- Mae'r rhagolwg o dai hyd at 2026 yn fwy yn flynyddol na'r hyn a ddiwyddodd dros yr 8 mlynedd diwethaf sy'n golygu dylai'r rhagolwg fod o leiaf 2,000 yn llai

- Ychwanegol at hynny dengys ffigyrau cyhoeddus bod y boblogaeth wedi gostwng rhwng 2012 a 2013

- Dengys patrwm mudo'r ddegawd ddiwethaf mae ffigwr net y 15 mlynedd nesaf fyddai 1,230. Go brin fyddai'r rhain i gyd yn mynd i gartrefi newydd ac felly unwaith eto mae'n anodd cyfiawnhau'r bwriad o 6,071 o dai newydd

- Ceir cytundeb bydd y niferoedd hyd at 15 oed yn gostwng bydd wedyn yn dylanwadu ar y niferoedd o gartrefi i rai ifanc fydd eu hangen

- Rhagwelir cynnydd yn y rhai dros 65 oed ac eto nid ystadau o dai newydd fydd angen arnynt ond yn hytrach gofal mewn cartrefi henoed, gofal gwarchodol ac ati.

- Dengys ffigyrau diwygiedig Llywodraeth Cymru bod eu rhagolygon gwreiddiol ymhell ohoni ac ar sail hynny mae 3,000 ar y mwyaf o dai dylid adeiladu ym Mhowys ac nid 5,000.

Please find attached my response to the new Local Development Plan. I would like to note that it is a response to the whole document with references to specific developments e.g. in Llanbryn-mair etc. I would also like to note my wish to take part in any public inquiry that is conducted in the future unless due consideration is given to these matters prior to this.

A. THE BASIS OF THE ESTIMATE

by: Representation No

Filtered to show: (all of) Stage=V; Status=M

Rep'n/Para/Policy	AccessnNo	DateLodgd	Late?	Status	Modified	Summary
6089.V2//H1		20/07/2015	<input type="checkbox"/>			Summary: Does not support Housing Estimate
Source: Email		Type: Objection		Mode	Written	Status Maintained

A number of aspects of the estimate in the plan cause concern. In the first place, the figure of 5,519 homes which is noted as the number of houses needed at the start of the document appears to be a number which has been plucked from the sky. As later in the document it is noted that sites are needed for 6,071 houses to ensure the achievement of 5,519. This means that you are designating 552 more sites than you acknowledge are really needed.

In addition to this, you state that 194 houses were built every year between 2009 and 2013. If such a figure was to continue therefore during the period of the Plan from 2011 to 2026 only 2,910 sites would be needed.

Even if someone was to take the average of the building work during the last 8 years, that is 274 per year, this would mean a total of 4,110 sites for Powys. This means that the target is nearly 33% more than what was developed during the pinnacle of building work before the recession.

In addition, a number of other factors need to be considered in planning for the future.

As the National Statistics Office figures published in June 2014 demonstrate, it appears that the population in Powys from the period of mid 2012 – 2013 had reduced by 300 i.e. a reduction of 0.2% from 133,000 in 2012 to 132,700 in 2013.

Also, a pack of useful statistics was published by the Welsh Assembly's Information and Analytical Services Division on 20th December 2013. These indicate the migration pattern for the county between 2001 and 2011. They showed that inward migration was 5,810, with outward migration at 4,990 leaving a net total of 820 immigrants. Using this net figure as a basis for the length of the Development Plan for 15 years between 2011 and 2026, the net figure would be a total of 1,230 immigrants.

Another key factor is the fact that is acknowledged in the same document that a decrease in population of those 0 – 15 is envisaged in the county up to 2026. "For a handful of authorities, (Powys and others) the population aged 0 to 15 is expected to decrease, based on both the higher and lower population variants and the principal projection"

A reduction of 17.1% is expected in 2011 to 15.5% in 2026, with possible numbers reducing from 22,800 to 21,100.

The other influential element within the Powys population is the percentage of those over 65 years of age, and it is anticipated that this could possibly increase from 22.9% in 2011 to 30% in 2026. The key point here is that it would mean an increase

**Appendix 1 - Deposit LDP Reps & Responses by Refpoint, Cabinet 15-12-15**

Filtered to show: (all of) Stage=V; Status=M

Rep'n/Para/Policy	AccessnNo	DateLodgd	Late?	Status	Modified	Summary
6089.V2//H1		20/07/2015	<input type="checkbox"/>			Summary: Does not support Housing Estimate
Source: Email		Type: Objection		Mode	Written	Status Maintained

in the need for homes for the elderly, sheltered accommodation and similar services rather than estates of new houses.

In addition, the Welsh Government published new statistics in February 2014 acknowledging that the previous population growth forecasts were incorrect. Instead of seeing an increase of 284,000 homes in Wales up to 2033, this was cut to 175,000, i.e. approximately 7,954 per annum, or 119,318 up to 2026, which is the lifetime of the development plans.

If the growth figures for Cardiff and Swansea are taken out, that leaves approximately 59,318 for the rest of Wales, which means that at most, 3,000 homes should be built in Powys up to 2026.

To sum up this element therefore:

- The estimate for houses up to 2026 is a higher annual figure than the figure for the last 8 years, which means the estimate should be approximately at least 2,000 less.
- In addition to that, the public statistics show that the population has fallen between 2012 and 2013
- The migration pattern for the last decade shows that the net figure for the last fifteen years would be 1,230. It's highly unlikely that these would all move to new homes, so yet again, it's difficult to justify the intention to build 6,071 new homes.
- It is agreed that the number of young people up to 15 years of age will reduce, which will then have an effect on the number of homes needed by young people
- It is anticipated that the number of over 65 year olds will increase, and again these will not need estates of new houses, but rather care in homes for the elderly, sheltered accommodation etc.
- The revised Welsh Government figures show that their original forecasts were a long way off, and based on that, a maximum of 3000 homes should be built in Powys not 5,000.

Document: Draft Deposit Written Statement 2015, p.50

Policy: H1

Issue: 2015: Deposit Draft-02. Housing - Distribution and Numbers

*Question                      Representation Texts*

**Question: 3d. (i)      Representation Details**

Representation Texts:

It is noted that the draft insert Local Development Plan (LDP) map for Builth Wells has included a number of candidate sites that are unlikely to be developed within the plan period.

Furthermore, sites that are clearly deliverable and that generally meet planning policy and had a positive/green score by the Powys County Council candidate site assessment process have been excluded from the draft LDP.

It is considered that the draft LDP should be amended so that sites that are clearly deliverable are included within the plan and that sites that have no prospect of being developed are excluded. By including sites with no clear prospect of development, the authority will inhibit its ability to meet the defined housing development need and other policy requirements for the plan period.

This 'problem' is clearly supported by comparison of the present draft LDP with the Unitary Development Plan (UDP) and the preceding 1997 plan. It is clear that some sites listed in the 1997 plan, then in the UDP and presently in the LDP have not been developed.

For example, the present site of P08 HA2 and V on the 1997 plan have been included within the present LDP draft and were also included within the UDP and the 1997 plan. The sites were not developed even though they have been in the plans for almost 20 years.

Furthermore, the southern part of B5 HA5 (UDP Ret) and 'B' on the 1997 plan were also included within the UDP and 1997 plans and is within the development boundary of the present draft plan, although with no allocation. This site has been within various plans over the years and has not been developed.

Below is an extract of the '1997' Development showing land allocations that have not been delivered:

map: Showing 'Builth West 1997 Development Plan'

map: Showing 'Builth East 1997 Development Plan'

Below is an extract of the 'UDP' showing land allocations that have not been delivered:

map: Showing '2010 Development Plan'

It makes little sense to include land with no prospect of being developed within the plan as this will make sure that planning and housing projections will not be met. By only including land with a clear prospect of development will the plan be sound and meet the long term planning policy objectives for Builth Wells.

It is considered that for the plan to be sound, it is necessary for all allocated sites to be deliverable and therefore developed during the plan period. Otherwise there is going to be a shortage of development sites.

This problem of deliverability is evidenced by the fact that Builth Wells was allocated 203 residential units in the UDP (and most of the aforementioned sites were not delivered) and now only 131 in LDP. Therefore, if development sites are being included that are not deliverable, there is going to be a massive shortage of housing in the plan period.

In comparison, Llandrindod Wells has been allocated 398 dwellings. Therefore, Builth Wells should be allocated more housing.

....

Land should only be included within the Local Development Plan if there are clear prospects of it being developed.

Allocation of land with the LDP that has already been in the 1997 and the 2010 development plans does not support the objective of 'deliverability'. Therefore, the plan can only prove to be sound if there is confidence and probability that the included sites are deliverable.

....

In summary, if sites are being included within the plan that in all probability will not be developed, and sites than can be developed are not included then the p/an can only be considered unsound. Therefore, we ask that the second part of P08 HA3 (579) be put back in as replacement of or addition to P08 HA2.

Council Response:

0

---

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: The draft Local Development Plan should be amended to include land that is clearly deliverable.

Land that has no prospect of being developed should not be included within the plan such as HA2 This is because such land will not aid the required housing projections nor fill the defined policies of the Local Development Plan. Therefore. the second part of P08 HA3 should be put back in the plan as it was assessed as being suitable.

Land should have a clear allocation and been though the correct assessment method before it is included within the development plan.

Council Response:

0

---

**Question: 4b Reason For Request To Speak At Hearing And Subject**

Policy: H1

Issue: 2015: Deposit Draft-02. Housing - Distribution and Numbers

*Question Representation Texts*

**Question: Council Response**

Representation Texts: Thank you for your comments. The Council does not agree that the LDP housing land target should be increased or that additional housing land allocations are required. The Council has found it necessary to revisit the housing growth figures following representations made on the Deposit Plan including the Welsh Government's (WG) fundamental concerns over deliverability and viability. The WG considers the Deposit Plan has a challenging target taking into account historical annual completions and in particular the low number of housing completions in the last few years which impact on and significantly increase the required build rates over the remaining Plan period. The WG is asking the Council to set a housing target which is at foremost deliverable and ensures that a 5 year housing supply can be met in line with the requirements of TAN1. It is apparent that the annual build requirement over the plan period must be set at a level which is considered deliverable and not unrealistically high. The Council is proposing that the housing land target is reduced, to be effected through a Focussed Change. Please note that the evidence for the revised housing land target is fully set out in the revised Housing Topic Paper (Dec 2015). Relevant parts of the Plan have been amended accordingly (again through proposed Focussed Changes) to align with the new housing data. This includes an update of the settlement allocations table in Appendix 1 which has been revised as a result of i) further work on deliverability ii) the consideration of site allocation representations received in response to the Deposit Plan and iii) to reflect new planning history as at the revised base date for planning permission information (1 April 2015). With consideration to the proposed Focussed Changes, the Council considers that the proposed growth and spatial strategy is sound, based on a robust methodology with levels of growth and site allocations supported by a wide range of supporting evidence. Please note that site allocation representations will be responded to separately.

Council Response:

0

**Question: 3d. (i) Representation Details**

Representation Texts: Policy H1 is objected to on the basis of the reduced housing land target (see separate form). The non-inclusion of the land at Station Road, Boughrood and its omission from the site schedule in Appendix 1 – Settlement Allocations. It is noted that the Policy also seeks to maintain a 5 year supply of housing. For reasons explained in the Full Submission attached we consider that unless a sufficient range and choice of sites is provided, Powys County Council will struggle to achieve a 5 year land supply both on adoption and throughout the plan period.

The first part of the policy refers to development in Towns and Large Villages. We consider that development of the site in question would be compatible with the requirement as it would form a logical extension to the settlement.

The Alternative Site proposed could potentially deliver 21 dwellings in accordance with Policy H3 which provides for average densities of 25 dwellings per hectare on sites in towns and large villages. It would also aim to be compatible with Policy H2 - Housing Delivery.

*Question Representation Texts*

**Question: Council Response**

Representation Texts: Having considered the objection made by the Representor to the reduced housing land target, it is considered this level of housing provision remains appropriate to ensure the LDP is capable of delivering the Strategy, its key socio-economic objectives and ensures maximum flexibility to respond to future economic growth. It is considered that any deviation from this housing supply provision would jeopardise the soundness of the Plan in being able to meet these objectives. It is considered that the number of dwellings provided for in the plan, will provide a deliverable and sufficient housing land supply. The LDP is supported by a substantial evidence base regarding infrastructure and site deliverability. Detailed site assessments have been undertaken on the allocated sites and the Council considers these to provide a range and choice of deliverable sites. This has included extensive consultation with internal Council departments and statutory consultees to identify any site constraints, which are detailed within the appendices of the LDP. The Council does not consider that there is a need to allocate additional land in Newbridge on Wye. The objection made by the Representor to the omission of a specific site (land to the rear of Ridgemount Hill) from the Schedule of allocated sites is responded to under responses to site representations.

Council Response:

0

**Question: 3d. (i) Representation Details**

Representation Texts: Policy H1 is objected to on the basis of the reduced housing land target (see separate form). The non-inclusion of the land to the rear of Ridgemount Hill, Newbridge on Wye and its omission from the site schedule in Appendix 1 – Settlement Allocations.

It is noted that the Policy also seeks to maintain a 5 year supply of housing. For reasons explained in the accompanying Submission Document we consider that unless a sufficient range and choice of sites is provided, Powys County Council will struggle to achieve a 5 year land supply both on adoption and throughout the plan period.

The first part of the policy refers to development in Towns and Large Villages. We consider that development of the site in question would be compatible with the requirement as it would form a logical extension to the settlement.

Question Representation Texts

**Question: Council Response**

Representation Texts: Thank you for your comments. The Council does not agree that the LDP housing land target should be increased to 7,700. The Council has found it necessary to revisit the housing growth figures following representations made on the Deposit Plan including the Welsh Government's (WG) fundamental concerns over deliverability and viability. The WG considers the Deposit Plan has a challenging target taking into account historical annual completions and in particular the low number of housing completions in the last few years which impact on and significantly increase the required build rates over the remaining Plan period. The WG is asking the Council to set a housing target which is at foremost deliverable and ensures that a 5 year housing supply can be met in line with the requirements of TAN1. It is apparent that the annual build requirement over the plan period must be set at a level which is considered deliverable and not unrealistically high. The Council is proposing that the housing land target is reduced, to be effected through a Focussed Change. Please note that the evidence for the revised housing land target is fully set out in the revised Housing Topic Paper (Dec 2015). Relevant parts of the Plan have been amended accordingly (again through proposed Focussed Changes) to align with the new housing data. This includes an update of the settlement allocations table in Appendix 1 which has been revised as a result of i) further work on deliverability ii) the consideration of site allocation representations received in response to the Deposit Plan and iii) to reflect new planning history as at the revised base date for planning permission information (1 April 2015).

Council Response:

0

**Question: 3d. (i) Representation Details**

Representation Texts: Policy H1 of the Deposit LDP seeks to deliver a suitable level of housing over the course of the Plan, stating that:  
 "Over the Plan period 2011-2026, the LDP will seek to maintain a 5 year supply of land for housing and provides land for 6,071 dwellings to meet the dwelling requirement of 5,519 additional dwellings."  
 This revised requirement is derived from the Welsh Government's 2011-based Household Projections which projected a 4,600 growth from 58,400 to 63,000 in households in Powys over the 2011-2026 Plan period. This is a significant reduction in the housing requirement identified by the Preferred Strategy, which proposed a Growth Option comprising the provision of 7,700 dwellings over the Plan period, based on the 2008-based Household Projections. Although the housing requirement has been increased from 5,000 to 5,519, our objection is maintained as the proposed housing provision derived from the 2011-based Household Projections is not considered 'sound' in terms of the following Tests of Soundness as set out within the Local Development Plan Manual, June 2006.  
 TEST C2: IT HAS REGARD TO NATIONAL POLICY  
 Planning Policy Wales, July 2014, 7th Edition (PPW) sets out the land use planning policies of the Welsh Government. In terms of the provision of housing, paragraph 9.1.1 of PPW seeks to ensure that Local Planning Authorities 'provide more housing of the right type and offer more choice' in terms of housing provision. The revised proposed housing provision of 5,519 dwellings is considered to restrict the choice of housing on offer to the public within Powys in that the requirement is derived from the 2011-based Household Projections which we consider to significantly under-estimate the housing requirements for Authorities in Wales, as discussed below.  
 Therefore based on the above, Policy H1 is considered to fail Coherence and Effectiveness Soundness Test C2.  
 TEST CE2: THE STRATEGY, POLICIES AND ALLOCATIONS ARE REALISTIC AND APPROPRIATE HAVING CONSIDERED THE RELEVANT ALTERNATIVES AND ARE FOUNDED ON A ROBUST AND CREDIBLE EVIDENCE BASE  
 As referred to above, the revised proposed housing requirement identified by Policy H1 of the Deposit LDP is derived from the 2011-based Household Projections, which were published by the Welsh Government in February 2014.  
 It is noted that the principal projections utilise the previous 5-year period for migration inputs, although we note that in this case, the previous 5-year period includes the worst

**Appendix 1 - Deposit LDP Reps & Responses by Refpoint, Cabinet 15-12-15**

by: Representation No

Rep'n/Para/Policy	AccessnNo	DateLodgd	Late?	Status	Modified	Summary
6204.V2//H1		20/07/2015	<input type="checkbox"/>			Summary: Policy H1 - Housing Provision - Need to provide a more reasonable and flexible dwelling requirement
Source: Email		Type: Objection		Mode	Oral (Examination)	Status Maintained

years of the recent global recession during which migration was significantly reduced between areas of the EU, UK and Wales. Accordingly, it is considered that this factor has significantly impacted upon the Household Projections which therefore cannot be considered robust and credible as required by Test of Soundness CE2. Furthermore, the economic conditions are considered to have strongly influenced household formation rates, which have seen a significant reduction as a result of difficulties in purchasing properties over recent years.

This view is endorsed by the Welsh Government's Minister for Housing and Regeneration in his letter to Local Planning Authorities dated 10th April 2014, who states that the "latest Welsh Government local authority level household projections should form the starting point for assessing housing requirements and are therefore not an end in themselves...For the avoidance of any future doubt, Local Planning Authorities must seek to provide for the level of housing required as the result of an analysis of all relevant sources of evidence rather than relying solely on the Welsh Government's household projections".

Accordingly, Policy H1 is considered to fail Coherence and Effectiveness Soundness Test CE2 in that the 2011-based Household Projections from which the proposed housing requirement is derived are not considered to comprise a robust and credible evidence base, and that the LDP fails to consider all relevant sources of evidence.

TEST CE4: IT IS REASONABLY FLEXIBLE TO ENABLE IT TO DEAL WITH CHANGING CIRCUMSTANCES

For the reasons outlined above, it is considered that the 2011-based Household Projections significantly under-estimate the housing requirements for Authorities in Wales (including within Powys) and therefore a housing requirement based on these Projections significantly restricts the Plan from being able to deal with changing circumstances (i.e. economic growth). We submit that a housing requirement for Powys in line with the Growth Option proposed by the Preferred Strategy (7,700 dwellings over the Plan period) would be a more reasonable requirement which would enable the Authority to deal with changing circumstances.

Therefore based on the above, Policy H1 is considered to fail Coherence and Effectiveness Soundness Test CE4.

Council Response:

0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: It is considered that the revised proposed housing requirement does not meet the Tests of Soundness as set out within the Local Development Plan Manual, June 2006. Therefore, in order to make the Powys Local Development Plan 'sound' with regards to Policy H1, it is recommended that the proposed housing requirement is reverted back to the Preferred Strategy Growth Option (7,700 dwellings over the Plan period) in order to provide a more reasonable and flexible housing requirement over the LDP period in the County.  
In the event that additional housing is identified within the LDP, we reserve the right to comment further in respect of the distribution of development throughout the County.

Council Response:

TEST CE4: IT IS REASONABLY FLEXIBLE TO ENABLE IT TO DEAL WITH CHANGING CIRCUMSTANCES

For the reasons outlined above, it is considered that the 2011-based Household Projections significantly under-estimate the housing requirements for Authorities in Wales (including within Powys) and therefore a housing requirement based on these Projections significantly restricts the Plan from being able to deal with changing circumstances (i.e. economic growth). We submit that a housing requirement for Powys in line with the Growth Option proposed by the Preferred Strategy (7,700 dwellings over the Plan period) would be a more reasonable requirement which would enable the Authority to deal with changing circumstances.

Therefore based on the above, Policy H1 is considered to fail Coherence and Effectiveness Soundness Test CE4.

Council Response:

0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: It is considered that the revised proposed housing requirement does not meet the Tests of Soundness as set out within the Local Development Plan Manual, June 2006. Therefore, in order to make the Powys Local Development Plan 'sound' with regards to Policy H1, it is recommended that the proposed housing requirement is reverted back to the Preferred Strategy Growth Option (7,700 dwellings over the Plan period) in order to provide a more reasonable and flexible housing requirement over the LDP period in the County.  
In the event that additional housing is identified within the LDP, we reserve the right to comment further in respect of the distribution of development throughout the County.

Council Response:

0

**Question: 4b Reason For Request To Speak At Hearing And Subject**

Representation Texts: In order to present our case and representations verbally to the Inspector and to address any questions or comments of the Inspector or the Council.

*Question Representation Texts*

**Question:** **Council Response**

Representation Texts: The Council does not agree that policy H1 should be revised to provide greater flexibility towards sites outside of the Development Boundary. Development boundaries are an established feature of development plans and intentionally curtail urban sprawl. The Council disagrees that Policy H1 artificially curtails a sustainable pattern of development. The Plan is predicated on site allocations that are suitable, available and deliverable within the LDP period so as to meet the objectives of the Strategy. Settlements were assessed in detail during the Plan preparation work and in the consideration of sites put forward as candidate sites. The Council does not consider it necessary to review Towns and Large Villages or make changes to the Plan in response to this representation. Due to updated evidence however, Focussed Changes are proposed to the Housing Chapter of the LDP - please refer to the Focussed Changes document. Note that site allocation representations will be responded to separately.

Council Response:

0

**Question: 3d. (i) Representation Details**

Representation Texts: The approach to housing delivery, as set out in supporting paragraph 4.6.2 to Policy H1 (@34.46), is to identify suitable locations for housing which support the delivery of a sustainable pattern of development. Whilst we support that objective, we consider that this process is artificially curtailed by the assumption, implicit in the wording of Policy H1, that sites outside but adjacent to the Development Boundaries are automatically dismissed as unsustainable, without any proper consideration of their sustainability credentials. This approach is considered too broad-brush and simplistic, and will result in genuinely sustainable development options not being appropriately considered. This does not provide any flexibility to respond to changing circumstances, such as constraints being overcome on candidate sites, and as such fails test CE4 of soundness.

The Land at Four Crosses, LLanymynech, Powys - site 1073 (site plan attached) has previously been submitted to Powys County Council. The site is assessed in Appendix 6 of the Sustainability Appraisal Report and a number of constraints have been identified which have resulted in the site not being proposed as an allocation. These constraints consist of the requirement for significant highway infrastructure improvements; for improvements to the Sarn Wen Brook; for a Flood Consequences Assessment; and as a result of the site being the outside a key boundary feature, namely Sarn Wen Brook. These issues are being addressed through the current planning application and as a result of this, the application will provide appropriate mitigation to address any issues that exist, such that the development of this site will represent sustainable development. However, Policy H1 as proposed does not facilitate such sustainable development opportunities as they lie outside of the proposed Development Boundary.

Furthermore, the Joint Housing Land Availability Study 2014 (February 2015) identifies that only a 1.5 year land supply exists at present and as a result it examines ways to increase supply such that the required 5 year supply will be able to be demonstrated in the future. In such a context, all opportunities for sustainable development, including those adjacent to the Development Boundaries should be explored as these provide for very significant benefits to meet the identified housing needs.

Council Response:

0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: In order to address the issues identified above greater flexibility is required to be built into the housing policies set out in the LDP. Policy H1 as currently drafted should be revised to ensure that it includes a mechanism whereby sustainable sites, including those outside of the Development Boundary, will be considered in circumstances where a housing

shortage has been identified.

The distribution of housing should be amended to reflect the sustainability credentials of each Town and Large Village, taking account of the level of main facilities in the settlement and whether or not they lie within the Central Growth Corridor.

The allocation of sites should be responsive to the distribution of housing (once amended as above) to provide for an equitable and justified level of development at each settlement based on its sustainability credentials.

Council Response: 0

---

**Question: 4b Reason For Request To Speak At Hearing And Subject**

Representation Texts: To explore the need for greater flexibility to be included within the LDP's housing policies and to consider the merits of the release of the site at Plas Foxen, Four Crosses.

Issue: 2015: Deposit Draft-02. Housing - Distribution and Numbers

*Question Representation Texts*

**Question: Council Response**

Representation Texts: The Council does not agree that the housing land requirement in the Deposit LDP constitutes under-provision. It is proposed that policy H1 is amended through a Focussed Change - see Focussed Changes document. This is so that the policy reflects updated housing evidence as detailed in the revised Housing Topic Paper (December 2015). Please note that site allocation representations will be responded to separately.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: Policy H1 is objected to on the basis of the reduced housing land target (see separate form). The non-inclusion of the land to the east of the A 438, Glasbury and its omission from the site schedule in Appendix 1 – Settlement Allocations.

It is noted that the Policy also seeks to maintain a 5 year supply of housing. For reasons explained in the accompanying Submission Document we consider that unless a sufficient range and choice of sites is provided, Powys County Council will struggle to achieve a 5 year land supply both on adoption and throughout the plan period.

The first part of the policy refers to development in Towns and Large Villages. We consider that development of additional sites such as the site in question would be compatible with the requirement as it would form a logical extension to the settlement.

ADDITIONAL SUPPORTING EVIDENCE:

A) Submission Document

Council Response: 0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: There is a need to allocate additional land for housing, such as the site in Glasbury to the east of the A438

Council Response: 0

**Question: 4b Reason For Request To Speak At Hearing And Subject**

Representation Texts: To contribute to overall discussions regarding the scale of development proposed.

*Question*                      *Representation Texts*

**Question:**                      **Council Response**

Representation Texts: Thank you for your comments. The Council considers that the proposed LDP Settlement Strategy and Sustainable Settlement Hierarchy is sound, based on a robust methodology with levels of growth and site allocations supported by a wide range of supporting evidence. The Council hold the view the Norton is correctly classified as a Small Village. Note that CS688 should have been sifted from the sites status report alongside other Norton sites and its inclusion in the July 14 report as green was an error which will be corrected. The Strategy does not propose land allocations in small villages. TAN 6 Planning for Sustainable Rural Communities (July 2010) recognises that in rural areas settlement boundaries can limit the provision of housing to meet local needs, advising at paragraph 2.26 that: "In smaller settlements, planning authorities should consider including criteria based policy against which planning applications can be assessed, rather than identifying settlement boundaries". The LDP promotes infill development in Small Villages and for larger sites the Council is in favour of Village (Action) Plans so as to enable further community involvement on how Small Villages may develop. Minor logical extensions to Small Villages are an exception for affordable homes. The change in Strategy from the UDP is deliberate as it is intended to increase opportunities for "rural exceptions" affordable housing by removing factors such as the "hope value" of edge of settlement land thus encouraging more land to be released at values which make such development viable. The Representor does not raise new issues or evidence which leads the Council to change its conclusions in relation to the Strategy and no changes are considered necessary to ensure that the Plan is sound. Please note that site allocation representations are being responded to separately.

Council Response:

0

**Question: 3d. (i)**      **Representation Details**

Representation Texts: Norton was identified as a Small Village in the adopted UDP which allowed limited growth to support the sustainability of communities. It is now proposed to be identified as a Small Village (@34,21) to provide a focus for rural living in the LDP.

However, Policy HI (@34.46) provides for further restriction on housing growth in Small Villages such that the level of growth required to provide a focus for rural living communities in the most sustainable locations is not provided for. It does this by only allowing for infill development or minor extensions for affordable homes.

The Site Status Report (July 2014) assesses the potential sites in each settlement with a RAG rating. The Land south of Will's View is the only such site in Norton which is assessed as being 'green', with all others being 'red'.

This builds on the previous Site Assessment undertaken by the Council in December 2013. This assessment concluded that it was a 'green' site (i.e. an appropriate site for residential development, based on the traffic light system applied). Furthermore, officers commented on the principle of the site's development as follows:

						Status Maintained

"The site was considered in the UDP inspectors report, and was previously allocated within the Radnorshire Local Plan prior to the UDP. The UDP inspector found that the site had the potential to represent an overdevelopment given Radnorshire's share of growth in the plan as a whole and with Norton having seen considerable recent growth. The site would represent a logical and considered settlement extension in a southerly direction".

The clear conclusion is that this is the most sustainable site to provide for the needs of Norton in order that it can provide a focus for rural living. Indeed, an application has been submitted for 9 dwellings on this basis and is currently being considered by the Council. Discussions with Council officers have indicated that the proposed development is, at least in principle, consistent with the UDP as it provides for limited growth to support the sustainability of communities.

However, given that the site would not be classed as infill development, it could now be considered to be contrary to emerging Policy HI. This is clearly unjustified given the sites recognised sustainability credentials. This fails test CE1 of soundness, as Policy HI does not logically flow from the objective for Small Villages to provide for a focus for rural living, and in fact prevents this being achieved.

Furthermore, given the limited housing land supply, in which circumstances TAN1 identifies that the "need to increase supply should be given considerable weight", it is proposed that a more flexible approach should be adopted.

Such flexibility could be provided, either within policy or supporting text, through the recognition that in circumstances where a 5 year supply of housing cannot be demonstrated, limited extensions to Small Villages will be considered favourably. This would ensure that sustainable development was provided for in a flexible way to meet the test CE4 of soundness.

Policy: H2 Issue: 2015: Deposit Draft-03. Housing - Delivery and Infrastructure

*Question Representation Texts*

**Question: Council Response**

Representation Texts: Policy H2 is seeking that a mix of housing types are developed in order to meet the range of identified local housing needs which has been identified from a various sources of evidence that includes the LHMA. The requirement in the policy for a mix of housing types reflects not only the findings of the LHMA but also other evidence in relation to for example the 2011 Census relating to the ageing population of Powys and the subsequent need for bungalows to be provided. Consequently the Council disagrees that the requirement for a mix of houses relates only to affordable housing but also to market housing also.

The Council does not consider it appropriate to try and identify all sites where a phasing plan may be applicable. This is a judgement which is best made at the pre-application or planning application stage. Although Appendix 1 has detailed some sites where the requirement has been identified as probable, this is not a comprehensive list and the details are intended as informative. It is, however, proposed as a focussed change that sites requiring development briefs should be clearly identified in Appendix 1 although not all of these sites will necessarily require development to be phased; a judgement has to be applied.

The Council disagrees about replacing the word 'longer' with 'shorter' in the sentence at the end of Part 3 of the Policy as the development plan may only have a year left or less and therefore it is more appropriate to retain the word longer in the policy, therefore giving the developer at least 5 years to deliver the site.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: Policy H2 applies to all forms of housing both private and affordable however at 1. i. it requires the mix of housing to be in accordance with that identified in the Local Housing Market Assessment however this document only relates to affordable housing. Therefore the current wording is controlling the type of market housing on a site unfairly. at 1. ii. It would be helpful and provide more certainty to the development industry if the sites the Council consider likely to need a develop If at point 3 the LPA is trying to ensure site get developed within the fives years which is supported by the HBF then it would be better to have the requirement to which ever is the shorter.

Council Response: 0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: At 1. i. make it clear that this requirement applies to the affordable housing element of a scheme only.  
1. ii. Identify the sites which the Council consider may need a phasing plan.  
Change the last word of section 3. to shorter

Document:Draft Deposit Written Statement 2015, p.52, para.4.6.8

Issue: 2015: Deposit Draft-03. Housing - Delivery and Infrastructure

*Question Representation Texts*

**Question: Council Response**

Representation Texts: The Council disagrees that there is a need to move the supporting text (paragraph 4.6.4) of policy H2 relating to the mix of housing to policy H4. Policy H2 is seeking that a mix of housing types are developed in order to meet the range of identified local housing needs which has been identified from a various sources of evidence that include the LHMA. The requirement in the policy for a mix of housing types reflects not only the findings of the LHMA but also other evidence in relation to for example the 2011 Census relating to the ageing population of Powys and the subsequent need for bungalows to be provided. Consequently the Council disagrees that the requirement for a mix of houses relates relate only to affordable housing but also to market housing also.

Development briefs are referenced in paragraph 4.6.8 of the LDP and it is not considered necessary to include a reference to them in policy. However, it is agreed rthat greater clarity could be provided in Appendix 1 of the LDP for those sites that should be subject to a development brief, and it is proposed to make add this clarity through the Focussed Changes.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: The issues of housing mix identified in para 4.6.4 should be dealt with in Policy H4. Para. 4.6.8 introduces the idea of the need for development briefs on some sites. However this is not mentioned in the policy wording itself. In addition in a similar way to the phasing plans it would be helpful and provide certainty to developers if the Council could indicate the sites which they consider are likely to require a design brief.

Council Response: 0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: The need for development briefs should be referred to in the policy wording. Identify the sites which are likely to require a design brief.

Source: Email Type: Objection Mode Written Status Maintained

Document:Draft Deposit Written Statement 2015, p.52

Policy: H3

Issue: 2015: Deposit Draft-02. Housing - Distribution and Numbers

*Question Representation Texts*

**Question: Council Response**

Representation Texts: The Council has calculated the dwelling capacity of the site at 25+ dwellings per hectare, which reflects the density of development within the locality and is the standard to be applied to all Towns and Large Villages identified under Policy H3 to ensure the sustainable use of land. Accordingly the Council considers the proposed dwelling number identified for the site allocation is appropriate for the area.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: The density of 25 houses in one hectare is we believe out of character with much of this village. When the Llanfechain Community Council first considered the LDP we accepted the 11% increase (no longer being specifically stated) recognising the wider need for housing and the local desire for more families to help correct an increasing demographic imbalance (more retired than working, more single than families) but voiced concern that too large an influx of new people in a short timeframe might impact adversely on this community in that such an influx might be difficult to assimilate into the culture and ethos of the community. There was also concern that too large a number of new houses would further 'urbanise' a Welsh rural village with a negative impact on its character, culture and appeal, including to tourists. Although accepting some growth, Llanfechain Community Council would prefer this expansion to be gradual, varied in house design and more widely distributed. There are 155 houses within the current development area so 11% would be 18 new houses. We also wish to note that there has been some reinstatement of housing, some low cost, within the wider community area and there might yet be development on both the Bwlchdyddar and the Ffridd sites.

Council Response: 0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: The density attributed to a small village

Document: Draft Deposit Written Statement 2015, p.52

Policy: H3      Issue: 2015: Deposit Draft-03. Housing - Delivery and Infrastructure

*Question      Representation Texts*

**Question:**      **Council Response**

Representation Texts:    Policy H3 provides nominal densities but recognises in paragraph 4.6.1 that densities may vary from the guide due to other factors such as physical constraints and it also anticipated that they will be subject to further consideration at the application stage. Paragraph 4.6.11 also refers to PPW which advocates the inclusion of a policy on density. As such it is considered that Policy H3 should be retained in the LDP.

