1. Introduction

- 1.1 In 2015, the Pensions Regulator (TPR) assumed responsibility for Public Sector Pension Schemes. Prior to this, in June 2010, TPR issued guidance on the approach that they consider to be good practice for measuring the presence of member data. Specific targets were set for inclusion in the 2018 TPR report for data that TPR deemed as 'common'.
- 1.2 In March 2018 Powys Pension Fund commissioned a complete a review of the administration system's common pension data in line with the guidance notes set down by TPR. This was followed up with a repeat exercise in 2019 and 2020.
- 1.3 The Fund has carried out data cleansing exercises and checks periodically in the past as part of year-end exercises and triennial valuations. These exercises checked data provided by employers and data held on scheme member records.
- 1.4 In continuing efforts to improve the quality of its data, Powys Pension Fund is moving towards receiving 100% of its employer data on a monthly basis in an electronic format, with currently over 90% of active scheme member data now collected on a monthly basis direct from Employer payroll systems via the i-Connect facility.

2. Benchmark and Aims

- 2.1 TPR have set targets of 100% accuracy for data created after June 2010 and 95% accuracy for data created beforehand.
- 2.2 This data improvement plan aims to address the data issues that are identified during the data review exercises. It will set out the steps that the Fund will take to tackle the issues and improve the quality of the data that it holds in a continuous basis, with a view to achieving the highest quality of data possible.

3. Objectives and Measures

- 1) **To ensure accuracy in the quality of data held on scheme member records in order to facilitate accurate and timely payment of pension benefits.**

This will be achieved and measured through continuous reviews of data quality testing, through audit testing and checking against published service standards.

2) **To improve compliance with The Pensions Regulators (TPR) Code of Practice 14.**

This will be achieved and measured by a continuous improvement of scores in the TPR Compliance Monitoring Document.

3) **To decrease the number of ‘gone away’ addresses held for Scheme Members**

This will be achieved by undertaking periodic member tracing exercises.

4) **To ensure high quality data for valuation purposes and, therefore, increasing accuracy in valuation results with consideration given towards setting accurate employer contribution rates through accurate assessment of Fund assets and liabilities.**

This will be achieved through pre-valuation data cleansing exercises carried out with the Pension Fund Actuary and ongoing data quality testing via the iConnect system.

4. **Scope and Prioritising**

The data quality reviews already undertaken, measured the data on the administration system against the two types of data categories that TPR require:

Data cleansing for these records has already commenced as part of the Guaranteed Minimum Pension (GMP) Reconciliation project, but work is ongoing using the data cleansing results as a tool to focus on any problem areas.
