**Annex 9 - Background Data**

**June 2019**

CSSW Risk Based Approach to Highway Management.  
Rationale Behind the Approach.  
3. Risk Data Review

**Narrative**  
As part of the development process CSSW recommed a 2 year review. A high level "Risk Data Summary" is included in the CSSW documentation. This Data Summary has been populated for Powys.

Risk Data Summary											
Enter Relevant Data								Consider what it may mean		Record Observation on risks	
Asset	Category	Data	2014/2015	2015/2016	2016/2017	2017/2018	2018/2019	Trend	Interpretation	Observations	
Carriageways	Safety	Number of Cat 1 Defects	522	606	501	553	tbc	Stable within bounds	2018/2019 data needed to see if there is a recent upward trend or if values fluctuating within reasonable limits.	Average 553, fluctuating by 10% around average.	
		% of A Roads in poor condition (red, scanner)	3.3%	2.8%	3.5%	3.9%	3.9%	Deteriorating condition	Stable in last two years. Levels still respectable.	Condition held over last two years.	
		% of B Roads in poor condition (red, scanner)	6.0%	5.2%	5.5%	5.7%	5.3%	Improvement in last year, returning to previous levels	as above	Condition holding due to capital investment in recent years	
		% of C Roads in poor condition (red, scanner)	27.1%	25.1%	24.4%	23.0%	21.6%	Improving condition	as above	Improving condition due to capital investment in recent years but need to monitor as data collected on rolling basis so could be subject to significant in-year variation.	
		% of U Roads in poor condition (red, scanner) and or visual	Data Not Collected					N/A	No current data. Perception that condition no better than C roads.	Survey c2,100km approx £55k, £11k p.a. based on 5 year cycle. Looking to introduce coarse visual assessment as part of inspectors.	
		KSI (where road condition was a contributory factor)	46	57	52	53	40	Significant improvement last year	Too early to say if last years figures represent a downward trend.	Consistent until last year	
	Maintenance	Number of Cat 2 defects recorded	5,092	5,218	4,659	4,549	tbc	Consistent in last two years of available data	Numbers consistent over last two years. Await latest data to see if continuing.	Pleasant trend if latest figures are similar. Need to consider if harder line being taken on recording.	
		Number of Cat 2 defects not repaired (repair backlog)	67	105	399	983	tbc	Significantly increasing trend		Need to consider if increasing trend or if data not being entered correctly.	
		(% of roads to be considered for maintenance A roads (red and amber)	30.3%	29.6%	32.0%	33.7%	32.6%	Steady		Going forward Wales data will be reported at this level enabling better comparison of performance against Welsh average and peers.	
		(% of roads to be considered for maintenance B roads (red and amber)	35.6%	34.6%	36.1%	36.9%	34.8%	Steady			
		(% of roads to be considered for maintenance C roads (red and amber)	68.6%	67.2%	67.7%	67.2%	66.3%	Nominal improvement			
		(% of roads to be considered for maintenance U roads (red and amber)	Data Not Collected					N/A	No current data. Perception that condition no better than C roads.	Survey c2,100km approx £55k, £11k p.a. based on 5 year cycle. Looking to introduce coarse visual assessment as part of inspectors.	
	Financial Loss	Value of payout of 3rd party claims	79,858	45,889	32,884	26,529	18,704	Reducing settlement value			
		Number of claims received	113	109	74	107	168	Increasing claims			
		Number of claims lost due to not adhering to inspection regime	8	18	1	0	0	Consistent	Number dropped-off significantly since 14/15.		
		Number of claims lost for other reasons	12	19	21	36	39	Improved last year in % terms	Potential lag in submitting and settling claims may render comparison of recent years invalid at this time.		
				34%	30%	34%	23%