Council Response:      0

**Question: 3d. (i)**      **Representation Details**

Representation Texts:    Establishing a standard Housing Density in a County of the size of, and with such a diverse character as, Powys is inappropriate. It might be useful from the point of view of establishing housing numbers to make use of average densities, but densities ought to reflect the character of an individual town or village. A density standard, even for a large village is unlikely to be appropriate to a central town location. Densities should not conform to a County-wide standard.

It is not the case that all rural developments or developments in small villages are at low densities - many small developments of say a rural terrace might be of a density well above the standard suggested in Policy H3. Policy DM2 (points 1 and 13) already require development to make the most efficient use of land and to complement the character of the surroundings. This is far better achieved through sensitive design than enforced density standards.

Council Response:      0

**Question: 3d. (ii)**      **Desired changes to Document**

Representation Texts:    Policy H3 should be deleted in favour of a Supplementary Design Guide suggesting the manner in which new development might make best use of land whilst complementing, reflecting and enhancing existing character.

Council Response:      0

**Question: 4b**      **Reason For Request To Speak At Hearing And Subject**

Representation Texts:    Densities affect housing numbers and the ability of a plan to meet housing targets. If existing character is to be maintained or enhanced, a much more sophisticated means of dealing with design issues and their affect on housing provision needs to be developed. This is the sort of topic that needs discussion.

Policy: H4 Issue: 2015: Deposit Draft-04. Housing - Affordable Housing

*Question Representation Texts*

**Question: Council Response**

Representation Texts: 1.The cost of sprinklers has been considered in the Council's CIL & Viability Assessment and considered to be appropriate 2. It is intended to produce a SPG detailing the expected s.106 contributions to be made by developers 3. The Council agrees that the target contributions are as shown in the policy and they should be complied with in the first instance unless it can be demonstrated by the developer that the viability of their site cannot meet these policy target contributions.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: An objection is raised to the findings of the LDP & CIL Viability Assessment document 2014 which has informed the setting of the affordable housing levels. There are a number of the assumptions around the cost of development which are considered to be too low, these are:  
 Fire Sprinklers - at para 7.9 the cost of Fire sprinklers is accounted for, however at the ongoing Cardiff LDP the WG figures of Â£3,075 / house and Â£879 / flat were accepted and used in the viability assessment. It is noted that there is likely to be far more one of housing in the borough and this is likely to result in the Fire sprinkler costs being at the higher end of the scale due to each property needing to be individually design against volume builders who will gain some reduction due to volume and the use of standard house types.  
 S106 cost - the figure of Â£2000 / unit is considered to be far too low and is not justified by the information in the table at para 7.30 the open space calculation is above this on its own. Although S106 costs have to be justified, at a time when Council resources are diminishing it is not unreasonable to expect that Councils are more likely to look to increase S106 costs rather than reduce them.  
 Table 12.1 seems to indicate that far less areas are viable than suggested by the conclusion and the associated levels of affordable set. This is particularly evident when looking at the smaller sites, which are far more common in the Authority and brownfield sites a type of development encouraged by the plan.

Council Response: 0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: Reconsider the findings of the viability document having adjusted the assumptions based on the comments above.

In terms of S106 costs clarity could be provided by the Council producing a draft SPG on S106 contributions to accompany the submission of the Deposit Plan, if this were to include calculation formulas for each area of likely S106 contribution which is now common practise this would allow for the financial impact of likely S106 requirements to be better considered.

The wording of the policy and supporting text needs to make it far clearer that each site will be considered on its own merits in terms of viability, this does not mean that there has

to be a viability assessment submitted with every scheme as presently suggested, however the policy does need to have the clear flexibility to allow for developers to make viability arguments on the basis of a submitted assessment.

It is considered that there are a number of options for the Council:  
 Reconsider the affordable percentage  
 Consider raising the threshold if % is not reduced  
 Consider alternative models of delivery and be less prescriptive about the way affordable is delivered in terms of tenure and management.

*Question Representation Texts*

**Question: Council Response**

Representation Texts: It is suggested that the words '....,subject to detailed viability assessments,....' be deleted from point 2 of the policy as the target contributions in the first instance should be met as those targets have been derived from the Council's own viability assessment that will be the subject of examination at the EiP.

Council Response:

0

**Question: 3d. (i) Representation Details**

Representation Texts: The wording of point 2. seems to indicate that a detail viability assessment will be required for each site. This is unnecessary as the viability assessment to set the affordable housing targets has already been done so there is no need to add extra delay or cost to the application process.  
 The willingness of the Council to negotiate on the affordable housing requirement through submission of a viability assessment should be included ion the policy wording rather than just at the end of the supporting text.

Council Response:

0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: Remove the requirement to carry out a viability assessment under point 2.  
 Including wording in the policy which shows that the council will negotiate on affordable housing provision where the viability of the site can be proved to not support its provision.

Question Representation Texts

**Question: Council Response**

Representation Texts: The Council understands that development viability can change in an area over a plan period as a result of fluctuating house prices over a period. Therefore, the policy provides some flexibility by providing developers with the opportunity to demonstrate that the viability of their particular scheme is not able to provide the target percentage of affordable housing stated in the LDP in that particular area.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: 34.52 4.6.15 indicates that viability assessments will be carried out to calculate the quantity of affordable housing. This would appear to favour a developer who will always want to make as much profit on a site as possible and supply as little if any affordable housing at all. Predicting the housing market sale prices at the time of an application can produce unrealistic figures. This does not guarantee any affordable housing being completed when communities are in need of them.  
4.6.17 Allows for a developer to reduce the amount of affordable housing on a site based on viability - this is seen as a loophole/get out clause - why have a policy to ensure affordable housing is built and within the same policy allow such conditions within granted applications to be removed?

Council Response: 0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: Re assess this section of policy to ensure that all communities in need of affordable housing and the targets set within the LDP are going to be met. Perhaps specify and ensure that all applications for affordable housing include dialogue with registered social landlords at pre application stage and documented evidence of this dialogue is submitted with the planning application for consideration. Any affordable housing commuted sums held within the authority and ring fenced for specific community council areas should also be considered within this dialogue and at this stage.

Council Response: 0

Policy: H4

Issue: 2015: Deposit Draft-04. Housing - Affordable Housing

*Question Representation Texts*

**Question: Council Response**

Representation Texts: These comments are noted. It is noted that the 10% affordable housing target contribution for sites in the Rural North of the County would result in only 2.5 affordable dwellings on the site proposed for allocation in Llanfechain (P31 HA1 ) and that this is less than the need for 6 affordable dwellings that has been identified for this Community. However, it is also anticipated that affordable housing may come forward on windfall infill and exception sites in the Community of Llanfechain. The allocated sites are therefore not intended to accommodate the total affordable housing needs of a community. Furthermore, the percentage contributions will be reviewed periodically to reflect changes in land values, house prices, policy requirements and development costs.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: Llanfechain Community Council endorses the need for 'Affordable Housing' and note that in previous statements made has accepted more than the 10% you plan.

Council Response: 0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: The Rural Housing Enabler identified a need for up to 6 affordable houses in the community (Llanfechain).

*Question* *Representation Texts*

**Question: Council Response**

Representation Texts: The Council recognises that development viability can change over a plan period due to fluctuating house prices. Therefore, the text that supports the policy provides some flexibility in order to provide developers with the opportunity to demonstrate that the development viability of their particular scheme that could result in a reduction in the percentage of affordable housing required from the target amount in that particular area stated in the LDP.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: 4.6.15 Viability assessments and 4.6.17 reducing the amount of affordable homes based on viability. This would appear a loophole for developers to explore and potentially result in no affordable homes being built on smaller sites in communities where they are needed to keep generations of families in the area.

Council Response: 0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: Change the policy to ensure much needed affordable housing is provided by developers. Involve RSL's at pre application stage of every planning application involving affordable homes to ensure the best outcome for the needs of the community that the development is in.

Policy: H4 Issue: 2015: Deposit Draft-04. Housing - Affordable Housing

*Question Representation Texts*

**Question: Council Response**

Representation Texts: The policy provides the opportunity for developers to demonstrate to the Council that the viability of a site warrants a reduction in the percentage of affordable housing provision stipulated in the policy. This opportunity given to developers in the policy is considered a sensible approach considering that the viability of sites can frequently change due to fluctuations in house prices and land values and viability can be different from site to site even at a local scale.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: The Affordable Housing Requirement for larger developments was noted at the reduced percentage of 20% (compared to the UDP). This was felt to be more practical as reductions from the previous higher rate have been negotiated by developers in the past.

However the Town Council feels that the Kayes site, MUA1, should contain the full 20% affordable housing requirement and that this should not be reduced in any negotiations.

Question Representation Texts

**Question: Council Response**

Representation Texts: These comments are noted. However, no changes are considered necessary to ensure that the Plan is sound. The Council agrees that there is a need for an SPG relating to affordable housing to provide clear guidance on what is expected via s.106 contributions and it is intended to produce a SPG relating to affordable housing which will address this. Whilst no SPG is planned for design, (DM) policy in respect of design requires all developments to complement and where possible enhance the character of the surrounding area, and the supporting text to this policy states that developments should contribute positively to the character (local distinctiveness and sense of place). The (DM) policy in respect of the historic environment requires proposals within the context of the historic environment to reflect local distinctiveness. National design guidance is also contained in Technical Advice Note 12.

**Question: 3d. (i) Representation Details**

Representation Texts: New housing must be well integrated and acceptable within environmental and infrastructure capacity and constraints. There is considerable scope to improve the design, build quality and use of vernacular materials as well as to respond to the local topography to facilitate this integration. Size restrictions on affordable housing will mean that good design to integrate with existing dwellings is crucial. It is difficult to comment effectively in the absence of any SPGs which will need to serve to improve design standards, preserve the integrity of our built environment and limit visual impacts in the landscape.

Question Representation Texts

**Question: Council Response**

Representation Texts: 1. It had been decided at the deposit stage of the LDP to reduce the requirement from 30% to 20% in the Central Powys area on the basis that the Council would adopt CIL. Since the deposit stage the Council has decided not to take the CIL approach at this stage although this position may change in the future. Consequently, the Council is proposing to raise the level of contribution from 20% to 30 % in the Central Powys area in accordance with the findings of the Viability Study.  
 2. Policy H4 sets a 10% target in South West Powys which is due to the success by the Council in gaining contributions of at least 10% through negotiations from developers on sites in the south west Powys in recent years. Policy H4 is flexible by allowing developers to demonstrate by viability evidence that their sites cannot provide this level of contribution.  
 3. Policy H4 applies to all housing development above the threshold of 5 or more dwelling units or 0.25 ha of land. The policy thresholds and target contributions are based on the findings of the Viability Assessment and review of other evidence. The percentage target contributions vary according to each Price Area as identified by the Viability Assessment. The success rate and achievability in practice of the percentage target contributions will be monitored and reviewed periodically.  
 4. It is considered that Policy H4 needs to be flexible with Criterion 4 relating to the smallest scale of residential developments where on site provision is not feasible such as conversions of buildings to residential use as well as the subdivisions of properties.  
 5. The Council considers the maximum size requirement of an affordable dwelling be set at 115sqm which is based not only on the ACG notional space standards but also the Council's own experience of individual affordable houses being developed in Powys and the importance through experience for the Development Management section of having maximum house sizes stipulated in a policy as does a similar policy in the UDP, Policy HP10. The Council consider it useful to have a maximum size of affordable dwelling stipulated in a LDP policy to act as a definite figure which DM section can use when dealing with applications as they have done with the UDP policy which had a maximum size of 130sqm. The performance of Policy H4 will be monitored carefully by the Council and revised if necessary based mainly on the experience of the DM section using the policy.

Council Response:

0

**Question: 3d. (i) Representation Details**

Representation Texts: Affordable housing

Affordable Housing Targets

Notwithstanding that we have raised concerns about the deliverability of sites, the viability testing in Central Powys does acknowledge that sites could bear the policy requirement for 30% affordable housing, yet the authority has adopted a cautious approach and dropped the requirement to the lower rate of 20% to enable a contribution towards infrastructure costs. Such costs should already be factored into the modelling assumptions, so it is not appropriate to drop the target and increase the headroom any further. The Council should explain how this approach aligns with Objective 1 of the LDP to meet affordable housing need.

The viability testing in South West Powys identifies that 11 of the 12 modelled sites are unviable and it is unclear why the authority has adopted a 10% affordable housing target in this area. Whilst the authority may be delivering affordable housing in 'hot-spots' across the South West, it is unreasonable to ask for contributions from all developments when the evidence indicates the majority of sites are unviable. Policy H4 should be more flexible to align with the requirements of paragraph 9.2.19 in PPW by indicating that the authority will negotiate with developers where it is intended to include an element of affordable housing in proposed developments.

				Status		Maintained

Affordable Housing Threshold

Policy H4 requests affordable housing contributions on sites of 5 or more units or 0.25ha and above. The authority should justify this threshold when the 2014 JHLAs indicates that small site completions are viable and have totalled almost 430 units over the past 5-years. There is a misalignment with the viability assessment, which concludes that the majority of small sites are not viable. This appears at odds with the recent completions quoted from the 2014 JHLAs. Notwithstanding the concerns raised above regarding the Viability Assessment (2014), the authority should also explain its position on affordable housing thresholds in the context of the Assessments findings, which indicate that most price areas have viable sites greater than 3 units (Table 12.1).

Local Housing Market Assessment (LHMA)

The 2014 LHMA identifies the need for 2,295 affordable units over the 15-year plan period with the greatest demand for social rented properties. The Viability Assessment (2014) has modelled affordable housing requirements assuming 75% intermediate rent and the authority should explain how the need identified in the LHMA is aligned to the modelling assumptions. In accordance with TAN 2, the plan has included an affordable housing target of 1,044 dwellings and as a percentage of the housing requirement this equates to 19% of affordable units. The authority should explain how this relates to the target of 34% in the LHMA (paragraph 2.54) and whether the definition of 'intermediate sale' properties is compliant with the definition of affordable housing in TAN 2. The TAN also has a strong presumption that affordable housing will be provided on-site, however Criterion 4 of Policy H4 permits either on-site provision or financial contributions. The policy should be amended to align with TAN 2 and provide on-site provision in the first instance.

Mix of Affordable Units

Para 9.2.15 of PPW states that it is desirable that new housing development incorporates a reasonable range, mix and balance of house types and sizes to cater for a range of housing needs and contribute to the development of sustainable communities. Para 8.1 of TAN 2: "Local Housing Market Assessments and the Development Plan", states that it is important that a LPA has an appreciation of the demand for the different dwelling sizes and types of housing (i.e. intermediate and social rented) in relation to the supply so that the LPA can negotiate the appropriate mix on new sites. LDP affordable housing policies should not include the range/type/mix/size of housing as matters could change over the lifespan of the plan and potentially inhibit the delivery.

*Question                      Representation Texts*

**Question:                      Council Response**

Representation Texts:      The LDP is not expected to provide all of the affordable housing need identified in the LHMA. The LDP Affordable Housing Background Paper explains that the LDP and its housing allocations are only one source of provision other sources include affordable housing provided via Social Housing Grant.

Council Response:

0

**Question: 3d. (i)      Representation Details**

Representation Texts:

...  
Furthermore, it is openly questioned whether the planning authority has fully consulted the LHMA within the draft LDP as there seems to be some contradiction.

According to the LHMA 2015, it is noted that Builth Wells & Llanwrtyd have an affordable housing need of 20 dwellings per year. However, according to the draft Powys LDP and GIL assessment of 2014, only 204 dwellings have been allocated in total for Builth Wells and Llanwrtyd Wells of which only 20% will be affordable, which equate to approximately 40 dwellings. This is a somewhat lower figure than what is reported in the LHMA. Therefore, it is contended that the LDP has not provided sufficient land allocation for the plan period as Builth Wells needs far more housing numbers and allocated land to meet this need.

Furthermore, the 2015 joint housing study clearly illustrates that some of the LDP allocated sites within Bullth Wells are not included in the study as they are deemed to not be deliverable within five years, therefore illustrating the aforementioned sites are not deliverable and should be replaced with the site that is the subject of this submission. This is because this site is deliverable, has no constraints, has been promoted by the owner and assessed by PCC as a green score and also as a green score and supported by the town council.

Therefore, it is also considered that the authority will have difficulty in demonstrating a 5 year land supply at any given point especially when the joint housing study is providing contradictory information.

Policy: H4

Issue: 2015: Deposit Draft-04. Housing - Affordable Housing

Question Representation Texts

**Question: Council Response**

Representation Texts: The Council disagrees that there is a need for the suggested sentence to be added to the policy and the Council considers that viability is adequately given an appropriate level of emphasis in the draft policy H4.

Council Response:

0

**Question: 3d. (i) Representation Details**

Representation Texts: Policy H4 states that:  
 "1. In accordance with the evidence of local housing needs endorsed by the Council, a contribution towards affordable housing will be required from open market housing development of 5 or more dwelling units or 0.25 ha and above.  
 2. The target contributions required for each Price Area, subject to detailed viability assessments, are as follows:  
 a. Central Powys – 20% contribution.  
 b. Severn Valley - 20% contribution.  
 c. Rural North - 10% contribution.  
 d. South West/Ystradgynlais – 10% contribution.  
 3. In Towns and Large Villages, where the contribution equates to:  
 a. 1 whole unit, the contribution will be required as on-site provision.  
 b. Less than 1 whole unit, a financial contribution will be required.  
 4. The contribution may be either on-site provision or a financial contribution in:  
 a. Small Villages.  
 b. Residential conversions and subdivisions in all levels of the Settlement Hierarchy".  
 Whilst both Criterion 2 of Policy H4 and supporting paragraph 4.6.17 now refer to viability, it is considered that a stronger emphasis on viability should be included within the policy text itself, in order to comply with paragraph 3.7.1 of Planning Policy Wales (7th Edition, July 2014) which states that "it is essential that arrangements are fair to both the developer and the community" with regards to planning obligations.  
 Therefore based on the above, Policy H4 in its current form is considered to fail Coherence and Effectiveness Soundness Test C2 in that it does not have regard to national policy.

Council Response:

0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: It is considered that the proposed planning obligations policy does not meet the Tests of Soundness as set out within the Local Development Plan Manual, June 2006. Therefore, in order to make the Powys Local Development Plan 'sound' with regards to Policy DM3, it is recommended that an additional sentence is added to the policy text, stating: "In seeking planning obligations, the Local Planning Authority will pay due regard to the potential impacts on the viability of the proposed development"  
 This will help to ensure that greater weight is placed on the viability of the proposed development when planning obligations are negotiated, which will in turn ensure that

Council Response: 0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: It is considered that the proposed planning obligations policy does not meet the Tests of Soundness as set out within the Local Development Plan Manual, June 2006. Therefore, in order to make the Powys Local Development Plan 'sound' with regards to Policy DM3, it is recommended that an additional sentence is added to the policy text, stating:  
 "In seeking planning obligations, the Local Planning Authority will pay due regard to the potential impacts on the viability of the proposed development"  
 This will help to ensure that greater weight is placed on the viability of the proposed development when planning obligations are negotiated, which will in turn ensure that arrangements are fair to both the developer and the community in accordance with Planning Policy Wales.

Policy: H4

Issue: 2015: Deposit Draft-04. Housing - Affordable Housing

*Question Representation Texts*

**Question:** **Council Response**

Representation Texts: The Council understands that development viability can change at a local area over a plan period as a result of fluctuating house prices. Therefore the policy provides some flexibility by providing developers with the opportunity to demonstrate that the development viability of their particular scheme will not be able to provide the target percentage of affordable housing stated in the LDP in a particular house price zone. The Council proposes to produce a SPG in relation to s.106 contribution.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: We support the Council in its objective to secure and deliver affordable housing to meet identified need in Policy H4 (@34.52) – Affordable Housing Contributions. However, we do have concerns that the cumulative impact of the various planning obligations placed on development proposals is not viable. Indeed, the Community Infrastructure Levy Viability Assessment 2014 identifies that under the proposed affordable requirement of Policy H4 the majority of sites will not be viable. This Policy is not therefore realistic or appropriate and fails test CE2 of soundness.

Council Response: 0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: Policy H4 should be revised to provide an affordable housing requirement that is viable and it should include a specific reference to circumstances where the ability of development proposals to be delivered viably is at risk. Such reference will ensure that the viability of development is properly recognised in policy as an important consideration.

Council Response: 0

**Question: 4b Reason For Request To Speak At Hearing And Subject**

Representation Texts: To explore the need for greater flexibility to be included within the LDP's housing policies and to consider the merits of the release of the site at Plas Foxen, Four Crosses.

Issue: 2015: Deposit Draft-04. Housing - Affordable Housing

*Question Representation Texts*

**Question: Council Response**

Representation Texts: The Councils disagree with the proposed changes requested by the Representor. The Council considers the involvement of RSLs the most effective vehicle for delivering affordable housing one reason being that they can effectively manage the occupancy of the dwellings over a long period of time and therefore ensuring that the dwelling continues to be affordable long after their construction.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: 4.6.16 The requirement for all affordable housing to be provided through an RSL is considered unacceptable and over onerous. This para. also refers to the ability to provide a financial contribution in certain circumstances, in order to provide flexibility this option should be extended to all housing sites subject to a reasoned justification. Also there is no explanation of how such a financial contribution would be calculated, at minimum a reference to the details of such calculation in an SPG should be provided.

Council Response: 0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: The wording of para. 4.6.16 should be amended to sy that the Council would prefer to see the affordable housing delivered through an RSL but are willing to consider other forms of delivery. Amend wording of para 4.6.16 to indicate that a financial contribution in lieu of on site provision may be acceptable on all housing sites subject to a reasoned justification. Cross reference a SPG for method of calculation of the financial contribution.

*Question Representation Texts*

**Question: Council Response**

Representation Texts: It is recommended that Policy H6 be deleted from the LDP. It is agreed that the policy is not in conformity with national planning policy as stated in para. TAN 2.

Council Response:

0

**Question: 3d. (i) Representation Details**

Representation Texts: In principle we support 100% affordable housing having exceptional permission on sites not normally identifiable for residential development where there are proven local needs (4.6.22). We add the caveat regarding the need for a diverse housing mix and that such developments must still recognise the constraints of biodiversity (e.g hedgerows and streams): topography and landscape; heritage assets; localised flooding potential, or any compromise to limited infrastructure capacity. Such exception sites would always be unacceptable in rural settlement or open country and the Community Council support this exclusion.

Question Representation Texts

**Question: Council Response**

Representation Texts: It is recommended that Policy H6 be deleted from the LDP. It is agreed that the policy is not in conformity with national planning policy stated in TAN 2.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: Firstly, the National Park Authority would like to congratulate the Powys LDP team for the efforts made to address the significant concerns raised against the first Deposit LDP (2014). It is acknowledged that the level of work undertaken to achieve the revised Deposit is substantial and the team is to be congratulated. We are extremely encouraged to see the progress being made by yourselves to move towards an adopted plan and the certainty this will bring in relation to the future development in Powys. Undoubtedly this will be of benefit to the region and can only be supported by the NPA. Notwithstanding the above, we would like to draw your attention to the following issues we have identified with the deposit draft LDP (2015) and its compliance with National Planning Policy. We raise these concerns from our recent experiences of the Examination process and we hope what follows will benefit you in the production of a sound LDP. These are not objections per se, but we urge you address the points in your lead up to submission in the interests of soundness.

Please note that these are officer comments, which will be put before Members at the next available opportunity. Therefore they may be subject to amendment following NPA recommendation. We will advise you of any change accordingly.

**4. Policy H6 Enabled Exception Sites**

The NPA has previously provided comments in relation to our concern over the compliance of Policy H6 with National Policy. PPW states quite clearly at 9.2.23 that Rural Exception Sites are not appropriate for market housing. Given this direction, we have concerns policy H6, which allows market housing to come forward on these sites, is fundamentally flawed. We acknowledge that this mechanism of utilising market housing to 'pump prime' affordable housing sites addresses some viability issues regarding the delivery of affordable housing in rural areas. However, it is more appropriate to allocate such sites with appropriate policy to control the mix of housing on site. It is not acceptable to utilise an exception site mechanism to such ends. We would urge council to reconsider this policy.

*Question Representation Texts*

**Question: Council Response**

Representation Texts: It is recommended that Policy H6 be deleted from the LDP. It is agreed that the policy is not in conformity with national planning policy as stated in para. TAN 2

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: Exception Sites

Policy H6 states that in exceptional circumstances open market housing may be included to make a proposal viable. However, sites that include a mix of market and affordable housing cannot be classed as 'exception sites' under national policy. TAN 2 explicitly states that such sites are not appropriate for market housing (para. 10.14). The policy clearly states that this policy will apply to "Town and large villages". Further clarification is required to explain why these sites could not come forward as market housing delivering affordable housing in accordance with policy H4.

Question Representation Texts

**Question: Council Response**

Representation Texts: It is recommended that Policy H6 be deleted from the LDP. It is agreed that the policy is not in conformity with national planning policy stated in TAN 2.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: Policy H6 states that:  
 "To meet a proven, unmet local need for affordable housing, the development of affordable housing will be permitted as an exception only in Towns and Large Villages on sites which form a logical extension, and adjoin or are in close proximity to the development boundary.  
 The development of enabled exception sites will be permitted where all of the following criteria are met:  
 i. The scale of development is commensurate to the settlement size and must accommodate at least 5 dwellings.  
 ii. The affordable housing or plots are developed by or transferred to a Registered Social Landlord, or an equivalent organisation or the Strategic Housing Authority.  
 iii. The tenure and size of the affordable housing must correspond to the evidence of local housing needs, with the dwelling size not exceeding 115 sqm.  
 iv. A minimal number of open market dwellings, if included, are provided by either:  
 a) A Registered Social Landlord or equivalent organisation where the ratio of open market to affordable dwellings is demonstrated as key to the site's viability without Social Housing Grant; or  
 b) A non-Registered Social Landlord where one open market dwelling should enable the provision of at least four affordable dwellings."  
 Whilst supporting paragraph 4.6.22 states that "Policy H6 enables the release of exception sites which have not come forward for reasons of viability or hope value", it is considered that a stronger emphasis on viability should be included within the policy text itself, in order to comply with paragraph 3.7.1 of Planning Policy Wales (7th Edition, July 2014) which states that "it is essential that arrangements are fair to both the developer and the community" with regards to planning obligations. Private developers and landowners should not be limited to a ratio of one open market dwelling to four affordable housing dwellings as required by criterion (iv)(b). Such ratios should not be stipulated in policy but should be subject to detailed scrutiny of viability in each case as suggested within criterion (iv)(a) for RSL applicants.  
 Therefore based on the above, Policy H6 in its current form is considered to fail Coherence and Effectiveness Soundness Test C2 in that it does not have due regard to national policy.

Council Response: 0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: In order to make the Powys Local Development Plan 'sound' with regards to Policy H6, it is recommended that criterion (iv)(b) of Policy H6 is amended to state:  
 "A non-Registered Social Landlord where the ratio of open market to affordable housing is demonstrated as key to the site's viability"

Policy: H7 Issue: 2015: Deposit Draft-04. Housing - Affordable Housing

*Question Representation Texts*

**Question: Council Response**

Representation Texts: The Representor is partly in support of the Deposit Local Development Plan in that it supports the size restriction on affordable homes and the need for affordable housing. The concerns raised by the Representor are noted. 1) The supporting text for Policy H8 (paragraph 4.6.31) explains that further detail on the definitions and their assessment will be provided in the Affordable Housing SPG. 2) Policy H7 allows rural affordable homes with RSL involvement or by private individuals, and this approach is considered to be appropriate to facilitate private affordable housing in the rural communities of the County. 3) Policy H8 sets out the affordable housing eligibility criteria, which includes criterion requiring the person to be in 'housing need' as defined by the Council's common allocations scheme and its procedural guidance. This requirement will ensure that the individual's need for affordable housing is taken into account in determining their eligibility. The monitoring of eligibility will be carried out where appropriate. 4) The BBNP have an adopted Local Development Plan containing affordable housing policies and the approach taken within these policies appear to be similar to those proposed in the Powys LDP.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: H7 Affordable Housing - Llangors Community Council support the size restriction on affordable homes. Support is given to the need for affordable housing, however there are concerns within the community that there is insufficient control/ monitoring of new single rural self build affordable homes developed by individuals. An RSL should always be involved with any affordable home to ensure that the properties become Community Affordable Housing stock in perpetuity. It appears that this policy proposed would enable landowners to take the fortunate opportunity to gain planning permission for family members who can be handed land to build on once planning permission is granted, and subsequently changing the affordable housing eligibility status of the successful applicant. In turn at resale the value of such property will always be out of the reach of someone in genuine affordable need even when the Market Value Reduction percentage is taken into consideration. Allowing such development without RSL involvement goes against the ethos of affordable housing being a requirement for those in genuine need to live within basic means. The Brecon Beacons National Park Authority (BBNPA) also covers part of Llangors Community Council area and we would request that Powys County Council work with the BBNPA regarding affordable housing policy and form a joint/agreed common policy approach.

Council Response: 0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: A clear definition of affordable housing should be given and an RSL should always be involved with any application for affordable housing prior to the submission of the planning application to protect those in genuine need and prevent loopholes in policy. Eligibility of affordable need should be controlled and monitored better. Powys County Council should work with the BBNPA to adopt a common policy as the BBNPA have an agreed LDP policy.

*Question* *Representation Texts*

**Question: Council Response**

Representation Texts: The Council disagree with proposed change requested by the Representor for the maximum size for an affordable dwelling to revert to 130 square metres as per the existing UDP policy. The Council considers that the maximum size for an affordable dwelling of 115 sqm is adequate to ensure the level of design quality and amenity are satisfactory. The size of 115 sqm is based on ACG Notional Space Standards and the LDP monitoring will identify if the standards change over the course of the LDP period and if considered necessary the policy amended.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: Rural settlements and open country (4.6.28). There is concern at the reduction of surface area for affordable/local needs homes from 130sqm to 115sqm. It is considered that the existing figure better allows for good design and flexibility of space. We propose retaining the 130 sqm maximum and removing the possibility of future extension to permit a wider variety of build and reasonable room sizes and avoid future additions which often compromise good design and affordability. There are further concerns regarding plot size limitation where this prevents appropriate siting and set-back of houses, in design and residential amenity terms. This could contravene environmental regulations where properties are not served by mains sewerage.

Council Response: 0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: Propose the retention of the existing 130 sqm of surface area for affordable/local needs homes.Address plot size limitations, which could prevent appropriate siting and setting back of houses, in design and residential amenity terms.

Issue: 2015: Deposit Draft-04. Housing - Affordable Housing

Question Representation Texts

**Question: Council Response**

Representation Texts: 1) The Council does not consider that further definition is required in respect of the location for rural affordable homes, as the policy makes it clear that rural affordable homes will be permitted on sites integrated within or forming minor, logical extensions in Small Villages or Rural Settlements. Whilst Rural Settlements are not proposed to be named, their characteristics are defined within the LDP strategy. 2) The Council agrees that paragraph 4.6.30 appears to currently enables larger floor space dwellings than the maximum specified within the proposed policy of 115 square metres, which could undermine the affordability of such dwellings. It is also noted that the provision for exceptional circumstances to be considered is not reflected in the policy itself which stipulates a fixed maximum floorspace of 115 square metres. Provisions for exceptional circumstances to be taken into account in decision making are not required to be set out in policy, as departures from the adopted policy can be considered at the application stage when other material considerations may indicate that the development should be approved contrary to the local development plan. The Council agrees to remove this paragraph 4.6.30 from the supporting text of policy H7. 3) Policy H10 is viewed by the Representer as enabling the removal of occupancy restrictions, which is considered to undermine the fundamental requirement for affordable dwellings to be secured 'in perpetuity'. Policy H10 seeks to clarify the Council's approach towards applications to remove occupancy conditions and restrictions. (INCLUSION OF THIS POLICY IS BEING REVIEWED)

Council Response:

0

**Question: 3d. (i) Representation Details**

Representation Texts: Firstly, the National Park Authority would like to congratulate the Powys LDP team for the efforts made to address the significant concerns raised against the first Deposit LDP (2014). It is acknowledged that the level of work undertaken to achieve the revised Deposit is substantial and the team is to be congratulated. We are extremely encouraged to see the progress being made by yourselves to move towards an adopted plan and the certainty this will bring in relation to the future development in Powys. Undoubtedly this will be of benefit to the region and can only be supported by the NPA. Notwithstanding the above, we would like to draw your attention to the following issues we have identified with the deposit draft LDP (2015) and its compliance with National Planning Policy. We raise these concerns from our recent experiences of the Examination process and we hope what follows will benefit you in the production of a sound LDP. These are not objections per se, but we urge you address the points in your lead up to submission in the interests of soundness.

Please note that these are officer comments, which will be put before Members at the next available opportunity. Therefore they may be subject to amendment following NPA recommendation. We will advise you of any change accordingly.

5. Policy H7– Rural Affordable Homes

Again we acknowledge that there is a need for small scale affordable forms of development, however, as stated above, the location that this form of development can be developed needs to be better defined to avoid sporadic residential development in open countryside locations. We also have concerns to the extent that such forms of development accord with the definition of affordable housing set out in TAN 2 which states that affordable housing is such where there are secure mechanisms in place to ensure that it is accessible to those who cannot afford market housing. Accordingly we have concerns that the affordability of such dwellings will be undermined by the provision set out in 4.6.30 which enables a larger floor space dwelling to be developed under this scheme (thus pushing such schemes over the affordable floor space ratio). We also have concerns that the plan enables the removal of occupancy restrictions on such dwellings through policy H10. Again, we urge caution with this approach and remind PCC that rural exceptions housing should only be enabled to serve exceptional essential housing need that can be secured in perpetuity.

Issue: 2015: Deposit Draft-04. Housing - Affordable Housing

Question Representation Texts

**Question: Council Response**

Representation Texts: 1. The Council has used the ACG notional space standards as a guide for Policy H7 and criteria 1 to 3 within it. The policy proposes the largest space standard which is a maximum floorspace of 115 sqm for an affordable dwelling. Paragraph 4.6.29 of the LDP explains 115 sqm has been used as it provides flexibility and takes into account changes in incomes over the plan period. This is a policy which will be closely monitored by the Planning Policy section which will liaise with the DM section on how it is performing. If considered necessary the maximum size of an affordable dwelling will be revised in the policy including if the ACG standards change during then plan period or if the Council decides to use another standard or use its own size threshold from the experience of schemes being developed.

