

**CYNGOR SIR POWYS COUNTY COUNCIL.**

**PORTFOLIO HOLDER DELEGATED DECISION**

**By**

**County Councillor Graham Brown**

**Portfolio Holder for Commissioning and Procurement**

**February 2017**

**REPORT AUTHOR: Catherine Richards  
Principal Lead Museums, Archives and Information  
Management**

**SUBJECT: Powys Museum Service Collections Appraisal**

---

**REPORT FOR: Decision**

---

**1.0 Summary**

**1.1** One of the fundamental purposes of the Council's Museums is to acquire and preserve objects as a permanent collection for the general benefit and enjoyment of the people of Powys.

**1.2** The curators of Brecknock Museum, Powysland Museum, Llanidloes Museum and Radnorshire Museum have undertaken an appraisal of their collections and have concluded that a number of items do not fit within their Collection Development Policies. These items therefore would be suitable for disposal.

**1.3** The museums accepts that one of its key functions is to acquire artefacts and to keep them for posterity. In recent years staff have followed a strict collecting policy, however, historically a number of items, often with uncertain provenance and sometimes in extremely poor condition have been taken into the collection. The main driver for the collection review was to reappraise items and to assess their suitability for long term preservation.

**1.4** As part of the appraisal process a selection of criteria was used in the assessment of each item, object or collection, and focused on the following:

- Provenance
- Condition – including potential conservation/repair cost implications
- Relevance to local area, and current collecting policy
- Potential for display
- Rarity/uniqueness/historical/scientific importance
- Duplicates (commonly occurring items with perhaps many already in collection)

## **2.0 Collections Development Policy**

**2.1** Powys Museums' (Brecknock, Radnorshire and Montgomeryshire) Collections Development Policies were approved by Delegated Decision on 3 June 2014. The report can be viewed online :  
[http://www.powys.gov.uk/en/elections/portfolio-holder-decisions/portfolio-holder-for-procurement-and-commissioning/?membs2%5Bformname%5D=documents\\_form&membs2%5Baction%5D=view\\_doc&membs2%5Bfilename%5D=bul\\_2014-06-09phcomm\\_en.pdf](http://www.powys.gov.uk/en/elections/portfolio-holder-decisions/portfolio-holder-for-procurement-and-commissioning/?membs2%5Bformname%5D=documents_form&membs2%5Baction%5D=view_doc&membs2%5Bfilename%5D=bul_2014-06-09phcomm_en.pdf)

Brecknock Museum Collections Development Policy was further updated and approved by Delegated Decision on 4 January 2017. The report can be view online:  
<http://powys.moderngov.co.uk/documents/s13191/Delegated%20Decisions%20Brecknock%20Museum%20Collections%20Dvpt%20Policy%202017.pdf>

**2.2** The Collections Development Policies sets out the principles that provides the museums with a framework for responsible and ethical acquisition and disposal of collections. The policies applies to material which the museums own and have accessioned into their collection, or intend to own and accession into their collection, and includes:

- the Museums Service constitution and statement of purpose
- the legal basis on which the collections are held
- the public benefit derived from the effective use and management of the collections
- an assessment of the needs of the museums' collections
- the collections held by other museums and organisations collecting in the same or related geographic areas or subject fields

## **3.0 Rationalisation and Disposal**

**3.1** There is a strong presumption against the disposal of any artefacts in the Powys museums' collections. However the Collections Development Policies allows that each museum may carry out a responsible, curatorial-motivated disposal as part of their long-term collections policy.

**3.2** It is a requirement that such rationalisation will only take place following an in-depth collection review and in order to increase the public benefit derived from the museums' collections.

**3.3** A list of items for disposal is included as Appendix A. The reason for the disposal of items from the museums' collections follows an in-depth collection review. Essentially the disposal is driven by

curatorial reasons. There are no financially motivated reasons for disposal of any items.

