QUESTIONS AT ANY TIME TO CABINET PORTFOLIO HOLDERS

Response by the Portfolio Holder:

Fire detection and control measures will be in accordance with current regulations and guidance. As part of the Building Regulations application, recommendations have been received from the Fire Service and these are incorporated into the design of the building. The Welsh Government and Network Rail who have responsibility for the A483 Trunk Road and the Cambrian Rail Line respectively have been consulted and have raised no concerns about fire risks at the facility and the operation of the A483 and rail line.

Appropriate insurance cover will be in place for the site and buildings upon it. Measures have been incorporated within the drainage systems to prevent water leaving the site and entering watercourses in the event of a fire.

For information, the commercial waste management facilities in Wrexham and Lampeter are many times larger in terms of capacity than the facility currently under construction at Abermule.