2. The Council proposes to change criterion 4 of policy H7 to specify that only permitted development rights relating to floorspace increases should be withdrawn.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: Policy H7 provides criteria for the development of rural housing in small villages and rural settlements. The size restrictions in Criterion 1-3 are linked to ACG notional space standards, yet the authority has not considered how the policy will apply if ACG standards change over the life of the plan. Furthermore, Criterion 4 removes permitted development rights from affordable units, but the authority have pre-empted the outcome of an Article 4 Directive that would need to be submitted to Welsh ministers for removal of permitted development rights in small villages and rural settlements. It is unclear how the policy would work in practice, or indeed, the intention of the authority. This needs further clarification and explanation on how it aligns with national policy to direct development to sustainable locations.

Policy: H11

Issue: 2015: Deposit Draft-03. Housing - Delivery and Infrastructure

*Question Representation Texts*

**Question: Council Response**

Representation Texts: The Council agree to amend Policy H11 to ensure there is adequate consideration of and reference to the historic and architectural interest of abandoned dwelling in its renovation. However, not as recommended by the Represorator as this would not be clear in terms of how the historic and archaeological interest of the former dwelling would be taken into account in the design of the dwelling. It is proposed to require re-use not only of materials but also of any features of the former dwelling and also for the design to take reference from either recorded evidence of the architectural/archaeological interest of the dwelling or from the local vernacular. SPG's on archaeology and the Historic Environment Record are also proposed which will address how these matters are to be taken into account in decision-making.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: Policy H11 should also consider the need to protect the historic interest of abandoned buildings during renovation - as is clear in Policy H12

Council Response: 0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: Suggested text for Policy H11 section 2

"Any re-build shall be partial and sited within the footprint of the former dwelling and should make re-use, where practicable, of the materials used in the former dwelling and should take into account a consideration of any historic or archeological interest the original building might have.

*Question Representation Texts*

**Question: Council Response**

Representation Texts: The Council notes the concern raised by the representor that criterion 2 of the policy may lead to intentional neglect of heritage assets. However, it is considered that the fact that the dwelling is required to be habitable and recognisable as a dwelling in order to benefit from the provisions within policy H12 provides a safeguard in itself against the likelihood that owners will intentionally neglect the dwelling as they would then risk non-compliance with the habitable dwelling test and the first criterion of this policy. The 'beyond realistic repair' test is well-established within the existing policy and whereas the existing policy test is clear and is reasonably defineable and supporting financial and structural information will be required to assess whether the building is beyond realistic repair. There are also other measures within legislation to address require listed buildings to be maintained in a reasonable state of repair, although it is noted that the same powers do not relate to non-listed buildings. No evidence has been provided to prove that the current policy is leading to the intentional neglect of heritage assets.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: There is a danger that heritage assets will be intentionally neglected and run down in order that owners/developers may claim they are 'proven to be beyond realistic repair ' and can be replaced. This would reduce the 'at risk' register and would help achieve a monitoring framework target by frustrating the aims of that target. There must be safe-guards against this possibility.

Council Response: 0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: 4.6.38 cross reference to Policy L1, 4.3.3 and 4.3.4 to encourage maintenance of historic buildings rather than replacement.

Council Response: 0

**Question: 4b Reason For Request To Speak At Hearing And Subject**

Question	Representation Texts
----------	----------------------

**Question: Council Response**

Representation Texts:

Evidence of Need  
The most recent evidence on gypsy and traveller accommodation needs is identified in:

A. Powys Gypsy Traveller Accommodation Assessment (GTAA) Update 2015 - Within the Powys LDP area, Table 7 (page 28), identified:

1. In Welshpool - an immediate need (2011-2016) for 3 permanent pitches and a longer term need for 9 permanent pitches (2017-2026)
2. In Machynlleth - an immediate need (2011 - 2016) for 3 transit pitches and a longer term need for 1 transit pitch (2017-2026).

B. Powys LDP Topic Paper- Gypsy and traveller Needs in Machynlleth, April 2015 - Paragraph 2.5 of this document states that "The GTAA Update identified the need for a Transit Site in Machynlleth. After consultation the Housing Service has spoken with the gypsies in Machynlleth and their representatives, the Unity Project, and established that there is a need for a small permanent site in Machynlleth".

Further evidence on the accommodation needs of gypsies and travellers is currently being gathered through the GTAA required under the Housing (Wales) Act, 2014 which will be submitted to Welsh Government before the end of Feb 2016.

**Welshpool**

Paragraph 23.1 of the GTAA Update 2015 states that of the immediate need for 3 permanent pitches, two of the newly forming households left the site, and that the Council will investigate the possibility of reconfiguring the Welshpool Site to accommodate 1 additional plot for the newly forming household when the need arises.

As of July/August 2015 there was a single vacancy on the site and the pitch was not allocated to what was previously identified as emergent need as there was no interest. Further evidence relating to the needs for this site will be identified through the GTAA being undertaken in accordance with the requirements of the Housing (Wales) Act 2014.

**Machynlleth**

As explained above, the GTAA Update 2015 identified a need for a transit site in Machynlleth, but following subsequent investigation, as set out in the Powys LDP Topic Paper- Gypsy and Traveller Needs in Machynlleth, April 2015, the need was found to be a need for a permanent site. Two households currently reside on an unauthorised but tolerated site. This is reflected in Policy H13 of the LDP and by site allocation P42 HA4. As stated in paragraph 4.6.41 of the LDP "The updated Assessment 2015 led to the need being identified for a permanent site in Machynlleth..."

**Compliance with Circular 30/2007**

The Topic Paper also describes the site selection process that led up to the identification of site allocation P42 HA4. It is considered that the proposed site allocation complies with the advice in the circular in that regard has been had to the needs of the family, proximity and access to local services, avoidance of known constraints (C2 flood zone,

Status Maintained

common land, etc), highway access, and that the site / policy has been subject to the statutory informing assessments (SEA, SA, HRA). In addition to Circular 30/2007 Welsh Government published 'Designing Gypsy and Traveller Sites Guidance' in May 2015 which in paragraph 3.22 sets out general themes for sites - access, suitability of land, local services, etc - and it is considered that the proposed site accords with this guidance.

Site Deliverability

Having established the need for a permanent site in Machynlleth, the Council is in the process of working towards the delivery of a site as soon as is reasonably and practically possible. Further evidence of the need in the Machynlleth area is being gathered through the GTAA being undertaken to meet the requirements of the Housing (Wales) Act, and a project manager has been recruited to work on the delivery of the site including negotiations with the landowner, preparing a planning application, obtaining funding and grant assistance, etc.

Allocation P42 HA4

Proposed allocation P42 HA4 is of sufficient size to accommodate the 2 households residing on the tolerated, unauthorised site in need of permanent accommodation, and has scope to enable occupation by any additional households identified by the GTAA being undertaken under the Housing (Wales) Act. It is also of sufficient size to enable highway access improvements, as set out in the Topic Paper.

Council Response:

0

Page 666

Question: 3d. (i) Representation Details

Representation Texts: Gypsies and Travellers

The evidence doesn't quantify the need for either permanent or transit sites and when, within the plan period they are needed.

Plan Need

The 2014 Gypsy and Traveller Accommodation Assessment (GTAA) identifies the need for 25 permanent pitches and 4 transit sites up to 2026. Clarity is required on the robustness of these figures using the 2012 survey data in the assessment given (a) the additional need identified in paragraph 21.1 up to 2021, (b) further information gathered in April 2014 and (c) the recommendations in paragraph 23.1.

Welshpool

It is understood that the existing Leighton Arches Site in Welshpool has an immediate need for 1 permanent pitch up to 2016 and this can be accommodated by re-configuring the existing site. However, the authority should clarify that with two households having left the site, less the need for 9 pitches up to 2026; can the existing site in Welshpool accommodate the remaining need for 7 permanent pitches by the end of the plan period? It is essential that the site can deliver the identified need.

Machynlleth

The GTAA identifies an immediate need for 3 transit pitches in Machynlleth by 2016 and that an additional transit pitch is required by 2021. The authority should explain how Policy H13 aligns with the evidence by seeking to allocate a permanent site instead of providing transit provision. Subsequently, it would be useful for the authority to clarify if the site selection process was based on the need for permanent or transit provision; the latter would appear to align with the allocation from its positioning on the trunk road into Machynlleth, but may not necessarily meet the requirements of a permanent pitch identified in Policy H13. Circular 30/2007 and the Housing (Wales) Act, 2014, both identify a duty on local planning authorities to meet evidenced unmet need for residential and transit pitches. The evidenced need for 3 pitches in Machynlleth is currently unmet through the 'area of search' identified on the proposals map. Moreover, the Welsh Government has concerns regarding the deliverability of the site and its compliance with the site selection criteria in Circular 30/2007. The site in Machynlleth would generate additional traffic that would require a new junction into the site before it can be utilised. The authority should explain how the unfunded junction improvements and the possibility of a Compulsory Purchase Order (CPO) on the allocation would deliver the site in time to meet the need by 2016. The authority should ensure the deliverability of the site and that its approach to site selection conforms with Circular 30/2007.

*Question* *Representation Texts*

**Question: Council Response**

Representation Texts: Your comments on the Open Space requirements of the policy are noted. However Policy H14 is focused around the Open Space Assessment where it became evident that that not all Local Areas of Play ( LAPs) had been included within the assessment, the focus being primarily on play areas with fixed play equipment. A lot of LAPs were missed due to there being no obvious characteristics or they were classified as amenity open space. The concern in the assessment with this is that although there should be 0.25 ha per 1000 population of equipped playing there should be 0.55 ha of informal playing space (LAPs). These give a combined area of 0.8 ha per 1000 population which in most settlements is unachievable. Therefore a decision was taken to focus on the 0.25 ha per 1000 population target for equipped play areas which is of the most benefit to children and young people and is a target that can be considered as achievable. Furthermore the fact that this assessment is looking at the informal areas of open space that children and young people can use for play and will set out a framework to address any deficiencies, means that informal playing space will be available but classified under other typologies.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: The Open Space Provision on larger developments is supported but it is noted that several requirements have been removed from the tables (whilst the areas of those remaining have not increased), namely -  
 informal playing space  
 children's playing space  
 local areas for play or doorstep spaces for play and informal recreation

**Question: Council Response**

Representation Texts: This representation is considered to be in support of the Deposit Local Development Plan. No changes are therefore required.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: Policy H14 states that:  
Housing development proposals for ten dwellings or more, subject to viability, shall include provision for open space:

1. The type of open space required should be determined by the deficiencies identified in the Open Space Assessment for that area and may be provided on or off site depending on what is considered most appropriate.
  2. Arrangements must be in place for the long term aftercare and maintenance of the open space.
  3. In some instances it may be more appropriate for developer contributions of the equivalent value to be paid for the improvement of existing provision.
- We note that the policy now includes a requirement for the Local Planning Authority to consider the viability of a proposed development with regards to the provision of open space, therefore Policy H14 is now considered to comply with paragraph 3.7.1 of Planning Policy Wales (7th Edition, July 2014) which states that "it is essential that arrangements are fair to both the developer and the community" with regards to planning obligations.

Council Response:

0

**Question: 3d. (i) Representation Details**

Representation Texts: We support new retail development being in existing centres, or the immediate periphery, with a presumption against out of town development and a focus on revitalising town centres, supporting retail businesses in large villages and reducing the imperative for travel. Support for developing residential accommodation above retail premises in towns would assist with revitalisation and reduce private transport dependence.

Document:Draft Deposit Written Statement 2015, p.65

Policy: TD1

Issue: 2015: Deposit Draft-07.Employment, Retail and Tourism

Question Representation Texts

**Question: 3d. (i) Representation Details**

Representation Texts: The Cambrian Mountains Society (CMS) thanks Powys CC for this opportunity to comment on the Deposit LDP. The Society's comments are general in nature and as such fall under reference point @34.1 but throughout the representation links will be made to other parts of the documentation. The Society's major concern with the LDP is that it does not follow local, national or international ideas on sustaining and enhancing areas of high value landscapes. Many of the points the Society address here were presented in its 2014 Deposit Stage Representation but these have evolved over the last year.

.....

CMS would also like to point out that the LDP pays insufficient attention to the interplay between the two prominent industries in the county namely agriculture and tourism. Especially in high value landscapes the LDP should encourage farm diversification to provide more visitor facilities. These may include accommodation but also recreational assets such as pony trekking stables, rural craft centres, and even dark skies observatories.

.....

In conclusion CMS's preferred option for the Cambrians continues to be AONB designation, but it sees the setting-up of a network of SLAs across all three counties covering the Cambrian Mountains as a very positive move in safeguarding this unique landscape at the heart of Wales.

Council Response: 0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: Reviewing all the recommendations made in the above representation, in order to help the Powys LDP sit more comfortably with a Wales-wide approach. Notably taking into account the following organisation' work in maintaining and enhancing areas of high landscape value.

WG guidance,  
NRW advice,  
Neighbouring counties' provision of SLAs together with their linked SPGs.

Council Response: 0

**Question: 4b Reason For Request To Speak At Hearing And Subject**

Representation Texts: The representation concentrates on the provision of SLAs with a linked SPG document and it is this that CMS would like to speak to.

At a hearing session the Society would expand on details of a Cambrian Mountains SLA. For instance we would detail it's;

*Question Representation Texts*

**Question: Council Response**

Representation Texts: This Representation is noted. The Council agree to amend the text to recognise the wider range of tourism assets across Powys. See Focused Changes for details.

Council Response:

0

**Question: 3d. (i) Representation Details**

Representation Texts: The evidence in the Topic paper shows unequivocally the nature of tourism and the reasons why visitors come and return to Powys. These are the assets that require protection from inappropriate development:

- outstanding, varied and far reaching landscapes,
- rural tranquillity
- the many opportunities for outdoor pursuits

This is the basis for the desired steady growth in all year and higher value tourism.

Unaccountably, the evidence paper omits studies into the impact of windfarms on tourism in Wales despite the critical nature of these developments to Powys. Welsh Government commissioned research (2014) concluded that the visitor profile and potential of multiple large windfarms concentrated in Montgomeryshire was likely to cause a reduction in visitors who would be unlikely to be replaced.

Even when proliferation of windfarms was not expected and turbines were very much smaller surveys demonstrated that amongst Welsh visitors interested in outdoor activities there was a greater negativity to windfarms and reluctance to visit areas with turbines. Antipathy to windfarms almost doubled when more than one in a view.

Recent surveys show outdoor visitors (e.g. 2/3rds of long distance walkers) are already avoiding areas with windfarms. Accommodation providers proximate to windfarms experience reduced income and visitor numbers where landscape is the prime attraction.

That North Powys could be seriously adversely affected by windfarm development must be a major consideration. The DDLDP must give protection to the important National Trails (Glyndwr's Way and Offa's Dyke) as well as the promoted Regional Trails such as Kerry Ridgeway, Severn Way, Wye Valley Walk, Epynt Way etc. through a substantial buffer zone to development of windfarms/single turbines (at least 1000m) to preserve the integrity of the experience and amenity of walkers. National Trails provide an excellent 'brand' that considerably increases staying and day visitors. Walking tourism is a very significant contributor to the Welsh economy with Powys in the top quartile.

Equestrian tourism is a major omission given this is an important, growing tourist market bringing significant trade to upland accommodation providers and equine businesses. The network of horse trails in Powys is unique including many national, international and regional rides (including 19 day rides promoted by Powys Council). These are as important as NCN routes and National Trails. This group of visitors is probably the most sensitive to wind turbines in upland areas and the amenity and safety of riders must be protected by statutory separation of at least 400m from bridleways. It is clear from British Horse Society Surveys (2012) that even experienced riders avoid areas with turbines; that even the safety of experienced riders and quiet horses may be jeopardised by the proximity of turbines; that visiting riders will not have any opportunity to 'acclimatise'

mounts to turbines and businesses will not be able to promote rides through or near windfarms given a duty of care.

The CROW (2000) Act requires that the Council implements a Rights of Way Improvement Plan (adopted by the Council Oct 2007). This is mentioned in the Environment Topic Paper but the DDLDP does not identify how the priorities and improvements to protect and enhance the network will be carried out or legal obligations met. This is a serious omission.

The development of Walkers are Welcome towns (see CPRW Manifesto) should be supported by the DDLDP. Protection must be provided for their environs to ensure inappropriate development does not compromise this business initiative.

The intention of simplification of the suite of policies in the UDP is laudable but, reliance on DM1 and DM2, as drafted, with selected named items for protection has resulted in a much weaker planning tool with significant omissions. CPRW maintains there must be a TD4 on protection of tourism assets (listing assets at DM1 7ii plus CPRW additions as above). This is an absolute requirement given conflicting pressures on landscapes, National Trails, other major PROWS historic sites.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: Representation on behalf of Powys Holiday Caravan Park Operators

Policy TD1 (Tourism Development)

The positive thrust of Policy TD1 (Tourism Development) is very much welcomed together with the positive nature of the supporting text in paragraphs 4.8.1 to 4.8.6.

The positive policy approach to all forms of tourism development is entirely consistent with Planning Policy Wales (PPW - Edition 7 July 2014) and also TAN13 (Tourism).

Indeed, Policy TD1 is particularly welcomed as it embraces the importance of the holiday caravan park sector and the fundamental importance the tourism industry has on the economy of Powys in terms of direct and indirect tourism spend. It is important that any tourism policy within the Deposit Powys LDP acknowledges the economic contribution of holiday caravan parks as rural businesses/enterprises which, in turn, support local communities, towns and villages of Powys.

Whilst Policy TD1 is therefore welcomed, clarification is nevertheless required on The following point;

1. Clarification is required as to what constitutes "modest in scale" in terms of a development scenario. The term 'modest' is not defined within the subtext of Policy TD1 and is far too open to interpretation as to what this actually means. Further clarification is therefore required in this respect.

Council Response:

0

**Question: 3d. (i) Representation Details**

Representation Texts: COMMENT DRAFT DEVELOPMENT PLAN  
TOURISM DEVELOPMENT R 34.83  
EQUESTRIAN TOURISM - suggested additions to draft plan.

Radnorshire Trails for Horse Riders – A Unique World Class Resource.

The Old County of Radnorshire has a horse trail network which offers a world class resource upon which to base the further development of equestrian tourism. Our company has developed 600 miles of described and mapped trails with “door to door” route descriptions, each of a days ride, which link together 28 overnight trail stops set in the hills. The network comprises:

Old Council Roads (OCRs) and Bridleways - Extensive rural depopulation has left behind a complete pattern of now unsurfaced green lanes across the hills and along the valleys. There are hundreds of miles of bridleways. Many appear to go nowhere – until they are transposed onto a map of the OCRs. Together the OCRs and bridleways make a complete horse trail network giving riders access to the whole of upland Radnorshire with minimal use of roads used by motorised vehicles. This is a unique resource unequalled anywhere in the world.

Overnight Trail Stops at Inns, Hotels and Hill Farms – There are currently 28 inns, hotels and hill farms in the Radnor Hills offering overnight hospitality to horses and riders. Hill farms offer a consistently high standard of welcome, food and accommodation. More hill farms are needed. Hotels and inns are variable. Many are struggling to survive. They need higher bed occupancy, up graded facilities and, in some cases, better management.

Scenery and Landscape – Riders appreciate the ever changing, panoramic views offered by the Radnorshire landscape and get the feeling that they are travelling through wild and undeveloped countryside. Horse riders, walkers and those who come to travel the hills are especially sensitive to intrusions into the landscape which interrupt the skyline – e.g. aerials, masts and wind turbines. We support the many mentions in the draft report emphasizing the importance of landscape and are increasingly concerned that the recent encroachment of wind turbines, which often dominate the landscape, look down on bridleways and tower above the old green lanes, are becoming a very real threat, both physically and commercially, to this high spending, very discerning tourism sector.

Economic Impact – Together with the hire of horse, baggage transfer, route packs, access to helpline, accommodation, evening meals and lunches at the inns, hotels and farms along the trails each rider contributes between £210 and £230 per. 24 hours in the hills. Our small company, FreeRein Wales, with 30 trail horse contributes c. £450,000 to the rural economy and directly employs 5 people. Indirectly we also support all who work in or own the the 28 overnight trail stops used by our riders.

**6301.V1//TD1** 19/07/2015  Summary: Include equestrian tourism in the plan

Source: Email Type: Objection Mode Written Status Maintained

---

Present Clientel – Trails can be from 2 days 1 night up to 7 day s 7 nights. The short stay / weekend (2 /3 day) riders are from the UK with a majority from London and the southeast. The internet has brought the Radnor Hills to the notice of riders from around the world. Americans, Australians and riders from continental Europe can now be found travelling the Radnor Hills staying at the farms, inns and hotels. They are usually riding the longer trails.

Potential Development – There is a large, as yet untapped, market to cater for riders who have their own horses. Accommodation for horses would need to be upgraded and the trails improved to make them acceptable to many horse owners.

Council Response: 0

---

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: We are asking for the development of equestrian tourism to be included in the plan.

*Question* *Representation Texts*

**Question: Council Response**

Representation Texts: This Representation is noted. Policy TD1 does not seek to be restrictive. The Council agrees to amend Policy TD1 criterion 2. See Focused Changes for details.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: Under policy TD1, subsection 2 proposes that the development or expansion of tourism facilities in the open countryside will only be permitted under certain criteria (i.e. part of farm diversification; re-use of an existing rural building; and complementing an existing tourism development or asset).

While these are all admirable in themselves, the policy appears to exclude a new non-farm start-up tourism business; for example, if someone (a non-farmer) purchases or leases an area of woodland and meadow for use as a luxury camping site or for log chalets, they would not fall within the 3 criteria listed and would not be able to receive planning consent.

This seems unnecessarily restrictive and counter to para 4.8.2 which encourages new development. While no-one wants inappropriate developments, we consider that all new developments should be considered on their own merits and quality proposals for new developments which meet the first section of text of TD1.2 should be allowable in principle.

Council Response: 0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: TD1 needs rewording to remove unnecessarily restrictive clauses.

A more balanced approach to tourism is required to take account of all tourism/leisure sectors.

*Question* *Representation Texts*

**Question: Council Response**

Representation Texts: This representation is considered to be in support of the Deposit Local Development Plan. No changes are therefore required. However Paragraph 4.8.12 has been redrafted to take on-board other representations made on the Deposit Plan. Care has been taken to ensure that the content supported by this representation has remained in the LDP.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: Paragraph 4.8.12: Committee very much welcomes the statement that the canal represents a multifunctional resource as a multi-user route and a community heritage asset that provides many opportunities for tourism, leisure and nature conservation, and asks that it is more strongly linked with regeneration.

Council Response: 0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: Paragraph 4.8.12: Committee very much welcomes the statement that the canal represents a multifunctional resource as a multi-user route and a community heritage asset that provides many opportunities for tourism, leisure and nature conservation, and asks that it is more strongly linked with regeneration.

*Question Representation Texts*

**Question: Council Response**

Representation Texts: These comments are noted. Policy TD1 does not seek to be restrictive. Therefore Council proposes to amend Policy TD1 criterion 2. See Focused Changes for details.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: Policy TD3 - Support given to sensitive development of the Montgomery Canal as a local and tourism resource is timely and important. However, such development should not be at the expense of protection and sensitive development of other valuable resources such as Glyndwr's Way, Prince Llewellyn Ride, the Kerry Ridgeway, NCN Routes 81 & 8 & 825, the Severn Way and the Severn itself. There is considerable scope to promote sustainable, all year tourism and day visitors and a policy is required to support these assets.

Policy: TD3

Issue: 2015: Deposit Draft-07.Employment, Retail and Tourism

*Question* *Representation Texts*

**Question: Council Response**

Representation Texts: This Representation is noted. The Council agrees to amend paragraph 4.8.14 to provide additional clarity. See Focused Changes for details.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: Montgomeryshire Wildlife Trust supports restoration of the Montgomery Canal which is appropriate to the sites' high wildlife value designation - Special Area of Conservation (SAC). PCC highlights the designation of the SAC in paragraph 4.8.11, but it would be helpful to also emphasize the sympathetic restoration and use of the canal as a high value tourist destination. The economic value of day visitors has been shown (analysis by Liverpool University) to have a higher value than any equivalent (to SAC) navigation access.

Council Response: 0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: Suggest that this section includes a statement indicating the local economic value of the canal is in its value as a "High value environment" (due to SAC-standard ecological status) with a unique ecology and excellent access.

*Question Representation Texts*

**Question: Council Response**

Representation Texts: This Representation is noted. The Council agrees to make amendments to recognise other tourism assets within the County. See Focused Changes for details.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: CPRW welcomes the weight given to sensitive development of the Montgomery Canal as a local and tourism resource. However, there are many other important resources with great potential for becoming the sustainable tourism heart of Wales (e.g. the National and Regional Trails and Rides). This dovetails with the Montgomery canal as a walking and cycling route linking towns with public transport access. A spotlight on one resource must not exclude encouragement of other through the planning system.

*Question* *Representation Texts*

**Question: Council Response**

Representation Texts: This Representation is noted. The Council agrees to amend the text to balance the inclusion of the Montgomery Canal with a broader range of tourism activities as identified in the Tourism Topic Paper. See Focused Changes for details.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: Policy TD 3 refers solely to the Montgomery Canal. Whilst we do not object to some support being voiced for work relating to the canal, we consider that it is disproportionate to identify this as warranting a specific policy statement. We see no reason why this, as with other important tourism assets such as the National Trails within Powys, cannot fall under the general provisions of TD1 and TD2.

Council Response: 0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: Remove Policy TD3, and include Montgomery Canal within general provisions of TD1 and TD2.

*Question Representation Texts*

**Question: Council Response**

Representation Texts: "1. The Council considers that the Waste Topic Paper that supports the LDP sufficiently explains the long term framework for waste management in Wales contained in amongst others TAN 21, Towards Zero Waste and also in relation to the Collections, Infrastructure and market Sector Plan (CIM Plan). 2. Paragraph 4.9.3 in the supporting text to Policy W1 gives regard to the unforeseen need for additional landfill capacity within Powys and the Council considers that any proposal would be considered against policies in the development management section of the LDP and the principles detailed in TAN 21: Waste.3. The Council considers that the need for Waste Planning Assessments to be submitted with waste proposals is dealt with in TAN 21 and that there is no need for it to be repeated in the LDP. FC: 4. A new criteria based policy relating to waste development is not considered necessary. However, Policy W1 is proposed to be amended as a focused change to take account of biodegradable waste. "

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: Waste

TAN 21 sets out the Welsh Government's planning policies in relation to waste. Towards Zero Waste and the Collections, Infrastructure and Markets Sector Plan (CIM Plan) set out the long term framework for waste management in Wales. In order to reflect national policy and ensure it is clear to all plan users how this framework has informed the LDP, the plan should refer to the CIM Plan and explain how waste management facilities and strategies will be developed in accordance with the CIM Plan and in time the findings of the Waste Planning Monitoring Report.

Policy W1 should be amended to include a reference to landfill waste facilities. As drafted W1 says only in building/bulking stations, HWRC and exemption sites for inert waste will be permitted. The supporting text refers to where additional landfill capacity would be found and how unforeseen landfill need would be addressed. The plan should also identify the need for Waste Planning Assessments to be submitted with waste proposals to enable an assessment of the application and explain how a proposal will contribute to meeting the requirements set out in the CIM Plan.

The evidence identifies the potential requirement for HWRC and sites for inert waste over the plan period. The authority should consider the inclusion of a criteria based policy for the identification of new waste sites.

Question Representation Texts

**Question: Council Response**

Representation Texts: The Council accepts the suggested alternative wording to Paragraph 4.9.2 of the LDP which explains more accurately the position relating the waste sites located within Ceredigion at Aberystwyth as a shared waste facility site with Powys.

Council Response:

0

**Question: 3d. (i) Representation Details**

Representation Texts: Having considered the Powys Deposit LDP strategy and policies, Ceredigion County Council do not believe there is any specific policies or issues we need to comment on or object to other than the waste matters outlined below.

Deposit LDP: waste policy section:  
Para 4.9.2

This paragraph refers to the capacity of the site at Glanyrafon, Aberystwyth (E0301) to accept waste for the consortium which cannot be reused, recycled or recovered. This gives the false impression that the allocated site in Aberystwyth will serve as a waste disposal site, or even a landfill site to serve Ceredigion and Powys, which is not the case. It is not suitable for use as a landfill facility and is not allocated as a disposal facility. It is wrong therefore to describe it in terms of capacity to accept waste for the consortium that cannot be re-used, recycled or recovered as that then only leaves waste that has to be disposed of.

The Glanyrafon site is available to serve any potential need arising across Powys and Ceredigion for a regional facility to treat residual waste, or recover energy from waste, where the latter would have to be a high energy efficiency facility meeting the R1 standard for a Recovery operation, not a disposal facility.

Although the Bryn Posteg site is the only operational landfill site within the Central Wales Partnership area, Ceredigion's is no longer reliant upon it to receive its residual waste, as Ceredigion CC and Pembrokeshire CC recently agreed a deal to process residual waste into refuse derived fuel (RDF) for export to Sweden, with the first shipment due in June 2015.

The following alternative wording is suggested for Para 4.9.2:

'Powys County Council has worked in partnership with Ceredigion County Council as the Central Wales Waste Partnership (CWWP) to explore opportunities for the long term treatment of residual waste. The land requirement for residual waste treatment in the region will be dictated by the outcome of any procurement of the treatment services. Should this lead to the need for a treatment facility in the region, the allocated site in Aberystwyth (Glanyrafon Industrial Estate Extension E0301) is available and may be suitable for this purpose. In the shorter term the remaining landfill void at Bryn Posteg (Llanidloes) could provide sufficient landfill capacity to accommodate Powys' waste which cannot be reused, recycled or composted'.

Question	Representation Texts
<b>Question:</b>	<b>Council Response</b>
Representation Texts:	FC: The Council agrees with the suggested replacement in paragraph 4.9.8 of the words 'secondary aggregates' with 'recycled aggregates'
Council Response:	0

**Question: 3d. (i) Representation Details**

Representation Texts: Para 4.9.8  
Replace 'Secondary' aggregates with 'Recycled' aggregates.

Reason:

Secondary aggregates are usually defined as (a) aggregates obtained as a by-product of other quarrying and mining operations, such as china clay waste, slate waste and colliery spoil (minestone), or (b) aggregates obtained as a by-product of other industrial processes, such as blast furnace/steel slag, coal-fired power.

Recycled aggregates are those derived from reprocessing materials previously used in construction, e.g. crushed concrete or masonry from construction and demolition waste

material.

Additional Clarification:

Accordingly it follows that the line Construction, excavation and demolition waste can often be re-used as secondary aggregates is incorrect. Rather, these can often be re-used as recycled aggregate. The term 'secondary aggregates' (as I understand it) should only be applied to by-products of other quarrying and mining operations.

Question Representation Texts

**Question: Council Response**

Representation Texts: This Representation is noted. The Council considers that the Waste Topic Paper that supports the LDP makes sufficient reference to the Regional Waste Plans; TAN 21 and CIMSP and therefore there is no need for the LDP to repeat the contents of the Waste Topic Paper with the latest national policy and guidance which will be updated prior to the LDP Examination in Public.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: Regard to National Policy

References to the Regional Waste Plan and Regional Plans are necessary as it is not clear from the document how national policy has been taken into account. The CIMSP is not mentioned at all. It would appear that the document needs updating in light of changes to national policy.

This Representation also links to Refpoint 34.3 Paragraph 2.3.8 and LDP Context

Council Response: 0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: Update to reflect National Policy and include reference to CIMSP

*Question*                      *Representation Texts*

**Question:                      Council Response**

Representation Texts:     The Council agrees that Policy W1 should be amended to:1. Delete the word 'Exempt' from Point 3 of Policy W1 as it is considered that the term 'exempt sites' does not relate to planning policy as it relates to sites that don't require a waste management license.2. The Council agrees that the term 'exempt' sites be deleted and all of paragraph 4.9.7 which makes reference to these sites be deleted as the term is not relevant in relation to planning. 3. The Council agrees that Policy W1 should relate to sites for the treatment of biodegradable waste such as anaerobic digestion facilities. 4. 4. The Council will update the Waste Topic Paper which supports the LDP to include reference to the latest national policy and the CIMSP.See Focused Changes for deta.

Council Response: 0

**Question: 3d. (i)                      Representation Details**

Representation Texts:     Policy W1 clarifies that in-built waste facilities will be allowed on high quality, mixed use and local sites, other waste/employment/B2 sites or small extensions of them and sites of up to 0.5ha

The intention of this policy would appear to be to direct waste facilities away from prestige sites; however, point (ii) would allow waste sites on any employment site. Why the restriction to in-built facilities? This could be an issue for sites such as Bryn Posteg.

What is the definition of a household waste and recycling facility? These will be allowed in, or adjoining towns and large villages. Will this include privately run facilities? No other specification.

Point 3 makes reference to the Regional Plans. The focus of regional working at present is on monitoring the management of residual waste. Whilst other waste types may be addressed these aren't going to be as informative as the Regional Waste Plans with respect to need. Why exemption sites for inert waste? Where will they be allowed? There is no spatial element to this last point.

What about open windrow composting, anaerobic digestion, landfill?

*Question Representation Texts*

**Question: Council Response**

Representation Texts: FC: The Council agrees that other sites in addition to active mineral sites could be suitable for the storage of inert waste and therefore it is proposed to amend para. 4.9.8 to provide clarity.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: Storage and recycling of inert waste in active quarries – to be considered under policy M1. What about sites which are outside quarries? Just because a site has been used as a quarry doesn't mean that it is suitable for a waste management use. Minerals can only be worked where it occurs and it may be located away from the markets, whereas waste management is more flexible.

Issue: 2015: Deposit Draft-08.Minerals, Waste and Renewable Energy

*Question Representation Texts*

**Question: 3d. (i) Representation Details**

Representation Texts: The Community Council broadly supports small scale renewable energy projects for businesses and communities that are in scale and proportion to need and do not adversely impact on the lives and amenity of others. Local solar, hydro and biomass projects are sustainable and directly benefit communities using the energy produced in situ and having no need for intrusive transmission infrastructure.

We find the term 'all proposals must be incidental to existing visual and sensory landscapes' to be highly unsatisfactory as having no meaning here. A clear and enforceable term is required. If the meaning is 'unobtrusive' then this should be made clear.

The absence of measures to permanently minimise energy consumption through thermal efficiency measures is highly surprising. This is an urgent requirement that would also create genuine local employment opportunity.

(4.10.5) The potential over development of commercial scale on-shore wind in North Powys is a major issue for our community being a significant threat to exceptional landscapes and our local economy. A survey of residents of Abermule and Llandyssil by the Community Council (June 2013) indicated that over 97% of respondents were opposed to any further on shore wind development in Montgomeryshire. As their representatives, the Council are extremely concerned that the DDLDP uses the terminology of 'acceptable' development but completely fails to address how and by whom acceptability is judged or define criteria for 'acceptability' and how the requirement for localism will be addressed. Existing windfarms in rural Wales show that few, if any, local jobs result; community benefits are not an economic driver and tourism is very likely to be adversely impacted in North Powys. As TAN8 designation of SSAs did not take into account most material planning considerations it cannot be relied upon in the determination of windfarm applications and is well outdated. It completely is unsatisfactory to rely on an oblique reference to the CPI as policy in this important and controversial area. The criteria by which our superb landscapes, biodiversity, socio-economic base and residential amenity will be protected should be clearly specified and transparent.