#### **4.0 Proposal**

4.1 The purpose of this report is to seek approval for the disposal of a number of items from Powys Museums' collections. The main driver for the collection review was to reappraise items and to assess their suitability for long term preservation.

#### **5.0 One Powys Plan**

5.1 The Museum Service directly contributes to a number of the One Powys Plan outcomes, in particular, the following:-

- Stronger communities: Bringing people together in Powys so they feel that they matter and belong in their community
- Community Safety: For communities in Powys to be protected from crime and disorder and to feel safe and secure in the place that they live
- Education: All pupils in Powys are supported to achieve their full potential including those with additional learning needs
- Training & jobs for young people: More young people in Powys would be either in full-time education, gainful employment or employment related training within the county
- Long term conditions: Citizens with long term conditions are supported and empowered to manage their condition and live fulfilled lives
- Older people: Older people will be supported to maintain fulfilled lives within stronger communities
- Healthy lifestyles: Powys citizens will be encouraged to lead active and healthier lives
- Mental health & wellbeing: Powys citizens will lead fuller and longer lives, be resilient, have good health and be more able to fully participate and contribute to their communities.

#### **6.0 Options Considered/Available**

6.1 1. *Do Nothing*: this will inhibit Powys Museums from managing their collections in accordance with the Collections Development Policies

2. *Dispose of the items listed in Appendix A:* The Powys Museums' Collections Development Policies set out the principles that provides the museums with a framework for responsible and ethical acquisition and disposal of collections. The main driver for this collection review was to reappraise items and to assess their suitability for long term preservation.

## **7.0 Preferred Choice and Reasons**

7.1 The preferred choice is to dispose of the items listed in Appendix A.

7.2 The motivation for disposal of items from the Powys Museums' collections is driven by curatorial reasons. There are no financially motivated reasons for disposal of any items.

## **8.0 Support Services (Legal, Finance, Corporate Property, HR, ICT, BPU)**

8.1 Finance: We have no concerns about the implementation of the findings of the Collections Appraisal Project as it does not appear that there are any future budgetary implications to take account of.

8.2 Legal: Provided that the disposal procedures outlined in the Collections Development Policy have been followed, the recommendation can be supported from a legal point of view.

8.3 Property: Property will support this process and anticipates it will be involved so that it can confirm that the most appropriate route of disposal was used in each case.

## **9.0 Corporate Communications**

9.1 Senior Communications Manager: The report is of significant public and service user interest and requires proactive communication following decision.

## **10.0 Statutory Officers**

10.1 The Strategic Director Resources (S151 Officer) notes the comments made by finance

The Deputy Monitoring Officer notes the legal comment and in addition to compliance with policy the disposal must comply with legislative provisions.

## **11.0 Members' Interests**

**11.1** The Monitoring Officer is not aware of any specific interests that may arise in relation to this report. If the Member has an interest they should declare it at the start of the meeting and complete the relevant notification form.

<b>Recommendation:</b>	<b>Reason for Recommendation:</b>

446	'EW Bank Duchess' mangle from James Howell and Co. Ltd, Cardiff. Wooden rollers, and cast iron frame painted green and dark red. Used until 1972, and dating from around the First World War.
566	Washing machine, bought in Cardiff in 1932, made by G.E.C., and one of their first gearbox type machines, these were changed to a belt drive immediately after this model. The machine cost Â£30, and was used continuously until the end of 1973. It is original except for the rollers, and was the first electric washing machine in Aberdare, where the donor worked as a hairdresser. It washed three white coats, four gowns and about 100 towels a week; it never got choked by hair as a pump-driven machine would have been. Motor missing.
935.1	Moulding plane marked 'J. Evans' in back and 'Holbrook' in border, rear '5/6'. Stock perforated in corner.
935.2	Moulding plane marked 'J.E.R. Roberts' in front. Stock oak.
935.3	Moulding plane marked 'Jenkins' in front. Stock perforated in corner.
