The Committee received a detailed breakdown of sickness absence figures. Powys had the third lowest sickness absence rates of all Welsh local authorities at a rate of 9.16 days lost per full time equivalent employee. The report detailed annual sickness absence data by reason, a breakdown of short-term and long-term absences and by directorate. The report also set out the actions being taken by the Council to reduce absences. The Employee Assistance Programme had been introduced in summer 2019 offering employees with stress, depression and mental health issues 24/7 confidential advice and support. The Committee was also advised that there had been good feedback since the introduction of the new occupational health service on 1<sup>st</sup> December and that the backlog of referrals was being reduced. Members were concerned to note the number of return to work forms not being completed and officers acknowledged that managers needed to address this. They also confirmed that the sickness statistics were shared with the Council's Senior Leadership Team.

It was confirmed that schools leadership teams were responsible for managing sickness absence but that HR provided advice and support through service level agreements.

**ACTIONS:** Include details of days lost due to work related accidents and incidents in future reports.

**Contact Property Services about the possibility of changing old fashioned taps to reduce the risk of cross contamination. Officers to consider how statistics from schools are reported so as not to skew the figures.**

<b>5.</b>	<b>WORK FORCE PLANS UPDATE</b>