There is no reference made in the Wales Spatial Plan, with which the LDP must conform, of designated windfarm areas or a concentration approach to windfarm development so these cannot be relied upon (fails soundness test C3).

We note the removal of the size restriction on solar farms with concern as this provided a reasonable parameter within which to work and minimising potential large scale detrimental impact on the landscape. 'Brown field sites' such as car parks and the use of roof mounted panels is greatly to be preferred to green field sites with landscape and agricultural impacts.

A key omission is a specified 'buffer zone' between dwellings and wind turbines to protect residential amenity. Most European countries implement a 2km buffer zone and evidence of the harm to health and well being from the proximity of windfarms is now well documented. Residents of Powys must be afforded proper protection and a minimum of 1.5km separation specified for all but domestic scale turbines.

Extensive turbine and infrastructure industrialisation is irreconcilable with the defined policies for landscape, key tourism assets and the development of high value, year round tourism. The impact of seven to ten years of construction on the unsuitable roads of north Powys will similarly impact severely on the lives and livelihoods of residents and the perceptions and choices of visitors.

The DDLDP has failed to address this critical issue for North Powys despite the considerable number of turbines already in the landscape; no further Grid capacity; the potential for adverse impacts; community views; that Powys is meeting renewable energy generating targets, and the unanimous resolution of the elected Members that TAN8 is no longer fit for purpose.

This section of the DDLDP is woefully inadequate for dealing appropriately with on-shore windfarms and associated infrastructure development.

**1084 Welsh Government**

Rep'n/Para/Policy AccessnNo DateLodgd Late? Status Modified Summary

1084.V9//RE1 16/07/2015  Summary: Policy RE1 - Renewable Energy

Source: Email Type: Objection Mode Written Status Maintained

Document:Draft Deposit Written Statement 2015, p.69

Policy: RE1 Issue: 2015: Deposit Draft-08.Minerals, Waste and Renewable Energy

Question Representation Texts

**Question: 3d. (i) Representation Details**

Representation Texts: Renewable Energy

The presence of a target for renewable energy generation is welcomed (objective 5). The LDP does not give details as to how the planning system will contribute to the achievement of this target.

Policy RE1

Policy RE1 is confusing in nature and should be amended. The authority need to identify the different scales of renewable energy (outlined in PPW) and write appropriate policies accordingly, as others have done across Wales. Policy RE1 attempts to follow this approach but as drafted is unclear. A Renewable Energy Assessment has been undertaken, however the Deposit Plan fails to take the opportunity to take into account the contribution the area can make towards developing and facilitating renewable and low carbon energy and plan positively for appropriate development. Further consideration needs to be given to how to translate the evidence base into a set of policies which guide appropriate development. For example, can the co-location of developments optimise opportunities for renewable energy? The energy assessment could also be used to form a policy (separate to DM2 (14)) to translate the relevant content of the energy assessment to the plan. The energy assessment could make it clear what is expected and to what scale/ type of development the policies apply.

At the large-scale, 25MW or more, the policy should make reference to the SSAs in TAN 8 and how the authority is dealing with them. It is noted that the authority is not refining the TAN 8 SSAs, and the authority's approach to and reasoning for not refining them should be included in the plan. The LDP should not simply make reference to the outcome of the Mid-Wales conjoined windfarm inquiry. At the very least the authority's position at that Inquiry should be included in the plan. Larger scale developments may have their own criteria which the authority needs to give consideration to and outline and not just defer to national policy.

The reference to LANDMAP and 'incidental' to landscape characteristics is confusing and needs further explanation.

Similarly it is not clear what is meant by "All proposals must demonstrate efficiency, effectiveness and economy to minimise individual or cumulative adverse impacts, in particular where located in the open countryside...."? Potentially a draft SPG could outline how these criteria will be applied. Alternatively, they could be redrafted to be made clearer. Smaller developments will have their own localised issues for which the authority should ideally develop separate criteria-based policies. Or if it is considered they are the same as the larger-scale developments, one appropriately and clearly worded policy.

Policy: RE1

Issue: 2015: Deposit Draft-08.Minerals, Waste and Renewable Energy

Question Representation Texts

**Question: 3d. (i) Representation Details**

Representation Texts: The Cambrian Mountains Society (CMS) thanks Powys CC for this opportunity to comment on the Deposit LDP. The Society's comments are general in nature and as such fall under reference point @34.1 but throughout the representation links will be made to other parts of the documentation. The Society's major concern with the LDP is that it does not follow local, national or international ideas on sustaining and enhancing areas of high value landscapes. Many of the points the Society address here were presented in its 2014 Deposit Stage Representation but these have evolved over the last year.

.....

Ceredigion CC also adopted an SPG covering Renewable Energy in January 2015. This considers impacts of energy projects on landscape and notably it indicates that the special qualities of specific landscapes such as its SLAs will be material considerations when considering wind turbine proposals.' As regards to Powys' policy RE1 concerning renewable energy,@34.91, CMS would ask that Powys, like Ceredigion, puts in place an SPG which considers the impact of all renewable energy schemes, be they large or small scale, wind, solar or hydro in areas of high landscape value. Obviously here CMS is especially concerned about the large scale industrialisation of the Cambrian Mountains but the Society also recommends that the Authority consults the Position Statement produced by the Campaign for Rural Wales (CPRW),-'Single and small groups of wind turbines' (April 2014). This document may be of great help when devising both SLA and Renewable Energy SPGs to support the LDP. We attach a copy of this Position Statement as an appendix to this representation.

.....

In conclusion CMS's preferred option for the Cambrians continues to be AONB designation, but it sees the setting-up of a network of SLAs across all three counties covering the Cambrian Mountains as a very positive move in safeguarding this unique landscape at the heart of Wales.

Council Response:

0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: Reviewing all the recommendations made in the above representation, in order to help the Powys LDP sit more comfortably with a Wales-wide approach. Notably taking into account the following organisation' work in maintaining and enhancing areas of high landscape value.

WG guidance,  
NRW advice,  
Neighbouring counties' provision of SLAs together with their linked SPGs.

**4640 Powys Ramblers**

Rep'n/Para/Policy AccessnNo DateLodgd Late? Status Modified Summary

4640.V3//RE1 14/07/2015  Summary: Policy RE1 - Renewable Energy changes to wording of policy

Source: Website registration Type: Objection Mode Written Status Maintained

Document:Draft Deposit Written Statement 2015, p.69

Policy: RE1

Issue: 2015: Deposit Draft-08.Minerals, Waste and Renewable Energy

*Question Representation Texts*

**Question: 3d. (i) Representation Details**

Representation Texts: 1. Powys Ramblers question the meaning of 'will be supported'. Does it mean that the applicant will be assisted or that permission will be granted subject to the criteria?  
 2.The word 'incidental' in Policy RE1 criterion 1 is completely meaningless and open to widely varying interpretation.  
 3. Schemes ove 5MW should be confined to TAN8 Stategic Search Areas (SSAs) in order to protect landscapes and accord with the intentions of paragraph 4.2.16.  
 4.Large single wind turbines are being pepper-potted across the county, in conflict with the intention of TAN8 to concentrate large turbines in SSAs. Is there no limit to their number? We regret deletion of the intention of the earlier draft to to restrict schemes up to 5MW to those serving or in reasonable proportion to the holding or planning unit on which they would be sited.  
 5. Paragraph 4.10.5 prejudices the Inspector's report on the conjoined wind farm inqjiry. SSAs should be refined in the light of the report and decisions by the SoS. This is all the more important in the light of the Planning (Wales) Act in relation to energy developments, along with proposed UK legislation. The TAN8 SSAs were refined some time ago by Powys CC, and that review should either be incorporated in the LDP or published in planning guidance.

Council Response:

0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: In criterion 1, replace 'must be incidental to' with 'must respect' or 'must not unacceptably harm'.  
 The meaning of 'will be supported' in the first part of RE1 should be clarified in the supporting text.  
 Make it clear that schemes ovr 5MW should be confined to TAN8 SSAs.  
 Add new text to criterion 2(ii). In referring to 'numbers and massing', regard should be had to proximity to public rights of way, especially national and regional trails to which Policy DM1 7(ii)c applies, as well as cumulative impact across wider landscapes.  
 On large single turbines, RE1 should state that developments should not be sited close to public rights of way. Nor should they be sited near towns, villages or dwellings unless the local community benefits from and/or supports the development.  
 Reinstate the wording of the earlier draft aimed at restricting large single wind turbines to the needs of the holding or planning unit on which they wold be sited.  
 The LDP should incorporate refinement of the TAN8 SSAs, or say that such refinement will be published in separate planning guidance.

Issue: 2015: Deposit Draft-08.Minerals, Waste and Renewable Energy

*Question Representation Texts*

**Question: 3d. (i) Representation Details**

Representation Texts: 34.91 Policy RE1 - Renewable Energy  
 We welcome the clarification that all development proposals between 5 MW and 50MW will be determined against national planning policy. However as the Plan should be read as a whole when determining applications, this approach should also be followed for development proposals below 5MW. We note that the policy has been amended accordingly to clarify that all proposals will be determined in accordance with the LDP and National Planning Policy.

As one of the main issues associated with renewable energy developments can be the cumulative impact of developments on landscape and visual amenity, we recommend that additional text resisting developments where there are significant cumulative impacts on the landscape character and amenity of users of the area is added to the policy and its supporting text. This would comply with the guidance set out in TAN8 Planning for Renewable Energy and meet Tests of Soundness C2 and CE1.

Council Response: 0

5201.V2//RE1 20/07/2015  Summary: Policy RE1 - Renewable Energy - amend the wording of the policy to prevent adverse ecological impacts

Source: Website registration Type: Objection Mode Written Status Maintained

Document:Draft Deposit Written Statement 2015, p.69

Policy: RE1

Issue: 2015: Deposit Draft-08.Minerals, Waste and Renewable Energy

Question Representation Texts

**Question: 3d. (i) Representation Details**

Representation Texts: 1. We do not understand the use of the term "incidental" in this sentence.

Policy RE1 makes no mention of avoiding adverse ecological impacts. The Wildlife Trusts believe that climate change is almost certainly the most significant challenge facing nature conservation today, with the potential to have significant impacts on the future of UK and global biodiversity. We consider renewable energy to be necessary to meet the energy requirements of the UK in a sustainable manner, but these benefits cannot mitigate or compensate for any impacts on wildlife or on wildlife sites that are associated with renewable energy developments.

Council Response: 0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: Paragraph 1. should be made clearer

Policy RE1 must include a commitment to prevent adverse ecological impacts, individually and culmulatively, as well as demonstrating efficiency, effectiveness and economy.

Policy: RE1

Issue: 2015: Deposit Draft-08.Minerals, Waste and Renewable Energy

Question Representation Texts

**Question: 3d. (i) Representation Details**

Representation Texts: The new policy RE1 has moved a long way away from the contentious wording of the July 2014 version, but still remains, along with its supporting text, well short of a proper criteria- based policy approach to the determination of applications.

From a strategic point of view, the County Council has taken the view that all that it is required to do is to ensure that the electricity consumption of the whole of the County is equalled by the generation of electricity from renewable sources. This is a naive approach as, this is not the strategic approach to renewable energy that the Welsh Government has adopted since TAN8 in 2005. That approach involved the identification of seven strategic search areas – not where each Council was expected to meet its own needs for renewables, but on the basis of the best sites across Wales to meet the Welsh Government’s targets and aspirations for the coming years.

It is clearly understood that Powys CC did not willingly accept two of the SSAs in their Area as well as part of a third, and that as long ago as their UDP preparation in the period after 2005 they indicated that they would be lobbying WG to reduce the extent of the commitments that Powys was being expected to make. The result of their new “Objective-led approach” in the LDP is that they do not accept the figures set out in TAN8 and hence the whole basis of Welsh energy policy that has been in place for 10 years.

The starting point for a determination ought to be any policy which is specific to the development for which consent is being sought. However, in this case, the place where one would expect to find advice is RE1 and what that does not do is to provide a simple criteria-based approach to making decisions. Parts of it are simply incomprehensible as a statement of anything. For example, to be able to meet the policy, all proposals must be incidental to existing visual and sensory landscape characteristics as defined in Landmap. The term “incidental” means something happening by chance in connection with something else, of secondary or minor importance, or arising as a minor consequence of something else.

Planning law and policy has frequently used the word “incidental” to relate to something which is not even important enough to constitute development in its own right – ranking below even “ancillary” in terms of the hierarchy of importance of effects. The idea that the erection of a wind farm could ever be judged to be incidental to the existing visual and sensory landscape characteristics is simply never going to be a tenable proposition. It completely undermines the sense of the policy, is contrary to all tenets of Government advice, and has no place at all in a policy of this type. The rest of the criteria that are provided raise issues that will need to be addressed by any wind farm although it is far from clear precisely how the Council expects to be able to judge whether a scheme demonstrates efficiency, effectiveness and economy in the context of minimising individual or cumulative adverse effects.

This drafting fails to recognise the development control tests under which wind farm developments have been assessed across Wales and indeed the rest of the UK over 25 years, since these are not tests which can properly be applied, even if the Council believed it had some means of assessing these various issues. Another criterion raises the issue of alternative sites. There is no provision in the EIA Regulations or anywhere in national advice that a wind farm might be expected to show how alternative sites could be utilised to provide the same or a better result.

Measures to mitigate adverse effects on receptors assume that all adverse effects are capable of being mitigated. The recent Garreg Lwyd decision shows that WG recognises that there are bound to be residual affect which cannot be mitigated and that these are going to have to be accepted throughout the SSAs if the WG aspirations set out in national policy are to be realised.

Rep'n/Para/Policy AccessnNo DateLodgd Late? Status Modified Summary

5938.V2//RE1 17/07/2015  Summary: Does not support Policy RE1

Source: Email Type: Objection Mode Written Status Maintained

---

The reality is that Powys do not mention the figures that are set out in TAN8; they do not appear to contemplate the possibility that whatever they may say in their LDP about being self-sufficient in renewable energy, that approach is entirely in conflict with the WG approach and would lead to a serious weakening of that approach across Wales, with other Councils expected to make up the massive shortfall which would arise.

Finally, there is nothing anywhere within the text supporting RE1 or the policy itself to recognise that there is a balance to be struck in reconciling the inevitable residual effects which will arise from a wind farm and the wider benefits – many of which will arise outside Powys or indeed outside Wales or even the UK. Climate Change is not a parochial exercise for one Council to ring-fence itself and say that all that they are required to do is to provide their own levels of consumption.

To determine Policy RE1, instead of a sensible coherent policy approach to criteria, there is a referral back to all other policies in the plan. DM1 and DM2 are obviously the key policies in this respect, but they apply to all developments. Not only that, but there are inherent tensions even between these two policies, which are identified on separate representation forms.

Council Response: 0

---

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: We believe that there is a need to allow for provision of suitable sites both inside and outside TAN 8 areas, which can make a valuable contribution to WG targets.

We would request a requirement for a criteria based policy against which to assess a wind farm proposal together with DM1 and DM2 which appear to conflict.

Council Response: 0

Source: Email

Type: Objection

Mode Written

Status Maintained

Document:Draft Deposit Written Statement 2015, p.69

Policy: RE1

Issue: 2015: Deposit Draft-08.Minerals, Waste and Renewable Energy

*Question Representation Texts*

**Question: 3d. (i) Representation Details**

Representation Texts: Policy RE1 is unenforceable in its current form, being unclear, unworkable and incomplete.

1.Policy RE1 'Proposals to generate energy ... will be supported for up to 5MW...' This statement does not add meaning but is likely to be perceived by planning officers as encouraging approval even where significant impacts are identified, and as lessening the requirement to have regard to the protections offered elsewhere in the DDLDP. We propose replacement of paragraphs 1 and 2 with:

'Proposals to generate energy from renewable and low carbon sources and associated infrastructure will be determined in accordance with renewable energy policies below, with all other relevant LDP policies and with relevant national policy and guidance'.

To suggest predisposition towards approval is contrary to national policy, and to the requirement for appropriate safeguards to minimise environmental and social impacts (PPW7 12.8.6). It is in conflict with TAN8 policy towards cumulative impacts in Annex D 8.4 and Para 2.13, quoted below.

2.Policy RE1 Criterion 1: 'All proposals must be incidental to existing visual and sensory landscape characteristics (as defined by LANDMAP)'

The term 'incidental' is undefined and therefore this criterion is meaningless and unenforceable.

LANDMAP, as a planning tool, is also dependent on five aspect layers being considered together to assess impact on landscape character and reference to one layer (visual and sensory) only is contrary to LANDMAP guidance. It is also contrary to TAN8 Appendix D Para 4.5 guidance:

'For each existing LANDMAP aspect or character area the criteria of the influence and presence of other conservation interests such [as] special cultural associations, perceptual landscape characteristics such as tranquillity, wildness, sense of remoteness, scenic beauty and the existence of a consensus about importance, either nationally or locally should be applied. These judgements should be kept separate from the more objective criteria of landscape and visual sensitivity (considered below) to present a more transparent assessment.'

Moreover cumulative issues are not addressed as required by TAN8 and PPW7 12.9.3. While CPRW have grave concerns about the legitimacy and current validity of TAN8, as set out below, the authors of the DDLDP need to have regard to the provisions below which form a part of the current regulatory framework. Cumulative impacts of renewable development, not addressed in RE1, are increasingly an issue in Powys; LDP policies must reflect TAN8 Appendix D Para 8.4:

'In the rest of Wales outside the SSAs, the implicit objective is to maintain the landscape character i.e. no significant change in landscape character from wind turbine development'

and Para 2.13

'there is a case for avoiding a situation where wind turbines are spread across the whole of a county.'

6235.V22//RE1 20/07/2015  Summary: Policy RE1 - Renewable Energy

Source: Email

Type: Objection

Mode Written

Status Maintained

The inclusion of cumulative impacts with proposed development is required by LANDMAP Guidance Note 3 and is essential in view of the fact there are likely to be a significant number of similar proposals within the planning system concurrently. Exclusion of proposed developments may result in unacceptable cumulative impacts. The Planning Inspector at the conjoined inquiry ruled in favour of the inclusion of developments in planning in cumulative assessment, as had been requested by Powys.

Powys County Council currently lacks any transparent evidence base to assist in identification of cumulative impacts and urgently needs to prepare and make public a map of all renewable installations which are in planning, consented and operating, including details of scale/design etc., in order to be able to begin to assess cumulative impacts, and also to ensure compliance with PPW7 Para 12.9.3.

In light of these shortcomings in RE1 Criterion 1 as drafted, CPRW would recommend this criterion should be reworded along the lines (adapted from the UDP):

'Proposals should take account of the high quality of the landscape throughout Powys and be appropriate and sensitive to the character of surrounding landscape (as defined by LANDMAP). Proposals will not be supported which bring about significant change to the environmental and landscape quality of Powys, either on an individual basis or in combination with other proposed, consented or existing similar developments. Where the cumulative impact of proposals in combination with other proposed, consented or existing similar developments would be significantly detrimental to overall environmental quality they will be refused. Consideration of impacts of a proposal must include consideration of access routes and associated infrastructure. Proposals will also have regard to impacts on adjoining designated landscapes.'

3.Policy RE1 Criterion 2: This criterion is confused and inadequate to provide the protections envisaged, even in conjunction with provisions of policies DM1 and DM2:

•'efficiency, effectiveness and economy' do not minimise adverse impacts of development, and are not likely to be capable of assessment by planning officers or their consultees. Is it intended that developments should 'be designed to be efficient', or 'be designed to minimise...'?

•RE1 2(i) is too vaguely worded to be enforceable. What qualifies as 'carefully sited'? What is 'prevailing landscape'? Receptors are undefined. A more comprehensive list of considerations would read something like: '...climactic features, landscape character, topography, skyscapes and skylines, views including views from settlements, from publicly accessible land, roads and rights of way, and designated landscapes, heritage, safety, transport and access, vegetation, wildlife and wildlife habitats, protected sites, trees and hedgerows, soils, proximity to other man-made structures, proximity to neighbours and visual amenity, noise, visual impact and unpleasant and polluting emissions, geological and hydrological implications including waterways and groundwaters, human and animal drinking water supplies...'

Inclusion of such a long and disparate list cannot be an effective way to write policy.

•RE 1 2(ii) also too vaguely worded to be enforceable. What qualifies as 'appropriate design'? More clarity is required. Design should encompass: '... design in terms of numbers of units, size, form and spatial distribution, materials, colour, emissions, lighting and any other features'

•RE2(iii) attempts 2 roles which should be dealt with separately:

1.mitigation of 'adverse impacts on receptors' ('receptors' needs definition) requires to be clarified,

2.as do provisions re maintenance and decommissioning. We would suggest wording along the lines: 'guarantee appropriate maintenance throughout the lifetime of the project and final decommissioning wherever possible'.

Clarity is essential for policy to be effective. Comments re RE1 Criterion2 above highlight the difficulties which arise when a very compressed policy is required to cover too many different issues, which really need to be spelled out separately and clearly.

Rep'n/Para/Policy AccessnNo DateLodgd Late? Status Modified Summary

6235.V22//RE1 20/07/2015  Summary: Policy RE1 - Renewable Energy

Source: Email

Type: Objection

Mode Written

Status Maintained

Topic Paper para 47 recognises the numerous known potential environmental, social and economic impacts of existing renewable developments while SEA 6.4.10 recognises that impacts of recent technologies are imperfectly understood/difficult to predict. Policies DM1 and DM2 are generic policies applicable to most typical developments but insufficient to provide protection where developments consist of the imposition of imperfectly understood and sometimes relatively untested technologies, sometimes on an industrial scale, often in open countryside and in proximity to rural housing. Policies DM1 and DM2 cannot address technology specific issues such as separation distances, decommissioning issues, considerations regarding community schemes, diversification, sustainability of fuel sources, to give just a few examples. PPW7 7.5.1 is supportive of criteria based policies and the LDP must contain policies along the lines of UDP Policies E1 – E7 to recognise and protect against the known and likely impacts particular to renewable energy development and satisfy national policy requirements. CPRW believe effective policy needs to follow the form of the UDP in considering different technologies separately in order to properly address their very different potential impacts and issues (see below).

If necessary, an additional policy for as yet unknown technologies could be based on a better drafted version of RE1, which would fill the gap until supplementary planning guidance could be drafted to meet the particular need.

4. Individual Technologies: As set out above CPRW believe that the LDP must contain specific policies relating to individual technologies.

Wind Energy: In particular, CPRW believe that with regard to wind energy it is essential that the explicit protections afforded by the policies in the UDP are carried forward to the LDP, as regards impacts of turbine developments (either singly or in cumulation with proposed, approved and existing developments) on:

- landscape and visual impacts (as CPRW RE1 Criterion 1 redraft above),
- amenity and sensitive properties,
- wildlife habitats and species,
- heritage,
- safe use and enjoyment of highways and rights of way,
- means of access,
- and regarding appropriate mitigation of adverse impacts.

We believe also that well documented research and experience of turbine development within Powys demonstrates that these protections should be strengthened by inclusion of requirements for:

- assessment of impacts on safety and amenity of all sensitive receptors,
- the local economy, particularly tourism
- assessment of impacts on local water courses and private water supplies,
- assessment of impact on carbon stores in peat and dark soils (including disturbance for access tracks and borrow pits),

- addition of safe use and enjoyment of bridleways and other equestrian routes specifically, given the sensitivity and vulnerability of the users,
- a suitable minimum separation distance to be required between turbines and housing (see below),
- legal obligations with decommissioning bonds for eventual removal of the turbines and reinstatement of landscapes at the landowner's expense - at present the removal of redundant turbines is not dealt with within the LDP,
- small wind development proposed as 'farm diversification' to be aligned with or in reasonable proportion to the energy needs of the farm and in scale with their surroundings, or, if these conditions are not met, treated as any other industrial development in the open countryside,
- assessment of impacts of access routes, grid connection (if relevant) and other associated infrastructure to be an integral part of assessment of a wind energy development,
- applications to be accompanied by reports on impacts prepared in accordance with established good practice guidelines, including a ZTV map, and cumulative ZTV map showing all proposed, consented and existing turbines, for a radius (not less than 5km) reflecting the visibility of the turbine given location and size.
- community-led energy projects to receive majority support from the community members living within 1.5km and be:
  - i. 100% owned and operated by a local community organization, or
  - ii. a fully constituted community cooperative regulated by the Financial Services Authority.

Noise impacts and separation distance - Policy RE1 Criterion 2.i. Protection of Amenity:

The words 'having regard to...proximity to and potential impact on receptors' offer nothing to residents faced with living near to wind turbines, without realistic protection from a specified buffer/separation zone from turbines. Throughout Europe this is generally 2kms for windfarms and residents of Powys are entitled to no lesser protection than a minimum of 1.5km. It may be appropriate to reduce this distance in the case of smaller single turbines but this should be no less than 800m as was deemed sound for Allerdale Council in July 2014. However, Powys County Council's experience of serious, as yet uninvestigated, noise problems at distances of nearly 1km from existing small turbines suggest a larger distance, such as 1km, would be a more suitable minimum separation distance for single wind turbines. The hilly topography of most of Powys, outside the BBNPA, is such as to encourage sound propagation and is also conducive to the occurrence of temperature inversions in valleys which can further amplify noise. The imposition of minimum separation distances would accord with the advice of the World Health Organisation, and with recent research such as that of the Irish Doctors' Environmental Association, and would also be consistent with SEA Objective 6 'to prevent or minimise exposure to potential sources of nuisance and risk to human health'.

There is increasing evidence from existing windfarms that such protection is essential. Recent research for the Scottish Government that indicates that planning applications frequently underestimate the noise and visual impacts on residents and that over half the operational windfarms in Scotland are noisier than estimated pre-construction. In recent years Powys have had considerable evidence of noise impacts of wind turbines, and this evidence is reinforced by the findings of the Welsh Government Cross Party Environment and Sustainability Committee report on noise from windfarms (2012). It is clear that the current policy, which it is proposed to continue (Topic Paper para 10), of deciding distances on a case by case basis, is not working to provide adequate protections. This evidence of nuisance should be considered as baseline evidence informing LDP policies and specific safeguards should be included within the LDP to ensure that homeowners are in future suitably protected from noise nuisance.

Other technologies: As above, CPRW believe it is essential that known impacts of individual technologies are explicitly addressed in technology specific policies. Policies should make clear that assessment of impacts of access routes, grid connections and/or other associated infrastructure is integral to assessment of the proposal :

Rep'n/Para/Policy AccessNo DateLodgd Late? Status Modified Summary

6235.V22//RE1 20/07/2015  Summary: Policy RE1 - Renewable Energy

Source: Email

Type: Objection

Mode Written

Status Maintained

•in order to safeguard productive agricultural land and to minimise visual impacts, a commitment to encourage roof mounted installations and to reintroduce a limit on large-scale developments on farmland is required (as was made explicit in the original draft LDP July 2014). In a rural area preservation of all grades of agricultural land is desirable and installations should be steered towards industrial, agricultural and domestic buildings, and brownfield sites, for example car parks;

•policies required to ensure proper assessment of environmental and ecological impacts, including impacts on landscape and visual impacts (as CPRW RE1 Criterion 1 redraft above), heritage, tourism, potential impacts such as increased run-off and erosion, provision for maintenance, decommissioning and removal etc.;

•applications to be accompanied by reports on impacts prepared in accordance with established good practice guidelines.

Anaerobic Digesters (AD): policies which:

•limit the scale of rural or on-farm AD development, as large units are industrial developments unsuited to a rural area;

•require applications to demonstrate sustainable local provenance of fuels, which should not be capable of more environmentally valuable use;

•discourage units dependent on growing feedstock crops which would result in the reduction of productive agricultural land, and potential soil impoverishment and habitat degradation;

•provide adequate safeguards i.e. assessment of landscape and visual impacts (as CPRW RE1 Criterion 1 redraft above), including impacts on amenity, heritage and tourism; assessment of traffic impacts including identification of waste types and sources; protection of amenity through control of noise, odour, dust and emissions (at all stages including use of digestate on fields), assessment of potential water contamination, biosecurity issues, ecological impacts etc.;

•applications to be accompanied by reports on impacts prepared in accordance with established good practice guidelines.

Powys County Council have experience of serious and widespread amenity problems in connection with an AD installation near Talgarth, within the BBNPA, and DEFRA literature recognises incidences of pollution associated with this technology. This emphasises the need for proper assessment of impacts at application stage and appropriate controls on development.

Biomass: policies which:

•ensure protection of trees and woodlands;

•require applications to demonstrate sustainable local provenance of fuels, which should not be capable of more environmentally valuable use;

•discourage units dependent on growing fuel crops which would result in the reduction of productive agricultural land, and potential soil impoverishment and habitat degradation;

•provide adequate safeguards as above as appropriate, including landscape and visual impacts (as CPRW RE1 Criterion1 redraft above);

•applications to be accompanied by reports on impacts prepared in accordance with established good practice guidelines.

Such policies are essential to ensure the sustainability of biomass installations. Biomass generation which is dependent on imported wood pellets for fuel is not sustainable and simply depletes carbon stores elsewhere.

Rep'n/Para/Policy	AccessnNo	DateLodgd	Late?	Status	Modified	Summary
6235.V22//RE1		20/07/2015	<input type="checkbox"/>			Summary: Policy RE1 - Renewable Energy
Source: Email			Type: Objection		Mode	Written
				Status		Maintained

Hydro power:

- policies to ensure protection of the integrity of waterways and prevent environmental and ecological degradation, and a commitment to monitor the scale of water abstractions and to require flood risk assessments as necessary;
- provide adequate safeguards as above as appropriate, including landscape and visual impacts (as CPRW RE1 Criterion1 redraft above);
- applications to be accompanied by reports on impacts prepared in accordance with established good practice guidelines.

The UDP contains renewable energy policies which could be built upon to provide the necessary technology specific policies.

CPRW believes that all the further detailed policies and safeguards recommended above, in relation to wind energy and other technologies, are essential to ensure soundness of the LDP and its compliance with PPW7. It is not the intention of PPW7 that Local Planning Authorities should encourage renewable energies at the expense of other interests but that an LDP should enable well located and designed projects, the impacts of which have been properly assessed as acceptable to all interests. PPW7 12.8.6: 'The Welsh Government's aim is to secure an appropriate mix of energy provision for Wales which maximises benefits to our economy and communities, whilst minimising potential environmental and social impacts.' Inclusion of specific criteria based policies, as supported by PPW7 7.5.1 would enable this balance to be achieved.

5. Efficiencies: policy could also address:

- the encouragement of community-led renewable schemes, suitably defined as above and encouragement of local use of local renewable generation to reduce inefficiencies.
- energy savings and efficiencies, as recommended by the REA and PPW7 Objectives 12.1.4. We appreciate that some aspects of the strategic settlement strategy contribute to energy efficiency but CPRW maintains that there are many more measures that need to be within the LDP to promote sustainable reductions in energy use.
- In interests of efficiency and reduced wastage in transmission, CPRW would welcome reinstatement of the requirement contained in the previous draft that renewable developments below 5MW: 'Serve and are in reasonable proportion to the energy needs of the planning unit / holding on which it is sited'.

6. Paragraph 4.10.5 The policy of the LA needs spelling out as regards SSAs, it is obfuscatory to refer to the Mid Wales CPI. CPRW position on legitimacy of TAN8 and SSAs is set out below.

TAN 8:

It is unsound that the future of Powys be determined by the outdated provisions of TAN8 in direct conflict with LDP policies to protect Powys' assets such as landscape or historic environment from detrimental development. A concentration approach has encouraged unprecedented numbers of proposals for large windfarms whilst still allowing substantial development (up to 12MW) outside SSAs and the danger of creating windfarm landscapes across Powys. SSAs are only search areas and not predetermined windfarm sites. Few material planning considerations were taken into account in defining TAN8 and no public mandate was sought or given for this major landscape change.

Recent political announcements make patently clear that local communities are to have the 'final say' on onshore wind applications in England and Wales. We acknowledge these are recent developments but it is axiomatic that guidance now indicates how this policy will be implemented.

Mid Wales already has some 270 wind turbines and, as stated in the DDLDP, is producing in the order of 80% of the electricity used in the County and there is no further Grid capacity. This is a substantial contribution and further, ever larger, wind turbines and the necessary massive infrastructure cannot be sensitively and economically absorbed. Contribution to Powys energy needs through less intrusive community renewable energy schemes and energy use reduction should be the main thrust of a sustainable Plan.

Rep'n/Para/Policy AccessNo DateLodgd Late? Status Modified Summary

6235.V22//RE1 20/07/2015  Summary: Policy RE1 - Renewable Energy

Source: Email

Type: Objection

Mode Written

Status Maintained

Unlike other TANs, TAN8 seeks to impose a major land use change through a planning advice note. Adoption followed a consultation process that failed to engage affected communities and demonstrated overwhelming opposition to the proposals. The consultants (Arup Partners) considered full community consultations must take place and that TAN8 should be reviewed and revised within 7 years (i.e. in 2011) given the rapid development of the on-shore industry. This requirement is now self-evident:

- turbines are x3 higher and thus considerably more visible on upland plateau areas;
- the impact of noise and amplitude modulation on residents is now well recognised and documented rendering an arbitrary 500m buffer untenable;
- the implications of remote turbines and limited Grid capacity in Mid Wales were not properly taken into account.

Until TAN8 is fully reviewed and a full SEA undertaken, as required under European legislation, it cannot be considered a legitimate basis for such a major policy. Powys CC determined unanimously that further windfarm development must cease pending the overdue complete review of TAN8. SSAs are not called up by the Wales Spatial Plan that underpins all development so have questionable validity.

7.Paragraph 4.10.9 CPRW are of the view that this paragraph should be removed. As stated above the term 'incidental' in reference to landscape impacts has no meaning. This paragraph therefore adds nothing to the understanding of Powys policy in relation to renewables.

8. DDLDP Evidence: Shortcomings of AECOM REA have been set out above. CPRW have grave concern at the inclusion of an 'evidence' paper, a critique from developers. It is obviously open to all to comment on the DDLDP consultation but it is entirely unacceptable that such comments be presented as an evidence paper and given as much weight as independent reports. It is inappropriate that any body with a financial interest in influencing the LDP should produce a topic paper. Although there may be useful information from Severn Wye Energy on biomass this information should have been obtained and assessed for the Topic paper. Comments from RenewablesUK are completely at odds with the economy and rurality of the area.

Paragraph 4.10.2 Research evidence shows that rural windfarms in Wales are not delivering local economic benefits Extensive turbine and infrastructure industrialisation is irreconcilable with the DDLDP policies for landscape or tourism. The socio-economic impact of 7-10 years of construction traffic on unsuitable North Powys roads must also be seriously considered.

Paragraph 4.10.3 Energy Wales: A Low Carbon Transition 2012 removes targets and replaces these with energy aspirations so targets should no longer exist.

SUGGESTED POLICIES:

We have set out below suggested policies. These are derived from the Powys UDP, from policies enacted by other local authorities, and from documented negative impacts experienced within Powys and elsewhere.

POLICY RE1 –RENEWABLE ENERGY PROPOSALS

Applications for renewable energy proposals will be permitted provided that they meet the criteria below and additional criteria for particular individual technologies in Policies RE2 to RE8 below:

- 1.They do not unacceptably adversely affect the environmental and landscape quality of Powys. Proposals should take account of the high quality of the landscape throughout Powys and be appropriate and sensitive to the character of surrounding landscape (as defined by LANDMAP). Proposals will not be supported which bring about significant change to the environmental and landscape quality of Powys, either on an individual basis or in combination with other proposed, consented or existing similar developments, including other forms of renewable energy generation. Where the cumulative impact of proposals in combination with other proposed, consented or existing similar developments would be significantly detrimental to overall environmental quality they will be refused. Consideration of impacts of a proposal must include consideration of access routes and associated infrastructure. Proposals will also have regard to impacts on adjoining designated landscapes.
- 2.They do not, where situated in towns, significantly detract from the townscape in which they are situated.

by: Representation No

Filtered to show: (all of) Stage=V; Status=M

Rep'n/Para/Policy	AccessnNo	DateLodgd	Late?	Status	Modified	Summary
6235.V22//RE1		20/07/2015	<input type="checkbox"/>			Summary: Policy RE1 - Renewable Energy
Source: Email		Type: Objection		Mode	Written	Status Maintained

- 3.They do not unacceptably adversely affect wildlife habitats or species that are of international, national or local importance.
- 4.They do not unacceptably adversely affect the occupants or users of sensitive properties (usually dwellings) or their amenities by reason of safety, noise, vibration, reflected light, loss of visual amenity or other nuisance including dust, smell and fumes.
- 5.They do not unacceptably impact upon any buildings or features of conservation or architectural interest, or the settings of such buildings or other features.
- 6.They do not unacceptably adversely affect the safe use and enjoyment of highways and the public rights of way network, especially bridleways and other equestrian routes, and open access land (including during the construction phase). Enjoyment of public routes and open access land shall be taken to include visual amenity. Development shall not result in any permanent loss to either length or quality of existing rights of way.
- 7.They do not unacceptably impact on road, rail or aviation safety.
- 8.They do not unacceptably adversely impact upon the operation of any existing tourist project or its income stream.
- 9.They do not unacceptably adversely impact upon groundwaters, waterways and off-mains sources of water supply for humans or animals.
- 10.They would be capable of being served by an acceptable means of highway access and any new or improved roads and accesses required would not have unacceptable environmental impacts.
- 11.Impacts in paragraphs above are evidenced by reports prepared by appropriately qualified professionals in accordance with established good practice guidelines.
- 12.Applicants are able to demonstrate through land management schemes that there would be appropriate commensurate mitigation, compensation or enhancement for any adverse impact on environmental quality, wildlife habitats or heritage features.
- 13.Any ancillary structures or buildings are so sited and designed (including the use of locally appropriate construction materials) so as to blend into their setting.

ADDITIONALLY THE FOLLOWING CRITERIA MUST BE MET FOR INDIVIDUAL TECHNOLOGIES AS BELOW:

**POLICY RE2 - WIND-POWER**

Applications for wind turbines including extensions to existing sites and individual wind turbines will be approved where:

- 1.They do not unacceptably adversely impact on the carbon storage and water retention potential of peat soils.
- 2.The proposal will not result in unacceptable electromagnetic interference to communications installations, radar or air traffic control systems, emergency services communications or other telecommunication systems.
3. For small wind development proposed as 'farm diversification', the capacity is aligned with the energy needs of the farm and the turbine and ancillary structures in scale with their surroundings.
- 4.Turbines shall not be placed closer than 800m to housing<sup>1</sup>.
- 5.Community-led schemes have the majority support of the community members living within 1.5km and are
  - i.100% owned and operated by a local community organization, or
  - ii.a fully constituted community cooperative regulated by the Financial Services Authority.

<sup>1</sup>If this is not accepted as separation distance then this should be treated as an indicative distance below which a residential visual amenity assessment will be required

**POLICY RE3 –WIND-POWER: REMOVAL OF REDUNDANT WIND TURBINES**

As part of planning permissions for wind turbine developments, a condition will be imposed that wind turbines, related infrastructure and ancillary equipment will be removed and the land restored to an agreed standard should they cease operation (i.e. generating electricity) for a period in excess of six months. This condition will be complied with within six months from the end of the six month period unless otherwise agreed in writing. In view of the expected lifespan of wind turbines, applicants will legally contract to undertake this work and place a sum on escrow account towards this purpose.

**POLICY RE4 – BIOMASS AND OTHER THERMAL POWER GENERATION**

Developments for the generation of energy (heat and/or electricity) from combustion processes of capacity above 5MW will only be granted in exceptional circumstances.

Developments of capacity 5MW or below will be permitted subject to the following criteria being met:

- 1.The fuel is demonstrated to be from a local source and should not have been diverted from a more environmentally valuable use.

by: Representation No

Filtered to show: (all of) Stage=V; Status=M

Rep'n/Para/Policy	AccessnNo	DateLodgd	Late?	Status	Modified	Summary
6235.V22//RE1		20/07/2015	<input type="checkbox"/>			Summary: Policy RE1 - Renewable Energy
Source: Email		Type: Objection		Mode	Written	Status Maintained

- 2. Fuel sourcing will not unacceptably adversely impact on trees and woodlands.
- 3. Fuel sourcing will have regard to sustainability and will not unacceptably decrease the supply of agricultural land which is in use for food production.
- 4. Proposals will be accompanied by details of fuel types and sources and quantities and the traffic implications of delivery. The increase in traffic proposed will not unacceptably adversely affect local amenity or the safety and convenience of other road users.
- 5. Emissions to the atmosphere and ground (including water) are such as not to lead to unacceptable levels of pollution.

**POLICY RE5 - HYDRO-POWER**

Applications for hydro-power schemes will be permitted where:

- 1. They do not, by scale of abstractions or otherwise, unacceptably adversely affect wildlife habitats or species that are of international, national or local importance or fish migratory routes or breeding areas.
- 2. The physical features associated with the development are so sited and designed (including the use of locally appropriate construction materials) as to blend into the landscape or townscape in which they are sited.
- 3. The proposal would not exacerbate flooding or the risk of flooding in the vicinity. There would be no significantly detrimental impact upon publicly accessible or visible features of landscape importance (e.g. waterfalls) through the reduction in the flow of water.

**POLICY RE6 – ANAEROBIC DIGESTION**

Applications for anaerobic digestion schemes will be permitted where:

- 1. On-farm or other rural anaerobic digester units are aligned with the energy needs of the farm or rural enterprise and structures are in scale with their surroundings.
- 2. The fuel is demonstrated to be from a local source and should not have been diverted from a more environmentally valuable use.
- 3. Fuel sourcing will have regard to sustainability and will not unacceptably decrease the supply of agricultural land which is in use for food production.
- 4. Proposals will be accompanied by details of fuel types and sources and quantities and the traffic implications of delivery. The increase in traffic proposed will not unacceptably adversely affect local amenity or the safety and convenience of other road users.
- 5. The environmental impacts have been adequately evidenced and management plans supplied for control of emissions, i.e. dust, odour and other nuisances/pollutants at all stages including disposal of digestate. Emissions to the atmosphere and ground (including water) are such as not to lead to unacceptable levels of pollution.
- 6. The proposal demonstrates adequate biosecurity measures.
- 7. On-farm or other rural anaerobic digester units are aligned with the energy needs of the farm or rural enterprise and structures are in scale with their surroundings.

**POLICY RE7 - SOLAR TECHNOLOGIES**

Applications for solar energy generation schemes will be permitted where:

- 1. They are situated on existing agricultural, industrial or domestic buildings or on brownfield land.
- 2. Solar developments above 5MW are situated on existing industrial buildings or brownfield land. Proposals of this scale will otherwise be refused.
- 3. The proposal would not exacerbate flooding or the risk of flooding in the vicinity by reason of increased run-off, soil erosion or other cause.
- 4. Proposals have regard to sustainability and will not decrease the supply of agricultural land which is in use for food production.

**POLICY RE8 - REMOVAL OF REDUNDANT RENEWABLE ENERGY INSTALLATIONS**

As part of planning permissions for renewable energy developments, a condition will be imposed that generators, related infrastructure and ancillary equipment will be removed and the land restored to an agreed standard should they cease operation (i.e. generating electricity) for a period in excess of six months. This condition will be complied with within six months from the end of the six month period unless otherwise agreed in writing.

Rep'n/Para/Policy	AccessnNo	DateLodgd	Late?	Status	Modified	Summary
6235.V22//RE1		20/07/2015	<input type="checkbox"/>			Summary: Policy RE1 - Renewable Energy
Source: Email		Type: Objection		Mode	Written	Status Maintained

Representation Texts: Changes:

1.We propose replacement of Policy RE1 paragraphs 1 and 2 with:  
'Proposals to generate energy from renewable and low carbon sources and associated infrastructure will be determined in accordance with renewable energy policies below, with all other relevant LDP policies and with relevant national policy and guidance'.

2.Policy RE1 Criterion 1 to read: 'Proposals should take account of the high quality of the landscape throughout Powys and be appropriate and sensitive to the character of surrounding landscape (as defined by LANDMAP). Proposals will not be supported which bring about significant change to the environmental and landscape quality of Powys, either on an individual basis or in combination with other proposed, consented or existing similar developments. Where the cumulative impact of proposals in combination with other proposed, consented or existing similar developments would be significantly detrimental to overall environmental quality they will be refused. Consideration of impacts of a proposal must include consideration of access routes and associated infrastructure. Proposals will also have regard to impacts on adjoining designated landscapes.'

3.Policy RE1 Criterion 2 to be redrafted to be effective in application to potential new technologies, or RE1 replaced entirely by new policies as 4 below.

4.Suite of RE policies to be drafted, by adaptation of UDP policies, to cater for the particular known impacts of

- Wind turbines
- Solar
- Anaerobic Digesters
- Biomass
- Hydropower

Necessary considerations will include those listed in CPRW comments above.

Suggested policies, based upon the UDP and policies enacted by other local authorities are included in comments above.

5.CPRW recommend inclusion of measures to encourage greater efficiencies and local generation for local usage.

6.The policy of the LA needs spelling out as regards SSAs.

7.Paragraph 4.10.9 – to be removed.

*Question Representation Texts*

**Question: 3d. (i) Representation Details**

Representation Texts: This representation relates to Policy RE1 in respect of proposals in the range 550MW. It is in two parts.

Point 1

The first part of the policy (relating to projects up to 5MW) offers support' for such proposals. The second part of the policy (relating to projects from 5-50MW) simply states that such proposals will be "determined" in accordance with national policy! guidance. Given that national planning policy guidance is always a material consideration when determining planning applications, this adds nothing to the policy. Paragraph 12.9.1 of Planning Policy Wales Edition 7 states that LPAs "...should plan positively for all forms of renewable energy..." (underlining added); paragraph 12.9.2 says that LPAs should guide renewable energy development by undertaking an assessment; paragraph 12.9.3 says that LPAs should establish an evidence base; and paragraph 12.9.4 says that development plans should provide policies to clarify where strategic scale wind energy developments are likely to be permitted. Policy RE1 fails to follow this guidance.

The policy should be reworded to indicate the areas in which and the criteria under which schemes in the range 5-50MW would be supported by the LPA. This is the approach that other LPAs in Wales have adopted for LDP renewable energy policies: for example, the Bridgend LDP states a preference for 25MW+ wind farm schemes to be located in the refined Strategic Search Areas (SSAs); and the Neath Port Talbot LDP expects such schemes to be located within the refined SSAs.

Paragraph 4.10.5 states that the Council has not refined the SSAs in the LDP "because the Mid Wales conjoined windfarm inquiry has provided a comprehensive assessment of the proposals in and around the SSA." That rather belies the fact the Council did undertake a refinement study but now considers that it should be given little weight. Footnote 42 to that paragraph refers the reader to the LDP Renewable and Low Carbon Energy Topic Paper, but this does not provide an assessment either. The Council should not rely on a third party assessment of proposals presented to an inquiry which have not yet been determined and where the outcome is presently unknown. The LDP as currently written does not provide a credible evidence base.

Point 2

Criterion I of Policy RE1 reads as follows: 1. All proposals must be incidental to existing visual and sensory landscape characteristics (as defined by LANDMAP)." With respect, this is unintelligible by itself and does not provide the clarity and certainty which users of LDPs may reasonably expect.

We suspect that the word 'incidental' is taken from (or will be interpreted in relation to) Table 3 in the LDP Topic Paper, in which the last category of landscape is described thus:

Name

Wind farm incidental to existing landscape characteristics

Description

A landscape in which turbines are incidental to existing landscape characteristics

by: Representation No

Filtered to show: (all of) Stage=V; Status=M

Rep'n/Para/Policy AccessNo DateLodgd Late? Status Modified Summary

6264.V1//RE1 14/07/2015  Summary: Policy RE1 - Renewable Energy, problems with policy

Source: Email

Type: Objection

Mode Written

Status Maintained

Magnitude of landscape visual impact  
Moderate-low

Paragraph 67 of the Topic Paper, which follows table 3, says: "Renewable energy proposals must have the minimum landscape/visual impact to meet the policy. ' The word minimum" is not used in the table. but must be coincident with the lowest category.

The Government is committed to tackling climate change including by the increased use of renewable energy. National Policy Statement EN-1 sets out the urgent need for new renewable electricity generation projects (paragraph 3.4.5) and to dramatically increase the amount of capacity, much of which in the short and medium terms is likely to be wind generation (paragraph 3.3.10). The Councils approach as set out in Policy RIE1 does not sit easily in this framework.

The SSAs have been selected as the most appropriate areas in Wales where wind farm developments should be concentrated (TAN 8; paragraph 2.2). The Council's proposed insistence on "minimum" or "incidental" is contrary to TAN 8 (Annex D: paragraph 8), which states: "Within (and immediately adjacent to the SSAs, the implicit objective is to accept landscape change i.e. a significant change in landscape character from wind turbine development." (underlining added). Criterion 1 is therefore unduly restrictive and does not comply with national planning policy guidance.

Conclusion

Policy RE1 does not meet soundness tests C2 and CE2 in that:

It is not compliant with national planning policy.

It is not realistic or appropriate.

It is not based on a robust or credible evidence base.

Council Response:

the proposals in and around the SSA." That rather belies the fact the Council did undertake a refinement study but now considers that it should be given little weight. Footnote 42 to that paragraph refers the reader to the LDP Renewable and Low Carbon Energy Topic Paper, but this does not provide an assessment either. The Council should not rely on a third party assessment of proposals presented to an inquiry which have not yet been determined and where the outcome is presently unknown. The LDP as currently written does not provide a credible evidence base.

Point 2

Criterion I of Policy RE1 reads as follows: 1. All proposals must be incidental to existing visual and sensory landscape characteristics (as defined by LANDMAP)." With respect, this is unintelligible by itself and does not provide the clarity and certainty which users of LDPs may reasonably expect.

We suspect that the word 'incidental' is taken from (or will be interpreted in relation to) Table 3 in the LDP Topic Paper, in which the last category of landscape is described thus:

Name

Wind farm incidental to existing landscape characteristics

Description

A landscape in which turbines are incidental to existing landscape characteristics

Magnitude of landscape visual impact

Moderate-low

Paragraph 67 of the Topic Paper, which follows table 3, says: "Renewable energy proposals must have the minimum landscape/visual impact to meet the policy. ' The word minimum" is not used in the table. but must be coincident with the lowest category.

The Government is committed to tackling climate change including by the increased use of renewable energy. National Policy Statement EN-1 sets out the urgent need for new renewable electricity generation projects (paragraph 3.4.5) and to dramatically increase the amount of capacity, much of which in the short and medium terms is likely to be wind generation (paragraph 3.3.10). The Councils approach as set out in Policy RIE1 does not sit easily in this framework.

The SSAs have been selected as the most appropriate areas in Wales where wind farm developments should be concentrated (TAN 8; paragraph 2.2). The Council's proposed insistence on "minimum" or "incidental" is contrary to TAN 8 (Annex D: paragraph 8), which states: "Within (and immediately adjacent to the SSAs, the implicit objective is to accept landscape change i.e. a significant change in landscape character from wind turbine development." (underlining added). Criterion 1 is therefore unduly restrictive and does not comply with national planning policy guidance.

Conclusion

Policy RE1 does not meet soundness tests C2 and CE2 in that:

It is not compliant with national planning policy.

It is not realistic or appropriate.

It is not based on a robust or credible evidence base.

Question Representation Texts

**Question: 3d. (i) Representation Details**

Representation Texts: Re: CEW comments on the current Powys Deposit Local Development Plan

CEW was established in 2012 to support communities across Wales in delivering sustainable energy projects in order to combat climate change and improve resilience within such communities. More recently CEW has received Welsh Government funding in order to better establish the necessary practical, policy and financial support required to assist communities to develop their own renewable energy generation and energy efficiency schemes. We expect that in the coming years we will be able to encourage and nurture a number of such schemes in Wales, including in the County of Powys.

Under this mandate, CEW is maintaining an overview of planning policy developments at the national and local level in Wales in order to ensure that the potential for community energy developments is realised and that such schemes are not unfairly hindered. We have therefore appraised the current Powys LDP Deposit 2nd draft to ensure that is adequately reflects the requirements of national policy and planning policy in Wales and will create an appropriate planning environment for community energy projects in Wales.

We are concerned firstly that the wording of Policy RE1 falls well short of a proper criteria-based policy approach to the determination of new applications. From a strategic point of view, the County Council has taken the view that all that it is required to do is to ensure that the electricity consumption of the whole of the County is equalled by the generation of electricity from renewable sources. This is out of kilter with national guidance and is not the strategic approach to renewable energy that the Welsh Government has been operating ever since TAN8 in 2005.

Further, one would expect to find advice in RE1 on a criteria-based approach to making decisions. Currently the wording is ambiguous and obfuscates how the Council expects to be able to judge whether a scheme is acceptable in terms of its "...efficiency, effectiveness and economy" whilst also neglecting to state the development control tests under which renewable energy developments will be tested.

Lastly on this broad level, there is nothing within the text supporting RE1 or the policy itself to recognise that there is a balance to be struck in reconciling the inevitable residual effects which will arise from a wind farm and the wider benefits that it can bring.

Looking specifically at community renewable energy developments, we notice a complete absence of any reference or policy support for community energy developments in the policy RE1 and the supporting text. It would be our expectation, particularly in light of the potential benefits of such developments to the rural communities of Powys, that your Authority would seek to encourage such developments where environmentally acceptable, or where they can be made acceptable through iterative design and consultation.

Welsh Government has set out bold ambitions for community energy development in Wales in recent years, not the least of which is Energy Wales: A Low Carbon Transition (March 2012). This policy guidance seeks to ensure Wales' communities benefit from energy development economically and socially. In this vein, the Minister for Natural Resources has set out in a letter to your Authority (Letter to Local Authority Cabinet Members with responsibility for Planning) on 18 December 2013 that it is Welsh Government's policy to support community driven renewable energy projects "... where benefits from the project area returned to the host community".

This reflects the national planning policy requirements in Planning Policy Wales 2014, edition 7, paragraph 12.8.19 where it is stated: "The Welsh Government's policy is to support community driven renewable energy projects where benefits from the projects are returned to the host community. Local planning authorities should ensure that

development plan policies are supportive of projects benefitting from, or eligible for, Feed-in Tariffs.”

We believe that the current Plan fails to reflect this requirement and will inevitably disadvantage your communities which will have no planning grounds upon which to seek your support for new renewable energy proposals.

Community Energy Wales requests that this omission is addressed and that the LDP develops a policy and advice that is supportive of community renewable energy schemes, where appropriate and where tested against other policy based requirements and criteria. We also request that a the policy is clear that positive weighting will be applied to such schemes where the economic and job benefits are clearly set out as part of a planning application, as required of local authorities in the Ministerial letter dated December 2013.

*Question Representation Texts*

**Question: 3d. (i) Representation Details**

Representation Texts: Policy RE1 (R.34.91)

Policy RE1 is not considered sound on the basis that it does not set out a coherent strategy, is not consistent with national policy, is not realistic and appropriate and is not reasonably flexible – therefore failing Tests C2, CE1, CE2 and CE4.

Policy RE1 is unclear as to what scale of energy scheme will be determined against the criteria set out. The first paragraph of the policy states that schemes under 5MW (micro and sub-local authority) will be determined in accordance with the defined criteria set out in Policy RE1. The second paragraph relates to proposals between 5MW and 50MW, which for onshore wind energy would apply to local authority wide (5MW to 25MW) and strategic (25MW and over). The wording states that such schemes would be determined in accordance with national policy/guidance, subject to the criteria set out in Policy RE1 and other relevant LDP policies. This implies that all four scales of renewable energy generating schemes will be subject to the criteria set out in Policy RE1.

The explanatory text, however, indicates that this is not how Policy RE1 is intended to be applied. Paragraph 4.10.4 states that the LDP does not set the policy for local authority wide onshore wind schemes, thereby indicating that schemes of 5MW to 25MW will not be assessed against the criteria set out in Policy RE1. This is supported by Paragraph 4.10.5, which states that policy for local authority wide and strategic onshore wind schemes is set by PPW and TAN8. This implies that schemes of 5MW to 50MW would not be determined against Policy RE1. This is not consistent with Policy RE1 itself, which states that schemes of 5MW to 50MW will be determined in accordance with national policy/guidance, subject to criteria 1 and 2 and all other relevant LDP policies. Policy RE1 therefore currently fails to provide a coherent strategy (Test CE1).

If schemes of local authority wide and strategic scale are to be subject to Criterion 1 and 2, decisions relating to certain onshore wind energy schemes could be contrary to national policy. This would be particularly pertinent for schemes within, or adjacent to, the defined SSAs when applying Criterion 1. It would be contrary to national policy to require such proposals to be 'incidental' to the existing visual and sensory landscape. This criterion is addressed in more detail below.

Policy RE1 and the relevant explanatory text should be amended to provide a coherent strategy, which

Status Maintained

clearly establishes what scale of scheme will be determined against the defined criterion. The LDP should also allow sufficient flexibility to reflect the provisions of the Planning (Wales) Act 2015 and the relevant secondary legislation relating to developments of national significance. As it stands, energy generating schemes of 25MW to 50MW will be determined by the Welsh Ministers. Whilst this is still subject to consultation it would be inappropriate for the LDP to unnecessarily restrict such proposals.

Aside from the confusion as to how Policy RE1 is intended to be applied, our client also has specific concerns regarding the proposed criteria. It is entirely inappropriate for Criterion 1 to require "all proposals to be incidental to existing visual and sensory landscape characteristics". As currently worded, this would mean that schemes of up to 50MW, even if located in the SSAs, would need to demonstrate that they are 'incidental' to existing visual and sensory landscape characteristics. This is clearly not realistic and is inconsistent with national policy. TAN8 states that "within (and immediately adjacent) to the SSAs, the implicit objective is to accept landscape change i.e. significant change in landscape character from wind turbine development". A requirement for schemes to be 'incidental' to landscape characteristics would therefore be entirely at odds with national policy for schemes in, or adjacent to, the SSAs.

A requirement for schemes to be 'incidental' to existing landscape characteristics is also inappropriate and unnecessarily restrictive when applied to sites outside of the SSAs. Table 3 in the Renewable & Low Carbon Energy Topic Paper (March 2015) provides further clarification as to what is meant by being 'incidental' to existing landscape characteristics. It is described as being "a landscape in which turbines are incidental to existing landscape characteristics" and is identified as the lowest level of landscape impact. This is reflected in Paragraph 67 of the Topic Paper, which states that "renewable energy proposals must have the minimum landscape/visual impact to meet the policy".

This position is not realistic or appropriate and undermines the wider objectives of the LDP, The Powys Regeneration Strategy and national policy in supporting the generation of energy from renewable sources. TAN8 makes it clear that whilst a balance must be struck between the desirability of renewable energy and landscape protection, this should not result in severe restriction on the development of wind power capacity. Requiring all proposals to be incidental to existing landscape characteristics would place such a restriction on onshore wind schemes, failing to comply with national policy and undermining the wider purpose of Policy RE1.

Taking the four landscape 'scenes' set out in Table 3, there will be instances where developments outside of the SSAs would be appropriate if they are judged to fall within one of the other 'scenes'. This includes the third 'scene' where an onshore wind farm would be seen as an object within the landscape, prominent but not dominating or changing the overall characteristics. Meeting this test would still enable schemes to come forward that do not result in a 'significant change in landscape character' as recommended by national policy in relation to schemes outside of the SSAs.

The requirement for all proposals to be 'incidental' to existing visual and sensory landscape characteristics should therefore be deleted from Criterion 1 of Policy RE1. The appropriate replacement wording will be dependent on the scale of proposals subject to Criterion 1. It could, however, take the form of requiring proposals to not have an "unacceptably adverse impact on existing visual and sensory landscape

characteristics”.

Turning to Criterion 2, the reference to “having regard to...alternative sites” should be deleted. This requirement is unnecessarily onerous on applicants and could restrict the delivery of renewable energy. There is no national policy requirement for applications for onshore wind energy to assess alternative sites.

Our client supports the recognition in Criterion 2(iii) that measures which mitigate adverse impacts on receptors are appropriate. This recognises that there will be instances where mitigation is possible and appropriate to overcome perceived adverse impacts on receptors.

Our client supports the reference at Paragraph 4.10.5 that the Council has not refined SSAs in the LDP. Paragraph 4.10.7 (and LDP Objective 5) undermines the intended support for sub-local authority and micro scale renewable and low carbon energy projects through Policy RE1. It is unduly restrictive to limit such opportunities to enabling “opportunities for householders, communities and the diversification of rural enterprises to benefit from micro and sub-local authority energy schemes.”

Question Representation Texts

**Question: 3d. (i) Representation Details**

Representation Texts: A policy explicitly supporting proposals to generate energy from renewable and low carbon resources and associated infrastructure is welcomed. The reference to determination in accordance with National Policy / Guidance is also welcomed as it enables enable the plan to deal with changing circumstances, such as the introduction of National Development Framework and Strategic Development Plans under the Planning (Wales) Act 2015; and/or a review of Planning Policy Wales (PPW) or Technical Advice Note 8 (July 2005) (TAN8).  
 It is however questionable whether this specific policy for Renewable Energy is necessary as it does not introduce any policy test that is not already covered by National Policy / Guidance and/or other policies in the Deposit LDP. Furthermore, some of the terms used in the policy are in conflict with tests set out in other policies in the Deposit LDP, namely DM1 and DM2.  
 Powys CC's attention is drawn to Chapter 12 of PPW (Edition 7, July 2014) which provides policy support for the provision of infrastructure and services across Wales. The Welsh Government, at paragraph 12.9.1 of PPW, specifically requires local planning authorities to plan positively for all forms of renewable and low energy development using up to date and appropriate evidence. Whether intentional or not, Deposit LDP Policy RE1 appears to introduce unconventional and conflicting planning policy tests which set a higher policy bar for renewable energy developments than other developments; this approach conflicts with the requirements to plan positively as set out in PPW.  
 Notwithstanding the 'necessity' of Deposit LDP Policy RE1, comments and suggested amendments are provided below on the wording of the policy which should be considered in the event that this policy is retained.  
 It is also questioned why <5MW and 5-50MW schemes are set out separately at LDP Policy RE1 when the policy considerations are, to all intents and purposes, the same – i.e. to be determined in accordance with National Policy / Guidance, the specific criteria and all other relevant LDP policies.  
 LDP Policy RE1: Criterion 1: the policy test that proposals “must be incidental to existing visual and sensory landscape characteristics” contradicts the landscape and visual policy test set out in LDP Policy DM1 which requires that developments must not “unacceptably adversely affect, either on their own or in combination with existing or approved development”, inter alia, “The characteristics and special qualities of Powys landscape (as defined by LANDMAP) and adjacent protected landscapes (National Parks and Areas of Outstanding Natural Beauty) and the visual amenity enjoyed by users of those areas.”  
 ‘Incidental’ is defined in the Oxford English Dictionary as “happening as a minor accompaniment to something else”; “occurring by chance in connection with something else” or “happening as a result of (an activity)”. Renewable energy developments cannot, by their very nature, be defined as being ‘incidental’ to existing visual and sensory landscape characteristics.  
 The process of establishing the landscape and visual baseline and assessing the impact of development on these characteristics is well established in planning and Environmental Impact Assessment (EIA) terms and ‘incidental’ is not considered to be an appropriate policy test. No evidence has been put forward in the LDP to justify this restrictive policy test and, in any case, the landscape and visual impact is best assessed on a case-by-case basis against relevant National Policy / Guidance and other LDP policies, including Policy DM1.  
 LDP Policy RE1: Criterion 2: there appears to be no rationale behind the use of (specifically) “efficiency, effectiveness and economy” to “minimise individual or cumulative adverse impacts”. Whilst ‘energy output’ and ‘economic’ considerations are useful information and part of theplanning balance, they are just two out of a plethora of material planning considerations that must be weighed in the balance.

Type: Objection

Mode Written

Status Maintained

LDP Policy RE1: Criterion 2 (i) and (ii): the list of criteria is incoherently set out and, in any case, covered by National Policy / Guidance, Deposit LDP Policies DM1 and DM2 and, where relevant, Environmental Impact Assessment (EIA) legislation.

LDP Policy RE1: Criterion 2 (iii): this policy should clarify that mitigation is only required where there are identified adverse impacts, i.e. 'where necessary'.

In contrast to the contradictory and imprecise wording of Deposit LDP Policy RE1, paragraph 12.10.1 of PPW clearly and coherently sets out all of the considerations that local planning authorities should take into account in determining applications for renewable and low carbon energy development and associated infrastructure (below).

- the contribution a proposal will play in meeting identified national, UK and European targets and potential for renewable energy, including the contribution to cutting greenhouse gas emissions;
- the wider environmental, social and economic benefits and opportunities from renewable and low carbon energy development;
- the impact on the natural heritage (see 5.5), the Coast (see 5.6) and the Historic Environment (see 6.5);
- the need to minimise impacts on local communities to safeguard quality of life for existing and future generations;
- ways to avoid, mitigate or compensate identified adverse impacts;
- the impacts of climate change on the location, design, build and operation of renewable and low carbon energy development. In doing so consider whether measures to adapt to climate change impacts give rise to additional impacts (see 4.5);
- grid connection issues where renewable (electricity) energy developments are proposed; and
- the capacity of and effects on the transportation network relating to the construction and operation of the proposal.

Paragraph 4.10.4 states that "the LDP also sets the policy for Local Authority Wide schemes (5,000kW – 50,000kW) other than onshore wind" however LDP Policy RE1 does not distinguish between onshore wind and other renewable energy technologies. If it is Powys County Council's intention that the Deposit LDP rely solely on national policy / guidance for the determination of onshore wind developments, this should be explicitly stated in LDP Policy RE1.

The LDP does not set out where the 50,000kW (50MW) target set in Objective 5, and also referred to subsequently at Paragraph 4.10.7, has been derived. Whilst reference is made to the 'Renewable and Low Carbon Energy Assessment' (AECOM, October 2012), the target in the LDP does not appear to relate to the potential renewable energy capacity identified in this document. A robust and credible evidence base should be set out clearly in the document as justification for this 50,000kW (50MW) target.

Generally, there is also a need throughout the Deposit LDP to ensure consistent use of either kilowatt (kW) or megawatt (MW) as the unit of power. To ensure consistency with national policy contained in PPW together with guidance contained in TAN8, it is considered that the MW unit of power is more appropriate than the kW unit of power used in the Deposit LDP.

For the reasons set out above, it is considered that LDP Policy DM2 in its current form fails to meet the Consistency (C2) and Coherence and Effectiveness (CE1 & CE2) tests of soundness.

References in LDP Policy RE1 and accompanying paragraphs 4.10.1 to 4.10.10 to national policy and guidance is welcomed and ensures that the Coherence and Effectiveness (CE4) test is met.

Council Response:

0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: Firstly, to consider whether all the criteria set out in Policy RE1 are necessary given that most, if not all, of the matters are already set out in greater detail in National Policy / Guidance and other LDP Policies. If not deleted in its entirety, make the necessary changes to ensure consistency.

*Question Representation Texts*

**Question: Council Response**

Representation Texts: This Representation is noted. The Council agrees to amend the text of Policy M1 to provide clarity with regards to rate of supply and requirements with respect to the RTS statement. See Focused Changes for details.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: Policy M1 criteria (i) - what is 'the required rate of supply'?  
 For aggregates the RTS sets out the level of need which could be referenced, but for other mineral types there is no 'required rate of supply'. Criteria (iii) the wording is not clear. I presume this is intended to allow a site to be reconfigured in some way so that there are environmental gains, but that is not clear and there is no explanation within the justification.

Council Response: 0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: Provide explanation within the justification

Question Representation Texts

**Question: Council Response**

Representation Texts: This Representation is noted. The Council agrees to amend the text to provide clarity to Policy M1 and is consistent with National Policy. See Focused Changes for details.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: Policy M1 Existing Mineral Sites

The Mineral Products Association (MPA) objects to this policy in view of its incoherence and lack of attention to national policy. It fails Soundness Tests C2 & CE1.

1) The policy refers to all mineral sites, and contains two criteria for non energy minerals. The policy is deficient in not setting out the policy requirement for aggregates as required by national policy.

MPPW paragraph 17 states that authorities should include policies in their development plans for the maintenance throughout the plan period of landbanks for non-energy minerals which are currently in demand. References to 'landbank policy' occur again in this paragraph twice. This is a clear statement in national policy that references to landbank need to form part of a policy and by implication that it is not appropriate to merely relegate this to the supporting text, which in this case is limited to objective 12 and to the Monitoring Framework. This is because the most fundamental reason for a local development plan for minerals is to provide for a steady and adequate supply of minerals and this can only be expressed in quanta. The plan is therefore unsound because it does not mention the landbank (and how this has influenced levels of provision) in the policy in accordance with national policy.

We also ask that the RTS provision figure is included as this is essential to an understanding of landbank policy. This is referred to briefly in the Plan text but should be elevated to policy to give it more weight.

2) In addition, the policy is not coherent in respect of dimension stone production. Unlike aggregates there is no restriction on rates of supply whilst shortages of stone to supply materials in the local architectural style would not be covered by this policy. Unless there are other minerals covered by the term 'non energy' we believe this should be amended to 'crushed rock aggregates', which would be a better fit to the supporting text and the objective of the clause. This would leave clause ii to be amended to make it clear that it refers to dimension stone operations as well. Clause iii will also need amendment since it there is as already pointed out no restriction in national policy to the supply of dimension stone.

Council Response: 0

**Question: 3d. (ii) Desired changes to Document**

5100.V2//M1 20/07/2015  Summary: Policy M1 – Existing Minerals Sites

Source: Email Type: Objection Mode Oral (Examination) Status Maintained

Representation Texts: 1) We therefore seek the amendment to the policy by inserting new text at the beginning of the policy as follows,

“An adequate supply of aggregates will be provided which maintains a minimum landbank (permitted reserves) of 10 years for crushed rock aggregates throughout the Plan Period at an agreed rate of 2.51 Million tonnes per annum.”  
This will provide the necessary alignment with national policy.

2) We also seek an amendment to the policy by inserting new text and deleting some text in the body of the policy as follows:

CHANGE FROM

“Extensions (working area, depth and duration) to existing Minerals / Coal sites (Table M1) will be permitted where they would:

- i) In the case of non-energy minerals help to maintain the required rate of supply; or
- ii) In the case of non-energy minerals address a shortage of high quality material that is of limited availability nationally; or
- iii) For all minerals - bring clear environmental benefits without significant increase in supply.

CHANGE TO:

“Extensions (working area, depth and duration) to existing Minerals / Coal sites (Table M1) will be permitted where they would:

- i) In the case of crushed rock aggregate minerals help to maintain the required rate of supply; or
- ii) In the case of all types of non-energy minerals address a shortage of high quality material that is of limited availability locally or nationally; or

**Question: 4b Reason For Request To Speak At Hearing And Subject**

Representation Texts: The Mineral Products Association (MPA) is the trade association for the aggregates, asphalt, cement, concrete, dimension stone, lime, mortar and silica sand industries. With the recent addition of The British Precast Concrete Federation (BPCF) and the British Association of Reinforcement (BAR), it has a growing membership of 450 companies and is the sectoral voice for mineral products. MPA membership is made up of the vast majority of independent SME companies throughout the UK, as well as the 9 major international and global companies. It covers 100% of GB cement production, 90% of aggregates production and 95% of asphalt and ready-mixed concrete production and 70% of precast concrete production. Each year the industry supplies £9 billion of materials and services to the £120 billion construction and other sectors. Industry production represents the largest materials flow in the UK economy and is also one of the largest manufacturing sectors.

Given the government's recognition of the economic and employment benefits of the extractive industries we should like to direct your attention to 'Making the Link', a document produced by the MPA to highlight the contribution that the sector makes to the economy. The document can be downloaded from the following website.

*Question* *Representation Texts*

**Question: Council Response**

Representation Texts: This Representation is noted. The Council agree to amend the text to correct the information in table M1 as suggested by the representor. See Focused Changes for details.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: As owners and operators of Middletown & Buttington Quarries we would like to formally object to some of the information contained in the table M1 in the written LDP document (document 34). The table currently states the 'Mineral Extraction End Date' at Middletown Quarry as being until 21 Feb 2042. This is incorrect. The correct expiration of the current planning permission is 22/08/2060. This was correctly shown in the adopted version of the UDP. We request that the 2060 expiry date be shown in the table so that the LDP document is sound, factually correct and not misleading to the public.

The table M1 also needs to be amended to show the correct mineral type extracted from Buttington Quarry. The previous deposit draft of this document (2014) correctly stated the Mineral Type as being Clay & Shale. For some reason this has been altered in the current deposit draft to show Sandstone which is incorrect. For the LDP document to be factually correct and sound we request the table M1 be amended to show that Clay and Shale is the mineral type at Buttington Quarry.

Council Response: 0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: The table M1 needs to be changed to show the correct 'end date' for Middletown Quarry and also the correct 'mineral type' at Buttington Quarry as outlined above.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: REPRESENTATION 4 OF 6

The Coal Authority acknowledges that Policy M2 has been amended to include instances where selected community benefits may justify the extraction of coal, i.e. to address mining legacy and to prepare land for certain types of future development.

However, we still strongly object to this policy as it essentially prejudices that no new coal extraction will be permitted unless it is to take place on sites where certain types of development is proposed. This stance does not accord with National Planning Policy in MTAN2.

Paragraph 46 of MTAN2 outlines a two stage approach in the consideration of proposed coal operations. The Policy fails to set out the criteria against which applications for mineral extraction will be assessed i.e. the first stage of the process, and instead focuses on local/community benefits i.e. the second stage of the process.

This presumption against new coal workings except where development is proposed is contrary to National Planning Policy. The Coal Authority therefore considers that this renders the LDP Fundamentally UNSOUND such that it cannot proceed to adoption.

Council Response: 0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: Policy M2 should be amended:

FROM  
 "No new sites for the winning of hard rock, sand and gravel, or coal will be permitted in addition to those sites as shown on the proposals map and in Table M1unless they are:.....[etc etc]...."

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: This appears overly restrictive still. What about prior extraction for mineral types other than coal? It's not clear whether the policies comply with MTAN 2 either. An extension to a coal site would be allowed, as would prior extraction to address stability issues or prepare the land for development, but no new coal extraction would. It's explained within the justification that 'that which is accessible and commercially viable has been, or is in the process of being won'. It's not clear that the evidence base is sufficient to support this

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: Policy M2 New Mineral Sites

The Mineral Products Association (MPA) objects to this policy since it is not in accordance with paragraph 49 of MTAN1. It fails Soundness Tests C2.

The reference to 'small scale' and 'local markets' in respect to dimension stone in the policy presumably comes from MPPW para 72. This document was published in 2001 and predates the 2004 Symonds report, Planning for the Supply of Natural Building and Roofing Stone in England and Wales. There is also more than a decade of UK production statistics to examine trends which show a slowly rising demand for building stone (prior to the recession) especially of sandstone and igneous with sandstone being the most important (Figure 1). The industry therefore benefits from a resurgence in demand for traditional materials. There are no comparable statistics for the constituent parts of the UK. The overall demand for building stone (not including slate) has remained remarkably stable at 2.7 million tonnes per year up to 2012 (UK Minerals Yearbook 2013, page 29). However, the proportion of imports, particularly for unworked stone has been steadily rising to the point where imports now account for 62% of the market. The Symonds report noted that in the previous decade the number of quarries and operators had been falling (Exec Summary Introduction and Background). The rise in imports and demise of indigenous supply sources is a direct result of the generally unsympathetic treatment of dimension stone in planning and the ability of operators to meet regulatory and commercial challenges.

At the heart of this prejudice is an apparent determination by local government to keep the industry shackled to the past in small scale operations serving severely restricted local markets. However, our members report that typically, only 10% to 30% of their business is in the heritage market and the occurrence of contracts for it are so sporadic that they cannot retain highly skilled labourforces nor provide operating margins to run a modern business. Dimension stone producers also face a number of commercial obstacles which other mineral operators do not have.

Being limited to 'local markets' and 'small scale' production reflects the historic circumstances of the industry and the traditional emphasis on heritage end uses. Local market and small scale means restricted outlets, low volumes and low turnover/operating profit. This scenario does not allow the operator to invest in the technology and training which is increasingly being required of him, and his low sales forecast means that he will be turned away by his bank manager for loans to keep the business going. This is a serious threat to continuity of security of supply. Conversely, serving wider markets at a commercially viable scale makes it easier to guarantee that stone will also be available to serve the local market.

Representation Texts: Accordingly, the policy needs to be much more flexible if it is to serve the dimension stone industry of the 21st century. We suggests the following amendments:

CHANGE FROM:

No new sites for the winning of hard rock, sand and gravel, or coal will be permitted in addition to those sites as shown on the proposals map and in Table M1 unless they are:

1. Very small workings for locally distinct stone or sand and gravel for a local market; or
2. For coal where it would:
  - i. remove a mining legacy; or
  - ii. prepare land for future development of employment and economic benefit; or
3. A borrow pit under Policy M3 below.

CHANGE TO:

No new sites for the winning of hard rock, sand and gravel, or coal will be permitted in addition to those sites as shown on the proposals map and in Table M1 unless they are:

1. For locally distinct dimension stone or sand and gravel; or
2. For coal where it would:

Representation Texts: This Representation is noted. The Council agrees to amend the text to include a specific minerals safeguarding policy. See Focused Changes for details.

Council Response:

0

**Question: 3d. (i) Representation Details**

Representation Texts: REPRESENTATION 5 OF 6

As clearly articulated in our response to the Powys LDP Deposit Draft, July 2014, The Coal Authority objects to the omission of any policy which actually defines Mineral Safeguarding Areas (MSAs). Whilst Policy DM1 refers to mineral sterilisation, it does not actually refer to the designation of MSAs.

Paragraphs 4.11.6 and 4.11.7 seek to argue that there is no need to safeguard surface coal resources in the plan area because the Council deem the area which is accessible and commercially viable to be that which has or is in the process of being won.

Areas which have previously been worked may be suitable and appropriate for future re-working as modern extraction methods are available to remove a greater percentage of the coal resource than historic mining was able to.

The Council is also confusing the issue of whether or not mineral extraction may be acceptable with safeguarding. Safeguarding is based on geological fact, it is not in any way related to whether or not planning permission may be granted. The designation of MSAs is a long-term planning tool, which will extend well beyond the current plan period. It is designed to allow the resource to be safeguarded to allow the flexibility for future mineral extraction to be available, depending upon the planning policy considerations that are then in place.

The viability of coal extraction varies depending upon market factors, safeguarding is also an integral part of the UK energy security.

The MSA for coal should follow the procedure set out in paragraphs 34 to 43 of MTAN2 and paragraph 13 of MPPW. This clearly does not require any consideration to be given as to whether or not coal working may or may not be acceptable.

This policy omission is therefore contrary to National Planning Policy. The Coal Authority considers that this renders the LDP Fundamentally UNSOUND such that it cannot proceed to adoption.

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: Insert New Policy as follows:

**Policy xx – Mineral Safeguarding**

Mineral Safeguarding Areas have been designated for aggregates and surface coal and these are shown on the Proposals Map. Within the Mineral Safeguarding Areas where non-mineral surface development is proposed the prevention of the sterilisation of the mineral resources will be considered. New development will only be permitted where:

- i. The mineral resource is not of potential value; or
- ii. The mineral resource can be extracted prior to development; or
- iii. Extraction would not meet the tests of environmental acceptability or community benefit as set out in National Policy; or
- iv. The development is of a temporary nature and can be completed and the site restored to a condition that would allow for future extraction; or
- v. The development is householder development or of a very minor nature such as extensions to dwellings, fences, walls or bus shelters.

NB - The Proposals Map would need to include the Primary and Secondary coal resource within the MSA in line with the methodology set out in MTAN2 paragraphs 34 to 43.

Appropriate supporting text would also be required.

Council Response:

0

Question Representation Texts

**Question: Council Response**

Representation Texts: The Council disagree with the proposed changes requested by the Representer. The Representer does not raise new issues or evidence which lead the Local Planning Authority to change its conclusions. The policy was prepared in accordance with national and regional guidance and is supported by the Topic Paper Community Facilities (January 2015).

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: Policy is subjective and unsubstantiated in terms of supporting information and topic papers.

Policy is too vague and restrictive and use of words such as local geographic community' leave the LPA open to challenge.

Council Response: 0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: Policy to be wholly redrafted to reflect regional and national planning guidance.

Council Response: 0

**Question: 4b Reason For Request To Speak At Hearing And Subject**

Representation Texts: I wish to speak at the public examination so that a detailed case can be provided to the inspector and so that the reasoning of the officers can be fully examined.

Question Representation Texts

**Question: Council Response**

Representation Texts: This representation is considered to be consistent with and in support of the DLDP Strategy and Policies. It is noted that the Representor would like to see an affordable housing contribution on the P48 HC2 site. This is a committed site which benefits from planning permission. According to the Affordable Housing Contribution (No.) column, 12 affordable dwellings have been secured as part of the existing planning permission. No change is therefore considered necessary to ensure that the Plan is sound.

Council Response: 0

Issue: 2015: Deposit Draft-04. Housing - Affordable Housing

Question Representation Texts

**Question: Council Response**

Representation Texts: The Council commissioned a CIL & Viability Assessment for the purposes of deriving target percentages for affordable houses in the identified house price areas of Powys. The site at Llanymynech HC1 (UDP allocation M170 HA1)(Parc Llwyfen) is a site that was allocated in the UDP which did not have an affordable housing target and it has a extant planning consent therefore it is categorised as a commitment in the LDP but with no affordable housing requirement.

Council Response:

0

**Question: 3d. (i) Representation Details**

Representation Texts: Affordable Housing. Llanymynech is set at the lower target of 10% (rather than 20%) of all new builds to be affordable housing. However, the 35 houses in 3 sites shown for Llanymynech in the LDP only provide 2.5 affordable houses, which is well under the target of 3.5. As a minimum, the Council believes the 1.5 affordable houses shown for P40 HA2 off Carreghofa Lane should be rounded up to 2 rather than down to 1. In addition, the 20 houses at Llwyfen (P40 HC1 and P40 HA1) should provide 2 affordable houses despite the first site for 10 (P40 HC1), which is partially complete, having been apparently exempted.

Council Response:

0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: Affordable Housing. Llanymynech is set at the lower target of 10% (rather than 20%) of all new builds to be affordable housing. Policy: H1

Issue: 2015: Deposit Draft-02. Housing - Distribution and Numbers

*Question* *Representation Texts*

**Question: Council Response**

Representation Texts: Thank you for your comments. The Council acknowledges your concerns that Churchstoke should be awarded higher housing numbers and additional land allocations. Please note that the Housing Topic Paper and the LDP Strategy Topic Paper are being updated and further work has been undertaken on the deliverability of sites shown in the LDP. A number of Focussed Changes are proposed to the Plan in the light of the revisions and updated evidence and in response to Representations made at the Deposit Plan stage. Please refer to the separate Focussed Changes document and the Churchstoke map and Appendix 1 settlement allocations table for any Focussed Changes regarding land allocations in Churchstoke.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: Churchstoke Community Council makes the following response to the consultation on the Deposit LDP:

- a) Churchstoke Community Council is disappointed that there are fewer/ smaller sites allocated for housing/ employment respectively in the Deposit LDP than in the existing UDP
- b) Churchstoke Community Council is disappointed that of the candidate sites for housing supported by CCC at consultation, only 2 have been carried forward within the development boundary into the Deposit LDP, but there is no explanation of why that is the case
- c) Churchstoke Community Council expresses concerns that existing sites allocated for housing in the LDP have not been completely developed, and would like to see more candidate sites included in the Deposit LDP by way of alternatives.

Council Response: 0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: CCC would like to see the following changes to the Deposit LDP:

- a) Churchstoke Community Council would like to see more/larger sites allocated for housing/employment respectively in the Deposit LDP to at least the level of the existing UDP
- b) Churchstoke Community Council would like to see an explanation of why only 2 of the candidate sites for housing supported by the community council at consultation have been included within the development boundary in the Deposit LDP
- c) Churchstoke Community Council would like to see more candidate sites included in the Deposit LDP by way of alternatives to existing sites allocated for housing in the UDP have not been completely developed.

Issue: 2015: Deposit Draft-02. Housing - Distribution and Numbers

Question Representation Texts

**Question: 3d. (i) Representation Details**

Representation Texts: For the last five years we have been working with Rural Housing Enablers and Registered Social Landlords (RSLs) in the Builth Wells area identifying sites suitable for housing. We have also represented many site owners in the Builth area in relation to the previous consultations for the Powys County Council Unitary Development Plan (PCC UDP 2010). As a practice we have also made our representations via the Powys County Council Strategic Housing Partnership as well as the Joint Housing Land Availability Study (JHLAS).

We have monitored the delivery of housing across the county of Powys over the last 15 years in doing so we have consistently challenged the Local Planning Authority (LPA) to allocate tracts of land which are realistically deliverable for housing within the relevant plan periods, We are the largest indigenous architectural practice in the county that has delivered mass housing as well as one off houses within Powys so are very well placed to make comments about deliverable land parcels within the county.

[....]

In terms of housing numbers we note that Builth Wells was considered an appropriate settlement for the delivery of 203 dwellings over the plan period of the UDP 2001- 2016. This target was never achieved due to the aforementioned sites not coming forward.

It is therefore surprising that there are now only 131 houses allocated within the LDP plan period to 2026 Where have the projected households from the UDP that wanted to live in Builth Wells gone to? We believe the main reason for the lack of delivery of housing over the UDP plan period for Builth Wells was that the majority of land allocations were not available or could not have been delivered without major infrastructure improvements, such as the installation of a major roundabout un the case of PCC UDP 85 HA7 In simple terms the site could not be delivered because, even at the height of the housing boom, its delivery was economically unfeasible The point being therefore why are these sites still being included for development when one could argue the economic environment for doing so in the future is never going to resemble that of the early to mid 2000s ever again?

We challenged the housing numbers for Builth Wells going forward as part of our contribution to the Strategic Housing Partnership and at JHLAS where we have consistently made the point that the Local Authority is reliant on outdated and misrepresented data The assessment of housing need has not been undertaken on a sufficiently micro level in order to fully investigate the precise need in most settlements in Powys As an illustration of this, Llandrindod Wells has been allocated 398 dwellings over the plan period and while it is acknowledged that Builth Wells is slightly smaller than Llandrindod, the aspirations for the former settlement are very much greater than the latter settlement. Therefore to be proportionate we believe 200+ to be a more accurate reflection of demand.

[....]

The Revised Deposit Draft LDP includes parcels of land within Bulith which are not deliverable. This is evidenced by the fact that these parcels of land have been included for some time within Development Plans. While these parcels of land are now being designated as white land' it is obvious they are being relied upon to form part of the buffer number of houses coming forward during the plan period it designated sites are not built out. This provides a distorted view of the housing land allocation for Bulith Wells over the plan period. There is no clear evidence base for the inclusion of some of these parcels of land as to why they have been promoted despite comments to the contrary by some of the authors of the LDP. We therefore have challenged, and will continue to challenge, the inclusion of these parcels of land for their

by: Representation No

Rep'n/Para/Policy AccessnNo DateLodgd Late? Status Modified Summary

1552.V5 20/07/2015  Summary: Appendix 1 – Settlement Allocations - housing numbers in Builth

Source: Email Type: Objection Mode Written Status Maintained

inclusion for quite arbitrary reasons. This is why we believe PCC LDP P08 HA2 (A,C&D) should be omitted as it has not been delivered despite being included in development plans for 20 years.

The final issue that we raise is in terms of the data upon which the LPA has based its judgement. There is a clash between two fundamental documents upon which the Local Authority has based its numbers. These are the LHMA 2015 which states that Builth Wells and Llanwrtyd Wells have an affordable housing target of 20 dwellings per year. However according to the Powys County Council LDP and CIL Assessment of 2014 only 204 dwellings have been allowed for in total for Builth Wells and Llandrindod Wells. 20% of these shall be affordable which shall equate to approximately 40 dwellings in total. With this in mind we continue to have no confidence in the data upon which the Local Authority has based its projections as it is fundamentally incorrect and therefore Builth Wells needs a larger allocation number.

With all of the above in mind we are of the opinion that the sites that have been both zoned for housing within the PCC LDP 2015 as well as the white sites' be reconsidered in the light of this statement. The site that we are promoting for including within the LDP is truly deliverable over the plan period and it has been recognised by the LPA in previous stages of the LDP that the whole of site 579 is entirely viable.

Council Response:

0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: The next stage of the Local Development Plan needs to be changed to accommodate the extension to land parcel P08 HA3 as per the Initial Deposit Draft All of the site was scored green at candidate site stage and has not obstacles to development. This is a parcel of land that is truly deliverable over the plan period for housing In addition land that has no prospect of being delivered over the plan period should not be included within said plan such as the whi(e land defined in the PCC LOP 2015 but best described as PCC UDP HA5 and HA7. The inclusion of these parcels of land has not been promoted by neither the land owner nor any other body. The inclusion of this land distorts the opportunity of the settlement of Builth Wells to deliver housing up until 2026. Therefore we ask for these parcels of 'and to be removed.

Also land that is not deliverable and has been in the PCC 1997 and 2010 plans should be omitted such as P08 HA2.

Council Response:

0

**Question: 4b Reason For Request To Speak At Hearing And Subject**

Representation Texts: I wish to speak at the public examination as I am of the opinion that the deliverability of sites included in the LDP at this stage has not been tested sufficiently. It shall also allow all interested parties to debate the plan of Builth Wells in terms of residential land opportunities for the benefit of the town.

Council Response:

0

Representation Texts: Assessment of the Suitability of the Site for Development

The site and its surroundings

The proposed site on land to the south of Willow Glade is located within the existing settlement boundary of Llanigon, approximately 2.5km to the south-west of Hay on Wye. The site extends to an area of 0.98ha and is currently comprised of agricultural land used to graze sheep and horses. It is evident that the topography aspect and general location of the site ensures that its development would neither represent an encroachment of the open countryside nor damage the character of the surrounding area.

The boundaries to the site are distinct and the site is defined:

- to the north by the Digeiddi Brook. A 10m buffer area, which follows the natural topography of the northern part of the site, is maintained to the north of the site;
- to the east by the main Hay-on-Wye to Velindre Road;
- to the south by hedgerow which provides a strong defensible boundary;
- to the west by a deep ephemeral channel / ditch.

The site forms a natural extension to existing residential development at Ash Grove and Willow Glade directly north of the site. Land directly adjacent to the site to the south is used for agriculture and beyond this small field lies the farm track to Llanthomas Farm. The land adjacent to the north west of the site at Llanthomas Lane benefits from an extant planning permission for a residential development of four dwellings (ref. P/2008/1607). Further existing residential development lies to the west of the site (i.e. Brooklands (including planning permission for a single new dwelling within its curtilage), Llanthomas Farmhouse and buildings and Llanthomas Lodge).

Existing UDP Allocation

The proposed site is currently allocated in the Powys Unitary Development Plan (UDP) (reference number B21 HA1) for an indicative number of 16 dwelling.

The site was therefore previously assessed by Powys County Council, who at that point in time, determined that the site was suitable for development. Accordingly, no significant site constraints were identified by the Council through their detailed site assessment.

This allocation reflects the Local Authority's (as endorsed by the Independent UDP Inspector) preferred distribution of growth and development throughout the County. As acknowledged in the LPA's pre-application advice for this site in 2010, it is based on the principle of providing appropriate opportunity for development whilst also ensuring that the scale of development proposed reflects the ability of the settlement and community to accommodate further growth. The UDP's allocation of the site for residential development therefore confirms that the principle of residential development within the settlement, and more specifically on the proposed site is acceptable and appropriate.

The proposed site is the only site within Llanigon allocated within the Powys UDP for residential use. Allocations within the UDP were made following the Council's thorough

Type: Objection

Mode Oral (Examination)

Status Maintained

assessment of development options within the settlement. Accordingly, the allocation of the proposed site confirms that the Council considers that this site is genuinely available and suitable to provide for residential development.

Likewise, as the UDP did not allocate any further sites within Llanigon, this confirms that there are only limited opportunities for only very small scale infill development within the settlement. The development of the proposed site, at an appropriate scale and density, is therefore considered vital to provide for the needs of the local community, as there are no other genuinely available significant sites for development.

It is considered that the site is appropriate, acceptable and moreover will have a positive impact on providing for Llanigon's housing needs and supporting the viability of both existing and future services within and in locations surrounding the village and it is therefore considered that there is no reason why the site should not be re-allocated in the council's LDP.

#### Candidate Site Assessment

Land to the south of Willow Glade was submitted as a Candidate Site as part of the LDP process (ref. 1189). Given that the settlement of Llanigon is proposed to be designated as a 'small village', it did not proceed into the Candidate Sites Assessment.

#### Outline Planning Application

An outline planning application for 'Phase 2' of the site at Willow Glade, Llanigon (ref. P/2012/1214) was submitted to the council in August 2012 and is currently pending consideration.

A pre-application meeting was held on 8 February 2010 with Powys County Council (PCC) to discuss the key issues regarding the proposed development. Following this meeting, a formal letter was issued by PCC dated 19 February 2010, which outlined their formal pre-application response to the proposals (Appendix 1). Further and subsequent dialogue in respect to the site has been had since this meeting and in parallel with dialogue over the proposed approved development at Llanthomas Lane.

Without prejudice, this meeting, and the subsequent letter, confirmed that PCC consider that the principle of residential development on the site is acceptable - commensurate with, and not least given, the allocation of the site within the Development Plan.

Further assessment of the suitability of the site to provide for development has been submitted to the Council as part of the current application on the site. The position in respect to the key material considerations/issues and is outlined below:

#### Highways/Access

Vehicular access to the development site is proposed to be provided via the main Hay on Wye to Velindre Road. The current access arrangements demonstrate there are no highway or transportation reasons that would preclude the proposed development of the site.

In principle, the Highways Authority have confirmed that the strategic site access is acceptable and that the required visibility requirements can be met. The proposed site is therefore considered to be acceptable in highways terms.

#### Ecology

The site has been subject to a Phase 1 Ecological Survey prepared by Just Mammals Consultancy (Appendix 2). In summary, the survey confirms the following:

'Assessed against the proposed development, the main field has limited wildlife interest and is considered to be of low ecological value. However, the Dgeddi Brook and adjoining

by: Representation No

Source: Email

Type: Objection

Mode Oral (Examination)

Status Maintained

banks which lie immediately to the north of the application site have local wildlife interest. The hedgerow also has local wildlife interest...' (Paragraph 1.2)

Having regard to the key conclusions, the report makes the following conclusions and recommendations:

- Where possible, the hedgerow on the eastern boundary of the site must be retained and managed appropriately with considerations for highway safety and visibility;
- The main site itself is semi-improved grassland and holds limited wildlife value. Development would not result in undue biodiversity loss;
- The broad-leaved trees along the banks of the Digated Brook have a high biodiversity value, as well as the banks along the brook – which ought to be protected by an ecological buffer zone (note that this corresponds with the C2 Flood Zone and is 'designed in' to the proposed indicative layout accordingly, with no development being proposed within this area). This area is to be enclosed and will not be accessible for human access so that an undisturbed area for wildlife is created;
- The landscaping scheme for the site ought to consist of new tree planting of only native broad-leaved trees; and
- A series of bat and bird boxes ought to be installed on existing trees.

It is evident from the ecological survey that there are no 'in principle' constraints to the development of the site from an ecological perspective. The proposed site is therefore considered to be acceptable in terms of ecology.

#### Flood Risk

In determining the need for flood risk assessment of the proposals and, accordingly, whether flood risk is a material consideration in the evaluation and consideration of these proposals, the planning history, context, and chronology relating to the surrounding area needs to be taken into account.

Planning permission has been granted for a nearby, but unrelated / separate, site in the applicant's ownership (planning permission ref. P/2008/1607 granted in November 2009).

The permission for this 'Phase 1' site followed considerable evaluation of the flood risk position relating to those proposals (for 4 dwellings). Some time subsequent and post approval of this 'Phase 1' site / proposals, questions were raised regarding the integrity of the flood consequences assessment underpinning that approval - initially by third parties, and subsequently by the Environment Agency (EA).

Given, and in light of this position, an alternative strategy/approach for bringing forward the development potential of the applicant's land was discussed with all interested parties (most notably the EA and PCC). This dialogue included and centred upon bringing forward a planning application and subsequent development (if approved) of the separate and independently allocated 'Phase 2' site.

An/the option discussed and agreed was to bring forward development on the 'Phase 2' site - the site area for which would be devoid of any area having a flood risk constraint according to recent hydraulic modelling and the TAN 15 development advice map. This position/option was discussed in detail at a meeting on 12th May 2010 involving the main interested parties (the Environment Agency, Powys County Council, and the applicants). The outcome of this meeting and dialogue was subsequently documented in a letter from the Environment Agency to the applicant dated 19th May 2010.

As the letter documents the agreed approach was to bring forward a planning application "which would not have any flood risk constraints". Such an application could be taken forward while matters relating to the Phase 1 site were investigated and progressed separately (as they continue to be). This was, as the letter documents, considered "a pragmatic way forward" and a "viable option." The EA, having reviewed the position subsequent to the meeting (an action agreed in the meeting) documented in the letter that "the only option open to the applicant to progress an application without any further assessment of flood risk is to continue with the Phase 2 area". The letter goes on to record that the site area for this proposal would need to be "outside the 0.1% flood outline this and the unmapped ditch/watercourse would not impact on phase 2".

Information was submitted to the Council in June 2014, which demonstrated that during the extreme 0.1% design event on the Digated brook, including appropriate blockage scenarios, there will only be a small encroachment of flood waters at the north east of the site. Natural Resources Wales (NRW) have since confirmed that this is within the tolerable conditions set out in TAN15 and that this can be mitigated for at detailed design stage, if necessary. Having reviewed and checked the information (modelling and hydrology) behind these outputs NRW have confirmed that they do not require any more information through the planning process and have subsequently withdrawn their objection, confirming that flood risk no longer considered to be a constraint.

#### Other Material Considerations/Technical Matters

It has been established as part of the detailed appraisal of the site and consultation process undertaken on the planning application that there are no technical or other constraints to the site i.e. in drainage, landscape or other terms. The planning application process has evidenced and established how an appropriate and well-designed scheme can be

brought forward for and delivered on the site – making a significant and valuable contribution to housing land supply and the village.

#### Summary of the Suitability of the Site for Development

As outlined above, and within the supporting reports which accompanied the application for the proposed site on land to the south of Willow Glade, Llanigon, these representations put forward a site which is considered to be suitable for residential development.

In summary therefore, the site is considered to be suitable for residential development for the following reasons:

#### Existing allocation

- The site was allocated in the Council's UDP for housing, and has therefore been assessed by the Council as suitable for development;
- This allocation reflects the Local Authority's (as endorsed by the Independent UDP Inspector) preferred distribution of growth and development throughout the County and confirms that the principle of residential development within the settlement, and more specifically on the proposed site is acceptable and appropriate;
- The proposed site is the only site within Llanigon allocated within the Powys UDP for residential use, which confirms that the Council considers that this site is genuinely available and suitable to provide for residential development and is vital to provide for the needs of the local community;
- It is therefore considered that there is no reason why the site should not be re-allocated in the Council's LDP.

#### Outline Planning Application

- A pre-application discussion regarding this site confirmed that PCC consider that the principle of residential development on the site is acceptable - commensurate with, and not least given, the allocation of the site within the Development Plan.

#### Highways/Access

- The current access arrangements demonstrate there are no highway or transportation reasons that would preclude the proposed development of the site.
- In principle, the Highways Authority have confirmed that the strategic site access is acceptable and that the required visibility requirements can be met.
- The proposed site is therefore considered to be acceptable in highways terms.

#### Ecology

- A Phase 1 Ecological Survey has confirmed that the main field has limited wildlife interest and is considered to be of low ecological value. Dgeddi Brook and adjoining banks, immediately north of the application site, and the hedgerow have been found to have some local wildlife interest.
- The survey demonstrates that there are no 'in principle' constraints to the development of the site from an ecological perspective and that the site is considered to be acceptable in terms of ecology.

#### Flood Risk

- Following questions raised regarding the integrity of the flood consequences assessment underpinning the approval of the 'Phase 1' site, it has been proposed that development on this site will be brought forward only on land devoid of flood risk constraint according to recent hydraulic modelling and the TAN 15 development advice map.
- The area at risk of flooding, located to the northern boundary of the site will remain free from any development, which ensures that the development has no impact on the existing flood risk position. The development will therefore not have any flood risk consequences.
- With regards to 'phase 1', Natural Resources Wales (NRW) have now confirmed that it is within the tolerable conditions set out in TAN15 and have subsequently withdrawn their objection, confirming that flood risk no longer considered to be a constraint.

In light of the above, the site is in our view suitable for allocation for housing development, given its previous identification by the council as a suitable location, its ability to

Question

Representation Texts

**Question: 3d. (i) Representation Details**

Representation Texts: The proposed site on land to the south of Brooklands (Candidate Site no 1186) is located within the existing settlement boundary of Llanigon, approximately 2.5km to the south-west of Hay on Wye. The site extends to an area of 0.33ha and is currently comprised of agricultural land used to graze sheep and horses. It is evident that the topography aspect and general location of the site ensures that its development would neither represent an encroachment of the open countryside nor damage the character of the surrounding area.

The boundaries to the site are distinct and the site is defined:

- to the north by residential development at Brooklands and agricultural land;
- to the west by an access road off Llanthomas Lane;
- to the south by Llanthomas Farm and buildings and hedgerow which provides a strong defensible boundary;
- to the east by a deep ephemeral channel / ditch.

Land to the north of the site at Llanthomas Lane benefits from an extant planning permission for a residential development of four dwellings (ref. P/2008/1607), and there is further planning permission for a single new dwelling within the curtilage of Brooklands. Land to the east of the site south of Willow Glade is currently allocated in the existing Powys UDP for 16 dwellings (B21 HA1) and has been submitted as an outline planning application, currently pending consideration (ref. P/2012/1214). Further existing residential development lies to the south at Llanthomas Farmhouse and buildings and Llanthomas Lodge. This site would therefore form a natural extension to both existing and proposed development within the village of Llanigon.

Candidate Site Assessment

Land to the south of Brooklands was submitted as a Candidate Site as part of the LDP process (ref. 1186). Given that the settlement of Llanigon is proposed to be designated as a 'small village', it did not proceed into the Candidate Sites Assessment.

Summary of the Suitability of the Site for Development

As outlined above, these representations put forward a site which is considered to be suitable for residential development.

In summary therefore, the site is considered to be suitable for residential development for the following reasons:

- The topography aspect and location of the site ensures that its development would not represent an encroachment of the open countryside or damage the character of the surrounding area;
- The site would form a natural extension to existing development at Llanthomas Farm to the south, sites with extant planning permission to the north and proposed development at land south of Willow Glade to the east;
- There are no economic constraints which will affect the development of the site within the plan period;
- The landowner is in agreement with the proposed land use of the site;
- Llanigon plays an important role in providing for the local community, whilst also making use of a number of facilities and employment opportunities in surrounding settlements, including Hay on Wye. The development of this site would help sustain the viability of these existing facilities and would furthermore likely encourage further services.

Document:Draft Deposit Written Statement 2015, p.76

Site: 203/5404/P24 HA1 Site adjacent to Shirley, Knighton

Issue: 2015: Deposit Draft-11. Allocated Sites

*Question Representation Texts*

**Question: 3d. (i) Representation Details**

Representation Texts: The allocation of land adjacent to Shirley, Ludlow Road, Knighton for 24 dwellings (P24 HA1), as illustrated in the Deposit LDP inset map for Knighton, is welcomed and supported.

Current status of the site:

The Council resolved to grant outline planning permission for 24 dwellings on the site in January 2009 (ref. P/2009/0038) (Appendix 1). The recommendation to approve the scheme was conditioned to a legal agreement securing eight affordable housing units, an amenity area maintenance contribution and the provision of amenity space in perpetuity.

An application for approval of reserved matters application has not yet been submitted to the Council given that this condition and level of affordable housing provision is considered to make the scheme unviable.

Further to dialogue between the applicant and the Council regarding the re-negotiation of the S106 affordable housing contribution, a viability assessment has been undertaken and was submitted to the Council in March 2015 (Appendix 2).

This assessment confirmed that the development with all open market housing would only deliver a profit of 6%. This falls well below the expected/required profit margin to make such a residential scheme viable, which should at a minimum be 15% but realistically at around 20%. The expected 6% profit quantified in the Assessment is only viable in this case because the developer is also the existing land owner, and has committed to the development – albeit is unable to progress the development given the viability position.

In addition to this, the assessment confirms that with the provision of eight affordable units (as presently required by the S.106 agreement) the development would result in a loss of £57,083. It has been sufficiently demonstrated therefore that the viability of the site is not only compromised, but moreover eradicated wholly by the proposed affordable housing provision.

The client is still awaiting the Council's response to this submission, however is eager to continue discussions with the aim of bringing the site forward as soon as possible.

An application has recently been submitted to the Council (ref. P/2015/0527) for 43 dwellings on a site just to the north of the allocated site in question.

In contrast to the allocation, this application site to the north is affected by a number of constraints, including a SSSI along the northern boundary and its location within Flood Zone C2 / 3 - as shown in the TAN15 and NRW flood map.

Clearly the existing housing land supply shortage is a factor that weighs heavily in favour of facilitating the bringing forward of additional housing – resulting in an evident pressure in Knighton to bring forward unallocated and heavily constrained sites such as this. This application site was furthermore rejected by the Council at candidate stage (ref. 778), with the Council citing in its assessment of the site its location in the flood plain and stating that "the allocation of this site is not necessary to meet the growth, apportioned by the

Source: Email		Type: Support		Mode	Oral (Examination)	Status Maintained

strategy, of the village over the plan period.”

It is considered that this situation serves to further illustrate the importance and urgency in securing the permission on this suitable and allocated site, which would ensure that the immediate need within Knighton is met swiftly (if and when rendered viable), without having to approve further sites in the local area such as the one above.

Suitability of the site

In light of the above, the site (at land adjacent to Shirley) continues to be promoted and be available for development. It is highly suitable for housing, being located within the settlement boundary of Knighton, which has been designated as a town in the Deposit LDP. The Council considers towns to be important service centres, as they provide a range of services, facilities and employment and are the most accessible. They are consequently seen as the principal locations for accommodating housing.

In this regard, we have noted that the site at Ludlow Road was assessed positively in the Sustainability Appraisal Report (2015) supporting the Deposit LDP and moreover, performed well in the LDP Strategy Topic Paper (2015), scoring a maximum 10 points for its range and offer of main facilities.

It has been established as part of the detailed appraisal of the site and consultation process undertaken on the planning application that there are no technical or other constraints to the site i.e. in drainage, landscape or other terms, as set out below:

Noise

- An acoustic report was submitted with the application given the proximity of the site to Knighton Enterprise Park.
- Subject to conditions securing the implementation of a condition requiring the implementation of the mitigation proposed within the report, the Council's Environmental Health Officer has confirmed that the amenities of the proposed residential units will be safeguarded.

Scheduled Ancient Monument (Bryn-y-Castell)

- Following the removal of four units located closest to Bryn-y Castell from the initial proposed development, Cadw have confirmed that the setting of the scheduled ancient monument has been safeguarded.

Highways

- The Highway Authority has confirmed that, subject to conditions securing a safe access, they have no objections to the proposed development of this site.

Further considerations

- In addition to the above, no objection has been raised to the development of this site from the Environment Agency or Severn Trent Water.

The planning application process has evidenced and established how an appropriate and well-designed scheme can be brought forward for and delivered on the site – making a significant and valuable contribution to housing land supply and the town. Given the above points, it is clear that the site is located within a sustainable location, and would in itself comprise a sustainable development. It is in addition evident that the council supports this view, given that the development has been granted outline planning permission and moreover has been allocated to be brought forward for housing development in the Deposit LDP. In addition to the above points supporting the suitability and deliverability of Land Adjacent to Shirley, Knighton, it is considered that the evidenced requirement for an increase in the overall housing numbers gives further weight to the continued need and allocation of this site in the Deposit LDP.

Question Representation Texts

**Question: 3d. (i) Representation Details**

Representation Texts: 34.104 Appendix 1 – Settlement Allocations

Although we welcome the issues and infrastructure requirements that have been identified for the individual settlements in the Plan area, we have the following comments.

1. A number of the allocations in appendix 1 are identified as requiring ecological surveys. Notwithstanding the site specific comments below, we broadly agree with the requirements for those allocations where ecological surveys have been identified but we advise that a number of additional allocations are likely to require ecological surveys to inform applications on the sites. We therefore suggest a comment is added to the beginning of Appendix 1 to state that 'It is likely that many of the allocations in this list have the potential to support protected species and/or other features of biodiversity interest. The table identifies the sites where ecological surveys are known to be required. However, as there will be no previous records available for some sites and therefore uncertainty regarding the presence of protected species and features of biodiversity interest at many of the sites where no ecological survey is currently identified, the applicant is advised to consider whether an ecological survey is required when preparing a scheme to be submitted for planning permission, and to ensure that all the necessary information is submitted in support of an application to enable its likely impacts to be assessed '

2. A number of the allocations in appendix 1 are identified as requiring a Habitats Regulations Assessment (HRA). We agree with the HRA requirements for these allocations, but the European sites are also designated as Sites of Scientific Interest (SSSIs) where the designated features of the SSSI may be different to those for the relevant European sites. In such instances there may also be a need to assess the potential for adverse effects on the associated SSSI. We therefore suggest a comment is added to the beginning of Appendix 1 to state 'A Habitats Regulations Assessment for European sites will be required at the project level for a number of the allocations in Appendix 1. An assessment of the effects of the project on the Site of Special Scientific Interest (SSSI) associated with these European sites may also be required, particularly where the features of the SSSI are different to those of the European site'.

**Question: 3d. (i) Representation Details**

Representation Texts: We consider that for clarity the Issues / Infrastructure column in Appendix 1, Site Ref P51 MUA 1 should make it clear that the delivery of affordable housing and other developer contributions in respect of this site will depend on the financial viability of the site. The viability of this site is particularly constrained by the contamination onsite.

In this regard, the NPPF requires development plans to be realistic (see paragraph 154) and positively prepared with strategies which are justified and effective (paragraph 182). In justifying the proposed strategy councils are required to promote the most appropriate strategy, rather than merely an acceptable strategy. In this case we believe that it is important to seek to make full use of redundant previously developed land in the JCS area. To do otherwise will mean that there is a prospect that the housing requirements set out in the plan will not be delivered in the plan period.

Question Representation Texts

**Question: 3d. (i) Representation Details**

Representation Texts: P57 EC1  
Glandwr Cymru - the Canal & River Trust in Wales would like to provide the following comments in respect of the employment site allocation ref. P57 EC1 - Land at Buttington Cross Enterprise Park, Welshpool.  
It is essential that we are fully consulted at an early stage in respect of any further development proposals on this site, which lies immediately adjacent to the Montgomery Canal. We are pleased to note that Appendix 1 acknowledges the need to screen the impact of any proposals under Habitats Regulations Assessment legislation, and this should include all potential impacts on the biodiversity of the Montgomery Canal Special Area of Conservation as a habitat for wildlife including the European protected species of floating water plantain "luronium natans". Potential impacts include changes to the water quality as a result of surface water entering the canal both during construction and following completion, changes in shading of the waterway as a result of built development or landscape planting, and increased use of the waterway as a result of new development.

Issue: 2015: Deposit Draft-11. Allocated Sites

Question Representation Texts

**Question: Council Response**

Representation Texts: The Council disagree with the proposed changes requested by the Representer. The representer does not raise any new issues or evidence which lead the Local Planning Authority to change its conclusions. The housing allocations proposed in Rhayader are located in what is considered to be a sustainable location accessible to local facilities and services. The Council is unaware of any technical and or environmental constraints that prevent the development of these sites. In addition to the allocation of housing sites in Rhayader there is a presumption in favour of development within the entire settlement boundary and therefore housing development could come forward on more central sites despite land not being allocated centrally.

Council Response:

0

**Question: 3d. (i) Representation Details**

Representation Texts: The Respondent makes these comments with regard to the Settlement Allocation for Rhayader only. The Respondent has major concerns that the Settlement Allocation has not addressed the Key Issues, Policies and Objectives set out in the LDP Deposit Draft (LDP DD) 2015, with regard to the future housing mix within the Settlement and more specifically, for market housing. The Respondent considers that the two Housing Allocation sites P52 HA1 & HA2 will not fulfil the identified housing need for the Settlement as per the Local Housing Market Assessment 2010 (LHMA 2010) and the 2014 Update. It is recommended, in both reports that dwellings for elderly households should consist of bungalows or flats with lift access. With the LHMA 2010 recommending that some 29% of housing provision in LHM5 should be made up of such dwellings. This is continued in the 2014 Update where it is recommended that dwellings for elderly households should consist of bungalows or flats with lift access. Whilst the Respondent welcomes the Key Issues, Policies and Objectives laid out in the (LDP DD) and does not dispute their soundness, the following schedule lays out those sound Key Issues, Policies and Objectives elements of the (LDP DD), which the Respondent believes have not been fully considered during the Allocation selection for Rhayader:

- 1.Key Issue 17 - Where possible, development should be directed to appropriately located brownfield sites (previously developed land).
- 2.Key Issue 19 - The needs of the oldest in the population, such as access to services, public transport, and accommodation requirements must be taken into account.
- 3.Key Issue 22 - The LDP will need to consider how its policies can assist in the construction of dwellings in order to meet need.
- 4.Key Issue 29 - A combination of high house prices and a low wage economy makes housing unaffordable to a significant proportion of Powys households. N.B. This Key Issue should also take into account that not all housing requirement will be affected by this constraint (LHMA Update 2014 states that 68.7% of Powys householders own their own home, 44% of whom own their home outright).
- 5.Key Issue 30 - Innovative policies to enable house builders in the private sector to provide affordable housing should be considered through the LDP. N.B. It should not be forgotten that the provision of high quality, more salubrious properties will fulfil an identified need for those 68.7% of homeowners/other higher earners, who will looking to move on and upgrade to larger properties. The homeowners in this category will vacate market housing within the price range of those on lower incomes, therefore assisting with the provision of starter/ more affordable housing stock.
- 6.Key Issue 32 - direct development to accessible locations which ideally provide a choice of transport modes such as walking, cycling and public transport. N.B. The Respondent appreciates that this key issue pertains mostly to the Settlement Hierarchy that the (LDP DD) has established. However, the provision for the elderly within a Settlement must also follow this principle. Rhayader & Cwmdaudwr have steep gradients and as such the position of the existing elderly housing proves problematic, eventually (with reduced mobility) this leads to a decrease in access to services and greatly increases the risk of isolation for this vulnerable group. The LDP DD should therefore address the current problem and allow for more suitably located development provision for those in this category.

7.Key Issue 33 - The LDP will need to direct development to locations that are best served by existing and potential infrastructure and services and to ensure that the location of development is co-ordinated with the review of public service provision.

8.Objective 1 (i) Meeting Future Needs - to provide adequate, appropriately located land for - which will meet all the housing needs of Powys increasing and ageing population and its decreasing size of households, including open market and affordable housing .

9.Policy H2 (1)(i) Provide a suitable mix of housing types to meet the range of identified local housing needs.□

The two sites that have been allocated in Rhayader are not suitable to provide the identified need for an increasingly elderly population. This unsuitability is due to due to the distance of each site from the facilities and amenities (which are all concentrated in the centre of the town) and the very steep gradient at P52 HA1. Neither allocated site lends itself to assist those with reduced mobility and/or without access to a vehicle.

The Housing Allocation for Rhayader as it stands does not fulfil the Key Issues, Policies and Objectives identified in the (LDP DD). The assessment and selection process has not been adhered to and therefore is not sound.

Council Response:

0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: The Respondent asserts that the criteria for Settlement Allocation should be re-visited with regard to Rhayader. It is apparent that alternative Candidate Sites (when measured against the criteria laid out in the (LDP DD) and detailed in 3d) i above) would be eminently more suitable to Provide a suitable mix of housing types to meet the range of identified local housing needs, albeit in addition to P52 HA1 & HA2.  
The Respondents comments at 35.86, regarding the suitability of Candidate Site 916 in this respect provides further information.

Further detail regarding alternative, yet suitable sites in this respect has also been given by the Respondent at Rep35.86.

Issue: 2015: Deposit Draft-12. Alternative Sites

Question Representation Texts

**Question: 3d. (i) Representation Details**

Representation Texts: Assessment of the Suitability of Site for Development  
The site and its surroundings

The site encompasses an area covering 2.09ha which includes:

- a site with planning permission for 3 affordable housing units;
- a site with planning permission for turning head/access road;
- a site with planning permission for a single dwelling;
- agricultural pastureland;
- two access points – one off Jacks View and the other off Orchards End Lane;
- the residential curtilage and orchard associated with the existing residential property (Orchards End) which occupies part of the site.

Candidate site assessment

The proposed land at Orchards End and Jacks View in Norton was submitted as three separate parcels into the Candidate Sites stage of the LDP process.

The below are extracts from the Candidate Site Status Report, which was published by the Council on 20 December 2013 and identifies the initial assessment carried out on each individual candidate site submitted to the Authority.

Candidate Site no.84 – Land to the west of The Gables, Norton

Site lies adjacent existing built form along its eastern boundary in addition to falling within the setting of one or more listed buildings, most notably 'the Gables'. Consequently, the appropriateness and acceptability of development type and design of the site will need to have considerable regard to the setting of the listed building.

The site could represent a neat addition to the settlement in a western direction although, highways access appears a major constraint. However, the site would likely require the provision of footways and cycle paths to enable more cohesivity and connectivity with the wider settlement. Any application for development would likely be required to be accompanied with an Ecology survey. Additionally, Welsh Water have responded to a stakeholder consultation of the site noting a public sewer traverses the site which would require an easement width or diversion.

Candidate Site no.174 – Plot 1 South of Orchards End, Norton

Site currently falls within the UDP development boundary although, acceptability of development of the site as a whole has not been tested in a planning application. There is an extant planning permission for a house and garage (P/2009/0791) and should this be completed, there is no obvious point of access to the site from the B4355 highway. The site is bounded by existing built form on the east and south with no scope of access from either of these directions. Having consulted the highways department, the site appears to

Type: Objection

Mode Oral (Examination)

Status Maintained

have no adopted road frontage from which to achieve access, a constraint which would need a resolution before development at the site could be considered acceptable and/or appropriate. The site is largely disconnected from the settlement, rather representing the appearance of residential curtilage although, could be brought into more visible connection with the settlement via footway and cycleway provision, in addition to sensitively scale design. There may be concerns that this site represents backland development although, that could be tested and simply serve to limit the scale of development acceptable at the site. Development of the site may potentially represent a costly venture given Welsh Water have stated that the water mains are some distance away and a public sewer traverses the site requiring an easement width or pipe diversion which raises questions as to whether development of the site is economically viable.

Candidate Site no.175 – Plot 2 North of Orchards End, Norton

At the sites southern boundary it adjoins the current UDP development boundary and given the scale of the site, could represent a neat addition to the existing built form in this vicinity.

The site is centrally located within the settlement and could quite simply connect to existing footpath infrastructure perhaps with provision of cycleways to again improve the cohesivity and connectivity of the site with the settlement. There is currently a planning application for 3 affordable terraced homes (P/2013/0278) within the eastern area of the site currently awaiting determination. Additionally, there is an approved planning permission using the same access as above although to the south of the site (P/2009/0791). Given the existing residential units along this road in addition to individual applications to develop residential properties on a plot-by-plot basis may serve to constrain the access for the site and offer limited scope for improvements should highways adoption become a desirable outcome for the developer/landowner. Having consulted the highways department, there is presently no adopted road frontage from which to achieve access thus, adoption would likely be required to enable the development of the site.

The following are the key comments / findings in respect of the inherent suitability of the site(s) in location and built form terms:

Northern section (no. 84):

- Could represent a neat addition to the existing built form in this vicinity;
- The site is centrally located within the settlement and could quite simply connect.

Southern section (no. 174):

- Site currently falls within the UDP development boundary;
- The site is bounded by exiting built form on the east and south.

Central section (no. 175):

- Site lies adjacent existing built form along its eastern boundary;
- Could represent a neat addition to the settlement in a western direction.

With regard to the comments made regarding the potential highways constraint to the sites, it has been confirmed through the application process, subsequent to the Council's assessment, that access and visibility to the site are considered acceptable. The proposed access has therefore been approved for adoption.

Outline Planning Application

The land at Orchards End and Jacks View has been submitted to the Council for planning permission for approximately 31, mainly detached dwellings and is currently pending consideration. The initial submitted planning application was accompanied by a detailed assessment of the site, as summarised below:

Ecology

- A Phase 1 Habitat Survey has demonstrated that the site does not fall within any statutory or non-statutory designations - neither do any of the adjoining land / fields /

Mode Oral (Examination)

Status Maintained

developments;

- The majority of the site comprises semi-improved grassland or improved grassland with limited ecological interest and none of the affected habitats are of greater than local value for wildlife;
- Any adverse impacts arising from the development of the site are therefore considered likely to be confined to the local context only and would require only minimal mitigation;
- A further Ecology Method Statement for Great Crested Newts has found that whilst the majority of the site is extremely unlikely to be used by Great Crested Newt, the water body that lies approximately 28 metres north of the site has some potential to support them. A detailed method statement has been prepared to deal with, and mitigate against, the presence of Great Crested Newts;
- It is concluded therefore that the site would not have any significant ecological impacts, and as such, the development would be acceptable in this regard.

Flood Risk

- The Welsh Government's Technical Advice Note 15 – Development Advice Map, shown below, confirms that the site does not fall within an area of flood risk. The site is therefore considered to be acceptable in terms of flood risk.

Further assessments subsequent to application

In order to address initial concerns identified by the Council concerning the proposed site, further investigations and/or further detailed submissions/details have been undertaken, as outlined below:

Archaeology

- Evaluations undertaken by Archaeology Wales have identified that the site is largely devoid of archaeological remains with only a possible small parcel of interest in the very north eastern corner of the site. This would need to be the subject of additional, more detailed investigations in due course;
- It is therefore evident that archaeology is no longer a concern.

Listed Building

- The site is proposed on land adjoining a Listed Building;
- It is not considered that the development of the site would have a detrimental impact on the setting of this building – something which was supported by CPAT in their comments on the planning application (on 17th March 2014);
- It is not therefore considered that development on this site would materially harm the setting of the building – subject to detailed design.

Trees

- It is considered that built form can be appropriately and suitably accommodated within the tree context of the site without material harm. Where trees are removed, it is envisaged that suitable replacement specimens could be introduced, thus retaining and enhancing its character for the future.

Other Material Considerations/Technical Matters

It has been established as part of the detailed appraisal of the site and consultation process undertaken on the planning application that there are no technical or other constraints to the site i.e. in drainage, landscape or other terms. The planning application process has evidenced and established how an appropriate and well-designed scheme can be brought forward for and delivered on the site – making a significant and valuable contribution to housing land supply and the village and the role housing plays in supporting services and facilities.

In light of the above, the site is in our view suitable for allocation for housing development, given its ability to promote sustainable growth within the rural village of Norton, and the evidence undertaken showing the ability of the site to come forward.

Question Representation Texts

**Question: Council Response**

Representation Texts: The Council disagree with the proposed changes requested by the Representer. The Representer does not raise new issues or evidence which lead the Local Planning Authority to change its conclusions with regard to SLAs. Instead of using SLAs the Council has chosen to have an all-encompassing Landscape policy that makes use of LANDMAP this policy will be further developed through a Landscape SPG as set out in Appendix 2 of the plan.

Council Response:

0

**Question: 3d. (i) Representation Details**

Representation Texts: The Cambrian Mountains Society (CMS) thanks Powys CC for this opportunity to comment on the Deposit LDP. The Society's comments are general in nature and as such fall under reference point @34.1 but throughout the representation links will be made to other parts of the documentation. The Society's major concern with the LDP is that it does not follow local, national or international ideas on sustaining and enhancing areas of high value landscapes. Many of the points the Society address here were presented in its 2014 Deposit Stage Representation but these have evolved over the last year.

.....

Moving to the end of the Deposit document and referring to Appendix 2, @34.105, concerning the provision of SPGs, CMS suggests that either the forthcoming Landscape SPG includes a section on SLAs or, better, that there is a standalone SPG covering SLAs. Such guidance will be a vital element in running the County's new SLAs.

In conclusion CMS's preferred option for the Cambrians continues to be AONB designation, but it sees the setting-up of a network of SLAs across all three counties covering the Cambrian Mountains as a very positive move in safeguarding this unique landscape at the heart of Wales.

Council Response:

0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: Reviewing all the recommendations made in the above representation, in order to help the Powys LDP sit more comfortably with a Wales-wide approach. Notably taking into account the following organisation' work in maintaining and enhancing areas of high landscape value.

WG guidance,  
NRW advice,  
Neighbouring counties' provision of SLAs together with their linked SPGs.

....

Question Representation Texts

**Question: Council Response**

Representation Texts: Biodiversity: The Council is committed to producing an SPG on Biodiversity and will consider the Representation when it does so.

Landscape:

Renewable Energy: The Council is considering an SPG on Renewable Energy.

Timetable: No timetable can be given at the moment.

Council Response:

0

**Question: 3d. (i) Representation Details**

Representation Texts: 1. Biodiversity:  
PPW7 and TAN 5 require criteria based policies within the DDLDP. Supplementary planning guidance could be a useful vehicle to address necessary requirements such as site identification for potentially polluting developments. The desirability of supplementary planning guidance for biodiversity is set out in TAN 5 3.4.

2. Landscape:

Supplementary Planning Guidance (SPG) - Landscapes: The application of LANDMAP is already set out in LANDMAP Guidance Notes produced by the Countryside Council for Wales. SPG could usefully provide further clarification for planners regarding LANDMAP, but this SPG needs also to address the requirements of Articles 5 and 6 of the ELC:

- increasing awareness of the value of landscapes, their role and changes to them
- promoting training and education in landscape policy, protection, management and planning
- understanding the landscape baseline and identifying and assessing the landscapes within the scope of the LDP

This last point should include preparation of baseline cumulative maps for developments with significant landscape impacts, such as renewable technologies and large scale or industrial farming units.

LANDMAP should not be used in isolation as, although a useful tool, it exhibits considerable limitations in the visual and sensory appreciation of landscape– the aspect that most impacts on residents and visitors. Unlike other layers, such as geology or heritage, there are few quantifiable criteria for visual and sensory and a high degree of subjectivity is evidenced from the different observers. It is an unreliable measure when considering major planning applications with far reaching impacts.

6235.V24 20/07/2015  Summary: Appendix 2 - Supplementary Planning Guidance and Development Briefs

Source: Email

Type: Objection

Mode Written

Status Maintained

Landscape cannot be visually 'salami sliced' as it is seen within the wider context of the topographical boundaries that limit the viewers' perception. LANDMAP does not provide a measure of the value of a given landscape as part of the wider panorama and many developments in upland areas can be visible for some 20kms.

When considering landscape quality, reference should also be made to the areas for special protection as identified by Hobhouse in the seminal 1948 report. Large areas of upland Powys in Montgomeryshire and Radnorshire were proposed for designation and although, unlike England, Wales has been tardy in designation, this is an important guide to the quality of the landscapes and in many border areas is contiguous with and indistinguishable from that of the Shropshire Hills AONB.

3. Renewables:

We note Topic Paper paras 11 and 45 refer to the preparation of Supplementary Planning Guidance (SPG) being prepared for renewable energies. In view of significant problems currently experienced with wind turbine applications and the likely introduction of new technologies over the period of the plan CPRW believes SPG is essential and would welcome a commitment to its introduction in LDP Appendix 2 @34.105. SPG should address:

- Minimum application requirements: Other Welsh Councils, such as Ceredigion and Anglesey, have adopted Supplementary Planning Guidance (SPG) on renewable energy which provides clarity over the precise requirements of planning applications. Powys planners will be well aware of the need for clarity over what constitutes acceptable evidence to support a planning application, and of a tendency for some agents to provide inadequate information. The Planning Department will also be aware of the enormous local upset and the poor decisions which can result from failing to set out to applicants the acceptable minimum requirements for evidence.

- Assessment of impacts: Other councils' SPG also address methods to be used, for example, when assessing cumulative impacts, all of which would be helpful to planners and developers alike, and strengthen the protections afforded to residents who will suffer the negative impacts of approved developments. There is a need for Powys EHOs to better understand noise impacts, cumulative noise impacts and the information provided by agents/developers regarding noise impacts. For this purpose, cumulative maps will need to be prepared, as noted above.

CPRW believe clarification of requirements of applications and methods of assessment of impacts is essential for protection of residents through the correct determination of applications. Problems encountered in Powys in recent years, and failures to properly apply protections in national policy, bear this out.

SPG outlined in the UDP was never produced. A timetable must be included for provision of SPG.

Council Response:

0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts:

1. Biodiversity:

An indication of topics to be included in Supplementary Planning Guidance, to include site identification as above, and a date by which the guidance will be available.

2.Landscape:

In order to comply with provisions of ELC, SPG should address the following requirements of ELC:

- increasing awareness of the value of landscapes, their role and changes to them, including within Powys County Council

- promoting training and education in landscape policy, protection, management and planning, particularly amongst planning decision makers within Powys County Council, including planning officers, inhouse consultees and members of the planning committee,

Question Representation Texts

**Question: 3d. (i) Representation Details**

Representation Texts: Monitoring Framework

The monitoring framework (MF) needs to enable the progress of the plan's implementation to be measured, provide an early alert to avoid non-delivery and provide the basis for consideration of review.

Further consideration should be given to the following areas of the framework:

- The framework should monitor the deliverability of policies, as there is no policy linking to the spatial strategy; the framework is measuring an output with no policy included in the plan.
- The phasing of the development sites, their delivery, relevant triggers and associated action points. This would apply for example to housing, employment, Gypsy and Travellers, renewable energy, affordable housing. The trigger for "distribution of housing growth" for example is weak – the trigger should have definite actions depending on the percentages at each of the hierarchical tiers.
- The monitoring indicator concerning renewable and low carbon energy seems confusing. The sentence "This will help to achieve 100% renewable electricity production and 12% renewable heat production compared to that which is used domestically in the County by the end of the plan period" is confusing. It is also unclear how Buildings Integrated Renewables will be monitored.
- Targets and triggers should be included to ensure that key factors are delivered e.g. planning obligations how does this information relate to the viability assessment (5 contributions can be pooled); this will identify the shortfalls for the authorities. The triggers and actions are weak.
- In the context of LDP manual guidance (section 9.5) the ongoing LDP Process Refinement Exercise should be considered in finalising the MF; see at following link: <http://gov.wales/topics/planning/policy/guidanceandleaflets/ldp-process-refinement-report/?lang=en>

Question Representation Texts

**Question: Council Response**

Representation Texts: The Council agree to amend the monitoring framework to reflect issues raised in the representation. See Focused Change for details.

Council Response:

0

**Question: 3d. (i) Representation Details**

Representation Texts: Flood Risk – AMR 8  
 We wish to advise that the triggers and actions as drafted are not appropriate. The references to applications ‘...being approved contrary to NRW advice...’ should be removed. NRW are an advisor on many technical matters related to flood risk, however there are matters that need consideration in accordance with TAN15 that we cannot advise on, such as emergency plans, procedures and measures to address structural damage that may result from flooding.

The Dear CPO letter from Welsh Government dated 9th January 2014, as mentioned above, is relevant in this regard, as it sets out the role of Local Planning Authorities in identifying how a development proposal meets the tests set out in paragraph 6.2 of TAN15.  
 The text should therefore be amended to read ‘...applications in the floodplain in any given year are approved contrary to TAN15.’

We are concerned that the monitoring framework does not include an indicator, trigger and action to monitor the performance of the Plan against the protection and enhancement of biodiversity and geodiversity, and landscape as set out in Objectives 11 and 13 of the Plan. This omission represents a significant gap in the monitoring of the Plan and does not meet Test of Soundness CE3.  
 We therefore suggest the following amendments to the monitoring framework:

Relevant LDP Objective: 11  
 Relevant LDP Policy: DM1  
 Core and Local Indicators: Number of planning applications granted which have an adverse effect on the integrity of a Natura 2000 site.  
 Source of Information: Development Management  
 Monitoring Target: No planning applications approved contrary to the advice of NRW.  
 Trigger Point: 1 planning permission granted by the Local Planning Authority contrary to the advice of NRW.

Relevant LDP Objective: 11  
 Relevant LDP Policy: DM1  
 Core and Local Indicators: Number of planning applications granted which may potentially adversely affect the features of a SSSI or Local Wildlife Sites.  
 Source of Information: Development Management  
 Monitoring Target: No planning applications approved contrary to the advice of NRW or the authority's ecologist.  
 Trigger Point: 1 planning permission granted by the Local Planning Authority contrary to the advice of NRW or the authority's ecologist.

Page 809

5197.V61		20/07/2015	<input type="checkbox"/>			Summary: Appendix 3 - Monitoring Framework
Source: Email			Type: Comment			Mode Oral (Examination) Status Maintained

Relevant LDP Objective: 11  
 Relevant LDP Policy: DM1  
 Core and Local Indicators: Number of planning applications granted which results in detriment to the favourable conservation status of European protected species or significant harm to species protected by other statute.  
 Source of Information: Development Management  
 Monitoring Target: No planning applications approved contrary to the advice of NRW or the authority's ecologist.  
 Trigger Point: 1 planning permission granted by the Local Planning Authority contrary to the advice of NRW or the authority's ecologist.

Relevant LDP Objective: 13  
 Relevant LDP Policy: DM1  
 Core and Local Indicators: Number of planning applications permitted which result in the loss of/ or will have an adverse effect on a Registered Historic Landscape.  
 Source of Information: Development Management/ NRW/ LPA Landscape/ Heritage Officer  
 Monitoring Target: No planning applications approved contrary to the advice of NRW or the authority's landscape /heritage officer.  
 Trigger Point: 1 planning permission granted by the Local Planning Authority contrary to the advice of NRW or the authority's landscape/heritage officer.

Although we have no serious concerns with AMR8, you should note that when responding to future planning consultations in relation to allocations our advice in relation to flood risk will be based on section 7 and appendix 1 of TAN15 – the assessment of flooding consequences (ie the FCA) which is set out in paragraph 6.2 iv of TAN 15. Your Authority should consider whether the other three tests (i,ii,iii) have been met and that the development is in line with ALL tests during your determination of the application. Therefore, you may have a development that does not meet i or ii and iii, but we would not necessarily object on these grounds if iv, the FCA, is acceptable. The trigger 'approved contrary to NRW advice' will not cover the full TAN15 tests in paragraph 6.2. We recommend that it is amended to cover the full TAN 15 tests. We would be happy to discuss this aspect further.

(Text contained in Annex 1 to NRW letter).

Council Response:

0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: Flood Risk – AMR 8  
 We wish to advise that the triggers and actions as drafted are not appropriate. The references to applications '...being approved contrary to NRW advice...' should be removed. NRW are an advisor on many technical matters related to flood risk, however there are matters that need consideration in accordance with TAN15 that we cannot advise on, such as emergency plans, procedures and measures to address structural damage that may result from flooding.

The Dear CPO letter from Welsh Government dated 9th January 2014, as mentioned above, is relevant in this regard, as it sets out the role of Local Planning Authorities in identifying how a development proposal meets the tests set out in paragraph 6.2 of TAN15.  
 The text should therefore be amended to read '...applications in the floodplain in any given year are approved contrary to TAN15.'

We are concerned that the monitoring framework does not include an indicator, trigger and action to monitor the performance of the Plan against the protection and enhancement of biodiversity and geodiversity, and landscape as set out in Objectives 11 and 13 of the Plan. This omission represents a significant gap in the monitoring of the Plan and does not meet Test of Soundness CE3.  
 We therefore suggest the following amendments to the monitoring framework:

5197.V61 20/07/2015  Summary: Appendix 3 - Monitoring Framework

Source: Email Type: Comment Mode Oral (Examination) Status Maintained

Relevant LDP Policy: DM1  
 Core and Local Indicators: Number of planning applications granted which have an adverse effect on the integrity of a Natura 2000 site.  
 Source of Information: Development Management  
 Monitoring Target: No planning applications approved contrary to the advice of NRW.  
 Trigger Point: 1 planning permission granted by the Local Planning Authority contrary to the advice of NRW.

Relevant LDP Objective: 11  
 Relevant LDP Policy: DM1  
 Core and Local Indicators: Number of planning applications granted which may potentially adversely affect the features of a SSSI or Local Wildlife Sites.  
 Source of Information: Development Management  
 Monitoring Target: No planning applications approved contrary to the advice of NRW or the authority's ecologist.  
 Trigger Point: 1 planning permission granted by the Local Planning Authority contrary to the advice of NRW or the authority's ecologist.

Relevant LDP Objective: 11  
 Relevant LDP Policy: DM1  
 Core and Local Indicators: Number of planning applications granted which results in detriment to the favourable conservation status of European protected species or significant harm to species protected by other statute.  
 Source of Information: Development Management  
 Monitoring Target: No planning applications approved contrary to the advice of NRW or the authority's ecologist.  
 Trigger Point: 1 planning permission granted by the Local Planning Authority contrary to the advice of NRW or the authority's ecologist.

Relevant LDP Objective: 13  
 Relevant LDP Policy: DM1  
 Core and Local Indicators: Number of planning applications permitted which result in the loss of/ or will have an adverse effect on a Registered Historic Landscape.  
 Source of Information: Development Management/ NRW/ LPA Landscape/ Heritage Officer  
 Monitoring Target: No planning applications approved contrary to the advice of NRW or the authority's landscape /heritage officer.  
 Trigger Point: 1 planning permission granted by the Local Planning Authority contrary to the advice of NRW or the authority's landscape/heritage officer.

Although we have no serious concerns with AMR8, you should note that when responding to future planning consultations in relation to allocations our advice in relation to flood risk will be based on section 7 and appendix 1 of TAN15 – the assessment of flooding consequences (ie the FCA) which is set out in paragraph 6.2 iv of TAN 15. Your Authority should consider whether the other three tests (I,ii,iii) have been met and that the development is in line with ALL tests during your determination of the application. Therefore, you may have a development that does not meet i or ii and iii, but we would not necessarily object on these grounds if iv, the FCA, is acceptable. The trigger 'approved contrary to NRW advice' will not cover the full TAN15 tests in paragraph 6.2. We recommend that it is amended to cover the full TAN 15 tests. We would be happy to discuss this aspect further.

*Rep'n/Para/Policy AccessnNo DateLodgd Late? Status Modified Summary*

**6160.V2** 20/07/2015  Summary: Appendix 3 - Monitoring Framework - need to include biodiversity as a topic

Source: Website registration Type: Objection Mode Written Status Maintained

Document:Draft Deposit Written Statement 2015, p.119

Issue: 2015: Deposit Draft-13.Plan Monitoring and Review

*Question Representation Texts*

**Question: Council Response**

Representation Texts: These comments are noted and it is accepted that biodiversity is not included within the 'Annual Monitoring Framework' but national guidance states that "it is not realistic or necessary for all policies to be monitored". However the SEA that has been produced in conjunction with the plan does contain monitoring targets for the protection and enhancement of biodiversity and therefore biodiversity is monitored as part of that process. Therefore, no changes are considered necessary to ensure that the Plan is sound.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: The AMR fails to consider Biodiversity as a topic. LDP Objective 11 has a target of net gain for biodiversity. PCC must monitor whether development is delivering on it's biodiversity requirements otherwise Objective 11 is meaningless.

Council Response: 0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: The AMR needs to include the topic of biodiversity. Suggested monitoring could include assessing planning applications to see whether biodiversity conditions/obligations are applied, discharge of biodiversity conditions, if conditions are mitigation or enhancement.

Council Response: 0

Issue: 2015: Deposit Draft-13.Plan Monitoring and Review

Question Representation Texts

**Question: 3d. (i) Representation Details**

Representation Texts: 1. What the monitoring framework does

Lists 40 AMR topics for annual monitoring, each related to one or more LDP objective, and one or more LDP policies. A core indicator measures level of target achievement and indicator values are set for triggering either internal investigation (mild problem) or LDP review (severe problem). This framework is crucial for adjustments in policy and implementation of policy to ensure the LDP is meeting its own stated Objectives and Policies and also National and International policy.

2. General problems with the AMR system

Although authors have chosen to arrange AMR topics according to LDP objectives, there is a poor fit between the two. Some items, included under specific objectives, are left out of the AMR system. Other important items do not feature in either objectives or the monitoring framework.

CPRW has produced a table to illustrate this: Please refer to Monitoring Table 1

3. Specific problems with the AMR

3.1. Natural Heritage Objective 11 (SEA Topics 'Biodiversity' & 'Soil') No AMR.

Objective 11 covers air, land and water resources and 'ensures, wherever possible, development enhances them and produces a net gain for biodiversity'. In view of rapidly declining biodiversity, this is such an important matter that Powys has an absolute duty to overcome the inherent monitoring difficulties. The current WAG Nature Recovery plan requires this monitoring. The five yearly SEA monitoring proposed in the SEA ER is far too infrequent to prompt effective action and includes no targets or indicators. The SEA says that data for carbon storage soils, which overlap with three s42 habitats, are lacking. Powys has lost an Ecology Officer and urgently requires another to help address the monitoring imperative.

3.2. Landscape. Objective 13. (also an SEA topic). No AMR.

Omission of landscape monitoring is a critical failure of duty. Landscape should have been properly separated out from historic buildings, parks and gardens in Objective 13. Powys does not have a post of Landscape Officer which could have facilitated development of monitoring indicators. Readily available data-bases showing location and cumulative impact of types of development in relation to relevant topography, settlements, rights of way, and cultural heritage assets is crucial to monitoring of landscape impacts. A cumulative mapping system of wind turbines was described in the recent WAG-initiated Blaenau Gwent capacity study: Powys has nothing equivalent.

6235.V25		20/07/2015	<input type="checkbox"/>			Summary: Appendix 3 - Monitoring Framework
Source: Email		Type: Objection		Mode	Written	Status Maintained

3.3 Tourism and public rights of way assets. No objective. No AMR

Protection and enhancement of assets important for tourism is left out of objectives and the only tourism related AMR concerns development of built tourism facilities. The LDP 2.4.1-10 says 'visitors to Powys are drawn to the area for its outstanding scenery, heritage and recreational activities. Protecting these attractions and supporting a sustainable and year-round tourism sector is a must for the LDP.' The monitoring framework is therefore obliged to have regard to DM1 7ii and DM1 8: it is inexcusable to confine monitoring of tourism to modern built tourist developments.

3.4. There is no monitoring of unauthorised development.

3.5 Renewable and low carbon energy. Objective 5. AMR 33

This critical planning topic with wide-ranging implications for all other objectives has a single AMR based on targets which, in turn, have no evidence base. AMR 33 ensures that pressure to meet targets will encourage uninformed case-by-case decisions with potentially disastrous environmental consequences.

There is no subdivision of renewal energy sources, each of which has a particular characteristic set of environmental risks. It is likely that new renewable technologies will become available during the LDP lifetime but we have no monitoring of the nature, mix or contribution of existing RE projects so this will go totally unrecorded.

Experience with wind turbines and anaerobic digesters suggest that public complaints and concerns of independent conservation organisations are the principle sources of information about adverse impacts of operating projects. Noise and odour complaints indicate that DM2 10 may not be sufficient screening to ensure the vision of Powys as a 'healthy, safe environment'. Stakeholder representations must be sought, recorded and, where they reveal significant adverse impacts, fed back into the decision-making process to inform assessment of new applications.

CPRW does not underestimate the complexity of the suggestions below but, without any monitoring for action, severe collateral environmental damage will go unchecked. AMR 12B (Built Heritage) shows that PCC is able to adopt suggestions based on analysis of planning reports and Appeal results. However if this monitoring method is adopted, PCC must address the public view that, currently, Officer's Reports do not always do justice to significant adverse impacts raised by colleagues within PCC, outside professional stakeholders, well-informed members of the public and affected residents.

3.6 There is no monitoring of intensive agriculture

3.7. Historic Environment. Objective 13. SEA sub-topic. AMR 12

AMR 12 is designed to reduce the number of listed buildings on the 'at risk' data base. Although the target is to reduce the number by approximately one fifth, action is only triggered by an increase in number, that is when the target has already been missed by 861 at-risk buildings. This is an irrational target which will do nothing to improve the situation as stated in the SEA ER p.82. CPRW warmly welcomes the addition of AMR 12B which greatly improves the monitoring of the Historic Environment. We suggest triggers could be specified as in HE S2 below. We apologise for leaving AMR 12B out of the table. The national importance of the 'precious and fragile' Historic Environment and its contribution to income and employment in Wales is set out in Section 3 on the Historic Environment (Wales) Bill may 2015. This section does not show a commitment to conserve and enhance the historic environment in compliance with the objectives of PPWv7 Ch6.

Council Response:

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: 3.1 Natural Heritage changes suggested:

by: Representation No

Filtered to show: (all of) Stage=V; Status=M

Rep'n/Para/Policy	AccessNo	DateLodgd	Late?	Status	Modified	Summary
6235.V25		20/07/2015	<input type="checkbox"/>			Summary: Appendix 3 - Monitoring Framework
Source: Email			Type: Objection			Mode Written
						Status Maintained

General:  
Develop an AMR monitoring scheme for biodiversity including carbon storage.

Specific Natural Heritage Suggestions:

NH S1. Ecology Officer screens applications for significant specified applications which, at least, include wind turbines, intensive poultry and animal development, industrial development on greenfield sites and housing development over 10 houses. EO comments on whether, prior to determination, mitigation/compensation/off-set measures 1) do not provide commensurate biodiversity value or 2) do provide commensurate biodiversity value or 3) produce net gain. The comments to be tabulated and matched to approval/refusal decisions. Action to be taken with indicators of percentages of applications approved where 1), 2) or 3) apply.

NH S2. For each approved development as above, report on area of LBAP habitat lost and area of new LBAP habitat provided by mitigation/compensation/off-set measures. Report on cumulative area of LBAP lost. Percentage shortfall in area to trigger action.

NH S3. Regular reports required of developers, at set intervals after commencement of development, on whether promised measures are secured and whether aims of mitigation are being achieved. Percentages of 1) failure to report and 2) default on approved undertakings or s106 agreements to trigger action.

NH S4. Data for carbon storage soils should be obtained and monitoring of loss through development should be implemented with planning actions to halt loss.

NH S5. Planting of trees and other vegetation to increase carbon storage and reduce erosion and flood damage to compensate for loss through development to be monitored.

NH S6. If PCC cannot do this work, outsource it to responsible, independent organisation via paid contract. – possibly a local ecological Trust.

NH S7. Develop actions to improve outcomes via: improved liaison with Ecology Officer, training, advice to applicants, extra scrutiny of applications, strict regard to biodiversity planning policy including PPW 5 & DM1.9 within the planning process.

NH S8. PCC to offset poor outcomes by designating new sites of important habitat which will receive full protection from development in compensation.

### 3.2 Landscape changes

General:  
Landscape professional to develop an AMR monitoring system, which is as objective as possible, using appropriate data-bases which must be developed for the purpose.

Specific Landscape suggestions:

Ls S1. Applications for wind turbines, solar installations, pylons, and other substantial industrial/agricultural structures to be screened by landscape professional for appropriate environmental information about 1) cumulative impact and 2) impact on significant viewpoints. Percentage of applications failing to provide 1) and/or 2) before determination triggers action.

Ls S2. Landscape professional reviews data bases to assess cumulative impact of OCP development on view points from number of key assets of public value selected to cover the county, including National Trails and some cultural heritage assets, areas of unspoilt countryside and conservation areas in towns. Percentage increase in numbers compared with pre-existing numbers to trigger action.

by: Representation No

Rep'n/Para/Policy	AccessnNo	DateLodgd	Late?	Status	Modified	Summary
6235.V25		20/07/2015	<input type="checkbox"/>			Summary: Appendix 3 - Monitoring Framework
Source: Email			Type: Objection			Mode: Written
						Status: Maintained

LsS3. Develop actions to improve outcomes via: improved liaison with Landscape Officer/consultant, training, advice to applicants, extra scrutiny of applications, regard for conserving Powys landscape, particularly areas with high LANDMAP values or specially valued by the public and tourists for their scenic qualities and views.

3.3 Tourism and PROW changes:

General:

Develop AMR monitoring system which takes account of the landscape and traditional setting of tourist attractions with the aim of protecting and enhancing these. Monitoring should be devised by landscape professional with special interest in PROWs and take account of public representations from stakeholder groups such as Powys Ramblers, British Horse Society, Sustrans, walking festival organisers, tourism promotion groups and holiday businesses that depend on walking, riding and cycling.

Specific Tourism items and PROWs to be included:

T&P S1. All items included in DM1 7ii and DM1 8 reflecting the fact that integrity of surrounding landscapes and townscapes contribute hugely to the public enjoyment of these assets. Indicators to be related to planning approvals with adverse impact on enjoyment of these assets and actions as in Ls S3. above.

T&P S2. Offa's Dyke landscape corridor requires specific mention in DM1 7ii and AMR framework so that Powys' two major linear tourist attractions – Offa's Dyke and Montgomery Canal – receive equivalent attention and protection in Planning matters.

T&P S3. Bridleways and long-distance bridle routes require specific mention in DM1 7ii and AMR framework.

3.4 Unauthorised development change suggested:

An AMR system for monitoring notification of unauthorised development from any source, the LPA response, and the outcome, including retrospective planning permission, should be added. The aim would be to secure swift action and minimise retrospective permissions to strengthen protection afforded by the planning system.

3.5 Renewable Energy Changes suggested (overlap with biodiversity, landscape and water monitoring)

RE S1. Monitor targets with indicators to be developed for principle types of renewable energy which reflect the main adverse impacts. Examples would be: wind turbines:

cumulative visual impact (professional landscape assessment of PCC data-base which must be developed), noise nuisance (separation distances from PCC data-base, complaints/questionnaires/measurements), biodiversity (local wildlife trusts reports, biodiversity monitoring data-base) hydrology impacts (water quality monitoring data-base, biodiversity monitoring data-base, complaints about loss in quality of quantity of drinking supplies for humans/animals), impact on tourism visitor numbers and visitor experience (reports received from tourism organisations, tourism businesses and visitors)

anaerobic digesters and other developments using biofuel :

odour (complaints/measurements), traffic nuisance (complaints/measurements) importation of biofuels (obligatory operator's reports), biodiversity (local wildlife trusts reports ,biodiversity monitoring data-base)

RE S2. Monitor adverse impacts of different types addressed in Officer's Reports and Appeal decisions. This requires Planning Advice to applicants with clear expectations about which environmental topics must be included in applications for particular types of project. This also requires Officers' checklists for submitted applications (as used successfully by many other authorities), so that relevant information is supplied, even when EIA is not required.

RE S3 Monitor the deployment of different types and sizes of renewable energy projects with indicators and action to develop future AMRs to address likely adverse impacts.

Source: Email		Type: Objection		Mode	Written	Status Maintained

RE S4 Monitor compliance with arrangements for decommissioning.

3.6 Intensive Agriculture Change suggestion

Create a data-base of numbers, sizes and types of intensive livestock units with distribution in relation to watercourses. Monitor, against a checklist, whether appropriate information, including assessment of cumulative impact has been submitted in planning applications, particularly with respect to impact on water quality.

3.7 Historic Environment suggestions:

HE S1 Alter the indicator trigger levels for at risk buildings to achieve a decrease

HE S2 Indicators would be derived from Officer's reports and Appeal decisions subject to the comments in the Renewable Energy section above (seeⓈ). Any significant adverse impact on a historic asset or its setting would trigger action. For a more up to date discussion of 'setting' than any equivalent Welsh source, see Historic England. 'The Setting of Heritage Assets. Historic Environment Good Practice Advice in Planning'. July 2015.

Other suggestions

Please refer to Monitoring Table 2. CPRW has produced comments on the AMR targets, indicators and actions in tabular form to avoid giving a confusing list of references.

Question Representation Texts

**Question: 3d. (i) Representation Details**

Representation Texts: LDP Objective: AMR33 is slightly confusing as it is trying to monitor developments which are outside the remit of LDP Objective 5 and which no targets have been set for. The LDP makes clear at Policy RE1 that proposals for between 5MW and 50MW will be determined in accordance with relevant national policy and guidance, and no target capacity is set in the LDP for installations of this scale. In the interests of clarity, the cross-reference in the table to LDP Objective 5 should make clear that the provision of an additional 50,000kW (50MW) installed capacity of renewable electricity generating technology applies only to micro (<50kW) and sub-local authority schemes (<5MW) as clarified in the Deposit LDP at @34.91 - @34.92: Policy RE1 'Renewable Energy' (paragraph 4.10.7).

Target: It is considered that reference to 'facilitate' is vague and the Target; Core/Local Indicator and/or Source should instead refer to 'developments granted planning permission'. The target should specify what is to be monitored, i.e. renewable electricity/heat developments granted planning permission and installed per annum. Not all planning applications that gain approval will necessarily be implemented therefore the objective to "achieve 100% renewable electricity production and 12% renewable heat production compared to that which is used domestically" may not be realised if only 'developments granted planning permission' are monitored. To assist with the achievement of Objective 5, it is also necessary to monitor whether developments granted planning permission are subsequently installed. Powys County Council should therefore consider adding another measure to Target, Core/Local Indicator and/or Source for number of MW of renewable electricity/heat installed per annum.

Core/Local Indicator: Monitor renewable electricity/heat developments granted planning permission and installed per annum (see above – Target). LDP Objective 5 applies only to micro (<50kW) and sub-local authority schemes (<5MW), so the "capacity of Renewable Energy developments (MW) installed inside Strategic Search Areas (SSAs) by type (TAN8)" cannot be used for monitoring this objective. TAN8 states that "large scale (over 25MW) onshore wind developments should be concentrated into particular areas defined as Strategic Search Areas" (July 2005, paragraph 2.2) so i) the inclusion of 'by type' would be pointless as most, if not all, would be onshore wind developments; and ii) the per annum target of 5MW and/or the LDP plan period target of 50MW could be met by a single application.

Source: Monitor renewable electricity/heat developments granted planning permission and installed per annum (see above – Target). The final sentence in 'Source' which states that "This will enable the capacity of Renewable Energy development permitted within Strategic Search Areas to be collated" has no relevance to LDP Objective 5 (see above – Core/Local Indicator).

Generally, there is a need throughout the LDP to ensure consistent use of either kilowatt (kW) or megawatt (MW) as the unit of power. To ensure consistency with national policy contained in PPW together with guidance contained in TAN8, it is considered that the MW unit of power is more appropriate than the kW unit of power used in the Deposit LDP.

For the reasons set out above, it is considered that Monitoring: Renewable and Low Carbon Energy – AMR33 in its current form fails to meet the Coherence and Effectiveness (CE3) test of soundness.

Council Response:

0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: LDP Objective: replace "50,000kW" with "50MW", replace "100,000kW" with "100MW" and insert additional text to clarify that the 50MW/100MW targets relate to "micro and sub-

Question Representation Texts

**Question:** Council Response

Representation Texts: This representation is considered to be in support of the Deposit Local Development Plan in that the Representor objects to candidate site reference 1088 which is not proposed to be allocated. The Site Status Report concludes that the location unsuitable for large scale housing and that it's allocation would be contrary to national planning policy and the sustainable settlement hierarchy of the Powys LDP. No changes are therefore required.

Council Response: 0

**Question: 3d. (i)** Representation Details

Representation Texts: The sites have not been confirmed but this objection is in case applicants appeal. Llanfilo is totally unsuited for development. The roads are narrow and dangerously full of bends. The drainage and water etc is restricted. Re 1088 site, this was previously refused because of archeological importance - the field was probably site of medieval village.

Council Response: 0

Representation Texts: This Representation is noted. No changes are considered necessary to ensure the Plan is sound. However, drafting issues will be considered.

Council Response:

0

**Question: 3d. (i) Representation Details**

Representation Texts: The Mineral Products Association (MPA) supports the intention of the Proposals Map to identify Mineral Safeguarding Areas but objects to their current form since it had difficulty checking to see if the boundaries accorded with the Aggregates Safeguarding Map for Wales because of the symbols and colours used. The boundaries are indistinct because they are not edged and they are very difficult to make out at the scale of the maps provided.

Council Response:

0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts: We request that the Proposals Map is amended to make the boundaries of MSAs clear and to review the symbols used and colour schemes so that the MSAs are clearly marked.

Council Response:

0

**Question: 4b Reason For Request To Speak At Hearing And Subject**

Representation Texts: The Mineral Products Association (MPA) is the trade association for the aggregates, asphalt, cement, concrete, dimension stone, lime, mortar and silica sand industries. With the recent addition of The British Precast Concrete Federation (BPCF) and the British Association of Reinforcement (BAR), it has a growing membership of 450 companies and is the sectoral voice for mineral products. MPA membership is made up of the vast majority of independent SME companies throughout the UK, as well as the 9 major international and global companies. It covers 100% of GB cement production, 90% of aggregates production and 95% of asphalt and ready-mixed concrete production and 70% of precast concrete production. Each year the industry supplies £9 billion of materials and services to the £120 billion construction and other sectors. Industry production represents the largest materials flow in the UK economy and is also one of the largest manufacturing sectors.

Given the government's recognition of the economic and employment benefits of the extractive industries we should like to direct your attention to 'Making the Link', a document produced by the MPA to highlight the contribution that the sector makes to the economy. The document can be downloaded from the following website.  
[http://www.mineralproducts.org/documents/MPA\\_MTL\\_Document.pdf](http://www.mineralproducts.org/documents/MPA_MTL_Document.pdf)

*Question Representation Texts*

**Question: Council Response**

Representation Texts: This Representation is noted. The Council agrees to amend the text to make specific reference to onshore oil and gas as suggested by the representor. See Focused Changes for details.

Proposals maps will be updated to include current round of PEDL licences.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: REPRESENTATION 6 OF 6

The relevant proposals map fails to identify the presence of PEDL licence 148 which extends into the southern tip of the Local Authority area.

Council Response: 0

**Question: 3d. (ii) Desired changes to Document**

Representation Texts:

- 1)The inclusion within the Local Development Plan of a proposal map showing up-to-date PEDL Licences within the Local Authority area. These are available from the Oil and Gas Authority pages on the .gov website.
- 2)The supporting text within the Local Development Plan should signpost users of the plan to the relevant text contained within paragraphs 64 and 65 of MPPW with regards onshore oil, gas and unconventional hydrocarbon proposals.

Concluding comments

The Coal Authority welcomes the opportunity to make these comments. We are, of course, willing to discuss the comments made in our representations in further detail if desired and would be happy to negotiate alternative suitable wording to address any of our concerns. The Coal Authority would be happy to enter into discussions ahead of any examination hearing process to try and reach a negotiated position if this were considered helpful.

*Question Representation Texts*

**Question: Council Response**

Representation Texts: These comments are noted. However, it is considered that the issues raised in relation to highway access serving this allocation are capable of being address and that the inclusion of the land adjacent to Parkside will enable improvements to be made to the existing junction near to the Railway line, to the benefit of all users of this road. The concerns raised regarding floodrisk of this particular piece of land are noted, however the area of land to be allocated adjoining Parkside does not include the land within the floodplain. No changes are considered to be necessary to ensure that the plan is sound.

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: Housing site PO2 HA2 'Land adjoining Parkside', Abermule.

Concerns were expressed at candidate site stage by both members of the community and the Community Council and are maintained. We have now considered the proposals in the Development Brief to manage the highly unsuitable poor highway access and road safety but these do not ameliorate our concerns. The level crossing proximate to the road junction and the welcome increased frequency of the train service compounds safety issues on this narrow, winding road. With all these considerations and the flood risk the Community Council assess this as an inappropriate site for housing development. The site ' land adjacent The Meadows' does not have the same problems.

The reduction of housing targets in Abermule is appropriate but still high and the community feels that two or three small developments of 4 or 5 houses (mixed affordable and open market) would be far more easily assimilated into the existing community and infrastructure. There are inadequate sewerage arrangements and lack of provision of parking in the village for a further 50 dwellings.

There is an urgent requirement for small, single storey, easily accessed accommodation situated proximate to village facilities in Abermule to enable older or less able bodied people to remain in the community. Land adjacent to the Abermule Hotel would be ideal for 6-8 such units and we request that this site be allocated for this specific purpose in the LDP ( Ref Rep V29)

Dev Boundary Amendment

Map: P3: Arddleen - 2015

Issue: 2015: Deposit Draft-14.Miscellaneous

*Question Representation Texts*

**Question: 3d. (i) Representation Details**

Representation Texts: Request the inclusion of Candidate Site 582 within the development boundary of Arddleen.

Arddleen is appropriately identified in the Deposit Draft LDP as a "Large Village" where housing growth will be accommodated in proportion to the settlement's size, facilities and capacity to accommodate growth.

In this regard, Arddleen benefits from a range of services and facilities (as identified in Appendix 2: Settlement Analysis of the Powys LDP Preferred Strategy (March 2012)), including a Primary School and Public House. It is also well placed in North East Powys lying on the A483 (Swansea to Manchester) Trunk Road in close proximity, and with good transport links, to Welshpool (6.5miles), Oswestry (9 miles) and Shrewsbury (15 miles).

As such it is directly comparable to the neighbouring settlements of Four Crosses, Guilsfield, Llandrinio, Llansantffraid-ym-Mechain and Llanymynech as these settlements share the same designation in the LDP (i.e. "Large Village") and benefit from a similar range of services and facilities. However, the level of housing growth identified for Arddleen in the Plan period is significantly below the level of growth identified for the neighbouring settlements identified.

In addition, as detailed within the LDP "Population and Housing Topic Paper" (May 2015), windfall development (i.e. unallocated sites including small sites with 5 or less dwellings) make an important contribution to annual housing provision across the Powys LDP Area (17%). In this regard, it is noted that in response to candidate site submissions the LDP now provides the following opportunities for windfall development within Arddleen's development boundary:

CS747 Land at Grange, Arddleen - The candidate site status report summary for this site states:

Site consists of farmhouse, farm buildings and land immediately adjoining. The site lies partially within the UDP settlement development boundary and is considered a logical site for development in the settlement. However, the site is currently a working farm and stakeholders have identified significant constraints to its re-development, most notably highways constraints. The proposed site is therefore not considered appropriate for allocation but part of the site has been included within the LDP settlement boundary for Arddleen so as to facilitate small scale development opportunities at the road frontage (constraints can be further considered at the detailed planning stages).

CS1160 Land at Grange, Arddleen - The candidate site status report summary for this site states:

The candidate site consists of two small areas of two larger enclosures of relatively unconstrained flat agricultural land. The north eastern area of the candidate site proposal is not within the UDP's development boundary and is not defined by physical boundaries to the north east & north west. It may therefore be considered an incursion into the open countryside and development could be visually intrusive at the entrance to the village especially as the established development on this side of the B4392 is low density. The south western area of the candidate site proposal does lie within the UDP's development boundary and whilst not defined by a physical boundary to its north western edge, is bounded by an existing dwelling to the south west and the existing UDP settlement development boundary, which is drawn at an existing field boundary (hedgerow & drain). This is considered to be an appropriate physical limit to built development in this location. Part of the site has therefore been included in the LDP settlement boundary for Arddleen to facilitate small scale expansion whilst the larger proposed site is not considered suitable. The preferred site for a larger housing allocation is CS376 which is considered to offer a more appropriate, logical and central site for village expansion.

Whilst not wishing to object to the inclusion of these sites within Arddleen's development boundary, there are significant doubts over the whether either of these sites will

Source: Email

Type: Objection

Mode Oral (Examination)

Status Maintained

contribute to the housing supply within the Plan period, as follows:

CS747 Land at Grange, Arddleen - as detailed within the candidate site status report summary, the site is currently a working farm and stakeholders have identified significant constraints to its re-development, most notably highways constraints.

CS1160 Land at Grange, Arddleen - as detailed within the candidate site status report summary, this site lies within the UDP's development boundary. It was also within the development boundary of the predecessor to the UDP, the Montgomeryshire Local Plan. There are, therefore, significant doubts as to whether this site will "facilitate small scale expansion". The opportunities for windfall development are therefore significantly restricted in the settlement.

We therefore respectfully request that opportunities for housing growth in Arddleen are increased to a more realistic and appropriate level, comparable to those identified for neighbouring "Large Villages". An increase in housing growth opportunities in Arddleen would better reflect the settlement's location and its level of services and facilities and provide a reasonable level of flexibility in the settlement's housing growth opportunities to deal with changing circumstances. It would also help to address the potential disadvantage Arddleen's services and facilities (including the public house and primary school) are being placed at when compared to the support being proposed to the viability of neighbouring settlements services & facilities.

Candidate Site 582 (Land adjacent Greenacre, Arddleen) provides a sustainable opportunity to provide small scale residential development in the settlement as it lies between an existing house (Greenacre) and the settlement's development boundary (as proposed in the Deposit Draft LDP). It also lies on the opposite side of the highway to existing residential development and within the 30mph speed limit of the settlement. The site therefore represents a logical addition to the built form of the settlement, is well serviced by utilities infrastructure and is within easy walking distance of the settlement's services and facilities.

When the Council considered the inclusion of candidate site 582 (in its candidate sites status report) it concluded as follows:

"Small parcel of flat pasture land that lies on the opposite side of the highway to the UDP development boundary and existing residential development. The site is not considered a logical extension to the settlement's existing built form without the development of adjoining candidate site proposal CS376/1226. Highways and Heritage stakeholders and the community council have also identified issues with the site's development. Whilst site 376 is now proposed as a land allocation, it is considered that this site is neither particularly suitable nor required for land allocation. Highways have maintained their objection and as site 376 can supply the settlement's needs, the existing lane can continue to serve as a logical natural and physical boundary between village and countryside. The site is therefore not recommended for land allocation or inclusion within the settlement boundary".

In response to the issues raised we would comment as follows:

- As detailed above, we would contend that the site forms a logical addition to the built form of the settlement as it is bounded on 3 sides by existing and proposed development. In addition we would comment that the existing lane does not serve as the natural and physical boundary to the settlement in this location as residential property lie either side of the lane junction. The physical boundary to the settlement has been identified immediately to the west of Greenacre, where the existing 30mph limit and settlement signage is located;

-Issues raised by Heritage stakeholders relate to the setting of Trederwen House (Listed Building). Proposed housing allocation P03 HA1 and a highway lie between candidate site 582 and Trederwen House. We therefore contend that candidate site 582 has minimal impact upon the setting of Trederwen House and significantly less impact than the proposed LDP housing allocation.

-Highways stakeholders have identified issues with the site's allocation. However, having considered the highway infrastructure serving the site, and following further discussion with the Council's Highways Officer (Mr Paul Wozencraft), we understand that a definitive response on highways constraints cannot be provided without more detailed proposals and that much will depend on the scale of development proposed on the site. We therefore contend that, in this respect, the site is directly comparable to candidate site 747 (above) which, although not performing as well as Candidate Site 582 in the Plan's sustainability appraisal, is included within the development boundary with highways issues to be "further considered at the detailed planning stages".

-In terms of the settlement housing requirement, as detailed above, we would contend that housing opportunities are increased to better reflect the settlement's location and its level of services and facilities. In this regard, it is noted from Appendix 1 – Settlement Allocations of the draft LDP that the issues associated with housing allocation P03 HA1 are as follows: "Part site required in this Plan period. Plan for potential future phasing. Allocation dependant on provision of community car park. Sensitive heritage - listed Trederwen

House nearby. Sympathetically designed car park could usefully buffer listed building. \*Project level HRA screening required - Montgomery Canal SAC (hydrological connections) and Tanat and Vyrnwy Bat sites SAC. This site is within a catchment that is failing WFD objectives (due to phosphate levels). Therefore foul water disposal must go to a mains public sewer or developer must show private connection is not adding to phosphate levels in the catchment".

Given the issues associated with housing allocation HA1 it is evident that that the entirety of the site is not available for residential development, with a significant proportion necessary for car parking / buffer to Trederwen House. In addition, these requirements also raise issues relating to the rate at which this site may come forward. The inclusion of candidate site 582 within the settlement's development boundary would therefore assist in providing a more appropriate level of housing growth for the settlement and provides greater certainty as to the provision of growth during the Plan period.

Issue: 2015: Deposit Draft-12. Alternative Sites

*Question Representation Texts*

**Question: 3d. (i) Representation Details**

Representation Texts: Berriew is identified as a 'large village', but there are no new housing allocations in the village. Indeed two sites that were allocated for development in the Unitary Development Plan – Site M105 HA2. and the site to the east of the village lying alongside the canal just before the road bridge over the canal in encountered ( identified for canal related development in the UDP) – have been deleted from allocation. This means that there is but a single site (formerly M105 HA1) that is available for development in the village.

Mr Corbett-Winder owns both of the sites mentioned above as being withdrawn from allocation. The economic recession of the past few years meant he was unable to pursue the development of the other sites, but he showed his clear intent in attempting to bring development in Berriew forward by obtaining planning permission for the development of site M105 HA, and disposing of it to a local builder. He does not, now, have any control over that site, but the lack of allocation for other sites leaves him unable to assist in bringing forward any further housing.

The lack of allocation of any further sites in Berriew does not appear to be based on anything in particular – such as protection of local character. The lack of further sites for development in the village leaves the achievement of greater sustainability in question. Villages need to continually evolve and develop if they are to be sustainable, and produce sustainable communities.

Elsewhere in these representations reference to the roles that Berriew and Refail play, and the manner in which they support each other, has been referred to. Refail, however, has been classified as a small village, where development is likely to be restricted, even though it has seen a reasonable degree of development in recent years.

Representations were made to try to get candidate site 479 included as an allocated site for development in the ldp, but nothing has happened. If Refail remains categorised as a small village without any recognition of the manner in which it supports and is supported by Berriew, it will have no further development. Given the location of Berriew and Refail just outside Welshpool and on a main road, giving excellent communications, it is surprising and illogical that they do not feature as villages that could usefully accommodate further development.

Council Response:

*Question Representation Texts*

**Question: Council Response**

Representation Texts: Thank you for your representation. The Council maintains that the tiers of settlements identified accurately reflect their role, function and overall level of sustainability and that the distribution of housing across the Settlement Hierarchy is based on a sound rationale which supports the delivery of the LDP strategy and the longer term viability of settlements considered capable of supporting sustainable growth. Due to the updated information provided by both landowner and agent, the Council agrees that housing sites in Berriew (Large Village) warrant re-assessment especially with regard to addressing the lack of any allocated housing sites in this settlement. The Council does not agree that the settlement of Refail (Small Village) should be included as part of Berriew and no changes to the Plan are proposed on this. For Small Villages, the Council is in favour of Village (Action) Plans so as to enable further community involvement on how the settlement may develop - the emphasis is on the suitability of infill sites (as extensions to Small Villages are an exception for affordable homes only).

Council Response: 0

**Question: 3d. (i) Representation Details**

Representation Texts: Berriew is identified as a 'large village', but there are no new housing allocations in the village. Question Representation Texts

**Question: 3d. (i) Representation Details**

Representation Texts: I would like to make the following representations that I believe make the LDP as currently drafted unsound both in terms of the consistency and coherence and effectiveness tests in relation to the allocation of sites P06 HA1 in reference to 35.25.

Planning Policy Wales Paragraph 2.2.3 states the capacity of existing infrastructure, and the need for additional facilities, should be taken into account in the preparation of development plans and the consideration of planning applications. It is already known that the sewerage system in the village is not fit for purpose. The completion of the housing estate Llys Meillion has already created an overload on the current waste water treatment system.

This paragraph also states Local Authorities should encourage the use of sites where existing drainage problems can be solved and seek to avoid use of sites where adequate drainage provision is unlikely to be achieved.

The land in question has drainage issues and run off water from the neighbouring Brechfa pool which comes down into the proposed site and annually floods the field and neighbouring Llys Meillion. This is against LDP Objective 4 where development should reduce or better manage existing flood risk for communities.

This site is also at odds with LDP Objective 13 to protect, preserve and/or enhance the distinctive built heritage, landscape and cultural assets of Powys and adjoining areas, including its architectural and archaeological heritage and protected landscapes. The development will have an effect of the Middle Wye Valley Historic Landscape and the setting of two listed buildings.

The proposed site is also part of a Designate Special Area of Conservation and houses many species of wildlife. This is against European Directive (92/43/EEC) on the Conservation of Natural Habitats and Wild Flora and Fauna (the Habitats Directive) protects habitats and species of European nature conservation importance. The Habitats Directive establishes a network of internationally important sites designated for their ecological status. These are referred to as Natura 2000 (N2K) sites or European Sites, and comprise Special Areas of Conservation (SACs).

It also of concern that there is not a continuous footpath from the proposed development into the village centre. Residents would be required to cross the A470 where there are presently speeding issues within this 30mph zone. It is also to be noted that there is limited parking within Llyswen and vehicles have been known to park on the entrance to Llys Meillion causing a reduced vision splay which is of cause for concern.

It is clear on these grounds alone these sites should be deleted. However there are other matters that render these sites unsuitable including:- the inadequate access to the site, the inadequate water/sewerage infrastructure in the area and the associated environmental concerns and existing pressures on local infrastructure (e.g. primary schools, health services and road infrastructure).

Council Response:
